Division 13 – Assessment Criteria for the Rural Zone

5.32 Rural Zone

The provisions in this division comprise the assessment criteria for the Rural Zone. They are:
- Overall outcomes for the Rural Zone (section 5.33);
- Specific outcomes, acceptable solutions and probable solutions for the Rural Zone (section 5.34).

5.33 Overall Outcomes for the Rural Zone

(a) The overall outcomes for the Rural Zone together with the overall outcomes for all Planning Areas are the purpose of the Planning Area Code.

(b) The overall outcomes sought for the Rural Zone are the following:

- A wide range of agricultural, forest practice, animal husbandry and rural support activities are encouraged;
- Agricultural practices and associated activities are managed and located to ensure environmental sustainability;
- The ongoing viability of extractive resource industries and extractive resource deposits is not compromised by the inappropriate location of residential and other sensitive uses;
- Rural activities minimise negative impacts on sensitive receptors;
- Agricultural land and rural industries are protected from the intrusion of incompatible development;
- Adequate access to services, markets and labour is maintained;
- The cultural, environmental and scenic values of the area are maintained;
- Accommodation Buildings that cater for short term tourist stays are established in association with or in proximity to tourist attractions and rural based activities;
- Activities avoid the fragmentation of land that compromise the viability and integrity of current and future rural based activities.

5.34 Specific Outcomes and Acceptable/Probable Solutions for the Rural Zone

The specific outcomes sought for the Rural Zone are included in column 1 of table 5.11. Acceptable solutions for self-assessable development and probable solutions for code assessable development are included in column 2 of table 5.11.

**Inconsistent Uses**

**S02**
The following defined uses are inconsistent uses and are not located within the Rural Zone:

- Car Parking Facility
- Car Wash
- Caravan Park
- Caretaker’s Residence
- Child Care Centre
- Dual Occupancy
- Fuel Depot
- General Industry
- Hotel
- Landscape Supply Production where on a lot less than or equal to 16ha
- Market
- Medical Centre
- Motor Vehicle Repair Station
- Multiple Dwellings
- Office
- Recycling Yard

**S2.1**
No solution provided.

**Accommodation Buildings**

**S03**  
Accommodation buildings or multiple dwellings that cater for tourists are established that have a direct nexus with a tourist feature or use, are compatible with the scenic, ecological or rural qualities and function of the surrounding landscape and are responsive to traditional building character.

**S3.1**  
The site is at least 16.0 hectares in area.

**S3.2**  
The number of dwelling units does not exceed five (5).

**S3.3**  
The maximum internal floor area of each dwelling unit (exclusive of balconies, verandas and decks) is 50m².

**S3.4**  
Dwelling units are setback at least 100.0 metres from all property boundaries.

**S3.5**  
(a) Dwelling units are provided in the form of detached buildings  
Or  
(b) Accommodation is provided within an existing building.

**S3.6**  
Buildings are separated by a distance of between 1.5 metres and 10.0 metres.

**S3.7**  
The floor level of buildings is raised above natural ground level by low impact structural supports such as timber or steel posts.

**S3.8**  
Exterior elements of the building are rendered or painted in colours that are compatible with the dominant colours in the surrounding landscape such as neutral or subdued natural greens, browns and yellows.

**S3.9**  
Buildings are constructed from high quality lightweight materials such as timber and corrugated metal.

**S3.10**  
Buildings incorporate the following architectural features:  
(a) Large balconies, verandas or decks;  
(b) Sunhoods or other window screening devices;  
(c) Large eave overhangs; and

<td></td>
</tr>
</tbody>
</table>

### Forest Practice

**SO4**

Site users and people on nearby properties are not subject to unacceptable risks to health or safety resulting from fire associated with Forest Practice.

**Note:** Forest practice activities should be undertaken in accordance with a Forest Management Plan as outlined in Planning Scheme Policy 11 Forest Practice. Caboolture Shire Council holds a voluntary register of farm forestry properties. A property registration assists in demonstrating Forest Practice use rights over the long term of the use as an aid to the security of harvest.

**S4.1**

For forest practice, a firebreak of 20.0 metres is provided along each property boundary line.

**Note:** This area may be cleared or contain fire retardant species.

### Building Design

**S05**

Building scale, form and bulk is consistent to that of a Dwelling House and incorporates traditional Queensland design elements.

**S5.1**

Site cover does not exceed 50% of the total site area

**S5.2**

(a) Length of wall, irrespective of recesses or projections, do not exceed 15.0 metres

Or

(b) Building bulk is reduced through:

(i) Significant recesses and projections in the horizontal and vertical planes; and

(ii) Elements of a finer scale than the main structural framing of the building.

**S5.3**

Building utilities such as lift motor rooms and telecommunications equipment are designed as architectural features of the building.

**S5.4**

Exterior elements of the building are rendered or painted in a range of compatible colours.

**S5.5**

Buildings are constructed from high quality materials.

**S5.6**

Buildings incorporate large decks, sun shading devices and other building features traditionally used in the design of Queensland houses.

**S5.7**

The main face of the building directly addresses the street.

**S5.8**

Buildings are orientated to be parallel to the alignment of the street or streets that they abut.

**S5.9**

Glass does not exceed a maximum degree of reflection of both heat and light of 20%.

### Waste Management

**SO17**

Refuse collection and recycling bins and storage facilities are:

(a) provided for site users; and

(b) integrated with the surrounding development and do not impact upon the residential amenity of the site.

**Note:** Recycling bins are not compulsory for industrial and commercial premises

**S17.1**

No solution provided.

**Note:** The design of the site is to take into account the requirements of Council’s policy Supply of Refuse and Recycling Services for Residential and Commercial Service.

</tr>
</tbody>
</table>

**Note:** The minimum separation distances relate to open buffers without suitable buffer elements. Where buffer elements are incorporated, these distances may be reduced. The use of suitable buffer elements will be a major consideration for Council in determining any proposed reduction of minimum separation distances. Where a number of separation distances are required for different sensitive receptors, the largest separation distance relating to the proposed use will be required.
