Please read the following notes about this overlay map:

This overlay map only affects you if your property is identified in a State bushfire prone area, and you wish to develop. It does not apply when proposing a change in use in the General Residential zone, Centre zone, Industry zone and Township zone.

Under State Government requirements, planning schemes must identify an area where bushfire hazard provisions apply. This overlay map shows Bushfire Prone Areas and comprises all land with the potential to be subject to significant bushfire attack.

This map has been provided by the State Government and is the latest information available to council at the time of adoption.

The Bushfire Prone Area includes potentially hazardous vegetation identified with a medium, high, or very high potential bushfire intensity. Land that could be subject to significant bushfire attack from aPOTENTIAL IMPACT BUFFER is included in a Potential Impact Buffer with a default width of 100m from all areas of medium, high or very high potential bushfire intensity.

Refer to the relevant zone code, local plan code and/or development code for requirements associated with this overlay map.

For further information regarding this overlay, please refer to the Bushfire Prone Area information sheet on the proposed tailormade amendment b page 2.

State bushfire prone area (State mapping july 2015)

- Very High Potential Bushfire Intensity
- High Potential Bushfire Intensity
- Medium Potential Bushfire Intensity
- Potential Impact Buffer

Please read the following notes about this overlay map:

This overlay map only affects you if your property is identified in a State bushfire prone area, and you wish to develop. It does not apply when proposing a change in use in the General Residential zone, Centre zone, Industry zone and Township zone.

Under State Government requirements, planning schemes must identify an area where bushfire hazard provisions apply. This overlay map shows Bushfire Prone Areas and complies with the potential to be subject to significant bushfire attack.

This map has been provided by the State Government and is the latest information available to Council at the time of adoption.

The Bushfire Prone Area includes potential hazardous vegetation classified with a medium, high, or very high bushfire potential intensity. Land that could be subject to significant bushfire attack is included in a Potential Impact Buffer with a default width of 100m from all areas of medium, high or very high potential bushfire intensity.

Refer to the relevant zone code, local plan code and/or development code for requirements associated with this overlay map.

For further information regarding this overlay, please refer to the Bushfire Prone Area information sheet on the Council website at www.moretonbay.qld.gov.au/mbrcplanningscheme

This map is provided in accordance with the provisions of the Planning and Development Act 2000 and the Planning Scheme. Council makes no representation or warranty about the accuracy, reliability, completeness or suitability for any particular purpose of this information. Council does not accept responsibility for any loss or damage arising from reliance on this document or any of the information contained therein.
Please read the following notes about this overlay map:

This overlay map only affects you if your property is identified in a State bushfire prone area, and you wish to develop. It does not apply when proposing a change to use in the General Residential zone, Centre zone, Industry zone and Township zone.

Under State Government requirements, planning schemes must identify an area where bushfire hazard provisions apply. This overlay map shows Bushfire Prone Area and comprises all land with the potential to be affected by bushfire including bushfire hazard prone area, bushfire potential area and bushfire potential to be subject to significant bushfire attack.

This map has been provided by the State Government and is the latest information available to Council at the time of adoption.

The Bushfire Prone Area includes potentially hazardous vegetation identified with a medium, high, or very high potential bushfire intensity. Land that could be subject to significant bushfire attack is identified by a Potential Impact Buffer with a default width of 100m from all areas of medium, high or very high potential bushfire intensity.

Refer to the relevant zone code, local plan code and/or development code for requirements associated with this overlay map.

For further information regarding this overlay, please refer to the Bushfire Prone Area information sheet on the Council’s website:

Please Note: Do Not Print using “Page Scaling: Fit to Printable Area”, this will distort the scale of the map and impacts quality of text and linework. Please print using setup of A3 paper size and Landscape orientation, with “Page Scaling: None” and you will not see this message.
overlay map — bushfire hazard

Please read the following notes about this overlay map:

This overlay map only affects you if your property is identified in a State bushfire prone area, and you wish to develop. It does not apply when proposing a change in use in the General Residential zone, Centre zone, Industry zone and Township zone.

Under State Government requirements, planning schemes must identify an area where bushfire hazard provisions apply. This overlay map shows Bushfire Prone Areas, and comprises all land with the potential to be subject to significant bushfire attack.

This map has been provided by the State Government and is the latest information available to Council at the time of adoption.

The Bushfire Prone Area includes potentially hazardous vegetation identified with a medium, high or very high potential bushfire intensity. Land that could be subject to significant bushfire attack as a consequence of the overlay map is included in a Potential Impact Buffer with a default width of 100m from all areas of medium, high or very high potential bushfire intensity.

Refer to the relevant zone code, local plan code and/or development code for requirements associated with this overlay map.

Bushfire

OUTSIDE MORETON BAY REGION LOCAL GOVERNMENT AREA

Please Note: Do Not Print using "Page Scaling: Fit to Printable Area", this will distort the scale of the map and impacts quality of text and linework. Please print using setup of A3 paper size and Landscape orientation, with "Page Scaling: None", and you will not see this message.
Please read the following notes about this overlay map:

This overlay map only affects you if your property is identified in a State bushfire prone area and you wish to develop. It does not apply when proposing a change in use in the General Residential zone, Centre zone, Industry zone and Township zone.

Under State Government requirements, planning schemes must identify an area where bushfire hazard prominence apply. This overlay map shows Bushfire Prone Areas, and complements all land with the potential to be subject to significant bushfire attack.

This map has been provided by the State Government and is the latest information available to Council at the time of adoption.

The Bushfire Prone Area includes potentially hazardous vegetation classified with a medium, high, or very high potential bushfire intensity. Land that could be subject to significant bushfire attack is identified in a Potential Impact Buffer with a default width of 100m from all areas of medium, high or very high potential bushfire intensity.

Refer to the relevant zone code, local plan code and/or development code for requirements associated with this overlay map.

For further information regarding this overlay, please refer to the Bushfire Prone Area information sheet on Council's website or contact Council's Customer Services on 1300 888 722.

STL Interest Review and Consultation Version 2019

Persons should not rely on the information shown in this document for any purpose.
Please read the following notes about this overlay map:

- This overlay map only affects you if your property is identified as a State bushfire prone area, and you wish to develop. It does not apply when proposing a change in use in the General Residential zone, Centre zone, Industry zone and Township zone.

- Under State Government requirements, planning schemes must identify an area where bushfire hazard provisions apply. This overlay map shows Bushfire Prone Areas and complies with the potential for a significant bushfire attack and potential impact buffer. A significant Bushfire Attack Potential is one that could be expected to result in damage to any property. Property owners are encouraged to evaluate their mesh against bushfire prone areas and the potential impact buffer, and contact Council on 3205 0555.

- This map has been provided by the State Government and is the latest information available to Council at the time of adoption.

- The bushfire prone area includes potentially hazardous vegetation identified with a medium, high, or very high potential bushfire intensity.

- Under State Government requirements, planning schemes must identify an area where bushfire hazard provisions apply. This overlay map shows Bushfire Prone Areas and complies with the potential for a significant bushfire attack and potential impact buffer. A significant Bushfire Attack Potential is one that could be expected to result in damage to any property. Property owners are encouraged to evaluate their mesh against bushfire prone areas and the potential impact buffer, and contact Council on 3205 0555.

- There is a potential impact buffer with a default width of 100m from all areas of medium, high or very high potential bushfire intensity.

- Refer to the relevant zone code, local plan code and/or development code for requirements associated with this overlay map.

- For further information regarding this overlay, please refer to the Bushfire Prone Area information sheet on Council’s website.

Please read the following notes about this overlay map:

This overlay map only affects you if your property is identified in a State bushfire prone area, and you wish to develop. It does not apply when proposing a change in use in the General Residential zone, Centre zone, Industry zone and Township zone.

*Proposed Tailored Amendment 1
State Interest Review and Consultation Version 2019
This overlay map only affects you if your property is identified in a State bushfire prone area and you wish to develop. It does not apply when proposing a change in use in the General Residential zone, Centre zone, Industry zone and Township zone.

Under State Government requirements, planning schemes must identify an area where bushfire hazard provisions apply. This overlay map shows Bushfire Prone Areas and comprises all land with the potential to be subject to significant bushfire attack.

This map has been provided by the State Government and is the latest information available to council at the time of adoption.

The Bushfire Prone Area includes potentially hazardous vegetation identified with a medium, high, or very high potential bushfire intensity. Land that could be subject to significant bushfire attack is included in a Potential Impact Buffer with a default width of 100m from all areas of medium, high or very high potential bushfire intensity.

Refer to the relevant zone code, local plan code and/or development code for requirements associated with this overlay map.

For further information regarding this overlay, please refer to the Bushfire Prone Area information sheet on council’s website. (www.moretonbay.qld.gov.au/mbrcplanningscheme)

Please read the following notes about this overlay map:

• This overlay map only affects you if your property is identified in a State bushfire prone area and you wish to develop.

• It does not apply when proposing a change in use in the General Residential zone, Centre zone, Industry zone and Township zone.

• Under State Government requirements, planning schemes must identify an area where bushfire hazard provisions apply. This overlay map shows Bushfire Prone Areas and comprises all land with the potential to be subject to significant bushfire attack.

• This map has been provided by the State Government and is the latest information available to council at the time of adoption.

• The Bushfire Prone Area includes potentially hazardous vegetation identified with a medium, high, or very high potential bushfire intensity.

• Land that could be subject to significant bushfire attack is included in a Potential Impact Buffer with a default width of 100m from all areas of medium, high or very high potential bushfire intensity.

• Refer to the relevant zone code, local plan code and/or development code for requirements associated with this overlay map.

Please read the following notes about this overlay map:

This overlay map only affects you if your property is identified in a State bushfire prone area, and you wish to develop. It does not apply when proposing a change in use in the General Residential zone, Centre zone, Industry zone and Township zone.

Under State Government requirements, planning schemes must identify an area where bushfire hazard provisions apply. This overlay map shows Bushfire Prone Areas and complexes all land with the potential to support a significant bushfire or the potential to be subject to significant bushfire attack.

This map has been provided by the State Government and is the latest information available to Council at the time of adoption.

The Bushfire Prone Area includes potentially hazardous vegetation identified with a medium, high or very high potential bushfire intensity. Land that could be subject to significant bushfire attack is included in a Potential Impact Buffer with a default width of 100m from all areas of medium, high or very high potential bushfire intensity.

Refer to the relevant zone code, local plan code and/or development code for requirements associated with this overlay map.

For further information regarding this overlay, please refer to the Bushfire Prone Area information sheet on the following website:

PUB_458716_AppliedAmendment3_PROP.pdf

STATE INTEREST REVIEW
and Consultation Version 2019
This overlay map only affects you if your property is identified in a State bushfire prone area and you wish to develop. It does not apply when proposing a change in use in the General Residential zone, Centre zone, Industry zone and Township zone.

Under State Government requirements, planning schemes must identify an area where bushfire hazard provisions apply. This overlay map shows Bushfire Prone Areas and covers all land with the potential to be subject to significant bushfire attack.

This map has been provided by the State Government and is the latest information available to council at the time of adoption.

The Bushfire Prone Area includes potentially hazardous vegetation classified with a medium, high, or very high potential bushfire intensity.

Land that could be subject to significant bushfire attack is indicated in a Potential Impact Buffer with a default width of 100m from all areas of medium, high or very high potential bushfire intensity.

Refer to the relevant zone code, local plan code and/or development code for requirements associated with this overlay map.

For further information regarding this overlay, please refer to the Bushfire Prone Area information sheet on the Planning Scheme Amendment 3 (BUSHFIRE PROHIBITION ZONES) - Proposed Tailored Amendment 1 - State Interest Review and Consultation Version 2019 - Moreton Bay Regional Council ID: 1579809.

Please read the following notes about this overlay map:

- This overlay map only affects you if your property is identified in a State bushfire prone area and you wish to develop. It does not apply when proposing a change in use in the General Residential zone, Centre zone, Industry zone and Township zone.
- This map has been provided by the State Government and is the latest information available to council at the time of adoption.
- The Bushfire Prone Area includes potentially hazardous vegetation classified with a medium, high, or very high potential bushfire intensity.
- Land that could be subject to significant bushfire attack is indicated in a Potential Impact Buffer with a default width of 100m from all areas of medium, high or very high potential bushfire intensity.

Welcome to the Moreton Bay Overview Map.

This map provides an overview of the area covered by the Moreton Bay Regional Council Planning Scheme.

The map includes several important features:

- **Property boundaries**
- **North Lakes Locality**

**State bushfire prone area (State mapping july 2015)**

- **Very high Potential Bushfire Intensity**
- **High Potential Bushfire Intensity**
- **Medium Potential Bushfire Intensity**
- **Potential Impact Buffer**

Please read the following notes about this overlay map:

1. **This overlay map only affects you if your property is identified in a State bushfire prone area, and you wish to develop. It does not apply when proposing a change in use in the General Residential zone, Centre zone, Industry zone and Township zone.**

2. **Under State Government requirements, planning schemes must identify an area where bushfire hazard provisions apply. This overlay map shows Bushfire Prone Areas and identifies all land with the potential to be subject to significant bushfire attack.**

3. **This map has been provided by the State Government and is the latest information available to Council at the time of adoption.**

The Bushfire Prone Area includes potentially hazardous vegetation classified with a medium, high, or very high potential bushfire intensity. Land that could be subject to significant bushfire attack is included in a Potential Impact Buffer with a default width of 100m from all areas of medium, high or very high potential bushfire intensity.

Refer to the relevant zone code, local plan code and/or development code for requirements associated with this overlay map.

Please do not use "Page Scaling: Fit to Printable Area", this will distort the scale of the map and impacts quality of text and linework. Please print using setup of A3 paper size and Landscape orientation, with "Page Scaling: None" and you will not see this message.
Please read the following notes about this overlay map:

This overlay map only affects you if your property is identified in a State bushfire prone area, and you wish to develop. It does not apply when proposing a change in use in the General Residential zone, Centre zone, Industry zone and Township zone.

Under State Government requirements, planning schemes must identify an area where bushfire hazard provisions apply. This overlay map shows Bushfire Prone Areas and comprises all land with the potential to be subject to significant bushfire attack.

This map has been prepared by the State Government and is the latest information available to Council at the time of adoption.

The Bushfire Prone Area includes potentially hazardous vegetation identified with a medium, high, or very high potential bushfire intensity.

Land that could be subject to significant bushfire attack fromembers, flames or radiant heat is included in a Potential Impact Buffer with a default width of 100m from all areas of medium, high or very high potential bushfire intensity.

Refer to the relevant zone code, local plan code and/or development code for requirements associated with this overlay map.

For further information regarding this overlay, please refer to the Bushfire Prone Area information sheet on the Council’s website.

Proposed Amended Planning Scheme

State Interest Review

and Consultation Version 2019
Please read the following notes about this overlay map:

This overlay map only affects you if your property is identified as a State bushfire prone area, and you wish to develop. It does not apply when proposing a change in use in the General Residential zone, Centre zone, Industry zone and Township zone.

Under State Government requirements, planning schemes must identify an area where bushfire hazard provisions apply. This overlay map shows Bushfire Prone Areas and incorporates all land with the potential to be subject to a potential bushfire attack. This map has been provided by the State Government and is the latest information available to council at the time of adoption.

The Bushfire Prone Area includes potentially hazardous vegetation described with a medium, high, or very high potential bushfire intensity.

Land that could be subject to a significant bushfire attack is indicated with a Potential Impact Buffer with a default width of 100m from all areas of medium, high or very high potential bushfire intensity.

Refer to the relevant zone code, local plan code and/or development code for requirements associated with this overlay map.

For further information regarding this overlay, please refer to the Bushfire Prone Area information sheet on the Planning Scheme Amendments Page.

Please read the following notes about this overlay map:

This overlay map only affects you if your property is identified in a State bushfire prone area and you wish to develop. It does not apply when proposing a change to use in the General Residential zone, Centre zone, Industry zone and Township zone.

Under State Government requirements, planning schemes must identify an area where bushfire hazard provisions apply. This overlay map shows Bushfire Prone Areas and comprises all land with the potential to be subject to significant bushfire attack.

This map has been provided by the State Government and is the latest information available to Council at the time of adoption.

The Bushfire Prone Area includes potentially hazardous vegetation classified with a medium, high or very high potential bushfire intensity.

Land that could be subject to significant bushfire attack is identified in a Potential Impact Buffer with a default width of 100m from all areas of medium, high or very high potential bushfire intensity.

Refer to the relevant zone code, local plan code and/or development code for requirements associated with this overlay map.

For further information regarding this overlay, please refer to the Bushfire Prone Area information sheet on the Sunshine Coast Council website.
Please read the following notes about this overlay map:

This overlay map only affects you if your property is identified in a State bushfire prone area, and you wish to develop. It does not apply when proposing a change in use in the General Residential zone, Centre zone, Industry zone and Township zone.

Under State Government requirements, planning schemes must identify an area where bushfire hazard provisions apply. This overlay map shows Bushfire Prone Areas and contains all land with the potential to be subject to significant bushfire attack.

This map has been provided by the State Government and is the latest information available to Council at the time of adoption.

The Bushfire Prone Area includes potentially hazardous vegetation classified with a medium, high, or very high potential bushfire intensity.

Land that could be subject to significant bushfire attack and the Potential Impact Buffer on bushfire prone land is included in a Potential Impact Buffer with a default width of 100m from all areas of medium, high or very high potential bushfire intensity.

Refer to the relevant zone code, local plan code and/or development code for requirements associated with this overlay map.

For further information regarding this overlay, please refer to the Bushfire Prone Area information sheet on the Sunshine Coast Regional Council website in the Moreton Bay Planning Scheme and the Council’s Planning Scheme website.
