

6 Zones

6 Zones

6.1 Preliminary

1. Zones organise the planning scheme area in a way that facilitates the location of preferred or acceptable land uses.
2. Zones are mapped and those maps are included in Schedule 2.
3. The categories of development and categories of assessment for development in a zone are in Part 5.
4. Zone specific provisions of assessment benchmarks are contained in a zone code.
5. A precinct may be identified for part of a zone.
6. Precinct specific provisions of assessment benchmarks are contained in the zone code.
7. Each zone code identifies the following:
 - a. the purpose of the code;
 - b. the overall outcomes that achieve the purpose of the code;
 - c. for accepted development subject to requirements, the requirements that the accepted development must satisfy;
 - d. for assessable development, the performance outcomes that achieve the overall outcomes and the purpose of the code;
 - e. for assessable development, examples that achieve aspects of the corresponding performance outcomes identified in the code;
 - f. precinct specific performance outcomes and examples;
 - g. some overlay specific (value and constraint) performance outcomes and examples relevant to land in the zone.
8. The following are the zone codes for the planning scheme:
 - a. Centre zone code
 - i. Caboolture centre precinct
 - ii. Morayfield centre precinct
 - iii. **Petrie mill precinct**
 - iv. Strathpine centre precinct
 - v. District centre precinct
 - vi. Local centre precinct
 - vii. Specialised centre precinct
 - b. Community facilities zone code
 - i. Abbey precinct
 - ii. Airfield precinct
 - iii. Utilities precinct
 - iv. Lakeside precinct
 - v. Special use precinct
 - c. Emerging community zone code
 - i. Interim precinct
 - ii. Transition precinct
 - d. Environmental management and conservation zone code
 - e. Extractive industry zone code
 - f. General residential zone code
 - i. Coastal communities precinct
 - ii. Suburban neighbourhood precinct
 - iii. Next generation neighbourhood precinct
 - iv. Urban neighbourhood precinct

- g. Industry zone code
 - i. Mixed industry and business precinct
 - ii. Light industry precinct
 - iii. General industry precinct
 - iv. Restricted industry precinct
 - v. Marine industry precinct
- h. Limited development zone code
- i. Recreation and open space zone code
 - i. Sport and recreation precinct
- j. Rural zone code
 - i. Agriculture precinct
 - ii. Cedarton Foresters Cooperative and Mt Nebo plant nursery precinct
 - iii. Hamlet precinct
 - iv. Woodfordia and abbey surrounds precinct
 - v. Rural living investigation precinct
- k. Rural residential zone code
- l. Township zone code
 - i. Township centre precinct
 - ii. Township convenience precinct
 - iii. Township residential precinct
 - iv. Township industry precinct

6 Zones

6.2 Zone codes

6.2.1 Centre zone code

6.2.1.1 Application - Centre zone

This code applies to undertaking development in the Centre zone, if:

1. the development has been categorised as either accepted development subject to requirements or assessable development - code assessment, and this code is identified as applicable to that development in the assessment benchmarks for assessable development and requirements for accepted development column of a table of assessment (Part 5);
2. the development has been categorised as assessable development - impact assessment (Part 5).

When using this code, reference should be made to section 5.3.2 Determining the category of development and category of assessment and, where applicable, section 5.3.3 Determining and applying the requirements for accepted development and the assessment benchmarks for assessable development located in Part 5.

For accepted development subject to requirements or assessable development under this Code:

1. Part A of the code applies to accepted development subject to requirements in a higher order, district, local or specialised centre precinct;
2. Part B of the code applies to assessable development in the 6.2.1.1 6.2.1.1 'Caboolture centre precinct';
3. Part C of the code applies to assessable development in the 6.2.1.2 6.2.1.2 'Morayfield centre precinct';
4. ~~Part D of the code applies to assessable development in the 6.2.1.3 6.2.1.3 'Petrie mill precinct';~~
5. Part E of the code applies to assessable development in the 6.2.1.4 6.2.1.4 'Strathpine centre precinct';
6. Part F of the code applies to assessable development in the 6.2.1.5 6.2.1.5 'District centre precinct';
7. Part G of the code applies to assessable development in the 6.2.1.6 6.2.1.6 'Local centre precinct';
8. Part H of the code applies to assessable development in the 6.2.1.7 6.2.1.7 'Specialised centre precinct'.

6.2.1.2 Purpose - Centre zone

1. The purpose of the Centre zone code is to provide for a mix of uses and activities. These uses include, but are not limited to; business, retail, professional, administrative, community, entertainment, educational, recreational, cultural and residential activities. Centres have a variety of scales based on their location and surrounding activities;
2. The purpose of the centre zone code is to recognise, foster and encourage the development of vibrant, multi-functional centres that form a network within the region to:
 - a. provide a foundation for economic growth through the interaction and co-location of a diverse mix of uses, the achievement of clustered economies, and the more efficient concentration of goods and service;
 - b. provide a focus for government and non-government investment in major public transport, health, higher education, cultural, recreational and entertainment facilities;
 - c. provide a focus for community and social interaction;
 - d. manage private travel demand by encouraging multi-purpose trips of lower frequency and reduced duration;

- e. provide enhanced opportunities for land use and transport integration particularly in respect of active (pedestrian, bicycle) and public transport networks;
 - f. provide an interesting and diverse mixed-use residential environment.
3. The Centre zone code seeks to implement the policy direction set in Part 3, Strategic Framework.
 4. The Centre zone comprises 7 precincts which have the following purpose:
 - a. Higher order centre precincts:
 - i. Caboolture, Morayfield and Strathpine centre precincts
The purpose of these higher order centre precincts is to support the development of the region's higher order centres as the main centres for administration, business, shopping and civic investment in the region. Higher order centres provide the greatest mix of land uses and the highest development densities. Higher order centres have a central, highly accessible core which contains the highest density of development, and accommodates land uses such as major and specialist retail, professional and other specialist services and civic, education, health and cultural facilities that benefit from a highly accessible location. Higher order centres are located around a significant transit node, and at the centre of the transport networks serving the community. These are the largest centres, providing a large number and range of employment opportunities serving the region's population.
 - ii. ~~Petrie mill precinct~~
~~The purpose of this higher order centre precinct is to maximise opportunities for the evolution of the precinct as a centre focused on education and health employment opportunities. The precinct will transform the role of the Petrie mill precinct as a crucial and vital part of the region's growth and economic future. The precinct will have a central, highly accessible core supported by a range of land uses such as retail, commercial, industry, residential and community functions including significant sport and recreation facilities and community uses which collectively and actively contribute to the broader role of Petrie as a district centre.~~
 - iii. Each higher order centre has its own precinct. The higher order centre precincts are:
Caboolture centre precinct
Morayfield centre precinct
~~Petrie mill precinct~~
Strathpine centre precinct

Note - The Mango Hill Infrastructure Development Control Plan applies to development in North Lakes.

b. District centre precinct

The purpose of the District centre precinct is to provide a wide range of services and facilities at a significantly lower scale and lower intensity than higher order centres and serve a smaller catchment population of 20,000 - 50,000 people. District centres provide a focal point for inter-suburban transport networks and for surrounding medium density neighbourhoods. District centres provide health, education and community facilities and a range of Shops⁽⁷⁵⁾ including full-line supermarkets and specialist stores to cater for weekly shopping needs.

The District centre precincts are:

Bellara / Bongaree
Burpengary
Deception Bay
Margate
Kallangur
Petrie
Warner
Albany Creek

6 Zones

Arana Hills

Note - The Mill at Moreton Bay Priority Development Area Development Scheme applies to development in the Petrie District Centre.

c. Local centre precinct

The purpose of the Local centre precinct is to provide a limited range of services, including convenience retail, to a cluster of local neighbourhoods. They have good local accessibility, particularly active transport and act as a focal point and meeting place for the local community. Local centres generally serve a catchment of 10,000- 15,000 people and are generally defined by the presence of a full-line supermarket or a fully functioning main street that caters for a catchment of the same size.

The Local centre precincts are:

- Albany Creek - Old North Road
- Banksia Beach, Banksia Beach Shopping Centre - Sunderland Drive
- Bongaree, First Avenue Strip
- Bray Park, Kensington Village Shopping Centre - Sovereign Avenue
- Beachmere, Beachmere Road
- Caboolture, Central Lakes - Pettigrew Street
- Clontarf, Elizabeth Avenue
- Kallangur, Lilly Brook Shopping Village - Brickworks Road
- Kippa-Ring, Dolphins Central - Ashmole Road
- Lawnton, Gympie Road
- Murrumba Downs, Murrumba Downs Shopping Centre - Dohles Rocks Road West
- Narangba, Young Road and Golden Wattle Drive

d. Specialised centre precinct

The purpose of the Specialised centre precinct is to provide for the establishment of retail uses which have specific locational or land requirements that are difficult to achieve within higher order, district or local centres. Bulky goods premises often needing a large area for the handling, display or storage of goods or direct vehicular access by members of the public to the site to load or unload goods. These uses service a regional catchment of 40,000 - 80,000 people, are clustered together forming individual precincts rather than being located at the periphery of a higher order, district or local centre.

The Specialised centre precincts are:

- Mango Hill, Anzac Avenue
- Morayfield, Morayfield Road south
- Rothwell, Deception Bay Road
- Rothwell, Anzac Avenue
- Strathpine, Gympie Road South
- Lawnton, Gympie Road

Note - In addition to centres a neighbourhood can contain small groups of Shops⁽⁷⁵⁾, Offices⁽⁵³⁾ and community activities known as Neighbourhood Hubs. These are small scale developments rather than centres and are guided by the zone or precinct they are located within (e.g. General residential zone) and are not addressed in this code.

5. The purpose of the code will be achieved through the following overall outcomes:

- a. Development is consistent with the role and function of the centre, as identified on the Moreton Bay centres network table below (refer Table 6.2.1.1).

Table 6.2.1.1 Moreton Bay centres network

Moreton Bay centres network					
	Higher Order -	Higher Order - Petrie-mill	District	Local	Specialised

Moreton Bay centres network					
	Caboolture, Morayfield and Strathpine				
Role/Function	- Key centre within the SEQ Region. - Most intense concentration of retail, commercial and civic development.	-Key centre within the SEQ Region: -Most intense concentration of employment:	- Focus for retail and commercial development within the planning area.	- Focus for retail and commercial activity within the local area.	- Focus for large (bulky goods) Showrooms ⁽⁷⁸⁾ .
Catchment	Regional	Regional	District	Local	Sub-Regional
Transport connectivity	Important focus for passenger rail and high frequency bus networks in the region.	Important focus for passenger rail and high frequency bus networks in the region:	Key focal point within the regional public transport system.	Stopping or transfer point for bus or train network.	Reliant on direct vehicular access due to the need to load and unload goods
Scale of Retail activities	>40,000m ² GFA	Not specified	15,000m ² - 25,000m ² GFA	5,000m ² - 7,000m ² GFA	Not specified

Other activities	- Regional focus for health, education, cultural and entertainment facilities - Regional civic park	-Regional focus for health, education and entertainment -Regional civic park	- Entertainment facilities - District civic park	- Small scale entertainment activities - Local civic park	- No other activities

6.2.1.2 Accepted development subject to requirements

If development is to be categorised as accepted development subject to requirements it must comply with the requirements for accepted development set out in Part A, Table 6.2.1.2. Where the development does not meet a requirement for accepted development (RAD) within Part A Table 6.2.1.2, the category of development changes to assessable development under the rules outlined in section 5.3.3. (1), and assessment is against the corresponding performance outcome (PO) identified in the table below. This only occurs whenever a RAD is not met, and is therefore limited to the subject matter of the RADs that are not complied with. To remove any doubt, for those RADs that are complied with, there is no need for assessment against the corresponding PO.

Requirements for accepted development (RAD)	Corresponding performance outcomes (PO)						
	Caboolture centre precinct	Morayfield centre precinct	Petrie mill precinct	Strathpine centre precinct	District centre precinct	Local centre precinct	Specialised centre precinct

Where development is categorised as assessable development - code assessment in the Table of Assessment, and located in a precinct, the assessment benchmarks are set out in: Part B, Table 6.2.1.1.1 Caboolture centre precinct; Part C, Table 6.2.1.2.1 Morayfield centre precinct; [Part D, Table 6.2.1.3.1 Petrie mill precinct](#); Part E, Table 6.2.1.4.1 Strathpine centre precinct; Part F, Table 6.2.1.5.1 District centre precinct; Part G, Table 6.2.1.6.1 Local centre precinct; and Part H, Table 6.2.1.7.1 Specialised centre precinct respectively; as well as the relevant purpose statement and overall outcomes of this code.

Where development is categorised as assessable development - impact assessment, the assessment benchmarks become the whole of the planning scheme.

Part A - Requirements for accepted development - Higher order, District, Local or Specialised centre precinct

Table 6.2.1.2 Requirements for accepted development - Higher order, District, Local or Specialised centre precincts

Requirements for accepted development
General requirements
Extensions to existing buildings

RAD1	<p>Extensions to an existing building do not exceed 80m² GFA on-site.</p> <p>Note -The increase in GFA as stated above, includes any previous increases in gross floor area undertaken as accepted development, building work or accepted development subject to requirements under this planning scheme.</p>
Active frontage	
RAD2	<p>Where involving an extension (building work) in front of the main building line:</p> <ol style="list-style-type: none"> a minimum of 50% of the front facade of the extension to the building is made up of windows or glazing between a height of 1m and 2m; the minimum area of window or glazing remains uncovered (e.g. is transparent and not covered by screens, curtains, furniture, internal fixtures, objects or the like) and free of signage. <p style="text-align: center;">Figure - Glazing</p> 
Building height	
RAD3	<p>Where involving an extension (building work), building height of the extension does not exceed the maximum height identified on Overlay map - Building heights.</p>
Car parking	
RAD4	<p>Development does not result in a reduction in the number or standard of car parking spaces provided on the site except where a reduction is required for the provision of cycle parking.</p>
RAD5	<p>Where additional car parking spaces are provided they are not located between the frontage and the main building line.</p>
Waste	
RAD6	<p>Where involving an extension (building work) and new waste management arrangements on site or changes to the existing waste management arrangements on site, all bins and bin storage areas are provided, designed and managed in accordance with Planning scheme policy – Waste.</p>
Landscaping	
RAD7	<p>Development does not result in a reduction in the area (m²) or standard of established landscaping on-site.</p> <p>Note - This does not apply to vacant parts of a site not developed that might be grassed or contain other vegetation.</p>

6 Zones

Lighting	
RAD8	<p>Any new or changes to existing artificial lighting is directed and shielded in such a manner as not to exceed the recommended maximum values of light technical parameters for the control of obtrusive light given in Table 2.1 of the Australian Standard AS 4282 (1997) Control of Obtrusive Effects of Outdoor Lighting.</p> <p>Note - "Curfewed hours" are taken to be those hours between 10pm and 7am on the following day.</p>
Clearing of habitat trees where not located in the Environmental areas overlay map	
RAD9	<p>Development does not result in the damaging, destroyed or clearing of a habitat tree. This does not apply to:</p> <ol style="list-style-type: none"> Clearing of a habitat tree located within an approved development footprint; Clearing of a habitat tree within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; Clearing of a habitat tree reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; Clearing of a habitat tree reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural , Rural residential and Environmental management and conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence; Clearing of a habitat tree reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes; Clearing of a habitat tree in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council; Clearing of a habitat tree associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens; Native forest practice where accepted development under Part 1, 1.7.7 Accepted development. <p>Editor's note - A native tree measuring greater than 80cm in diameter when measured at 1.3m from the ground is recognised as a 'habitat tree'. For further information on habitat trees, refer to Planning scheme policy – Environmental areas and corridors. Information detailing how this measurement is undertaken is provided in Australian Standard AS 4970 2009 Protection of Trees on Development Sites - Appendix A.</p>
Works requirements	
Utilities	
RAD10	<p>Where available, the development is connected to:-</p> <ol style="list-style-type: none"> an existing reticulated electricity supply; telecommunications and broadband; reticulated sewerage;

	<p>d. reticulated water;</p> <p>e. sealed and dedicated road.</p> <p>Development is provided with an appropriate level of service and infrastructure in accordance with Planning scheme policy - Integrated design (Appendix A).</p>
--	--

Access	
RAD	<p>The frontage road is fully constructed to Council's standards.</p> <p>Note - Roads are considered to be constructed in accordance with Council standards when there is sufficient pavement width, geometry and depth to comply with the requirements of Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures. Testing of the existing pavement may be required to confirm whether the existing works meet the standards in Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p> <p>Note - Frontage roads include streets where no direct lot access is provided.</p>
RAD11	<p>Any new or changes to existing site access crossovers and driveways are designed, and located and constructed in accordance with:</p> <p>a. where for a Council-controlled road and associated with a Dwelling house:</p> <ol style="list-style-type: none"> i. Planning scheme policy - Integrated design; <p>b. where for a Council-controlled road; and not associated with a Dwelling house:</p> <ol style="list-style-type: none"> i. AS/NZS2890.1 section 3; or Parking facilities Part 1: Off street car parking; ii. AS/NZS 2890.2 - Parking facilities Part 2: Off-street commercial vehicle facilities; iii. Planning scheme policy - Integrated design; iv. Schedule 8 - Service vehicle requirements; <p>c. where for a State-Controlled road, the Safe Intersection Sight Distance requirements in Austroads and the appropriate IPWEAQ standard drawings, or a copy of a Transport Infrastructure Act 1994, section 62 approval.</p>
RAD12	<p>Any new or changes to existing internal driveways and access ways are designed and constructed in accordance with AS/NZS 2890.1 Parking Facilities Part 1: Off street car parking and the relevant standards in Planning scheme policy - Integrated design.</p>
RAD	<p>Access driveways, manoeuvring areas and loading facilities are sealed and provide for service vehicles listed in Schedule 8 - Service vehicle requirements for the relevant use. The on-site manoeuvring is to be in accordance with Schedule 8 - Service vehicle requirements.</p>

Stormwater

6 Zones

<p>RAD13</p>	<p>Any new or changes to existing stormwater run-off from the site is conveyed to a point of lawful discharge without causing actionable nuisance or annoyance to any person, property or premises in accordance with Planning scheme policy – Integrated design.</p> <p>Note - A watercourse as defined in the Water Act may be accepted as a lawful point of discharge providing the drainage discharge from the site does not increase the downstream flood levels during events up to and including the 1% AEP storm. An afflux of +20mm may be accepted on Council controlled land and road infrastructure. No worsening is ensured when stormwater is discharged into a catchment that includes State Transport Infrastructure.</p>				
<p>RAD14</p>	<p>Development incorporates a minimum of 2% of the site area constructed as a bioretention system in accordance with Planning scheme policy – Integrated design if the development:-</p> <ul style="list-style-type: none"> a. is for urban purposes only;- b. involves a land area greater than 2500m²; c. will result in 6 or more dwellings; OR will result in an impervious area greater than 25% of the net developable area. <p>Where development:</p> <ul style="list-style-type: none"> a. is for an urban purpose that involves a land area 2500m² or greater in size; and b. that results in 6 or more dwellings; or c. that result in an impervious area greater than 25% of the net developable area, <p>incorporates a 'deemed to comply solution' to manage stormwater quality.</p> <p>Note - The deemed to comply solution is to be designed, constructed, established and maintained in accordance with the requirements of Water by Design 'Deemed to Comply Solutions - Stormwater Quality Management for South East Queensland' and Planning scheme policy - Integrated design.</p>				
<p>RAD</p>	<p>Development ensures that surface flows entering the premises from adjacent properties are not blocked, diverted or concentrated.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland may be required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p>				
<p>RAD</p>	<p>Development ensures that works (e.g. fences and walls) do not block, divert or concentrate the flow of stormwater to adjoining properties.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland may be required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p>				
<p>RAD</p>	<p>Stormwater drainage infrastructure (excluding detention and bio-retention systems) through or within private land is protected by easements in favour of Council (at no cost to Council). Minimum easement widths are as follows:</p> <table border="1" data-bbox="263 1966 1465 2083"> <thead> <tr> <th data-bbox="263 1966 865 2083">Pipe Diameter</th> <th data-bbox="865 1966 1465 2083">Minimum Easement Width (excluding access requirements)</th> </tr> </thead> <tbody> <tr> <td style="height: 40px;"></td> <td></td> </tr> </tbody> </table>	Pipe Diameter	Minimum Easement Width (excluding access requirements)		
Pipe Diameter	Minimum Easement Width (excluding access requirements)				

Stormwater Pipe up to 825mm diameter	3.0m
Stormwater Pipe up to 825mm diameter with Sewer pipe up to 225mm diameter	4.0m
Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the pipe and clear of all pits.
<p>Note - Additional easement width may be required in certain circumstances in order to facilitate maintenance access to the stormwater system.</p> <p>Note - Refer to Planning scheme policy - Integrated design (Appendix C) for easement requirements over open channels.</p>	

Site works and construction management	
RAD15	The site and any existing structures are to be maintained in a tidy and safe condition.
RAD16	<p>Site construction works incorporate temporary stormwater run-off, erosion and sediment controls and trash traps designed in accordance with the Urban Stormwater Quality Planning Guidelines, Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design.</p> <p>Development does not cause erosion or allow sediment to leave the site.</p> <p>Note - The International Erosion Control Association (Australasia) Best Practice Erosion and Sediment Control provides guidance on strategies and techniques for managing erosion and sedimentation.</p>
RAD	No dust emissions extend beyond the boundaries of the site during soil disturbances and construction works.
RAD	<p>Existing street trees are protected and not damaged during works.</p> <p>Note - Where development occurs in the tree protection zone, measures and techniques as detailed in Australian Standard AS 4970 Protection of trees on developments sites are adopted and implemented.</p>
RAD19	Any damage to Council land or infrastructure is repaired or replaced with the same materials, prior to plan sealing, or final building classification.
RAD17	Construction traffic including contractor car parking is controlled in accordance with a traffic management plan, prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) to ensure all traffic movements to and from the site are safe.
RAD20	Any material dropped, deposited or spilled on the road(s) as a result of construction processes associated with the site are to be cleaned at all times.
RAD18	<p>All native vegetation to be retained on-site is temporarily fenced or protected prior to and during development works.</p> <p>Note - No parking of vehicles or storage of machinery or goods is to occur in these areas during development works</p>

6 Zones

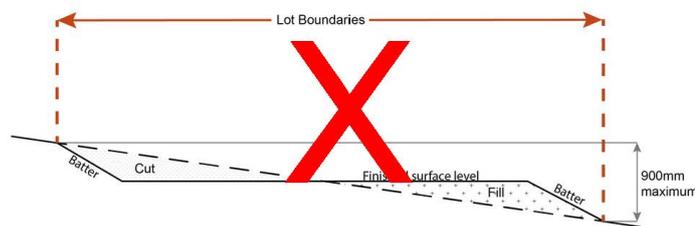

RAD	<p>Disposal of materials is managed in one or more of the following ways:</p> <ol style="list-style-type: none"> all cleared vegetation, declared weeds, stumps, rubbish, car bodies, scrap metal and the like are removed and disposed of in a Council land fill facility; or all native vegetation with a diameter below 400mm is to be chipped and stored on-site. <p>Note - No burning of cleared vegetation is permitted.</p> <p>Note - The chipped vegetation must be stored in an approved location.</p>
RAD	<p>All development works are carried out within the following times:</p> <ol style="list-style-type: none"> Monday to Saturday (other than public holidays) between 6:30am and 6:30pm on the same day; no work is to be carried out on Sundays or public holidays.

Earthworks

RAD22

The total of all cut and fill on-site does not exceed 900mm in height.

Figure -- Cut and Fill

Note -- This is site earthworks not building work.

Filling or excavation does not:

- involve a change in level of more than 1.0m relative to natural ground level

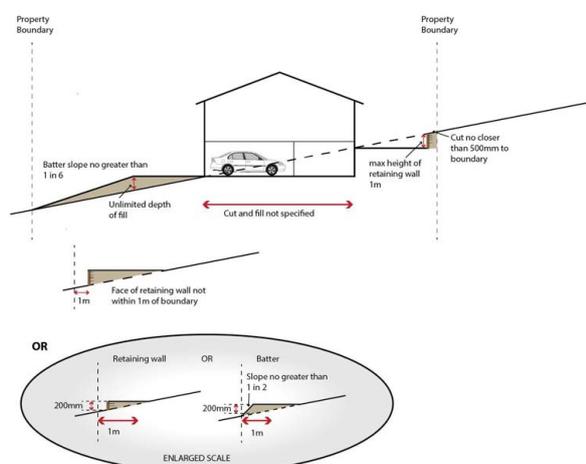

OR

result in a batter greater than 1V to 6H;

- necessitate the construction of a freestanding retaining wall exceeding 1.0m in height relative to finished ground level;
- result in the top of any cut batter, or the exposed face of any freestanding retaining wall supporting that cut, being closer than 500mm to a property boundary;
- result in the toe of any fill batter, or exposed face of any freestanding retaining wall supporting that fill, being closer than 1.0m to a property boundary unless:
 - the depth of fill within the 1.0m strip does not exceed 200mm relative to natural ground level; or
 - the batter slope within that 1.0m strip is no steeper than 1V to 2H.

THE NEW FIGURE BELOW IS PROPOSED AS PART OF THIS AMENDMENT

Figure - Filling or Excavation

<p>RAD</p>	<p>Cut and fill batters, (other than batters to dams and water impoundments), have a finished slope no steeper than the following:</p> <ol style="list-style-type: none"> any cut batter is no steeper than 1V in 4H; any fill batter, (other than a compacted fill batter), is no steeper than 1V in 4H; any compacted fill batter is no steeper than 1V in 4H.
<p>RAD</p>	<p>All cut and fill batters are provided with appropriate scour, erosion protection and run-off control measures including catch drains at the top of batters and lined batter drains as necessary.</p>
<p>RAD</p>	<p>Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance of steep slopes and batters.</p> <p>Note - Inspection and certification of steep slopes and batters may be required by a suitably qualified and experienced RPEQ.</p>
<p>RAD</p>	<p>All fill and excavation is contained on-site and is free draining.</p>
<p>RAD</p>	<p>Earthworks undertaken on the development site are shaped in a manner which does not:</p> <ol style="list-style-type: none"> prevent stormwater surface flow which, prior to commencement of the earthworks, passed onto the development site, from entering the land; or redirect stormwater surface flow away from existing flow paths; or divert stormwater surface flow onto adjacent land (other than a road) in a manner which: <ol style="list-style-type: none"> concentrates the flow; or increases the flow rates of stormwater over the affected section of the adjacent land above the situation which existed prior to the diversion; or causes actionable nuisance to any person, property or premises.
<p>RAD</p>	<p>All fill placed on-site is:</p>

6 Zones

	<p>a. limited to that necessary for the approved use;</p> <p>b. clean and uncontaminated (i.e. no building waste, concrete, green waste, actual acid sulfate soils, potential acid sulfate soils or contaminated material etc.) material is used as fill.</p>
RAD21	<p>The site is prepared and the fill placed on-site in accordance with Australian Standard AS3798.</p> <p>Note - The fill is to be inspected and tested in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures</p>
RAD	<p>No filling or excavation is undertaken in an easement issued in favour of Council or a public sector entity.</p> <p>Note - Public sector entity is defined in Schedule 2 of the Act.</p>
RAD23	<p>Filling or excavation that would result in any of the following is not carried out on site: does not result in:-</p> <p>a. reduction in cover over any Council or public sector entity infrastructure to less than 600mm;</p> <p>b. an increase in finished surface grade over, or within 1.5m on each side of, the Council or public sector entity infrastructure above that which existed prior to the filling or excavation works being undertaken.;</p> <p>c. prevent reasonable access to Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the site for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity is defined in Schedule 2 of the Act.</p>

Fire services

Note - The provisions under this heading only apply if:

- a. the development is for, or incorporates:
- i. reconfiguring a lot for a community title scheme creating 1 or more vacant lots; or
 - ii. material change of use for 2 or more sole occupancy units on the same lot, or within the same community titles scheme; or
 - iii. material change of use for a Tourist park⁽⁸⁴⁾ with accommodation in the form of caravans or tents; or
 - iv. material change of use for outdoor sales⁽⁵⁴⁾, outdoor processing or outdoor storage where involving combustible materials.

AND

- b. none of the following exceptions apply:
- i. the distributor-retailer for the area has indicated, in its netserv plan, that the premises will not be served by that entity's reticulated water supply; or
 - ii. every part of the development site is within 60m walking distance of an existing fire hydrant on the distributor-retailer's reticulated water supply network, measured around all obstructions, either on or adjacent to the site.

Note - The provisions under this heading do not apply to buildings that are required by the Building Code of Australia to have a fire hydrant system complying with Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations or other fire fighting facilities which provide equivalent protection.

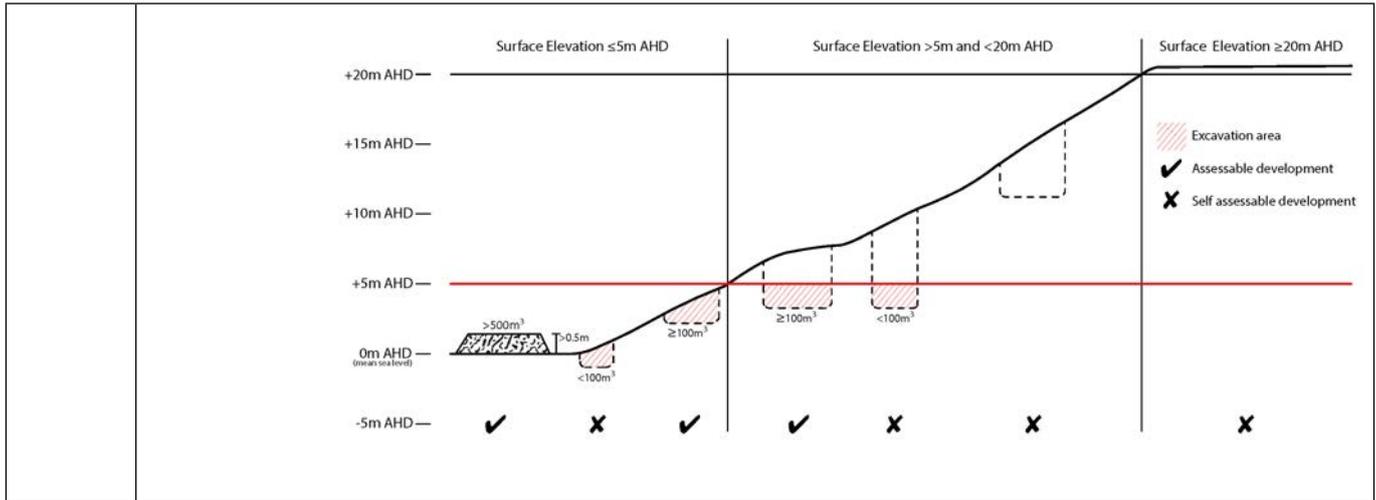

RAD24	<p>External fire hydrant facilities are provided on site to the standard prescribed under the relevant parts of <i>Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations</i>.</p> <p>Note - For this requirement for accepted development, the following are the relevant parts of AS 2419.1 (2005):</p> <ol style="list-style-type: none"> a. in regard to the form of any fire hydrant - Part 8.5 and Part 3.2.2.1, with the exception that for Tourist parks⁽⁸⁴⁾ or development comprised solely of dwellings and their associated outbuildings, single outlet above-ground hydrants or suitably signposted in-ground hydrants would be an acceptable alternative; b. in regard to the general locational requirements for fire hydrants - Part 3.2.2.2 (a), (e), (f), (g) and (h) as well as Appendix B of AS 2419.1 (2005); c. in regard to the proximity of hydrants to buildings and other facilities - Part 3.2.2.2 (b), (c) and (d), with the exception that: <ol style="list-style-type: none"> i. - for dwellings and their associated outbuildings, hydrant coverage need only extend to the roof and external walls of those buildings; ii. - for caravans and tents, hydrant coverage need only extend to the roof of those tents and caravans; iii. - for outdoor sales⁽⁵⁴⁾, processing or storage facilities, hydrant coverage is required across the entire area of the outdoor sales⁽⁵⁴⁾, outdoor processing and outdoor storage facilities; and d. in regard to fire hydrant accessibility and clearance requirements - Part 3.5 and where applicable, Part 3.6.
RAD25	<p>A continuous path of travel having the following characteristics is provided between the vehicle access point to the site and each external fire hydrant and hydrant booster point on the land:</p> <ol style="list-style-type: none"> a. an unobstructed width of no less than 3.5m; b. an unobstructed height of no less than 4.8m; c. constructed to be readily traversed by a 17 tonne HRV fire brigade pumping appliance; d. an area for a fire brigade pumping appliance to stand within 20m of each fire hydrant and 8m of each hydrant booster point.
RAD26	<p>On-site fire hydrant facilities are maintained in effective operating order in a manner prescribed in <i>Australian Standard AS1851 (2012) – Routine service of fire protection systems and equipment</i>.</p>
RAD27	<p>For development that contains on-site fire hydrants external to buildings:</p> <ol style="list-style-type: none"> a. those external hydrants can be seen from the vehicular entry point to the site; or b. a sign identifying the following is provided at the vehicular entry point to the site: <ol style="list-style-type: none"> i. the overall layout of the development (to scale); ii. internal road names (where used); iii. all communal facilities (where provided); iv. the reception area and on-site manager's office (where provided); v. external hydrants and hydrant booster points; vi. physical constraints within the internal roadway system which would restrict access by fire fighting appliances to external hydrants and hydrant booster points. <p>Note - The sign prescribed above, and the graphics used are to be:</p> <ol style="list-style-type: none"> a. in a form;

6 Zones

	<p>b. of a size;</p> <p>c. illuminated to a level;</p> <p>which allows the information on the sign to be readily understood, at all times, by a person in a fire fighting appliance up to 4.5m from the sign.</p>
RAD28	<p>For development that contains on-site fire hydrants external to buildings, those hydrants are identified by way of marker posts and raised reflective pavements markers in the manner prescribed in the technical note <i>Fire hydrant indication system</i> produced by the Queensland Department of Transport and Main Roads.</p> <p>Note - Technical note Fire hydrant indication system is available on the website of the Queensland Department of Transport and Main Roads.</p>
Use specific requirements	
Residential uses (Dwelling units⁽²³⁾ and Caretaker's accommodation⁽¹⁰⁾)	
RAD29	The dwelling is provided with a separate pedestrian entrance to that of the non-residential use on-site.
RAD30	Dwellings are located behind or above the non-residential use on-site.
RAD31	<p>Dwellings are provided with a private open space area that:</p> <p>a. is directly accessible from a living area within the dwelling;</p> <p>b. is screened for privacy;</p> <p>c. ground level floor dwellings include a minimum private open spaces area of 16m² with a minimum dimension of 4m that is not located in front of the main building line; or above ground level floor dwellings include a minimum private open space area of 8m² with a minimum dimension of 2.5m.</p>
RAD32	The street number is clearly displayed at the entrance to the dwelling, and at the front of the site to enable identification by emergency services ⁽²⁵⁾ .
Home based business⁽³⁵⁾	
RAD33	A maximum of 1 employee (not a resident) OR 2 customers OR customers from within 1 Small rigid vehicle (SRV) or smaller are permitted on the site at any one time.
RAD34	The Home based business ⁽³⁵⁾ occupies an area of the existing dwelling or on-site structure not greater than 40m ² gross floor area.
Telecommunications facility⁽⁸¹⁾	
<p>Editor's note - In accordance with the Federal legislation Telecommunications facilities⁽⁸¹⁾ must be constructed and operated in a manner that will not cause human exposure to electromagnetic radiation beyond the limits outlined in the Radiocommunications (Electromagnetic Radiation - Human Exposure) Standard 2003 and Radio Protection Standard for Maximum Exposure Levels to Radiofrequency Fields - 3Khz to 300Ghz.</p>	
RAD35	A minimum area of 45m ² is available at ground level to allow for additional equipment shelters and associated structures for the purpose of co-locating on the proposed facility.

RAD36	The development results in no net reduction in the minimum quantity and standard of landscaping, private or communal open space or car parking spaces required under the planning scheme or under an existing development approval.
RAD37	Equipment shelters and associated structures are located: <ul style="list-style-type: none"> a. directly beside the existing equipment shelter and associated structures; b. behind the main building line; c. further away from the frontage than the existing equipment shelter and associated structures; d. a minimum of 10m from side and rear boundaries, except where in the Industry and Extractive industry zones, the minimum side and rear setback is 3m.
RAD38	Equipment shelters and other associated structures are either the same type of colour or material to match the surrounding locality.
RAD39	The facility is enclosed by security fencing or by other means to ensure public access is prohibited.
RAD40	A minimum 3m wide strip of dense planting is provided around the perimeter of the fenced area, between the development and street frontage and adjoining uses. <p>Note - Landscaping is provided in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person to ensure compliance with Planning scheme policy - Integrated design.</p>
RAD41	All equipment comprising the telecommunications facility ⁽⁸¹⁾ which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure no noise from this equipment can be heard, or felt at the site boundary.
Values and constraints requirements	
Note - The relevant values and constraints requirements do not apply where the development is consistent with a current Development permit for Reconfiguring a lot or Material change of use or Operational work, where that approval has considered and addressed (e.g. through a development footprint plan (or similar in the case of Landslide hazard) or conditions of approval) the identified value or constraint under this planning scheme.	
Acid sulfate soils - (refer Overlay map - Acid sulfate soils to determine if the following requirements apply)	
Note - Planning scheme policy - Acid sulfate soils provides guidance for requirements for accepted development that has the potential to disturb acid sulfate soils i.e. development involving filling or excavation works below the thresholds of 100m ³ and 500m ³ respectively.	
RAD42	Development does not involve: <ul style="list-style-type: none"> a. excavation or otherwise removing of more than 100m³ of soil or sediment where below 5m Australian Height Datum AHD, or b. filling of land of more than 500m³ of material with an average depth of 0.5m or greater where below the 5m AHD.

6 Zones

Environmental areas (refer Overlay map - Environmental areas to determine if the following requirements apply)

Note - The following are excluded from the native clearing provisions of this planning scheme:

- Clearing of native vegetation located within an approved development footprint;
- Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency;
- Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure;
- Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental Management and Conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence;
- Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes;
- Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council;
- Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens;
- Grazing of native pasture by stock;
- Native forest practice where accepted development under Part 1, 1.7.7 Accepted development.

Note - Definition for native vegetation is located in Schedule 1 Definitions.

Note - Native vegetation subject to this requirement primarily comprises of matters of national environmental significance (MNES), matters of state environmental significance (MSES). They also comprise some matters of local environmental significance (MLES). A MLES is defined in Schedule 1.2, Administrative definitions. A list of the elements that apply to the mapped MSES and MLES is provided in Appendix 1 of the Planning scheme policy - Environmental areas.

Editors' Note - The accuracy of overlay mapping can be challenged through the development application process (code assessable development) or by way of a planning scheme amendment. See Council's website for details.

Editors' Note - When clearing native vegetation within a MSES area, you may still require approval from the State government.

RAD43 Where no suitable land cleared of native vegetation exists, clearing of native vegetation in a High Value Area or Value Area is for the purpose of a new dwelling house⁽²²⁾ or extension to an existing dwelling house⁽²²⁾ only on lots less than 750m².

	<p>Editor's note - See in heading above for other uses excluded from native vegetation clearing requirements.</p> <p>Editor's note - Where vegetation clearance is accepted development subject to requirements, care should be undertaken to avoid adverse impacts on koalas, koala habitat values and habitat connectivity and to encourage existing koala usage of the site. Measures to minimise impacts include:</p> <ol style="list-style-type: none"> i. co-locating all associated activities, infrastructure and access strips; ii. be the least valued area of koala habitat on the site; iii. minimise the footprint of the development envelope area; iv. minimise edge effects to areas external to the development envelope; v. location and design consideration to ensure koala safety and movement in accordance with the Koala-sensitive Design Guideline and Planning scheme policy – Environmental areas; vi. sufficient area between the development and koala habitat trees to achieve their long-term viability. <p>Editor's note - Where vegetation clearing is accepted development subject to requirements, consideration should be given to avoid clearing habitat trees. Habitat trees may contain structural hollows where animals live, breed and shelter. The provision of nest boxes or salvaging of hollows will provide compensatory roosting and nesting opportunities for local wildlife including sugar gliders, possums and owls. For further information see Planning scheme policy – Environmental areas.</p>
RAD44	<p>No clearing of native vegetation is to occur within the Value Offset Area MLES - Waterway buffer or Value Offset Area MLES - Wetland buffer.</p> <p>This does not apply to the following:</p> <ol style="list-style-type: none"> a. Clearing of native vegetation located within an approved development footprint; b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental management and conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence; e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes; f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council; g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens; h. Grazing of native pasture by stock; i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development.
Extractive resources separation area (refer Overlay map - Extractive resources (separation area) to determine if the following requirements apply)	
RAD45	Development does not result in more than one dwelling house ⁽²²⁾ per lot within separation areas.
RAD46	<p>Development within the separation area does not include the following uses:</p> <ol style="list-style-type: none"> a. caretaker's accommodation⁽¹⁰⁾; b. community residence⁽¹⁶⁾; c. dual occupancy⁽²¹⁾; d. dwelling unit⁽²³⁾; e. hospital⁽³⁶⁾; f. rooming accommodation⁽⁶⁹⁾; g. multiple dwelling⁽⁴⁹⁾; h. non-resident workforce accommodation⁽⁵²⁾; i. relocatable home park⁽⁶²⁾; j. residential care facility⁽⁶⁵⁾;

6 Zones

	<ul style="list-style-type: none"> k. resort complex⁽⁶⁶⁾; l. retirement facility⁽⁶⁷⁾; m. rural workers' accommodation⁽⁷¹⁾; n. short-term accommodation⁽⁷⁷⁾; o. tourist park⁽⁸⁴⁾.
RAD47	<p>All habitable rooms within the separation area are:</p> <ul style="list-style-type: none"> a. acoustically insulated to achieve the noise levels listed in Schedule 1 Acoustic Quality Objectives, Environmental Protection (Noise) Policy 2008; b. provided with mechanical ventilation.
RAD48	Private open space areas are separated from the resource processing area by buildings or a 1.8m high solid structure.
Extractive resources transport routes (refer Overlay map - Extractive resources (transport route and buffer) to determine if the following requirements apply)	
RAD49	<p>The following uses are not located within the 100m wide transport route buffer:</p> <ul style="list-style-type: none"> a. Caretaker's accommodation⁽¹⁰⁾, except where located in the Extractive industry zone; b. Community residence⁽¹⁶⁾; c. Dual occupancy⁽²¹⁾; d. Dwelling house⁽²²⁾; e. Dwelling unit⁽²³⁾; f. Hospital⁽³⁶⁾; g. Rooming accommodation⁽⁶⁹⁾; h. Multiple dwelling⁽⁴⁹⁾; i. Non-resident workforce accommodation⁽⁵²⁾; j. Relocatable home park⁽⁶²⁾; k. Residential care facility⁽⁶⁵⁾; l. Resort complex⁽⁶⁶⁾; m. Retirement facility⁽⁶⁷⁾; n. Rural workers' accommodation⁽⁷¹⁾; o. Short-term accommodation⁽⁷⁷⁾; p. Tourist park⁽⁸⁴⁾.
RAD50	Except for an existing vacant lot, development does not create a new vehicle access point onto an Extractive resources transport route.
RAD51	A vehicle access point is located, designed and constructed in accordance with Planning scheme policy - Integrated design.
Heritage and landscape character (refer Overlay map - Heritage and landscape character to determine if the following requirements apply)	
<p>Note - Places, including sites, objects and buildings having local cultural heritage significance, are identified on Overlay map - Heritage and landscape character and listed in Schedule 1 of Planning scheme policy - Heritage and landscape character. Places also having cultural heritage significance at a State level and being entered in the Queensland Heritage Register, are also identified in Schedule 1 of Planning scheme policy - Heritage and landscape character.</p>	
RAD52	<p>Development is for the preservation, maintenance, repair and restoration of the site, object or building.</p> <p>This does not apply to Listed item 99, in Schedule 1 - List of sites, objects and buildings of significant historical and cultural value of Planning scheme policy - Heritage and landscape character.</p>

	Note - Preservation, maintenance, repair and restoration are defined in Schedule 1 - Definitions
RAD53	<p>A cultural heritage conservation management plan is prepared in accordance with Planning scheme policy – Heritage and landscape character and submitted to Council prior to the commencement of any preservation, maintenance, repair and restoration works. Any preservation, maintenance, repair and restoration works are in accordance with the Council approved cultural heritage conservation management plan.</p> <p>This does not apply to Listed item 99 in Schedule 1 - List of sites, objects and buildings of significant historical and cultural value of Planning scheme policy - Heritage and landscape character.</p>
RAD54	Development does not result in the removal of or damage to any significant tree identified on Overlay map – Heritage and landscape character and listed in Appendix 2 of Planning scheme policy – Heritage and landscape character.
RAD55	<p>The following development does not occur within 20m of the base of any significant tree, identified on Overlay map – Heritage and landscape character and listed in Appendix 2 of Planning scheme policy – Heritage and landscape character:</p> <ol style="list-style-type: none"> construction of any building; laying of overhead or underground services; any sealing, paving, soil compaction; any alteration of more than 75mm to the ground surfacelevel prior to work commencing.
RAD56	Pruning of a significant tree occurs in accordance with Australian Standard AS 4373-2007 - Pruning of Amenity Trees.
Infrastructure buffers (refer Overlay map - Infrastructure buffers to determine if the following requirements apply)	
RAD57	<p>Development does not include the following uses within a Wastewater treatment site buffer:</p> <ol style="list-style-type: none"> Caretaker's accommodation⁽¹⁰⁾; Community residence⁽¹⁶⁾; Dual occupancy⁽²¹⁾; Dwelling house⁽²²⁾; Dwelling unit⁽²³⁾; Hospital⁽³⁶⁾; Rooming accommodation⁽⁶⁹⁾; Multiple dwelling⁽⁴⁹⁾; Non-resident workforce accommodation⁽⁵²⁾; Relocatable home park⁽⁶²⁾; Residential care facility⁽⁶⁵⁾; Resort complex⁽⁶⁶⁾; Retirement facility⁽⁶⁷⁾; Rural workers' accommodation⁽⁷¹⁾; Short-term accommodation⁽⁷⁷⁾; Tourist park⁽⁸⁴⁾.
RAD58	Development does not involve the construction of any buildings or structures within a Bulk water supply infrastructure buffer.
RAD59	Development involving a major hazard facility or an Environmentally Relevant Activity (ERA) is setback 30m from a Bulk water supply infrastructure buffer.
RAD60	All habitable rooms located within an Electricity supply substation buffer are:

6 Zones

	<ul style="list-style-type: none"> a. located a minimum of 10m from an electricity supply substation⁽⁸⁰⁾ ; and b. acoustically insulated to achieve the noise levels listed in Schedule 1, Acoustic Quality Objectives, Environmental Protection (Noise) Policy 2008.
Overland flow path (refer Overlay map - Overland flow path to determine if the following requirements apply)	
RAD61	Development for a material change of use or building work does not involve the construction of a building or structure in an Overland flow path area.
RAD62	<p>Development for a material change of use or operational work does not impede the flow of flood waters through the premises or worsen flood flows to other premises.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow</p>
RAD63	Development for a material change of use or building work ensures that fencing in an overland flow path area is at least 50% permeable.
RAD64	Development for a material change of use or building work that involves a hazardous chemical ensures the hazardous chemicals is not located within an overland flow path area.
RAD65	Development for a material change of use or building work for a Park ⁽⁵⁷⁾ ensures that work is provided in accordance with the requirements set out in Appendix B of the Planning scheme policy - Integrated design.
Scenic amenity - Regionally significant (Hills) and Locally important (Coast) - (refer Overlay map - Scenic amenity to determine if the following requirements apply)	
RAD66	<p>Where located in the Locally important (Coast) scenic amenity overlay;</p> <ul style="list-style-type: none"> a. landscaping comprises indigenous coastal species; b. fences and walls facing the coast are no higher than 1m. Where fences and walls are higher than 1m, they have 50% transparency. This does not apply to a fence or wall at an angle of 90o to the coast; c. where over 12m in height, the building design includes the following architectural character elements: <ul style="list-style-type: none"> i. curving balcony edges and walls, strong vertical blades and wall planes; <div style="text-align: center;">  </div> <ul style="list-style-type: none"> ii. balcony roofs, wall articulation expressed with different colours, curves in plan and section, and window awnings;

iii. Roof top outlooks, tensile structure as shading devices; and

iv. lightweight structures use white frame elements in steel and timber, bold colour contrast.

d. existing pine trees, palm trees, mature fig and cotton trees are retained.

Note - A list of appropriate indigenous coastal species is identified in Planning scheme policy - Integrated design.

Riparian and wetland setbacks (refer Overlay map - Riparian and wetland setback to determine if the following requirements apply)

Note - W1, W2 and W3 waterway and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.

RAD67

No development is to occur within:

- a. 50m from top of bank for W1 waterway and drainage line
- b. 30m from top of bank for W2 waterway and drainage line
- c. 20m from top of bank for W3 waterway and drainage line
- d. 100m from the edge of a Ramsar wetland, 50m from all other wetlands.

Note - W1, W2 and W3 waterways and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.

Note - In some cases, the top of bank may not be easily defined, as such a hydraulic measurement may be applied instead. Moreton Bay Regional Council will provide further direction on how to determine and locate the setback boundary in these locations.

6 Zones

	Note - The minimum setback distance applies to the each side of waterway.
--	---

6.2.1.1 Caboolture centre precinct

6.2.1.1.1 Purpose - Caboolture centre precinct

1. The purpose of the code will be achieved through the following overall outcomes for the Caboolture centre precinct:
 - a. Development reinforces the Caboolture centre precinct as the main centre for administration and business within the Moreton Bay Region.
 - b. Development contributes to the consolidation of the Caboolture centre precinct, through:
 - i. greater land use efficiency within the precinct;
 - ii. increasing residential density and diversity within the centre and around the railway station.
 - c. Development is contained within the precinct boundaries and does not result in centre uses occurring outside of the expansion of the Caboolture centre precinct into adjoining zones.
 - d. Development incorporates transit oriented development principles and encourages increased active and public transport usage, by:
 - i. increasing land use intensity within walking distance of public transport facilities;
 - ii. contributing to attractive, walkable street environments, through streetscape upgrades and enhancements;
 - iii. prioritising pedestrian and cycle safety and movement over private vehicle access and movement.
 - e. High density residential activities are encouraged within the precinct.
 - f. The intensity of development and mix of land uses provided in the precinct supports the provision of high frequency public transport services and other services and facilities.
 - g. The built form of the Caboolture centre precinct is characterised by medium to high rise buildings.
 - h. King Street remains the prominent location for higher order retail uses in the precinct.
 - i. Strategic re-development of key sites within the precinct provide an opportunity to:
 - i. increase the intensity and mix of land uses provided in the precinct;
 - ii. increase land use efficiency, through more intense building forms;
 - iii. realise important pedestrian connections and public realm improvements.
 - j. The number of car parking spaces is managed to:
 - i. encourage the use of active and public transport;
 - ii. increase land use efficiency;
 - iii. improve development feasibility;
 - iv. avoid the negative impacts of large areas of car parking on the streetscape.
 - k. Pedestrian connections are provided to integrate the development with the street, public spaces and the surrounding area.

6 Zones

- I. Buildings contribute to an efficient and attractive, sub-tropical centre, through:
 - i. high quality, distinctive design which addresses streets and public spaces;
 - ii. energy efficient buildings which achieve best practice environmental performance;
 - iii. the use of high quality, low-maintenance building materials, lightweight elements and recesses.
- m. Crime prevention through environmental design principles are incorporated into the design of buildings and public spaces to ensure the safety and security of people and property.
- n. The ground and podium levels of development are occupied by retail, commercial or Community uses⁽¹⁷⁾ to provide activities close to the public realm.
- o. **Service stations:**
 - i. **establish where they will not disrupt, fragment or negatively impact active frontages or streets where pedestrian safety and comfort are of high importance;**
 - ii. **establish on heavily trafficked roads where the amenity of surrounding residential uses is already subject to impacts from road vehicle noise;**
 - iii. **establish in locations that will not have a negative impact on the street environments intended to include active frontages;**
 - iv. **do not negatively impact adjoining residents or the streetscape;**
 - v. **ancillary uses or activities only service the convenience needs of users.**
- p. Adverse impacts on the amenity of surrounding land uses are minimised by mitigating noise, odour and air quality impacts on residents to a level consistent with the location within or adjoining the centre.
- q. Uses and activities contribute to a horizontal and vertical mix and the co-location of uses, concentrated in a compact urban form.
- r. General works associated with the development achieves the following:
 - i. new development is provided with a high standard of services to meet and support the current and future needs of users of the site, including roads, street lighting services, telecommunications and reticulated electricity (underground wherever possible), water and sewerage (where available);
 - ii. the development manages stormwater to:
 - A. ensure the discharge of stormwater does not adversely affect the quality, environmental values or ecosystem functions of downstream receiving waters;
 - B. prevent stormwater contamination and the release of pollutants;
 - C. maintain or improve the structure and condition of drainage lines and riparian areas;
 - D. avoid off-site adverse impacts from stormwater.
 - iii. the development does not result in unacceptable impacts on the capacity and safety of the external road network;
 - iv. the development ensures the safety, efficiency and useability of access ways and parking areas;
 - v. site works including earthworks are managed to be safe and have minimal impacts on adjoining or adjacent premises, the streetscape or the environment.
- s. Activities associated with the use do not cause a nuisance by way of aerosols, fumes, light, noise, odour, particles or smoke.
- t. Noise generating uses are designed, sited and constructed to minimise the transmission of noise to appropriate levels and do not cause environmental harm or nuisance.

- u. Noise sensitive uses are designed, sited and constructed so as not to be subject to unacceptable levels of noise.
- v. Development avoids areas subject to constraint, limitation, or environmental value. Where development cannot avoid these identified areas, it responds by:
 - i. adopting a 'least risk, least impact' approach when designing, siting and locating development in any area subject to a constraint, limitation or environmental value to minimise the potential risk to people, property and the environment;
 - ii. ensuring no further instability, erosion or degradation of the land, water or soil resource;
 - iii. when located within a Water buffer area, complying with the Water Quality Vision and Objectives contained in the Seqwater Development Guidelines: Development Guidelines for Water Quality Management in Drinking Water Catchments 2012.
 - iv. maintaining, restoring and rehabilitating environmental values, including natural, ecological, biological, aquatic, hydrological and amenity values, and enhancing these values through the provision of planting and landscaping, and facilitating safe wildlife movement and connectivity through:
 - A. the provision of replacement, restoration, rehabilitation planting and landscaping;
 - B. the location, design and management of development to avoid or minimise adverse impacts on ecological systems and processes;
 - C. the requiring of environmental offsets in accordance with the Environmental Offsets Act 2014.
 - v. protecting native species and protecting and enhancing species habitat;
 - vi. protecting and preserving the natural, aesthetic, architectural historic and cultural values of significant trees, places, objects and buildings of heritage and cultural significance;
 - vii. establishing effective separation distances, buffers and mitigation measures associated with identified infrastructure to minimise adverse effects on sensitive land uses from odour, noise, dust and other nuisance generating activities;
 - viii. establishing, maintaining and protecting appropriate buffers to waterways, wetlands, native vegetation and significant fauna habitat;
 - ix. ensuring it promotes and does not undermine the ongoing viability, integrity, operation, maintenance and safety of identified infrastructure;
 - x. ensuring effective and efficient disaster management response and recovery capabilities;
 - xi. where located in an overland flow path:
 - A. development siting, built form, layout and access responds to the risk presented by the overland flow and minimises risk to personal safety;
 - B. development is resilient to the impacts of overland flow by ensuring the siting and design accounts for the potential risks to property associated with the overland flow;
 - C. development does not impact on the conveyance of the overland flow for any event up to and including the 1% AEP for the fully developed upstream catchment;
 - D. development directly, indirectly and cumulatively avoid an increase in the severity of overland flow and potential for damage on the premises or other premises, public lands, watercourses, roads or infrastructure.
- w. Development in the Caboolture centre precinct includes one or more of the following:

6 Zones

x.

<ul style="list-style-type: none"> Bar⁽⁷⁾ Caretaker's accommodation⁽¹⁰⁾ Child care centre⁽¹³⁾ Club⁽¹⁴⁾ Community care centre⁽¹⁵⁾ Community use⁽¹⁷⁾ Dual occupancy⁽²¹⁾ - if in a mixed use building Dwelling unit⁽²³⁾ Educational establishment⁽²⁴⁾ Emergency services⁽²⁵⁾ Food and drink outlet⁽²⁸⁾ 	<ul style="list-style-type: none"> Function facility⁽²⁹⁾ Hardware and trade supplies⁽³²⁾ Health care services⁽³³⁾ Home based business⁽³⁵⁾ Hotel⁽³⁷⁾ Indoor sport and recreation⁽³⁸⁾ Low impact industry⁽⁴²⁾ - if not located adjoining a main street Market⁽⁴⁶⁾ Multiple dwelling⁽⁴⁹⁾ Office⁽⁵³⁾ 	<ul style="list-style-type: none"> Place of worship⁽⁶⁰⁾ Rooming accommodation⁽⁶⁹⁾ Sales office⁽⁷²⁾ Service industry⁽⁷³⁾ Shop⁽⁷⁵⁾ Shopping centre⁽⁷⁶⁾ Short term accommodation⁽⁷⁷⁾ Showroom⁽⁷⁸⁾ Theatre⁽⁸²⁾ Veterinary services⁽⁸⁷⁾
---	--	--

y. Development in the Caboolture centre precinct does not include any of the following:

<ul style="list-style-type: none"> Agricultural supplies store⁽²⁾ Air services⁽³⁾ Animal husbandry⁽⁴⁾ Animal keeping⁽⁵⁾ Aquaculture⁽⁶⁾ Brothel⁽⁸⁾ Bulk landscape supplies⁽⁹⁾ Cemetery⁽¹²⁾ Crematorium⁽¹⁸⁾ Cropping⁽¹⁹⁾ Detention facility⁽²⁰⁾ 	<ul style="list-style-type: none"> Extractive industry⁽²⁷⁾ High impact industry⁽³⁴⁾ Intensive animal industry⁽³⁹⁾ Intensive horticulture⁽⁴⁰⁾ Marine industry⁽⁴⁵⁾ Medium impact industry⁽⁴⁷⁾ Motor sport facility⁽⁴⁸⁾ Outdoor sport and recreation⁽⁵⁵⁾ Permanent plantation⁽⁵⁹⁾ Relocatable home park⁽⁶²⁾ 	<ul style="list-style-type: none"> Rural industry⁽⁷⁰⁾ Rural workers accommodation⁽⁷¹⁾ Special industry⁽⁷⁹⁾ Tourist park⁽⁸⁴⁾ Transport depot⁽⁸⁵⁾ Warehouse⁽⁸⁸⁾ Wholesale nursery⁽⁸⁹⁾ Winery⁽⁹⁰⁾
---	--	--

z. Development not listed in the tables above may be considered on its merits and where it reflects and supports the outcomes of the zone.

Note - Refer to Planning scheme policy - Caboolture concept plan for details and examples.

Part B - Criteria for assessable development - Caboolture centre precinct

Where development is categorised as assessable development - code assessment in the Table of Assessment, the assessment benchmarks are the criteria set out in Part B, Table 6.2.1.1.1 as well as the purpose statement and overall outcomes of this code.

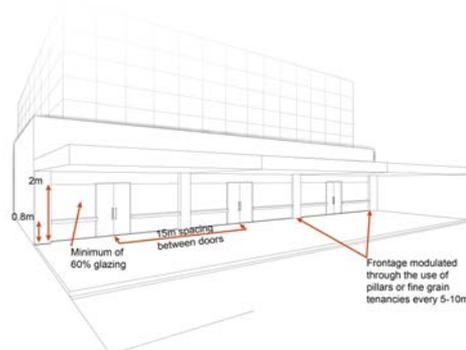

Where development is categorised as assessable development - impact assessable, the assessment benchmarks become the whole of the planning scheme.

Table 6.2.1.1.1 Assessable development - Caboolture centre precinct

Performance outcomes	Examples that achieve aspects of the Performance Outcomes
General criteria	
Role of Caboolture centre precinct	
<p>PO1</p> <p>Development in the Caboolture centre precinct:</p> <ul style="list-style-type: none"> a. reflects the prominence of the Caboolture centre precinct as a higher order centre and key focal point for regional employment and development in South East Queensland; b. does not undermine the growth of the Caboolture centre precinct as the central business district, being the focus for administration, business, commercial and high quality retail in the Moreton Bay region; c. is of a size, scale and range of services commensurate with the role and function of this precinct within the centres network. <p>Note - Refer to Moreton Bay centres network Table 6.2.1.1</p> <p>Note - Refer to Planning scheme policy - Caboolture concept plan for details and examples.</p>	<p>No example provided.</p>
<p>PO2</p> <p>Development maximises the efficient use of land and provides for future growth within the precinct by maintaining or increasing the GFA and land use intensity within the precinct boundaries to promote economic development.</p> <p>Note - Development within the Caboolture centre precinct is expected to capitalise on the area's strategic advantages, including co-location with other businesses and government administration and access to high quality public transport, by maximising the efficient use of land. Activities that are land intensive, but do not promote economic development, such as open car parks, are discouraged.</p>	<p>E2</p> <p>Development within the Caboolture centre precinct core, as indicated on 'Figure 6.2.1.1.1 - Caboolture ', achieves a minimum plot ratio of 1:1.</p> <p>Note - Plot ratio is the ratio of gross floor area to the area of the site. For example, a minimum plot ratio of 1:1 means a 1,000m² site is to be developed with a minimum of 1,000m² gross floor area.</p>
Active frontage	
<p>PO3</p>	<p>No example provided.</p>

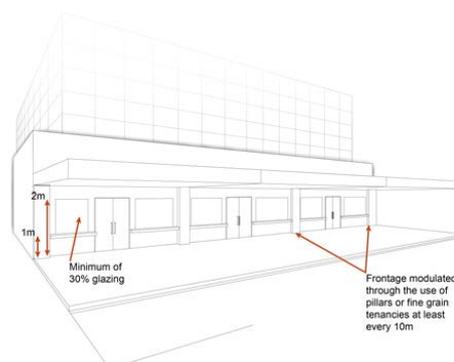

6 Zones

<p>Development incorporates transit oriented development principles and encourages active and public transport usage, by:</p> <ul style="list-style-type: none"> a. contributing to attractive, highly walkable street environments, through streetscape upgrades and enhancements (e.g wide footpaths, furniture, art, street trees etc.); b. prioritising pedestrian and cycle safety and movement over private vehicle access and movement. <p>Note - Streetscape upgrades are to be designed and constructed in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Refer to Planning scheme policy - Caboolture concept plan for details and examples.</p>	
<p>PO4</p> <p>Development on a site shown on 'Figure 6.2.1.1.1 - Caboolture 'as requiring a frontage type A, B or C, is built to the street alignment (0m setback) for the full width of the street frontage.</p> <p>Note - Refer to Planning scheme policy - Caboolture concept plan for details and examples.</p>	<p>No example provided.</p>
<p>PO5</p> <p>Buildings are designed and oriented to address and activate areas of pedestrian movement, to:</p> <ul style="list-style-type: none"> a. promote vitality, interaction and casual surveillance; b. concentrate and reinforce pedestrian activity; c. avoid opaque facades to provide visual interest to the street frontage. <p>Note - Refer to Planning scheme policy - Caboolture concept plan for details and examples.</p>	<p>E5.1</p> <p>Development on-sites shown on 'Figure 6.2.1.1.1 - Caboolture 'as requiring a frontage type A incorporates:</p> <ul style="list-style-type: none"> a. a minimum of 60% of the length of the street frontage glazed between 0.8m and 2.0m above finished ground level; b. external doors which directly adjoin the street frontage at least every 15m; c. modulation in the facade, by incorporating a change in tenancy or the use of pillars or similar elements every 5-10m; d. the minimum window or glazing is to remain uncovered and free of signage.

Figure - Frontage Type A**E5.2**

Development on-sites shown on 'Figure 6.2.1.1.1 - Caboolture 'as requiring a frontage type B incorporates:

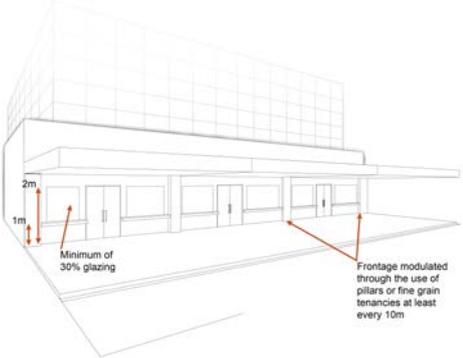

- a minimum of 50% of the length of the street frontage glazed between 1.0m and 2.0m above **finished** ground level;
- modulation in the facade, by incorporating fine grain tenancies or the use of pillars or similar elements at least every 10m;
- the minimum window or glazing is to remain uncovered and free of signage.

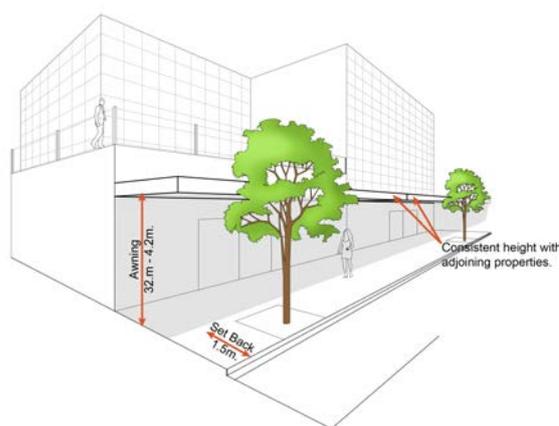

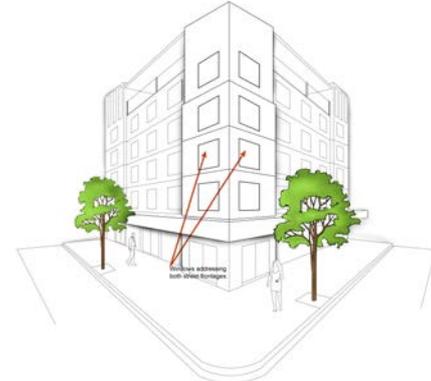

Figure - Frontage Type B**E5.3**

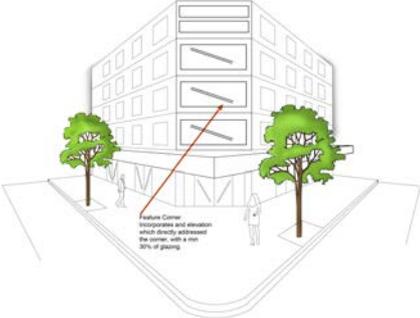

Development on-sites shown on 'Figure 6.2.1.1.1 - Caboolture 'as requiring a frontage type C incorporates:

- a minimum of 30% of the length of the street frontage glazed between 1.0m and 2.0m above **finished** ground level;

6 Zones

	<ul style="list-style-type: none"> b. modulation in the facade, by incorporating fine grain tenancies or the use of pillars or similar elements at least every 10m; c. the minimum window or glazing is to remain uncovered and free of signage. <p style="text-align: center;">Figure - Frontage Type C</p> 
<p>PO6</p> <p>Building frontages encourage streetscape activity, by providing pedestrian protection from solar exposure and inclement weather.</p> <p>Note - Refer to Planning scheme policy - Caboolture concept plan for details and examples.</p>	<p>E6</p> <p>Development on-sites shown on 'Figure 6.2.1.1.1 - Caboolture 'as requiring a frontage type A, B or C incorporate an awning which:</p> <ul style="list-style-type: none"> a. is cantilevered; b. extends for the full width of the site; c. is a minimum of 3.2m and maximum 4.2m above the pavement height; d. aligns with adjoining sites to provide continuous shade and shelter for pedestrians; e. is constructed from high quality, low maintenance materials; f. is set back 1.5m from the kerb line to accommodate mature street trees and regulatory signage.

	<p style="text-align: center;">Figure - Awning requirements</p> 
<p>PO7</p> <p>Buildings on highly visible and accessible street corners (as shown on 'Figure 6.2.1.1.1 - Caboolture ') incorporate design measures on the corners to assist in legibility of the street environment and promote activity on the street frontage.</p> <p>Note - Design measures will vary depending on the building and location, however may include the following:</p> <ol style="list-style-type: none"> increasing the height of the building on the corner; stepping back the building on the corner to create an additional face; including prominent building entrances and windows on the corners; the use of a focal point, such as a tower, visual display or artwork on the corner. <p>Note - Refer to Planning scheme policy - Caboolture concept plan for details and examples.</p>	<p>E7.1</p> <p>Buildings located on a street corner shown on 'Figure 6.2.1.1.1 - Caboolture 'as a prominent corner incorporate windows which address both street frontages.</p> <p style="text-align: center;">Figure - Prominent corner requirements</p>  <p>E7.2</p> <p>Buildings located on a street corner shown on 'Figure 6.2.1.1.1 - Caboolture 'as a feature corner incorporate an elevation which directly faces the corner and has a minimum of 30% glazing.</p>

	<p style="text-align: center;">Figure - Feature corner requirements</p> 
	<p>E7.3</p> <p>Buildings located at the junction of Beerburum Road and Hasking Street and James Street:</p> <ol style="list-style-type: none"> a. provide a 4.0m by 4.0m truncation, to be dedicated as road reserve; b. incorporate a 4.0m by 4.0m concave building chamfer at the corner for the full height of the building; c. provide a well-designed facade, including: <ol style="list-style-type: none"> i. windows and openings; ii. pedestrian entrances, particularly on the building chamfer; iii. projections and articulation. <p>Note - Where above-ground infrastructure, service pillars or cabinets are located in the middle of the footpath as a result of a corner truncation, development relocates the infrastructure to the new boundary.</p>
<p>Setbacks</p>	
<p>PO8</p> <p>Front building setbacks ensure buildings address and actively interface with streets and public spaces.</p> <p>Note - Refer to Planning scheme policy - Caboolture concept plan for details and examples.</p>	<p>E8</p> <p>Buildings are built to the street alignment for the full width of the street frontage, excluding vehicle crossovers.</p>
<p>Site area</p>	
<p>PO9</p>	<p>No example provided.</p>

<p>The development has sufficient area and dimensions to accommodate required buildings and structures, vehicular access, manoeuvring and parking and landscaping.</p>	
Building height	
<p>PO10</p> <p>Building height:</p> <ul style="list-style-type: none"> a. reflects the prominence of the Caboolture centre precinct as a higher order centre and key focal point for regional employment and development in South East Queensland; b. maximises land use intensity around the Caboolture rail station; c. allows for distinctive and innovative design outcomes on prominent sites; d. ensures an even distribution of retail and commercial development across the Caboolture centre precinct and avoids over-concentration of activities in one location; e. provides a transition to lower density areas surrounding the Central Business District. <p>Note - Refer to Planning scheme policy - Caboolture concept plan for details and examples.</p>	<p>E10</p> <p>Building height is within the minimum and maximum height identified on Overlay map - Building heights.</p> <p>Note - Development on street corners identified as a prominent or feature corner on 'Figure 6.2.1.1.1 - Caboolture 'may incorporate an increased building height on the corner, if the building:</p> <ul style="list-style-type: none"> a. provides high quality and unique architectural design outcomes that emphasise the prominence of the street corner; b. positively contributes to the cityscape.
<p>PO11</p> <p>Taller buildings incorporate a podium which provides a human-scaled, strong and continuous frontage to the street.</p> <p>Note - Refer to Planning scheme policy - Caboolture concept plan for details and examples.</p>	<p>E11.1</p> <p>For sites that adjoin Elliot Street, Esme Street, James Street and Hasking Street:</p> <ul style="list-style-type: none"> a. buildings include a podium that is built to the boundary to a maximum height of 15m; b. all parts of the building that are greater than 15m in height are setback a minimum of 6m. <p>E11.2</p> <p>For sites that adjoin King Street and George Street:</p> <ul style="list-style-type: none"> a. buildings include a podium that is built to the boundary to a maximum height of 12m; b. all parts of the building that are greater than 12m in height are setback a minimum of 6m.
Built form	
<p>PO12</p>	<p>E12.1</p>

6 Zones

<p>Buildings are designed to be adaptable to accommodate a variety of uses over the life of the building.</p> <p>Note - Refer to Planning scheme policy - Caboolture concept plan for details and examples.</p>	<p>Buildings incorporate a minimum floor to ceiling height of 4.2m for the ground level floor.</p> <p>E12.2</p> <p>Where a building incorporates a podium, the minimum floor to ceiling height for podium levels is 3.3m.</p>
<p>PO13</p> <p>Buildings are designed and constructed to:</p> <ol style="list-style-type: none"> incorporate a mix of colours and high quality materials to add diversification to treatments and finishes; articulate and detail the building facade at street level and respond to the human scale; visually integrate with the surrounding area and adjoining buildings through appropriate design and materials; avoid blank walls through articulation and architectural treatments to create visual interest; avoid highly reflective finishes; avoid the visual dominance of plant and equipment on building roofs. <p>Note - Refer to Planning scheme policy - Caboolture concept plan for details and examples.</p>	<p>No example provided.</p>
<p>PO14</p> <p>Building entrances:</p> <ol style="list-style-type: none"> are readily identifiable from the road frontage; are designed to limit opportunities for concealment; are located and oriented to favour active and public transport usage by connecting to pedestrian footpaths on the street frontage and adjoining sites; provide a dedicated, sealed pedestrian footpath between the street frontage and the building entrance; are adequately lit to ensure public safety and security. 	<p>No example provided.</p>

Note - The design provisions for footpaths outlined in Planning scheme policy - Integrated design may assist in demonstrating compliance with this Performance outcome.

Note - Refer to Planning scheme policy - Caboolture concept plan for details and examples.

Accessibility and permeability

PO15

Development contributes to greater permeability within the Caboolture centre precinct by facilitating a network of convenient and safe pedestrian walkways and mid-block connections, as outlined in 'Figure 6.2.1.1.1 - Caboolture '.

Note - Refer to Planning scheme policy - Caboolture concept plan for details and examples.

E15.1

Pedestrian connections are provided on-sites indicated on 'Figure 6.2.1.1.1 - Caboolture 'and are:

- a. accessible 24 hours a day, 7 days a week;
- b. designed to be safe at all times;
- c. is sealed and of a sufficient width and grade to permit universal access
- d. generally located as shown on 'Figure 6.2.1.1.1 - Caboolture '.

Note - Walking connections are to be designed in accordance with Crime Prevention through Environmental Design principles to ensure they are safe and enjoyable places for pedestrians to utilise at all times. Ensuring buildings and uses overlook the walking connection is critical to ensuring a safe and well-utilised public space.

E15.2

Pedestrian amenity areas are provided on-sites indicated on 'Figure 6.2.1.1.1 - Caboolture 'and are:

- a. shaded and protected from weather;
- b. accessible and designed to be safe 24 hours a day, 7 days a week.

Note - Pedestrian resting areas are to be designed in accordance with Crime Prevention through Environmental Design principles to ensure they are safe and enjoyable places for pedestrians to utilise at all times. Ensuring buildings and uses overlook the pedestrian areas is critical to ensuring a safe and well-utilised public space.

Figure - Example of a pedestrian resting area

Movement network

PO

Development is designed to connect to and form part of the surrounding neighbourhood by providing interconnected street, pedestrian and cyclist pathways to adjoining development, nearby centres, neighbourhood hubs, community facilities, public transport nodes and open space.

Note - Refer to Planning scheme policy - Neighbourhood design for guidance on achieving the above outcome.

E

Development provides and maintains the connections shown on the movement figures located in Appendix A of Planning scheme policy - Neighbourhood design.

E

For areas not shown on a movement figure located in Appendix A of Planning scheme policy - Neighbourhood design, no example provided.

Note - Refer to Planning scheme policy - Neighbourhood design for guidance on achieving the above example.

Car parking

PO16

The provision of car parking spaces:

- a. is appropriate for the use;
- b. avoids an oversupply of car parking spaces.

Note - Refer to Planning scheme policy - Integrated transport assessment for guidance on how to achieve compliance with this outcome.

E16

Car parking is provided in accordance with the table below.

Land use	Maximum number of Car Spaces to be Provided	Minimum Number of Car Spaces to be Provided
Non-residential	1 per 50m ² GFA	1 per 75m ² GFA
Residential - Permanent/long term	N/A	2 per 5 dwelling
Residential - Serviced/short term	1 per 4 dwellings + staff spaces	1 per 10 dwellings +staff spaces

Note - Car parking rates are to be rounded up to the nearest whole number.

Note - Allocation of car parking spaces to dwellings is at the discretion of the developer.

	<p>Note - Residential - Permanent/long term includes: Multiple dwelling⁽⁴⁹⁾, Relocatable home park⁽⁶²⁾, Residential care facility⁽⁶⁵⁾, Retirement facility⁽⁶⁷⁾.</p> <p>Note - Residential - Services/short term includes: Rooming accommodation⁽⁶⁹⁾ or Short-term accommodation⁽⁷⁷⁾.</p> <p>Note - The above rates exclude car parking spaces for people with a disability required by Disability Discrimination Act 1992 or the relevant disability discrimination legislation and standards.</p>				
<p>PO17</p> <p>Car parking is designed to avoid the visual impact of large areas of surface car parking on the streetscape.</p>	<p>No example provided.</p>				
<p>PO18</p> <p>Car parking design includes innovative solutions, including on-street parking and shared parking areas.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details and examples of on-street parking.</p>	<p>No example provided.</p>				
<p>PO19</p> <p>The design of car parking areas:</p> <ol style="list-style-type: none"> a. does not impact on the safety of the external road network; b. ensures the safe movement of vehicles within the site. 	<p>E19</p> <p>All car parking areas are designed and constructed in accordance with Australian Standard AS 2890.1 Parking facilities Part 1: Off-street car parking.</p>				
<p>Bicycle parking and end of trip facilities</p> <p>Note - Building work to which this code applies constitutes Major Development for purposes of development requirements for end of trip facilities prescribed in the Queensland Development Code MP 4.1.</p>					
<p>PO20</p> <ol style="list-style-type: none"> a. End of trip facilities are provided for employees or occupants, in the building or on-site within a reasonable walking distance, and include: <ol style="list-style-type: none"> i. adequate bicycle parking and storage facilities; and 	<p>E20.1</p> <p>Minimum bicycle parking facilities are provided in accordance with the table below (rounded up to the nearest whole number).</p> <table border="1" data-bbox="791 1756 1465 1886"> <thead> <tr> <th data-bbox="791 1756 1102 1809">Use</th> <th data-bbox="1102 1756 1465 1809">Minimum Bicycle Parking</th> </tr> </thead> <tbody> <tr> <td data-bbox="791 1809 1102 1886">Residential uses comprised of dwellings</td> <td data-bbox="1102 1809 1465 1886">Minimum 1 space per dwelling</td> </tr> </tbody> </table>	Use	Minimum Bicycle Parking	Residential uses comprised of dwellings	Minimum 1 space per dwelling
Use	Minimum Bicycle Parking				
Residential uses comprised of dwellings	Minimum 1 space per dwelling				

6 Zones

<p>ii. adequate provision for securing belongings; and</p> <p>iii. change rooms that include adequate showers, sanitary compartments, wash basins and mirrors.</p> <p>b. Notwithstanding a. there is no requirement to provide end of trip facilities if it would be unreasonable to provide these facilities having regard to:</p> <p>i. the projected population growth and forward planning for road upgrading and development of cycle paths; or</p> <p>ii. whether it would be practical to commute to and from the building on a bicycle, having regard to the likely commute distances and nature of the terrain; or</p> <p>iii. the condition of the road and the nature and amount of traffic potentially affecting the safety of commuters.</p> <p>Editor's note - The intent of b above is to ensure the requirements for bicycle parking and end of trip facilities are not applied in unreasonable circumstances. For example these requirements should not, and do not apply in the Rural zone or the Rural residential zone etc.</p> <p>Editor's note - This performance outcome is the same as the Performance Requirement prescribed for end of trip facilities under the Queensland Development Code. For development incorporating building work, that Queensland Development Code performance requirement cannot be altered by a local planning instrument and has been reproduced here solely for information purposes. Council's assessment in its building work concurrence agency role for end of trip facilities will be against the performance requirement in the Queensland Development Code. As it is subject to change at any time, applicants for development incorporating building work should ensure that proposals that do not comply with the examples under this heading meet the current performance requirement prescribed in the Queensland Development Code.</p>	<table border="1"> <tr> <td>All other residential uses</td> <td>Minimum 1 space per 2 car parking spaces identified in Schedule 7 – car parking</td> </tr> <tr> <td>Non-residential uses</td> <td>Minimum 1 space per 200m2 of GFA</td> </tr> </table> <p>Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those examples. This example is a combination of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.</p>	All other residential uses	Minimum 1 space per 2 car parking spaces identified in Schedule 7 – car parking	Non-residential uses	Minimum 1 space per 200m2 of GFA
All other residential uses	Minimum 1 space per 2 car parking spaces identified in Schedule 7 – car parking				
Non-residential uses	Minimum 1 space per 200m2 of GFA				
	<p>E20.2</p> <p>Bicycle parking is:</p> <p>a. provided in accordance with <i>Austrroads (2008), Guide to Traffic Management - Part 11: Parking</i>;</p> <p>b. protected from the weather by its location or a dedicated roof structure;</p> <p>c. located within the building or in a dedicated, secure structure for residents and staff;</p> <p>d. adjacent to building entrances or in public areas for customers and visitors.</p> <p>Note - Bicycle parking structures are to be constructed to the standards prescribed in AS2890.3.</p> <p>Note - Bicycle parking and end of trip facilities provided for residential and non-residential activities may be pooled, provided they are within 100 metres of the entrance to the building.</p> <p>Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is an amalgamation of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.</p>				
	<p>E20.3</p> <p>For non-residential uses, storage lockers:</p> <p>a. are provide at a rate of 1.6 per bicycle parking space (rounded up to the nearest whole number);</p> <p>b. have minimum dimensions of 900mm (height) x 300mm (width) x 450mm (depth).</p> <p>Note - Storage lockers may be pooled across multiple sites and activities when within 100 metres of the entrance to the building and within 50 metres of bicycle parking and storage facilities.</p>				

Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is an amalgamation of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.

E20.4

For non-residential uses, changing rooms:

- a. are provided at a rate of 1 per 10 bicycle parking spaces;
- b. are fitted with a lockable door or otherwise screened from public view;
- c. are provided with shower(s), sanitary compartment(s) and wash basin(s) in accordance with the table below:

Bicycle spaces provided	Male/Female	Change rooms required	Showers required	Sanitary compartments required	Washbasins required
1-5	Male and female	1 unisex change room	1	1 closet pan	1
6-19	Female	1	1	1 closet pan	1
20 or more	Male	1	1	1 closet pan	1
	Female	1	2, plus 1 for every 20 bicycle spaces provided thereafter	2 closet pans, plus 1 sanitary compartment for every 60 bicycle parking spaces provided thereafter	1, plus 1 for every 60 bicycle parking spaces provided thereafter
	Male	1	2, plus 1 for every 20 bicycle spaces provided thereafter	1 urinal and 1 closet pans, plus 1 sanitary compartment at the rate of 1 closet pan or 1 urinal for every 60 bicycle space provided thereafter	1, plus 1 for every 60 bicycle parking spaces provided thereafter

Note - All showers have a minimum 3-star Water Efficiency Labelling and Standards (WELS) rating shower head.

Note - All sanitary compartments are constructed in compliance with F2.3 (e) and F2.5 of BCA (Volume 1).

- d. are provided with:
 - i. a mirror located above each wash basin;
 - ii. a hook and bench seating within each shower compartment;
 - iii. a socket-outlet located adjacent to each wash basin.

Note - Change rooms may be pooled across multiple sites, residential and non-residential activities when within 100 metres of the entrance to the building and within 50 metres of bicycle parking and storage facilities

6 Zones

	<p>Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is an amalgamation of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.</p>
Loading and servicing	
<p>PO21</p> <p>Loading and servicing areas:</p> <ol style="list-style-type: none"> a. are not visible from the street frontage; b. are integrated into the design of the building; c. include screening and buffers to reduce negative impacts on adjoining sensitive land uses; d. are consolidated and shared with adjoining sites, where possible. <p>Note - Refer to Planning scheme policy - Centre and neighbourhood hub design.</p>	<p>No example provided.</p>
Waste	
<p>PO22</p> <p>Bins and bin storage area/s are designed, located and managed to prevent amenity impacts on the locality.</p>	<p>E22</p> <p>Bins and bin storage area/s are provided, designed and managed in accordance with Planning scheme policy - Waste:</p> <p>Development is designed to meet the criteria in the Planning scheme policy - Waste and is demonstrated in a waste management program.</p>
Landscaping	
<p>PO23</p> <p>On-site landscaping is provided, that:</p> <ol style="list-style-type: none"> a. is incorporated into the design of the development; b. reduces the dominance of car parking and servicing areas from the street frontage; c. incorporates shade trees in car parking areas; d. retains mature trees wherever possible; e. contributes to quality public spaces and the microclimate by providing shelter and shade; f. maintains the achievement of active frontages and sightlines for casual surveillance. 	<p>No example provided.</p>

<p>Note - Landscaping is to be provided in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person, to ensure compliance with Planning scheme policy - Integrated design.</p>	
Environmentally sensitive design	
<p>PO24</p> <p>Development incorporates energy efficient design principles, including:</p> <ol style="list-style-type: none"> a. maximising internal cross-ventilation and prevailing breezes; b. maximising the effect of northern winter sun and screening undesirable northern summer sun and western sun; c. reducing demand on non-renewable energy sources for cooling and heating; d. maximising the use of daylight for lighting; e. retaining existing established trees on-site where possible. 	No example provided.
<p>PO25</p> <p>Best practice Water Sensitive Urban Design (WSUD) is incorporated within development sites to mitigate the impacts of stormwater run-off in accordance with Planning scheme policy - Integrated design.</p>	No example provided.
Crime prevention through environmental design	
<p>PO26</p> <p>Development contributes to a safe public realm by incorporating crime prevention through environmental design principles including:</p> <ol style="list-style-type: none"> a. orienting buildings towards the street and public spaces and providing clear sightlines to public spaces to allow opportunities for casual surveillance; b. ensuring the site layout, building design and landscaping does not result in potential concealment or entrapment areas; c. ensuring high risk areas, including stairwells, arcades, walkways and concealed car parking areas have adequate surveillance to reduce risk or able to be secured outside of business hours. 	No example provided.

6 Zones

<p>Note - Further information is available in Crime Prevention through Environmental Design: Guidelines for Queensland, State of Queensland, 2007.</p>	
<p>Lighting</p>	
<p>PO27</p> <p>Lighting is designed to provide adequate levels of illumination to public and communal spaces to maximise safety while minimising adverse impacts on sensitive land uses.</p>	<p>No example provided.</p>
<p>Amenity</p>	
<p>PO28</p> <p>The amenity of the area and adjacent sensitive land uses are protected from the impacts of dust, odour, chemicals and other environmental nuisances.</p>	<p>No example provided.</p>
<p>Noise</p>	
<p>PO29</p> <p>Noise generating uses do not adversely affect existing or potential noise sensitive uses.</p> <p>Note - The use of walls, barriers or fences that are visible from or adjoin a road or public area are not appropriate noise attenuation measures unless adjoining a motorway, arterial road or rail line.</p> <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p>	<p>No example provided.</p>
<p>PO30</p> <p>Sensitive land uses are provided with an appropriate acoustic environment within designated external private outdoor living spaces and internal areas while:</p> <ol style="list-style-type: none"> a. contributing to safe and usable public spaces, through maintaining high levels of surveillance of parks, streets and roads that serve active transport purposes (e.g. existing or future pedestrian paths or cycle lanes etc); b. maintaining the amenity of the streetscape. <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p> <p>Note - Refer to Planning Scheme Policy – Integrated design for details and examples of noise attenuation structures.</p>	<p>E30.1</p> <p>Development is designed to meet the criteria outlined in the Planning Scheme Policy – Noise.</p> <hr/> <p>E30.2</p> <p>Noise attenuation structures (e.g. walls, barriers or fences):</p> <ol style="list-style-type: none"> a. are not visible from an adjoining road or public area unless: <ol style="list-style-type: none"> i. adjoining a motorway or rail line; or ii. adjoining part of an arterial road that does not serve an existing or future active transport purpose (e.g. pedestrian paths or cycle lanes) or where attenuation through building location and materials is not possible.

	<p>b. do not remove existing or prevent future active transport routes or connections to the street network;</p> <p>c. are located, constructed and landscaped in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Refer to Planning scheme policy – Integrated design for details and examples of noise attenuation structures.</p> <p>Note - Refer to Overlay map – Active transport for future active transport routes.</p>
<p>Hazardous Chemicals</p> <p>Note - To assist in demonstrating compliance with the following performance outcomes, a Hazard Assessment Report may be required to be prepared and submitted by a suitably qualified person in accordance with 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.</p> <p>Note - Terms used in this section are defined in 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.</p>	
<p>PO31</p> <p>Off sites risks from foreseeable hazard scenarios involving hazardous chemicals are commensurate with the sensitivity of the surrounding land use zones.</p>	<p>E31.1</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of land zoned for vulnerable or sensitive land uses as described below:</p> <p>Dangerous Dose</p> <p>a. For any hazard scenario involving the release of gases or vapours:</p> <ol style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. <p>b. For any hazard scenario involving fire or explosion:</p> <ol style="list-style-type: none"> i. 7kPa overpressure; ii. 4.7kW/m2 heat radiation. <p>If criteria E31.1 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 0.5×10^{-6}/year.</p> <hr/> <p>E31.2</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of a commercial or community activity land use zone as described below:</p> <p>Dangerous Dose</p>

6 Zones

	<p>a. For any hazard scenario involving the release of gases or vapours:</p> <ul style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. <p>b. For any hazard scenario involving fire or explosion:</p> <ul style="list-style-type: none"> i. 7kPa overpressure; ii. 4.7kW/m² heat radiation. <p>If criteria E31.2 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 5×10^{-6}/year.</p> <p>E31.3</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of an industrial land use zone as described below:</p> <p>Dangerous Dose</p> <p>a. For any hazard scenario involving the release of gases or vapours:</p> <ul style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. <p>b. For any hazard scenario involving fire or explosion:</p> <ul style="list-style-type: none"> i. 14kPa overpressure; ii. 12.6kW/m² heat radiation. <p>If criteria E31.3 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 50×10^{-6}/year.</p>
<p>PO32</p> <p>Buildings and package stores containing fire-risk hazardous chemicals are designed to detect the early stages of a fire situation and notify a designated person.</p>	<p>E32</p> <p>Buildings and package stores containing fire-risk hazardous chemicals are provided with 24 hour monitored fire detection system for early detection of a fire event.</p>
<p>PO33</p>	<p>E33</p>

<p>Common storage areas containing packages of flammable and toxic hazardous chemicals are designed with spill containment system(s) that are adequate to contain releases, including fire fighting media.</p>	<p>Storage areas containing packages of flammable and toxic hazardous chemicals are designed with spill containment system(s) capable of containing a minimum of the total aggregate capacity of all packages plus the maximum operating capacity of any fire protection system for the storage area(s) over a minimum of 60 minutes.</p>
<p>PO34</p> <p>Storage and handling areas, including manufacturing areas, containing hazardous chemicals in quantities greater than 2,500L or kg within a Local Government "flood hazard area" are located and designed in a manner to minimise the likelihood of inundation of flood waters from creeks, rivers, lakes or estuaries.</p>	<p>E34.1</p> <p>The base of any tank with a WC >2,500L or kg is higher than any relevant flood height level identified in an area's flood hazard area. Alternatively:</p> <ol style="list-style-type: none"> bulk tanks are anchored so they cannot float if submerged or inundated by water; and tank openings not provided with a liquid tight seal, i.e. an atmospheric vent, are extended above the relevant flood height level. <p>E34.2</p> <p>The lowest point of any storage area for packages >2,500L or kg is higher than any relevant flood height level identified in an area's flood hazard area. Alternatively, package stores are provided with impervious bund walls or racking systems higher than the relevant flood height level.</p>
<p>Clearing of habitat trees where not located within the Environmental areas overlay map</p>	
<p>PO35</p> <ol style="list-style-type: none"> Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected. Development does not result in the net loss of fauna habitat. Where development does result in the loss of a habitat tree, development will provide replacement fauna nesting boxes at the following rate of 1 nest box for every hollow removed. Where hollows have not yet formed in trees > 80cm in diameter at 1.3m height, 3 nest boxes are required for every habitat tree removed. Development does not result in soil erosion or land degradation or leave land exposed for an unreasonable period of time but is rehabilitated in a timely manner <p>Note: Further guidance on habitat trees is provided in Planning scheme policy - Environmental areas</p>	<p>No example provided</p>
<p>Works criteria</p>	

Utilities

6 Zones

<p>PO</p> <p>All services including water supply, sewage disposal, electricity, street lighting, telecommunications and gas (if available) are provided in accordance with Planning scheme policy - Integrated design (Appendix A).</p>	<p>No example provided.</p>
<p>PO36</p> <p>Where the site adjoins or is opposite to a Park⁽⁵⁷⁾; foreshore or Humpybong Reserve all existing overhead power lines are to be undergrounded for the full frontage of the site.</p>	<p>No example provided.</p>
<p>PO37</p> <p>The development is connected to an existing reticulated electricity supply system approved by the relevant energy regulating authority.</p>	<p>E37</p> <p>Development is connected to underground electricity.</p>
<p>PO38</p> <p>The development has access to telecommunications and broadband services in accordance with current standards.</p>	<p>No example provided.</p>
<p>PO39</p> <p>Where available the development is to safely connect to reticulated gas.</p>	<p>No example provided.</p>
<p>PO40</p> <p>The development provides for the treatment and disposal of sewage and other waste water in a way that will not cause environmental harm or pose a risk to public health.</p>	<p>E40.1</p> <p>Where in a sewerage area, the development is connected to a reticulated sewerage network.</p>
	<p>E40.2</p> <p>Trade waste is pre-treated on-site prior to discharging into the sewerage network.</p>
<p>PO41</p> <p>The development is provided with an adequate and sustainable supply of potable (drinking and general use e.g. gardening, washing, fire fighting) water.</p>	<p>E41</p> <p>Where in an existing connections area or a future connections area as detailed in the Unitywater Connections Policy, the development is connected to the reticulated water supply system in accordance with the South East Queensland Water Supply and Sewerage Design and Construction Code and the relevant Water Service Association of Australia (WSAA) codes and standards.</p>
<p>PO42</p> <p>The development is provided with constructed and dedicated road access.</p>	<p>No example provided.</p>

Access	
<p>PO43</p> <p>Development provides functional and integrated car parking and vehicle access, that:</p> <ol style="list-style-type: none"> a. prioritises the movement and safety of pedestrians between car parking areas at the rear through to the 'main street' and the entrance to the building (e.g. rear entry, arcade etc.); b. provides safety and security of people and property at all times; c. does not impede active transport options; d. does not impact on the safe and efficient movement of traffic external to the site; e. where possible vehicle access points are consolidated and shared with adjoining sites. <p>Note - Refer to Planning scheme policy - Centre and neighbourhood hub design for details and examples.</p>	<p>No example provided.</p>
<p>PO44</p> <p>Where required, access easements contain a driveway and provision for services appropriate to the use. The easement covers all works associated with the access in accordance with Planning scheme policy - Integrated design.</p>	<p>No example provided.</p>
<p>PO45</p> <p>The layout of the development does not compromise:</p> <ol style="list-style-type: none"> a. the development of the road network in the area; b. the function or safety of the road network; c. the capacity of the road network. <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p>	<p>E45.1</p> <p>Direct vehicle access for residential development does not occur from arterial or sub-arterial roads or a motorway.</p> <p>Editor's note - Residential developments should consider amalgamation with the lot to the rear and gaining access via a laneway.</p> <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p>
	<p>E45.2</p> <p>The development provides for the extension of the road network in the area in accordance with Council's road network planning.</p>
	<p>E45.3</p> <p>The development does not compromise future road widening of frontage roads in accordance with the relevant standard and Council's road planning.</p>
	<p>E45.4</p>

6 Zones

	<p>The lot development layout allows forward vehicular access to and from the site.</p>
<p>PO46</p> <p>Safe access is provided for all vehicles required to access the site.</p>	<p>E46.1</p> <p>Site access and driveways are designed and, located and constructed in accordance with:</p> <ol style="list-style-type: none"> a. where for a Council-controlled road and associated with a Dwelling house: <ol style="list-style-type: none"> i. Planning scheme policy - Integrated design; b. Where for a Council-controlled road; and not associated with a Dwelling house: <ol style="list-style-type: none"> i. AS/NZS2890.1 section 3; or Parking facilities Part 1: Off street car parking; ii. AS 2890.2 - Parking facilities Part 2: Off-street commercial vehicle facilities; iii. Planning scheme policy - Integrated design; iv. Schedule 8 - Service vehicle requirements; c. Where for a State-Controlled road, the Safe Intersection Sight Distance requirements in Austroads and the appropriate IPWEAQ standard drawings, or a copy of a Transport Infrastructure Act 1994, section 62 approval. <p>E46.2</p> <p>Internal driveways, car parks and access ways are designed and constructed with a sealed pavement and in accordance with:</p> <ol style="list-style-type: none"> a. AS/NZS2890.1 Parking Facilities Part 1: Off street car parking; b. AS 2890.2 Parking Facilities Part 2: Off street commercial vehicle facilities; and c. the relevant standards in Planning scheme policy - Integrated design; and d. Schedule 8 - Service vehicle requirements. <p>Note - This includes queue lengths (refer to Schedule 8 - Service vehicle requirements), pavement widths and construction.</p> <p>E46.3</p>

	<p>Access driveways, manoeuvring areas and loading facilities are sealed and provide for service vehicles listed in Schedule 8 ; Service vehicle requirements for the relevant use. The on-site manoeuvring is to be in accordance with Schedule 8 ; Service vehicle requirements.</p>
	<p>E</p> <p>Landscaping (including shade trees) is provided within car parks in accordance with Planning scheme policy - Integrated design.</p>
<p>PO</p> <p>Sealed and flood free road access during the minor storm event is available to the site from the nearest arterial or sub-arterial road.</p> <p>Editor's Note - Where associated with a State-controlled road, further requirements may apply, and approvals may be required from the Department of Transport and Main Roads.</p>	<p>E</p> <p>Roads or streets giving access to the development from the nearest arterial or sub-arterial road are flood free during the minor storm event and are sealed.</p> <p>Note - The road network is mapped on Overlay Map - Road Hierarchy.</p>
<p>PO</p> <p>Roads which provide access to the site from an arterial or sub-arterial road remain trafficable during major storm events without flooding or impacting upon residential properties or other premises.</p>	<p>E</p> <p>Access roads to the development have sufficient longitudinal and cross drainage to remain safely trafficable during major storm (1% AEP) events.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - Refer to QUDM for requirements regarding trafficability.</p> <p>E</p> <p>Culverts and causeways do not increase inundation levels or increase velocities, for all events up to the defined flood event, to upstream or downstream properties.</p>
Street design and layout	
<p>PO</p> <p>Streets are designed and constructed in accordance with Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures. The street design and construction accommodates the following functions:</p> <p>a. access to premises by providing convenient vehicular movement for residents between their homes and the major road network;</p>	<p>No example provided</p>

6 Zones

<ul style="list-style-type: none"> b. safe and convenient pedestrian and cycle movement; c. adequate on street parking; d. stormwater drainage paths and treatment facilities; e. efficient public transport routes; f. utility services location; g. emergency access and waste collection; h. setting and approach (streetscape, landscaping and street furniture) for adjoining residences; i. expected traffic speeds and volumes; and j. wildlife movement. <p>Note - Preliminary road design (including all services, street lighting, stormwater infrastructure, access locations, street trees and pedestrian network) may be required to demonstrate compliance with this PO.</p> <p>Note - Refer to Planning scheme policy - Environmental areas and corridors for examples of when and where wildlife movement infrastructure is required.</p>	
<p>PO47</p> <p>Upgrade works (whether trunk or non-trunk) are provided where necessary to:-</p> <ul style="list-style-type: none"> a. ensure the type or volume of traffic generated by the development does not have a negative impact on the external road network;- b. ensure the orderly and efficient continuation of the active transport network;- c. ensure the site frontage is constructed to a suitable urban standard generally in accordance with Planning scheme policy - Integrated design. <p>Note - An Integrated Transport Assessment (ITA) may be required to demonstrate compliance with this performance outcome refer to Planning scheme policy - Integrated transport assessment for guidance on when an ITA is required. An ITA should be prepared in accordance with Planning scheme policy - Integrated transport assessment.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - The primary and secondary active transport network is mapped on Overlay map - Active transport</p> <p>Note - To demonstrate compliance with c. of this performance outcome, site frontage works where in existing road reserve (non-trunk) are to be designed and constructed as follows:</p>	<p>E</p> <p>No example provided:</p> <p>New intersections onto existing roads are designed to accommodate traffic volumes and traffic movements taken from a date 10 years from the date of completion of the last stage of the development. Detailed design is to be in accordance with Planning scheme policy - Integrated design.</p> <p>Note - All turns vehicular access to existing lots is to be retained at new road intersections wherever practicable.</p> <p>Note - Existing on-street parking is to be retained at new road intersections and along road frontages wherever practicable.</p> <hr/> <p>E</p> <p>Existing intersections external to the site are upgraded as necessary to accommodate increased traffic from the development. Design is in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p> <p>Note - All turns vehicular access to existing lots is to be retained at new road intersections wherever practicable.</p>

<p>i. Where the street is partially established to an urban standard; match the alignment of existing kerb and channel and provide carriageway widening and underground drainage where required; or</p> <p>ii. Where the street is not established to an urban standard; prepare a design that demonstrates how the relevant features of the particular road as shown in the Planning scheme policy - Integrated Design can be achieved in the existing reserve:</p> <p>Note - Refer to Planning scheme policy - Integrated design for road network and active transport network design standards:</p> <p>The existing road network (whether trunk or non-trunk) is upgraded where necessary to cater for the impact from the development.</p> <p>Note - An applicant will be required to submit an Integrated Transport Assessment (ITA), prepared in accordance with Planning scheme policy - Integrated transport assessment to demonstrate compliance with this PO, when any of the following occurs;</p> <ul style="list-style-type: none"> development is within 200m of a transport sensitive location such as a school, shopping centre, bus or train station or a large generator of pedestrian or vehicular traffic; forecast traffic to/from the development exceeds 5% of the two way flow on the adjoining road or intersection in the morning or afternoon transport peak within 10 years of the development completion; Development access onto a sub arterial, or arterial road or within 100m of a signalised intersection; Residential development greater than 50 lots or dwellings; Offices greater than 4,000m² Gross Floor Area (GFA); Retail activities including Hardware and trade supplies; Showroom, Shop or Shopping centre greater than 1,000m² GFA; Warehouses and Industry greater than 6000m² GFA; On-site carpark greater than 100 spaces; Development has a trip generation rate of 100 vehicles or more within the peak hour; Development which dissects or significantly impacts on an environmental area or an environmental corridor. <p>The ITA is to review the development's impact upon the external road network for the period of 10 years from completion of the development. The ITA is to provide sufficient information for determining the impact and the type and extent of any ameliorative works required to cater for the additional traffic. The ITA must include a future structural road layout of adjoining properties that will form part of this catchment and road connecting to these properties. The ITA is to assess the ultimate developed catchment's impacts and necessary ameliorative works, and the works or contribution required by the applicant as identified in the study.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p>	<p>Note - Existing on-street parking is to be retained at upgraded road intersections and along road frontages wherever practicable.</p> <p>E</p> <p>The active transport network is extended in accordance with Planning scheme policy - Integrated design.</p>
---	--

6 Zones

<p>Note - The primary and secondary active transport network is mapped on Overlay map - Active transport.</p>	
<p>PO</p> <p>Intersections along all streets and roads are located and designed to provide safe and convenient movements for all users.</p>	<p>E</p> <p>Intersections are designed and constructed in accordance with Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p> <hr/> <p>E</p> <p>Intersection spacing (centreline – centreline) along a through road conforms with the following:</p> <ol style="list-style-type: none"> a. where the through road provides an access function: <ol style="list-style-type: none"> i. intersecting road located on the same side = 60 metres; ii. intersecting road located on opposite side (Left Right Stagger) = 60 metres; iii. intersecting road located on opposite side (Right Left Stagger) = 40 metres. b. Where the through road provides a collector or sub-arterial function: <ol style="list-style-type: none"> i. intersecting road located on the same side = 100 metres; ii. intersecting road located on opposite side (Left Right Stagger) = 100 metres; iii. intersecting road located on opposite side (Right Left Stagger) = 60 metres. c. Where the through road provides an arterial function: <ol style="list-style-type: none"> i. intersecting road located on the same side = 300 metres; ii. intersecting road located on opposite side (Left Right Stagger) = 300 metres; iii. intersecting road located on opposite side (Right Left Stagger) = 300 metres; d. Walkable block perimeter does not exceed 1000 metres. <p>Note - Based on the absolute minimum intersection spacing identified above, all turns access may not be permitted (ie. left in/left out only) at intersections with sub-arterial roads or arterial roads.</p>

	<p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - An Integrated Transport Assessment (ITA) including preliminary intersection designs, prepared in accordance with Planning scheme policy - Integrated transport assessment may be required to demonstrate compliance with this PO. Intersection spacing will be determined based on the deceleration and queue storage distances required for the intersection after considering vehicle speed and present/forecast turning and through volumes.</p>									
<p>PO</p> <p>All Council controlled frontage roads are designed and constructed in accordance with Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures. All new works are extended to join any existing works within 20m.</p> <p>Note - Frontage roads include streets where no direct lot access is provided.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - The Primary and Secondary active transport network is mapped on Overlay map - Active transport.</p> <p>Note - Roads are considered to be constructed in accordance with Council's standards when there is sufficient pavement width, geometry and depth to comply with the requirements of Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p>	<p>E</p> <p>Design and construct all Council controlled frontage roads in accordance with Planning scheme policy - Integrated design, Planning scheme policy - Operational works inspection, maintenance and bonding procedures and the following:</p> <table border="1" data-bbox="810 808 1465 1608"> <thead> <tr> <th data-bbox="810 808 1137 869">Situation</th> <th data-bbox="1137 808 1465 869">Minimum construction</th> </tr> </thead> <tbody> <tr> <td data-bbox="810 869 1137 987">Frontage road unconstructed or gravel road only;</td> <td data-bbox="1137 869 1465 1328" rowspan="3">Construct the verge adjoining the development and the carriageway (including development side kerb and channel) to a minimum sealed width containing near side parking lane (if required), cycle lane (if required), 2 travel lanes plus 1.5m wide (full depth pavement) gravel shoulder and table drainage to the opposite side. 	<p>existing works meet the standards in Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p>
Stormwater	
<p>PO</p> <p>Minor stormwater drainage systems (internal and external) have the capacity to convey stormwater flows from frequent storm events for the fully developed upstream catchment whilst ensuring pedestrian and vehicular traffic movements are safe and convenient.</p>	<p>E</p> <p>The capacity of all minor drainage systems are designed in accordance with Planning scheme policy - Integrated design.</p> <p>E</p> <p>Stormwater pipe network capacity is to be calculated in accordance with the Hydraulic Grade Line method as detailed in Australian Rainfall and Runoff or QUDM.</p> <p>E</p> <p>Development ensures that roof and allotment drainage infrastructure is provided in accordance with the relevant level as identified in QUDM.</p>
<p>PO</p> <p>Major stormwater drainage system(s) have the capacity to safely convey stormwater flows for the 1% AEP event for the fully developed upstream catchment.</p>	<p>E</p> <p>The internal drainage system safely and adequately conveys the stormwater flows for the 1% AEP event for the fully developed upstream catchment through the site.</p> <p>E</p> <p>The external (downstream) drainage system safely conveys the stormwater flows for the 1% AEP event for the fully developed upstream catchment without allowing the flows to encroach upon private lots.</p> <p>E</p> <p>Overland flow paths from roads and public open space areas do not pass through private lots. Drainage pathways are provided to accommodate overland flows from roads and public open space areas.</p> <p>E</p> <p>The flow velocity in all unlined or soft faced open drains is kept within acceptable limits for the type of material or lining and condition of the channel.</p> <p>Note - Refer to QUDM for recommended average flow velocities.</p>
<p>PO</p>	<p>E</p>

<p>Provide measures to properly manage surface flows for the 1% AEP event (for the fully developed catchment) draining to and through the land to ensure no actionable nuisance is created to any person or premises as a result of the development. The development must not result in ponding on adjacent land, redirection of surface flows to other premises or blockage of a surface flow relief path for flows exceeding the design flows for any underground system within the development.</p>	<p>The stormwater drainage system is designed and constructed in accordance with Planning scheme policy - Integrated design.</p>
<p>PO48</p> <p>Stormwater run-off from the site is conveyed to a point of lawful discharge without causing actionable nuisance or annoyance to any person, property or premises.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details.</p> <p>Note - A downstream drainage discharge report in accordance with Planning scheme policy - Stormwater management may be required to demonstrate achievement of this performance outcome.</p> <p>Note - A watercourse as defined in the Water Act may be accepted as a lawful point of discharge providing the drainage discharge from the site does not increase the downstream flood levels during events up to and including the 1% AEP storm. An afflux of +20mm may be accepted on Council controlled land and road infrastructure. No worsening is ensured when stormwater is discharged into a catchment that includes State Transport Infrastructure.</p>	<p>No example provided.</p>
<p>PO49</p> <p>Stormwater generated from the development does not compromise the capacity of existing stormwater infrastructure downstream of the site.</p> <p>Note - A downstream drainage discharge report in accordance with Planning scheme policy - Stormwater management may be required to demonstrate achievement of this performance outcome.</p>	<p>No example provided.</p>
<p>PO50</p> <p>Stormwater quality management systems are designed and constructed to minimise the environmental impact of stormwater discharge on surface and underground receiving water quality and meet the design objectives in Tables A and B in Appendix 2 of the SPP.</p> <p>Note - A stormwater management plan prepared by a suitably qualified professional will be required in accordance with Planning scheme policy - Stormwater management.</p> <p>Where development:</p> <p>a. is for an urban purpose that involves a land area 2500m² or greater in size; and</p>	<p>No example provided.</p>

6 Zones

<p>b. results in 6 or more dwellings; or</p> <p>c. results in an impervious area greater than 25% of the net developable area,</p> <p>stormwater quality management systems are designed, constructed, established and maintained to minimise the environmental impact of stormwater on surface, groundwater and receiving water environments and meet the design objectives outlined in Schedule 10 - Stormwater management design objectives.</p> <p>Note - A site based stormwater management plan prepared by a suitably qualified professional will be required in accordance with Planning Scheme Policy - Stormwater Management. Stormwater quality infrastructure is to be design in accordance with Planning scheme policy - Integrated Design (Appendix C).</p>									
<p>PO51</p> <p>Easements for drainage purposes are provided over:</p> <p>a. stormwater pipes located in freehold land if the pipe diameter exceeds 300mm;</p> <p>b. overland flow paths where they cross more than one property boundary.</p> <p>Note -- Refer to Planning scheme policy -- Integrated design for details.</p> <p>Note -- Stormwater Drainage easement dimensions are provided in accordance with Section 3.8.5 of QUDM.</p> <p>Stormwater drainage pipes and structures through or within private land (including inter-allotment drainage) are protected by easements in favour of Council with sufficient area for practical access for maintenance purposes.</p> <p>Note - In order to achieve a lawful point of discharge, stormwater easements may also be required over temporary drainage channels/infrastructure where stormwater discharges to a balance lot prior to entering Council's stormwater drainage system.</p>	<p>E</p> <p>No example provided.</p> <p>Stormwater drainage infrastructure (excluding detention and bio-retention systems) through or within private land (including inter-allotment drainage) is protected by easements in favour of Council. Minimum easement widths are as follows:</p> <table border="1" data-bbox="810 1111 1469 1637"> <thead> <tr> <th>Pipe Diameter</th> <th>Minimum easement width (excluding access requirements)</th> </tr> </thead> <tbody> <tr> <td>Stormwater pipe up to 825mm diameter</td> <td>3.0m</td> </tr> <tr> <td>Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter</td> <td>4.0m</td> </tr> <tr> <td>Stormwater pipe greater than 825mm diameter</td> <td>Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).</td> </tr> </tbody> </table> <p>Note - Additional easement width may be required in certain circumstances in order to facilitate maintenance access to the stormwater system.</p> <p>Note - Refer to Planning Scheme Policy - Integrated Design (Appendix C) for easement requirements over open channels.</p>	Pipe Diameter	Minimum easement width (excluding access requirements)	Stormwater pipe up to 825mm diameter	3.0m	Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter	4.0m	Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).
Pipe Diameter	Minimum easement width (excluding access requirements)								
Stormwater pipe up to 825mm diameter	3.0m								
Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter	4.0m								
Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).								
<p>PO</p> <p>Stormwater management facilities (excluding outlets) are located outside of riparian areas and prevent increased channel bed and bank erosion.</p>	<p>No example provided.</p>								

<p>PO</p> <p>Council is provided with accurate representations of the completed stormwater management works within residential developments.</p>	<p>E</p> <p>"As Built" drawings and specifications of the stormwater management devices certified by an RPEQ is provided.</p> <p>Note - Documentation is to include:</p> <ol style="list-style-type: none"> photographic evidence and inspection date of the installation of approved underdrainage; copy of the bioretention filter media delivery dockets/quality certificates confirming the materials comply with specifications in the approved Stormwater Management Plan; date of the final inspection.

Site works and construction management	
<p>PO52</p> <p>The site and any existing structures are maintained in a tidy and safe condition.</p>	<p>No example provided.</p>
<p>PO53</p> <p>All works on-site are managed to:</p> <ol style="list-style-type: none"> minimise as far as practicable, impacts on adjoining or adjacent premises and the streetscape in regard to erosion and sedimentation, dust, noise, safety and light; minimise as far as possible, impacts on the natural environment; ensure stormwater discharge is managed in a manner that does not cause actionable nuisance or annoyance to any person or premises; avoid adverse impacts on street trees and their critical root zone. 	<p>E53.1</p> <p>Works incorporate temporary stormwater runoff, erosion and sediment controls and trash traps removal devices designed in accordance with the Urban Stormwater Quality Planning Guidelines, State Planning Policy, Schedule 10 - Stormwater management design objectives, Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design, including but not limited to the following:</p> <ol style="list-style-type: none"> stormwater is not discharged to adjacent properties in a manner that differs significantly from pre-existing conditions; stormwater discharged to adjoining and downstream properties does not cause scour and or erosion of any kind; stormwater discharge rates do not exceed pre-existing conditions; the 10% AEP storm event is the minimum design storm for all temporary diversion drains; and the 50% AEP storm event is the minimum design storm for all silt barriers and sedimentation basins. minimum design storm for all temporary diversion drains and sedimentation basins in accordance with Schedule 10 - Stormwater management design objectives; ponding or concentration of stormwater does not occur in adjoining properties.

6 Zones

	<p>E53.2</p> <p>Stormwater runoff, erosion and sediment controls are constructed in accordance with Planning scheme policy - Integrated design (Appendix C) prior to commencement of any clearing or earthworks and are maintained and adjusted as necessary at all times to ensure their ongoing effectiveness.</p> <p>Note - The measures are adjusted on-site to maximise their effectiveness.</p>
	<p>E53.3</p> <p>The completed earthworks area is stabilised using turf, established grass seeding, mulch or sprayed stabilisation techniques to control erosion and sediment and dust from leaving the property.</p>
	<p>E53.4</p> <p>Where works are proposed in proximity to an existing street tree, an inspection and a root management plan is undertaken by a qualified arborist which demonstrates and ensures that no permanent damage is caused to the tree:</p> <p>Existing street trees are protected and not damaged during works.</p> <p>Note - Where development occurs in the tree protection zone, measures and techniques as detailed in Australian Standard AS 4970 Protection of trees on development sites are adopted and implemented.</p>
<p>PO54</p> <p>Dust suppression measures are implemented during soil disturbances and construction works to protect nearby premises from unreasonable dust impacts.</p>	<p>E54</p> <p>No dust emissions extend beyond the boundaries of the site during soil disturbances and construction works.</p>
<p>PO55</p> <p>All development works on-site and including the transportation of material to and from the site are managed to not negatively impact the existing road network, the amenity of the surrounding area or the streetscape.</p> <p>Note - Where the amount of imported or exported material is greater than 50m³, a haulage route must be identified and approved by Council.</p> <p>Note - A Traffic Management Plan may be required to demonstrate compliance with this PO. A Traffic Management Plan is to be prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD).</p>	<p>E55.1</p> <p>Construction traffic including contractor car parking is controlled in accordance with a traffic management plan, prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) to ensure all traffic movements to and from the site are safe.</p> <p>E55.2</p> <p>All contractor car parking is either provided on the development site, or on an alternative site in the general locality which has been set aside for car parking. Contractors vehicles are generally not to be parked in existing roads.</p>

<p>Note - A haulage route must be identified and approved by Council where imported or exported material is transported to the site via a road of Local Collector standard or less, and:</p> <ol style="list-style-type: none"> the aggregate volume of imported or exported material is greater than 1000m³; or the aggregate volume of imported or exported material is greater than 200m³ per day; or the proposed haulage route involves a vulnerable land use or shopping centre. <p>Note - A dilapidation report (including photographs) may be required for the haulage route to demonstrate compliance with this PO.</p> <p>Editor's note - Where associated with a State-controlled road, further requirements may apply, and approval may be required from the Department of Transport and Main Roads.</p>	<p>Note – A Traffic Management Plan may be required for the site in accordance with the Manual of Uniform Traffic Control Devices (MUTCD):</p> <p>E55.3</p> <p>Any material dropped, deposited or spilled on the road(s) as a result of construction processes associated with the site are to be cleaned at all times.</p> <p>E</p> <p>Construction traffic to and from the development site uses the highest classification streets or roads where a choice of access routes is available. Haul routes for the transport of imported or spoil material and gravel pavement material along Council roads below sub-arterial standard must be approved routes.</p> <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p> <p>Note - A dilapidation report may be required to demonstrate compliance with this E.</p> <p>E</p> <p>Where works are carried out in existing roads, the works must be undertaken so that the existing roads are maintained in a safe and useable condition. Practical access for residents, visitors and services (including postal deliveries and refuse collection) is retained to existing lots during the construction period and after completion of the works.</p> <p>Note - A traffic control plan prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) will be required for any works that will affect access, traffic movements or traffic safety in existing roads.</p> <p>E</p> <p>Access to the development site is obtained via an existing lawful access point.</p>
<p>PO56</p> <p>All disturbed areas are to be progressively stabilised during construction and the entire site rehabilitated and substantially stabilised at the completion of construction.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details.</p>	<p>E56</p> <p>At completion of construction all disturbed areas of the site are to be:</p> <ol style="list-style-type: none"> topsoiled with a minimum compacted thickness of fifty (50) millimetres; grassed stabilised using turf, established grass seeding, mulch or sprayed stabilisation techniques.

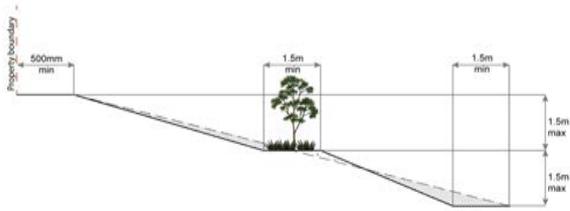

6 Zones

	<p>Note - These areas are to be maintained during any maintenance period to maximise grass coverage from grass seeding of these areas:</p>
<p>PO</p> <p>Earthworks are undertaken to ensure that soil disturbances are staged into manageable areas.</p> <p>Note - A site specific Erosion and Sediment Control Plan (ESCP) will be required to demonstrate compliance with this PO. An ECP is to be prepared in accordance with Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design (Appendix C).</p>	<p>E</p> <p>Soil disturbances are staged into manageable areas of not greater than 3.5 ha.</p>
<p>PO57</p> <p>The clearing of vegetation on-site:</p> <ol style="list-style-type: none"> is limited to the area of infrastructure works, building areas and other necessary areas for the works; and includes the removal of declared weeds and other materials which are detrimental to the intended use of the land; is disposed of in a manner which minimises nuisance and annoyance to existing premises. <p>Note - No burning of cleared vegetation is permitted.</p>	<p>E57.1</p> <p>All native vegetation to be retained on-site is temporarily fenced or protected prior to and during development works.</p> <p>Note - No parking of vehicles of or storage of machinery or goods is to occur in these areas during development works.</p> <p>E57.2</p> <p>Disposal of materials is managed in one or more of the following ways:</p> <ol style="list-style-type: none"> all cleared vegetation, declared weeds, stumps, rubbish, car bodies, scrap metal and the like are removed and disposed of in a Council land fill facility; or all native vegetation with a diameter below 400mm is to be chipped and stored on-site. <p>Note - The chipped vegetation must be stored in an approved location; preferably a park or public land.</p>
<p>PO</p> <p>All development works are carried out at times which minimise noise impacts to residents.</p>	<p>E</p> <p>All development works are carried out within the following times:</p> <ol style="list-style-type: none"> Monday to Saturday (other than public holidays) between 6:30am and 6:30pm on the same day; no work is to be carried out on Sundays or public holidays. <p>Note - Work outside the above hours may be approved (in writing) where it can be demonstrated that the work will not cause significant inconvenience or disruption to the public, or the work is unlikely to cause annoyance or inconvenience to occupants of adjacent properties.</p>

<p>PO58</p> <p>Any alteration or relocation in connection with or arising from the development to any service, installation, plant, equipment or other item belonging to or under the control of the telecommunications authority, electricity authorities, the Council or other person engaged in the provision of public utility services is to be carried with the development and at no cost to Council.</p>	<p>No example provided.</p>
---	-----------------------------

Earthworks	
<p>PO59</p> <p>On-site earthworks are designed to consider the visual and amenity impact as they relate to:</p> <ol style="list-style-type: none"> the natural topographical features of the site; short and long-term slope stability; soft or compressible foundation soils; reactive soils; low density or potentially collapsing soils; existing fill and soil contamination that may exist on-site; the stability and maintenance of steep rock slopes and batters; excavation (cut) and fill and impacts on the amenity of adjoining lots (e.g. residential). <p>Note – Filling or excavation works are to be completed within six months of the commencement date.</p>	<p>E59.1</p> <p>All cut and fill batters are provided with appropriate scour, erosion protection and run-off control measures including catch drains at the top of batters and lined batter drains as necessary.</p> <p>E59.2</p> <p>Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance of steep rock slopes and batters.</p> <p>E59.3</p> <p>Inspection and certification of steep rock slopes and batters is required by a suitably qualified and experienced RPEQ.</p> <p>E59.4</p> <p>All filling or excavation is contained on-site and is free draining.</p> <p>E59.5</p> <p>All fill placed on-site is:</p> <ol style="list-style-type: none"> limited to that area required for the necessary for the approved use; clean and uncontaminated (i.e. no building waste, concrete, green waste, actual acid sulfate soils, potential acid sulfate soils or contaminated material etc.) material is used as fill). <p>E59.6</p> <p>The site is prepared and the fill placed on-site in accordance with AS3798.</p>

6 Zones

	<p>Note - The fill is to be inspected and tested in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p>
<p>PO60</p> <p>Embankments are stepped, terraced and landscaped to not adversely impact on the visual amenity of the surrounding area.</p>	<p>E60</p> <p>Any embankments more than 1.5 metres in height are stepped, terraced and landscaped.</p> <p style="text-align: center;">Figure - Embankment</p> 
<p>PO61</p> <p>Filling or excavation is undertaken in a manner that:</p> <ol style="list-style-type: none"> does not adversely impact on a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land; does not preclude reasonable access to a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land for monitoring, maintenance or replacement purposes. <p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p>	<p>E61.1</p> <p>No filling or excavation is undertaken in an easement issued in favour of Council or a public sector entity.</p> <p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p> <p>E61.2</p> <p>Filling or excavation that would result in any of the following is not carried out on-site:</p> <ol style="list-style-type: none"> a reduction in cover over any Council or public sector entity infrastructure service to less than 600mm; an increase in finished surface grade over, or within 1.5m on each side of, the Council or public sector entity infrastructure above that which existed prior to the earthworks being undertaken; prevent reasonable access to Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the site for monitoring, maintenance or replacement purposes. <p>Note - Public sector entity as is defined in the Sustainable Planning Schedule 2 of the Act 2009.</p>
<p>PO62</p> <p>Filling or excavation does not result in land instability.</p>	<p>No example provided.</p>

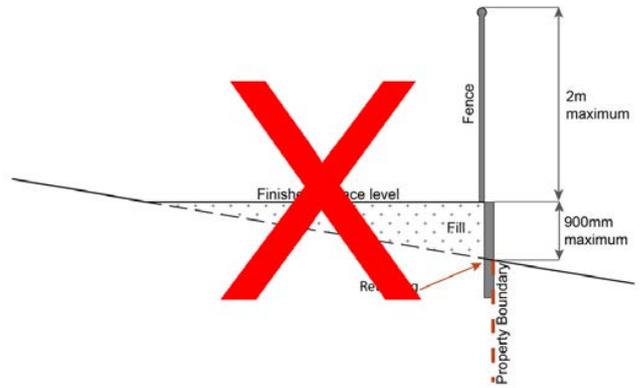

<p>Note - Steep rock slopes and batters are inspected and certified for long-term stability by a suitably qualified and experienced geotechnical engineer with RPEQ qualifications. Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance.</p>	
<p>PO63</p> <p>Development Filling or excavation does not result in:</p> <ol style="list-style-type: none"> adverse impacts on the hydrological and hydraulic capacity of the waterway or floodway; increased flood inundation outside the site; any reduction in the flood storage capacity in the floodway; and any clearing of native vegetation. <p>Note - To demonstrate compliance with this outcome, Planning Scheme Policy - Stormwater Management provides guidance on the preparation of a site based stormwater management plan by a suitably qualified professional. Refer to Planning scheme policy - Integrated design for guidance on infrastructure design and modelling requirements.</p>	<p>No example provided.</p>
<p>PO</p> <p>Filling or excavation on the development site is undertaken in a manner which does not create or accentuate problems associated with stormwater flows and drainage systems on land adjoining the site.</p>	<p>E</p> <p>Filling and excavation undertaken on the development site are shaped in a manner which does not:</p> <ol style="list-style-type: none"> prevent stormwater surface flow which, prior to commencement of the earthworks, passed onto the development site, from entering the land; or redirect stormwater surface flow away from existing flow paths; or divert stormwater surface flow onto adjacent land, (other than a road), in a manner which: <ol style="list-style-type: none"> concentrates the flow; or increases the flow rates of stormwater over the affected section of the adjacent land above the situation which existed prior to the diversion; or causes actionable nuisance to any person, property or premises.
<p>Retaining walls and structures</p>	
<p>PO64</p> <p>All earth retaining structures provide a positive interface with the streetscape and minimise impacts on the amenity of adjoining residents.</p>	<p>E64</p> <p>Earth retaining structures:-</p> <ol style="list-style-type: none"> are not constructed of boulder rocks or timber;

6 Zones

Note - Refer to Planning scheme policy - Residential design for guidance on how to achieve compliance with this performance outcome.

- b. where height is no greater than 900mm, are provided in accordance with Figure--Retaining on a boundary;

Figure--Retaining on a boundary

- c. where height is greater than 900mm but no greater than 1.5m, are to be setback at least the equivalent height of the retaining structure from any property boundary;
- d. where height is greater than 1.5m, are to be setback and stepped 1.5m vertical: 1.5m horizontal; terraced, landscaped and drained as shown below.

Figure--Cut

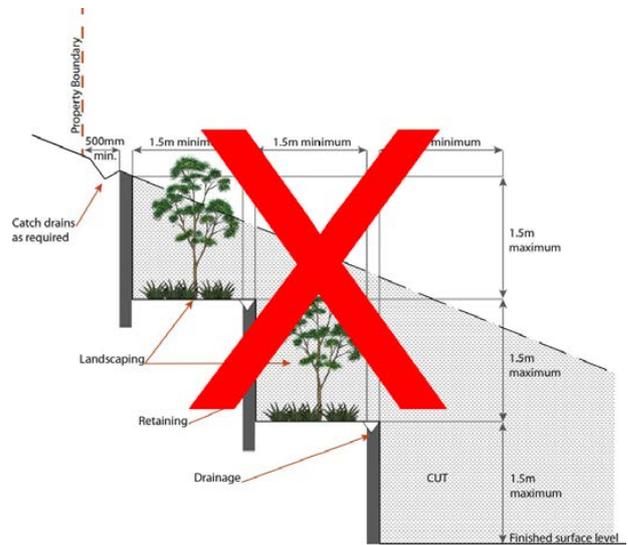

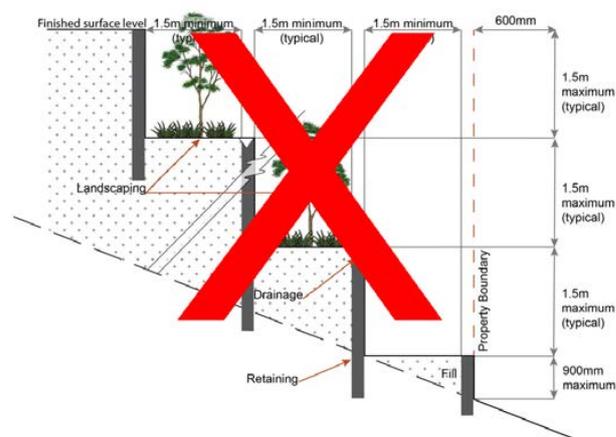

Figure--Fill

Filling or excavation does not:

- a. involve a change in level of more than 1.0m relative to natural ground level;

OR

result in a batter greater than 1V to 6H;

- b. necessitate the construction of a freestanding retaining wall exceeding 1.0m in height relative to finished ground level;
- c. result in the top of any cut batter, or the exposed face of any freestanding retaining wall supporting that cut, being closer than 500mm to a property boundary;
- d. result in the toe of any fill batter, or exposed face of any freestanding retaining wall supporting that fill, being closer than 1.0m to a property boundary unless:
- i. the depth of fill within the 1.0m strip does not exceed 200mm relative to natural ground level; or
 - ii. the batter slope within that 1.0m strip is no steeper than 1V to 2H.

THE NEW FIGURE BELOW IS PROPOSED AS PART OF THIS AMENDMENT

	<p style="text-align: center;">Figure - Filling or Excavation</p>
<p>PO</p> <p>All earth retaining structures are to be certified as being designed and constructed in accordance with relevant Australian Standards and Building Code requirements.</p>	<p>E</p> <p>Retaining walls are designed and certified by a RPEQ so that:</p> <ol style="list-style-type: none"> a. the minimum design life (the period assumed in design for which a structure or structural element is required to perform its intended purpose without replacement or major structural repairs) for the earth retaining structure is that specified in Australian Standard AS 4678 Earth-retaining structures; b. earth retaining structures within the land and around areas of cut on or near the boundaries of the site must be designed to allow for live and dead loads associated with the land/premise's current occupancy and use; c. where the adjoining land use rights or zoning allows for industrial uses a minimum live load of 25kPA must be allowed in the design of the retaining structure for these adjoining premises. <p>Note - Retaining walls will only be approved following submission of a full detailed design certified by a RPEQ.</p>

Fire Services

Note - The provisions under this heading only apply if:

- a. the development is for, or incorporates:
 - i. reconfiguring a lot for a community title scheme creating 1 or more vacant lots; or
 - ii. material change of use for 2 or more sole occupancy units on the same lot, or within the same community titles scheme; or
 - iii. material change of use for a Tourist park⁽⁸⁴⁾ with accommodation in the form of caravans or tents; or
 - iv. material change of use for outdoor sales⁽⁵⁴⁾, outdoor processing or outdoor storage where involving combustible materials.

AND

- b. none of the following exceptions apply:
- i. the distributor-retailer for the area has indicated, in its netserv plan, that the premises will not be served by that entity's reticulated water supply; or
 - ii. every part of the development site is within 60m walking distance of an existing fire hydrant on the distributor-retailer's reticulated water supply network, measured around all obstructions, either on or adjacent to the site.

Note - The provisions under this heading do not apply to buildings that are required by the Building Code of Australia to have a fire hydrant system complying with Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations or other fire fighting facilities which provide equivalent protection.

PO65

Development incorporates a fire fighting system that:

- a. satisfies the reasonable needs of the fire fighting entity for the area;
- b. is appropriate for the size, shape and topography of the development and its surrounds;
- c. is compatible with the operational equipment available to the fire fighting entity for the area;
- d. considers the fire hazard inherent in the materials comprising the development and their proximity to one another;
- e. considers the fire hazard inherent in the surrounds to the development site;
- f. is maintained in effective operating order.

Note - The Queensland Fire and Emergency Services is the entity currently providing the fire fighting function for the urban areas of the Moreton Bay Region.

E65.1

External fire hydrant facilities are provided on site to the standard prescribed under the relevant parts of *Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations*.

Note - For this requirement for accepted development, the following are the relevant parts of AS 2419.1 (2005) that may be applicable:

- a. in regard to the form of any fire hydrant - Part 8.5 and Part 3.2.2.1, with the exception that for Tourist parks⁽⁸⁴⁾ or development comprised solely of dwellings and their associated outbuildings, single outlet above-ground hydrants or suitably signposted in-ground hydrants would be an acceptable alternative;
- b. in regard to the general locational requirements for fire hydrants - Part 3.2.2.2 (a), (e), (f), (g) and (h) as well as Appendix B of AS 2419.1 (2005);
- c. in regard to the proximity of hydrants to buildings and other facilities - Part 3.2.2.2 (b), (c) and (d), with the exception that:
 - i. for dwellings and their associated outbuildings, hydrant coverage need only extend to the roof and external walls of those buildings;
 - ii. for caravans and tents, hydrant coverage need only extend to the roof of those tents and caravans;
 - iii. for outdoor sales⁽⁵⁴⁾, processing or storage facilities, hydrant coverage is required across the entire area of the outdoor sales⁽⁵⁴⁾, outdoor processing and outdoor storage facilities;
- d. in regard to fire hydrant accessibility and clearance requirements - Part 3.5 and, where applicable, Part 3.6.

E65.2

A continuous path of travel having the following characteristics is provided between the vehicle access point to the site and each external fire hydrant and hydrant booster point on the land:

- a. an unobstructed width of no less than 3.5m;
- b. an unobstructed height of no less than 4.8m;
- c. constructed to be readily traversed by a 17 tonne HRV fire brigade pumping appliance;
- d. an area for a fire brigade pumping appliance to stand within 20m of each fire hydrant and 8m of each hydrant booster point.

E65.3

6 Zones

	<p>On-site fire hydrant facilities are maintained in effective operating order in a manner prescribed in <i>Australian Standard AS1851 (2012) – Routine service of fire protection systems and equipment</i>.</p>
<p>PO66</p> <p>On-site fire hydrants that are external to buildings, as well as the available fire fighting appliance access routes to those hydrants, can be readily identified at all times from, or at, the vehicular entry point to the development site.</p>	<p>E66</p> <p>For development that contains on-site fire hydrants external to buildings:</p> <ol style="list-style-type: none"> a. those external hydrants can be seen from the vehicular entry point to the site; or b. a sign identifying the following is provided at the vehicular entry point to the site: <ol style="list-style-type: none"> i. the overall layout of the development (to scale); ii. internal road names (where used); iii. all communal facilities (where provided); iv. the reception area and on-site manager’s office (where provided); v. external hydrants and hydrant booster points; vi. physical constraints within the internal roadway system which would restrict access by fire fighting appliances to external hydrants and hydrant booster points. <p>Note - The sign prescribed above, and the graphics used are to be:</p> <ol style="list-style-type: none"> a. in a form; b. of a size; c. illuminated to a level; <p>which allows the information on the sign to be readily understood, at all times, by a person in a fire fighting appliance up to 4.5m from the sign.</p>
<p>PO67</p> <p>Each on-site fire hydrant that is external to a building is signposted in a way that enables it to be readily identified at all times by the occupants of any firefighting appliance traversing the development site.</p>	<p>E67</p> <p>For development that contains on-site fire hydrants external to buildings, those hydrants are identified by way of marker posts and raised reflective pavement markers in the manner prescribed in the technical note <i>Fire hydrant indication system</i> produced by the Queensland Department of Transport and Main Roads.</p> <p>Note - Technical note Fire hydrant indication system is available on the website of the Queensland Department of Transport and Main Roads.</p>

Use specific criteria	
Home based business⁽³⁵⁾	
<p>PO68</p> <p>The scale and intensity of the Home based business⁽³⁵⁾:</p> <ol style="list-style-type: none"> a. is compatible with the physical characteristics of the site and the character of the local area; b. is able to accommodate anticipated car parking demand without negatively impacting the streetscape or road safety; c. does not adversely impact on the amenity of the adjoining and nearby premises; d. remains ancillary to the residential use of the Dwelling house⁽²²⁾; e. does not create conditions which cause hazards or nuisances to neighbours or other persons not associated with the activity; f. ensures employees and visitors to the site do not negatively impact the expected amenity of adjoining properties. 	<p>E68.1</p> <p>A maximum of 1 employee (not a resident) OR 2 customers OR customers from within 1 Small rigid vehicle (SRV) or smaller are permitted on the site at any one time.</p> <hr/> <p>E68.2</p> <p>The Home based business⁽³⁵⁾ occupies an area of the existing dwelling or on-site structure not greater than 40m² gross floor area.</p>
Major electricity infrastructure⁽⁴³⁾, Substation⁽⁸⁰⁾ and Utility installation⁽⁸⁶⁾	
<p>PO69</p> <p>The development does not have an adverse impact on the visual amenity of a locality and is:</p> <ol style="list-style-type: none"> a. high quality design and construction; b. visually integrated with the surrounding area; c. not visually dominant or intrusive; d. located behind the main building line; e. below the level of the predominant tree canopy or the level of the surrounding buildings and structures; f. camouflaged through the use of colours and materials which blend into the landscape; g. treated to eliminate glare and reflectivity; h. landscaped; i. otherwise consistent with the amenity and character of the zone and surrounding area. 	<p>E69.1</p> <p>Development is designed to minimise surrounding land use conflicts by ensuring infrastructure, buildings, structures and other equipment:</p> <ol style="list-style-type: none"> a. are enclosed within buildings or structures; b. are located behind the main building line; c. have a similar height, bulk and scale to the surrounding fabric; d. have horizontal and vertical articulation applied to all exterior walls. <hr/> <p>E69.2</p> <p>A minimum 3m wide strip of dense planting is provided around the outside of the fenced area, between the development and street frontage, side and rear boundaries.</p>
<p>PO70</p> <p>Infrastructure does not have an impact on pedestrian health and safety.</p>	<p>E70</p> <p>Access control arrangements:</p> <ol style="list-style-type: none"> a. do not create dead-ends or dark alleyways adjacent to the infrastructure; b. minimise the number and width of crossovers and entry points;

6 Zones

	<ul style="list-style-type: none"> c. provide safe vehicular access to the site; d. do not utilise barbed wire or razor wire. 																		
<p>PO71</p> <p>All activities associated with the development occur within an environment incorporating sufficient controls to ensure the facility:</p> <ul style="list-style-type: none"> a. generates no audible sound at the site boundaries where in a residential setting; or b. meet the objectives as set out in the Environmental Protection (Noise) Policy 2008. 	<p>E71</p> <p>All equipment which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure noise emissions meet the objectives as set out in the Environmental Protection (Noise) Policy 2008.</p>																		
Residential uses																			
<p>PO72</p> <p>Development contributes to greater housing choice and affordability by:</p> <ul style="list-style-type: none"> a. contributing to the range of dwelling types and sizes in the area; b. providing greater housing density within the Caboolture centre precinct and around the Caboolture rail station making efficient use of land. 	<p>No example provided.</p>																		
<p>PO73</p> <p>Caretaker's accommodation⁽¹⁰⁾ and Dwelling units⁽²³⁾ are provided with adequate functional and attractive private open space that is:</p> <ul style="list-style-type: none"> a. directly accessible from the dwelling and is located so that residents and neighbouring uses experience a suitable level of amenity; b. designed and constructed to achieve adequate privacy for occupants from other Dwelling units⁽²³⁾ and centre uses; c. accessible and readily identifiable for residents, visitors and emergency services; d. located to not compromise active frontages. 	<p>E73</p> <p>A dwelling has a clearly defined, private outdoor living space that is:</p> <ul style="list-style-type: none"> a. as per table below; <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 33%;">Use</th> <th style="width: 33%;">Minimum Area</th> <th style="width: 33%;">Minimum Dimension in all directions</th> </tr> </thead> <tbody> <tr> <td colspan="3">Ground level floor dwellings</td> </tr> <tr> <td>All dwelling types</td> <td>16m²</td> <td>4m</td> </tr> <tr> <td colspan="3">Above ground level floor dwellings</td> </tr> <tr> <td>1 bedroom or studio,</td> <td>8m²</td> <td>2.5m</td> </tr> <tr> <td>2 or more bedrooms</td> <td>12m²</td> <td>3.0m</td> </tr> </tbody> </table> <ul style="list-style-type: none"> a. accessed from a living area; b. sufficiently screened or elevated for privacy; c. ground level floor open space is located behind the main building line and not within the primary or secondary frontage setbacks; d. balconies orientate to the street; e. clear of any non-recreational structure (including but not limited to air-conditioning units, water tanks, clothes drying facilities, storage structures, retaining structures and refuse storage areas). 	Use	Minimum Area	Minimum Dimension in all directions	Ground level floor dwellings			All dwelling types	16m ²	4m	Above ground level floor dwellings			1 bedroom or studio,	8m ²	2.5m	2 or more bedrooms	12m ²	3.0m
Use	Minimum Area	Minimum Dimension in all directions																	
Ground level floor dwellings																			
All dwelling types	16m ²	4m																	
Above ground level floor dwellings																			
1 bedroom or studio,	8m ²	2.5m																	
2 or more bedrooms	12m ²	3.0m																	

	Note: areas for clothes drying are not visible from street frontages or public areas (e.g. Separate clothes drying areas are provided that are oriented to the side or rear of the site or screening is provided).
<p>PO74</p> <p>Caretaker's accommodation⁽¹⁰⁾ and Dwelling units⁽²³⁾ are provided with a reasonable level of access, identification and privacy from adjoining residential and non-residential uses.</p> <p>Note - Refer to State Government standards for CPTED.</p> <p>Note - Refer to Planning scheme policy - Residential design for details and examples.</p>	<p>E74</p> <p>The dwelling:</p> <ol style="list-style-type: none"> includes screening to a maximum external transparency of 50% for all habitable room windows that are visible from other dwellings and non-residential uses; clearly displays the street number at the entrance to the dwelling and at the front of the site to enable identification by emergency services; is provided with a separate entrance to that of any non-residential use on the site; where located on a site with a non-residential use the dwelling is located behind or above the non-residential use. <p>Note - External fixed or movable screening, opaque glass and window tinting are considered acceptable forms of screening.</p>
Retail and commercial uses	
<p>PO75</p> <p>King Street remains the primary location for significant retail activity in the Caboolture Central Business District.</p> <p>Note - Refer to Planning scheme policy - Caboolture concept plan for details and examples.</p>	<p>E75.1</p> <p>Retail tenancies are limited to 250m² GFA where located outside of the Caboolture centre core as identified on 'Figure 6.2.1.1.1 - Caboolture '.</p>
	<p>E75.2</p> <p>Development on-sites with a frontage to King Street, incorporates retail uses on the ground floor directly accessible from the King Street frontage.</p>
<p>PO76</p> <p>The Caboolture centre precinct retains a strong commercial and administrative focus, with residential activities provided only where part of a mixed use building and not located at the ground level or within a podium.</p> <p>Note - Refer to Planning scheme policy - Caboolture concept plan for details and examples.</p>	No example provided.
Service station	

6 Zones

Note - Where the use specific outcomes relating to Service Stations are inconsistent with other examples or Performance Outcomes in this Code, the use specific outcomes below prevail.

<p>PO</p> <p>Service stations are located, designed and orientated to:</p> <ol style="list-style-type: none"> establish on heavily trafficked roads where the amenity of surrounding residential uses is already subject to impacts by road vehicle noise; establish outside of Key Sites; not negatively impact active streets, public spaces or hubs of activity where the pedestrian safety and comfort is of high importance; not result in the fragmentation of active streets (e.g. site where active uses are located on adjoining lots); ensure the amenity of adjoining properties is protected; reduce the visual impact of the Service station from the streetscape while maintaining surveillance from the site to the street; minimise impacts on adjoining residential uses, to a level suitable relative to expected residential amenity of the area. (e.g. high order road in urban or next generation neighbourhood, likely to be noisy and not like suburban); provide ancillary uses that meet the convenience needs of users. 	<p>E</p> <p>Service stations are located:</p> <ol style="list-style-type: none"> on the periphery of the Centre adjoining or within 100m of land zoned other than Centre zone; on the corner lot of an arterial or sub-arterial road; outside areas nominated as Key Sites.
<p>Telecommunications facility⁽⁸¹⁾</p> <p>Editor's note - In accordance with the Federal legislation Telecommunications facilities⁽⁸¹⁾ must be constructed and operated in a manner that will not cause human exposure to electromagnetic radiation beyond the limits outlined in the Radiocommunications (Electromagnetic Radiation - Human Exposure) Standard 2003 and Radio Protection Standard for Maximum Exposure Levels to Radiofrequency Fields - 3Khz to 300Ghz.</p>	<p>E</p> <p>Service stations are designed and orientated on site to:</p> <ol style="list-style-type: none"> include a landscaping strip having a minimum depth of 1m adjoining all road frontages; buildings and structures (including fuel pump canopies) are setback a minimum of 3m from the primary and secondary frontage and a minimum of 5m from side and rear boundaries; include a screen fence, of a height and standard in accordance with a noise impact assessment (Note - Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise), on side and rear boundaries where adjoining land is able to contain a residential use; not include more than 2 driveway crossovers.
<p>PO77</p> <p>Telecommunications facilities⁽⁸¹⁾ are co-located with existing telecommunications facilities⁽⁸¹⁾, Utility installation⁽⁸⁶⁾, Major electricity infrastructure⁽⁴³⁾ or Substation⁽⁸⁰⁾ if there is already a facility in the same coverage area.</p>	<p>E77.1</p> <p>New telecommunication facilities⁽⁸¹⁾ are co-located on existing towers with new equipment shelter and associated structures positioned adjacent to the existing shelters and structures.</p> <p>E77.2</p> <p>If not co-located with an existing facility, all co-location opportunities have been investigated and fully exhausted within a 2km radius of the site.</p>
<p>PO78</p>	<p>E78</p>

<p>A new Telecommunications facility⁽⁸¹⁾ is designed and constructed to ensure co-masting or co-siting with other carriers both on the tower or pole and at ground level is possible in the future.</p>	<p>A minimum area of 45m² is available at ground level to allow for additional equipment shelters and associated structures for the purpose of co-locating on the proposed facility.</p>
<p>PO79</p> <p>Telecommunications facilities⁽⁸¹⁾ do not conflict with lawful existing land uses both on and adjoining the site.</p>	<p>E79</p> <p>The development results in no net reduction in the minimum quantity and standard of landscaping, private or communal open space or car parking spaces required under the planning scheme or under an existing development approval.</p>
<p>PO80</p> <p>The Telecommunications facility⁽⁸¹⁾ does not have an adverse impact on the visual amenity of a locality and is:</p> <ol style="list-style-type: none"> high quality design and construction; visually integrated with the surrounding area; not visually dominant or intrusive; located behind the main building line; below the level of the predominant tree canopy or the level of the surrounding buildings and structures; camouflaged through the use of colours and materials which blend into the landscape; treated to eliminate glare and reflectivity; landscaped; otherwise consistent with the amenity and character of the zone and surrounding area. 	<p>E80.1</p> <p>Where in an urban area, the development does not protrude more than 5m above the level of the existing treeline, prominent ridgeline or building rooftops in the surrounding townscape.</p> <p>E80.2</p> <p>In all other areas towers do not exceed 35m in height.</p> <p>E80.3</p> <p>Towers, equipment shelters and associated structures are of a design, colour and material to:</p> <ol style="list-style-type: none"> reduce recognition in the landscape; reduce glare and reflectivity. <p>E80.4</p> <p>All structures and buildings are setback behind the main building line and a minimum of 10m from side and rear boundaries, except where in the Industry and Extractive industry zones, the minimum side and rear setback is 3m.</p> <p>Where there is no established building line the facility is located at the rear of the site.</p> <p>E80.5</p> <p>The facility is enclosed by security fencing or by other means to ensure public access is prohibited.</p> <p>E80.6</p> <p>A minimum 3m wide strip of dense planting is provided around the perimeter of the fenced area, between the facility and street frontage and adjoining uses.</p> <p>Note - Landscaping is provided in accordance with Planning scheme policy - Integrated design.</p>

6 Zones

	Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person, to ensure compliance with Planning scheme policy - Integrated design.
<p>PO81</p> <p>Lawful access is maintained to the site at all times that does not alter the amenity of the landscape or surrounding uses.</p>	<p>E81</p> <p>An Access and Landscape Plan demonstrates how 24 hour vehicular access will be obtained and maintained to the facility in a manner that is appropriate to the site's context.</p>
<p>PO82</p> <p>All activities associated with the development occur within an environment incorporating sufficient controls to ensure the facility generates no audible sound at the site boundaries where in a residential setting.</p>	<p>E82</p> <p>All equipment comprising the Telecommunications facility⁽⁸¹⁾ which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure no noise from this equipment can be heard, or felt at the site boundary.</p>
Key sites	
<p>PO83</p> <p>Development of Key site A (Caboolture park shopping centre), shown on 'Figure 6.2.1.1.1 - Caboolture ':</p> <ol style="list-style-type: none"> incorporates an appropriate mix of uses, including a substantial retail and commercial component; incorporates residential uses along the Elliot Street frontage; increases permeability, especially for pedestrians within the Caboolture centre precinct; contributes to a high quality streetscape, providing active frontages and high quality finishes along streets and public spaces. <p>Note - Refer to Planning scheme policy - Caboolture concept plan for details and examples.</p>	No example provided.
<p>PO84</p> <p>Development of Key site C (James Street site), shown on 'Figure 6.2.1.1.1 - Caboolture ':</p> <ol style="list-style-type: none"> incorporates a mix of uses, including residential activities where appropriate; provides a high quality, active building frontage along James Street connecting the Caboolture train station with the Caboolture town square; 	No example provided.

<ul style="list-style-type: none"> c. contributes to greater pedestrian permeability within the Caboolture centre precinct, by providing cross block pedestrian links; d. does not incorporate car parking between buildings and the James Street frontage; e. utilises Armstrong Lane for vehicle access and servicing; f. includes street trees. <p>Note - Refer to Planning scheme policy - Caboolture concept plan for details and examples.</p>	
<p>PO85</p> <p>Development of Key Site B (Lakes centre), shown on 'Figure 6.2.1.1.1 - Caboolture ':</p> <ul style="list-style-type: none"> a. incorporates an appropriate mix of uses, including commercial, retail and residential where appropriate; b. contributes to the provision of civic space within the Caboolture centre precinct, capitalising on the site's mature trees; c. increases permeability within the Caboolture centre precinct, through the provision of a connection between King Street and Esme Avenue; d. contributes to a high quality streetscape on King Street and Esme Avenue; e. supports the consolidation of vehicle access points with adjoining properties along King Street. <p>Note - Refer to Planning scheme policy - Caboolture concept plan for details and examples.</p>	No example provided.
<p>Values and constraints criteria</p> <p>Note - The relevant values and constraints criteria do not apply where the development is consistent with a current Development permit for Reconfiguring a lot or Material change of use or Operational work, where that approval has considered and addressed (e.g. through a development footprint plan (or similar in the case of Landslide hazard) or conditions of approval) the identified value or constraint under this planning scheme.</p>	
<p>Acid sulfate soils - (refer Overlay map - Acid sulfate soils to determine if the following requirements apply)</p> <p>Note - To demonstrate achievement of the performance outcome, an Acid sulfate soils (ASS) investigation report and soil management plan is prepared by a qualified engineer. Guidance for the preparation an ASS investigation report and soil management plan is provided in Planning scheme policy - Acid sulfate soils.</p>	
PO86	E86

6 Zones

<p>Development avoids disturbing acid sulfate soils. Where development disturbs acid sulfate soils, development:</p> <ol style="list-style-type: none"> is managed to avoid or minimise the release of surface or groundwater flows containing acid and metal contaminants into the environment; protects the environmental and ecological values and health of receiving waters; protects buildings and infrastructure from the effects of acid sulfate soils. 	<p>Development does not involve:</p> <ol style="list-style-type: none"> excavation or otherwise removing of more than 100m³ of soil or sediment where below than 5m Australian Height datum AHD; or filling of land of more than 500m³ of material with an average depth of 0.5m or greater where below the 5m Australian Height datum AHD.
<p>Environmental areas (refer Overlay map - Environmental areas to determine if the following requirements apply)</p> <p>Note – The following are excluded from the native vegetation clearing provisions of this planning scheme:</p> <ol style="list-style-type: none"> Clearing of native vegetation located within an approved development footprint; Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental Management and Conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence; Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes; Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council; Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens; Grazing of native pasture by stock; Native forest practice where accepted development under Part 1, 1.7.7 Accepted development <p>Note - Definition for native vegetation is located in Schedule 1 Definitions.</p> <p>Note - Native vegetation subject to this criteria primarily comprises of matters of national environmental significance (MNES), matters of state environmental significance (MSES). They also comprise some matters of local environmental significance (MLES). A MLES is defined in Schedule 1.2, Administrative definitions. A list of the elements that apply to the mapped MSES and MLES is provided in Appendix 1 of the Planning scheme policy - Environmental areas.</p> <p>Editors' Note - The accuracy of overlay mapping can be challenged through the development application process (code assessable development) or by way of a planning scheme amendment. See Council's website for details.</p> <p>Note - To demonstrate achievement of the performance outcome, an ecological assessment, vegetation management plan and fauna management plan, as required, are prepared by a suitably qualified person. Guidance for the preparation of above mentioned reports is provided in Planning scheme policy - Environmental areas.</p>	
<p>Vegetation clearing, ecological value and connectivity</p>	
<p>PO87</p>	<p>No example provided.</p>

<p>Development avoids locating in a High Value Area or a Value Offset Area. Where it is not practicable or reasonable for development to avoid establishing in these areas, development must ensure that:</p> <ol style="list-style-type: none"> a. the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area is maintained and not lost or degraded; b. on-site mitigation measures, mechanisms or processes are in place demonstrating the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area are maintained. For example, this can be achieved through replacement, restoration or rehabilitation planting as part of any proposed covenant, the development of a Vegetation Management Plan, a Fauna Management Plan, and any other on-site mitigation options identified in the Planning scheme policy - Environmental areas*. <p>* Editor's note - This is not a requirement for an environmental offset under the Environmental Offsets Act 2014.</p>	
<p>PO87</p> <p>Development provides for safe, unimpeded, convenient and ongoing wildlife movement and establishes and maintains habitat connectivity by:</p> <ol style="list-style-type: none"> a. retaining habitat trees; b. providing contiguous patches of habitat; c. provide replacement and rehabilitation planting to improve connectivity; d. avoiding the creation of fragmented and isolated patches of habitat; e. providing wildlife movement infrastructure. <p>Editor's note - Wildlife movement infrastructure may include refuge poles, tree boulevarding, 'stepping stone' vegetation plantings, tunnels, appropriate wildlife fencing; culverts with ledges, underpasses, overpasses, land bridges and rope bridges. Further information is provided in Planning scheme policy – Environmental areas.</p>	No example provided.
Vegetation clearing and habitat protection	
<p>PO88</p> <p>Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected.</p>	No example provided.
<p>PO89</p>	No example provided.

6 Zones

<p>Development does not result in the net loss or degradation of habitat value in a High Value Area or a Value Offset Area. Where development does result in the loss or degradation of habitat value, development will:</p> <ol style="list-style-type: none"> rehabilitate, revegetate, restore and enhance an area to ensure it continues to function as a viable and healthy habitat area; provide replacement fauna nesting boxes in the event of habitat tree loss in accordance with Planning scheme policy - Environmental areas; undertake rehabilitation, revegetation and restoration in accordance with the South East Queensland Ecological Restoration Framework. 	
<p>PO90</p> <p>Development ensures safe, unimpeded, convenient and ongoing wildlife movement and habitat connectivity by:</p> <ol style="list-style-type: none"> providing contiguous patches of habitat; avoiding the creation of fragmented and isolated patches of habitat; providing wildlife movement infrastructure; providing replacement and rehabilitation planting to improve connectivity. 	<p>No example provided.</p>
<p>Vegetation clearing and soil resource stability</p>	
<p>PO91</p> <p>Development does not:</p> <ol style="list-style-type: none"> result in soil erosion or land degradation; leave cleared land exposed for an unreasonable period of time but is rehabilitated in a timely manner. 	<p>No example provided.</p>
<p>Vegetation clearing and water quality</p>	
<p>PO92</p> <p>Development maintains or improves the quality of groundwater and surface water within, and downstream, of a site by:</p> <ol style="list-style-type: none"> ensuring an effective vegetated buffers and setbacks from waterbodies is retained to achieve natural filtration and reduce sediment loads; avoiding or minimising changes to landforms to maintain hydrological water flows; adopting suitable measures to exclude livestock from entering a waterbody where a site is being used for animal husbandry⁽⁴⁾ and animal keeping⁽⁵⁾ activities. 	<p>No example provided.</p>
<p>PO93</p> <p>Development minimises adverse impacts of stormwater run-off on water quality by:</p>	<p>No example provided.</p>

<ul style="list-style-type: none"> a. minimising flow velocity to reduce erosion; b. minimising hard surface areas; c. maximising the use of permeable surfaces; d. incorporating sediment retention devices; e. minimising channelled flow. 	
Vegetation clearing and access, edge effects and urban heat island effects	
<p>PO94</p> <p>Development retains safe and convenient public access in a manner that does not result in the adverse edge effects or the loss or degradation of biodiversity values within the environment.</p>	No example provided.
<p>PO95</p> <p>Development minimises potential adverse 'edge effects' on ecological values by:</p> <ul style="list-style-type: none"> a. providing dense planting buffers of native vegetation between a development and environmental areas; b. retaining patches of native vegetation of greatest possible size where located between a development and environmental areas ; c. restoring, rehabilitating and increasing the size of existing patches of native vegetation; d. ensuring that buildings and access (public and vehicle) are setback as far as possible from environmental areas and corridors; e. landscaping with native plants of local origin. <p>Editor's note - Edge effects are factors of development that go to detrimentally affecting the composition and density of natural populations at the fringe of natural areas. Factors include weed invasion, pets, public and vehicle access, nutrient loads, noise and light pollution, increased fire frequency and changes in the groundwater and surface water flow.</p>	No example provided.
<p>PO96</p> <p>Development avoids adverse microclimate change and does not result in increased urban heat island effects. Adverse urban heat island effects are minimised by:</p> <ul style="list-style-type: none"> a. pervious surfaces; b. providing deeply planted vegetation buffers and green linkage opportunities; c. landscaping with local native plant species to achieve well-shaded urban places; d. increasing the service extent of the urban forest canopy. 	No example provided.
Vegetation clearing and Matters of Local Environmental Significance (MLES) environmental offsets	
PO97	No example provided.

6 Zones

<p>Where development results in the unavoidable loss of native vegetation within a Value Offset Area MLES waterway buffer or a Value Offset Area MLES wetland buffer, an environmental offset is required in accordance with the environmental offset requirements identified in Planning scheme policy - Environmental areas.</p> <p>Editor's note - For MSES Koala Offsets, the environmental offset provisions in Schedule 11 of the Regulation, in combination with the requirements of the Environmental Offsets Act 2014, apply.</p>	
<p>Heritage and landscape character (refer Overlay map - Heritage and landscape character to determine if the following requirements apply)</p> <p>Note - To assist in demonstrating achievement of heritage performance outcomes, a Cultural heritage impact assessment report is prepared by a suitably qualified person verifying the proposed development is in accordance with The Australia ICOMOS Burra Charter.</p> <p>Note - To assist in demonstrating achievement of this performance outcome, a Tree assessment report is prepared by a qualified arborist in accordance with Planning scheme policy – Heritage and landscape character. The Tree assessment report will also detail the measures adopted in accordance with AS 4970-2009 Protection of trees on development sites.</p> <p>Note - Places, including sites, objects and buildings having local cultural heritage significance, are identified on Overlay map - Heritage and landscape character and listed in Schedule 1 of Planning scheme policy - Heritage and landscape character. Places also having cultural heritage significance at a State level and being entered in the Queensland Heritage Register, are also identified in Schedule 1 of Planning scheme policy - Heritage and landscape character.</p>	
<p>PO98</p> <p>Development will:</p> <ol style="list-style-type: none"> not diminish or cause irreversible damage to the cultural heritage values present on the site, and associated with a heritage site, object or building; protect the fabric and setting of the heritage site, object or building; be consistent with the form, scale and style of the heritage site, object or building; utilise similar materials to those existing, or where this is not reasonable or practicable, neutral materials and finishes; incorporate complementary elements, detailing and ornamentation to those present on the heritage site, object or building; retain public access where this is currently provided. 	<p>E98</p> <p>Development is for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value.</p> <p>Note - A cultural heritage conservation management plan for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value is prepared in accordance with Planning scheme policy - Heritage and landscape character. The plan is sent to, and approved by Council prior to the commencement of any preservation, maintenance, repair and restoration works.</p>
<p>PO99</p> <p>Demolition and removal is only considered where:</p> <ol style="list-style-type: none"> a report prepared by a suitably qualified conservation architect or conservation engineer demonstrates that the building is structurally unsound and is not reasonably capable of economic repair; or demolition is confined to the removal of outbuildings, extensions and alterations that are not part of the original structure; or 	<p>No example provided.</p>

<ul style="list-style-type: none"> c. limited demolition is performed in the course of repairs, maintenance or restoration; or d. demolition is performed following a catastrophic event which substantially destroys the building or object. 	
<p>PO100</p> <p>Where development is occurring on land adjoining a site of cultural heritage value, the development is to be sympathetic to and consistent with the cultural heritage values present on the site and not result in their values being eroded, degraded or unreasonably obscured from public view.</p>	<p>No example provided.</p>
<p>PO101</p> <p>Development does not adversely impact upon the health and vitality of significant trees. Where development occurs in proximity to a significant tree, construction measures and techniques as detailed in AS 4970-2009 Protection of trees on development sites are adopted to ensure a significant tree's health, wellbeing and vitality.</p> <p>Significant trees are only removed where they are in a poor state of health or where they pose a health and safety risk to persons or property. A Tree Assessment report prepared by a suitably qualified arborist confirming a tree's state of health is required to demonstrate achievement of this performance outcome.</p>	<p>E101</p> <p>Development does:</p> <ul style="list-style-type: none"> a. not result in the removal of a significant tree; b. not occur within 20m of a protected tree; c. involve pruning of a tree in accordance with Australian Standard AS 4373-2007 – Pruning of Amenity Trees.
<p>Overland flow path (refer Overlay map - Overland flow path to determine if the following requirements apply)</p> <p>Note - The applicable river and creek flood planning levels associated with defined flood event (DFE) within the inundation area can be obtained by requesting a flood check property report from Council.</p>	
<p>PO102</p> <p>Development:</p> <ul style="list-style-type: none"> a. minimises the risk to persons from overland flow; b. does not increase the potential for damage from overland flow either on the premises or other premises, public land, watercourses, roads or infrastructure. 	<p>No example provided.</p>
<p>PO103</p> <p>Development:</p> <ul style="list-style-type: none"> a. maintains the conveyance of overland flow predominantly unimpeded through the premises for any event up to and including the 1% AEP for the fully developed upstream catchment; b. does not concentrate, intensify or divert overland flow onto an upstream, downstream or surrounding property. 	<p>No example provided.</p>

6 Zones

<p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow.</p>	
<p>PO104</p> <p>Development does not:</p> <ol style="list-style-type: none"> directly, indirectly or cumulatively cause any increase in overland flow velocity or level; increase the potential for flood damage from overland flow either on the premises or other premises, public lands, watercourses, roads or infrastructure. <p>Note - Open concrete drains greater than 1m in width are not an acceptable outcome, nor are any other design options that may increase scouring.</p>	<p>No example provided.</p>
<p>PO105</p> <p>Development ensures that public safety and the risk to the environment are not adversely affected by a detrimental impact of overland flow on a hazardous chemical located or stored on the premises.</p>	<p>E105</p> <p>Development ensures that a hazardous chemical is not located or stored in an Overland flow path area.</p> <p>Note - Refer to the Work Health and Safety Act 2011 and associated Regulation and Guidelines, the Environmental Protection Act 1994 and the relevant building assessment provisions under the Building Act 1975 for requirements related to the manufacture and storage of hazardous substances.</p>
<p>PO106</p> <p>Development which is not in a Rural zone ensures that overland flow is not conveyed from a road or public open space onto a private lot.</p>	<p>E106</p> <p>Development which is not in a Rural zone that an overland flow paths and drainage infrastructure is provided to convey overland flow from a road or public open space area away from a private lot.</p>
<p>PO107</p> <p>Development ensures that inter-allotment drainage infrastructure, overland flow paths and open drains through private property cater for overland flows for a fully developed upstream catchment and are able to be easily maintained.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow</p>	<p>E107.1</p> <p>Development ensures that roof and allotment drainage infrastructure is provided in accordance with the following relevant level as identified in QUDM:</p> <ol style="list-style-type: none"> Urban area – Level III; Rural area – N/A; Industrial area – Level V; Commercial area – Level V. <p>E107.2</p>

	Development ensures that inter-allotment drainage infrastructure is designed to accommodate any event up to and including the 1% AEP for the fully developed upstream catchment.
<p>PO108</p> <p>Development protects the conveyance of overland flow such that an easement for drainage purposes is provided over:</p> <ol style="list-style-type: none"> a stormwater pipe if the nominal pipe diameter exceeds 300mm; an overland flow path where it crosses more than one premises; inter-allotment drainage infrastructure. <p>Note - Refer to Planning scheme policy - Integrated design for details and examples.</p> <p>Note - Stormwater Drainage easement dimensions are provided in accordance with Section 3.8.5 of QUDM.</p>	No example provided.
Additional criteria for development for a Park⁽⁵⁷⁾	
<p>PO109</p> <p>Development for a Park⁽⁵⁷⁾ ensures that the design and layout responds to the nature of the overland flow affecting the premises such that:</p> <ol style="list-style-type: none"> public benefit and enjoyment is maximised; impacts on the asset life and integrity of park structures is minimised; maintenance and replacement costs are minimised. 	<p>E109</p> <p>Development for a Park⁽⁵⁷⁾ ensures works are provided in accordance with the requirements set out in Appendix B of the Planning scheme policy - Integrated design.</p>
Riparian and wetland setbacks	
<p>PO110</p> <p>Development provides and maintains a suitable setback from waterways and wetlands that protects natural and environmental values. This is achieved by recognising and responding to the following matters:</p> <ol style="list-style-type: none"> impact on fauna habitats; impact on wildlife corridors and connectivity; 	<p>E110</p> <p>Development does not occur within:</p> <ol style="list-style-type: none"> 50m from top of bank for W1 waterway and drainage line 30m from top of bank for W2 waterway and drainage line

6 Zones

<ul style="list-style-type: none">c. impact on stream integrity;d. impact of opportunities for revegetation and rehabilitation planting;e. edge effects.	<ul style="list-style-type: none">c. 20m from top of bank for W3 waterway and drainage lined. 100m from the edge of a Ramsar wetland, 50m from all other wetlands. <p>Note - W1, W2 and W3 waterway and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.</p>
--	---

Figure 6.2.1.1.1 - Caboolture

6 Zones

6.2.1.2 Morayfield centre precinct

6.2.1.2.1 Purpose - Morayfield centre precinct

1. The purpose of the code will be achieved through the following overall outcomes for the Morayfield centre precinct:
 - a. Development incorporates a limited mix of predominately large-format retail and commercial activities which support, but do not compete with the business, commercial or retail functions of the Caboolture centre precinct.
 - b. Development contributes to the consolidation of the Morayfield centre precinct, through:
 - i. greater land use efficiency within the precinct;
 - ii. consolidation of existing large-format retail and showroom⁽⁷⁸⁾ retail development.
 - c. Development is contained within the precinct boundaries and does not result in centre uses occurring outside of the Morayfield centre precinct into adjoining zones.
 - d. Development encourages increased active and public transport usage by:
 - i. increasing land use intensity within walking distance of public transport facilities;
 - ii. contributing to attractive, walkable street environments, through streetscape upgrades and enhancements;
 - iii. prioritising pedestrian and cycle safety and movement over private vehicle access and movement.
 - e. ~~Adverse noise, odour and air quality impacts are minimised to protect the amenity of surrounding sensitive land uses.~~ Adverse impacts on the amenity of surrounding land uses are minimised by mitigating noise, odour and air quality impacts on residents to a level consistent with the location within or adjoining the centre.
 - f. Development achieves a high standard of urban design and contributes to a visually interesting frontage along transport corridors.
 - g. Facilities and infrastructure are provided to improve pedestrian connectivity and walkability between key destinations within and external to the site through public realm improvements.
 - h. Development ensures the safety, comfort and enjoyment of residents, visitors and works.
 - i. The design, siting and construction of buildings:
 - i. contributes to a high quality centre consistent with the desired character of the centre and surrounding area;
 - ii. maintains a human scale, through appropriate building heights and form;
 - iii. provides attractive, active frontages that address internal and external public spaces and adjoining roads;
 - iv. provides for active and passive surveillance of the public spaces and road frontages;
 - v. ensures parking, manoeuvring and servicing areas are designed, located and aesthetically treated to not be visually dominant features from surrounding sites and road frontages.
 - j. Major re-development of the Morayfield Shopping Centre site is designed to:
 - i. incorporate greater land use efficiency through a more intense built form;

- ii. re-focus the centre to the north;
 - iii. incorporate active frontages to Leda Boulevard, William Berry Drive and Dickson Road;
 - iv. locate vehicle parking areas away from street frontages;
 - v. provide street connections through the site to increase permeability;
 - vi. incorporate the transit interchange into the overall design of the centre.
- k. Development does not provide an oversupply of car parking spaces and wherever possible, consolidates vehicle access and parking areas with surrounding development.
- l. **Service stations:**
- i. **establish where they will not disrupt, fragment or negatively impact active frontages or streets where pedestrian safety and comfort are of high importance;**
 - ii. **establish on heavily trafficked roads where the amenity of surrounding residential uses is already subject to impacts from road vehicle noise;**
 - iii. **establish in locations that will not have a negative impact on the street environments intended to include active frontages;**
 - iv. **do not negatively impact adjoining residents or the streetscape;**
 - v. **ancillary uses or activities only service the convenience needs of users.**
- m. General works associated with the development achieves the following:
- i. new development is provided with a high standard of services to meet and support the current and future needs of users of the site, including roads, street lighting services, telecommunications and reticulated electricity (underground wherever possible), water and sewerage (where available);
 - ii. the development manages stormwater to:
 - A. ensure the discharge of stormwater does not adversely affect the quality, environmental values or ecosystem functions of downstream receiving waters;
 - B. prevent stormwater contamination and the release of pollutants;
 - C. maintain or improve the structure and condition of drainage lines and riparian areas;
 - D. avoid off-site adverse impacts from stormwater.
 - iii. the development does not result in unacceptable impacts on the capacity and safety of the external road network;
 - iv. the development ensures the safety, efficiency and useability of access ways and parking areas;
 - v. site works including earthworks are managed to be safe and have minimal impacts on adjoining or adjacent premises, the streetscape or the environment.
- n. Activities associated with the use do not cause a nuisance by way of aerosols, fumes, light, noise, odour, particles or smoke.
- o. Noise generating uses are designed, sited and constructed to minimise the transmission of noise to appropriate levels and do not cause environmental harm or nuisance.
- p. Noise sensitive uses are designed, sited and constructed so as not to be subject to unacceptable levels of noise.
- q. Development avoids areas subject to constraint, limitation, or environmental value. Where development cannot avoid these identified areas, it responds by:

6 Zones

- i. adopting a 'least risk, least impact' approach when designing, siting and locating development in any area subject to a constraint, limitation or environmental value to minimise the potential risk to people, property and the environment;
- ii. ensuring no further instability, erosion or degradation of the land, water or soil resource;
- iii. when located within a Water buffer area, complying with the Water Quality Vision and Objectives contained in the Seqwater Development Guidelines: Development Guidelines for Water Quality Management in Drinking Water Catchments 2012.
- iv. maintaining, restoring and rehabilitating environmental values, including natural, ecological, biological, aquatic, hydrological and amenity values, and enhancing these values through the provision of planting and landscaping, and facilitating safe wildlife movement and connectivity through:
 - A. the provision of replacement, restoration, rehabilitation planting and landscaping;
 - B. the location, design and management of development to avoid or minimise adverse impacts on ecological systems and processes;
 - C. the requiring of environmental offsets in accordance with the Environmental Offsets Act 2014.
- v. protecting native species and protecting and enhancing species habitat;
- vi. protecting and preserving the natural, aesthetic, architectural historic and cultural values of significant trees, places, objects and buildings of heritage and cultural significance;
- vii. establishing effective separation distances, buffers and mitigation measures associated with identified infrastructure to minimise adverse effects on sensitive land uses from odour, noise, dust and other nuisance generating activities;
- viii. establishing, maintaining and protecting appropriate buffers to waterways, wetlands, native vegetation and significant fauna habitat;
- ix. ensuring it promotes and does not undermine the ongoing viability, integrity, operation, maintenance and safety of identified infrastructure;
- x. ensuring effective and efficient disaster management response and recovery capabilities;
- xi. where located in an overland flow path:
 - A. development siting, built form, layout and access responds to the risk presented by the overland flow and minimises risk to personal safety;
 - B. development is resilient to the impacts of overland flow by ensuring the siting and design accounts for the potential risks to property associated with the overland flow;
 - C. development does not impact on the conveyance of the overland flow for any event up to and including the 1% AEP for the fully developed upstream catchment;
 - D. development directly, indirectly and cumulatively avoid an increase in the severity of overland flow and potential for damage on the premises or other premises, public lands, watercourses, roads or infrastructure.
- r. Development in the Morayfield centre precinct includes one or more of the following uses:

<ul style="list-style-type: none"> • Caretaker's accommodation⁽¹⁰⁾ • Food and drink outlet⁽²⁸⁾ 	<ul style="list-style-type: none"> • Home based business⁽³⁵⁾ • Indoor sport and recreation⁽³⁸⁾ 	<ul style="list-style-type: none"> • Service industry⁽⁷³⁾ • Service station⁽⁷⁴⁾
--	--	--

<ul style="list-style-type: none"> Emergency services⁽²⁵⁾ Garden centre⁽³¹⁾ Hardware and trade supplies⁽³²⁾ 	<ul style="list-style-type: none"> Market⁽⁴⁶⁾ Outdoor sales⁽⁵⁴⁾ Place of worship⁽⁶⁰⁾ 	<ul style="list-style-type: none"> Shop⁽⁷⁵⁾ Showroom⁽⁷⁸⁾ Veterinary services⁽⁸⁷⁾
---	--	--

s. Development in the Morayfield centre precinct does not include any of the following uses:

<ul style="list-style-type: none"> Air services⁽³⁾ Animal husbandry⁽⁴⁾ Animal keeping⁽⁵⁾ Aquaculture⁽⁶⁾ Brothel⁽⁸⁾ Bulk landscape supplies⁽⁹⁾ Cemetery⁽¹²⁾ Crematorium⁽¹⁸⁾ Cropping⁽¹⁹⁾ Detention facility⁽²⁰⁾ Extractive industry⁽²⁷⁾ Function facility⁽²⁹⁾ High impact industry⁽³⁴⁾ Intensive animal industry⁽³⁹⁾ 	<ul style="list-style-type: none"> Intensive horticulture⁽⁴⁰⁾ Marine industry⁽⁴⁵⁾ Medium impact industry⁽⁴⁷⁾ Motor sport facility⁽⁴⁸⁾ Nature-based tourism⁽⁵⁰⁾ Nightclub entertainment facility⁽⁵¹⁾ Non-resident workforce accommodation⁽⁵²⁾ Outdoor sport and recreation⁽⁵⁵⁾ Permanent plantation⁽⁵⁹⁾ Relocatable home park⁽⁶²⁾ Resort complex⁽⁶⁶⁾ 	<ul style="list-style-type: none"> Roadside stall⁽⁶⁸⁾ Rural industry⁽⁷⁰⁾ Rural workers' accommodation⁽⁷¹⁾ Short-term accommodation⁽⁷⁷⁾ Special industry⁽⁷⁹⁾ Tourist attraction⁽⁸³⁾ Tourist park⁽⁸⁴⁾ Transport depot⁽⁸⁵⁾ Warehouse⁽⁸⁸⁾ Wholesale nursery⁽⁸⁹⁾ Winery⁽⁹⁰⁾
---	---	--

t. Development not listed in the tables above may be considered on its merits and where it reflects and supports the outcomes of the precinct.

Part C - Criteria for assessable development - Morayfield centre precinct

Where development is categorised as assessable development - code assessment in the Table of Assessment, the assessment benchmarks are the criteria set out in Part C, Table 6.2.1.2.1 as well as the purpose statement and overall outcomes of this code.

Where development is categorised as assessable development - impact assessable, the assessment benchmarks become the whole of the planning scheme.

Table 6.2.1.2.1 Assessable development - Morayfield centre precinct

Performance outcomes	Examples that achieve aspects of the Performance Outcomes
General criteria	
Role of Morayfield centre precinct	

6 Zones

<p>PO1</p> <p>Development in the Morayfield centre precinct:</p> <ul style="list-style-type: none"> a. reflects the intended role of the precinct as a predominately large format retail and commercial precinct supporting the higher order business, commercial and retail functions of the Caboolture centre precinct; b. does not undermine the growth of the Caboolture centre precinct as being the focus for administration, business, commercial and high quality retail in the Moreton Bay region; c. is of a size, scale and range of services commensurate with the role and function of this precinct within the centres network. <p>Note - Refer to Moreton Bay centres network Table 6.2.1.1</p>	<p>No example provided.</p>
<p>PO2</p> <p>Development maximises the efficient use of land and provides for future growth within the precinct by maintaining or increasing the GFA and land use intensity within the precinct boundaries to promote economic development.</p>	<p>No example provided.</p>
<p>Active frontage</p>	
<p>PO3</p> <p>Buildings and individual tenancies address street frontages and other areas of pedestrian movement.</p>	<p>No example provided.</p>
<p>PO4</p> <p>Awnings are provided at the ground level floor fronting pedestrian footpaths. Awnings:</p> <ul style="list-style-type: none"> a. provide adequate protection for pedestrians from solar exposure and inclement weather; b. are integrated with the design of the building and the form and function of the street; c. do not compromise the provision of street trees and signage; d. ensure the safety of pedestrians and vehicles (e.g. No support poles). 	<p>E4</p> <p>Buildings incorporate an awning that:</p> <ul style="list-style-type: none"> a. is cantilevered; b. extends from the face of the building; c. has a minimum height of 3.2m and a maximum height of 4.4m above the pavement level; d. does not extend past a vertical plane of 1.5m inside the kerb line to allow for street trees and regulatory signage; e. aligns with adjoining buildings to provide continuous shelter where possible.

	<p style="text-align: center;">Figure - Awning requirements</p>
Setbacks	
<p>P05</p> <p>Side and rear setbacks are of a dimension to:</p> <ol style="list-style-type: none"> cater for required openings, the location of loading docks and landscaped buffers; protect the amenity of adjoining sensitive land uses. 	No example provided.
Site area	
<p>P06</p> <p>The development has sufficient area and dimensions to accommodate required buildings and structures, vehicular access, manoeuvring and parking and landscaping.</p>	No example provided.
Building height	
<p>P07</p> <p>Building height:</p> <ol style="list-style-type: none"> reflects the prominence of the Morayfield centre precinct as a higher order centre and key focal point for regional employment and development in South East Queensland; maximises land use intensity; allows for distinctive and innovative design outcomes on prominent sites; provides a transition to lower density areas surrounding the precinct. 	<p>E7</p> <p>Building height is within the minimum and maximum height identified on Overlay map - Building heights.</p>
Built form	
<p>P08</p>	No example provided.

6 Zones

<p>Buildings are designed and constructed to:</p> <ul style="list-style-type: none"> a. incorporate a mix of colours and high quality materials to add diversification to treatments and finishes; b. articulate and detail the building facade at street level and respond to the human scale; c. visually integrate with the surrounding area and adjoining buildings through appropriate design and materials; d. avoid blank walls through articulation and architectural treatments to create visual interest; e. avoid highly reflective finishes; f. avoid cluttering of plant and equipment on building roofs. 	
<p>PO9</p> <p>Building entrances:</p> <ul style="list-style-type: none"> a. are readily identifiable from the road frontage; b. are designed to limit opportunities for concealment; c. are located and oriented to favour active and public transport usage by connecting to pedestrian footpaths on the street frontage and adjoining sites; d. are adequately lit to ensure public safety and security; e. provide a dedicated, sealed pedestrian footpath between the street frontage and the building entrance. <p>Note - The design provisions for footpaths outlined in Planning scheme policy - Integrated design may assist in demonstrating compliance with this Performance Outcome.</p>	<p>No example provided.</p>
<p>Movement network</p>	
<p>PO</p> <p>Development is designed to connect to and form part of the surrounding neighbourhood by providing interconnected street, pedestrian and cyclist pathways to adjoining development, nearby centres, neighbourhood hubs, community facilities, public transport nodes and open space.</p> <p>Note - Refer to Planning scheme policy - Neighbourhood design for guidance on achieving the above outcome.</p>	<p>E</p> <p>Development provides and maintains the connections shown on the movement figures located in Appendix A of Planning scheme policy - Neighbourhood design.</p> <hr/> <p>E</p> <p>For areas not shown on a movement figure located in Appendix A of Planning scheme policy - Neighbourhood design, no example provided.</p>

	Note - Refer to Planning scheme policy - Neighbourhood design for guidance on achieving the above example.
Car parking	
<p>PO10</p> <p>The provision of car parking spaces:</p> <ol style="list-style-type: none"> is appropriate for the use; interconnects with car parking areas on adjoining sites wherever possible; avoids an oversupply of car parking spaces. <p>Note - Refer to Planning scheme policy - Integrated transport assessment for guidance on how to achieve compliance with this outcome.</p>	<p>E10</p> <p>Car parking is provided in accordance with Schedule 7.</p> <p>Note - The above rates exclude car parking spaces for people with a disability required by Disability Discrimination Act 1992 or the relevant disability discrimination legislation and standards.</p>
<p>PO11</p> <p>Car parking is designed to avoid the visual impact of large areas of surface car parking on the streetscape.</p>	No example provided.
<p>PO12</p> <p>Car parking design includes innovative solutions, including on-street parking and shared parking areas.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details and examples of on-street parking.</p>	No example provided.
<p>PO13</p> <p>The design of car parking areas:</p> <ol style="list-style-type: none"> does not impact on the safety of the external road network; ensures the safe movement of vehicles within the site. 	<p>E13</p> <p>All car parking areas are designed and constructed in accordance with Australian Standard AS 2890.1 Parking facilities Part 1: Off-street car parking.</p>
Bicycle parking and end of trip facilities	
<p>Note - Building work to which this code applies constitutes Major Development for purposes of development requirements for end of trip facilities prescribed in the Queensland Development Code MP 4.1.</p>	
<p>PO14</p> <ol style="list-style-type: none"> End of trip facilities are provided for employees or occupants, in the building or on-site within a reasonable walking distance, and include: 	<p>E14.1</p> <p>Minimum bicycle parking facilities are provided in accordance with the table below (rounded up to the nearest whole number).</p>

6 Zones

<p>i. adequate bicycle parking and storage facilities; and</p> <p>ii. adequate provision for securing belongings; and</p> <p>iii. change rooms that include adequate showers, sanitary compartments, wash basins and mirrors.</p> <p>b. Notwithstanding a. there is no requirement to provide end of trip facilities if it would be unreasonable to provide these facilities having regard to:</p> <p>i. the projected population growth and forward planning for road upgrading and development of cycle paths; or</p> <p>ii. whether it would be practical to commute to and from the building on a bicycle, having regard to the likely commute distances and nature of the terrain; or</p> <p>iii. the condition of the road and the nature and amount of traffic potentially affecting the safety of commuters.</p> <p>Editor's note - The intent of b above is to ensure the requirements for bicycle parking and end of trip facilities are not applied in unreasonable circumstances. For example these requirements should not, and do not apply in the Rural zone or the Rural residential zone etc.</p> <p>Editor's note - This performance outcome is the same as the Performance Requirement prescribed for end of trip facilities under the Queensland Development Code. For development incorporating building work, that Queensland Development Code performance requirement cannot be altered by a local planning instrument and has been reproduced here solely for information purposes. Council's assessment in its building work concurrence agency role for end of trip facilities will be against the performance requirement in the Queensland Development Code. As it is subject to change at any time, applicants for development incorporating building work should ensure that proposals that do not comply with the examples under this heading meet the current performance requirement prescribed in the Queensland Development Code.</p>	<table border="1" data-bbox="815 203 1469 517"> <thead> <tr> <th data-bbox="815 203 1118 255">Use</th> <th data-bbox="1118 203 1469 255">Minimum Bicycle Parking</th> </tr> </thead> <tbody> <tr> <td data-bbox="815 255 1118 331">Residential uses comprised of dwellings</td> <td data-bbox="1118 255 1469 331">Minimum 1 space per dwelling</td> </tr> <tr> <td data-bbox="815 331 1118 439">All other residential uses</td> <td data-bbox="1118 331 1469 439">Minimum 1 space per 2 car parking spaces identified in Schedule 7 – car parking</td> </tr> <tr> <td data-bbox="815 439 1118 517">Non-residential uses</td> <td data-bbox="1118 439 1469 517">Minimum 1 space per 200m2 of GFA</td> </tr> </tbody> </table> <p data-bbox="815 555 1469 741">Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is a combination of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.</p> <p data-bbox="815 801 890 831">E14.2</p> <p data-bbox="815 864 1034 893">Bicycle parking is:</p> <ol data-bbox="815 920 1469 1261" style="list-style-type: none"> provided in accordance with <i>Austrroads (2008), Guide to Traffic Management - Part 11: Parking</i>; protected from the weather by its location or a dedicated roof structure; located within the building or in a dedicated, secure structure for residents and staff; adjacent to building entrances or in public areas for customers and visitors. <p data-bbox="815 1330 1469 1382">Note - Bicycle parking structures are to be constructed to the standards prescribed in AS2890.3.</p> <p data-bbox="815 1435 1469 1509">Note - Bicycle parking and end of trip facilities provided for residential and non-residential activities may be pooled, provided they are within 100 metres of the entrance to the building.</p> <p data-bbox="815 1563 1469 1742">Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is an amalgamation of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.</p> <p data-bbox="815 1809 890 1839">E14.3</p> <p data-bbox="815 1872 1310 1901">For non-residential uses, storage lockers:</p> <ol data-bbox="815 1928 1469 2085" style="list-style-type: none"> are provide at a rate of 1.6 per bicycle parking space (rounded up to the nearest whole number); have minimum dimensions of 900mm (height) x 300mm (width) x 450mm (depth). 	Use	Minimum Bicycle Parking	Residential uses comprised of dwellings	Minimum 1 space per dwelling	All other residential uses	Minimum 1 space per 2 car parking spaces identified in Schedule 7 – car parking	Non-residential uses	Minimum 1 space per 200m2 of GFA
Use	Minimum Bicycle Parking								
Residential uses comprised of dwellings	Minimum 1 space per dwelling								
All other residential uses	Minimum 1 space per 2 car parking spaces identified in Schedule 7 – car parking								
Non-residential uses	Minimum 1 space per 200m2 of GFA								

Note - Storage lockers may be pooled across multiple sites and activities when within 100 metres of the entrance to the building and within 50 metres of bicycle parking and storage facilities.

Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is an amalgamation of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.

E14.4

For non-residential uses, changing rooms:

- a. are provided at a rate of 1 per 10 bicycle parking spaces;
- b. are fitted with a lockable door or otherwise screened from public view;
- c. are provided with shower(s), sanitary compartment(s) and wash basin(s) in accordance with the table below:

Bicycle spaces provided	Male/Female	Change rooms required	Showers required	Sanitary compartments required	Washbasins required
1-5	Male and female	1 unisex change room	1	1 closet pan	1
6-19	Female	1	1	1 closet pan	1
20 or more	Male	1	1	1 closet pan	1
	Female	1	2, plus 1 for every 20 bicycle spaces provided thereafter	2 closet pans, plus 1 sanitary compartment for every 60 bicycle parking spaces provided thereafter	1, plus 1 for every 60 bicycle parking spaces provided thereafter
	Male	1	2, plus 1 for every 20 bicycle spaces provided thereafter	1 urinal and 1 closet pans, plus 1 sanitary compartment at the rate of 1 closet pan or 1 urinal for every 60 bicycle space provided thereafter	1, plus 1 for every 60 bicycle parking spaces provided thereafter

Note - All showers have a minimum 3-star Water Efficiency Labelling and Standards (WELS) rating shower head.

Note - All sanitary compartments are constructed in compliance with F2.3 (e) and F2.5 of BCA (Volume 1).

- d. are provided with:
 - i. a mirror located above each wash basin;
 - ii. a hook and bench seating within each shower compartment;
 - iii. a socket-outlet located adjacent to each wash basin.

6 Zones

	<p>Note - Change rooms may be pooled across multiple sites, residential and non-residential activities when within 100 metres of the entrance to the building and within 50 metres of bicycle parking and storage facilities</p> <p>Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is an amalgamation of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.</p>
Loading and servicing	
<p>PO15</p> <p>Loading and servicing areas:</p> <ol style="list-style-type: none"> a. are not visible from the street frontage; b. are integrated into the design of the building; c. include screening and buffers to reduce negative impacts on adjoining sensitive land uses; d. are consolidated and shared with adjoining sites, where possible. <p>Note - An access easement may be required to be registered to ensure shared access between properties is permitted.</p> <p>Note - Refer to Planning scheme policy - Centre and neighbourhood hub design.</p>	<p>No example provided.</p>
Waste	
<p>PO16</p> <p>Bins and bin storage area/s are designed, located and managed to prevent amenity impacts on the locality.</p>	<p>E16</p> <p>Bins and bin storage area/s are provided, designed and managed in accordance with Planning scheme policy - Waste.</p> <p>Development is designed to meet the criteria in the Planning scheme policy - Waste and is demonstrated in a waste management program.</p>
Landscaping	
<p>PO17</p> <p>On-site landscaping is provided, that:</p> <ol style="list-style-type: none"> a. is incorporated into the design of the development; b. reduces the dominance of car parking and servicing areas from the street frontage; 	<p>E17.1</p> <p>Where adjoining land is contained within the General Residential zone, a 3m deep landscaping strip is provided for the length of the boundary. Landscaping must have a mature height of at least 3m.</p> <p>Note - Refer to Planning scheme policy - Integrated design for species, details and examples.</p>

<p>c. incorporates shade trees in car parking areas;</p> <p>d. retains mature trees wherever possible;</p> <p>e. contributes to quality public spaces and the microclimate by providing shelter and shade;</p> <p>f. maintains the achievement of active frontages and sight lines for casual surveillance.</p> <p>Note - Landscaping is to be provided in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person, to ensure compliance with Planning scheme policy - Integrated design.</p>	<p>E17.2</p> <p>Trees are provided in car parking areas at a rate of 1 tree per 10 car parking spaces.</p> <p>Note - Refer to Planning scheme policy - Integrated design for species, details and examples.</p>
	<p>E17.3</p> <p>Development includes the provision of street trees.</p> <p>Note - Refer to Planning scheme policy - Integrated design for species, details and examples.</p>
Environmentally sensitive design	
<p>PO18</p> <p>Development incorporates energy efficient design principles, including:</p> <p>a. maximising internal cross-ventilation and prevailing breezes;</p> <p>b. maximising the effect of northern winter sun and screening undesirable northern summer sun and western sun;</p> <p>c. reducing demand on non-renewable energy sources for cooling and heating;</p> <p>d. maximising the use of daylight for lighting;</p> <p>e. retaining existing established trees on-site where possible.</p> <p>Note - Further guidance on environmentally sustainable design is available in <i>Subtropical Urban Design in South East Queensland - A Handbook for Planners, Developers and Decision Makers</i>, Centre for Subtropical Design, Brisbane, 2010.</p>	<p>No example provided.</p>
<p>PO19</p> <p>Best practice Water Sensitive Urban Design (WSUD) is incorporated within development sites to mitigate the impacts of stormwater run-off in accordance with Planning scheme policy - Integrated design.</p>	<p>No example provided.</p>
Crime prevention through environmental design	
<p>PO20</p>	<p>No example provided.</p>

6 Zones

<p>Development contributes to a safe public realm by incorporating crime prevention through environmental design principles including:</p> <ol style="list-style-type: none"> a. orienting buildings towards the street and public spaces and providing clear sightlines to public spaces to allow opportunities for casual surveillance; b. ensuring the site layout, building design and landscaping does not result in potential concealment or entrapment areas; c. ensuring high risk areas, including stairwells, arcades, walkways and concealed car parking areas have adequate surveillance to reduce risk or are able to be secured outside of business hours. <p>Note - Further information is available in <i>Crime Prevention through Environmental Design: Guidelines for Queensland, State of Queensland, 2007</i>.</p>	
Lighting	
<p>PO21</p> <p>Lighting is designed to provide adequate levels of illumination to public and communal spaces to maximise safety while minimising adverse impacts on sensitive land uses.</p>	<p>No example provided.</p>
Amenity	
<p>PO22</p> <p>The amenity of the area and adjacent sensitive land uses are protected from the impacts of dust, odour, chemicals and other environmental nuisances.</p>	<p>No example provided.</p>
Noise	
<p>PO23</p> <p>Noise generating uses do not adversely affect existing or potential noise sensitive uses.</p> <p>Note - The use of walls, barriers or fences that are visible from or adjoin a road or public area are not appropriate noise attenuation measures unless adjoining a motorway, arterial road or rail line.</p> <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p>	<p>No example provided.</p>
<p>PO24</p>	<p>E24.1</p> <p>Development is designed to meet the criteria outlined in the Planning Scheme Policy – Noise.</p>

<p>Sensitive land uses are provided with an appropriate acoustic environment within designated external private outdoor living spaces and internal areas while:</p> <ol style="list-style-type: none"> a. contributing to safe and usable public spaces, through maintaining high levels of surveillance of parks, streets and roads that serve active transport purposes (e.g. existing or future pedestrian paths or cycle lanes etc); b. maintaining the amenity of the streetscape. <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p> <p>Note - Refer to Planning Scheme Policy – Integrated design for details and examples of noise attenuation structures.</p>	<p>E24.2</p> <p>Noise attenuation structures (e.g. walls, barriers or fences):</p> <ol style="list-style-type: none"> a. are not visible from an adjoining road or public area unless: <ol style="list-style-type: none"> i. adjoining a motorway or rail line; or ii. adjoining part of an arterial road that does not serve an existing or future active transport purpose (e.g. pedestrian paths or cycle lanes) or where attenuation through building location and materials is not possible. b. do not remove existing or prevent future active transport routes or connections to the street network; c. are located, constructed and landscaped in accordance with Planning scheme policy - Integrated design. <p>Note - Refer to Planning scheme policy – Integrated design for details and examples of noise attenuation structures.</p> <p>Note - Refer to Overlay map – Active transport for future active transport routes.</p>
<p>Hazardous Chemicals</p> <p>Note - To assist in demonstrating compliance with the following performance outcomes, a Hazard Assessment Report may be required to be prepared and submitted by a suitably qualified person in accordance with 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.</p> <p>Note - Terms used in this section are defined in 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.</p>	
<p>PO25</p> <p>Off sites risks from foreseeable hazard scenarios involving hazardous chemicals are commensurate with the sensitivity of the surrounding land use zones.</p>	<p>E25.1</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of land zoned for vulnerable or sensitive land uses as described below:</p> <p>Dangerous Dose</p> <ol style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ol style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. b. For any hazard scenario involving fire or explosion:

6 Zones

	<ul style="list-style-type: none">i. 7kPa overpressure;ii. 4.7kW/m2 heat radiation. <p>If criteria E25.1 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 0.5×10^{-6}/year.</p> <p>E25.2</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of a commercial or community activity land use zone as described below:</p> <p>Dangerous Dose</p> <ul style="list-style-type: none">a. For any hazard scenario involving the release of gases or vapours:<ul style="list-style-type: none">i. AEGL2 (60minutes) or if not available ERPG2;ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure.b. For any hazard scenario involving fire or explosion:<ul style="list-style-type: none">i. 7kPa overpressure;ii. 4.7kW/m2 heat radiation. <p>If criteria E25.2 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 5×10^{-6}/year.</p> <p>E25.3</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of an industrial land use zone as described below:</p> <p>Dangerous Dose</p> <ul style="list-style-type: none">a. For any hazard scenario involving the release of gases or vapours:<ul style="list-style-type: none">i. AEGL2 (60minutes) or if not available ERPG2;ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure.b. For any hazard scenario involving fire or explosion:
--	---

	<ul style="list-style-type: none"> i. 14kPa overpressure; ii. 12.6kW/m² heat radiation. <p>If criteria E25.3 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 50×10^{-6}/year.</p>
<p>PO26</p> <p>Buildings and package stores containing fire-risk hazardous chemicals are designed to detect the early stages of a fire situation and notify a designated person.</p>	<p>E26</p> <p>Buildings and package stores containing fire-risk hazardous chemicals are provided with 24 hour monitored fire detection system for early detection of a fire event.</p>
<p>PO27</p> <p>Common storage areas containing packages of flammable and toxic hazardous chemicals are designed with spill containment system(s) that are adequate to contain releases, including fire fighting media.</p>	<p>E27</p> <p>Storage areas containing packages of flammable and toxic hazardous chemicals are designed with spill containment system(s) capable of containing a minimum of the total aggregate capacity of all packages plus the maximum operating capacity of any fire protection system for the storage area(s) over a minimum of 60 minutes.</p>
<p>PO28</p> <p>Storage and handling areas, including manufacturing areas, containing hazardous chemicals in quantities greater than 2,500L or kg within a Local Government "flood hazard area" are located and designed in a manner to minimise the likelihood of inundation of flood waters from creeks, rivers, lakes or estuaries.</p>	<p>E28.1</p> <p>The base of any tank with a WC >2,500L or kg is higher than any relevant flood height level identified in an area's flood hazard area. Alternatively:</p> <ul style="list-style-type: none"> a. bulk tanks are anchored so they cannot float if submerged or inundated by water; and b. tank openings not provided with a liquid tight seal, i.e. an atmospheric vent, are extended above the relevant flood height level. <p>E28.2</p> <p>The lowest point of any storage area for packages >2,500L or kg is higher than any relevant flood height level identified in an area's flood hazard area. Alternatively, package stores are provided with impervious bund walls or racking systems higher than the relevant flood height level.</p>
Clearing of habitat trees where not located within the Environmental areas overlay map	
<p>PO29</p> <ul style="list-style-type: none"> a. Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected. 	<p>No example provided.</p>

6 Zones

<p>b. Development does not result in the net loss of fauna habitat. Where development does result in the loss of a habitat tree, development will provide replacement fauna nesting boxes at the following rate of 1 nest box for every hollow removed. Where hollows have not yet formed in trees > 80cm in diameter at 1.3m height, 3 nest boxes are required for every habitat tree removed.</p> <p>c. Development does not result in soil erosion or land degradation or leave land exposed for an unreasonable period of time but is rehabilitated in a timely manner</p> <p>Note: Further guidance on habitat trees is provided in Planning scheme policy - Environmental areas</p>	
Works criteria	

Utilities	
<p>PO</p> <p>All services including water supply, sewage disposal, electricity, street lighting, telecommunications and gas (if available) are provided in accordance with Planning scheme policy - Integrated design (Appendix A).</p>	<p>E</p> <p>No example provided.</p>
<p>PO30</p> <p>Where the site adjoins or is opposite to a Park⁽⁵⁷⁾, foreshore or Humpybong Reserve all existing overhead power lines are to be undergrounded for the full frontage of the site.</p>	<p>No example provided.</p>
<p>PO31</p> <p>The development is connected to an existing reticulated electricity supply system approved by the relevant energy regulating authority.</p>	<p>E31</p> <p>Development is connected to underground electricity.</p>
<p>PO32</p> <p>The development has access to telecommunications and broadband services in accordance with current standards.</p>	<p>No example provided.</p>
<p>PO33</p> <p>Where available the development is to safely connect to reticulated gas.</p>	<p>No example provided.</p>
<p>PO34</p>	<p>E34.1</p>

<p>The development provides for the treatment and disposal of sewage and other waste water in a way that will not cause environmental harm or pose a risk to public health.</p>	<p>Where in a sewerage area, the development is connected to a reticulated sewerage network.</p> <p>E34.2</p> <p>Trade waste is pre-treated on-site prior to discharging into the sewerage network.</p>
<p>PO35</p> <p>The development is provided with an adequate and sustainable supply of potable (drinking and general use e.g. gardening, washing, fire fighting) water.</p>	<p>E35</p> <p>Where in an existing connections area or a future connections area as detailed in the Unitywater Connections Policy, the development is connected to the reticulated water supply system in accordance with the South East Queensland Water Supply and Sewerage Design and Construction Code and the relevant Water Service Association of Australia (WSAA) codes and standards.</p>
<p>PO36</p> <p>The development is provided with constructed and dedicated road access.</p>	<p>No example provided.</p>

Access	
<p>PO37</p> <p>Development provides functional and integrated car parking and vehicle access, that:</p> <ol style="list-style-type: none"> prioritises the movement and safety of pedestrians between car parking areas at the rear through to the 'main street' and the entrance to the building (e.g. rear entry, arcade etc.); provides safety and security of people and property at all times; does not impede active transport options; does not impact on the safe and efficient movement of traffic external to the site; where possible vehicle access points are consolidated and shared with adjoining sites. <p>Note - Refer to Planning scheme policy - Centre and neighbourhood hub design for details and examples.</p>	<p>No example provided.</p>
<p>PO38</p> <p>Where required, access easements contain a driveway and provision for services appropriate to the use. The easement covers all works associated with the access in accordance with Planning scheme policy - Integrated design.</p>	<p>No example provided.</p>
<p>PO39</p>	<p>E39.1</p>

6 Zones

<p>The layout of the development does not compromise:</p> <ol style="list-style-type: none"> the development of the road network in the area; the function or safety of the road network; the capacity of the road network. <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p>	<p>Direct vehicle access for residential development does not occur from arterial or sub-arterial roads or a motorway.</p> <p>Editor's note - Residential developments should consider amalgamation with the lot to the rear and gaining access via a laneway.</p> <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p> <p>E39.2</p> <p>The development provides for the extension of the road network in the area in accordance with Council's road network planning.</p> <p>E39.3</p> <p>The development does not compromise future road widening of frontage roads in accordance with the relevant standard and Council's road planning.</p> <p>E39.4</p> <p>The lot development layout allows forward vehicular access to and from the site.</p>
<p>PO40</p> <p>Safe access is provided for all vehicles required to access the site.</p>	<p>E40.1</p> <p>Site access and driveways are designed and, located and constructed in accordance with:</p> <ol style="list-style-type: none"> where for a Council-controlled road and associated with a Dwelling house: <ol style="list-style-type: none"> Planning scheme policy - Integrated design; Where for a Council-controlled road; and not associated with a Dwelling house: <ol style="list-style-type: none"> AS/NZS2890.1 section 3; or Parking facilities Part 1: Off street car parking; AS 2890.2 - Parking facilities Part 2: Off-street commercial vehicle facilities; Planning scheme policy - Integrated design; Schedule 8 - Service vehicle requirements; Where for a State-Controlled road, the Safe Intersection Sight Distance requirements in AustRroads and the appropriate IPWEAQ standard drawings, or a copy of a Transport Infrastructure Act 1994, section 62 approval.

	<p>E40.2</p> <p>Internal driveways, car parks and access ways are designed and constructed with a sealed pavement and in accordance with:</p> <ol style="list-style-type: none"> AS/NZS 2890.1 Parking Facilities Part 1: Off street car parking; AS 2890.2 Parking Facilities Part 2: Off street commercial vehicle facilities; and the relevant standards in Planning scheme policy - Integrated design; and Schedule 8 - Service vehicle requirements. <p>Note - This includes queue lengths (refer to Schedule 8 - Service vehicle requirements), pavement widths and construction.</p>
	<p>E40.3</p> <p>Access driveways, manoeuvring areas and loading facilities are sealed and provide for service vehicles listed in Schedule 8 - Service vehicle requirements for the relevant use. The on-site manoeuvring is to be in accordance with Schedule 8 - Service vehicle requirements.</p>
	<p>E</p> <p>Landscaping (including shade trees) is provided within car parks in accordance with Planning scheme policy - Integrated design.</p>
<p>PO</p> <p>Sealed and flood free road access during the minor storm event is available to the site from the nearest arterial or sub-arterial road.</p> <p>Editor's Note - Where associated with a State-controlled road, further requirements may apply, and approvals may be required from the Department of Transport and Main Roads.</p>	<p>E</p> <p>Roads or streets giving access to the development from the nearest arterial or sub-arterial road are flood free during the minor storm event and are sealed.</p> <p>Note - The road network is mapped on Overlay Map - Road Hierarchy.</p>
<p>PO</p> <p>Roads which provide access to the site from an arterial or sub-arterial road remain trafficable during major storm events without flooding or impacting upon residential properties or other premises.</p>	<p>E</p> <p>Access roads to the development have sufficient longitudinal and cross drainage to remain safely trafficable during major storm (1% AEP) events.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - Refer to QUDM for requirements regarding trafficability.</p>

6 Zones

	<p>E</p> <p>Culverts and causeways do not increase inundation levels or increase velocities, for all events up to the defined flood event, to upstream or downstream properties.</p>
<p>Street design and layout</p>	
<p>PO</p> <p>Streets are designed and constructed in accordance with Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures. The street design and construction accommodates the following functions:</p> <ol style="list-style-type: none"> a. access to premises by providing convenient vehicular movement for residents between their homes and the major road network; b. safe and convenient pedestrian and cycle movement; c. adequate on street parking; d. stormwater drainage paths and treatment facilities; e. efficient public transport routes; f. utility services location; g. emergency access and waste collection; h. setting and approach (streetscape, landscaping and street furniture) for adjoining residences; i. expected traffic speeds and volumes; and j. wildlife movement. <p>Note - Preliminary road design (including all services, street lighting, stormwater infrastructure, access locations, street trees and pedestrian network) may be required to demonstrate compliance with this PO.</p> <p>Note - Refer to Planning scheme policy - Environmental areas and corridors for examples of when and where wildlife movement infrastructure is required.</p>	<p>No example provided</p>
<p>PO41</p> <p>Upgrade works (whether trunk or non-trunk) are provided where necessary to:-</p> <ol style="list-style-type: none"> a. ensure the type or volume of traffic generated by the development does not have a negative impact on the external road network;- 	<p>E</p> <p>No example provided.</p> <p>New intersections onto existing roads are designed to accommodate traffic volumes and traffic movements taken from a date 10 years from the date of completion</p>

<p>b. ensure the orderly and efficient continuation of the active transport network;</p> <p>c. ensure the site frontage is constructed to a suitable urban standard generally in accordance with Planning scheme policy – Integrated design.</p> <p>Note – An Integrated Transport Assessment (ITA) may be required to demonstrate compliance with this performance outcome refer to Planning scheme policy – Integrated transport assessment for guidance on when an ITA is required. An ITA should be prepared in accordance with Planning scheme policy – Integrated transport assessment.</p> <p>Note – The road network is mapped on Overlay map – Road hierarchy.</p> <p>Note – The primary and secondary active transport network is mapped on Overlay map – Active transport</p> <p>Note – To demonstrate compliance with c. of this performance outcome, site frontage works where in existing road reserve (non-trunk) are to be designed and constructed as follows:</p> <ol style="list-style-type: none"> Where the street is partially established to an urban standard, match the alignment of existing kerb and channel and provide carriageway widening and underground drainage where required; or Where the street is not established to an urban standard, prepare a design that demonstrates how the relevant features of the particular road as shown in the Planning scheme policy – Integrated Design can be achieved in the existing reserve. <p>Note – Refer to Planning scheme policy – Integrated design for road network and active transport network design standards.</p> <p>The existing road network (whether trunk or non-trunk) is upgraded where necessary to cater for the impact from the development.</p> <p>Note - An applicant will be required to submit an Integrated Transport Assessment (ITA), prepared in accordance with Planning scheme policy - Integrated transport assessment to demonstrate compliance with this PO, when any of the following occurs;</p> <ul style="list-style-type: none"> development is within 200m of a transport sensitive location such as a school, shopping centre, bus or train station or a large generator of pedestrian or vehicular traffic; forecast traffic to/from the development exceeds 5% of the two way flow on the adjoining road or intersection in the morning or afternoon transport peak within 10 years of the development completion; Development access onto a sub arterial, or arterial road or within 100m of a signalised intersection; Residential development greater than 50 lots or dwellings; Offices greater than 4,000m² Gross Floor Area (GFA); Retail activities including Hardware and trade supplies; Showroom, Shop or Shopping centre greater than 1,000m² GFA; 	<p>of the last stage of the development. Detailed design is to be in accordance with Planning scheme policy - Integrated design.</p> <p>Note - All turns vehicular access to existing lots is to be retained at new road intersections wherever practicable.</p> <p>Note - Existing on-street parking is to be retained at new road intersections and along road frontages wherever practicable.</p> <p>E</p> <p>Existing intersections external to the site are upgraded as necessary to accommodate increased traffic from the development. Design is in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p> <p>Note - All turns vehicular access to existing lots is to be retained at new road intersections wherever practicable.</p> <p>Note - Existing on-street parking is to be retained at upgraded road intersections and along road frontages wherever practicable.</p> <p>E</p> <p>The active transport network is extended in accordance with Planning scheme policy - Integrated design.</p>

Stormwater	
<p>PO</p> <p>Minor stormwater drainage systems (internal and external) have the capacity to convey stormwater flows from frequent storm events for the fully developed upstream catchment whilst ensuring pedestrian and vehicular traffic movements are safe and convenient.</p>	<p>E</p> <p>The capacity of all minor drainage systems are designed in accordance with Planning scheme policy - Integrated design.</p> <p>E</p> <p>Stormwater pipe network capacity is to be calculated in accordance with the Hydraulic Grade Line method as detailed in Australian Rainfall and Runoff or QUDM.</p> <p>E</p> <p>Development ensures that roof and allotment drainage infrastructure is provided in accordance with the relevant level as identified in QUDM.</p>
<p>PO</p>	<p>E</p> <p>The internal drainage system safely and adequately conveys the stormwater flows for the 1% AEP event for the fully developed upstream catchment through the site.</p>

<p>Major stormwater drainage system(s) have the capacity to safely convey stormwater flows for the 1% AEP event for the fully developed upstream catchment.</p>	<p>E</p> <p>The external (downstream) drainage system safely conveys the stormwater flows for the 1% AEP event for the fully developed upstream catchment without allowing the flows to encroach upon private lots.</p> <p>E</p> <p>Overland flow paths from roads and public open space areas do not pass through private lots. Drainage pathways are provided to accommodate overland flows from roads and public open space areas.</p> <p>E</p> <p>The flow velocity in all unlined or soft faced open drains is kept within acceptable limits for the type of material or lining and condition of the channel.</p> <p>Note - Refer to QUDM for recommended average flow velocities.</p>
<p>PO</p> <p>Provide measures to properly manage surface flows for the 1% AEP event (for the fully developed catchment) draining to and through the land to ensure no actionable nuisance is created to any person or premises as a result of the development. The development must not result in ponding on adjacent land, redirection of surface flows to other premises or blockage of a surface flow relief path for flows exceeding the design flows for any underground system within the development.</p>	<p>E</p> <p>The stormwater drainage system is designed and constructed in accordance with Planning scheme policy - Integrated design.</p>
<p>PO42</p> <p>Stormwater run-off from the site is conveyed to a point of lawful discharge without causing actionable nuisance or annoyance to any person, property or premises.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details.</p> <p>Note - A downstream drainage discharge report in accordance with Planning scheme policy - Stormwater management may be required to demonstrate achievement of this performance outcome.</p> <p>Note - A watercourse as defined in the Water Act may be accepted as a lawful point of discharge providing the drainage discharge from the site does not increase the downstream flood levels during events up to and including the 1% AEP storm. An afflux of +20mm may be accepted on Council controlled land and road infrastructure. No worsening is ensured when stormwater is discharged into a catchment that includes State Transport Infrastructure.</p>	<p>No example provided.</p>

6 Zones

<p>PO43</p> <p>Stormwater generated from the development does not compromise the capacity of existing stormwater infrastructure downstream of the site.</p> <p>Note - A downstream drainage discharge report in accordance with Planning scheme policy - Stormwater management may be required to demonstrate achievement of this performance outcome.</p>	<p>No example provided.</p>				
<p>PO44</p> <p>Stormwater quality management systems are designed and constructed to minimise the environmental impact of stormwater discharge on surface and underground receiving water quality and meet the design objectives in Tables A and B in Appendix 2 of the SPP.</p> <p>Note - A stormwater management plan prepared by a suitably qualified professional will be required in accordance with Planning scheme policy - Stormwater management.</p> <p>Where development:</p> <ul style="list-style-type: none"> a. is for an urban purpose that involves a land area 2500m² or greater in size; and b. results in 6 or more dwellings; or c. results in an impervious area greater than 25% of the net developable area, <p>stormwater quality management systems are designed, constructed, established and maintained to minimise the environmental impact of stormwater on surface, groundwater and receiving water environments and meet the design objectives outlined in Schedule 10 - Stormwater management design objectives.</p> <p>Note - A site based stormwater management plan prepared by a suitably qualified professional will be required in accordance with Planning Scheme Policy - Stormwater Management. Stormwater quality infrastructure is to be design in accordance with Planning scheme policy - Integrated Design (Appendix C).</p>	<p>No example provided.</p>				
<p>PO45</p> <p>Easements for drainage purposes are provided over:</p> <ul style="list-style-type: none"> a. stormwater pipes located in freehold land if the pipe diameter exceeds 300mm; b. overland flow paths where they cross more than one property boundary. <p>Note - Refer to Planning scheme policy - Integrated design for details.</p>	<p>E</p> <p>No example provided.</p> <p>Stormwater drainage infrastructure (excluding detention and bio-retention systems) through or within private land (including inter-allotment drainage) is protected by easements in favour of Council. Minimum easement widths are as follows:</p> <table border="1" data-bbox="810 1975 1468 2094"> <tr> <td>Pipe Diameter</td> <td>Minimum easement width (excluding access requirements)</td> </tr> <tr> <td> </td> <td> </td> </tr> </table>	Pipe Diameter	Minimum easement width (excluding access requirements)		
Pipe Diameter	Minimum easement width (excluding access requirements)				

<p>Note – Stormwater Drainage easement dimensions are provided in accordance with Section 3.8.5 of QUDM:</p> <p>Stormwater drainage pipes and structures through or within private land (including inter-allotment drainage) are protected by easements in favour of Council with sufficient area for practical access for maintenance purposes.</p> <p>Note - In order to achieve a lawful point of discharge, stormwater easements may also be required over temporary drainage channels/infrastructure where stormwater discharges to a balance lot prior to entering Council's stormwater drainage system.</p>	<table border="1"> <tr> <td data-bbox="809 203 1137 293">Stormwater pipe up to 825mm diameter</td> <td data-bbox="1142 203 1469 293">3.0m</td> </tr> <tr> <td data-bbox="809 300 1137 450">Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter</td> <td data-bbox="1142 300 1469 450">4.0m</td> </tr> <tr> <td data-bbox="809 456 1137 607">Stormwater pipe greater than 825mm diameter</td> <td data-bbox="1142 456 1469 607">Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).</td> </tr> </table> <p>Note - Additional easement width may be required in certain circumstances in order to facilitate maintenance access to the stormwater system.</p> <p>Note - Refer to Planning Scheme Policy - Integrated Design (Appendix C) for easement requirements over open channels.</p>	Stormwater pipe up to 825mm diameter	3.0m	Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter	4.0m	Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).
Stormwater pipe up to 825mm diameter	3.0m						
Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter	4.0m						
Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).						
<p>PO</p> <p>Stormwater management facilities (excluding outlets) are located outside of riparian areas and prevent increased channel bed and bank erosion.</p>	<p>No example provided.</p>						
<p>PO</p> <p>Council is provided with accurate representations of the completed stormwater management works within residential developments.</p>	<p>E</p> <p>"As Built" drawings and specifications of the stormwater management devices certified by an RPEQ is provided.</p> <p>Note - Documentation is to include:</p> <ol style="list-style-type: none"> photographic evidence and inspection date of the installation of approved underdrainage; copy of the bioretention filter media delivery dockets/quality certificates confirming the materials comply with specifications in the approved Stormwater Management Plan; date of the final inspection. 						
<p>Site works and construction management</p>							
<p>PO46</p> <p>The site and any existing structures are maintained in a tidy and safe condition.</p>	<p>No example provided.</p>						
<p>PO47</p> <p>All works on-site are managed to:</p>	<p>E47.1</p> <p>Works incorporate temporary stormwater runoff, erosion and sediment controls and trash traps removal devices designed in accordance with the Urban Stormwater</p>						

6 Zones

<ul style="list-style-type: none"> a. minimise as far as practicable, impacts on adjoining or adjacent premises and the streetscape in regard to erosion and sedimentation, dust, noise, safety and light; b. minimise as far as possible, impacts on the natural environment; c. ensure stormwater discharge is managed in a manner that does not cause actionable nuisance or annoyance to any person or premises; d. avoid adverse impacts on street trees and their critical root zone. 	<p>Quality Planning Guidelines, State Planning Policy, Schedule 10 - Stormwater management design objectives, Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design, including but not limited to the following:</p> <ul style="list-style-type: none"> a. stormwater is not discharged to adjacent properties in a manner that differs significantly from pre-existing conditions; b. stormwater discharged to adjoining and downstream properties does not cause scour and or erosion of any kind; c. stormwater discharge rates do not exceed pre-existing conditions; d. the 10% AEP storm event is the minimum design storm for all temporary diversion drains; and e. the 50% AEP storm event is the minimum design storm for all silt barriers and sedimentation basins. f. minimum design storm for all temporary diversion drains and sedimentation basins in accordance with Schedule 10 - Stormwater management design objectives; g. ponding or concentration of stormwater does not occur in adjoining properties.
	<p>E47.2</p> <p>Stormwater runoff, erosion and sediment controls are constructed in accordance with Planning scheme policy - Integrated design (Appendix C) prior to commencement of any clearing or earthworks and are maintained and adjusted as necessary at all times to ensure their ongoing effectiveness.</p> <p>Note - The measures are adjusted on-site to maximise their effectiveness.</p>
	<p>E47.3</p> <p>The completed earthworks area is stabilised using turf, established grass seeding, mulch or sprayed stabilisation techniques to control erosion and sediment and dust from leaving the property.</p>
	<p>E47.4</p> <p>Where works are proposed in proximity to an existing street tree, an inspection and a root management plan is undertaken by a qualified arborist which demonstrates and ensures that no permanent damage is caused to the tree.</p>

	<p>Existing street trees are protected and not damaged during works.</p> <p>Note - Where development occurs in the tree protection zone, measures and techniques as detailed in Australian Standard AS 4970 Protection of trees on development sites are adopted and implemented.</p>
<p>PO48</p> <p>Dust suppression measures are implemented during soil disturbances and construction works to protect nearby premises from unreasonable dust impacts.</p>	<p>E48</p> <p>No dust emissions extend beyond the boundaries of the site during soil disturbances and construction works.</p>
<p>PO49</p> <p>All development works on-site and including the transportation of material to and from the site are managed to not negatively impact the existing road network, the amenity of the surrounding area or the streetscape.</p> <p>Note - Where the amount of imported or exported material is greater than 50m³, a haulage route must be identified and approved by Council.</p> <p>Note - A Traffic Management Plan may be required to demonstrate compliance with this PO. A Traffic Management Plan is to be prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD).</p> <p>Note - A haulage route must be identified and approved by Council where imported or exported material is transported to the site via a road of Local Collector standard or less, and:</p> <ol style="list-style-type: none"> the aggregate volume of imported or exported material is greater than 1000m³; or the aggregate volume of imported or exported material is greater than 200m³ per day; or the proposed haulage route involves a vulnerable land use or shopping centre. <p>Note - A dilapidation report (including photographs) may be required for the haulage route to demonstrate compliance with this PO.</p> <p>Editor's note - Where associated with a State-controlled road, further requirements may apply, and approval may be required from the Department of Transport and Main Roads.</p>	<p>E49.1</p> <p>Construction traffic including contractor car parking is controlled in accordance with a traffic management plan, prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) to ensure all traffic movements to and from the site are safe.</p> <p>E49.2</p> <p>All contractor car parking is either provided on the development site, or on an alternative site in the general locality which has been set aside for car parking. Contractors vehicles are generally not to be parked in existing roads.</p> <p>Note - A Traffic Management Plan may be required for the site in accordance with the Manual of Uniform Traffic Control Devices (MUTCD).</p> <p>E49.3</p> <p>Any material dropped, deposited or spilled on the road(s) as a result of construction processes associated with the site are to be cleaned at all times.</p> <p>E</p> <p>Construction traffic to and from the development site uses the highest classification streets or roads where a choice of access routes is available. Haul routes for the transport of imported or spoil material and gravel pavement material along Council roads below sub-arterial standard must be approved routes.</p> <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p> <p>Note - A dilapidation report may be required to demonstrate compliance with this E.</p>

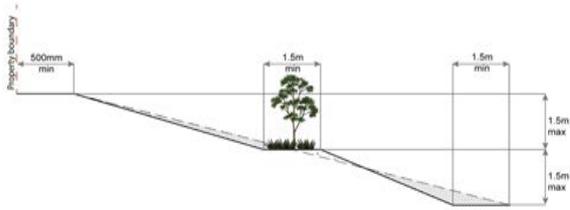

6 Zones

	<p>E</p> <p>Where works are carried out in existing roads, the works must be undertaken so that the existing roads are maintained in a safe and useable condition. Practical access for residents, visitors and services (including postal deliveries and refuse collection) is retained to existing lots during the construction period and after completion of the works.</p> <p>Note - A traffic control plan prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) will be required for any works that will affect access, traffic movements or traffic safety in existing roads.</p>
<p>PO50</p> <p>All disturbed areas are to be progressively stabilised during construction and the entire site rehabilitated and substantially stabilised at the completion of construction.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details.</p>	<p>E50.1</p> <p>At completion of construction all disturbed areas of the site are to be:</p> <ol style="list-style-type: none"> topsoiled with a minimum compacted thickness of fifty (50) millimetres; grassed stabilised using turf, established grass seeding, mulch or sprayed stabilisation techniques. <p>Note - These areas are to be maintained during any maintenance period to maximise grass coverage from grass seeding of these areas:</p>
<p>PO</p> <p>Earthworks are undertaken to ensure that soil disturbances are staged into manageable areas.</p> <p>Note - A site specific Erosion and Sediment Control Plan (ESCP) will be required to demonstrate compliance with this PO. An ECP is to be prepared in accordance with Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design (Appendix C).</p>	<p>E</p> <p>Soil disturbances are staged into manageable areas of not greater than 3.5 ha.</p>
<p>PO51</p> <p>The clearing of vegetation on-site:</p> <ol style="list-style-type: none"> is limited to the area of infrastructure works, building areas and other necessary areas for the works; and 	<p>E51.1</p> <p>All native vegetation to be retained on-site is temporarily fenced or protected prior to and during development works.</p> <p>Note - No parking of vehicles or storage of machinery or goods is to occur in these areas during development works.</p>

<p>b. includes the removal of declared weeds and other materials which are detrimental to the intended use of the land;</p> <p>c. is disposed of in a manner which minimises nuisance and annoyance to existing premises.</p> <p>Note - No burning of cleared vegetation is permitted.</p>	<p>E51.2</p> <p>Disposal of materials is managed in one or more of the following ways:</p> <p>a. all cleared vegetation, declared weeds, stumps, rubbish, car bodies, scrap metal and the like are removed and disposed of in a Council land fill facility; or</p> <p>b. all native vegetation with a diameter below 400mm is to be chipped and stored on-site.</p> <p>Note - The chipped vegetation must be stored in an approved location, preferably a park or public land.</p>
<p>PO</p> <p>All development works are carried out at times which minimise noise impacts to residents.</p>	<p>E</p> <p>All development works are carried out within the following times:</p> <p>a. Monday to Saturday (other than public holidays) between 6:30am and 6:30pm on the same day;</p> <p>b. no work is to be carried out on Sundays or public holidays.</p> <p>Note - Work outside the above hours may be approved (in writing) where it can be demonstrated that the work will not cause significant inconvenience or disruption to the public, or the work is unlikely to cause annoyance or inconvenience to occupants of adjacent properties.</p>
<p>PO52</p> <p>Any alteration or relocation in connection with or arising from the development to any service, installation, plant, equipment or other item belonging to or under the control of the telecommunications authority, electricity authorities, the Council or other person engaged in the provision of public utility services is to be carried with the development and at no cost to Council.</p>	<p>No example provided.</p>

Earthworks	
<p>PO53</p> <p>On-site earthworks are designed to consider the visual and amenity impact as they relate to:</p> <p>a. the natural topographical features of the site;</p> <p>b. short and long-term slope stability;</p> <p>c. soft or compressible foundation soils;</p>	<p>E53.1</p> <p>All cut and fill batters are provided with appropriate scour, erosion protection and run-off control measures including catch drains at the top of batters and lined batter drains as necessary.</p> <hr/> <p>E53.2</p>

<p>PO55</p> <p>Filling or excavation is undertaken in a manner that:</p>	<p>E55.1</p> <p>No filling or excavation is undertaken in an easement issued in favour of Council or a public sector entity.</p>

<p>a. does not adversely impact on a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land;</p> <p>b. does not preclude reasonable access to a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p>	<p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p> <p>E55.2</p> <p>Filling or excavation that would result in any of the following is not carried out on-site:</p> <p>a. a reduction in cover over any Council or public sector entity infrastructure service to less than 600mm;</p> <p>b. an increase in finished surface grade over, or within 1.5m on each side of, the Council or public sector entity infrastructure above that which existed prior to the earthworks being undertaken;</p> <p>c. prevent reasonable access to Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the site for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity as is defined in the Sustainable Planning Schedule 2 of the Act 2009.</p>
<p>PO56</p> <p>Filling or excavation does not result in land instability.</p> <p>Note - Steep rock slopes and batters are inspected and certified for long-term stability by a suitably qualified and experienced geotechnical engineer with RPEQ qualifications. Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance.</p>	<p>No example provided.</p>
<p>PO57</p> <p>Development Filling or excavation does not result in:</p> <p>a. adverse impacts on the hydrological and hydraulic capacity of the waterway or floodway;</p> <p>b. increased flood inundation outside the site;</p> <p>c. any reduction in the flood storage capacity in the floodway;</p> <p>d. and any clearing of native vegetation.</p> <p>Note - To demonstrate compliance with this outcome, Planning Scheme Policy - Stormwater Management provides guidance on the preparation of a site based stormwater management plan by a suitably qualified professional. Refer to Planning scheme policy - Integrated design for guidance on infrastructure design and modelling requirements.</p>	<p>No example provided.</p>
<p>PO</p>	<p>E</p> <p>Filling and excavation undertaken on the development site are shaped in a manner which does not:</p>

6 Zones

<p>Filling or excavation on the development site is undertaken in a manner which does not create or accentuate problems associated with stormwater flows and drainage systems on land adjoining the site.</p>	<ol style="list-style-type: none"> a. prevent stormwater surface flow which, prior to commencement of the earthworks, passed onto the development site, from entering the land; or b. redirect stormwater surface flow away from existing flow paths; or c. divert stormwater surface flow onto adjacent land, (other than a road), in a manner which: <ol style="list-style-type: none"> i. concentrates the flow; or ii. increases the flow rates of stormwater over the affected section of the adjacent land above the situation which existed prior to the diversion; or iii. causes actionable nuisance to any person, property or premises.
---	---

Retaining walls and structures

<p>PO58</p> <p>All earth retaining structures provide a positive interface with the streetscape and minimise impacts on the amenity of adjoining residents.</p> <p>Note - Refer to Planning scheme policy - Residential design for guidance on how to achieve compliance with this performance outcome.</p>	<p>PO58</p> <p>Earth-retaining structures:-</p> <ol style="list-style-type: none"> a. are not constructed of boulder rocks or timber; b. where height is no greater than 900mm, are provided in accordance with Figure - Retaining on a boundary; <p style="text-align: center;">Figure - Retaining on boundary</p>  <ol style="list-style-type: none"> c. where height is greater than 900mm but no greater than 1.5m, are to be setback at least the equivalent height of the retaining structure from any property boundary; d. where height is greater than 1.5m, are to be setback and stepped 1.5m vertical: 1.5m horizontal; terraced, landscaped and drained as shown below. <p style="text-align: center;">Figure - Gut</p>
--	--

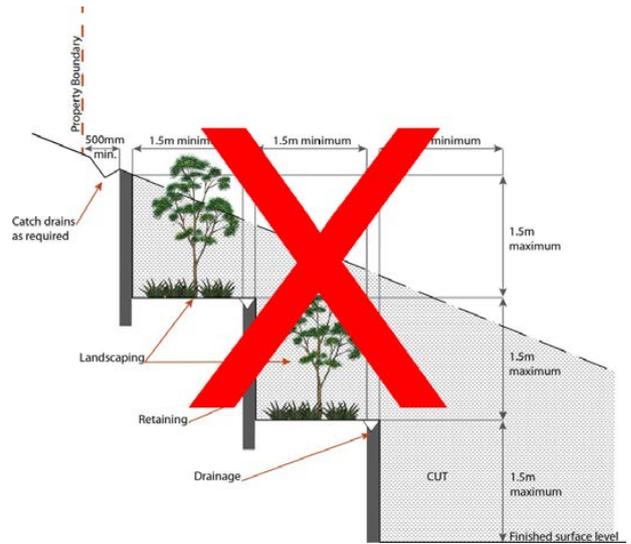

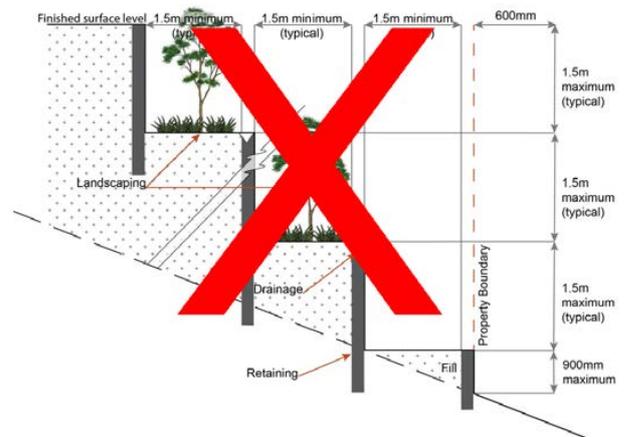

Figure--Fill

Filling or excavation does not:

- a. **involve a change in level of more than 1.0m relative to natural ground level;**

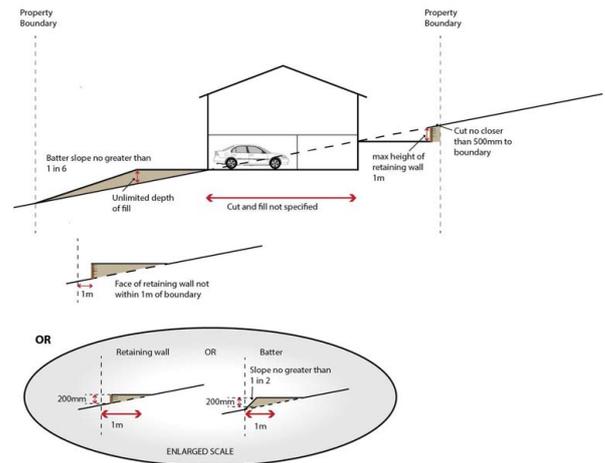

OR

- result in a batter greater than 1V to 6H;**
- b. **necessitate the construction of a freestanding retaining wall exceeding 1.0m in height relative to finished ground level;**

- c. result in the top of any cut batter, or the exposed face of any freestanding retaining wall supporting that cut, being closer than 500mm to a property boundary;
- d. result in the toe of any fill batter, or exposed face of any freestanding retaining wall supporting that fill, being closer than 1.0m to a property boundary unless:
 - i. the depth of fill within the 1.0m strip does not exceed 200mm relative to natural ground level; or
 - ii. the batter slope within that 1.0m strip is no steeper than 1V to 2H.

THE NEW FIGURE BELOW IS PROPOSED AS PART OF THIS AMENDMENT

Figure - Filling or Excavation

PO

All earth retaining structures are to be certified as being designed and constructed in accordance with relevant Australian Standards and Building Code requirements.

E

Retaining walls are designed and certified by a RPEQ so that:

- a. the minimum design life (the period assumed in design for which a structure or structural element is required to perform its intended purpose without replacement or major structural repairs) for the earth retaining structure is that specified in Australian Standard AS 4678 Earth-retaining structures;
- b. earth retaining structures within the land and around areas of cut on or near the boundaries of the site must be designed to allow for live and dead loads associated with the land/premise's current occupancy and use;

	<p>c. where the adjoining land use rights or zoning allows for industrial uses a minimum live load of 25kPA must be allowed in the design of the retaining structure for these adjoining premises.</p> <p>Note - Retaining walls will only be approved following submission of a full detailed design certified by a RPEQ.</p>
--	--

Fire Services

Note - The provisions under this heading only apply if:

- a. the development is for, or incorporates:
- reconfiguring a lot for a community title scheme creating 1 or more vacant lots; or
 - material change of use for 2 or more sole occupancy units on the same lot, or within the same community titles scheme; or
 - material change of use for a Tourist park⁽⁸⁴⁾ with accommodation in the form of caravans or tents; or
 - material change of use for outdoor sales⁽⁵⁴⁾, outdoor processing or outdoor storage where involving combustible materials.

AND

- b. none of the following exceptions apply:
- the distributor-retailer for the area has indicated, in its netserv plan, that the premises will not be served by that entity's reticulated water supply; or
 - every part of the development site is within 60m walking distance of an existing fire hydrant on the distributor-retailer's reticulated water supply network, measured around all obstructions, either on or adjacent to the site.

Note - The provisions under this heading do not apply to buildings that are required by the Building Code of Australia to have a fire hydrant system complying with Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations or other fire fighting facilities which provide equivalent protection.

PO59

Development incorporates a fire fighting system that:

- satisfies the reasonable needs of the fire fighting entity for the area;
- is appropriate for the size, shape and topography of the development and its surrounds;
- is compatible with the operational equipment available to the fire fighting entity for the area;
- considers the fire hazard inherent in the materials comprising the development and their proximity to one another;
- considers the fire hazard inherent in the surrounds to the development site;
- is maintained in effective operating order.

Note - The Queensland Fire and Emergency Services is the entity currently providing the fire fighting function for the urban areas of the Moreton Bay Region.

E59.1

External fire hydrant facilities are provided on site to the standard prescribed under the relevant parts of *Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations*.

Note - For this requirement for accepted development, the following are the relevant parts of AS 2419.1 (2005) that may be applicable:

- in regard to the form of any fire hydrant - Part 8.5 and Part 3.2.2.1, with the exception that for Tourist parks⁽⁸⁴⁾ or development comprised solely of dwellings and their associated outbuildings, single outlet above-ground hydrants or suitably signposted in-ground hydrants would be an acceptable alternative;
- in regard to the general locational requirements for fire hydrants - Part 3.2.2.2 (a), (e), (f), (g) and (h) as well as Appendix B of AS 2419.1 (2005);
- in regard to the proximity of hydrants to buildings and other facilities - Part 3.2.2.2 (b), (c) and (d), with the exception that:
 - for dwellings and their associated outbuildings, hydrant coverage need only extend to the roof and external walls of those buildings;
 - for caravans and tents, hydrant coverage need only extend to the roof of those tents and caravans;
 - for outdoor sales⁽⁵⁴⁾, processing or storage facilities, hydrant coverage is required across the entire area of

6 Zones

	<p>the outdoor sales⁽⁵⁴⁾, outdoor processing and outdoor storage facilities;</p> <p>d. in regard to fire hydrant accessibility and clearance requirements - Part 3.5 and, where applicable, Part 3.6.</p> <hr/> <p>E59.2</p> <p>A continuous path of travel having the following characteristics is provided between the vehicle access point to the site and each external fire hydrant and hydrant booster point on the land:</p> <ol style="list-style-type: none"> a. an unobstructed width of no less than 3.5m; b. an unobstructed height of no less than 4.8m; c. constructed to be readily traversed by a 17 tonne HRV fire brigade pumping appliance; d. an area for a fire brigade pumping appliance to stand within 20m of each fire hydrant and 8m of each hydrant booster point. <hr/> <p>E59.3</p> <p>On-site fire hydrant facilities are maintained in effective operating order in a manner prescribed in <i>Australian Standard AS1851 (2012) – Routine service of fire protection systems and equipment</i>.</p>
<p>PO60</p> <p>On-site fire hydrants that are external to buildings, as well as the available fire fighting appliance access routes to those hydrants, can be readily identified at all times from, or at, the vehicular entry point to the development site.</p>	<p>E60</p> <p>For development that contains on-site fire hydrants external to buildings:</p> <ol style="list-style-type: none"> a. those external hydrants can be seen from the vehicular entry point to the site; or b. a sign identifying the following is provided at the vehicular entry point to the site: <ol style="list-style-type: none"> i. the overall layout of the development (to scale); ii. internal road names (where used); iii. all communal facilities (where provided); iv. the reception area and on-site manager’s office (where provided); v. external hydrants and hydrant booster points; vi. physical constraints within the internal roadway system which would restrict access by fire fighting appliances to external hydrants and hydrant booster points. <p>Note - The sign prescribed above, and the graphics used are to be:</p>

	<p>a. in a form;</p> <p>b. of a size;</p> <p>c. illuminated to a level;</p> <p>which allows the information on the sign to be readily understood, at all times, by a person in a fire fighting appliance up to 4.5m from the sign.</p>
<p>PO61</p> <p>Each on-site fire hydrant that is external to a building is signposted in a way that enables it to be readily identified at all times by the occupants of any firefighting appliance traversing the development site.</p>	<p>E61</p> <p>For development that contains on-site fire hydrants external to buildings, those hydrants are identified by way of marker posts and raised reflective pavement markers in the manner prescribed in the technical note <i>Fire hydrant indication system</i> produced by the Queensland Department of Transport and Main Roads.</p> <p>Note - Technical note Fire hydrant indication system is available on the website of the Queensland Department of Transport and Main Roads.</p>
Use specific criteria	
Home based business⁽³⁵⁾	
<p>PO62</p> <p>The scale and intensity of the Home based business⁽³⁵⁾:</p> <p>a. is compatible with the physical characteristics of the site and the character of the local area;</p> <p>b. is able to accommodate anticipated car parking demand without negatively impacting the streetscape or road safety;</p> <p>c. does not adversely impact on the amenity of the adjoining and nearby premises;</p> <p>d. remains ancillary to the residential use of the Dwelling house⁽²²⁾;</p> <p>e. does not create conditions which cause hazards or nuisances to neighbours or other persons not associated with the activity;</p> <p>f. ensure employees and visitors to the site do not negatively impact the expected amenity of adjoining properties.</p>	<p>E62.1</p> <p>A maximum of 1 employee (not a resident) OR 2 customers OR customers from within 1 Small rigid vehicle (SRV) or smaller are permitted on the site at any one time.</p> <hr/> <p>E62.2</p> <p>The Home based business⁽³⁵⁾ occupies an area of the existing dwelling or on-site structure not greater than 40m² gross floor area.</p>
Major electricity infrastructure⁽⁴³⁾, Substation⁽⁸⁰⁾ and Utility installation⁽⁸⁶⁾	
PO63	E63.1

<ul style="list-style-type: none"> a. establish on heavily trafficked roads where the amenity of surrounding residential uses is already subject to impacts by road vehicle noise; b. establish outside of Key Sites; c. not negatively impact active streets, public spaces or hubs of activity where the pedestrian safety and comfort is of high importance; d. not result in the fragmentation of active streets (e.g. site where active uses are located on adjoining lots); e. ensure the amenity of adjoining properties is protected; f. reduce the visual impact of the Service station from the streetscape while maintaining surveillance from the site to the street; g. minimise impacts on adjoining residential uses, to a level suitable relative to expected residential amenity of the area. (e.g. high order road in urban or next generation neighbourhood, likely to be noisy and not like suburban); h. provide ancillary uses that meet the convenience needs of users. 	<ul style="list-style-type: none"> b. on the corner lot of an arterial or sub-arterial road; c. outside areas nominated as Key Sites. <p>E</p> <p>Service stations are designed and orientated on site to:</p> <ul style="list-style-type: none"> a. include a landscaping strip having a minimum depth of 1m adjoining all road frontages; b. buildings and structures (including fuel pump canopies) are setback a minimum of 3m from the primary and secondary frontage and a minimum of 5m from side and rear boundaries; c. include a screen fence, of a height and standard in accordance with a noise impact assessment (Note - Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise), on side and rear boundaries where adjoining land is able to contain a residential use; d. not include more than 2 driveway crossovers.
<p>Telecommunications facility⁽⁸¹⁾</p> <p>Editor's note - In accordance with the Federal legislation Telecommunications facilities⁽⁸¹⁾ must be constructed and operated in a manner that will not cause human exposure to electromagnetic radiation beyond the limits outlined in the Radiocommunications (Electromagnetic Radiation - Human Exposure) Standard 2003 and Radio Protection Standard for Maximum Exposure Levels to Radiofrequency Fields - 3Khz to 300Ghz.</p>	
<p>PO68</p> <p>Telecommunications facilities⁽⁸¹⁾ are co-located with existing telecommunications facilities⁽⁸¹⁾, Utility installation⁽⁸⁶⁾, Major electricity infrastructure⁽⁴³⁾ or Substation⁽⁸⁰⁾ if there is already a facility in the same coverage area.</p>	<p>E68.1</p> <p>New telecommunication facilities⁽⁸¹⁾ are co-located on existing towers with new equipment shelter and associated structures positioned adjacent to the existing shelters and structures.</p> <p>E68.2</p> <p>If not co-located with an existing facility, all co-location opportunities have been investigated and fully exhausted within a 2km radius of the site.</p>
<p>PO69</p> <p>A new Telecommunications facility⁽⁸¹⁾ is designed and constructed to ensure co-masting or co-siting with other carriers both on the tower or pole and at ground level is possible in the future.</p>	<p>E69</p> <p>A minimum area of 45m² is available at ground level to allow for additional equipment shelters and associated structures for the purpose of co-locating on the proposed facility.</p>
<p>PO70</p> <p>Telecommunications facilities⁽⁸¹⁾ do not conflict with lawful existing land uses both on and adjoining the site.</p>	<p>E70</p> <p>The development results in no net reduction in the minimum quantity and standard of landscaping, private or communal open space or car parking spaces required under the planning scheme or under an existing development approval.</p>

<p>PO71</p> <p>The Telecommunications facility⁽⁸¹⁾ does not have an adverse impact on the visual amenity of a locality and is:</p> <ul style="list-style-type: none"> a. high quality design and construction; b. visually integrated with the surrounding area; c. not visually dominant or intrusive; d. located behind the main building line; e. below the level of the predominant tree canopy or the level of the surrounding buildings and structures; f. camouflaged through the use of colours and materials which blend into the landscape; g. treated to eliminate glare and reflectivity; h. landscaped; i. otherwise consistent with the amenity and character of the zone and surrounding area. 	<p>E71.1</p> <p>Where in an urban area, the development does not protrude more than 5m above the level of the existing treeline, prominent ridgeline or building rooftops in the surrounding townscape.</p> <hr/> <p>E71.2</p> <p>In all other areas towers do not exceed 35m in height.</p> <hr/> <p>E71.3</p> <p>Towers, equipment shelters and associated structures are of a design, colour and material to:</p> <ul style="list-style-type: none"> a. reduce recognition in the landscape; b. reduce glare and reflectivity. <hr/> <p>E71.4</p> <p>All structures and buildings are setback behind the main building line and a minimum of 10m from side and rear boundaries, except where in the Industry and Extractive industry zones, the minimum side and rear setback is 3m.</p> <p>Where there is no established building line the facility is located at the rear of the site.</p> <hr/> <p>E71.5</p> <p>The facility is enclosed by security fencing or by other means to ensure public access is prohibited.</p> <hr/> <p>E71.6</p> <p>A minimum 3m wide strip of dense planting is provided around the perimeter of the fenced area, between the facility and street frontage and adjoining uses.</p> <p>Note - Landscaping is provided in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person, to ensure compliance with Planning scheme policy - Integrated design.</p>
<p>PO72</p> <p>Lawful access is maintained to the site at all times that does not alter the amenity of the landscape or surrounding uses.</p>	<p>E72</p> <p>An Access and Landscape Plan demonstrates how 24 hour vehicular access will be obtained and maintained to the facility in a manner that is appropriate to the site's context.</p>
<p>PO73</p>	<p>E73</p>

6 Zones

<p>All activities associated with the development occur within an environment incorporating sufficient controls to ensure the facility generates no audible sound at the site boundaries where in a residential setting.</p>	<p>All equipment comprising the Telecommunications facility⁽⁸¹⁾ which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure no noise from this equipment can be heard, or felt at the site boundary.</p>
<p>Key sites</p>	
<p>PO74</p> <p>Development on the Morayfield Shopping Centre site (Lot 3 SP128123):</p> <ol style="list-style-type: none"> a. incorporates an appropriate mix of uses, with the main focus remaining on large format retail premises; b. does not include higher order retail, commercial and business uses which are more appropriately located in the Caboolture centre precinct; c. achieves greater land use efficiency through a more intense built form; d. contributes to a high quality streetscape along Morayfield Road and the internal road network; e. incorporates active frontages along Leda Boulevard, William Berry Drive and Dickson Road; f. does not involve the location of large areas of surface car parking along major transport corridors; g. supports the consolidation of vehicle access points and parking areas with adjoining properties; h. incorporates cross block (east-west) linkages to create a more permeable/connected site and encourage pedestrian movement. 	<p>No example provided.</p>
<p>Values and constraints criteria</p> <p>Note - The relevant values and constraints criteria do not apply where the development is consistent with a current Development permit for Reconfiguring a lot or Material change of use or Operational work, where that approval has considered and addressed (e.g. through a development footprint plan (or similar in the case of Landslide hazard) or conditions of approval) the identified value or constraint under this planning scheme.</p>	
<p>Acid sulfate soils - (refer Overlay map - Acid sulfate soils to determine if the following requirements apply)</p> <p>Note - To demonstrate achievement of the performance outcome, an Acid sulfate soils (ASS) investigation report and soil management plan is prepared by a qualified engineer. Guidance for the preparation an ASS investigation report and soil management plan is provided in Planning scheme policy - Acid sulfate soils.</p>	
<p>PO75</p> <p>Development avoids disturbing acid sulfate soils. Where development disturbs acid sulfate soils, development:</p>	<p>E75</p> <p>Development does not involve:</p>

<ul style="list-style-type: none"> a. is managed to avoid or minimise the release of surface or groundwater flows containing acid and metal contaminants into the environment; b. protects the environmental and ecological values and health of receiving waters; c. protects buildings and infrastructure from the effects of acid sulfate soils. 	<ul style="list-style-type: none"> a. excavation or otherwise removing of more than 100m³ of soil or sediment where below than 5m Australian Height datum AHD; or b. filling of land of more than 500m³ of material with an average depth of 0.5m or greater where below the 5m Australian Height datum AHD.
<p>Environmental areas (refer Overlay map - Environmental areas to determine if the following requirements apply)</p> <p>Note – The following are excluded from the native vegetation clearing provisions of this planning scheme:</p> <ul style="list-style-type: none"> a. Clearing of native vegetation located within an approved development footprint; b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental Management and Conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence; e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes; f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council; g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens; h. Grazing of native pasture by stock; i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development. <p>Note - Definition for native vegetation is located in Schedule 1 Definitions.</p> <p>Note - Native vegetation subject to this criteria primarily comprises of matters of national environmental significance (MNES), matters of state environmental significance (MSES). They also comprise some matters of local environmental significance (MLES). A MLES is defined in Schedule 1.2, Administrative definitions. A list of the elements that apply to the mapped MSES and MLES is provided in Appendix 1 of the Planning scheme policy - Environmental areas.</p> <p>Editors' Note - The accuracy of overlay mapping can be challenged through the development application process (code assessable development) or by way of a planning scheme amendment. See Council's website for details.</p> <p>Note - To demonstrate achievement of the performance outcome, an ecological assessment, vegetation management plan and fauna management plan, as required, are prepared by a suitably qualified person. Guidance for the preparation of above mentioned reports is provided in Planning scheme policy - Environmental areas.</p>	
<p>Vegetation clearing, ecological value and connectivity</p>	
<p>PO76</p> <p>Development avoids locating in a High Value Area or a Value Offset Area. Where it is not practicable or reasonable for development to avoid establishing in these areas, development must ensure that:</p>	<p>No example provided.</p>

6 Zones

<p>a. the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area is maintained and not lost or degraded;</p> <p>b. on-site mitigation measures, mechanisms or processes are in place demonstrating the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area are maintained. For example, this can be achieved through replacement, restoration or rehabilitation planting as part of any proposed covenant, the development of a Vegetation Management Plan, a Fauna Management Plan, and any other on-site mitigation options identified in the Planning scheme policy - Environmental areas*.</p> <p>* Editor's note - This is not a requirement for an environmental offset under the Environmental Offsets Act 2014.</p>	
<p>PO77</p> <p>Development provides for safe, unimpeded, convenient and ongoing wildlife movement and establishes and maintains habitat connectivity by:</p> <p>a. retaining habitat trees;</p> <p>b. providing contiguous patches of habitat;</p> <p>c. provide replacement and rehabilitation planting to improve connectivity;</p> <p>d. avoiding the creation of fragmented and isolated patches of habitat;</p> <p>e. providing wildlife movement infrastructure.</p> <p>Editor's note - Wildlife movement infrastructure may include refuge poles, tree boulevarding, 'stepping stone' vegetation plantings, tunnels, appropriate wildlife fencing; culverts with ledges, underpasses, overpasses, land bridges and rope bridges. Further information is provided in Planning scheme policy – Environmental areas.</p>	<p>No example provided.</p>
<p>Vegetation clearing and habitat protection</p>	
<p>PO78</p> <p>Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected.</p>	<p>No example provided.</p>
<p>PO79</p> <p>Development does not result in the net loss or degradation of habitat value in a High Value Area or a Value Offset Area. Where development does result in the loss or degradation of habitat value, development will:</p>	<p>No example provided.</p>

<ul style="list-style-type: none"> a. rehabilitate, revegetate, restore and enhance an area to ensure it continues to function as a viable and healthy habitat area; b. provide replacement fauna nesting boxes in the event of habitat tree loss in accordance with Planning scheme policy - Environmental areas; c. undertake rehabilitation, revegetation and restoration in accordance with the South East Queensland Ecological Restoration Framework. 	
<p>PO80</p> <p>Development ensures safe, unimpeded, convenient and ongoing wildlife movement and habitat connectivity by:</p> <ul style="list-style-type: none"> a. providing contiguous patches of habitat; b. avoiding the creation of fragmented and isolated patches of habitat; c. providing wildlife movement infrastructure; d. providing replacement and rehabilitation planting to improve connectivity. 	No example provided.
Vegetation clearing and soil resource stability	
<p>PO81</p> <p>Development does not:</p> <ul style="list-style-type: none"> a. result in soil erosion or land degradation; b. leave cleared land exposed for an unreasonable period of time but is rehabilitated in a timely manner. 	No example provided.
Vegetation clearing and water quality	
<p>PO82</p> <p>Development maintains or improves the quality of groundwater and surface water within, and downstream, of a site by:</p> <ul style="list-style-type: none"> a. ensuring an effective vegetated buffers and setbacks from waterbodies is retained to achieve natural filtration and reduce sediment loads; b. avoiding or minimising changes to landforms to maintain hydrological water flows; c. adopting suitable measures to exclude livestock from entering a waterbody where a site is being used for animal husbandry⁽⁴⁾ and animal keeping⁽⁵⁾ activities. 	No example provided.
<p>PO83</p> <p>Development minimises adverse impacts of stormwater run-off on water quality by:</p> <ul style="list-style-type: none"> a. minimising flow velocity to reduce erosion; b. minimising hard surface areas; c. maximising the use of permeable surfaces; d. incorporating sediment retention devices; e. minimising channelled flow. 	No example provided.

6 Zones

Vegetation clearing and access, edge effects and urban heat island effects	
<p>PO84</p> <p>Development retains safe and convenient public access in a manner that does not result in the adverse edge effects or the loss or degradation of biodiversity values within the environment.</p>	No example provided.
<p>PO85</p> <p>Development minimises potential adverse 'edge effects' on ecological values by:</p> <ol style="list-style-type: none"> providing dense planting buffers of native vegetation between a development and environmental areas; retaining patches of native vegetation of greatest possible size where located between a development and environmental areas ; restoring, rehabilitating and increasing the size of existing patches of native vegetation; ensuring that buildings and access (public and vehicle) are setback as far as possible from environmental areas and corridors; landscaping with native plants of local origin. <p>Editor's note - Edge effects are factors of development that go to detrimentally affecting the composition and density of natural populations at the fringe of natural areas. Factors include weed invasion, pets, public and vehicle access, nutrient loads, noise and light pollution, increased fire frequency and changes in the groundwater and surface water flow.</p>	No example provided.
<p>PO86</p> <p>Development avoids adverse microclimate change and does not result in increased urban heat island effects. Adverse urban heat island effects are minimised by:</p> <ol style="list-style-type: none"> pervious surfaces; providing deeply planted vegetation buffers and green linkage opportunities; landscaping with local native plant species to achieve well-shaded urban places; increasing the service extent of the urban forest canopy. 	No example provided.
Vegetation clearing and Matters of Local Environmental Significance (MLES) environmental offsets	
<p>PO87</p> <p>Where development results in the unavoidable loss of native vegetation within a Value Offset Area MLES waterway buffer or a Value Offset Area MLES wetland buffer, an environmental offset is required in accordance with the environmental offset requirements identified in Planning scheme policy - Environmental areas.</p>	No example provided.

<p>Editor's note - For MSES Koala Offsets, the environmental offset provisions in Schedule 11 of the Regulation, in combination with the requirements of the Environmental Offsets Act 2014, apply.</p>	
<p>Heritage and landscape character (refer Overlay map - Heritage and landscape character to determine if the following requirements apply)</p> <p>Note - To assist in demonstrating achievement of heritage performance outcomes, a Cultural heritage impact assessment report is prepared by a suitably qualified person verifying the proposed development is in accordance with The Australia ICOMOS Burra Charter.</p> <p>Note - To assist in demonstrating achievement of this performance outcome, a Tree assessment report is prepared by a qualified arborist in accordance with Planning scheme policy – Heritage and landscape character. The Tree assessment report will also detail the measures adopted in accordance with AS 4970-2009 Protection of trees on development sites.</p> <p>Note - Places, including sites, objects and buildings having local cultural heritage significance, are identified on Overlay map - Heritage and landscape character and listed in Schedule 1 of Planning scheme policy - Heritage and landscape character. Places also having cultural heritage significance at a State level and being entered in the Queensland Heritage Register, are also identified in Schedule 1 of Planning scheme policy - Heritage and landscape character.</p>	
<p>PO88</p> <p>Development will:</p> <ol style="list-style-type: none"> not diminish or cause irreversible damage to the cultural heritage values present on the site, and associated with a heritage site, object or building; protect the fabric and setting of the heritage site, object or building; be consistent with the form, scale and style of the heritage site, object or building; utilise similar materials to those existing, or where this is not reasonable or practicable, neutral materials and finishes; incorporate complementary elements, detailing and ornamentation to those present on the heritage site, object or building; retain public access where this is currently provided. 	<p>E88</p> <p>Development is for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value.</p> <p>Note - A cultural heritage conservation management plan for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value is prepared in accordance with Planning scheme policy - Heritage and landscape character. The plan is sent to, and approved by Council prior to the commencement of any preservation, maintenance, repair and restoration works.</p>
<p>PO89</p> <p>Demolition and removal is only considered where:</p> <ol style="list-style-type: none"> a report prepared by a suitably qualified conservation architect or conservation engineer demonstrates that the building is structurally unsound and is not reasonably capable of economic repair; or demolition is confined to the removal of outbuildings, extensions and alterations that are not part of the original structure; or limited demolition is performed in the course of repairs, maintenance or restoration; or demolition is performed following a catastrophic event which substantially destroys the building or object. 	<p>No example provided.</p>
<p>PO90</p>	<p>No example provided.</p>

6 Zones

<p>Where development is occurring on land adjoining a site of cultural heritage value, the development is to be sympathetic to and consistent with the cultural heritage values present on the site and not result in their values being eroded, degraded or unreasonably obscured from public view.</p>	
<p>PO91</p> <p>Development does not adversely impact upon the health and vitality of significant trees. Where development occurs in proximity to a significant tree, construction measures and techniques as detailed in AS 4970-2009 Protection of trees on development sites are adopted to ensure a significant tree's health, wellbeing and vitality.</p> <p>Significant trees are only removed where they are in a poor state of health or where they pose a health and safety risk to persons or property. A Tree Assessment report prepared by a suitably qualified arborist confirming a tree's state of health is required to demonstrate achievement of this performance outcome.</p>	<p>E91</p> <p>Development does:</p> <ol style="list-style-type: none"> not result in the removal of a significant tree; not occur within 20m of a protected tree; involve pruning of a tree in accordance with Australian Standard AS 4373-2007 – Pruning of Amenity Trees.
<p>Infrastructure buffers (refer Overlay map - Infrastructure buffers to determine if the following requirements apply)</p>	
<p>PO92</p> <p>Habitable rooms within an Electricity supply substation buffer are located a sufficient distance from substations⁽⁸⁰⁾ to avoid any potential adverse impacts on personal health and wellbeing from electromagnetic fields.</p> <p>Note - Habitable room is defined in the Building Code of Australia (Volume 1)</p>	<p>E92</p> <p>Habitable rooms:</p> <ol style="list-style-type: none"> are not located within an Electricity supply substation buffer; and proposed on a site subject to an Electricity supply substation⁽⁸⁰⁾ are acoustically insulated to achieve the noise levels listed in Schedule 1, Acoustic Quality Objectives, Environmental Protection (Noise) Policy 2008. <p>Note - Habitable room is defined in the Building Code of Australia (Volume 1)</p>
<p>PO93</p> <p>Habitable rooms within an Electricity supply substation buffer are acoustically insulated from the noise of a substation⁽⁸⁰⁾ to achieve the noise levels listed in Schedule 1 Acoustic Quality Objectives, Environmental Protection (Noise) Policy 2008 and provides a safe, healthy and disturbance free living environment.</p> <p>Note - To demonstrate achievement of the performance outcome, a noise impact assessment report is prepared by a suitably qualified person. Guidance to preparing a noise impact assessment report is provided in Planning scheme policy – Noise.</p> <p>Note - Habitable room is defined in the Building Code of Australia (Volume 1)</p>	<p>No example provided.</p>

Overland flow path (refer Overlay map - Overland flow path to determine if the following requirements apply)	
<p>Note - The applicable river and creek flood planning levels associated with defined flood event (DFE) within the inundation area can be obtained by requesting a flood check property report from Council.</p>	
<p>PO94</p> <p>Development:</p> <ul style="list-style-type: none"> a. minimises the risk to persons from overland flow; b. does not increase the potential for damage from overland flow either on the premises or other premises, public land, watercourses, roads or infrastructure. 	<p>No example provided.</p>
<p>PO95</p> <p>Development:</p> <ul style="list-style-type: none"> a. maintains the conveyance of overland flow predominantly unimpeded through the premises for any event up to and including the 1% AEP for the fully developed upstream catchment; b. does not concentrate, intensify or divert overland flow onto an upstream, downstream or surrounding property. <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow.</p>	<p>No example provided.</p>
<p>PO96</p> <p>Development does not:</p> <ul style="list-style-type: none"> a. directly, indirectly or cumulatively cause any increase in overland flow velocity or level; b. increase the potential for flood damage from overland flow either on the premises or other premises, public lands, watercourses, roads or infrastructure. <p>Note - Open concrete drains greater than 1m in width are not an acceptable outcome, nor are any other design options that may increase scouring.</p>	<p>No example provided.</p>
<p>PO97</p> <p>Development ensures that public safety and the risk to the environment are not adversely affected by a detrimental impact of overland flow on a hazardous chemical located or stored on the premises.</p>	<p>E97</p> <p>Development ensures that a hazardous chemical is not located or stored in an Overland flow path area.</p> <p>Note - Refer to the Work Health and Safety Act 2011 and associated Regulation and Guidelines, the Environmental Protection Act 1994 and the relevant building assessment provisions under the Building</p>

6 Zones

	Act 1975 for requirements related to the manufacture and storage of hazardous substances.
<p>PO98</p> <p>Development which is not in a Rural zone ensures that overland flow is not conveyed from a road or public open space onto a private lot.</p>	<p>E98</p> <p>Development which is not in a Rural zone that an overland flow paths and drainage infrastructure is provided to convey overland flow from a road or public open space area away from a private lot.</p>
<p>PO99</p> <p>Development ensures that inter-allotment drainage infrastructure, overland flow paths and open drains through private property cater for overland flows for a fully developed upstream catchment and are able to be easily maintained.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow</p>	<p>E99.1</p> <p>Development ensures that roof and allotment drainage infrastructure is provided in accordance with the following relevant level as identified in QUDM:</p> <ol style="list-style-type: none"> Urban area – Level III; Rural area – N/A; Industrial area – Level V; Commercial area – Level V. <p>E99.2</p> <p>Development ensures that inter-allotment drainage infrastructure is designed to accommodate any event up to and including the 1% AEP for the fully developed upstream catchment.</p>
<p>PO100</p> <p>Development protects the conveyance of overland flow such that an easement for drainage purposes is provided over:</p> <ol style="list-style-type: none"> a stormwater pipe if the nominal pipe diameter exceeds 300mm; an overland flow path where it crosses more than one premises; inter-allotment drainage infrastructure. <p>Note - Refer to Planning scheme policy - Integrated design for details and examples.</p> <p>Note - Stormwater Drainage easement dimensions are provided in accordance with Section 3.8.5 of QUDM.</p>	No example provided.
Additional criteria for development for a Park⁽⁵⁷⁾	
<p>PO101</p> <p>Development for a Park⁽⁵⁷⁾ ensures that the design and layout responds to the nature of the overland flow affecting the premises such that:</p>	<p>E101</p> <p>Development for a Park⁽⁵⁷⁾ ensures works are provided in accordance with the requirements set out in Appendix B of the Planning scheme policy - Integrated design.</p>

<ul style="list-style-type: none"> a. public benefit and enjoyment is maximised; b. impacts on the asset life and integrity of park structures is minimised; c. maintenance and replacement costs are minimised. 	
Riparian and wetland setbacks	
<p>PO102</p> <p>Development provides and maintains a suitable setback from waterways and wetlands that protects natural and environmental values. This is achieved by recognising and responding to the following matters:</p> <ul style="list-style-type: none"> a. impact on fauna habitats; b. impact on wildlife corridors and connectivity; c. impact on stream integrity; d. impact of opportunities for revegetation and rehabilitation planting; e. edge effects. 	<p>E102</p> <p>Development does not occur within:</p> <ul style="list-style-type: none"> a. 50m from top of bank for W1 waterway and drainage line b. 30m from top of bank for W2 waterway and drainage line c. 20m from top of bank for W3 waterway and drainage line d. 100m from the edge of a Ramsar wetland, 50m from all other wetlands. <p>Note - W1, W2 and W3 waterway and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.</p>

6 Zones

6.2.1.3 Petrie mill precinct

6.2.1.3.1 Purpose - Petrie mill precinct

1. The purpose of the code will be achieved through the following overall outcomes for the Petrie mill precinct:
 - a. Development reinforces the Petrie mill precinct as the main centre for higher education and health employment within the Moreton Bay region and as major centre of community cultural and sporting infrastructure.
 - b. Development is contained within the precinct boundaries and does not result in centre uses occurring outside of the Petrie mill precinct into adjoining zones.
 - c. Development does not compromise the role and function of other higher order centres in the region or the Petrie district centre.

Note - Refer to Table 6.2.1.1 for the Moreton Bay centres network.
 - d. Development in the Petrie mill precinct achieves a high employment rate over developable portions of the site (e.g. 120-150 jobs per ha).
 - e. Development contributes to the consolidation of the Petrie mill precinct, through:
 - i. greater land use efficiency within the precinct;
 - ii. increasing residential density where within walking distance of a railway station.
 - f. Development incorporates transit oriented development principles and encourages increased active and public transport usage, by:
 - i. increasing land use intensity within walking distance of public transport facilities;
 - ii. creating attractive, walkable street environments;
 - iii. prioritising pedestrian and cycle safety and movement over private vehicle access and movement.
 - g. The intensity of development and mix of land uses provided in the precinct supports the provision of high frequency public transport services and other services and facilities.

Editor's note - The below Figure will be finalised once a master plan has been developed and endorsed for this site.

Figure 6.2.1.3.1 - Petrie

6 Zones

6.2.1.4 Strathpine centre precinct

6.2.1.4.1 Purpose - Strathpine centre precinct

1. The purpose of the code will be achieved through the following overall outcomes for the Strathpine centre precinct:
 - a. Development reinforces the role of the Strathpine centre as a key centre for administration and business within the Moreton Bay Region.
 - b. Development contributes to the consolidation of the Strathpine centre, through:
 - i. greater land use efficiency within the precinct;
 - ii. increasing residential density and diversity within the centre and around railway stations.
 - c. Development is contained within the precinct boundaries and does not result in centre uses occurring outside of the Strathpine centre precinct into adjoining zones.
 - d. Development incorporates transit oriented development principles and encourages increased active and public transport usage surrounding the Strathpine and Bray Park rail stations, by:
 - i. increasing land use intensity within walking distance of public transport facilities;
 - ii. contributing to attractive, highly walkable street environments, through streetscape upgrades and enhancements and improved connectivity;
 - iii. prioritising pedestrian and cycle safety and movement over private vehicle access and movement.
 - e. High density residential activities are encouraged within this precinct.
 - f. The intensity of development and mix of land uses provided in the precinct supports the provision of public transport services and other services and facilities.
 - g. Through redevelopment the built form of the Strathpine centre along Gympie Road is to be characterised by active frontages adjoining Gympie Road forming a main street core.
 - h. Development encourages social activity through the provision of high quality civic and forecourt spaces.
 - i. The re-development of key sites within the precinct provides an opportunity to improve:
 - i. the mix and intensity of uses within the centre;
 - ii. built form outcomes on key streets;
 - iii. pedestrian connectivity throughout the centre;
 - iv. maximise the amenity offered by the South Pine River.
 - j. The safety and efficiency of pedestrian movement is prioritised in the design of car parking areas and the size and frequency of vehicle crossovers.
 - k. Parking, manoeuvring and servicing areas are designed, located and aesthetically treated to not be visually dominant features from the streetscape and public spaces.
 - l. The number of car parking spaces is managed to:
 - i. encourage the use of active and public transport;
 - ii. increase land use efficiency;

- iii. improve development feasibility;
 - iv. avoid the negative impacts of large areas of surface car parking on the streetscape.
- m. Pedestrian connections are provided to integrate the development with the street, public spaces and the surrounding area.
- n. Buildings contribute to an efficient and attractive, sub-tropical centre, through:
- i. high quality, distinctive designs that address streets and public spaces;
 - ii. energy efficient buildings that achieve best practice environmental performance;
 - iii. the use of high quality, low maintenance building materials, light weight elements, recesses etc.
- o. Crime prevention through environmental design principles are incorporated into the design of buildings and public spaces (e.g. casual surveillance, avoid areas of concealment etc.), to ensure the safety and security of people and property.
- p. Ground floor and podium tenancies are occupied by retail, commercial or community uses to provide activities close to the public realm.
- q. **Service stations:**
- i. **establish where they will not disrupt, fragment or negatively impact active frontages or streets where pedestrian safety and comfort are of high importance;**
 - ii. **establish on heavily trafficked roads where the amenity of surrounding residential uses is already subject to impacts from road vehicle noise;**
 - iii. **establish in locations that will not have a negative impact on the street environments intended to include active frontages;**
 - iv. **do not negatively impact adjoining residents or the streetscape;**
 - v. **ancillary uses or activities only service the convenience needs of users.**
- r. Adverse impacts on the amenity of surrounding land uses are minimised by mitigating noise, odour and air quality impacts on residents to a level consistent with the location within or adjoining the centre.
- s. Uses and activities contribute to a horizontal and vertical mix and the co-location of uses, concentrated in a compact urban form.
- t. General works associated with the development achieves the following:
- i. new development is provided with a high standard of services to meet and support the current and future needs of users of the site, including roads, street lighting services, telecommunications and reticulated electricity (underground wherever possible), water and sewerage (where available);
 - ii. the development manages stormwater to:
 - A. ensure the discharge of stormwater does not adversely affect the quality, environmental values or ecosystem functions of downstream receiving waters;
 - B. prevent stormwater contamination and the release of pollutants;
 - C. maintain or improve the structure and condition of drainage lines and riparian areas;
 - D. avoid off-site adverse impacts from stormwater.
 - iii. the development does not result in unacceptable impacts on the capacity and safety of the external road network;

6 Zones

- iv. the development ensures the safety, efficiency and useability of access ways and parking areas;
- v. site works including earthworks are managed to be safe and have minimal impacts on adjoining or adjacent premises, the streetscape or the environment.
- u. Activities associated with the use do not cause a nuisance by way of aerosols, fumes, light, noise, odour, particles or smoke.
- v. Noise generating uses are designed, sited and constructed to minimise the transmission of noise to appropriate levels and do not cause environmental harm or nuisance.
- w. Noise sensitive uses are designed, sited and constructed so as not to be subject to unacceptable levels of noise.
- x. Development avoids areas subject to constraint, limitation, or environmental value. Where development cannot avoid these identified areas, it responds by:
 - i. adopting a 'least risk, least impact' approach when designing, siting and locating development in any area subject to a constraint, limitation or environmental value to minimise the potential risk to people, property and the environment;
 - ii. ensuring no further instability, erosion or degradation of the land, water or soil resource;
 - iii. when located within a Water buffer area, complying with the Water Quality Vision and Objectives contained in the Seqwater Development Guidelines: Development Guidelines for Water Quality Management in Drinking Water Catchments 2012.
 - iv. maintaining, restoring and rehabilitating environmental values, including natural, ecological, biological, aquatic, hydrological and amenity values, and enhancing these values through the provision of planting and landscaping, and facilitating safe wildlife movement and connectivity through:
 - A. the provision of replacement, restoration, rehabilitation planting and landscaping;
 - B. the location, design and management of development to avoid or minimise adverse impacts on ecological systems and processes;
 - C. the requiring of environmental offsets in accordance with the Environmental Offsets Act 2014.
 - v. protecting native species and protecting and enhancing species habitat;
 - vi. protecting and preserving the natural, aesthetic, architectural historic and cultural values of significant trees, places, objects and buildings of heritage and cultural significance;
 - vii. establishing effective separation distances, buffers and mitigation measures associated with identified infrastructure to minimise adverse effects on sensitive land uses from odour, noise, dust and other nuisance generating activities;
 - viii. establishing, maintaining and protecting appropriate buffers to waterways, wetlands, native vegetation and significant fauna habitat;
 - ix. ensuring it promotes and does not undermine the ongoing viability, integrity, operation, maintenance and safety of identified infrastructure;
 - x. ensuring effective and efficient disaster management response and recovery capabilities;
 - xi. where located in an overland flow path:
 - A. development siting, built form, layout and access responds to the risk presented by the overland flow and minimises risk to personal safety;
 - B. development is resilient to the impacts of overland flow by ensuring the siting and design accounts for the potential risks to property associated with the overland flow;

- C. development does not impact on the conveyance of the overland flow for any event up to and including the 1% AEP for the fully developed upstream catchment;
- D. development directly, indirectly and cumulatively avoid an increase in the severity of overland flow and potential for damage on the premises or other premises, public lands, watercourses, roads or infrastructure.

y. Development in the Strathpine centre precinct includes one or more of the following:

<ul style="list-style-type: none"> • Bar⁽⁷⁾ • Caretaker's accommodation⁽¹⁰⁾ • Child care centre⁽¹³⁾ • Club⁽¹⁴⁾ • Community care centre⁽¹⁵⁾ • Community use⁽¹⁷⁾ • Dual occupancy⁽²¹⁾ - if in a mixed use building • Dwelling unit⁽²³⁾ • Educational establishment⁽²⁴⁾ • Emergency services⁽²⁵⁾ • Food and drink outlet⁽²⁸⁾ • Function facility⁽²⁹⁾ 	<ul style="list-style-type: none"> • Hardware and trade supplies⁽³²⁾ • Health care services⁽³³⁾ • Home based business⁽³⁵⁾ • Hotel⁽³⁷⁾ • Indoor sport and recreation⁽³⁸⁾ • Low impact industry⁽⁴²⁾ - if not located adjoining a main street • Market⁽⁴⁶⁾ • Multiple dwelling⁽⁴⁹⁾ • Nightclub entertainment facility⁽⁵¹⁾ • Office⁽⁵³⁾ 	<ul style="list-style-type: none"> • Place of worship⁽⁶⁰⁾ • Rooming accommodation⁽⁶⁹⁾ • Sales office⁽⁷²⁾ • Service industry⁽⁷³⁾ • Shop⁽⁷⁵⁾ • Shopping centre⁽⁷⁶⁾ • Short-term accommodation⁽⁷⁷⁾ • Showroom⁽⁷⁸⁾ • Theatre⁽⁸²⁾ • Veterinary services⁽⁸⁷⁾
---	---	--

z. Development in the Strathpine centre precinct does not include any of the following:

<ul style="list-style-type: none"> • Agricultural supplies store⁽²⁾ • Air services⁽³⁾ • Animal husbandry⁽⁴⁾ • Animal keeping⁽⁵⁾ • Aquaculture⁽⁶⁾ • Brothel⁽⁸⁾ • Bulk landscape supplies⁽⁹⁾ 	<ul style="list-style-type: none"> • Extractive industry⁽²⁷⁾ • High impact industry⁽³⁴⁾ • Intensive animal industry⁽³⁹⁾ • Intensive horticulture⁽⁴⁰⁾ • Marine industry⁽⁴⁵⁾ • Medium impact industry⁽⁴⁷⁾ • Motor sport facility⁽⁴⁸⁾ 	<ul style="list-style-type: none"> • Relocatable home park⁽⁶²⁾ • Rural industry⁽⁷⁰⁾ • Rural workers accommodation⁽⁷¹⁾ • Special industry⁽⁷⁹⁾ • Tourist park⁽⁸⁴⁾ • Transport depot⁽⁸⁵⁾ • Warehouse⁽⁸⁸⁾
--	--	---

6 Zones

<ul style="list-style-type: none"> • Cemetery⁽¹²⁾ • Crematorium⁽¹⁸⁾ • Cropping⁽¹⁹⁾ • Detention facility⁽²⁰⁾ 	<ul style="list-style-type: none"> • Outdoor sport and recreation⁽⁵⁵⁾ • Permanent plantation⁽⁵⁹⁾ 	<ul style="list-style-type: none"> • Wholesale nursery⁽⁸⁹⁾ • Winery⁽⁹⁰⁾
---	--	---

- aa. Development not listed in the tables above may be considered on its merits and where it reflects and supports the outcomes of the zone.

Part E - Criteria for assessable development - Strathpine centre precinct

Where development is categorised as assessable development - code assessment in the Table of Assessment, the assessment benchmarks are the criteria set out in Part E, Table 6.2.1.4.1 as well as the purpose statement and overall outcomes of this code.

Where development is categorised as assessable development - impact assessable, the assessment benchmarks become the whole of the planning scheme.

Table 6.2.1.4.1 Assessable development - Strathpine centre precinct

Performance outcomes	Examples that achieve aspects of the Performance Outcomes
General criteria	
Role of Strathpine centre precinct	
<p>PO1</p> <p>Development in the Strathpine centre precinct:</p> <p>a. reflects the prominence of the Strathpine centre precinct as a higher order centre and key focal point for regional employment and development in South East Queensland;</p> <p>b. is of a size, scale and range of services commensurate with the role and function of this precinct within the centres network.</p> <p>Note - Refer to Moreton Bay centres network Table 6.2.1.1.</p>	<p>No example provided.</p>
<p>PO2</p> <p>Development maximises the efficient use of land and provides for future growth within the precinct by maintaining or increasing the GFA and land use intensity within the precinct boundaries to promote economic development.</p> <p>Note - Development within the Strathpine centre precinct is expected to capitalise on the area's strategic advantages, including co-location with other businesses and government administration and access</p>	<p>E2</p> <p>Development within the precinct achieves a minimum plot ratio of 1:1.</p> <p>Note - Plot ratio is the ratio of gross floor area to the area of the site. For example, a minimum plot ratio of 1:1 means a 1,000m² site is to be developed with a minimum of 1,000m² gross floor area.</p>

to high quality public transport, by maximising the efficient use of land. Activities that are land intensive, but do not promote economic development, such as open car parks, are discouraged.

Active frontage

PO3

Buildings are designed and oriented to address and activate areas of pedestrian movement, to:

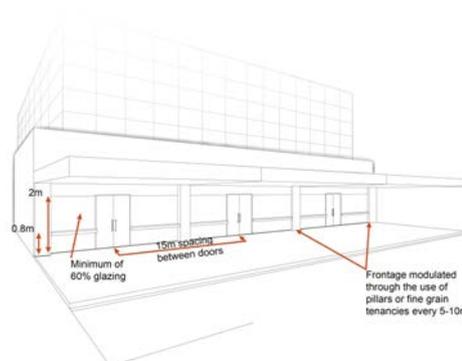

- a. promote vitality, interaction and casual surveillance;
- b. concentrate and reinforce pedestrian activity;
- c. avoid opaque facades to provide visual interest to the street frontage.

E3.1

Buildings on sites shown on 'Figure 6.2.1.4.1 - Strathpine' as requiring frontage type A incorporates:

- a. a minimum of 60% of the length of the street frontage glazed between 0.8m and 2.0m above finished ground level;
- b. external doors which directly adjoin the street frontage at least every 15m;
- c. modulation in the facade, by incorporating a different tenancy or the use of pillars or similar elements every 5-10m;
- d. the minimum window or glazing is to remain uncovered and free of signage.

Figure - Frontage type A

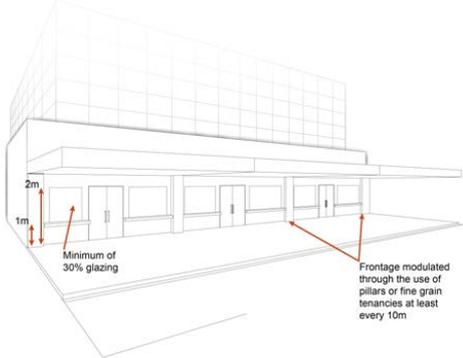

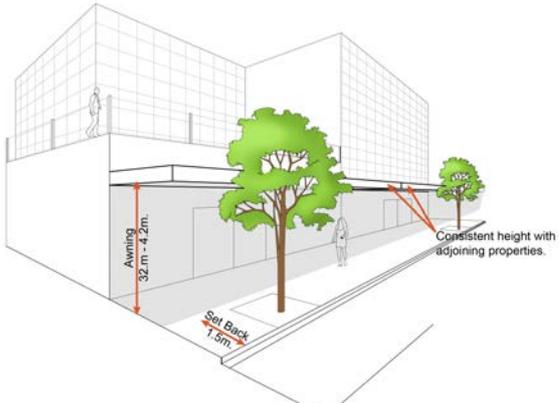

E3.2

Buildings on sites shown on 'Figure 6.2.1.4.1 - Strathpine' as requiring a frontage type B incorporates:

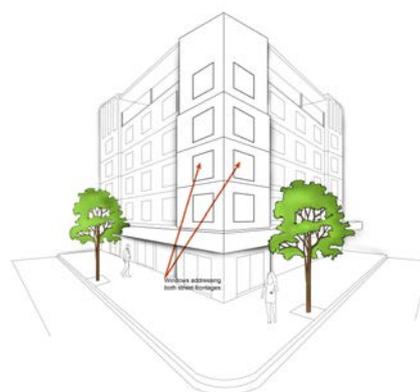

- a. a minimum of 50% of the length of the street frontage glazed between 1.0m and 2.0m above finished ground level;
- b. modulation in the facade, by incorporating fine grain tenancies or the use of pillars or similar elements at least every 10m;
- c. the minimum window or glazing is to remain uncovered and free of signage.

6 Zones

	<p style="text-align: center;">Figure - Frontage type B</p>  <p>The diagram shows a building facade with a canopy extending over the sidewalk. A vertical dimension line indicates a height of 2m from the ground level to the top of the canopy. A note points to the canopy area stating 'Minimum of 30% glazing'. Another note points to the building facade stating 'Frontage modulated through the use of pillars or fine grain fenestancies at least every 10m'.</p>
<p>PO4</p> <p>Awnings are provided at the ground level floor fronting pedestrian footpaths. Awnings:</p> <ol style="list-style-type: none"> provide adequate protection for pedestrians from solar exposure and inclement weather; are integrated with the design of the building and the form and function of the street; do not compromise the provision of street trees and signage; ensure the safety of pedestrians and vehicles (e.g. No support poles). 	<p>E4</p> <p>Buildings incorporate an awning that:</p> <ol style="list-style-type: none"> is cantilevered; extends from the face of the building; has a minimum height of 3.2m and a maximum height of 4.2m above pavement level; does not extend past a vertical plane of 1.5m inside the kerb line to allow for street trees and regulatory signage; aligns with adjoining buildings to provide continuous shelter where possible. <p style="text-align: center;">Figure - Awning requirements</p>  <p>The diagram illustrates a building with a cantilevered awning. A vertical dimension line shows the awning height as '3.2m - 4.2m'. A horizontal dimension line shows the distance from the building face to the kerb as 'Set Back 1.5m'. A note indicates 'Consistent height with adjoining properties'. A tree is shown on the sidewalk under the awning.</p>
<p>PO5</p> <p>Buildings on prominent corners (as shown on 'Figure 6.2.1.4.1 - Strathpine') incorporate design measures on corners to assist in legibility of the street environment and promote activity on the street frontage.</p> <p>Note - Design measures will vary depending on the building and location, however may include the following:</p>	<p>E5.1</p> <p>Buildings located on a street corner shown on 'Figure 6.2.1.4.1 - Strathpine' as a prominent corner incorporate windows which address both street frontages OR which directly face the corner and have a minimum of 30% glazing.</p>

- a. increasing the height of the building on the corner;
- b. stepping back the building on the corner to create an additional face;
- c. including prominent building entrances and windows on the corners;
- d. the use of a focal point, such as a tower, visual display or artwork on the corner.

Figure - Prominent corner requirements

E5.2

Buildings located on a landmark site shown on 'Figure 6.2.1.4.1 - Strathpine' incorporate a well designed facade, including:

- a. windows and openings;
- b. pedestrian entrances, particularly on the building chamfer;
- c. projections and articulation.

Setbacks

PO6

Front building setbacks ensure buildings address and actively interface with streets and public spaces. Taller buildings adjoining narrow roads incorporate a podium to maintain human scale.

E6.1

For sites that adjoin Gympie Road, buildings are built to the street alignment.

E6.2

For sites that adjoin Dixon Street, Learmonth Street and Mecklam Street:

- a. buildings include a podium that is built to the boundary to a maximum height of 12m;
- b. all parts of the building that are greater than 12m in height are setback a minimum of 4m.

E6.3

Buildings on Lot 1 SP128097 adjoining the residential lots fronting Learmonth Street are setback a minimum of:

Building height	Minimum setback
Less than 12m	10m
>12m - 21m	25m

6 Zones

	<table border="1"> <tr> <td>Greater than 21m</td> <td>50m</td> </tr> </table>	Greater than 21m	50m
Greater than 21m	50m		
	<p>E6.4</p> <p>Buildings on Lot 1 SP128097 (Westfield shopping centre) are setback a maximum of 6 metres from the eastern boundary adjacent to the South Pine River.</p>		
Site area			
<p>PO7</p> <p>The development has sufficient area and dimensions to accommodate required buildings and structures, vehicular access, manoeuvring and parking and landscaping.</p>	No example provided.		
Building height			
<p>PO8</p> <p>Building height:</p> <ol style="list-style-type: none"> reflects the prominence of the Strathpine centre as a higher order centre and key focal point for regional employment and development in South East Queensland; maximises land use intensity around the Strathpine and Bray Park rail stations; allows for distinctive and innovative design outcomes on prominent sites; ensures an even distribution of retail and commercial development across the Strathpine Centre and avoids over-concentration of activities in one location; provides a transition to lower density areas surrounding the centre precinct. 	<p>E8</p> <p>Minimum and maximum building heights are in accordance with Overlay map - Building heights.</p> <p>Note - Development on street corners identified as a 'Landmark' site or prominent corner on 'Figure 6.2.1.4.1 - Strathpine' may incorporate an increased building height on the corner, if the building:</p> <ol style="list-style-type: none"> provides high quality and unique architectural design outcomes that emphasise the prominence of the street corner; and positively contribute to the cityscape. 		
Built form			
<p>PO9</p> <p>Buildings are designed and constructed to:</p> <ol style="list-style-type: none"> incorporate a mix of colours and high quality materials to add diversification to treatments and finishes; articulate and detail the building facade at the street level and respond to human scale; visually integrate with the surrounding area and adjoining buildings through appropriate design and materials; 	No example provided.		

<ul style="list-style-type: none"> d. avoid blank walls through articulation and architectural treatments to create visual interest; e. avoid highly reflective finishes; f. avoid the visual dominance of plant and equipment on building roofs. 	
<p>PO10</p> <p>Building entrances:</p> <ul style="list-style-type: none"> a. are readily identifiable from the road frontage; b. add visual interest to the streetscape; c. are designed to limit opportunities for concealment; d. are located and oriented to favour active and public transport usage by connecting to pedestrian footpaths on the street frontage and adjoining sites; e. provide a dedicated, sealed pedestrian footpath between the street frontage and the building entrance; f. are adequately lit to ensure public safety and security. <p>Note - The design provisions for footpaths outlined in Planning scheme policy - Integrated design may assist in demonstrating compliance with this Performance Outcome.</p>	No example provided.
Accessibility and permeability	
<p>PO11</p> <p>Development contributes to greater permeability within the Strathpine centre precinct by facilitating a network of convenient and safe pedestrian walkways, cycle ways, road connections and mid-block connections, as outlined in 'Figure 6.2.1.4.1 - Strathpine'.</p>	No example provided.
Movement network	
<p>PO</p> <p>Development is designed to connect to and form part of the surrounding neighbourhood by providing interconnected street, pedestrian and cyclist pathways to adjoining development, nearby centres, neighbourhood hubs, community facilities, public transport nodes and open space.</p> <p>Note - Refer to Planning scheme policy - Neighbourhood design for guidance on achieving the above outcome.</p>	<p>E</p> <p>Development provides and maintains the connections shown on the movement figures located in Appendix A of Planning scheme policy - Neighbourhood design.</p> <p>E</p> <p>For areas not shown on a movement figure located in Appendix A of Planning scheme policy - Neighbourhood design, no example provided.</p>

6 Zones

	<p>Note - Refer to Planning scheme policy - Neighbourhood design for guidance on achieving the above example.</p>												
<p>Car parking</p>													
<p>PO12</p> <p>The provision of car parking spaces is:</p> <ol style="list-style-type: none"> appropriate to the use; avoids an oversupply of car parking spaces. <p>Note - Refer to Planning scheme policy - Integrated transport assessment for guidance on how to achieve compliance with this outcome.</p>	<p>E12</p> <p>Car parking is provided in accordance with the table below.</p> <table border="1"> <thead> <tr> <th>Land use</th> <th>Maximum number of Car Spaces to be Provided</th> <th>Minimum Number of Car Spaces to be Provided</th> </tr> </thead> <tbody> <tr> <td>Non-residential</td> <td>1 per 50m² of GFA</td> <td>1 per 75m² of GFA</td> </tr> <tr> <td>Residential - Permanent/long term</td> <td>N/A</td> <td>2 per 5 dwellings</td> </tr> <tr> <td>Residential - Services/short term</td> <td>1 per 4 dwellings + staff spaces</td> <td>1 per 10 dwellings + staff spaces</td> </tr> </tbody> </table> <p>Note - Car parking rates are to be rounded up to the nearest whole number.</p> <p>Note - Allocation of car parking spaces to dwellings is at the discretion of the developer.</p> <p>Note - Residential - Permanent/long term includes: Multiple dwelling⁽⁴⁹⁾, Relocatable home park⁽⁶²⁾, Residential care facility⁽⁶⁵⁾, Retirement facility⁽⁶⁷⁾.</p> <p>Note - Residential - Services/short term includes: Rooming accommodation⁽⁶⁹⁾ or Short-term accommodation⁽⁷⁷⁾.</p> <p>Note - The above rates exclude car parking spaces for people with a disability required by Disability Discrimination Act 1992 or the relevant disability discrimination legislation and standards.</p>	Land use	Maximum number of Car Spaces to be Provided	Minimum Number of Car Spaces to be Provided	Non-residential	1 per 50m ² of GFA	1 per 75m ² of GFA	Residential - Permanent/long term	N/A	2 per 5 dwellings	Residential - Services/short term	1 per 4 dwellings + staff spaces	1 per 10 dwellings + staff spaces
Land use	Maximum number of Car Spaces to be Provided	Minimum Number of Car Spaces to be Provided											
Non-residential	1 per 50m ² of GFA	1 per 75m ² of GFA											
Residential - Permanent/long term	N/A	2 per 5 dwellings											
Residential - Services/short term	1 per 4 dwellings + staff spaces	1 per 10 dwellings + staff spaces											
<p>PO13</p> <p>Car parking is designed to avoid the visual impact of large areas of surface car parking on the streetscape.</p>	<p>No example provided.</p>												
<p>PO14</p> <p>Car parking design includes innovative solutions, including on-street parking and shared parking areas.</p> <p>Note - Refer to Planning scheme policy - integrated design for details and examples of on-street parking.</p>	<p>No example provided.</p>												
<p>PO15</p> <p>The design of car parking areas:</p>	<p>E15</p> <p>All car parking areas are designed and constructed in accordance with Australian Standard AS 2890.1 Parking facilities Part 1: Off-street car parking.</p>												

<ul style="list-style-type: none"> a. does not impact on the safety of the external road network; b. ensures the safe movement of vehicles within the site. 									
<p>PO16</p> <p>The safety and efficiency of pedestrian movement is priorities in the design of car parking areas through providing pedestrian paths in car parking areas that are:</p> <ul style="list-style-type: none"> a. located along the most direct pedestrian routes between building entrances, car parks and adjoining uses; b. protected from vehicle intrusion through the use of physical and visual separation (e.g. wheel stops, trees etc); c. of a width to allow safe and efficient access for prams and wheelchairs. 	<p>No example provided.</p>								
<p>Bicycle parking and end of trip facilities</p> <p>Note - Building work to which this code applies constitutes Major Development for purposes of development requirements for end of trip facilities prescribed in the Queensland Development Code MP 4.1.</p>									
<p>PO17</p> <ul style="list-style-type: none"> a. End of trip facilities are provided for employees or occupants, in the building or on-site within a reasonable walking distance, and include: <ul style="list-style-type: none"> i. adequate bicycle parking and storage facilities; and ii. adequate provision for securing belongings; and iii. change rooms that include adequate showers, sanitary compartments, wash basins and mirrors. b. Notwithstanding a. there is no requirement to provide end of trip facilities if it would be unreasonable to provide these facilities having regard to: <ul style="list-style-type: none"> i. the projected population growth and forward planning for road upgrading and development of cycle paths; or 	<p>E17.1</p> <p>Minimum bicycle parking facilities are provided in accordance with the table below (rounded up to the nearest whole number).</p> <table border="1" data-bbox="810 1339 1465 1653"> <thead> <tr> <th>Use</th> <th>Minimum Bicycle Parking</th> </tr> </thead> <tbody> <tr> <td>Residential uses comprised of dwellings</td> <td>Minimum 1 space per dwelling</td> </tr> <tr> <td>All other residential uses</td> <td>Minimum 1 space per 2 car parking spaces identified in Schedule 7 – car parking</td> </tr> <tr> <td>Non-residential uses</td> <td>Minimum 1 space per 200m² of GFA</td> </tr> </tbody> </table> <p>Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is a combination of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.</p> <p>E17.2</p>	Use	Minimum Bicycle Parking	Residential uses comprised of dwellings	Minimum 1 space per dwelling	All other residential uses	Minimum 1 space per 2 car parking spaces identified in Schedule 7 – car parking	Non-residential uses	Minimum 1 space per 200m ² of GFA
Use	Minimum Bicycle Parking								
Residential uses comprised of dwellings	Minimum 1 space per dwelling								
All other residential uses	Minimum 1 space per 2 car parking spaces identified in Schedule 7 – car parking								
Non-residential uses	Minimum 1 space per 200m ² of GFA								

<p>ii. whether it would be practical to commute to and from the building on a bicycle, having regard to the likely commute distances and nature of the terrain; or</p> <p>iii. the condition of the road and the nature and amount of traffic potentially affecting the safety of commuters.</p> <p>Editor's note - The intent of b above is to ensure the requirements for bicycle parking and end of trip facilities are not applied in unreasonable circumstances. For example these requirements should not, and do not apply in the Rural zone or the Rural residential zone etc.</p> <p>Editor's note - This performance outcome is the same as the Performance Requirement prescribed for end of trip facilities under the Queensland Development Code. For development incorporating building work, that Queensland Development Code performance requirement cannot be altered by a local planning instrument and has been reproduced here solely for information purposes. Council's assessment in its building work concurrence agency role for end of trip facilities will be against the performance requirement in the Queensland Development Code. As it is subject to change at any time, applicants for development incorporating building work should ensure that proposals that do not comply with the examples under this heading meet the current performance requirement prescribed in the Queensland Development Code.</p>	<p>Bicycle parking is:</p> <ol style="list-style-type: none"> provided in accordance with <i>Austrroads (2008), Guide to Traffic Management - Part 11: Parking</i>; protected from the weather by its location or a dedicated roof structure; located within the building or in a dedicated, secure structure for residents and staff; adjacent to building entrances or in public areas for customers and visitors. <p>Note - Bicycle parking structures are to be constructed to the standards prescribed in AS2890.3.</p> <p>Note - Bicycle parking and end of trip facilities provided for residential and non-residential activities may be pooled, provided they are within 100 metres of the entrance to the building.</p> <p>Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is an amalgamation of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.</p>
	<p>E17.3</p> <p>For non-residential uses, storage lockers:</p> <ol style="list-style-type: none"> are provide at a rate of 1.6 per bicycle parking space (rounded up to the nearest whole number); have minimum dimensions of 900mm (height) x 300mm (width) x 450mm (depth). <p>Note - Storage lockers may be pooled across multiple sites and activities when within 100 metres of the entrance to the building and within 50 metres of bicycle parking and storage facilities.</p> <p>Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is an amalgamation of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.</p>
	<p>E17.4</p> <p>For non-residential uses, changing rooms:</p> <ol style="list-style-type: none"> are provided at a rate of 1 per 10 bicycle parking spaces;

- b. are fitted with a lockable door or otherwise screened from public view;
- c. are provided with shower(s), sanitary compartment(s) and wash basin(s) in accordance with the table below:

Bicycle spaces provided	Male/ Female	Change rooms required	Showers required	Sanitary compartments required	Washbasins required
1-5	Male and female	1 unisex change room	1	1 closet pan	1
6-19	Female	1	1	1 closet pan	1
20 or more	Male	1	1	1 closet pan	1
	Female	1	2, plus 1 for every 20 bicycle spaces provided thereafter	2 closet pans, plus 1 sanitary compartment for every 60 bicycle parking spaces provided thereafter	1, plus 1 for every 60 bicycle parking spaces provided thereafter
	Male	1	2, plus 1 for every 20 bicycle spaces provided thereafter	1 urinal and 1 closet pans, plus 1 sanitary compartment at the rate of 1 closet pan or 1 urinal for every 60 bicycle space provided thereafter	1, plus 1 for every 60 bicycle parking spaces provided thereafter

Note - All showers have a minimum 3-star Water Efficiency Labelling and Standards (WELS) rating shower head.

Note - All sanitary compartments are constructed in compliance with F2.3 (e) and F2.5 of BCA (Volume 1).

- d. are provided with:
- i. a mirror located above each wash basin;
 - ii. a hook and bench seating within each shower compartment;
 - iii. a socket-outlet located adjacent to each wash basin.

Note - Change rooms may be pooled across multiple sites, residential and non-residential activities when within 100 metres of the entrance to the building and within 50 metres of bicycle parking and storage facilities

Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is an amalgamation of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.

Loading and Servicing

PO18

No example provided.

6 Zones

<p>Loading and servicing areas:</p> <ol style="list-style-type: none"> are not visible from any street frontage; are integrated into the design of the building; include screening and buffers to reduce negative impacts on adjoining sensitive land uses; are consolidated and shared with adjoining sites where possible. <p>Note - Refer to Planning scheme policy - Centre and neighbourhood hub design.</p>	
Waste	
<p>PO19</p> <p>Bins and bin storage area/s are designed, located and managed to prevent amenity impacts on the locality.</p>	<p>E19</p> <p>Bins and bin storage area/s are provided, designed and managed in accordance with Planning scheme policy – Waste.</p> <p>Development is designed to meet the criteria in the Planning scheme policy - Waste and is demonstrated in a waste management program.</p>
Landscaping and fencing	
<p>PO20</p> <p>On-site landscaping:</p> <ol style="list-style-type: none"> is incorporated into the design of the development; reduces the dominance of car parking and servicing areas from the street frontage; incorporates shade trees in car parking areas; retains mature trees wherever possible; contributes to quality public spaces and the microclimate by providing shelter and shade; maintains the achievement of active frontages and sightlines for casual surveillance. <p>Note - Landscaping is to be provided in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person, to ensure compliance with Planning scheme policy - Integrated design.</p>	<p>No example provided.</p>
<p>PO21</p>	<p>No example provided.</p>

Surveillance and overlooking are maintained between the road frontage and the main building line.	
Environmentally sensitive design	
<p>PO22</p> <p>Development incorporates energy efficient design principles, including:</p> <ul style="list-style-type: none"> a. maximising internal cross-ventilation and prevailing breezes; b. maximising the effect of northern winter sun and screening undesirable northern summer sun and western sun; c. reducing demand on non-renewable energy sources for cooling and heating; d. maximising the use of daylight for lighting; e. retaining existing established trees on-site where possible. <p>Note - Further guidance on environmentally sustainable design is available in <i>Subtropical Urban Design in South East Queensland - A Handbook for Planners, Developers and Decision Makers</i>, Centre for Subtropical Design, Brisbane, 2010.</p>	No example provided.
<p>PO23</p> <p>Best practice Water Sensitive Urban Design (WSUD) is incorporated within development sites to mitigate the impacts of stormwater run-off in accordance with Planning scheme policy - Integrated design.</p>	No example provided.
Crime prevention through environmental design	
<p>PO24</p> <p>Development contributes to a safe public realm by incorporating crime prevention through environmental design principles including:</p> <ul style="list-style-type: none"> a. orienting buildings towards the street and public spaces and providing clear sightlines to public spaces to allow opportunities for casual surveillance; b. ensuring the site layout, building design and landscaping does not result in potential concealment or entrapment areas; and c. ensuring high risk areas, including stairwells and concealed car parking areas have adequate surveillance to reduce risk or able to be secured outside of business hours. 	No example provided.

6 Zones

<p>Note - Further information is available in <i>Crime Prevention through Environmental Design: Guidelines for Queensland, State of Queensland, 2007</i>.</p>	
<p>Lighting</p>	
<p>PO25</p> <p>Lighting is designed to provide adequate levels of illumination to public and communal spaces to maximise safety while minimising adverse impacts on sensitive land uses.</p>	<p>No example provided.</p>
<p>Amenity</p>	
<p>PO26</p> <p>The amenity of the area and adjacent sensitive land uses are protected from the impacts of dust, odour, chemicals and other environmental nuisances.</p>	<p>No example provided.</p>
<p>Noise</p>	
<p>PO27</p> <p>Noise generating uses do not adversely affect existing or potential noise sensitive uses.</p> <p>Note - The use of walls, barriers or fences that are visible from or adjoin a road or public area are not appropriate noise attenuation measures unless adjoining a motorway, arterial road or rail line.</p> <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p>	<p>No example provided.</p>
<p>PO28</p> <p>Sensitive land uses are provided with an appropriate acoustic environment within designated external private outdoor living spaces and internal areas while:</p> <ol style="list-style-type: none"> a. contributing to safe and usable public spaces, through maintaining high levels of surveillance of parks, streets and roads that serve active transport purposes (e.g. existing or future pedestrian paths or cycle lanes etc); b. maintaining the amenity of the streetscape. <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p> <p>Note - Refer to Planning Scheme Policy – Integrated design for details and examples of noise attenuation structures.</p>	<p>E28.1</p> <p>Development is designed to meet the criteria outlined in the Planning Scheme Policy – Noise.</p> <p>E28.2</p> <p>Noise attenuation structures (e.g. walls, barriers or fences):</p> <ol style="list-style-type: none"> a. are not visible from an adjoining road or public area unless: <ol style="list-style-type: none"> i. adjoining a motorway or rail line; or ii. adjoining part of an arterial road that does not serve an existing or future active transport purpose (e.g. pedestrian paths or cycle lanes) or where attenuation through building location and materials is not possible.

	<p>b. do not remove existing or prevent future active transport routes or connections to the street network;</p> <p>c. are located, constructed and landscaped in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Refer to Planning scheme policy – Integrated design for details and examples of noise attenuation structures.</p> <p>Note - Refer to Overlay map – Active transport for future active transport routes.</p>
<p>Hazardous Chemicals</p> <p>Note - To assist in demonstrating compliance with the following performance outcomes, a Hazard Assessment Report may be required to be prepared and submitted by a suitably qualified person in accordance with 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.</p> <p>Note - Terms used in this section are defined in 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.</p>	
<p>PO29</p> <p>Off sites risks from foreseeable hazard scenarios involving hazardous chemicals are commensurate with the sensitivity of the surrounding land use zones.</p>	<p>E29.1</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of land zoned for vulnerable or sensitive land uses as described below:</p> <p>Dangerous Dose</p> <p>a. For any hazard scenario involving the release of gases or vapours:</p> <ol style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. <p>b. For any hazard scenario involving fire or explosion:</p> <ol style="list-style-type: none"> i. 7kPa overpressure; ii. 4.7kW/m2 heat radiation. <p>If criteria E29.1 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 0.5 x 10⁻⁶/year.</p> <p>E29.2</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of a commercial or community activity land use zone as described below:</p>

6 Zones

	<p>Dangerous Dose</p> <ul style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ul style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. b. For any hazard scenario involving fire or explosion: <ul style="list-style-type: none"> i. 7kPa overpressure; ii. 4.7kW/m2 heat radiation. <p>If criteria E29.2 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 5×10^{-6}/year.</p> <hr/> <p>E29.3</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of an industrial land use zone as described below:</p> <p>Dangerous Dose</p> <ul style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ul style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. b. For any hazard scenario involving fire or explosion: <ul style="list-style-type: none"> i. 14kPa overpressure; ii. 12.6kW/m2 heat radiation. <p>If criteria E29.3 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 50×10^{-6}/year.</p>
<p>PO30</p> <p>Buildings and package stores containing fire-risk hazardous chemicals are designed to detect the early stages of a fire situation and notify a designated person.</p>	<p>E30</p> <p>Buildings and package stores containing fire-risk hazardous chemicals are provided with 24 hour monitored fire detection system for early detection of a fire event.</p>
<p>PO31</p>	<p>E31</p>

<p>Common storage areas containing packages of flammable and toxic hazardous chemicals are designed with spill containment system(s) that are adequate to contain releases, including fire fighting media.</p>	<p>Storage areas containing packages of flammable and toxic hazardous chemicals are designed with spill containment system(s) capable of containing a minimum of the total aggregate capacity of all packages plus the maximum operating capacity of any fire protection system for the storage area(s) over a minimum of 60 minutes.</p>
<p>PO32</p> <p>Storage and handling areas, including manufacturing areas, containing hazardous chemicals in quantities greater than 2,500L or kg within a Local Government "flood hazard area" are located and designed in a manner to minimise the likelihood of inundation of flood waters from creeks, rivers, lakes or estuaries.</p>	<p>E32.1</p> <p>The base of any tank with a WC >2,500L or kg is higher than any relevant flood height level identified in an area's flood hazard area. Alternatively:</p> <ol style="list-style-type: none"> a. bulk tanks are anchored so they cannot float if submerged or inundated by water; and b. tank openings not provided with a liquid tight seal, i.e. an atmospheric vent, are extended above the relevant flood height level. <p>E32.2</p> <p>The lowest point of any storage area for packages >2,500L or kg is higher than any relevant flood height level identified in an area's flood hazard area. Alternatively, package stores are provided with impervious bund walls or racking systems higher than the relevant flood height level.</p>
<p>Clearing of habitat trees where not located within the Environmental areas overlay map</p>	
<p>PO33</p> <ol style="list-style-type: none"> a. Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected. b. Development does not result in the net loss of fauna habitat. Where development does result in the loss of a habitat tree, development will provide replacement fauna nesting boxes at the following rate of 1 nest box for every hollow removed. Where hollows have not yet formed in trees > 80cm in diameter at 1.3m height, 3 nest boxes are required for every habitat tree removed. c. Development does not result in soil erosion or land degradation or leave land exposed for an unreasonable period of time but is rehabilitated in a timely manner <p>Note: Further guidance on habitat trees is provided in Planning scheme policy - Environmental areas</p>	<p>No example provided.</p>

Works Criteria

AS/NZS2890.1 section 3; or Parking facilities Part 1: Off street car parking; ii. AS 2890.2 - Parking facilities Part 2: Off-street commercial vehicle facilities; iii. Planning scheme policy - Integrated design; iv. Schedule 8 - Service vehicle requirements; c. Where for a State-Controlled road, the Safe Intersection Sight Distance requirements in AustR roads and the appropriate IPWEAQ standard drawings, or a copy of a Transport Infrastructure Act 1994, section 62 approval. <p>E44.2</p> <p>Internal driveways, car parks and access ways are designed and constructed with a sealed pavement and in accordance with:</p> <ol style="list-style-type: none"> a. AS/NZS 2890.1 Parking Facilities Part 1:– Off street car parking; b. AS 2890.2 Parking Facilities Part 2: Off street commercial vehicle facilities; and– c. the relevant standards in Planning scheme policy - Integrated design; and d. Schedule 8 - Service vehicle requirements.

	<p>Note - This includes queue lengths (refer to Schedule 8 - Service vehicle requirements), pavement widths and construction.</p>
	<p>E44.3</p> <p>Access driveways, manoeuvring areas and loading facilities are sealed and provide for service vehicles listed in Schedule 8 - Service vehicle requirements for the relevant use. The on-site manoeuvring is to be in accordance with Schedule 8 - Service vehicle requirements.</p>
	<p>E</p> <p>Landscaping (including shade trees) is provided within car parks in accordance with Planning scheme policy - Integrated design.</p>
<p>PO</p> <p>Sealed and flood free road access during the minor storm event is available to the site from the nearest arterial or sub-arterial road.</p> <p>Editor's Note - Where associated with a State-controlled road, further requirements may apply, and approvals may be required from the Department of Transport and Main Roads.</p>	<p>E</p> <p>Roads or streets giving access to the development from the nearest arterial or sub-arterial road are flood free during the minor storm event and are sealed.</p> <p>Note - The road network is mapped on Overlay Map - Road Hierarchy.</p>
<p>PO</p> <p>Roads which provide access to the site from an arterial or sub-arterial road remain trafficable during major storm events without flooding or impacting upon residential properties or other premises.</p>	<p>E</p> <p>Access roads to the development have sufficient longitudinal and cross drainage to remain safely trafficable during major storm (1% AEP) events.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - Refer to QUDM for requirements regarding trafficability.</p> <p>E</p> <p>Culverts and causeways do not increase inundation levels or increase velocities, for all events up to the defined flood event, to upstream or downstream properties.</p>
<p>Street design and layout</p>	
<p>PO</p> <p>Streets are designed and constructed in accordance with Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures. The street design and construction accommodates the following functions:</p>	<p>No example provided</p>

6 Zones

<ul style="list-style-type: none"> a. access to premises by providing convenient vehicular movement for residents between their homes and the major road network; b. safe and convenient pedestrian and cycle movement; c. adequate on street parking; d. stormwater drainage paths and treatment facilities; e. efficient public transport routes; f. utility services location; g. emergency access and waste collection; h. setting and approach (streetscape, landscaping and street furniture) for adjoining residences; i. expected traffic speeds and volumes; and j. wildlife movement. <p>Note - Preliminary road design (including all services, street lighting, stormwater infrastructure, access locations, street trees and pedestrian network) may be required to demonstrate compliance with this PO.</p> <p>Note - Refer to Planning scheme policy - Environmental areas and corridors for examples of when and where wildlife movement infrastructure is required.</p>	
<p>PO45</p> <p>Upgrade works (whether trunk or non-trunk) are provided where necessary to:-</p> <ul style="list-style-type: none"> a. ensure the type or volume of traffic generated by the development does not have a negative impact on the external road network;- b. ensure the orderly and efficient continuation of the active transport network;- c. ensure the site frontage is constructed to a suitable urban standard generally in accordance with Planning scheme policy - Integrated design. <p>Note - An Integrated Transport Assessment (ITA) may be required to demonstrate compliance with this performance outcome refer to Planning scheme policy - Integrated transport assessment for guidance on when an ITA is required. An ITA should be prepared in accordance with Planning scheme policy - Integrated transport assessment.</p>	<p>E</p> <p>No example provided:</p> <p>New intersections onto existing roads are designed to accommodate traffic volumes and traffic movements taken from a date 10 years from the date of completion of the last stage of the development. Detailed design is to be in accordance with Planning scheme policy - Integrated design.</p> <p>Note - All turns vehicular access to existing lots is to be retained at new road intersections wherever practicable.</p> <p>Note - Existing on-street parking is to be retained at new road intersections and along road frontages wherever practicable.</p> <p>E</p> <p>Existing intersections external to the site are upgraded as necessary to accommodate increased traffic from the development. Design is in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p>

Note -- The road network is mapped on Overlay map -- Road hierarchy:

Note -- The primary and secondary active transport network is mapped on Overlay map -- Active transport

Note -- To demonstrate compliance with c. of this performance outcome, site frontage works where in existing road reserve (non-trunk) are to be designed and constructed as follows:

- i. Where the street is partially established to an urban standard; match the alignment of existing kerb and channel and provide carriageway widening and underground drainage where required; or
- ii. Where the street is not established to an urban standard; prepare a design that demonstrates how the relevant features of the particular road as shown in the Planning scheme policy -- Integrated Design can be achieved in the existing reserve:

Note -- Refer to Planning scheme policy -- Integrated design for road network and active transport network design standards:

The existing road network (whether trunk or non-trunk) is upgraded where necessary to cater for the impact from the development.

Note - An applicant will be required to submit an Integrated Transport Assessment (ITA), prepared in accordance with Planning scheme policy - Integrated transport assessment to demonstrate compliance with this PO, when any of the following occurs;

- development is within 200m of a transport sensitive location such as a school, shopping centre, bus or train station or a large generator of pedestrian or vehicular traffic;
- forecast traffic to/from the development exceeds 5% of the two way flow on the adjoining road or intersection in the morning or afternoon transport peak within 10 years of the development completion;
- Development access onto a sub arterial, or arterial road or within 100m of a signalised intersection;
- Residential development greater than 50 lots or dwellings;
- Offices greater than 4,000m² Gross Floor Area (GFA);
- Retail activities including Hardware and trade supplies;
- Showroom, Shop or Shopping centre greater than 1,000m² GFA;
- Warehouses and Industry greater than 6000m² GFA;
- On-site carpark greater than 100 spaces;
- Development has a trip generation rate of 100 vehicles or more within the peak hour;
- Development which dissects or significantly impacts on an environmental area or an environmental corridor.

Note - All turns vehicular access to existing lots is to be retained at new road intersections wherever practicable.

Note - Existing on-street parking is to be retained at upgraded road intersections and along road frontages wherever practicable.

E

The active transport network is extended in accordance with Planning scheme policy - Integrated design.

6 Zones

<p>The ITA is to review the development's impact upon the external road network for the period of 10 years from completion of the development. The ITA is to provide sufficient information for determining the impact and the type and extent of any ameliorative works required to cater for the additional traffic. The ITA must include a future structural road layout of adjoining properties that will form part of this catchment and road connecting to these properties. The ITA is to assess the ultimate developed catchment's impacts and necessary ameliorative works, and the works or contribution required by the applicant as identified in the study.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - The primary and secondary active transport network is mapped on Overlay map - Active transport.</p>	
<p>PO</p> <p>Intersections along all streets and roads are located and designed to provide safe and convenient movements for all users.</p>	<p>E</p> <p>Intersections are designed and constructed in accordance with Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p> <p>E</p> <p>Intersection spacing (centreline – centreline) along a through road conforms with the following:</p> <ol style="list-style-type: none"> a. where the through road provides an access function: <ol style="list-style-type: none"> i. intersecting road located on the same side = 60 metres; ii. intersecting road located on opposite side (Left Right Stagger) = 60 metres; iii. intersecting road located on opposite side (Right Left Stagger) = 40 metres. b. Where the through road provides a collector or sub-arterial function: <ol style="list-style-type: none"> i. intersecting road located on the same side = 100 metres; ii. intersecting road located on opposite side (Left Right Stagger) = 100 metres; iii. intersecting road located on opposite side (Right Left Stagger) = 60 metres. c. Where the through road provides an arterial function: <ol style="list-style-type: none"> i. intersecting road located on the same side = 300 metres;

	<p>ii. intersecting road located on opposite side (Left Right Stagger) = 300 metres;</p> <p>iii. intersecting road located on opposite side (Right Left Stagger) = 300 metres;</p> <p>d. Walkable block perimeter does not exceed 1000 metres.</p> <p>Note - Based on the absolute minimum intersection spacing identified above, all turns access may not be permitted (ie. left in/left out only) at intersections with sub-arterial roads or arterial roads.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - An Integrated Transport Assessment (ITA) including preliminary intersection designs, prepared in accordance with Planning scheme policy - Integrated transport assessment may be required to demonstrate compliance with this PO. Intersection spacing will be determined based on the deceleration and queue storage distances required for the intersection after considering vehicle speed and present/forecast turning and through volumes.</p>								
<p>PO</p> <p>All Council controlled frontage roads are designed and constructed in accordance with Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures. Stormwater	
<p>PO</p> <p>Minor stormwater drainage systems (internal and external) have the capacity to convey stormwater flows from frequent storm events for the fully developed upstream catchment whilst ensuring pedestrian and vehicular traffic movements are safe and convenient.</p>	<p>E</p> <p>The capacity of all minor drainage systems are designed in accordance with Planning scheme policy - Integrated design.</p>
	<p>E</p> <p>Stormwater pipe network capacity is to be calculated in accordance with the Hydraulic Grade Line method as detailed in Australian Rainfall and Runoff or QUDM.</p>
	<p>E</p> <p>Development ensures that roof and allotment drainage infrastructure is provided in accordance with the relevant level as identified in QUDM.</p>
<p>PO</p> <p>Major stormwater drainage system(s) have the capacity to safely convey stormwater flows for the 1% AEP event for the fully developed upstream catchment.</p>	<p>E</p> <p>The internal drainage system safely and adequately conveys the stormwater flows for the 1% AEP event for the fully developed upstream catchment through the site.</p>
	<p>E</p> <p>The external (downstream) drainage system safely conveys the stormwater flows for the 1% AEP event for the fully developed upstream catchment without allowing the flows to encroach upon private lots.</p>
	<p>E</p>

	<p>Overland flow paths from roads and public open space areas do not pass through private lots. Drainage pathways are provided to accommodate overland flows from roads and public open space areas.</p>
<p>PO</p> <p>Provide measures to properly manage surface flows for the 1% AEP event (for the fully developed catchment) draining to and through the land to ensure no actionable nuisance is created to any person or premises as a result of the development. The development must not result in ponding on adjacent land, redirection of surface flows to other premises or blockage of a surface flow relief path for flows exceeding the design flows for any underground system within the development.</p>	<p>E</p> <p>The flow velocity in all unlined or soft faced open drains is kept within acceptable limits for the type of material or lining and condition of the channel.</p> <p>Note - Refer to QUDM for recommended average flow velocities.</p>
<p>PO46</p> <p>Stormwater run-off from the site is conveyed to a point of lawful discharge without causing actionable nuisance or annoyance to any person, property or premises.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details.</p> <p>Note - A downstream drainage discharge report in accordance with Planning scheme policy - Stormwater management may be required to demonstrate achievement of this performance outcome.</p> <p>Note - A watercourse as defined in the Water Act may be accepted as a lawful point of discharge providing the drainage discharge from the site does not increase the downstream flood levels during events up to and including the 1% AEP storm. An afflux of +20mm may be accepted on Council controlled land and road infrastructure. No worsening is ensured when stormwater is discharged into a catchment that includes State Transport Infrastructure.</p>	<p>No example provided.</p>
<p>PO47</p> <p>Stormwater generated from the development does not compromise the capacity of existing stormwater infrastructure downstream of the site.</p> <p>Note - A downstream drainage discharge report in accordance with Planning scheme policy - Stormwater management may be required to demonstrate achievement of this performance outcome.</p>	<p>No example provided.</p>

6 Zones

<p>PO48</p> <p>Stormwater quality management systems are designed and constructed to minimise the environmental impact of stormwater discharge on surface and underground receiving water quality and meet the design objectives in Tables A and B in Appendix 2 of the SPP.</p> <p>Note – A stormwater management plan prepared by a suitably qualified professional will be required in accordance with Planning scheme policy – Stormwater management.</p> <p>Where development:</p> <ol style="list-style-type: none"> is for an urban purpose that involves a land area 2500m² or greater in size; and results in 6 or more dwellings; or results in an impervious area greater than 25% of the net developable area, <p>stormwater quality management systems are designed, constructed, established and maintained to minimise the environmental impact of stormwater on surface, groundwater and receiving water environments and meet the design objectives outlined in Schedule 10 - Stormwater management design objectives.</p> <p>Note - A site based stormwater management plan prepared by a suitably qualified professional will be required in accordance with Planning Scheme Policy - Stormwater Management. Stormwater quality infrastructure is to be design in accordance with Planning scheme policy - Integrated Design (Appendix C).</p>	<p>No example provided.</p>						
<p>PO49</p> <p>Easements for drainage purposes are provided over:</p> <ol style="list-style-type: none"> stormwater pipes located in freehold land if the pipe diameter exceeds 300mm; overland flow paths where they cross more than one property boundary. <p>Note – Refer to Planning scheme policy – Integrated design for details:</p> <p>Note – Stormwater Drainage easement dimensions are provided in accordance with Section 3.8.5 of QUDM:</p> <p>Stormwater drainage pipes and structures through or within private land (including inter-allotment drainage) are protected by easements in favour of Council with sufficient area for practical access for maintenance purposes.</p>	<p>E</p> <p>No example provided:</p> <p>Stormwater drainage infrastructure (excluding detention and bio-retention systems) through or within private land (including inter-allotment drainage) is protected by easements in favour of Council. Minimum easement widths are as follows:</p> <table border="1" data-bbox="810 1664 1465 2033"> <thead> <tr> <th>Pipe Diameter</th> <th>Minimum easement width (excluding access requirements)</th> </tr> </thead> <tbody> <tr> <td>Stormwater pipe up to 825mm diameter</td> <td>3.0m</td> </tr> <tr> <td>Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter</td> <td>4.0m</td> </tr> </tbody> </table>	Pipe Diameter	Minimum easement width (excluding access requirements)	Stormwater pipe up to 825mm diameter	3.0m	Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter	4.0m
Pipe Diameter	Minimum easement width (excluding access requirements)						
Stormwater pipe up to 825mm diameter	3.0m						
Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter	4.0m						

<p>Note - In order to achieve a lawful point of discharge, stormwater easements may also be required over temporary drainage channels/infrastructure where stormwater discharges to a balance lot prior to entering Council's stormwater drainage system.</p>	<table border="1" data-bbox="810 203 1471 356"> <tr> <td data-bbox="818 217 1137 277">Stormwater pipe greater than 825mm diameter</td> <td data-bbox="1145 217 1465 342">Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).</td> </tr> </table> <p>Note - Additional easement width may be required in certain circumstances in order to facilitate maintenance access to the stormwater system.</p> <p>Note - Refer to Planning Scheme Policy - Integrated Design (Appendix C) for easement requirements over open channels.</p>	Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).
Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).		
<p>PO</p> <p>Stormwater management facilities (excluding outlets) are located outside of riparian areas and prevent increased channel bed and bank erosion.</p>	<p>E</p> <p>No example provided.</p>		
<p>PO</p> <p>Council is provided with accurate representations of the completed stormwater management works within residential developments.</p>	<p>E</p> <p>"As Built" drawings and specifications of the stormwater management devices certified by an RPEQ is provided.</p> <p>Note - Documentation is to include:</p> <ol style="list-style-type: none"> photographic evidence and inspection date of the installation of approved underdrainage; copy of the bioretention filter media delivery dockets/quality certificates confirming the materials comply with specifications in the approved Stormwater Management Plan; date of the final inspection. 		

Site works and construction management	
<p>PO50</p> <p>The site and any existing structures are maintained in a tidy and safe condition.</p>	<p>No example provided.</p>
<p>PO51</p> <p>All works on-site are managed to:</p> <ol style="list-style-type: none"> minimise as far as practicable, impacts on adjoining or adjacent premises and the streetscape in regard to erosion and sedimentation, dust, noise, safety and light; minimise as far as possible, impacts on the natural environment; ensure stormwater discharge is managed in a manner that does not cause actionable nuisance or annoyance to any person or premises; 	<p>E51.1</p> <p>Works incorporate temporary stormwater runoff, erosion and sediment controls and trash traps removal devices designed in accordance with the Urban Stormwater Quality Planning Guidelines, State Planning Policy, Schedule 10 - Stormwater management design objectives, Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design, including but not limited to the following:</p> <ol style="list-style-type: none"> stormwater is not discharged to adjacent properties in a manner that differs significantly from pre-existing conditions;

6 Zones

<p>d. avoid adverse impacts on street trees and their critical root zone.</p>	<p>b. stormwater discharged to adjoining and downstream properties does not cause scour and or erosion of any kind;</p> <p>c. stormwater discharge rates do not exceed pre-existing conditions;</p> <p>d. the 10% AEP storm event is the minimum design storm for all temporary diversion drains; and</p> <p>e. the 50% AEP storm event is the minimum design storm for all silt barriers and sedimentation basins.</p> <p>f. minimum design storm for all temporary diversion drains and sedimentation basins in accordance with Schedule 10 - Stormwater management design objectives;</p> <p>g. ponding or concentration of stormwater does not occur in adjoining properties.</p> <p>E51.2</p> <p>Stormwater runoff, erosion and sediment controls are constructed in accordance with Planning scheme policy - Integrated design (Appendix C) prior to commencement of any clearing or earthworks and are maintained and adjusted as necessary at all times to ensure their ongoing effectiveness.</p> <p>Note - The measures are adjusted on-site to maximise their effectiveness.</p> <p>E51.3</p> <p>The completed earthworks area is stabilised using turf, established grass seeding, mulch or sprayed stabilisation techniques to control erosion and sediment and dust from leaving the property.</p> <p>E51.4</p> <p>Where works are proposed in proximity to an existing street tree, an inspection and a root management plan is undertaken by a qualified arborist which demonstrates and ensures that no permanent damage is caused to the tree.</p> <p>Existing street trees are protected and not damaged during works.</p> <p>Note - Where development occurs in the tree protection zone, measures and techniques as detailed in Australian Standard AS 4970 Protection of trees on development sites are adopted and implemented.</p>
<p>PO52</p>	<p>E52</p>

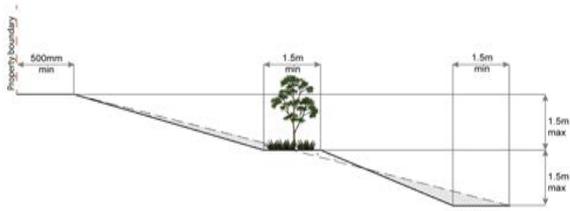

<p>Dust suppression measures are implemented during soil disturbances and construction works to protect nearby premises from unreasonable dust impacts.</p>	<p>No dust emissions extend beyond the boundaries of the site during soil disturbances and construction works.</p>
<p>PO53</p> <p>All development works on-site and including the transportation of material to and from the site are managed to not negatively impact the existing road network, the amenity of the surrounding area or the streetscape.</p> <p>Note – Where the amount of imported or exported material is greater than 50m³, a haulage route must be identified and approved by Council.</p> <p>Note - A Traffic Management Plan may be required to demonstrate compliance with this PO. A Traffic Management Plan is to be prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD).</p> <p>Note - A haulage route must be identified and approved by Council where imported or exported material is transported to the site via a road of Local Collector standard or less, and:</p> <ol style="list-style-type: none"> the aggregate volume of imported or exported material is greater than 1000m³; or the aggregate volume of imported or exported material is greater than 200m³ per day; or the proposed haulage route involves a vulnerable land use or shopping centre. <p>Note - A dilapidation report (including photographs) may be required for the haulage route to demonstrate compliance with this PO.</p> <p>Editor's note - Where associated with a State-controlled road, further requirements may apply, and approval may be required from the Department of Transport and Main Roads.</p>	<p>E53.1</p> <p>Construction traffic including contractor car parking is controlled in accordance with a traffic management plan, prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) to ensure all traffic movements to and from the site are safe.</p> <p>E53.2</p> <p>All contractor car parking is either provided on the development site, or on an alternative site in the general locality which has been set aside for car parking. Contractors vehicles are generally not to be parked in existing roads.</p> <p>Note – A Traffic Management Plan may be required for the site in accordance with the Manual of Uniform Traffic Control Devices (MUTCD).</p> <p>E53.3</p> <p>Any material dropped, deposited or spilled on the road(s) as a result of construction processes associated with the site are to be cleaned at all times.</p> <p>E</p> <p>Construction traffic to and from the development site uses the highest classification streets or roads where a choice of access routes is available. Haul routes for the transport of imported or spoil material and gravel pavement material along Council roads below sub-arterial standard must be approved routes.</p> <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p> <p>Note - A dilapidation report may be required to demonstrate compliance with this E.</p> <p>E</p> <p>Where works are carried out in existing roads, the works must be undertaken so that the existing roads are maintained in a safe and useable condition. Practical access for residents, visitors and services (including postal deliveries and refuse collection) is retained to existing lots during the construction period and after completion of the works.</p>

6 Zones

	<p>Note - A traffic control plan prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) will be required for any works that will affect access, traffic movements or traffic safety in existing roads.</p>
<p>PO54</p> <p>All disturbed areas are to be progressively stabilised during construction and the entire site rehabilitated and substantially stabilised at the completion of construction.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details.</p>	<p>E</p> <p>Access to the development site is obtained via an existing lawful access point.</p> <p>E54</p> <p>At completion of construction all disturbed areas of the site are to be:</p> <ol style="list-style-type: none"> topsoiled with a minimum compacted thickness of fifty (50) millimetres; grassed stabilised using turf, established grass seeding, mulch or sprayed stabilisation techniques. <p>Note - These areas are to be maintained during any maintenance period to maximise grass coverage from grass seeding of these areas:</p>
<p>PO</p> <p>Earthworks are undertaken to ensure that soil disturbances are staged into manageable areas.</p> <p>Note - A site specific Erosion and Sediment Control Plan (ESCP) will be required to demonstrate compliance with this PO. An ECP is to be prepared in accordance with Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design (Appendix C).</p>	<p>E</p> <p>Soil disturbances are staged into manageable areas of not greater than 3.5 ha.</p>
<p>PO55</p> <p>The clearing of vegetation on-site:</p> <ol style="list-style-type: none"> is limited to the area of infrastructure works, building areas and other necessary areas for the works; and includes the removal of declared weeds and other materials which are detrimental to the intended use of the land; is disposed of in a manner which minimises nuisance and annoyance to existing premises. <p>Note - No burning of cleared vegetation is permitted.</p>	<p>E55.1</p> <p>All native vegetation to be retained on-site is temporarily fenced or protected prior to and during development works.</p> <p>Note - No parking of vehicles of or storage of machinery or goods is to occur in these areas during development works.</p> <p>E55.2</p> <p>Disposal of materials is managed in one or more of the following ways:</p>

	<p>a. all cleared vegetation, declared weeds, stumps, rubbish, car bodies, scrap metal and the like are removed and disposed of in a Council land fill facility; or</p> <p>b. all native vegetation with a diameter below 400mm is to be chipped and stored on-site.</p> <p>Note - The chipped vegetation must be stored in an approved location; preferably a park or public land.</p>
<p>PO</p> <p>All development works are carried out at times which minimise noise impacts to residents.</p>	<p>E</p> <p>All development works are carried out within the following times:</p> <p>a. Monday to Saturday (other than public holidays) between 6:30am and 6:30pm on the same day;</p> <p>b. no work is to be carried out on Sundays or public holidays.</p> <p>Note - Work outside the above hours may be approved (in writing) where it can be demonstrated that the work will not cause significant inconvenience or disruption to the public, or the work is unlikely to cause annoyance or inconvenience to occupants of adjacent properties.</p>
<p>PO56</p> <p>Any alteration or relocation in connection with or arising from the development to any service, installation, plant, equipment or other item belonging to or under the control of the telecommunications authority, electricity authorities, the Council or other person engaged in the provision of public utility services is to be carried with the development and at no cost to Council.</p>	<p>No example provided.</p>
Earthworks	
<p>PO57</p> <p>On-site earthworks are designed to consider the visual and amenity impact as they relate to:</p> <p>a. the natural topographical features of the site;</p> <p>b. short and long-term slope stability;</p> <p>c. soft or compressible foundation soils;</p> <p>d. reactive soils;</p> <p>e. low density or potentially collapsing soils;</p>	<p>E57.1</p> <p>All cut and fill batters are provided with appropriate scour, erosion protection and run-off control measures including catch drains at the top of batters and lined batter drains as necessary.</p>
	<p>E57.2</p> <p>Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance of steep rock slopes and batters.</p>
	<p>E57.3</p>

6 Zones

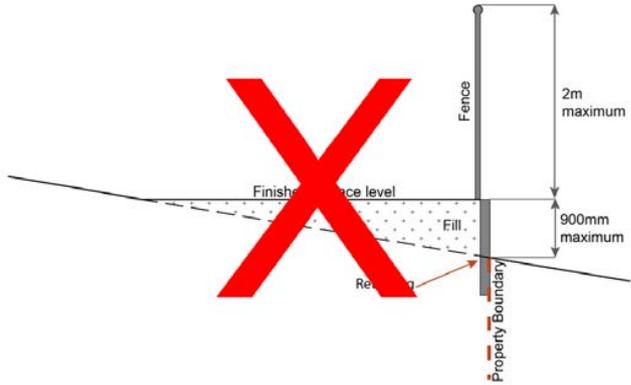

<p>f. existing fill and soil contamination that may exist on-site;</p> <p>g. the stability and maintenance of steep reek slopes and batters;</p> <p>h. excavation (cut) and fill and impacts on the amenity of adjoining lots (e.g. residential).</p> <p>Note – Filling or excavation works are to be completed within six months of the commencement date.</p>	<p>Inspection and certification of steep reek slopes and batters is required by a suitably qualified and experienced RPEQ.</p> <p>E57.4</p> <p>All filling or excavation is contained on-site and is free draining.</p> <p>E57.5</p> <p>All fill placed on-site is:</p> <p>a. limited to that area required for the necessary for the approved use;</p> <p>b. clean and uncontaminated (i.e. no building waste, concrete, green waste, actual acid sulfate soils, potential acid sulfate soils or contaminated material etc.) material is used as fill).</p> <p>E57.6</p> <p>The site is prepared and the fill placed on-site in accordance with AS3798.</p> <p>Note - The fill is to be inspected and tested in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p>
<p>PO58</p> <p>Embankments are stepped, terraced and landscaped to not adversely impact on the visual amenity of the surrounding area.</p>	<p>E58</p> <p>Any embankments more than 1.5 metres in height are stepped, terraced and landscaped.</p> <p style="text-align: center;">Figure - Embankment</p> 
<p>PO59</p> <p>Filling or excavation is undertaken in a manner that:</p>	<p>E59.1</p> <p>No filling or excavation is undertaken in an easement issued in favour of Council or a public sector entity.</p>

<p>a. does not adversely impact on a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land;</p> <p>b. does not preclude reasonable access to a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p>	<p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p> <p>E59.2</p> <p>Filling or excavation that would result in any of the following is not carried out on-site:</p> <p>a. a reduction in cover over any Council or public sector entity infrastructure service to less than 600mm;</p> <p>b. an increase in finished surface grade over, or within 1.5m on each side of, the Council or public sector entity infrastructure above that which existed prior to the earthworks being undertaken;</p> <p>c. prevent reasonable access to Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the site for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity as is defined in the Sustainable Planning Schedule 2 of the Act 2009.</p>
<p>PO60</p> <p>Filling or excavation does not result in land instability.</p> <p>Note - Steep rock slopes and batters are inspected and certified for long-term stability by a suitably qualified and experienced geotechnical engineer with RPEQ qualifications. Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance.</p>	<p>No example provided.</p>
<p>PO61</p> <p>Development Filling or excavation does not result in:</p> <p>a. adverse impacts on the hydrological and hydraulic capacity of the waterway or floodway;</p> <p>b. increased flood inundation outside the site;</p> <p>c. any reduction in the flood storage capacity in the floodway;</p> <p>d. and any clearing of native vegetation.</p> <p>Note - To demonstrate compliance with this outcome, Planning Scheme Policy - Stormwater Management provides guidance on the preparation of a site based stormwater management plan by a suitably qualified professional. Refer to Planning scheme policy - Integrated design for guidance on infrastructure design and modelling requirements.</p>	<p>No example provided.</p>
<p>PO</p>	<p>E</p> <p>Filling and excavation undertaken on the development site are shaped in a manner which does not:</p>

6 Zones

<p>Filling or excavation on the development site is undertaken in a manner which does not create or accentuate problems associated with stormwater flows and drainage systems on land adjoining the site.</p>	<ol style="list-style-type: none"> a. prevent stormwater surface flow which, prior to commencement of the earthworks, passed onto the development site, from entering the land; or b. redirect stormwater surface flow away from existing flow paths; or c. divert stormwater surface flow onto adjacent land, (other than a road), in a manner which: <ol style="list-style-type: none"> i. concentrates the flow; or ii. increases the flow rates of stormwater over the affected section of the adjacent land above the situation which existed prior to the diversion; or iii. causes actionable nuisance to any person, property or premises.
---	---

Retaining walls and structures

<p>PO62</p> <p>All earth retaining structures provide a positive interface with the streetscape and minimise impacts on the amenity of adjoining residents.</p> <p>Note - Refer to Planning scheme policy - Residential design for guidance on how to achieve compliance with this performance outcome.</p>	<p>E62</p> <p>Earth-retaining structures:-</p> <ol style="list-style-type: none"> a. are not constructed of boulder rocks or timber; b. where height is no greater than 900mm, are provided in accordance with Figure - Retaining on a boundary; <p style="text-align: center;">Figure - Retaining on boundary</p>  <ol style="list-style-type: none"> c. where height is greater than 900mm but no greater than 1.5m, are to be setback at least the equivalent height of the retaining structure from any property boundary; d. where height is greater than 1.5m, are to be setback and stepped 1.5m vertical: 1.5m horizontal; terraced, landscaped and drained as shown below. <p style="text-align: center;">Figure - Gut</p>
--	---

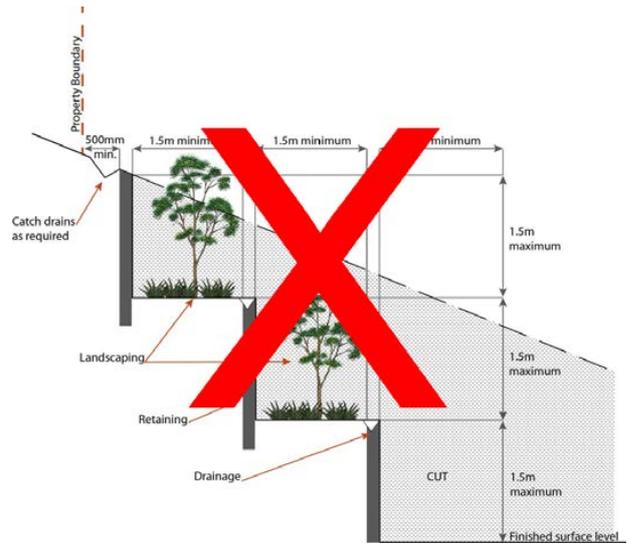

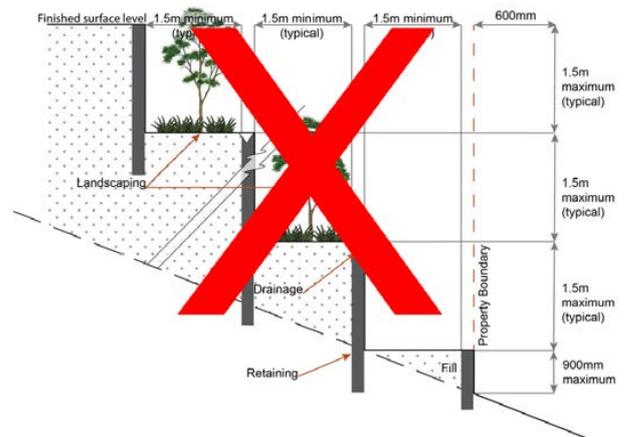

Figure--Fill

Filling or excavation does not:

- a. **involve a change in level of more than 1.0m relative to natural ground level;**

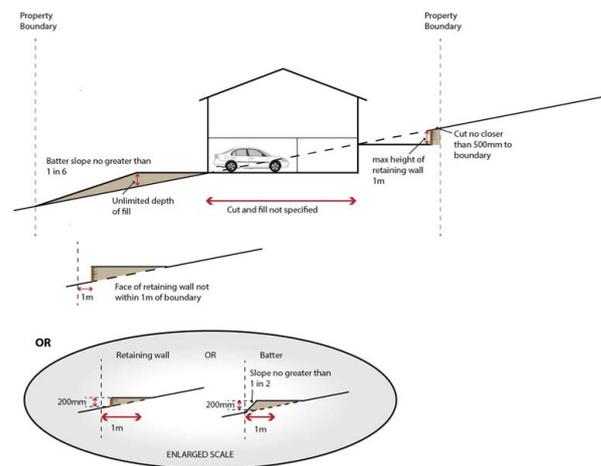

OR

- result in a batter greater than 1V to 6H;**
- b. **necessitate the construction of a freestanding retaining wall exceeding 1.0m in height relative to finished ground level;**

- c. result in the top of any cut batter, or the exposed face of any freestanding retaining wall supporting that cut, being closer than 500mm to a property boundary;
- d. result in the toe of any fill batter, or exposed face of any freestanding retaining wall supporting that fill, being closer than 1.0m to a property boundary unless:
 - i. the depth of fill within the 1.0m strip does not exceed 200mm relative to natural ground level; or
 - ii. the batter slope within that 1.0m strip is no steeper than 1V to 2H.

THE NEW FIGURE BELOW IS PROPOSED AS PART OF THIS AMENDMENT

Figure - Filling or Excavation

PO

All earth retaining structures are to be certified as being designed and constructed in accordance with relevant Australian Standards and Building Code requirements.

E

Retaining walls are designed and certified by a RPEQ so that:

- a. the minimum design life (the period assumed in design for which a structure or structural element is required to perform its intended purpose without replacement or major structural repairs) for the earth retaining structure is that specified in Australian Standard AS 4678 Earth-retaining structures;
- b. earth retaining structures within the land and around areas of cut on or near the boundaries of the site must be designed to allow for live and dead loads associated with the land/premise's current occupancy and use;

	<p>c. where the adjoining land use rights or zoning allows for industrial uses a minimum live load of 25kPA must be allowed in the design of the retaining structure for these adjoining premises.</p> <p>Note - Retaining walls will only be approved following submission of a full detailed design certified by a RPEQ.</p>
--	--

Fire Services

Note - The provisions under this heading only apply if:

- a. the development is for, or incorporates:
- reconfiguring a lot for a community title scheme creating 1 or more vacant lots; or
 - material change of use for 2 or more sole occupancy units on the same lot, or within the same community titles scheme; or
 - material change of use for a Tourist park⁽⁸⁴⁾ with accommodation in the form of caravans or tents; or
 - material change of use for outdoor sales⁽⁵⁴⁾, outdoor processing or outdoor storage where involving combustible materials.

AND

- b. none of the following exceptions apply:
- the distributor-retailer for the area has indicated, in its netserv plan, that the premises will not be served by that entity's reticulated water supply; or
 - every part of the development site is within 60m walking distance of an existing fire hydrant on the distributor-retailer's reticulated water supply network, measured around all obstructions, either on or adjacent to the site.

Note - The provisions under this heading do not apply to buildings that are required by the Building Code of Australia to have a fire hydrant system complying with Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations or other fire fighting facilities which provide equivalent protection.

PO63

Development incorporates a fire fighting system that:

- satisfies the reasonable needs of the fire fighting entity for the area;
- is appropriate for the size, shape and topography of the development and its surrounds;
- is compatible with the operational equipment available to the fire fighting entity for the area;
- considers the fire hazard inherent in the materials comprising the development and their proximity to one another;
- considers the fire hazard inherent in the surrounds to the development site;
- is maintained in effective operating order.

Note - The Queensland Fire and Emergency Services is the entity currently providing the fire fighting function for the urban areas of the Moreton Bay Region.

E63.1

External fire hydrant facilities are provided on site to the standard prescribed under the relevant parts of *Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations*.

Note - For this requirement for accepted development, the following are the relevant parts of AS 2419.1 (2005) that may be applicable:

- in regard to the form of any fire hydrant - Part 8.5 and Part 3.2.2.1, with the exception that for Tourist parks⁽⁸⁴⁾ or development comprised solely of dwellings and their associated outbuildings, single outlet above-ground hydrants or suitably signposted in-ground hydrants would be an acceptable alternative;
- in regard to the general locational requirements for fire hydrants - Part 3.2.2.2 (a), (e), (f), (g) and (h) as well as Appendix B of AS 2419.1 (2005);
- in regard to the proximity of hydrants to buildings and other facilities - Part 3.2.2.2 (b), (c) and (d), with the exception that:
 - for dwellings and their associated outbuildings, hydrant coverage need only extend to the roof and external walls of those buildings;
 - for caravans and tents, hydrant coverage need only extend to the roof of those tents and caravans;
 - for outdoor sales⁽⁵⁴⁾, processing or storage facilities, hydrant coverage is required across the entire area of

6 Zones

	<p>the outdoor sales⁽⁵⁴⁾, outdoor processing and outdoor storage facilities;</p> <p>d. in regard to fire hydrant accessibility and clearance requirements - Part 3.5 and, where applicable, Part 3.6.</p> <hr/> <p>E63.2</p> <p>A continuous path of travel having the following characteristics is provided between the vehicle access point to the site and each external fire hydrant and hydrant booster point on the land:</p> <ol style="list-style-type: none"> a. an unobstructed width of no less than 3.5m; b. an unobstructed height of no less than 4.8m; c. constructed to be readily traversed by a 17 tonne HRV fire brigade pumping appliance; d. an area for a fire brigade pumping appliance to stand within 20m of each fire hydrant and 8m of each hydrant booster point. <hr/> <p>E63.3</p> <p>On-site fire hydrant facilities are maintained in effective operating order in a manner prescribed in <i>Australian Standard AS1851 (2012) – Routine service of fire protection systems and equipment</i>.</p>
<p>PO64</p> <p>On-site fire hydrants that are external to buildings, as well as the available fire fighting appliance access routes to those hydrants, can be readily identified at all times from, or at, the vehicular entry point to the development site.</p>	<p>E64</p> <p>For development that contains on-site fire hydrants external to buildings:</p> <ol style="list-style-type: none"> a. those external hydrants can be seen from the vehicular entry point to the site; or b. a sign identifying the following is provided at the vehicular entry point to the site: <ol style="list-style-type: none"> i. the overall layout of the development (to scale); ii. internal road names (where used); iii. all communal facilities (where provided); iv. the reception area and on-site manager’s office (where provided); v. external hydrants and hydrant booster points; vi. physical constraints within the internal roadway system which would restrict access by fire fighting appliances to external hydrants and hydrant booster points. <p>Note - The sign prescribed above, and the graphics used are to be:</p>

	<p>a. in a form;</p> <p>b. of a size;</p> <p>c. illuminated to a level;</p> <p>which allows the information on the sign to be readily understood, at all times, by a person in a fire fighting appliance up to 4.5m from the sign.</p>
<p>PO65</p> <p>Each on-site fire hydrant that is external to a building is signposted in a way that enables it to be readily identified at all times by the occupants of any firefighting appliance traversing the development site.</p>	<p>E65</p> <p>For development that contains on-site fire hydrants external to buildings, those hydrants are identified by way of marker posts and raised reflective pavement markers in the manner prescribed in the technical note <i>Fire hydrant indication system</i> produced by the Queensland Department of Transport and Main Roads.</p> <p>Note - Technical note Fire hydrant indication system is available on the website of the Queensland Department of Transport and Main Roads.</p>
Use specific criteria	
Home based business⁽³⁵⁾	
<p>PO66</p> <p>The scale and intensity of the Home based business⁽³⁵⁾:</p> <p>a. is compatible with the physical characteristics of the site and the character of the local area;</p> <p>b. is able to accommodate anticipated car parking demand without negatively impacting the streetscape or road safety;</p> <p>c. does not adversely impact on the amenity of the adjoining and nearby premises;</p> <p>d. remains ancillary to the residential use of the dwelling house⁽²²⁾;</p> <p>e. does not create conditions which cause hazards or nuisances to neighbours or other persons not associated with the activity;</p> <p>f. ensures employees and visitors to the site do not negatively impact the expected amenity of adjoining properties.</p>	<p>E66.1</p> <p>A maximum of 1 employee (not a resident) OR 2 customers OR customers from within 1 Small rigid vehicle (SRV) or smaller are permitted on the site at any one time.</p> <p>E66.2</p> <p>The home based business⁽³⁵⁾ occupies an area of the existing dwelling or on-site structure not greater than 40m² gross floor area.</p>
Major electricity infrastructure⁽⁴³⁾, Substation⁽⁸⁰⁾ and Utility installation⁽⁸⁶⁾	
PO67	E67.1

6 Zones

<p>The development does not have an adverse impact on the visual amenity of a locality and is:</p> <ol style="list-style-type: none"> high quality design and construction; visually integrated with the surrounding area; not visually dominant or intrusive; located behind the main building line; below the level of the predominant tree canopy or the level of the surrounding buildings and structures; camouflaged through the use of colours and materials which blend into the landscape; treated to eliminate glare and reflectivity; landscaped; otherwise consistent with the amenity and character of the zone and surrounding area. 	<p>Development is designed to minimise surrounding land use conflicts by ensuring infrastructure, buildings, structures and other equipment:</p> <ol style="list-style-type: none"> are enclosed within buildings or structures; are located behind the main building line; have a similar height, bulk and scale to the surrounding fabric; have horizontal and vertical articulation applied to all exterior walls.
<p>PO68</p>	<p>E67.2</p>
<p>Infrastructure does not have an impact on pedestrian health and safety.</p>	<p>A minimum 3m wide strip of dense planting is provided around the outside of the fenced area, between the development and street frontage, side and rear boundaries.</p> <p>E68</p> <p>Access control arrangements:</p> <ol style="list-style-type: none"> do not create dead-ends or dark alleyways adjacent to the infrastructure; minimise the number and width of crossovers and entry points; provide safe vehicular access to the site; do not utilise barbed wire or razor wire.
<p>PO69</p>	<p>E69</p>
<p>All activities associated with the development occur within an environment incorporating sufficient controls to ensure the facility:</p> <ol style="list-style-type: none"> generates no audible sound at the site boundaries where in a residential setting; or meet the objectives as set out in the Environmental Protection (Noise) Policy 2008. 	<p>All equipment which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure noise emissions meet the objectives as set out in the Environmental Protection (Noise) Policy 2008.</p>
<p>Residential uses</p>	
<p>PO70</p>	<p>No example provided.</p>
<p>Residential uses contribute to greater housing choice and affordability by:</p> <ol style="list-style-type: none"> contributing to the availability of a range of dwelling types and sizes in the centre; providing greater housing density within the walkable catchment distance of the Strathpine centre and Strathpine and Bray Park rail stations making efficient use of land. <p>Note - The Queensland Government <i>Transit oriented development guide</i> provides further guidance on achieving residential densities within proximity of transit services.</p>	

PO71

Caretaker's accommodation⁽¹⁰⁾ and Dwelling units⁽²³⁾ are provided with adequate functional and attractive private open space that is:

- a. directly accessible from the dwelling and is located so that residents and neighbouring uses experience a suitable level of amenity;
- b. designed and constructed to achieve adequate privacy for occupants from other dwelling units⁽²³⁾ and centre uses;
- c. accessible and readily identifiable for residents, visitors and emergency services⁽²⁵⁾;
- d. located to not compromise active frontages.

E71

A dwelling has a clearly defined, private outdoor living space that is:

- a. as per the table below;

Use	Minimum Area	Minimum Dimension in all directions
Ground level floor dwellings		
All dwelling types	16m ²	4m
Above ground level floor dwellings		
1 bedroom or studio	8m ²	2.5m
2 or more bedrooms	12m ²	3.0m

- b. accessed from a living area;
- c. sufficiently screened or elevated for privacy;
- d. ground level floor open space is located behind the main building line and not within the primary or secondary frontage setbacks;
- e. balconies orientate to the street;
- f. clear of any non-recreational structure (including but not limited to air-conditioning units, water tanks, clothes drying facilities, storage structures, retaining structures and refuse storage areas).

Note - Areas for clothes drying are not visible from street frontages or public areas (e.g. Separate clothes drying areas are provided that are oriented to the side or rear of the site or screening is provided).

Note - External fixed or movable screening, opaque glass and window tinting are considered acceptable forms of screening.

PO72

Caretaker's accommodation⁽¹⁰⁾ and Dwelling units⁽²³⁾ are provided with a reasonable level of access, identification and privacy from adjoining residential and non-residential uses.

Note - Refer to State Government standards for CPTED.

Note - Refer to Planning scheme policy - Residential design for details and examples.

E72

The dwelling:

- a. includes screening to a maximum external transparency of 50% for all habitable room windows that are visible from other dwellings and non-residential uses;
- b. clearly displays the street number at the entrance to the dwelling and at the front of the site to enable identification by emergency services;

6 Zones

	<p>c. is provided with a separate entrance to that of any non-residential use on the site;</p> <p>d. where located on a site with a non-residential use the dwelling is located behind or above the non-residential use.</p> <p>Note - External fixed or movable screening, opaque glass and window tinting are considered acceptable forms of screening.</p>
Retail and commercial uses	
<p>PO73</p> <p>Gympie Road remains the primary location for significant retail activity in the Strathpine.</p>	<p>E73</p> <p>Development on sites with a frontage to Gympie Road incorporates retail uses on the ground floor directly accessible from the street frontage that:</p> <p>a. for ground floor tenancies do not exceed 250m² GFA;</p> <p>b. have a maximum frontage of 20m.</p>
<p>PO74</p> <p>Buildings are designed to be adaptable to accommodate a variety of uses over the life of the building.</p>	<p>E74.1</p> <p>Buildings incorporate a minimum floor to ceiling height of 4.2m for the ground level floor.</p> <p>E74.2</p> <p>Where a building incorporates a podium, the minimum floor to ceiling height for podium levels is 3.3m.</p>
<p>Service station</p> <p>Note - Where the use specific outcomes relating to Service Stations are inconsistent with other examples or Performance Outcomes in this Code, the use specific outcomes below prevail.</p>	
<p>PO</p> <p>Service stations are located, designed and orientated to:</p> <p>a. establish on heavily trafficked roads where the amenity of surrounding residential uses is already subject to impacts by road vehicle noise;</p> <p>b. establish outside of Key Sites;</p> <p>c. not negatively impact active streets, public spaces or hubs of activity where the pedestrian safety and comfort is of high importance;</p> <p>d. not result in the fragmentation of active streets (e.g. site where active uses are located on adjoining lots);</p>	<p>E</p> <p>Service stations are located:</p> <p>a. on the periphery of the Centre adjoining or within 100m of land zoned other than Centre zone;</p> <p>b. on the corner lot of an arterial or sub-arterial road;</p> <p>c. outside areas nominated as Key Sites.</p> <p>E</p> <p>Service stations are designed and orientated on site to:</p> <p>a. include a landscaping strip having a minimum depth of 1m adjoining all road frontages;</p>

<p>e. ensure the amenity of adjoining properties is protected;</p> <p>f. reduce the visual impact of the Service station from the streetscape while maintaining surveillance from the site to the street;</p> <p>g. minimise impacts on adjoining residential uses, to a level suitable relative to expected residential amenity of the area. (e.g. high order road in urban or next generation neighbourhood, likely to be noisy and not like suburban);</p> <p>h. provide ancillary uses that meet the convenience needs of users.</p>	<p>b. buildings and structures (including fuel pump canopies) are setback a minimum of 3m from the primary and secondary frontage and a minimum of 5m from side and rear boundaries;</p> <p>c. include a screen fence, of a height and standard in accordance with a noise impact assessment (Note - Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise), on side and rear boundaries where adjoining land is able to contain a residential use;</p> <p>d. not include more than 2 driveway crossovers.</p>
<p>Telecommunications facility⁽⁸¹⁾</p> <p>Editor's note - In accordance with the Federal legislation Telecommunications facilities⁽⁸¹⁾ must be constructed and operated in a manner that will not cause human exposure to electromagnetic radiation beyond the limits outlined in the Radiocommunications (Electromagnetic Radiation - Human Exposure) Standard 2003 and Radio Protection Standard for Maximum Exposure Levels to Radiofrequency Fields - 3Khz to 300Ghz.</p>	
<p>PO75</p> <p>Telecommunications facilities⁽⁸¹⁾ are co-located with existing telecommunications facilities⁽⁸¹⁾, Utility installation⁽⁸⁶⁾, Major electricity infrastructure⁽⁴³⁾ or Substation⁽⁸⁰⁾ if there is already a facility in the same coverage area.</p>	<p>E75.1</p> <p>New telecommunication facilities⁽⁸¹⁾ are co-located on existing towers with new equipment shelter and associated structures positioned adjacent to the existing shelters and structures.</p> <p>E75.2</p> <p>If not co-located with an existing facility, all co-location opportunities have been investigated and fully exhausted within a 2km radius of the site.</p>
<p>PO76</p> <p>A new Telecommunications facility⁽⁸¹⁾ is designed and constructed to ensure co-masting or co-siting with other carriers both on the tower or pole and at ground level is possible in the future.</p>	<p>E76</p> <p>A minimum area of 45m² is available at ground level to allow for additional equipment shelters and associated structures for the purpose of co-locating on the proposed facility.</p>
<p>PO77</p> <p>Telecommunications facilities⁽⁸¹⁾ do not conflict with lawful existing land uses both on and adjoining the site.</p>	<p>E77</p> <p>The development results in no net reduction in the minimum quantity and standard of landscaping, private or communal open space or car parking spaces required under the planning scheme or under an existing development approval.</p>
<p>PO78</p> <p>The Telecommunications facility⁽⁸¹⁾ does not have an adverse impact on the visual amenity of a locality and is:</p> <p>a. high quality design and construction;</p> <p>b. visually integrated with the surrounding area;</p> <p>c. not visually dominant or intrusive;</p>	<p>E78.1</p> <p>Where in an urban area, the development does not protrude more than 5m above the level of the existing treeline, prominent ridgeline or building rooftops in the surrounding townscape.</p>

6 Zones

<p>d. located behind the main building line;</p> <p>e. below the level of the predominant tree canopy or the level of the surrounding buildings and structures;</p> <p>f. camouflaged through the use of colours and materials which blend into the landscape;</p> <p>g. treated to eliminate glare and reflectivity;</p> <p>h. landscaped;</p> <p>i. otherwise consistent with the amenity and character of the zone and surrounding area.</p>	<p>E78.2</p> <p>In all other areas towers do not exceed 35m in height.</p> <hr/> <p>E78.3</p> <p>Towers, equipment shelters and associated structures are of a design, colour and material to:</p> <p>a. reduce recognition in the landscape;</p> <p>b. reduce glare and reflectivity.</p> <hr/> <p>E78.4</p> <p>All structures and buildings are setback behind the main building line and a minimum of 10m from side and rear boundaries, except where in the Industry and Extractive industry zones, the minimum side and rear setback is 3m.</p> <p>Where there is no established building line the facility is located at the rear of the site.</p> <hr/> <p>E78.5</p> <p>The facility is enclosed by security fencing or by other means to ensure public access is prohibited.</p> <hr/> <p>E78.6</p> <p>A minimum 3m wide strip of dense planting is provided around the perimeter of the fenced area, between the facility and street frontage and adjoining uses.</p> <p>Note - Landscaping is provided in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person, to ensure compliance with Planning scheme policy - Integrated design.</p>
<p>PO79</p> <p>Lawful access is maintained to the site at all times that does not alter the amenity of the landscape or surrounding uses.</p>	<p>E79</p> <p>An Access and Landscape Plan demonstrates how 24 hour vehicular access will be obtained and maintained to the facility in a manner that is appropriate to the site's context.</p>
<p>PO80</p> <p>All activities associated with the development occur within an environment incorporating sufficient controls to ensure the facility generates no audible sound at the site boundaries where in a residential setting.</p>	<p>E80</p> <p>All equipment comprising the Telecommunications facility⁽⁸¹⁾ which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure no noise from this equipment can be heard, or felt at the site boundary.</p>

Key sites	
<p>PO81</p> <p>A Strathpine town square as shown on 'Figure 6.2.1.4.1 - Strathpine' is to be established as to:</p> <ol style="list-style-type: none"> become the spatial focus for the centre and act as a cultural hub for Strathpine and the surrounding region; accommodate a range of activities, including cultural events, community displays and informal gathering, creating a lively atmosphere; include a strong use of public art, cultural uses, outdoor dining and retail edge interfaces that will create a vibrant environment; be of the highest quality; incorporate street furniture, landscape and urban pavement treatment to create a quality space for workers, shoppers, the local community and visitors to enjoy. <p>Note - For details and examples of civic space requirements refer to Planning scheme policy - Centre and neighbourhood hub design.</p>	<p>No example provided.</p>
<p>PO82</p> <p>Development on Key Site A (the western portion of Westfield shopping centre) adjoining Gympie Road, Learmonth Street and Dixon Street, shown on 'Figure 6.2.1.4.1 - Strathpine' is to:</p> <ol style="list-style-type: none"> incorporates an appropriate mix of uses, supporting the growth of Strathpine as a higher order centre; incorporates a substantial retail presence at the ground level floor; contributes to a high quality streetscape providing active frontages and high quality finishes along street frontages; includes a civic space or forecourt area within the site for social interaction, public gathering, markets⁽⁴⁶⁾ etc; establishes connections to the South Pine River. 	<p>E82</p> <p>Development on Key Site A (the western portion of the Westfield shopping centre) adjoining Gympie Road, Learmonth Street and Dixon Street, shown on 'Figure 6.2.1.4.1 - Strathpine' is to:</p> <ol style="list-style-type: none"> increase pedestrian connectivity to the western side of Gympie Road and the Strathpine rail station; include active uses (cafes, restaurants, shops⁽⁷⁵⁾ with a gfa <250m²) adjoining Dixon Street, Learmonth Street and Gympie Road (redeveloping the car parking area); include a civic space in the north western corner and the south west corner; include a civic space within the site at the eastern end of the shopping centre⁽⁷⁶⁾ building, establish a pedestrian linkage through the site to the South Pine River.
<p>PO83</p>	<p>No example provided.</p>

6 Zones

<p>Development on Key site A (the eastern portion of Westfield shopping centre), shown on 'Figure 6.2.1.4.1 - Strathpine' adjoining the South Pine River contains high density residential uses that address and adjoin the South Pine River.</p>	
<p>PO84</p> <p>Development on Key site B (north of Westfield shopping centre), shown on 'Figure 6.2.1.4.1 - Strathpine' includes:</p> <ul style="list-style-type: none"> a. active retail and commercial uses adjoining Learmonth Street; b. medium density residential uses addressing Raynbird Park (linear park). 	<p>No example provided.</p>
<p>PO85</p> <p>Land adjoining or directly adjacent to Strathpine train station, Key site D, shown on 'Figure 6.2.1.4.1 - Strathpine' or Bray Park train station, Key site E, 'Figure 6.2.1.4.1 - Strathpine' incorporates:</p> <ul style="list-style-type: none"> a. a mix of active retail, commercial and high density residential uses; b. attractive and active frontages; c. civic and forecourt spaces for public interaction, outdoor dining and enhanced pedestrian connectivity etc. 	<p>No example provided.</p>
<p>PO86</p> <p>Development on Key site C, shown on 'Figure 6.2.1.4.1 - Strathpine':</p> <ul style="list-style-type: none"> a. is configured in a grid like pattern, establishing permeability and connectivity with the rest of the centre and Strathpine rail station; b. for lot 43, provides active and mixed use frontages and uses along the eastern boundary, adjoining the rail station land; c. for lot 43, includes higher density residential uses to the west that address and adjoin the park. 	<p>No example provided.</p>
<p>PO87</p> <p>Development on Key site F (adjoining the Samsonvale Road open space), shown on 'Figure 6.2.1.4.1 - Strathpine' includes active uses (i.e. Uses that encourage activity on adjoining land e.g. Shop, food and drink outlet⁽²⁸⁾ etc.) that address and adjoin the open space.</p>	<p>No example provided.</p>

Values and constraints criteria

Note - The relevant values and constraints criteria do not apply where the development is consistent with a current Development permit for Reconfiguring a lot or Material change of use or Operational work, where that approval has considered and addressed (e.g. through a development footprint plan (or similar in the case of Landslide hazard) or conditions of approval) the identified value or constraint under this planning scheme.

Acid sulfate soils - (refer Overlay map - Acid sulfate soils to determine if the following assessment criteria apply)

Note - To demonstrate achievement of the performance outcome, an Acid sulfate soils (ASS) investigation report and soil management plan is prepared by a qualified engineer. Guidance for the preparation an ASS investigation report and soil management plan is provided in Planning scheme policy - Acid sulfate soils.

PO88

Development avoids disturbing acid sulfate soils. Where development disturbs acid sulfate soils, development:

- a. is managed to avoid or minimise the release of surface or groundwater flows containing acid and metal contaminants into the environment;
- b. protects the environmental and ecological values and health of receiving waters;
- c. protects buildings and infrastructure from the effects of acid sulfate soils.

E88

Development does not involve:

- a. excavation or otherwise removing of more than 100m³ of soil or sediment where below than 5m Australian Height datum AHD; or
- b. filling of land of more than 500m³ of material with an average depth of 0.5m or greater where below the 5m Australian Height datum AHD.

Environmental areas (refer Overlay map - Environmental areas to determine if the following assessment criteria apply)

Note – The following are excluded from the native vegetation clearing provisions of this planning scheme:

- a. Clearing of native vegetation located within an approved development footprint;
- b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency;
- c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure;
- d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental Management and Conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence;
- e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes;
- f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council;
- g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens;
- h. Grazing of native pasture by stock;
- i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development

Note - Definition for native vegetation is located in Schedule 1 Definitions.

6 Zones

Note - Native vegetation subject to this criteria primarily comprises of matters of national environmental significance (MNES), matters of state environmental significance (MSES). They also comprise some matters of local environmental significance (MLES). A MLES is defined in Schedule 1.2, Administrative definitions. A list of the elements that apply to the mapped MSES and MLES is provided in Appendix 1 of the Planning scheme policy - Environmental areas.

Editors' Note - The accuracy of overlay mapping can be challenged through the development application process (code assessable development) or by way of a planning scheme amendment. See Council's website for details.

Note - To demonstrate achievement of the performance outcome, an ecological assessment, vegetation management plan and fauna management plan, as required, are prepared by a suitably qualified person. Guidance for the preparation of above mentioned reports is provided in Planning scheme policy - Environmental areas.

Vegetation clearing, ecological value and connectivity

PO89

Development avoids locating in a High Value Area or a Value Offset Area. Where it is not practicable or reasonable for development to avoid establishing in these areas, development must ensure that:

- a. the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area is maintained and not lost or degraded;
- b. on-site mitigation measures, mechanisms or processes are in place demonstrating the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area are maintained. For example, this can be achieved through replacement, restoration or rehabilitation planting as part of any proposed covenant, the development of a Vegetation Management Plan, a Fauna Management Plan, and any other on-site mitigation options identified in the Planning scheme policy - Environmental areas*.

* Editor's note - This is not a requirement for an environmental offset under the Environmental Offsets Act 2014.

No example provided.

PO90

Development provides for safe, unimpeded, convenient and ongoing wildlife movement and establishes and maintains habitat connectivity by:

- a. retaining habitat trees;
- b. providing contiguous patches of habitat;
- c. provide replacement and rehabilitation planting to improve connectivity;
- d. avoiding the creation of fragmented and isolated patches of habitat;
- e. providing wildlife movement infrastructure.

Editor's note - Wildlife movement infrastructure may include refuge poles, tree boulevarding, 'stepping stone' vegetation plantings, tunnels, appropriate wildlife fencing; culverts with ledges,

No example provided.

<p>underpasses, overpasses, land bridges and rope bridges. Further information is provided in Planning scheme policy – Environmental areas.</p>	
<p>Vegetation clearing and habitat protection</p>	
<p>PO91</p> <p>Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected.</p>	<p>No example provided.</p>
<p>PO92</p> <p>Development does not result in the net loss or degradation of habitat value in a High Value Area or a Value Offset Area. Where development does result in the loss or degradation of habitat value, development will:</p> <ol style="list-style-type: none"> rehabilitate, revegetate, restore and enhance an area to ensure it continues to function as a viable and healthy habitat area; provide replacement fauna nesting boxes in the event of habitat tree loss in accordance with Planning scheme policy - Environmental areas; undertake rehabilitation, revegetation and restoration in accordance with the South East Queensland Ecological Restoration Framework. 	<p>No example provided.</p>
<p>PO93</p> <p>Development ensures safe, unimpeded, convenient and ongoing wildlife movement and habitat connectivity by:</p> <ol style="list-style-type: none"> providing contiguous patches of habitat; avoiding the creation of fragmented and isolated patches of habitat; providing wildlife movement infrastructure; providing replacement and rehabilitation planting to improve connectivity. 	<p>No example provided.</p>
<p>Vegetation clearing and soil resource stability</p>	
<p>PO94</p> <p>Development does not:</p> <ol style="list-style-type: none"> result in soil erosion or land degradation; leave cleared land exposed for an unreasonable period of time but is rehabilitated in a timely manner. 	<p>No example provided.</p>
<p>Vegetation clearing and water quality</p>	
<p>PO95</p> <p>Development maintains or improves the quality of groundwater and surface water within, and downstream, of a site by:</p>	<p>No example provided.</p>

6 Zones

<ul style="list-style-type: none"> a. ensuring an effective vegetated buffers and setbacks from waterbodies is retained to achieve natural filtration and reduce sediment loads; b. avoiding or minimising changes to landforms to maintain hydrological water flows; c. adopting suitable measures to exclude livestock from entering a waterbody where a site is being used for animal husbandry⁽⁴⁾ and animal keeping⁽⁵⁾ activities. 	
<p>PO96</p> <p>Development minimises adverse impacts of stormwater run-off on water quality by:</p> <ul style="list-style-type: none"> a. minimising flow velocity to reduce erosion; b. minimising hard surface areas; c. maximising the use of permeable surfaces; d. incorporating sediment retention devices; e. minimising channelled flow. 	<p>No example provided.</p>
<p>Vegetation clearing and access, edge effects and urban heat island effects</p>	
<p>PO97</p> <p>Development retains safe and convenient public access in a manner that does not result in the adverse edge effects or the loss or degradation of biodiversity values within the environment.</p>	<p>No example provided.</p>
<p>PO98</p> <p>Development minimises potential adverse 'edge effects' on ecological values by:</p> <ul style="list-style-type: none"> a. providing dense planting buffers of native vegetation between a development and environmental areas; b. retaining patches of native vegetation of greatest possible size where located between a development and environmental areas ; c. restoring, rehabilitating and increasing the size of existing patches of native vegetation; d. ensuring that buildings and access (public and vehicle) are setback as far as possible from environmental areas and corridors; e. landscaping with native plants of local origin. <p>Editor's note - Edge effects are factors of development that go to detrimentally affecting the composition and density of natural populations at the fringe of natural areas. Factors include weed invasion, pets, public and vehicle access, nutrient loads, noise and light pollution, increased fire frequency and changes in the groundwater and surface water flow.</p>	<p>No example provided.</p>
<p>PO99</p> <p>Development avoids adverse microclimate change and does not result in increased urban heat island effects. Adverse urban heat island effects are minimised by:</p>	<p>No example provided.</p>

<ul style="list-style-type: none"> a. pervious surfaces; b. providing deeply planted vegetation buffers and green linkage opportunities; c. landscaping with local native plant species to achieve well-shaded urban places; d. increasing the service extent of the urban forest canopy. 	
Vegetation clearing and Matters of Local Environmental Significance (MLES) environmental offsets	
<p>PO100</p> <p>Where development results in the unavoidable loss of native vegetation within a Value Offset Area MLES waterway buffer or a Value Offset Area MLES wetland buffer, an environmental offset is required in accordance with the environmental offset requirements identified in Planning scheme policy - Environmental areas.</p> <p>Editor's note - For MSES Koala Offsets, the environmental offset provisions in Schedule 11 of the Regulation, in combination with the requirements of the Environmental Offsets Act 2014, apply.</p>	No example provided.
<p>Extractive resources separation area (refer Overlay map - Extractive resources (separation area) to determine if the following assessment criteria apply)</p> <p>Note - To demonstrate achievement of the performance outcomes, a noise impact assessment report is prepared by a suitably qualified person. Guidance to preparing noise impact assessment report is provided in Planning scheme policy – Noise.</p>	
<p>PO101</p> <p>Development does not increase the number of people living in the Extractive Resources separation area.</p>	<p>E101</p> <p>One dwelling house⁽²²⁾ permitted per lot within separation area.</p>
<p>PO102</p> <p>Development:</p> <ul style="list-style-type: none"> a. does not introduce or increase uses that are sensitive to the impacts of an Extractive industry⁽²⁷⁾; b. is compatible with the operation of an Extractive industry⁽²⁷⁾; c. does not comprise or undermine the function and integrity of the separation area in providing a buffer between key extractive and processing activities and sensitive, incompatible uses outside the separation area. 	<p>E102</p> <p>Development within the separation area does not include the following activities:</p> <ul style="list-style-type: none"> a. Caretaker's accommodation⁽¹⁰⁾; b. Community residence⁽¹⁶⁾; c. Dual occupancy⁽²¹⁾; d. Dwelling unit⁽²³⁾; e. Hospital⁽³⁶⁾; f. Rooming accommodation⁽⁶⁹⁾; g. Multiple dwelling⁽⁴⁹⁾; h. Non-resident workforce accommodation⁽⁵²⁾; i. Relocatable home park⁽⁶²⁾; j. Residential care facility⁽⁶⁵⁾; k. Resort complex⁽⁶⁶⁾; l. Retirement facility⁽⁶⁷⁾; m. Rural workers' accommodation⁽⁷¹⁾; n. Short-term accommodation⁽⁷⁷⁾; o. Tourist park⁽⁸⁴⁾.
<p>PO103</p>	<p>E103</p>

6 Zones

<p>Habitable rooms achieve the noise levels listed in Schedule 1 Acoustic Quality Objectives, Environmental Protection (Noise) Policy 2008 and provides a safe, healthy and disturbance free living environment.</p>	<p>All habitable rooms within the separation area are:</p> <ol style="list-style-type: none"> a. acoustically insulated to achieve the noise levels listed in Schedule 1 Acoustic Quality Objectives, Environmental Protection (Noise) Policy 2008; b. provided with mechanical ventilation.
<p>PO104</p> <p>Development provides open space areas for passive recreation in a manner where impacts from key extractive/processing activities, particularly noise, is minimised.</p>	<p>E104</p> <p>Private open space areas are separated from the resource processing area by buildings or a 1.8m high solid structure.</p>
<p>Heritage and landscape character (refer Overlay map - Heritage and landscape character to determine if the following assessment criteria apply)</p> <p>Note - To assist in demonstrating achievement of heritage performance outcomes, a Cultural heritage impact assessment report is prepared by a suitably qualified person verifying the proposed development is in accordance with The Australia ICOMOS Burra Charter.</p> <p>Note - To assist in demonstrating achievement of this performance outcome, a Tree assessment report is prepared by a qualified arborist in accordance with Planning scheme policy – Heritage and landscape character. The Tree assessment report will also detail the measures adopted in accordance with AS 4970-2009 Protection of trees on development sites.</p> <p>Note - Places, including sites, objects and buildings having local cultural heritage significance, are identified on Overlay map - Heritage and landscape character and listed in Schedule 1 of Planning scheme policy - Heritage and landscape character. Places also having cultural heritage significance at a State level and being entered in the Queensland Heritage Register, are also identified in Schedule 1 of Planning scheme policy - Heritage and landscape character.</p>	
<p>PO105</p> <p>Development will:</p> <ol style="list-style-type: none"> a. not diminish or cause irreversible damage to the cultural heritage values present on the site, and associated with a heritage site, object or building; b. protect the fabric and setting of the heritage site, object or building; c. be consistent with the form, scale and style of the heritage site, object or building; d. utilise similar materials to those existing, or where this is not reasonable or practicable, neutral materials and finishes; e. incorporate complementary elements, detailing and ornamentation to those present on the heritage site, object or building; f. retain public access where this is currently provided. 	<p>E105</p> <p>Development is for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value.</p> <p>Note - A cultural heritage conservation management plan for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value is prepared in accordance with Planning scheme policy - Heritage and landscape character. The plan is sent to, and approved by Council prior to the commencement of any preservation, maintenance, repair and restoration works.</p>
<p>PO106</p> <p>Demolition and removal is only considered where:</p> <ol style="list-style-type: none"> a. a report prepared by a suitably qualified conservation architect or conservation engineer demonstrates that the building is structurally unsound and is not reasonably capable of economic repair; or 	<p>No example provided.</p>

<ul style="list-style-type: none"> b. demolition is confined to the removal of outbuildings, extensions and alterations that are not part of the original structure; or c. limited demolition is performed in the course of repairs, maintenance or restoration; or d. demolition is performed following a catastrophic event which substantially destroys the building or object. 	
<p>PO107</p> <p>Where development is occurring on land adjoining a site of cultural heritage value, the development is to be sympathetic to and consistent with the cultural heritage values present on the site and not result in their values being eroded, degraded or unreasonably obscured from public view.</p>	<p>No example provided.</p>
<p>PO108</p> <p>Development does not adversely impact upon the health and vitality of significant trees. Where development occurs in proximity to a significant tree, construction measures and techniques as detailed in AS 4970-2009 Protection of trees on development sites are adopted to ensure a significant tree's health, wellbeing and vitality.</p> <p>Significant trees are only removed where they are in a poor state of health or where they pose a health and safety risk to persons or property. A Tree Assessment report prepared by a suitably qualified arborist confirming a tree's state of health is required to demonstrate achievement of this performance outcome.</p>	<p>E108</p> <p>Development does:</p> <ul style="list-style-type: none"> a. not result in the removal of a significant tree; b. not occur within 20m of a protected tree; c. involve pruning of a tree in accordance with Australian Standard AS 4373-2007 – Pruning of Amenity Trees.
<p>Infrastructure buffers (refer Overlay map - Infrastructure buffers to determine if the following assessment criteria apply)</p>	
<p>PO109</p> <p>Development within a Bulk water supply infrastructure buffer is located, designed and constructed to:</p> <ul style="list-style-type: none"> a. protect the integrity of the water supply pipeline; b. maintain adequate access for any required maintenance or upgrading work to the water supply pipeline; 	<p>E109</p> <p>Development:</p> <ul style="list-style-type: none"> a. does not involve the construction of any buildings or structures within a Bulk water supply infrastructure buffer; b. involving a major hazard facility or environmentally relevant activity (ERA) is setback 30m from a Bulk water supply infrastructure buffer.
<p>PO110</p> <p>Development within a Pumping station buffer is located, designed and constructed to:</p>	<p>E110</p> <p>Development does not involve the construction of any buildings or structures within a Pumping station buffer.</p>

6 Zones

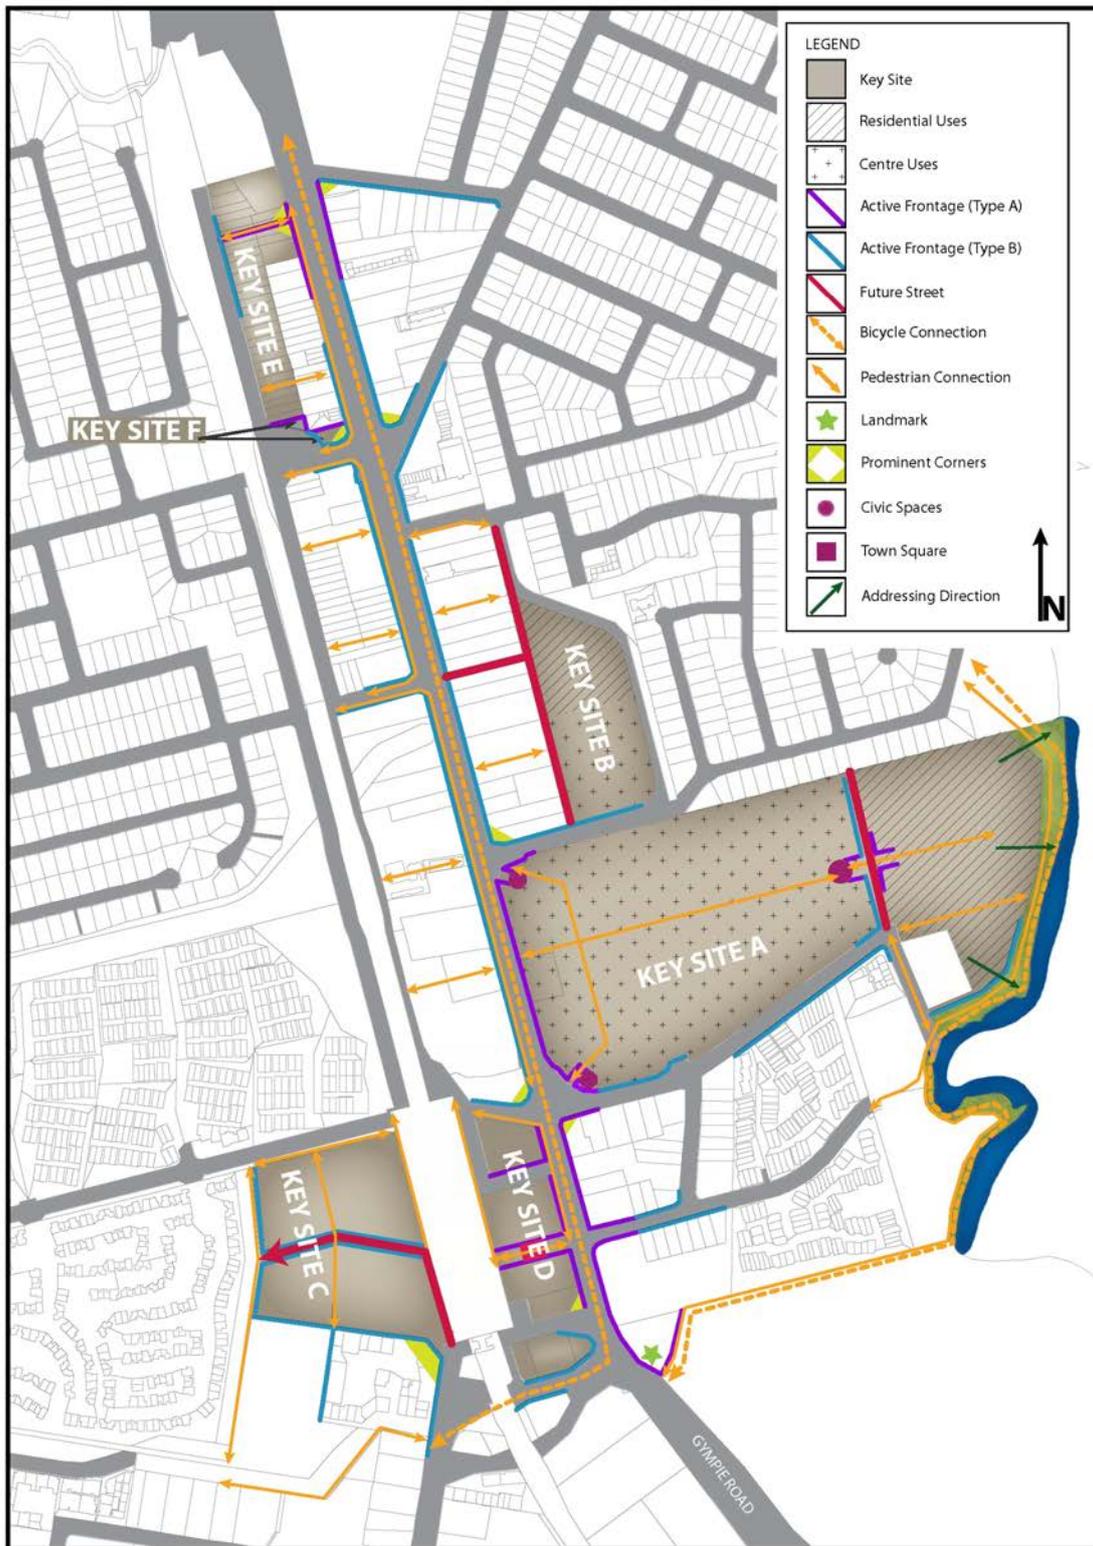

<ul style="list-style-type: none"> a. ensure that odour or other air pollutant impacts on the amenity of the development met the air quality objectives in the Environmental Protection (Air) Policy 2008; b. ensure that noise impacts on the amenity of the development met the indoor noise objectives set out in the Environmental Protection (Noise) Policy 2008. 	
<p>Overland flow path (refer Overlay map - Overland flow path to determine if the following assessment criteria apply)</p> <p>Note - The applicable river and creek flood planning levels associated with defined flood event (DFE) within the inundation area can be obtained by requesting a flood check property report from Council.</p>	
<p>PO111</p> <p>Development:</p> <ul style="list-style-type: none"> a. minimises the risk to persons from overland flow; b. does not increase the potential for damage from overland flow either on the premises or other premises, public land, watercourses, roads or infrastructure. 	<p>No example provided.</p>
<p>PO112</p> <p>Development:</p> <ul style="list-style-type: none"> a. maintains the conveyance of overland flow predominantly unimpeded through the premises for any event up to and including the 1% AEP for the fully developed upstream catchment; b. does not concentrate, intensify or divert overland flow onto an upstream, downstream or surrounding property. <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow.</p>	<p>No example provided.</p>
<p>PO113</p> <p>Development does not:</p> <ul style="list-style-type: none"> a. directly, indirectly or cumulatively cause any increase in overland flow velocity or level; b. increase the potential for flood damage from overland flow either on the premises or other premises, public lands, watercourses, roads or infrastructure. 	<p>No example provided.</p>

<p>Note - Open concrete drains greater than 1m in width are not an acceptable outcome, nor are any other design options that may increase scouring.</p>	
<p>PO114</p> <p>Development ensures that public safety and the risk to the environment are not adversely affected by a detrimental impact of overland flow on a hazardous chemical located or stored on the premises.</p>	<p>E114</p> <p>Development ensures that a hazardous chemical is not located or stored in an Overland flow path area.</p> <p>Note - Refer to the Work Health and Safety Act 2011 and associated Regulation and Guidelines, the Environmental Protection Act 1994 and the relevant building assessment provisions under the Building Act 1975 for requirements related to the manufacture and storage of hazardous substances.</p>
<p>PO115</p> <p>Development which is not in a Rural zone ensures that overland flow is not conveyed from a road or public open space onto a private lot.</p>	<p>E115</p> <p>Development which is not in a Rural zone that an overland flow paths and drainage infrastructure is provided to convey overland flow from a road or public open space area away from a private lot.</p>
<p>PO116</p> <p>Development ensures that inter-allotment drainage infrastructure, overland flow paths and open drains through private property cater for overland flows for a fully developed upstream catchment and are able to be easily maintained.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow</p>	<p>E116.1</p> <p>Development ensures that roof and allotment drainage infrastructure is provided in accordance with the following relevant level as identified in QUDM:</p> <ol style="list-style-type: none"> Urban area – Level III; Rural area – N/A; Industrial area – Level V; Commercial area – Level V. <p>E116.2</p> <p>Development ensures that inter-allotment drainage infrastructure is designed to accommodate any event up to and including the 1% AEP for the fully developed upstream catchment.</p>
<p>PO117</p> <p>Development protects the conveyance of overland flow such that an easement for drainage purposes is provided over:</p> <ol style="list-style-type: none"> a stormwater pipe if the nominal pipe diameter exceeds 300mm; an overland flow path where it crosses more than one premises; inter-allotment drainage infrastructure. <p>Note - Refer to Planning scheme policy - Integrated design for details and examples.</p>	<p>No example provided.</p>

6 Zones

<p>Note - Stormwater Drainage easement dimensions are provided in accordance with Section 3.8.5 of QUDM.</p>	
<p>Additional criteria for development for a Park⁽⁵⁷⁾</p>	
<p>PO118</p> <p>Development for a Park⁽⁵⁷⁾ ensures that the design and layout responds to the nature of the overland flow affecting the premises such that:</p> <ol style="list-style-type: none"> public benefit and enjoyment is maximised; impacts on the asset life and integrity of park structures is minimised; maintenance and replacement costs are minimised. 	<p>E118</p> <p>Development for a Park⁽⁵⁷⁾ ensures works are provided in accordance with the requirements set out in Appendix B of the Planning scheme policy - Integrated design.</p>
<p>Riparian and wetland setbacks</p>	
<p>PO119</p> <p>Development provides and maintains a suitable setback from waterways and wetlands that protects natural and environmental values. This is achieved by recognising and responding to the following matters:</p> <ol style="list-style-type: none"> impact on fauna habitats; impact on wildlife corridors and connectivity; impact on stream integrity; impact of opportunities for revegetation and rehabilitation planting; edge effects. 	<p>E119</p> <p>Development does not occur within:</p> <ol style="list-style-type: none"> 50m from top of bank for W1 waterway and drainage line 30m from top of bank for W2 waterway and drainage line 20m from top of bank for W3 waterway and drainage line 100m from the edge of a Ramsar wetland, 50m from all other wetlands. <p>Note - W1, W2 and W3 waterway and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.</p>

Figure 6.2.1.4.1 - Strathpine

6 Zones

6.2.1.5 District centre precinct

6.2.1.5.1 Purpose - District centre precinct

1. The purpose of the code will be achieved through the following overall outcomes for the District centre precinct:
 - a. Development is of a size, scale and range of services commensurate with the role and function of this precinct within the centre network.
 - b. Uses and activities contribute to a horizontal and vertical mix and the co-location of uses, concentrated in a compact urban form.
 - c. Development is of a sufficient intensity and land use mix to support high frequency public transport, improve land efficiency and support centre facilities.
 - d. Medium density housing is incorporated within centres.
 - e. Adverse impacts on the amenity of surrounding residential uses are minimised by mitigating noise, odour and air quality impacts on residents to a level consistent with the location within or adjoining a district centre.
 - f. The safety and efficiency of pedestrian movement is prioritised in the design of car parking areas and the size, frequency and location of vehicle crossovers.
 - g. The amount of on-site car parking encourages the use of public and active transport, increases land use efficiency and does not negatively impact the streetscape.
 - h. Facilities, infrastructure and public realm improvements are provided to support active transport usage and contribute to improved pedestrian connectivity and walkability between key destinations.
 - i. Pedestrian connections are provided to integrate the development with the street, public spaces and the surrounding area.
 - j. Development encourages social activity through the provision of high quality civic and plaza spaces.
 - k. The design, siting and construction of buildings within a district centre:
 - i. contributes to a high quality centre consistent with the desired character of the centre and surrounding area;
 - ii. maintains a human scale, through appropriate building heights and form;
 - iii. are centred around a main street;
 - iv. provides attractive, active frontages that maximise pedestrian activity along road frontages and public spaces;
 - v. provides for active and passive surveillance of the public spaces, road frontages and movement corridors;
 - vi. locates tenancies at the street frontage with car parking located at the rear;
 - vii. does not result in internalised shopping centres with large external blank walls and tenancies only accessible from within the building;
 - viii. ensures expansive areas of surface car parking do not dominate road frontages or public spaces;
 - ix. ensures parking, manoeuvring and servicing areas are designed, located and aesthetically treated to not be visually dominant features from the streetscape and public spaces;
 - x. include buffers or other treatments measures to respond to the interface with residential zoned land.

- I. The establishment of new district centres, including the expansion of a local centre to a district scale, does not occur unless designated in the Strategic framework.
- m. Out-of-centre development, for the expansion of a district centre (into adjoining zones and precincts) or a new district centre only occurs where:
 - i. it maintains the scale and function of a district centre consistent with Table 6.2.1.1;
 - ii. for a new district centre, if it is in a location identified in the planning scheme;
 - iii. expansion will strengthen the existing centre as an important district activity node;
 - iv. clear separation from existing higher order, district and local centres within the network is maintained to reduce catchment overlap;
 - v. located on a highly accessible site, adjoining the existing centre and not resulting in the fragmentation of the centre;
 - vi. designed to include active frontages around a main street core;
 - vii. expansion does not result in an elongated centre forming a ribbon of development along regional through roads.

Note - Refer to Planning scheme policy - Centre and neighbourhood hub design for details and examples.

Note - Interim uses may be acceptable within a centre where the use would be compatible with existing and proposed centre activities provided the interim use would not be likely to prejudice or delay the ultimate development of the site and adjoining areas. Interim uses should be low intensity in nature and characterised by low investment in buildings and infrastructure relative to the value of the site (e.g. Bulk landscape supplies⁽⁹⁾, garden centre⁽³¹⁾, market⁽⁴⁶⁾, outdoor sales⁽⁵⁴⁾, wholesale nursery⁽⁸⁹⁾ or outdoor sport and recreation⁽⁵⁵⁾);

- n. **Service stations:**
 - i. establish where they will not disrupt, fragment or negatively impact active frontages or streets where pedestrian safety and comfort are of high importance;
 - ii. establish on heavily trafficked roads where the amenity of surrounding residential uses is already subject to impacts from road vehicle noise;
 - iii. establish in locations that will not have a negative impact on the street environments intended to include active frontages;
 - iv. do not negatively impact adjoining residents or the streetscape;
 - v. ancillary uses or activities only service the convenience needs of users.
- o. General works associated with the development achieves the following:
 - i. new development is provided with a high standard of services to meet and support the current and future needs of users of the site, including roads, street lighting services, telecommunications and reticulated electricity (underground wherever possible), water and sewerage (where available);
 - ii. the development manages stormwater to:
 - A. ensure the discharge of stormwater does not adversely affect the quality, environmental values or ecosystem functions of downstream receiving waters;
 - B. prevent stormwater contamination and the release of pollutants;
 - C. maintain or improve the structure and condition of drainage lines and riparian areas;
 - D. avoid off-site adverse impacts from stormwater.

6 Zones

- iii. the development does not result in unacceptable impacts on the capacity and safety of the external road network;
 - iv. the development ensures the safety, efficiency and useability of access ways and parking areas;
 - v. site works including earthworks are managed to be safe and have minimal impacts on adjoining or adjacent premises, the streetscape or the environment.
- p. Activities associated with the use do not cause a nuisance by way of aerosols, fumes, light, noise, odour, particles or smoke.
- q. Noise generating uses are designed, sited and constructed to minimise the transmission of noise to appropriate levels and do not cause environmental harm or nuisance.
- r. Noise sensitive uses are designed, sited and constructed so as not to be subject to unacceptable levels of noise.
- s. Development avoids areas subject to constraint, limitation, or environmental value. Where development cannot avoid these identified areas, it responds by:
- i. adopting a 'least risk, least impact' approach when designing, siting and locating development in any area subject to a constraint, limitation or environmental value to minimise the potential risk to people, property and the environment;
 - ii. ensuring no further instability, erosion or degradation of the land, water or soil resource;
 - iii. when located within a Water buffer area, complying with the Water Quality Vision and Objectives contained in the Seqwater Development Guidelines: Development Guidelines for Water Quality Management in Drinking Water Catchments 2012.
 - iv. maintaining, restoring and rehabilitating environmental values, including natural, ecological, biological, aquatic, hydrological and amenity values, and enhancing these values through the provision of planting and landscaping, and facilitating safe wildlife movement and connectivity through:
 - A. the provision of replacement, restoration, rehabilitation planting and landscaping;
 - B. the location, design and management of development to avoid or minimise adverse impacts on ecological systems and processes;
 - C. the requiring of environmental offsets in accordance with the Environmental Offsets Act 2014.
 - v. protecting native species and protecting and enhancing species habitat;
 - vi. protecting and preserving the natural, aesthetic, architectural historic and cultural values of significant trees, places, objects and buildings of heritage and cultural significance;
 - vii. establishing effective separation distances, buffers and mitigation measures associated with identified infrastructure to minimise adverse effects on sensitive land uses from odour, noise, dust and other nuisance generating activities;
 - viii. establishing, maintaining and protecting appropriate buffers to waterways, wetlands, native vegetation and significant fauna habitat;
 - ix. ensuring it promotes and does not undermine the ongoing viability, integrity, operation, maintenance and safety of identified infrastructure;
 - x. ensuring effective and efficient disaster management response and recovery capabilities;
 - xi. where located in an overland flow path:
 - A. development siting, built form, layout and access responds to the risk presented by the overland flow and minimises risk to personal safety;

- B. development is resilient to the impacts of overland flow by ensuring the siting and design accounts for the potential risks to property associated with the overland flow;
- C. development does not impact on the conveyance of the overland flow for any event up to and including the 1% AEP for the fully developed upstream catchment;
- D. development directly, indirectly and cumulatively avoid an increase in the severity of overland flow and potential for damage on the premises or other premises, public lands, watercourses, roads or infrastructure.

t. Development in the District centre precinct is for one or more of the uses identified below:

<ul style="list-style-type: none"> • Bar⁽⁷⁾ • Caretaker's accommodation⁽¹⁰⁾ • Child care centre⁽¹³⁾ • Club⁽¹⁴⁾ • Community care centre⁽¹⁵⁾ • Community use⁽¹⁷⁾ • Dual occupancy⁽²¹⁾ - if in a mixed use building • Dwelling unit⁽²³⁾ • Emergency services⁽²⁵⁾ • Food and drink outlet⁽²⁸⁾ • Hardware and trade supplies⁽³²⁾ - if 250m² GFA or less 	<ul style="list-style-type: none"> • Health care services⁽³³⁾ • Home based business⁽³⁵⁾ • Hotel⁽³⁷⁾ • Low impact industry⁽⁴²⁾ - if not located adjoining a main street • Market⁽⁴⁶⁾ • Multiple dwelling⁽⁴⁹⁾ • Office⁽⁵³⁾ • Place of worship⁽⁶⁰⁾ • Rooming accommodation⁽⁶⁹⁾ 	<ul style="list-style-type: none"> • Sales office⁽⁷²⁾ • Service industry⁽⁷³⁾ • Shop⁽⁷⁵⁾ • Shopping centre⁽⁷⁶⁾ • Short term accommodation⁽⁷⁶⁾ • Showroom⁽⁷⁸⁾ - if 250m² GFA or less
---	---	---

u. Development in the District centre precinct does not include one or more of the following uses:

<ul style="list-style-type: none"> • Air services⁽³⁾ • Animal husbandry⁽⁴⁾ • Animal keeping⁽⁵⁾ • Aquaculture⁽⁶⁾ • Cemetery⁽¹²⁾ • Crematorium⁽¹⁸⁾ 	<ul style="list-style-type: none"> • High impact industry⁽³⁴⁾ • Intensive animal industry⁽³⁹⁾ • Intensive horticulture⁽⁴⁰⁾ • Marine industry⁽⁴⁵⁾ • Medium impact industry⁽⁴⁷⁾ • Motor sport facility⁽⁴⁸⁾ 	<ul style="list-style-type: none"> • Port services⁽⁶¹⁾ • Relocatable home park⁽⁶²⁾ • Rural industry⁽⁷⁰⁾ • Rural workers' accommodation⁽⁷¹⁾ • Special industry⁽⁷⁹⁾ • Tourist park⁽⁸⁴⁾
--	--	--

6 Zones

<ul style="list-style-type: none"> • Cropping⁽¹⁹⁾ • Detention facility⁽²⁰⁾ • Extractive industry⁽²⁷⁾ • Hardware and trade supplies⁽³²⁾ - if greater than 250m² GFA 	<ul style="list-style-type: none"> • Outdoor sport and recreation⁽⁵⁵⁾ • Permanent plantation⁽⁵⁹⁾ 	<ul style="list-style-type: none"> • Transport depot⁽⁸⁵⁾ • Winery⁽⁹⁰⁾
---	--	---

- v. Development not listed in the tables above may be considered on its merits and where it reflects and supports the outcomes of the zone.

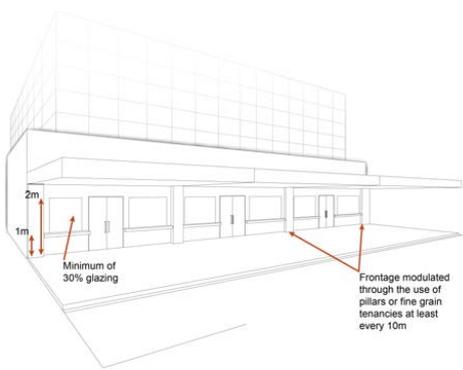

Part F — Criteria for assessable development - District centre precinct

Where development is categorised as assessable development - code assessment in the Table of Assessment, the assessment benchmarks are the criteria set out in Part F, Table 6.2.1.5.1 as well as the purpose statement and overall outcomes of this code.

Where development is categorised as assessable development - impact assessable, the assessment benchmarks become the whole of the planning scheme.

Table 6.2.1.5.1 Assessable development - District centre precinct

Performance outcomes	Examples that achieve aspects of the Performance Outcomes
General criteria	
Centre network and function	
<p>PO1</p> <p>Development in the District centre precinct is of a size, scale and range of services commensurate with the role and function of this precinct within the centres network.</p> <p>Note - Refer to Moreton Bay centres network Table 6.2.1.1</p>	No example provided.
Active frontage	
<p>PO2</p> <p>Development addresses and activates streets and public spaces by:</p> <p>a. establishing and maintaining interaction, pedestrian activity and casual surveillance through appropriate land uses and building design (e.g. the use of windows or glazing and avoiding blank walls with the use of sleeving);</p> <p>b. ensuring buildings and individual tenancies address street frontages and other areas of pedestrian movement;</p>	<p>E2.1</p> <p>Development addresses the street frontage.</p>
	<p>E2.2</p> <p>New buildings and extensions are built to the street alignment.</p>
	<p>E2.3</p> <p>At-grade car parking:</p>

<ul style="list-style-type: none"> c. new buildings adjoin or are within 3m of a primary street frontage, civic space or public open space; d. locating car parking areas behind or under buildings to not dominate the street environment; e. providing visual interest to the façade (e.g. windows or glazing, variation in colours, materials, finishes, articulation, recesses or projections); f. establishing or maintaining human scale. 	<ul style="list-style-type: none"> a. does not adjoin a main street or a corner; b. where at-grade car parking adjoins a street (other than a main street) or civic space it does not take up more than 40% of the length of the street frontage. <p>Note - Refer to Planning scheme policy - Centre and neighbourhood hub design for details and examples.</p>
	<p>E2.4</p> <p>Development on corner lots:</p> <ul style="list-style-type: none"> a. addresses both street frontages; b. expresses strong visual elements, including feature building entries.
	<p>E2.5</p> <p>Development incorporates active uses adjacent to a street frontage, civic space, public open space or pedestrian thoroughfare.</p>
	<p>E2.6</p> <p>The front facade of the building:</p> <ul style="list-style-type: none"> a. is made up of a minimum of 50% windows or glazing between a height of 1m and 2m; b. the minimum area of window or glazing is to remain uncovered and free of signage. <p>Note - This does not apply to Adult stores⁽¹⁾.</p> <p style="text-align: center;">Figure - Glazing</p> 
	<p>E2.7</p>

6 Zones

	Individual tenancies do not exceed a frontage length of 20m.
	<p>E2.8</p> <p>Large format retail uses (e.g. showroom⁽⁷⁸⁾, supermarket or discount department store) are sleeved by smaller tenancies (e.g. retail and similar uses).</p> <p>Note - Refer to Planning scheme policy - Centre and neighbourhood hub design for details and examples.</p>
Setbacks	
<p>PO3</p> <p>Side and rear setbacks are of a dimension to:</p> <ol style="list-style-type: none"> cater for required openings, the location of loading docks and landscaped buffers etc.; protect the amenity of adjoining sensitive land uses. 	No example provided.
Site area	
<p>PO4</p> <p>The development has sufficient area and dimensions to accommodate required buildings and structures, vehicular access, manoeuvring and parking and landscaping.</p>	No example provided.
Building height	
<p>PO5</p> <p>The height of buildings reflect the individual character of the centre.</p>	<p>E5</p> <p>Building height is within the minimum and maximum height identified on Overlay map - Building heights.</p>
Public realm	
<p>PO6</p> <p>Developments incorporating a gross leasable area greater than 3,000m² include a public plaza on-site, that:</p> <ol style="list-style-type: none"> is integrated with adjacent development, in relation to built form, streetscape, landscaping and the street and pedestrian network; is directly accessible from adjacent development or tenancies and is easily and conveniently accessible to the public; is of a sufficient size and dimensions to cater for passive recreation activities (e.g. alfresco dining and temporary activities etc); 	No example provided.

<p>d. includes greening (e.g. Landscaping, planter boxes, street trees etc) that contributes to the identity of the centre;</p> <p>e. is lit and has adequate signage for way finding, ensuring adjoining and near by residential uses are not impacted by 'overspill';</p> <p>f. is designed to achieve CPTED principles e.g. visible at all times.</p> <p>Note - For details and examples of civic space requirements refer to Planning scheme policy - Centre and neighbourhood hub design.</p>	
Streetscape	
<p>PO7</p> <p>Development contributes to an attractive and walkable street environment through the provision of streetscape features (e.g. footpaths, lighting, bins, furniture, landscaping, pedestrian crossings etc), as outlined in Planning scheme policy - Integrated design.</p> <p>Editor's note - Additional approvals may be required where works are required within road reserves.</p>	<p>No example provided.</p>
Built form	
<p>PO8</p> <p>Ground floor spaces are designed to enable the flexible re-use of floor area for commercial and retail activities.</p>	<p>E8</p> <p>The ground floor has a minimum ceiling height of 4.2m.</p>
<p>PO9</p> <p>Awnings are provided at the ground level floor fronting pedestrian footpaths. Awnings:</p> <p>a. provide adequate protection for pedestrians from solar exposure and inclement weather;</p> <p>b. are integrated with the design of the building and the form and function of the street;</p> <p>c. do not compromise the provision of street trees and signage;</p> <p>d. ensure the safety of pedestrians and vehicles (e.g. No support poles).</p>	<p>E9</p> <p>Buildings incorporate an awning that:</p> <p>a. is cantilevered;</p> <p>b. extends from the face of the building;</p> <p>c. has a minimum height of 3.2m and a maximum height of 4.2m above pavement level;</p> <p>d. does not extend past a vertical plane of 1.5m inside the kerb line to allow for street trees and regulatory signage;</p> <p>e. aligns with adjoining buildings to provide continuous shelter where possible.</p>

6 Zones

	<p style="text-align: center;">Figure - Awning requirements</p>
<p>PO10</p> <p>All buildings exhibit a high standard of design and construction, which:</p> <ol style="list-style-type: none"> a. adds visual interest to the streetscape (e.g. variation in materials, patterns, textures and colours, cantilevered awning); b. enables differentiation between buildings; c. contributes to a safe environment; d. incorporates architectural features within the building facade at the street level to create human scale; e. treat or break up blank walls that are visible from public areas; f. includes building entrances that are readily identifiable from the road frontage, located and oriented to favour active and public transport usage by connecting to pedestrian footpaths on the street frontage and adjoining sites; g. facilitate casual surveillance of all public spaces. 	<p>No example provided.</p>
<p>PO11</p> <p>Building entrances:</p> <ol style="list-style-type: none"> a. are readily identifiable from the road frontage; b. add visual interest to the streetscape; c. are designed to limit opportunities for concealment; d. are located and oriented to favour active and public transport usage by connecting to pedestrian footpaths on the street frontage; 	<p>No example provided.</p>

<p>e. include footpaths that connect with adjoining sites;</p> <p>f. provide a dedicated, sealed pedestrian footpath between the street frontage and the building entrance.</p> <p>Note - The design provisions for footpaths outlined in Planning scheme policy - Integrated design may assist in demonstrating compliance with this Performance Outcome.</p>													
Movement network													
<p>PO</p> <p>Development is designed to connect to and form part of the surrounding neighbourhood by providing interconnected street, pedestrian and cyclist pathways to adjoining development, nearby centres, neighbourhood hubs, community facilities, public transport nodes and open space.</p> <p>Note - Refer to Planning scheme policy - Neighbourhood design for guidance on achieving the above outcome.</p>	<p>E</p> <p>Development provides and maintains the connections shown on the movement figures located in Appendix A of Planning scheme policy - Neighbourhood design.</p> <p>E</p> <p>For areas not shown on a movement figure located in Appendix A of Planning scheme policy - Neighbourhood design, no example provided.</p> <p>Note - Refer to Planning scheme policy - Neighbourhood design for guidance on achieving the above example.</p>												
Car parking													
<p>PO12</p> <p>The number of car parking spaces is managed to:</p> <p>a. provide for the parking of visitors and employees that is appropriate for the use and the sites proximity to public and active transport options;</p> <p>b. not include an oversupply of car parking spaces.</p> <p>Note - Refer to Planning scheme policy - Integrated transport assessment for guidance on how to achieve compliance with this outcome.</p>	<p>E12</p> <p>Car parking is provided in accordance with the table below.</p> <table border="1" data-bbox="810 1361 1465 1727"> <thead> <tr> <th>Land use</th> <th>Maximum number of Car Spaces to be Provided</th> <th>Minimum Number of Car Spaces to be Provided</th> </tr> </thead> <tbody> <tr> <td>Non-residential</td> <td>1 per 30m² of GFA</td> <td>1 per 50m² of GFA</td> </tr> <tr> <td>Residential - Permanent/long term</td> <td>N/A</td> <td>1 per dwelling</td> </tr> <tr> <td>Residential - Serviced/short term</td> <td>3 per 4 dwellings + staff spaces</td> <td>1 per 5 dwelling + staff spaces</td> </tr> </tbody> </table> <p>Note - Car parking rates are to be rounded up to the nearest whole number.</p> <p>Note - Allocation of car parking spaces to dwellings is at the discretion of the developer.</p> <p>Note - Residential - Permanent/long term includes: Multiple dwelling⁽⁴⁹⁾, Relocatable home park⁽⁶²⁾, Residential care facility⁽⁶⁵⁾, Retirement facility⁽⁶⁷⁾.</p> <p>Note - Residential - Services/short term includes: Rooming accommodation⁽⁶⁹⁾ or Short-term accommodation⁽⁷⁷⁾.</p>	Land use	Maximum number of Car Spaces to be Provided	Minimum Number of Car Spaces to be Provided	Non-residential	1 per 30m ² of GFA	1 per 50m ² of GFA	Residential - Permanent/long term	N/A	1 per dwelling	Residential - Serviced/short term	3 per 4 dwellings + staff spaces	1 per 5 dwelling + staff spaces
Land use	Maximum number of Car Spaces to be Provided	Minimum Number of Car Spaces to be Provided											
Non-residential	1 per 30m ² of GFA	1 per 50m ² of GFA											
Residential - Permanent/long term	N/A	1 per dwelling											
Residential - Serviced/short term	3 per 4 dwellings + staff spaces	1 per 5 dwelling + staff spaces											

6 Zones

	Note - The above rates exclude car parking spaces for people with a disability required by Disability Discrimination Act 1992 or the relevant disability discrimination legislation and standards.
<p>PO13</p> <p>Car parking is designed to avoid the visual impact of large areas of surface car parking on the streetscape.</p>	No example provided.
<p>PO14</p> <p>Car parking design includes innovative solutions, including on-street parking and shared parking areas.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details and examples of on-street parking.</p>	No example provided.
<p>PO15</p> <p>The design of car parking areas:</p> <ol style="list-style-type: none"> does not impact on the safety of the external road network; ensures the safe movement of vehicles within the site. 	<p>E15</p> <p>All car parking areas are designed and constructed in accordance with Australian Standard AS 2890.1 Parking facilities Part 1: Off-street car parking.</p>
<p>PO16</p> <p>The safety and efficiency of pedestrian movement is prioritised in the design of car parking areas through providing pedestrian paths in car parking areas that are:</p> <ol style="list-style-type: none"> located along the most direct pedestrian routes between building entrances, car parks and adjoining uses; protected from vehicle intrusion through the use of physical and visual separation (e.g. wheel stops, trees etc); of a width to allow safe and efficient access for prams and wheelchairs. 	No example provided.
<p>Bicycle parking and end of trip facilities</p> <p>Note - Building work to which this code applies constitutes Major Development for purposes of development requirements for end of trip facilities prescribed in the Queensland Development Code MP 4.1.</p>	
<p>PO17</p> <ol style="list-style-type: none"> End of trip facilities are provided for employees or occupants, in the building or on-site within a reasonable walking distance, and include: 	<p>E17.1</p> <p>Minimum bicycle parking facilities are provided in accordance with the table below (rounded up to the nearest whole number).</p>

<p>i. adequate bicycle parking and storage facilities; and</p> <p>ii. adequate provision for securing belongings; and</p> <p>iii. change rooms that include adequate showers, sanitary compartments, wash basins and mirrors.</p> <p>b. Notwithstanding a. there is no requirement to provide end of trip facilities if it would be unreasonable to provide these facilities having regard to:</p> <p>i. the projected population growth and forward planning for road upgrading and development of cycle paths; or</p> <p>ii. whether it would be practical to commute to and from the building on a bicycle, having regard to the likely commute distances and nature of the terrain; or</p> <p>iii. the condition of the road and the nature and amount of traffic potentially affecting the safety of commuters.</p> <p>Editor's note - The intent of b above is to ensure the requirements for bicycle parking and end of trip facilities are not applied in unreasonable circumstances. For example these requirements should not, and do not apply in the Rural zone or the Rural residential zone etc.</p> <p>Editor's note - This performance outcome is the same as the Performance Requirement prescribed for end of trip facilities under the Queensland Development Code. For development incorporating building work, that Queensland Development Code performance requirement cannot be altered by a local planning instrument and has been reproduced here solely for information purposes. Council's assessment in its building work concurrence agency role for end of trip facilities will be against the performance requirement in the Queensland Development Code. As it is subject to change at any time, applicants for development incorporating building work should ensure that proposals that do not comply with the examples under this heading meet the current performance requirement prescribed in the Queensland Development Code.</p>	<table border="1"> <thead> <tr> <th data-bbox="809 203 1114 255">Use</th> <th data-bbox="1114 203 1469 255">Minimum Bicycle Parking</th> </tr> </thead> <tbody> <tr> <td data-bbox="809 255 1114 331">Residential uses comprised of dwellings</td> <td data-bbox="1114 255 1469 331">Minimum 1 space per dwelling</td> </tr> <tr> <td data-bbox="809 331 1114 439">All other residential uses</td> <td data-bbox="1114 331 1469 439">Minimum 1 space per 2 car parking spaces identified in Schedule 7 – car parking</td> </tr> <tr> <td data-bbox="809 439 1114 515">Non-residential uses</td> <td data-bbox="1114 439 1469 515">Minimum 1 space per 200m² of GFA</td> </tr> </tbody> </table> <p>Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is a combination of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.</p>	Use	Minimum Bicycle Parking	Residential uses comprised of dwellings	Minimum 1 space per dwelling	All other residential uses	Minimum 1 space per 2 car parking spaces identified in Schedule 7 – car parking	Non-residential uses	Minimum 1 space per 200m ² of GFA
Use	Minimum Bicycle Parking								
Residential uses comprised of dwellings	Minimum 1 space per dwelling								
All other residential uses	Minimum 1 space per 2 car parking spaces identified in Schedule 7 – car parking								
Non-residential uses	Minimum 1 space per 200m ² of GFA								
	<p>E17.2</p> <p>Bicycle parking is:</p> <p>a. provided in accordance with <i>Austrroads (2008), Guide to Traffic Management - Part 11: Parking</i>;</p> <p>b. protected from the weather by its location or a dedicated roof structure;</p> <p>c. located within the building or in a dedicated, secure structure for residents and staff;</p> <p>d. adjacent to building entrances or in public areas for customers and visitors.</p> <p>Note - Bicycle parking structures are to be constructed to the standards prescribed in AS2890.3.</p> <p>Note - Bicycle parking and end of trip facilities provided for residential and non-residential activities may be pooled, provided they are within 100 metres of the entrance to the building.</p> <p>Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is an amalgamation of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.</p>								
	<p>E17.3</p> <p>For non-residential uses, storage lockers:</p> <p>a. are provide at a rate of 1.6 per bicycle parking space (rounded up to the nearest whole number);</p> <p>b. have minimum dimensions of 900mm (height) x 300mm (width) x 450mm (depth).</p>								

Note - Storage lockers may be pooled across multiple sites and activities when within 100 metres of the entrance to the building and within 50 metres of bicycle parking and storage facilities.

Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is an amalgamation of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.

E17.4

For non-residential uses, changing rooms:

- a. are provided at a rate of 1 per 10 bicycle parking spaces;
- b. are fitted with a lockable door or otherwise screened from public view;
- c. are provided with shower(s), sanitary compartment(s) and wash basin(s) in accordance with the table below:

Bicycle spaces provided	Male/ Female	Change rooms required	Showers required	Sanitary compartments required	Washbasins required
1-5	Male and female	1 unisex change room	1	1 closet pan	1
6-19	Female	1	1	1 closet pan	1
20 or more	Male	1	1	1 closet pan	1
	Female	1	2, plus 1 for every 20 bicycle spaces provided thereafter	2 closet pans, plus 1 sanitary compartment for every 60 bicycle parking spaces provided thereafter	1, plus 1 for every 60 bicycle parking spaces provided thereafter
	Male	1	2, plus 1 for every 20 bicycle spaces provided thereafter	1 urinal and 1 closet pans, plus 1 sanitary compartment at the rate of 1 closet pan or 1 urinal for every 60 bicycle space provided thereafter	1, plus 1 for every 60 bicycle parking spaces provided thereafter

Note - All showers have a minimum 3-star Water Efficiency Labelling and Standards (WELS) rating shower head.

Note - All sanitary compartments are constructed in compliance with F2.3 (e) and F2.5 of BCA (Volume 1).

- d. are provided with:
 - i. a mirror located above each wash basin;
 - ii. a hook and bench seating within each shower compartment;
 - iii. a socket-outlet located adjacent to each wash basin.

	<p>Note - Change rooms may be pooled across multiple sites, residential and non-residential activities when within 100 metres of the entrance to the building and within 50 metres of bicycle parking and storage facilities</p> <p>Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is an amalgamation of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.</p>
Loading and servicing	
<p>PO18</p> <p>Loading and servicing areas:</p> <ol style="list-style-type: none"> are not visible from any street frontage; are integrated into the design of the building; include screening and buffers to reduce negative impacts on adjoining sensitive land uses; are consolidated and shared with adjoining sites where possible. <p>Note - Refer to Planning scheme policy - Centre and neighbourhood hub design.</p>	No example provided.
Waste	
<p>PO19</p> <p>Bins and bin storage area/s are designed, located and managed to prevent amenity impacts on the locality.</p>	<p>E19</p> <p>Bins and bin storage area/s are provided, designed and managed in accordance with Planning scheme policy – Waste.</p> <p>Development is designed to meet the criteria in the Planning scheme policy - Waste and is demonstrated in a waste management program.</p>
Landscaping and fencing	
<p>PO20</p> <p>On-site landscaping:</p> <ol style="list-style-type: none"> is incorporated into the design of the development; reduces the dominance of car parking and servicing areas from the street frontage; incorporates shade trees in car parking areas; retains mature trees wherever possible; 	No example provided.

6 Zones

<p>e. contributes to quality public spaces and the microclimate by providing shelter and shade;</p> <p>f. maintains the achievement of active frontages and sightlines for casual surveillance.</p> <p>Note - All landscaping is to accord with Planning scheme policy - Integrated design.</p>	
<p>PO21</p> <p>Surveillance and overlooking are maintained between the road frontage and the main building line.</p>	<p>No example provided.</p>
<p>Lighting</p>	
<p>PO22</p> <p>Lighting is designed to provide adequate levels of illumination to public and communal spaces to maximise safety while minimising adverse impacts on sensitive land uses.</p>	<p>No example provided.</p>
<p>Amenity</p>	
<p>PO23</p> <p>The amenity of the area and adjacent sensitive land uses are protected from the impacts of dust, odour, chemicals and other environmental nuisances.</p>	<p>No example provided.</p>
<p>Noise</p>	
<p>PO24</p> <p>Noise generating uses do not adversely affect existing or potential noise sensitive uses.</p> <p>Note - The use of walls, barriers or fences that are visible from a road or adjoin a road or public area are not appropriate noise attenuation measure unless adjoining a motorway, arterial road or rail lines.</p> <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p>	<p>No example provided.</p>
<p>PO25</p> <p>Sensitive land uses are provided with an appropriate acoustic environment within designated external private outdoor living spaces and internal areas while:</p> <p>a. contributing to safe and usable public spaces, through maintaining high levels of surveillance of parks, streets and roads that serve active transport</p>	<p>E25.1</p> <p>Development is designed to meet the criteria outlined in the Planning Scheme Policy – Noise.</p> <hr/> <p>E25.2</p> <p>Noise attenuation structures (e.g. walls, barriers or fences):</p>

<p>purposes (e.g. existing or future pedestrian paths or cycle lanes etc);</p> <p>b. maintaining the amenity of the streetscape.</p> <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p> <p>Note - Refer to Planning Scheme Policy – Integrated design for details and examples of noise attenuation structures.</p>	<p>a. are not visible from an adjoining road or public area unless:</p> <ol style="list-style-type: none"> i. adjoining a motorway or rail line; or ii. adjoining part of an arterial road that does not serve an existing or future active transport purpose (e.g. pedestrian paths or cycle lanes) or where attenuation through building location and materials is not possible. <p>b. do not remove existing or prevent future active transport routes or connections to the street network;</p> <p>c. are located, constructed and landscaped in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Refer to Planning scheme policy – Integrated design for details and examples of noise attenuation structures.</p> <p>Note - Refer to Overlay map – Active transport for future active transport routes.</p>
<p>Hazardous Chemicals</p> <p>Note - To assist in demonstrating compliance with the following performance outcomes, a Hazard Assessment Report may be required to be prepared and submitted by a suitably qualified person in accordance with 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.</p> <p>Note - Terms used in this section are defined in 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.</p>	
<p>PO26</p> <p>Off sites risks from foreseeable hazard scenarios involving hazardous chemicals are commensurate with the sensitivity of the surrounding land use zones.</p>	<p>E26.1</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of land zoned for vulnerable or sensitive land uses as described below:</p> <p>Dangerous Dose</p> <ol style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ol style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. b. For any hazard scenario involving fire or explosion: <ol style="list-style-type: none"> i. 7kPa overpressure; ii. 4.7kW/m² heat radiation.

	<p>If criteria E26.1 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 0.5×10^{-6}/year.</p>
	<p>E26.2</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of a commercial or community activity land use zone as described below:</p> <p>Dangerous Dose</p> <ul style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ul style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air $<19.5\%$ or $>23.5\%$ at normal atmospheric pressure. b. For any hazard scenario involving fire or explosion: <ul style="list-style-type: none"> i. 7kPa overpressure; ii. 4.7kW/m² heat radiation. <p>If criteria E26.2 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 5×10^{-6}/year.</p>
	<p>E26.3</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of an industrial land use zone as described below:</p> <p>Dangerous Dose</p> <ul style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ul style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air $<19.5\%$ or $>23.5\%$ at normal atmospheric pressure. b. For any hazard scenario involving fire or explosion: <ul style="list-style-type: none"> i. 14kPa overpressure; ii. 12.6kW/m² heat radiation.

	If criteria E26.3 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 50×10^{-6} /year.
PO27 Buildings and package stores containing fire-risk hazardous chemicals are designed to detect the early stages of a fire situation and notify a designated person.	E27 Buildings and package stores containing fire-risk hazardous chemicals are provided with 24 hour monitored fire detection system for early detection of a fire event.
PO28 Common storage areas containing packages of flammable and toxic hazardous chemicals are designed with spill containment system(s) that are adequate to contain releases, including fire fighting media.	E28 Storage areas containing packages of flammable and toxic hazardous chemicals are designed with spill containment system(s) capable of containing a minimum of the total aggregate capacity of all packages plus the maximum operating capacity of any fire protection system for the storage area(s) over a minimum of 60 minutes.
PO29 Storage and handling areas, including manufacturing areas, containing hazardous chemicals in quantities greater than 2,500L or kg within a Local Government "flood hazard area" are located and designed in a manner to minimise the likelihood of inundation of flood waters from creeks, rivers, lakes or estuaries.	E29.1 The base of any tank with a WC >2,500L or kg is higher than any relevant flood height level identified in an area's flood hazard area. Alternatively: a. bulk tanks are anchored so they cannot float if submerged or inundated by water; and b. tank openings not provided with a liquid tight seal, i.e. an atmospheric vent, are extended above the relevant flood height level.
	E29.2 The lowest point of any storage area for packages >2,500L or kg is higher than any relevant flood height level identified in an area's flood hazard area. Alternatively, package stores are provided with impervious bund walls or racking systems higher than the relevant flood height level.
Clearing of habitat trees where not located within the Environmental areas overlay map	
PO30 a. Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected. b. Development does not result in the net loss of fauna habitat. Where development does result in the loss of a habitat tree, development will provide replacement fauna nesting boxes at the following rate of 1 nest box for every hollow removed. Where	No example provided.

6 Zones

<p>hollows have not yet formed in trees > 80cm in diameter at 1.3m height, 3 nest boxes are required for every habitat tree removed.</p> <p>c. Development does not result in soil erosion or land degradation or leave land exposed for an unreasonable period of time but is rehabilitated in a timely manner</p> <p>Note: Further guidance on habitat trees is provided in Planning scheme policy - Environmental areas</p>

Works criteria	
Utilities	
<p>PO</p> <p>All services including water supply, sewage disposal, electricity, street lighting, telecommunications and gas (if available) are provided in accordance with Planning scheme policy - Integrated design (Appendix A).</p>	<p>E</p> <p>No example provided.</p>
<p>PO31</p> <p>Where the site adjoins or is opposite to a Park⁽⁵⁷⁾, foreshore or Humpybong Reserve all existing overhead power lines are to be undergrounded for the full frontage of the site.</p>	<p>No example provided.</p>
<p>PO32</p> <p>The development is connected to an existing reticulated electricity supply system approved by the relevant energy regulating authority.</p>	<p>E32</p> <p>Development is connected to underground electricity.</p>
<p>PO33</p> <p>The development has access to telecommunications and broadband services in accordance with current standards.</p>	<p>No example provided.</p>
<p>PO34</p> <p>Where available the development is to safely connect to reticulated gas.</p>	<p>No example provided.</p>
<p>PO35</p> <p>The development provides for the treatment and disposal of sewage and other waste water in a way that will not cause environmental harm or pose a risk to public health.</p>	<p>E35.1</p> <p>Where in a sewered area, the development is connected to a reticulated sewerage network.</p>
	<p>E35.2</p>

	Trade waste is pre-treated on-site prior to discharging into the sewerage network.
<p>PO36</p> <p>The development is provided with an adequate and sustainable supply of potable (drinking and general use e.g. gardening, washing, fire fighting) water.</p>	<p>E36</p> <p>Where in an existing connections area or a future connections area as detailed in the Unitywater Connections Policy, the development is connected to the reticulated water supply system in accordance with the South East Queensland Water Supply and Sewerage Design and Construction Code and the relevant Water Service Association of Australia (WSAA) codes and standards.</p>
<p>PO37</p> <p>The development is provided with constructed and dedicated road access.</p>	No example provided.

Access	
<p>PO38</p> <p>Development provides functional and integrated car parking and vehicle access, that:</p> <ol style="list-style-type: none"> prioritises the movement and safety of pedestrians between car parking areas at the rear through to the 'main street' and the entrance to the building (e.g. rear entry, arcade etc.); provides safety and security of people and property at all times; does not impede active transport options; does not impact on the safe and efficient movement of traffic external to the site; where possible vehicle access points are consolidated and shared with adjoining sites. <p>Note - Refer to Planning scheme policy - Centre and neighbourhood hub design for details and examples.</p>	No example provided.
<p>PO39</p> <p>Where required, access easements contain a driveway and provision for services appropriate to the use. The easement covers all works associated with the access in accordance with Planning scheme policy - Integrated design.</p>	No example provided.
<p>PO40</p> <p>The layout of the development does not compromise:</p> <ol style="list-style-type: none"> the development of the road network in the area; 	<p>E40.1</p> <p>Direct vehicle access for residential development does not occur from arterial or sub-arterial roads or a motorway.</p>

6 Zones

<p>b. the function or safety of the road network;</p> <p>c. the capacity of the road network.</p> <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p>	<p>Editor's note - Residential developments should consider amalgamation with the lot to the rear and gaining access via a laneway.</p> <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p> <p>E40.2</p> <p>The development provides for the extension of the road network in the area in accordance with Council's road network planning.</p> <p>E40.3</p> <p>The development does not compromise future road widening of frontage roads in accordance with the relevant standard and Council's road planning.</p> <p>E40.4</p> <p>The lot development layout allows forward vehicular access to and from the site.</p>
<p>PO41</p> <p>Safe access is provided for all vehicles required to access the site.</p>	<p>E41.1</p> <p>Site access and driveways are designed and, located and constructed in accordance with:</p> <p>a. where for a Council-controlled road and associated with a Dwelling house:</p> <p>i. Planning scheme policy - Integrated design;</p> <p>b. Where for a Council-controlled road; and not associated with a Dwelling house:</p> <p>i. AS/NZS2890.1 section 3; or Parking facilities Part 1: Off street car parking;</p> <p>ii. AS 2890.2 - Parking facilities Part 2: Off-street commercial vehicle facilities;</p> <p>iii. Planning scheme policy - Integrated design;</p> <p>iv. Schedule 8 - Service vehicle requirements;</p> <p>c. Where for a State-Controlled road, the Safe Intersection Sight Distance requirements in AustR roads and the appropriate IPWEAQ standard drawings, or a copy of a Transport Infrastructure Act 1994, section 62 approval.</p> <p>E41.2</p>

	<p>Internal driveways, car parks and access ways are designed and constructed with a sealed pavement and in accordance with:</p> <ol style="list-style-type: none"> AS/NZS 2890.1 Parking Facilities Part 1:– Off street car parking; AS 2890.2 Parking Facilities Part 2: Off street commercial vehicle facilities; and the relevant standards in Planning scheme policy - Integrated design; and Schedule 8 - Service vehicle requirements. <p>Note - This includes queue lengths (refer to Schedule 8 - Service vehicle requirements), pavement widths and construction.</p>
	<p>E41.3</p> <p>Access driveways, manoeuvring areas and loading facilities are sealed and provide for service vehicles listed in Schedule 8 - Service vehicle requirements for the relevant use. The on-site manoeuvring is to be in accordance with Schedule 8 - Service vehicle requirements.</p>
	<p>E</p> <p>Landscaping (including shade trees) is provided within car parks in accordance with Planning scheme policy - Integrated design.</p>
<p>PO</p> <p>Sealed and flood free road access during the minor storm event is available to the site from the nearest arterial or sub-arterial road.</p> <p>Editor's Note - Where associated with a State-controlled road, further requirements may apply, and approvals may be required from the Department of Transport and Main Roads.</p>	<p>E</p> <p>Roads or streets giving access to the development from the nearest arterial or sub-arterial road are flood free during the minor storm event and are sealed.</p> <p>Note - The road network is mapped on Overlay Map - Road Hierarchy.</p>
<p>PO</p> <p>Roads which provide access to the site from an arterial or sub-arterial road remain trafficable during major storm events without flooding or impacting upon residential properties or other premises.</p>	<p>E</p> <p>Access roads to the development have sufficient longitudinal and cross drainage to remain safely trafficable during major storm (1% AEP) events.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - Refer to QUDM for requirements regarding trafficability.</p>
	<p>E</p>

6 Zones

	<p>Culverts and causeways do not increase inundation levels or increase velocities, for all events up to the defined flood event, to upstream or downstream properties.</p>
<p>Street design and layout</p>	
<p>PO</p> <p>Streets are designed and constructed in accordance with Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures. The street design and construction accommodates the following functions:</p> <ol style="list-style-type: none"> a. access to premises by providing convenient vehicular movement for residents between their homes and the major road network; b. safe and convenient pedestrian and cycle movement; c. adequate on street parking; d. stormwater drainage paths and treatment facilities; e. efficient public transport routes; f. utility services location; g. emergency access and waste collection; h. setting and approach (streetscape, landscaping and street furniture) for adjoining residences; i. expected traffic speeds and volumes; and j. wildlife movement. <p>Note - Preliminary road design (including all services, street lighting, stormwater infrastructure, access locations, street trees and pedestrian network) may be required to demonstrate compliance with this PO.</p> <p>Note - Refer to Planning scheme policy - Environmental areas and corridors for examples of when and where wildlife movement infrastructure is required.</p>	<p>E</p> <p>No example provided</p>
<p>PO42</p> <p>Upgrade works (whether trunk or non-trunk) are provided where necessary to:-</p> <ol style="list-style-type: none"> a. ensure the type or volume of traffic generated by the development does not have a negative impact on the external road network;- 	<p>E</p> <p>No example provided.</p> <p>New intersections onto existing roads are designed to accommodate traffic volumes and traffic movements taken from a date 10 years from the date of completion of the last stage of the development. Detailed design is to be in accordance with Planning scheme policy - Integrated design.</p>

<p>b. ensure the orderly and efficient continuation of the active transport network;</p> <p>c. ensure the site frontage is constructed to a suitable urban standard generally in accordance with Planning scheme policy – Integrated design.</p> <p>Note – An Integrated Transport Assessment (ITA) may be required to demonstrate compliance with this performance outcome refer to Planning scheme policy – Integrated transport assessment for guidance on when an ITA is required. An ITA should be prepared in accordance with Planning scheme policy – Integrated transport assessment.</p> <p>Note – The road network is mapped on Overlay map – Road hierarchy.</p> <p>Note – The primary and secondary active transport network is mapped on Overlay map – Active transport</p> <p>Note – To demonstrate compliance with c. of this performance outcome, site frontage works where in existing road reserve (non-trunk) are to be designed and constructed as follows:</p> <p>i. Where the street is partially established to an urban standard, match the alignment of existing kerb and channel and provide carriageway widening and underground drainage where required; or</p> <p>ii. Where the street is not established to an urban standard, prepare a design that demonstrates how the relevant features of the particular road as shown in the Planning scheme policy – Integrated Design can be achieved in the existing reserve.</p> <p>Note – Refer to Planning scheme policy – Integrated design for road network and active transport network design standards.</p> <p>The existing road network (whether trunk or non-trunk) is upgraded where necessary to cater for the impact from the development.</p> <p>Note - An applicant will be required to submit an Integrated Transport Assessment (ITA), prepared in accordance with Planning scheme policy - Integrated transport assessment to demonstrate compliance with this PO, when any of the following occurs;</p> <ul style="list-style-type: none"> • development is within 200m of a transport sensitive location such as a school, shopping centre, bus or train station or a large generator of pedestrian or vehicular traffic; • forecast traffic to/from the development exceeds 5% of the two way flow on the adjoining road or intersection in the morning or afternoon transport peak within 10 years of the development completion; • Development access onto a sub arterial, or arterial road or within 100m of a signalised intersection; • Residential development greater than 50 lots or dwellings; • Offices greater than 4,000m² Gross Floor Area (GFA); • Retail activities including Hardware and trade supplies; • Showroom, Shop or Shopping centre greater than 1,000m² GFA; 	<p>Note - All turns vehicular access to existing lots is to be retained at new road intersections wherever practicable.</p> <p>Note - Existing on-street parking is to be retained at new road intersections and along road frontages wherever practicable.</p> <p>E</p> <p>Existing intersections external to the site are upgraded as necessary to accommodate increased traffic from the development. Design is in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p> <p>Note - All turns vehicular access to existing lots is to be retained at new road intersections wherever practicable.</p> <p>Note - Existing on-street parking is to be retained at upgraded road intersections and along road frontages wherever practicable.</p> <p>E</p> <p>The active transport network is extended in accordance with Planning scheme policy - Integrated design.</p>

<p>PO55</p> <p>Embankments are stepped, terraced and landscaped to not adversely impact on the visual amenity of the surrounding area.</p>	<p>E55</p> <p>Any embankments more than 1.5 metres in height are stepped, terraced and landscaped.</p> <p>Figure - Embankment</p> 
<p>PO56</p> <p>Filling or excavation is undertaken in a manner that:</p>	<p>E56.1</p> <p>No filling or excavation is undertaken in an easement issued in favour of Council or a public sector entity.</p>

<p>a. does not adversely impact on a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land;</p> <p>b. does not preclude reasonable access to a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p>	<p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p> <p>E56.2</p> <p>Filling or excavation that would result in any of the following is not carried out on-site:</p> <p>a. a reduction in cover over any Council or public sector entity infrastructure service to less than 600mm;</p> <p>b. an increase in finished surface grade over, or within 1.5m on each side of, the Council or public sector entity infrastructure above that which existed prior to the earthworks being undertaken;</p> <p>c. prevent reasonable access to Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the site for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity as is defined in the Sustainable Planning Schedule 2 of the Act 2009.</p>
<p>PO57</p> <p>Filling or excavation does not result in land instability.</p> <p>Note - Steep rock slopes and batters are inspected and certified for long-term stability by a suitably qualified and experienced geotechnical engineer with RPEQ qualifications. Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance.</p>	<p>No example provided.</p>
<p>PO58</p> <p>Development Filling or excavation does not result in:</p> <p>a. adverse impacts on the hydrological and hydraulic capacity of the waterway or floodway;</p> <p>b. increased flood inundation outside the site;</p> <p>c. any reduction in the flood storage capacity in the floodway;</p> <p>d. and any clearing of native vegetation.</p> <p>Note - To demonstrate compliance with this outcome, Planning Scheme Policy - Stormwater Management provides guidance on the preparation of a site based stormwater management plan by a suitably qualified professional. Refer to Planning scheme policy - Integrated design for guidance on infrastructure design and modelling requirements.</p>	<p>No example provided.</p>
<p>PO</p>	<p>E</p> <p>Filling and excavation undertaken on the development site are shaped in a manner which does not:</p>

6 Zones

<p>Filling or excavation on the development site is undertaken in a manner which does not create or accentuate problems associated with stormwater flows and drainage systems on land adjoining the site.</p>	<ol style="list-style-type: none"> a. prevent stormwater surface flow which, prior to commencement of the earthworks, passed onto the development site, from entering the land; or b. redirect stormwater surface flow away from existing flow paths; or c. divert stormwater surface flow onto adjacent land, (other than a road), in a manner which: <ol style="list-style-type: none"> i. concentrates the flow; or ii. increases the flow rates of stormwater over the affected section of the adjacent land above the situation which existed prior to the diversion; or iii. causes actionable nuisance to any person, property or premises.
---	---

Retaining walls and structures

<p>PO59</p> <p>All earth retaining structures provide a positive interface with the streetscape and minimise impacts on the amenity of adjoining residents.</p> <p>Note - Refer to Planning scheme policy - Residential design for guidance on how to achieve compliance with this performance outcome.</p>	<p>E59</p> <p>Earth retaining structures:-</p> <ol style="list-style-type: none"> a. are not constructed of boulder rocks or timber; b. where height is no greater than 900mm, are provided in accordance with Figure -- Retaining on a boundary; <p style="text-align: center;">Figure -- Retaining on boundary</p>  <ol style="list-style-type: none"> c. where height is greater than 900mm but no greater than 1.5m, are to be setback at least the equivalent height of the retaining structure from any property boundary; d. where height is greater than 1.5m, are to be setback and stepped 1.5m vertical: 1.5m horizontal, terraced, landscaped and drained as shown below. <p style="text-align: center;">Figure -- Cut</p>
--	---

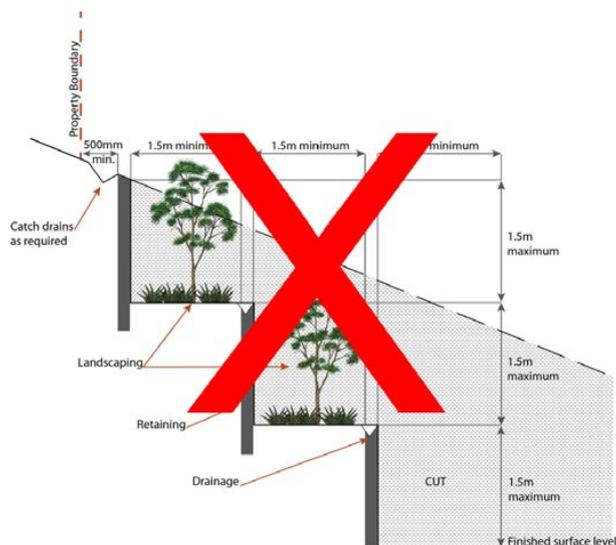

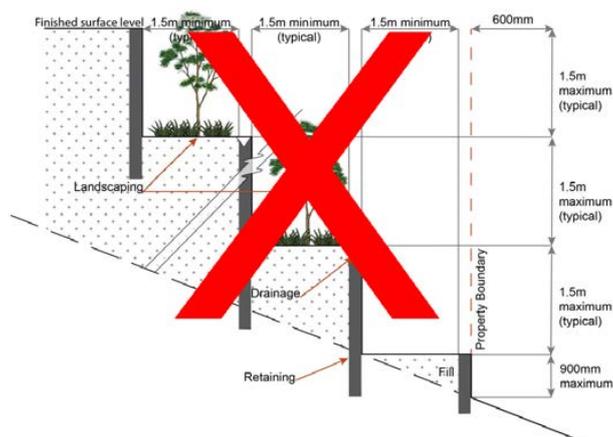

Figure -- Fill

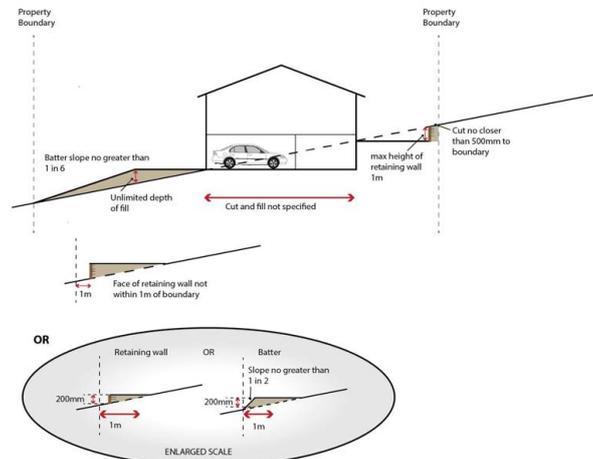

Filling or excavation does not:

- a. involve a change in level of more than 1.0m relative to natural ground level;
- OR**
- b. necessitate the construction of a freestanding retaining wall exceeding 1.0m in height relative to finished ground level;
 - c. result in the top of any cut batter, or the exposed face of any freestanding retaining wall supporting that cut, being closer than 500mm to a property boundary;
 - d. result in the toe of any fill batter, or exposed face of any freestanding retaining wall supporting that fill, being closer than 1.0m to a property boundary unless:
 - i. the depth of fill within the 1.0m strip does not exceed 200mm relative to natural ground level; or

ii. the batter slope within that 1.0m strip is no steeper than 1V to 2H.

THE NEW FIGURE BELOW IS PROPOSED AS PART OF THIS AMENDMENT

Figure - Filling or Excavation

PO

All earth retaining structures are to be certified as being designed and constructed in accordance with relevant Australian Standards and Building Code requirements.

E

Retaining walls are designed and certified by a RPEQ so that:

- a. the minimum design life (the period assumed in design for which a structure or structural element is required to perform its intended purpose without replacement or major structural repairs) for the earth retaining structure is that specified in Australian Standard AS 4678 Earth-retaining structures;
- b. earth retaining structures within the land and around areas of cut on or near the boundaries of the site must be designed to allow for live and dead loads associated with the land/premise's current occupancy and use;
- c. where the adjoining land use rights or zoning allows for industrial uses a minimum live load of 25kPA must be allowed in the design of the retaining structure for these adjoining premises.

Note - Retaining walls will only be approved following submission of a full detailed design certified by a RPEQ.

Fire Services

Note - The provisions under this heading only apply if:

- a. the development is for, or incorporates:
 - i. reconfiguring a lot for a community title scheme creating 1 or more vacant lots; or
 - ii. material change of use for 2 or more sole occupancy units on the same lot, or within the same community titles scheme; or
 - iii. material change of use for a Tourist park⁽⁸⁴⁾ with accommodation in the form of caravans or tents; or
 - iv. material change of use for outdoor sales⁽⁵⁴⁾, outdoor processing or outdoor storage where involving combustible materials.

AND

- b. none of the following exceptions apply:
- i. the distributor-retailer for the area has indicated, in its netserv plan, that the premises will not be served by that entity's reticulated water supply; or
 - ii. every part of the development site is within 60m walking distance of an existing fire hydrant on the distributor-retailer's reticulated water supply network, measured around all obstructions, either on or adjacent to the site.

Note - The provisions under this heading do not apply to buildings that are required by the Building Code of Australia to have a fire hydrant system complying with Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations or other fire fighting facilities which provide equivalent protection.

PO60

Development incorporates a fire fighting system that:

- a. satisfies the reasonable needs of the fire fighting entity for the area;
- b. is appropriate for the size, shape and topography of the development and its surrounds;
- c. is compatible with the operational equipment available to the fire fighting entity for the area;
- d. considers the fire hazard inherent in the materials comprising the development and their proximity to one another;
- e. considers the fire hazard inherent in the surrounds to the development site;
- f. is maintained in effective operating order.

Note - The Queensland Fire and Emergency Services is the entity currently providing the fire fighting function for the urban areas of the Moreton Bay Region.

E60.1

External fire hydrant facilities are provided on site to the standard prescribed under the relevant parts of *Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations*.

Note - For this requirements for accepted development, the following are the relevant parts of AS 2419.1 (2005) that may be applicable:

- a. in regard to the form of any fire hydrant - Part 8.5 and Part 3.2.2.1, with the exception that for Tourist parks⁽⁸⁴⁾ or development comprised solely of dwellings and their associated outbuildings, single outlet above-ground hydrants or suitably signposted in-ground hydrants would be an acceptable alternative;
- b. in regard to the general locational requirements for fire hydrants - Part 3.2.2.2 (a), (e), (f), (g) and (h) as well as Appendix B of AS 2419.1 (2005);
- c. in regard to the proximity of hydrants to buildings and other facilities - Part 3.2.2.2 (b), (c) and (d), with the exception that:
 - i. for dwellings and their associated outbuildings, hydrant coverage need only extend to the roof and external walls of those buildings;
 - ii. for caravans and tents, hydrant coverage need only extend to the roof of those tents and caravans;
 - iii. for outdoor sales⁽⁵⁴⁾, processing or storage facilities, hydrant coverage is required across the entire area of the outdoor sales⁽⁵⁴⁾, outdoor processing and outdoor storage facilities;
- d. in regard to fire hydrant accessibility and clearance requirements - Part 3.5 and, where applicable, Part 3.6.

E60.2

A continuous path of travel having the following characteristics is provided between the vehicle access point to the site and each external fire hydrant and hydrant booster point on the land:

- a. an unobstructed width of no less than 3.5m;
- b. an unobstructed height of no less than 4.8m;
- c. constructed to be readily traversed by a 17 tonne HRV fire brigade pumping appliance;
- d. an area for a fire brigade pumping appliance to stand within 20m of each fire hydrant and 8m of each hydrant booster point.

E60.3

6 Zones

	<p>On-site fire hydrant facilities are maintained in effective operating order in a manner prescribed in <i>Australian Standard AS1851 (2012) – Routine service of fire protection systems and equipment</i>.</p>
<p>PO61</p> <p>On-site fire hydrants that are external to buildings, as well as the available fire fighting appliance access routes to those hydrants, can be readily identified at all times from, or at, the vehicular entry point to the development site.</p>	<p>E61</p> <p>For development that contains on-site fire hydrants external to buildings:</p> <ol style="list-style-type: none"> a. those external hydrants can be seen from the vehicular entry point to the site; or b. a sign identifying the following is provided at the vehicular entry point to the site: <ol style="list-style-type: none"> i. the overall layout of the development (to scale); ii. internal road names (where used); iii. all communal facilities (where provided); iv. the reception area and on-site manager’s office (where provided); v. external hydrants and hydrant booster points; vi. physical constraints within the internal roadway system which would restrict access by fire fighting appliances to external hydrants and hydrant booster points. <p>Note - The sign prescribed above, and the graphics used are to be:</p> <ol style="list-style-type: none"> a. in a form; b. of a size; c. illuminated to a level; <p>which allows the information on the sign to be readily understood, at all times, by a person in a fire fighting appliance up to 4.5m from the sign.</p>
<p>PO62</p> <p>Each on-site fire hydrant that is external to a building is signposted in a way that enables it to be readily identified at all times by the occupants of any firefighting appliance traversing the development site.</p>	<p>E62</p> <p>For development that contains on-site fire hydrants external to buildings, those hydrants are identified by way of marker posts and raised reflective pavement markers in the manner prescribed in the technical note <i>Fire hydrant indication system</i> produced by the Queensland Department of Transport and Main Roads.</p> <p>Note - Technical note Fire hydrant indication system is available on the website of the Queensland Department of Transport and Main Roads.</p>

Use specific criteria	
Home based business⁽³⁵⁾	
<p>PO63</p> <p>The scale and intensity of the Home based business⁽³⁵⁾:</p> <ol style="list-style-type: none"> a. is compatible with the physical characteristics of the site and the character of the local area; b. is able to accommodate anticipated car parking demand without negatively impacting the streetscape or road safety; c. does not adversely impact on the amenity of the adjoining and nearby premises; d. remains ancillary to the residential use of the dwelling house⁽²²⁾; e. does not create conditions which cause hazards or nuisances to neighbours or other persons not associated with the activity; f. ensures employees and visitors to the site do not negatively impact the expected amenity of adjoining properties. 	<p>E63.1</p> <p>A maximum of 1 employee (not a resident) OR 2 customers OR customers from within 1 Small rigid vehicle (SRV) or smaller are permitted on the site at any one time.</p> <hr/> <p>E63.2</p> <p>The home based business⁽³⁵⁾ occupies an area of the existing dwelling or on-site structure not greater than 40m² gross floor area.</p>
Major electricity infrastructure⁽⁴³⁾, Substation⁽⁸⁰⁾ and Utility installation⁽⁸⁶⁾	
<p>PO64</p> <p>The development does not have an adverse impact on the visual amenity of a locality and is:</p> <ol style="list-style-type: none"> a. high quality design and construction; b. visually integrated with the surrounding area; c. not visually dominant or intrusive; d. located behind the main building line; e. below the level of the predominant tree canopy or the level of the surrounding buildings and structures; f. camouflaged through the use of colours and materials which blend into the landscape; g. treated to eliminate glare and reflectivity; h. landscaped; i. otherwise consistent with the amenity and character of the zone and surrounding area. 	<p>E64.1</p> <p>Development is designed to minimise surrounding land use conflicts by ensuring infrastructure, buildings, structures and other equipment:</p> <ol style="list-style-type: none"> a. are enclosed within buildings or structures; b. are located behind the main building line; c. have a similar height, bulk and scale to the surrounding fabric; d. have horizontal and vertical articulation applied to all exterior walls. <hr/> <p>E64.2</p> <p>A minimum 3m wide strip of dense planting is provided around the outside of the fenced area, between the development and street frontage, side and rear boundaries.</p>
<p>PO65</p> <p>Infrastructure does not have an impact on pedestrian health and safety.</p>	<p>E65</p> <p>Access control arrangements:</p> <ol style="list-style-type: none"> a. do not create dead-ends or dark alleyways adjacent to the infrastructure; b. minimise the number and width of crossovers and entry points;

6 Zones

	<ul style="list-style-type: none"> c. provide safe vehicular access to the site; d. do not utilise barbed wire or razor wire. 																		
<p>PO66</p> <p>All activities associated with the development occur within an environment incorporating sufficient controls to ensure the facility:</p> <ul style="list-style-type: none"> a. generates no audible sound at the site boundaries where in a residential setting; or b. meet the objectives as set out in the Environmental Protection (Noise) Policy 2008. 	<p>E66</p> <p>All equipment which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure noise emissions meet the objectives as set out in the Environmental Protection (Noise) Policy 2008.</p>																		
Residential uses																			
<p>PO67</p> <p>Caretaker's accommodation⁽¹⁰⁾ and Dwelling units⁽²³⁾ are provided with adequate functional and attractive private open space that is:</p> <ul style="list-style-type: none"> a. directly accessible from the dwelling and is located so that residents and neighbouring uses experience a suitable level of amenity; b. designed and constructed to achieve adequate privacy for occupants from other dwelling units⁽²³⁾ and centre uses; c. accessible and readily identifiable for residents, visitors and emergency services; d. located to not compromise active frontages. 	<p>E67</p> <p>A dwelling has a clearly defined, private outdoor living space that is:</p> <ul style="list-style-type: none"> a. as per the table below; <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: center;">Use</th> <th style="text-align: center;">Minimum Area</th> <th style="text-align: center;">Minimum Dimension in all directions</th> </tr> </thead> <tbody> <tr> <td colspan="3">Ground level floor dwellings</td> </tr> <tr> <td>All dwelling types</td> <td style="text-align: center;">16m²</td> <td style="text-align: center;">4m</td> </tr> <tr> <td colspan="3">Above ground level floor dwellings</td> </tr> <tr> <td>1 bedroom or studio,</td> <td style="text-align: center;">8m²</td> <td style="text-align: center;">2.5m</td> </tr> <tr> <td>2 or more bedrooms</td> <td style="text-align: center;">12m²</td> <td style="text-align: center;">3.0m</td> </tr> </tbody> </table> <ul style="list-style-type: none"> b. accessed from a living area; c. sufficiently screened or elevated for privacy; d. ground level floor open space is located behind the main building line and not within the primary or secondary frontage setbacks; e. balconies orientate to the street; f. clear of any non-recreational structure (including but not limited to air-conditioning units, water tanks, clothes drying facilities, storage structures, retaining structures and refuse storage areas). <p>Note - Areas for clothes drying are not visible from street frontages or public areas (e.g. Separate clothes drying areas are provided that are oriented to the side or rear of the site or screening is provided).</p>	Use	Minimum Area	Minimum Dimension in all directions	Ground level floor dwellings			All dwelling types	16m ²	4m	Above ground level floor dwellings			1 bedroom or studio,	8m ²	2.5m	2 or more bedrooms	12m ²	3.0m

<p>Caretaker's accommodation⁽¹⁰⁾ and Dwelling units⁽²³⁾ are provided with a reasonable level of access, identification and privacy from adjoining residential and non-residential uses.</p> <p>Note - Refer to State Government standards for CPTED.</p> <p>Note - Refer to Planning scheme policy - Residential design for details and examples.</p>	<p>a. includes screening to a maximum external transparency of 50% for all habitable room windows that are visible from other dwellings and non-residential uses;</p> <p>b. clearly displays the street number at the entrance to the dwelling and at the front of the site to enable identification by emergency services;</p> <p>c. is provided with a separate entrance to that of any non-residential use on the site;</p> <p>d. where located on a site with a non-residential use the dwelling is located behind or above the non-residential use.</p> <p>Note - External fixed or movable screening, opaque glass and window tinting are considered acceptable forms of screening.</p>
<p>Service station</p> <p>Note - Where the use specific outcomes relating to Service Stations are inconsistent with other examples or Performance Outcomes in this Code, the use specific outcomes below prevail.</p>	
<p>PO</p> <p>Service stations are located, designed and orientated to:</p> <p>a. establish on heavily trafficked roads where the amenity of surrounding residential uses is already subject to impacts by road vehicle noise;</p> <p>b. not negatively impact active streets, public spaces or hubs of activity where the pedestrian safety and comfort is of high importance;</p> <p>c. not result in the fragmentation of active streets (e.g. site where active uses are located on adjoining lots);</p> <p>d. ensure the amenity of adjoining properties is protected;</p> <p>e. reduce the visual impact of the Service station from the streetscape while maintaining surveillance from the site to the street;</p> <p>f. minimise impacts on adjoining residential uses, to a level suitable relative to expected residential amenity of the area. (e.g. high order road in urban or next generation neighbourhood, likely to be noisy and not like suburban);</p> <p>g. provide ancillary uses that meet the convenience needs of users.</p>	<p>E</p> <p>Service stations are located:</p> <p>a. on the periphery of the Centre adjoining or within 100m of land zoned other than Centre zone;</p> <p>b. on the corner lot of an arterial or sub-arterial road.</p> <p>E</p> <p>Service stations are designed and orientated on site to:</p> <p>a. include a landscaping strip having a minimum depth of 1m adjoining all road frontages;</p> <p>b. buildings and structures (including fuel pump canopies) are setback a minimum of 3m from the primary and secondary frontage and a minimum of 5m from side and rear boundaries;</p> <p>c. include a screen fence, of a height and standard in accordance with a noise impact assessment (Note - Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise), on side and rear boundaries where adjoining land is able to contain a residential use;</p> <p>d. not include more than 2 driveway crossovers.</p>
<p>Telecommunications facility⁽⁸¹⁾</p>	

6 Zones

<p>Editor's note - In accordance with the Federal legislation Telecommunications facilities ⁽⁸¹⁾ must be constructed and operated in a manner that will not cause human exposure to electromagnetic radiation beyond the limits outlined in the Radiocommunications (Electromagnetic Radiation - Human Exposure) Standard 2003 and Radio Protection Standard for Maximum Exposure Levels to Radiofrequency Fields - 3Khz to 300Ghz.</p>	
<p>PO69</p> <p>Telecommunications facilities⁽⁸¹⁾ are co-located with existing telecommunications facilities⁽⁸¹⁾, Utility installation⁽⁸⁶⁾, Major electricity infrastructure⁽⁴³⁾ or Substation⁽⁸⁰⁾ if there is already a facility in the same coverage area.</p>	<p>E69.1</p> <p>New telecommunication facilities⁽⁸¹⁾ are co-located on existing towers with new equipment shelter and associated structures positioned adjacent to the existing shelters and structures.</p>
	<p>E69.2</p> <p>If not co-located with an existing facility, all co-location opportunities have been investigated and fully exhausted within a 2km radius of the site.</p>
<p>PO70</p> <p>A new Telecommunications facility⁽⁸¹⁾ is designed and constructed to ensure co-masting or co-siting with other carriers both on the tower or pole and at ground level is possible in the future.</p>	<p>E70</p> <p>A minimum of area 45m² is available at ground level to allow for additional equipment shelters and associated structures for the purpose of co-locating on the proposed facility.</p>
<p>PO71</p> <p>Telecommunications facilities⁽⁸¹⁾ do not conflict with lawful existing land uses both on and adjoining the site.</p>	<p>E71</p> <p>The development results in no net reduction in the minimum quantity and standard of landscaping, private or communal open space or car parking spaces required under the planning scheme or under an existing development approval.</p>
<p>PO72</p> <p>The Telecommunications facility⁽⁸¹⁾ does not have an adverse impact on the visual amenity of a locality and is:</p> <ol style="list-style-type: none"> high quality design and construction; visually integrated with the surrounding area; not visually dominant or intrusive; located behind the main building line; below the level of the predominant tree canopy or the level of the surrounding buildings and structures; camouflaged through the use of colours and materials which blend into the landscape; treated to eliminate glare and reflectivity; landscaped; otherwise consistent with the amenity and character of the zone and surrounding area. 	<p>E72.1</p> <p>Where in an urban area, the development does not protrude more than 5m above the level of the existing treeline, prominent ridgeline or building rooftops in the surrounding townscape.</p>
	<p>E72.2</p> <p>In all other areas towers do not exceed 35m in height.</p>
	<p>E72.3</p> <p>Towers, equipment shelters and associated structures are of a design, colour and material to:</p> <ol style="list-style-type: none"> reduce recognition in the landscape; reduce glare and reflectivity.
	<p>E72.4</p>

	<p>All structures and buildings are setback behind the main building line and a minimum of 10m from side and rear boundaries, except where in the Industry and Extractive industry zones, the minimum side and rear setback is 3m.</p> <p>Where there is no established building line the facility is located at the rear of the site.</p>
	<p>E72.5</p> <p>The facility is enclosed by security fencing or by other means to ensure public access is prohibited.</p>
	<p>E72.6</p> <p>A minimum 3m wide strip of dense planting is provided around the perimeter of the fenced area, between the facility and street frontage and adjoining uses.</p> <p>Note - Landscaping is provided in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person, to ensure compliance with Planning scheme policy - Integrated design.</p>
<p>PO73</p> <p>Lawful access is maintained to the site at all times that does not alter the amenity of the landscape or surrounding uses.</p>	<p>E73</p> <p>An Access and Landscape Plan demonstrates how 24 hour vehicular access will be obtained and maintained to the facility in a manner that is appropriate to the site's context.</p>
<p>PO74</p> <p>All activities associated with the development occur within an environment incorporating sufficient controls to ensure the facility generates no audible sound at the site boundaries where in a residential setting.</p>	<p>E74</p> <p>All equipment comprising the Telecommunications facility⁽⁸¹⁾ which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure no noise from this equipment can be heard, or felt at the site boundary.</p>
<p>Values and constraints criteria</p> <p>Note - The relevant values and constraints criteria do not apply where the development is consistent with a current Development permit for Reconfiguring a lot or Material change of use or Operational work, where that approval has considered and addressed (e.g. through a development footprint plan (or similar in the case of Landslide hazard) or conditions of approval) the identified value or constraint under this planning scheme.</p>	
<p>Acid sulfate soils - (refer Overlay map - Acid sulfate soils to determine if the following assessment criteria apply)</p> <p>Note - To demonstrate achievement of the performance outcome, an Acid sulfate soils (ASS) investigation report and soil management plan is prepared by a qualified engineer. Guidance for the preparation an ASS investigation report and soil management plan is provided in Planning scheme policy - Acid sulfate soils.</p>	

6 Zones

<p>PO75</p> <p>Development avoids disturbing acid sulfate soils. Where development disturbs acid sulfate soils, development:</p> <ol style="list-style-type: none"> is managed to avoid or minimise the release of surface or groundwater flows containing acid and metal contaminants into the environment; protects the environmental and ecological values and health of receiving waters; protects buildings and infrastructure from the effects of acid sulfate soils. 	<p>E75</p> <p>Development does not involve:</p> <ol style="list-style-type: none"> excavation or otherwise removing of more than 100m³ of soil or sediment where below than 5m Australian Height datum AHD; or filling of land of more than 500m³ of material with an average depth of 0.5m or greater where below the 5m Australian Height datum AHD.
<p>Environmental areas (refer Overlay map - Environmental areas to determine if the following assessment criteria apply)</p> <p>Note – The following are excluded from the native vegetation clearing provisions of this planning scheme:</p> <ol style="list-style-type: none"> Clearing of native vegetation located within an approved development footprint; Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental Management and Conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence; Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes; Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council; Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens; Grazing of native pasture by stock; Native forest practice where accepted development under Part 1, 1.7.7 Accepted development <p>Note - Definition for native vegetation is located in Schedule 1 Definitions.</p> <p>Note - Native vegetation subject to this criteria primarily comprises of matters of national environmental significance (MNES), matters of state environmental significance (MSES). They also comprise some matters of local environmental significance (MLES). A MLES is defined in Schedule 1.2, Administrative definitions. A list of the elements that apply to the mapped MSES and MLES is provided in Appendix 1 of the Planning scheme policy - Environmental areas.</p> <p>Editors' Note - The accuracy of overlay mapping can be challenged through the development application process (code assessable development) or by way of a planning scheme amendment. See Council's website for details.</p> <p>Note - To demonstrate achievement of the performance outcome, an ecological assessment, vegetation management plan and fauna management plan, as required, are prepared by a suitably qualified person. Guidance for the preparation of above mentioned reports is provided in Planning scheme policy - Environmental areas.</p>	
<p>Vegetation clearing, ecological value and connectivity</p>	
<p>PO76</p>	<p>No example provided.</p>

<p>Development avoids locating in a High Value Area or a Value Offset Area. Where it is not practicable or reasonable for development to avoid establishing in these areas, development must ensure that:</p> <ol style="list-style-type: none"> a. the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area is maintained and not lost or degraded; b. on-site mitigation measures, mechanisms or processes are in place demonstrating the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area are maintained. For example, this can be achieved through replacement, restoration or rehabilitation planting as part of any proposed covenant, the development of a Vegetation Management Plan, a Fauna Management Plan, and any other on-site mitigation options identified in the Planning scheme policy - Environmental areas*. <p>* Editor's note - This is not a requirement for an environmental offset under the Environmental Offsets Act 2014.</p>	
<p>PO77</p> <p>Development provides for safe, unimpeded, convenient and ongoing wildlife movement and establishes and maintains habitat connectivity by:</p> <ol style="list-style-type: none"> a. retaining habitat trees; b. providing contiguous patches of habitat; c. provide replacement and rehabilitation planting to improve connectivity; d. avoiding the creation of fragmented and isolated patches of habitat; e. providing wildlife movement infrastructure. <p>Editor's note - Wildlife movement infrastructure may include refuge poles, tree boulevarding, 'stepping stone' vegetation plantings, tunnels, appropriate wildlife fencing; culverts with ledges, underpasses, overpasses, land bridges and rope bridges. Further information is provided in Planning scheme policy – Environmental areas.</p>	No example provided.
Vegetation clearing and habitat protection	
<p>PO78</p> <p>Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected.</p>	No example provided.
<p>PO79</p>	No example provided.

6 Zones

<p>Development does not result in the net loss or degradation of habitat value in a High Value Area or a Value Offset Area. Where development does result in the loss or degradation of habitat value, development will:</p> <ol style="list-style-type: none"> rehabilitate, revegetate, restore and enhance an area to ensure it continues to function as a viable and healthy habitat area; provide replacement fauna nesting boxes in the event of habitat tree loss in accordance with Planning scheme policy - Environmental areas; undertake rehabilitation, revegetation and restoration in accordance with the South East Queensland Ecological Restoration Framework. 	
<p>PO80</p> <p>Development ensures safe, unimpeded, convenient and ongoing wildlife movement and habitat connectivity by:</p> <ol style="list-style-type: none"> providing contiguous patches of habitat; avoiding the creation of fragmented and isolated patches of habitat; providing wildlife movement infrastructure; providing replacement and rehabilitation planting to improve connectivity. 	<p>No example provided.</p>
<p>Vegetation clearing and soil resource stability</p>	
<p>PO81</p> <p>Development does not:</p> <ol style="list-style-type: none"> result in soil erosion or land degradation; leave cleared land exposed for an unreasonable period of time but is rehabilitated in a timely manner. 	<p>No example provided.</p>
<p>Vegetation clearing and water quality</p>	
<p>PO82</p> <p>Development maintains or improves the quality of groundwater and surface water within, and downstream, of a site by:</p> <ol style="list-style-type: none"> ensuring an effective vegetated buffers and setbacks from waterbodies is retained to achieve natural filtration and reduce sediment loads; avoiding or minimising changes to landforms to maintain hydrological water flows; adopting suitable measures to exclude livestock from entering a waterbody where a site is being used for animal husbandry⁽⁴⁾ and animal keeping⁽⁵⁾ activities. 	<p>No example provided.</p>
<p>PO83</p> <p>Development minimises adverse impacts of stormwater run-off on water quality by:</p>	<p>No example provided.</p>

<ul style="list-style-type: none"> a. minimising flow velocity to reduce erosion; b. minimising hard surface areas; c. maximising the use of permeable surfaces; d. incorporating sediment retention devices; e. minimising channelled flow. 	
Vegetation clearing and access, edge effects and urban heat island effects	
<p>PO84</p> <p>Development retains safe and convenient public access in a manner that does not result in the adverse edge effects or the loss or degradation of biodiversity values within the environment.</p>	No example provided.
<p>PO85</p> <p>Development minimises potential adverse 'edge effects' on ecological values by:</p> <ul style="list-style-type: none"> a. providing dense planting buffers of native vegetation between a development and environmental areas; b. retaining patches of native vegetation of greatest possible size where located between a development and environmental areas ; c. restoring, rehabilitating and increasing the size of existing patches of native vegetation; d. ensuring that buildings and access (public and vehicle) are setback as far as possible from environmental areas and corridors; e. landscaping with native plants of local origin. <p>Editor's note - Edge effects are factors of development that go to detrimentally affecting the composition and density of natural populations at the fringe of natural areas. Factors include weed invasion, pets, public and vehicle access, nutrient loads, noise and light pollution, increased fire frequency and changes in the groundwater and surface water flow.</p>	No example provided.
<p>PO86</p> <p>Development avoids adverse microclimate change and does not result in increased urban heat island effects. Adverse urban heat island effects are minimised by:</p> <ul style="list-style-type: none"> a. pervious surfaces; b. providing deeply planted vegetation buffers and green linkage opportunities; c. landscaping with local native plant species to achieve well-shaded urban places; d. increasing the service extent of the urban forest canopy. 	No example provided.
Vegetation clearing and Matters of Local Environmental Significance (MLES) environmental offsets	
PO87	No example provided.

6 Zones

<p>Where development results in the unavoidable loss of native vegetation within a Value Offset Area MLES waterway buffer or a Value Offset Area MLES wetland buffer, an environmental offset is required in accordance with the environmental offset requirements identified in Planning scheme policy - Environmental areas.</p> <p>Editor's note - For MSES Koala Offsets, the environmental offset provisions in Schedule 11 of the Regulation, in combination with the requirements of the Environmental Offsets Act 2014, apply.</p>	
<p>Heritage and landscape character (refer Overlay map - Heritage and landscape character to determine if the following assessment criteria apply)</p> <p>Note - To assist in demonstrating achievement of heritage performance outcomes, a Cultural heritage impact assessment report is prepared by a suitably qualified person verifying the proposed development is in accordance with The Australia ICOMOS Burra Charter.</p> <p>Note - To assist in demonstrating achievement of this performance outcome, a Tree assessment report is prepared by a qualified arborist in accordance with Planning scheme policy – Heritage and landscape character. The Tree assessment report will also detail the measures adopted in accordance with AS 4970-2009 Protection of trees on development sites.</p> <p>Note - Places, including sites, objects and buildings having local cultural heritage significance, are identified on Overlay map - Heritage and landscape character and listed in Schedule 1 of Planning scheme policy - Heritage and landscape character. Places also having cultural heritage significance at a State level and being entered in the Queensland Heritage Register, are also identified in Schedule 1 of Planning scheme policy - Heritage and landscape character.</p>	
<p>PO88</p> <p>Development will:</p> <ol style="list-style-type: none"> not diminish or cause irreversible damage to the cultural heritage values present on the site, and associated with a heritage site, object or building; protect the fabric and setting of the heritage site, object or building; be consistent with the form, scale and style of the heritage site, object or building; utilise similar materials to those existing, or where this is not reasonable or practicable, neutral materials and finishes; incorporate complementary elements, detailing and ornamentation to those present on the heritage site, object or building; retain public access where this is currently provided. 	<p>E88</p> <p>Development is for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value.</p> <p>Note - A cultural heritage conservation management plan for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value is prepared in accordance with Planning scheme policy - Heritage and landscape character. The plan is sent to, and approved by Council prior to the commencement of any preservation, maintenance, repair and restoration works.</p>
<p>PO89</p> <p>Demolition and removal is only considered where:</p> <ol style="list-style-type: none"> a report prepared by a suitably qualified conservation architect or conservation engineer demonstrates that the building is structurally unsound and is not reasonably capable of economic repair; or demolition is confined to the removal of outbuildings, extensions and alterations that are not part of the original structure; or 	<p>No example provided.</p>

<p>c. limited demolition is performed in the course of repairs, maintenance or restoration; or</p> <p>d. demolition is performed following a catastrophic event which substantially destroys the building or object.</p>	
<p>PO90</p> <p>Where development is occurring on land adjoining a site of cultural heritage value, the development is to be sympathetic to and consistent with the cultural heritage values present on the site and not result in their values being eroded, degraded or unreasonably obscured from public view.</p>	<p>No example provided.</p>
<p>PO91</p> <p>Development does not adversely impact upon the health and vitality of significant trees. Where development occurs in proximity to a significant tree, construction measures and techniques as detailed in AS 4970-2009 Protection of trees on development sites are adopted to ensure a significant tree's health, wellbeing and vitality.</p> <p>Significant trees are only removed where they are in a poor state of health or where they pose a health and safety risk to persons or property. A Tree Assessment report prepared by a suitably qualified arborist confirming a tree's state of health is required to demonstrate achievement of this performance outcome.</p>	<p>E91</p> <p>Development does:</p> <ol style="list-style-type: none"> not result in the removal of a significant tree; not occur within 20m of a protected tree; involve pruning of a tree in accordance with Australian Standard AS 4373-2007 – Pruning of Amenity Trees.
<p>Infrastructure buffers (refer Overlay map - Infrastructure buffers to determine if the following assessment criteria apply)</p>	
<p>PO92</p> <p>Habitable rooms within an Electricity supply substation buffer are located a sufficient distance from substations⁽⁸⁰⁾ to avoid any potential adverse impacts on personal health and wellbeing from electromagnetic fields.</p> <p>Note - Habitable room is defined in the Building Code of Australia (Volume 1)</p>	<p>E92</p> <p>Habitable rooms:</p> <ol style="list-style-type: none"> are not located within an Electricity supply substation buffer; and proposed on a site subject to an Electricity supply substation⁽⁸⁰⁾ are acoustically insulated to achieve the noise levels listed in Schedule 1, Acoustic Quality Objectives, Environmental Protection (Noise) Policy 2008. <p>Note - Habitable room is defined in the Building Code of Australia (Volume 1)</p>
<p>PO93</p> <p>Habitable rooms within an Electricity supply substation buffer are acoustically insulated from the noise of a substation⁽⁸⁰⁾ to achieve the noise levels listed in Schedule 1 Acoustic Quality Objectives, Environmental Protection (Noise) Policy 2008 and provides a safe, healthy and disturbance free living environment.</p>	<p>No example provided.</p>

6 Zones

<p>Note - To demonstrate achievement of the performance outcome, a noise impact assessment report is prepared by a suitably qualified person. Guidance to preparing a noise impact assessment report is provided in Planning scheme policy – Noise.</p> <p>Note - Habitable room is defined in the Building Code of Australia (Volume 1)</p>	
<p>PO94</p> <p>Development within a Pumping station buffer is located, designed and constructed to:</p> <ol style="list-style-type: none"> ensure that odour or other air pollutant impacts on the amenity of the development met the air quality objectives in the Environmental Protection (Air) Policy 2008; ensure that noise impacts on the amenity of the development met the indoor noise objectives set out in the Environmental Protection (Noise) Policy 2008. 	<p>E94</p> <p>Development does not involve the construction of any buildings or structures within a Pumping station buffer.</p>
<p>Overland flow path (refer Overlay map - Overland flow path to determine if the following assessment criteria apply)</p> <p>Note - The applicable river and creek flood planning levels associated with defined flood event (DFE) within the inundation area can be obtained by requesting a flood check property report from Council.</p>	
<p>PO95</p> <p>Development:</p> <ol style="list-style-type: none"> minimises the risk to persons from overland flow; does not increase the potential for damage from overland flow either on the premises or other premises, public land, watercourses, roads or infrastructure. 	<p>No example provided.</p>
<p>PO96</p> <p>Development:</p> <ol style="list-style-type: none"> maintains the conveyance of overland flow predominantly unimpeded through the premises for any event up to and including the 1% AEP for the fully developed upstream catchment; does not concentrate, intensify or divert overland flow onto an upstream, downstream or surrounding property. <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p>	<p>No example provided.</p>

<p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow.</p>	
<p>PO97</p> <p>Development does not:</p> <ol style="list-style-type: none"> directly, indirectly or cumulatively cause any increase in overland flow velocity or level; increase the potential for flood damage from overland flow either on the premises or other premises, public lands, watercourses, roads or infrastructure. <p>Note - Open concrete drains greater than 1m in width are not an acceptable outcome, nor are any other design options that may increase scouring.</p>	<p>No example provided.</p>
<p>PO98</p> <p>Development ensures that public safety and the risk to the environment are not adversely affected by a detrimental impact of overland flow on a hazardous chemical located or stored on the premises.</p>	<p>E98</p> <p>Development ensures that a hazardous chemical is not located or stored in an Overland flow path area.</p> <p>Note - Refer to the Work Health and Safety Act 2011 and associated Regulation and Guidelines, the Environmental Protection Act 1994 and the relevant building assessment provisions under the Building Act 1975 for requirements related to the manufacture and storage of hazardous substances.</p>
<p>PO99</p> <p>Development which is not in a Rural zone ensures that overland flow is not conveyed from a road or public open space onto a private lot.</p>	<p>E99</p> <p>Development which is not in a Rural zone that an overland flow paths and drainage infrastructure is provided to convey overland flow from a road or public open space area away from a private lot.</p>
<p>PO100</p> <p>Development ensures that inter-allotment drainage infrastructure, overland flow paths and open drains through private property cater for overland flows for a fully developed upstream catchment and are able to be easily maintained.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow</p>	<p>E100.1</p> <p>Development ensures that roof and allotment drainage infrastructure is provided in accordance with the following relevant level as identified in QUDM:</p> <ol style="list-style-type: none"> Urban area – Level III; Rural area – N/A; Industrial area – Level V; Commercial area – Level V. <p>E100.2</p> <p>Development ensures that inter-allotment drainage infrastructure is designed to accommodate any event up to and including the 1% AEP for the fully developed upstream catchment.</p>
<p>PO101</p>	<p>No example provided.</p>

6 Zones

<p>Development protects the conveyance of overland flow such that an easement for drainage purposes is provided over:</p> <ul style="list-style-type: none"> a. a stormwater pipe if the nominal pipe diameter exceeds 300mm; b. an overland flow path where it crosses more than one premises; c. inter-allotment drainage infrastructure. <p>Note - Refer to Planning scheme policy - Integrated design for details and examples.</p> <p>Note - Stormwater Drainage easement dimensions are provided in accordance with Section 3.8.5 of QUDM.</p>	
<p>Additional criteria for development for a Park⁽⁵⁷⁾</p>	
<p>PO102</p> <p>Development for a Park⁽⁵⁷⁾ ensures that the design and layout responds to the nature of the overland flow affecting the premises such that:</p> <ul style="list-style-type: none"> a. public benefit and enjoyment is maximised; b. impacts on the asset life and integrity of park structures is minimised; c. maintenance and replacement costs are minimised. 	<p>E102</p> <p>Development for a Park⁽⁵⁷⁾ ensures works are provided in accordance with the requirements set out in Appendix B of the Planning scheme policy - Integrated design.</p>
<p>Riparian and wetland setbacks</p>	
<p>PO103</p> <p>Development provides and maintains a suitable setback from waterways and wetlands that protects natural and environmental values. This is achieved by recognising and responding to the following matters:</p> <ul style="list-style-type: none"> a. impact on fauna habitats; b. impact on wildlife corridors and connectivity; c. impact on stream integrity; d. impact of opportunities for revegetation and rehabilitation planting; e. edge effects. 	<p>E103</p> <p>Development does not occur within:</p> <ul style="list-style-type: none"> a. 50m from top of bank for W1 waterway and drainage line b. 30m from top of bank for W2 waterway and drainage line c. 20m from top of bank for W3 waterway and drainage line d. 100m from the edge of a Ramsar wetland, 50m from all other wetlands. <p>Note - W1, W2 and W3 waterway and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.</p>
<p>Scenic amenity - Regionally significant (Hills) and Locally important (Coast) (refer Overlay map - Scenic amenity to determine if the following assessment criteria apply)</p>	

<p>PO104</p> <p>Landscaping</p> <ul style="list-style-type: none"> a. complements the coastal landscape character and amenity; b. has known resilience and robustness in the coastal environment; <p>Fences and walls:</p> <ul style="list-style-type: none"> a. do not appear visually dominant or conspicuous within its setting; b. reduce visual appearance through the use of built form articulation, setbacks, and plant screening; c. use materials and colours that are complementary to the coastal environment. <p>Building design responds to the bayside location and complements the particular bayside character and amenity by adopting and incorporating a range of architectural character elements.</p> <p>Vegetation that contributes to bayside character and identity are:</p> <ul style="list-style-type: none"> a. retained; b. protected from development diminishing their significance. 	<p>E104</p> <p>Where located in the Locally Important (Coast) scenic amenity overlay:</p> <ul style="list-style-type: none"> a. landscaping comprises indigenous coastal species; b. fences and walls are no higher than 1m; and c. existing pine trees, palm trees, mature fig and cotton trees are retained. d. where over 12m in height, the building design includes the following architectural character elements: <ul style="list-style-type: none"> i. curving balcony edges and walls, strong vertical blades and wall planes; ii. balcony roofs, wall articulation expressed with different colours, curves in plan and section, and window awnings; iii. roof top outlooks, tensile structures as shading devices; iv. lightweight structures use white frame elements in steel and timber, bold colour contrast.
--	--

6 Zones

6.2.1.6 Local centre precinct

6.2.1.6.1 Purpose - Local centre precinct

1. The purpose of the code will be achieved through the following overall outcomes for the local centre precinct:
 - a. Development is of a size, scale and range of services commensurate with the role and function of this precinct within the centres network.
 - b. Development contributes to a mix and the co-location of compatible uses, in a compact urban form.
 - c. Development is of a sufficient intensity and land use mix to support public transport, active transport, improve land efficiency and support centre facilities.
 - d. Medium density housing, in the form of low-rise multiple dwellings⁽⁴⁹⁾ incorporating mixed uses where possible, is incorporated within local centres.
 - e. Adverse impacts on the amenity of surrounding residential uses are minimised by mitigating noise, odour and air quality impacts on residents to a level consistent with the location within or adjoining a local centre.
 - f. The safety and efficiency of pedestrian movement is prioritised in the design of car parking areas and the size, frequency and location of vehicle crossovers.
 - g. The amount of on-site car parking encourages the use of public and active transport, increases land use efficiency and does not negatively impact the streetscape.
 - h. Facilities, infrastructure and public realm improvements are provided to support active transport usage and contribute to improved pedestrian connectivity and walkability between key destinations.
 - i. Pedestrian connections are provided to integrate the development with the street, public spaces and the surrounding area.
 - j. Development encourages social activity through the provision of high quality civic and plaza spaces.
 - k. The design, siting and construction of buildings within a local centre:
 - i. contributes to a high quality centre consistent with the desired character of the centre and surrounding area;
 - ii. maintains a human scale, through appropriate building heights and form;
 - iii. is centred around a main street;
 - iv. provides attractive, active frontages that maximise pedestrian activity along road frontages and public spaces;
 - v. provides for active and passive surveillance of the public spaces, road frontages and movement corridors;
 - vi. does not result in internalised shopping centres⁽⁷⁶⁾ with large external blank walls and tenancies only accessible from within the building;
 - vii. locates tenancies at the street with car parking at the rear;
 - viii. ensures expansive areas of surface car parking do not dominate road frontages or public spaces;
 - ix. ensures parking, manoeuvring and servicing areas are designed, located and aesthetically treated to not be visually dominant features from the streetscape and public spaces;
 - x. includes buffers or other treatments measures to respond to the interface with residential zoned land.

- I. Out-of-centre development, including centre expansion (into adjoining zones and precincts) or the establishment of a new centre only occurs where:
- i. it maintains the scale and function of a local centre consistent with Table 6.2.1.1 including provision of one full line supermarket plus local speciality shops and lower order commercial uses;
 - ii. expansion strengthens the existing centre as an important local activity node, or for a new centre, strengthens the centres network within the region;
 - iii. clear separation from existing higher order, district and local centres within the network are maintained to reduce catchment overlap and to establish 15 minute walkable neighbourhoods (generally, local centres should be separated from other centres by 2400m and neighbourhood hubs by 1600m, measured from the centre of each centre or neighbourhood hub);
 - iv. for expansion, it is located on a highly accessible site, adjoining the existing centre not resulting in the fragmentation of the centre;
 - v. for a new centre, it is located on a sub-arterial or collector road;
 - vi. designed to include active frontages around a main street core;
 - vii. expansion does not result in an elongated centre forming a ribbon of development along regional through roads.

Note - Refer to Planning scheme policy - Centre and neighbourhood hub design for details and examples.

Note - Interim uses may be acceptable within a centre where the use would be compatible with existing and proposed centre activities provided the interim use would not be likely to prejudice or delay the ultimate development of the site and adjoining areas. Interim uses should be low intensity in nature and characterised by low investment in buildings and infrastructure relative to the value of the site (e.g. Bulk landscape supplies⁽⁹⁾, garden centre⁽³¹⁾, market⁽⁴⁶⁾, outdoor sales⁽⁵⁴⁾, wholesale nursery⁽⁸⁹⁾, outdoor sport and recreation⁽⁵⁵⁾).

- m. **Service stations:**
- i. **establish where they will not disrupt, fragment or negatively impact active frontages or streets where pedestrian safety and comfort are of high importance;**
 - ii. **establish on heavily trafficked roads where the amenity of surrounding residential uses is already subject to impacts from road vehicle noise;**
 - iii. **establish in locations that will not have a negative impact on the street environments intended to include active frontages;**
 - iv. **do not negatively impact adjoining residents or the streetscape;**
 - v. **ancillary uses or activities only service the convenience needs of users.**
- n. General works associated with the development achieves the following:
- i. new development is provided with a high standard of services to meet and support the current and future needs of users of the site, including roads, street lighting services, telecommunications and reticulated electricity (underground wherever possible), water and sewerage (where available);
 - ii. the development manages stormwater to:
 - A. ensure the discharge of stormwater does not adversely affect the quality, environmental values or ecosystem functions of downstream receiving waters;
 - B. prevent stormwater contamination and the release of pollutants;
 - C. maintain or improve the structure and condition of drainage lines and riparian areas;
 - D. avoid off-site adverse impacts from stormwater.

6 Zones

- iii. the development does not result in unacceptable impacts on the capacity and safety of the external road network;
 - iv. the development ensures the safety, efficiency and useability of access ways and parking areas;
 - v. site works including earthworks are managed to be safe and have minimal impacts on adjoining or adjacent premises, the streetscape or the environment.
- o. Activities associated with the use do not cause a nuisance by way of aerosols, fumes, light, noise, odour, particles or smoke.
- p. Noise generating uses are designed, sited and constructed to minimise the transmission of noise to appropriate levels and do not cause environmental harm or nuisance.
- q. Noise sensitive uses are designed, sited and constructed so as not to be subject to unacceptable levels of noise.
- r. Development avoids areas subject to constraint, limitation, or environmental value. Where development cannot avoid these identified areas, it responds by:
- i. adopting a 'least risk, least impact' approach when designing, siting and locating development in any area subject to a constraint, limitation or environmental value to minimise the potential risk to people, property and the environment;
 - ii. ensuring no further instability, erosion or degradation of the land, water or soil resource;
 - iii. when located within a Water buffer area, complying with the Water Quality Vision and Objectives contained in the Seqwater Development Guidelines: Development Guidelines for Water Quality Management in Drinking Water Catchments 2012.
 - iv. maintaining, restoring and rehabilitating environmental values, including natural, ecological, biological, aquatic, hydrological and amenity values, and enhancing these values through the provision of planting and landscaping, and facilitating safe wildlife movement and connectivity through:
 - A. the provision of replacement, restoration, rehabilitation planting and landscaping;
 - B. the location, design and management of development to avoid or minimise adverse impacts on ecological systems and processes;
 - C. the requiring of environmental offsets in accordance with the Environmental Offsets Act 2014.
 - v. protecting native species and protecting and enhancing species habitat;
 - vi. protecting and preserving the natural, aesthetic, architectural historic and cultural values of significant trees, places, objects and buildings of heritage and cultural significance;
 - vii. establishing effective separation distances, buffers and mitigation measures associated with identified infrastructure to minimise adverse effects on sensitive land uses from odour, noise, dust and other nuisance generating activities;
 - viii. establishing, maintaining and protecting appropriate buffers to waterways, wetlands, native vegetation and significant fauna habitat;
 - ix. ensuring it promotes and does not undermine the ongoing viability, integrity, operation, maintenance and safety of identified infrastructure;
 - x. ensuring effective and efficient disaster management response and recovery capabilities;
 - xi. where located in an overland flow path:
 - A. development siting, built form, layout and access responds to the risk presented by the overland flow and minimises risk to personal safety;

- B. development is resilient to the impacts of overland flow by ensuring the siting and design accounts for the potential risks to property associated with the overland flow;
- C. development does not impact on the conveyance of the overland flow for any event up to and including the 1% AEP for the fully developed upstream catchment;
- D. development directly, indirectly and cumulatively avoid an increase in the severity of overland flow and potential for damage on the premises or other premises, public lands, watercourses, roads or infrastructure.

- s. Development in the Local centre precinct is for one or more of the uses identified below:

<ul style="list-style-type: none"> • Caretaker's accommodation⁽¹⁰⁾ • Child care centre⁽¹³⁾ • Club⁽¹⁴⁾ • Community care centre⁽¹⁵⁾ • Community use⁽¹⁷⁾ • Dwelling unit⁽²³⁾ 	<ul style="list-style-type: none"> • Emergency services⁽²⁵⁾ • Food and drink outlet⁽²⁸⁾ • Hardware and trade supplies⁽³²⁾ - if 250m² GFA or less • Health care services⁽³³⁾ • Home based business⁽³⁵⁾ 	<ul style="list-style-type: none"> • Low impact industry⁽⁴²⁾ - if not located adjoining a main street • Market⁽⁴⁶⁾ • Office⁽⁵³⁾ • Place of worship⁽⁶⁰⁾ • Service industry⁽⁷³⁾ • Shop⁽⁷⁵⁾ • Shopping centre⁽⁷⁶⁾ • Showroom⁽⁷⁸⁾ - if 250m² GFA or less
---	--	---

- t. Development in the Local centre precinct does not include one or more of the following uses:

<ul style="list-style-type: none"> • Air services⁽³⁾ • Animal husbandry⁽⁴⁾ • Animal keeping⁽⁵⁾ • Aquaculture⁽⁶⁾ • Brothel⁽⁸⁾ • Cemetery⁽¹²⁾ • Crematorium⁽¹⁸⁾ • Cropping⁽¹⁹⁾ • Detention facility⁽²⁰⁾ • Extractive industry⁽²⁷⁾ 	<ul style="list-style-type: none"> • Intensive horticulture⁽⁴⁰⁾ • Major sport, recreation and entertainment facility⁽⁴⁴⁾ • Marine industry⁽⁴⁵⁾ • Medium impact industry⁽⁴⁷⁾ • Motor sport facility⁽⁴⁸⁾ • Nightclub entertainment facility⁽⁵¹⁾ • Outdoor sales⁽⁵⁴⁾ • Outdoor sport and recreation⁽⁵⁵⁾ • Parking station⁽⁵⁸⁾ 	<ul style="list-style-type: none"> • Research and technology industry⁽⁶⁴⁾ • Resort complex⁽⁶⁶⁾ • Rooming accommodation⁽⁶⁹⁾ • Rural industry⁽⁷⁰⁾ • Rural workers' accommodation⁽⁷¹⁾ • Short-term accommodation⁽⁷⁷⁾ • Showroom⁽⁷⁸⁾ - if more than 250m² GFA • Special industry⁽⁷⁹⁾
---	--	---

6 Zones

<ul style="list-style-type: none"> • Hardware and trade supplies⁽³²⁾ - if more than 250m² GFA • High impact industry⁽³⁴⁾ • Hotel⁽³⁷⁾ • Intensive animal industry⁽³⁹⁾ 	<ul style="list-style-type: none"> • Permanent plantation⁽⁵⁹⁾ • Port services⁽⁶¹⁾ • Relocatable home park⁽⁶²⁾ 	<ul style="list-style-type: none"> • Tourist park⁽⁸⁴⁾ • Transport depot⁽⁸⁵⁾ • Winery⁽⁹⁰⁾
---	---	--

- u. Development not listed in the tables above may be considered on its merits and where it reflects and supports the outcomes of the zone.

Part G - Criteria for assessable development - Local centre precinct

Where development is categorised as assessable development - code assessment in the Table of Assessment, the assessment benchmarks are the criteria set out in Part G, Table 6.2.1.6.1 as well as the purpose statement and overall outcomes of this code.

Where development is categorised as assessable development - impact assessable, the assessment benchmarks become the whole of the planning scheme.

Table 6.2.1.6.1 Assessable development - Local centre precinct

Performance outcomes	Examples that achieve aspects of the Performance Outcomes
General criteria	
Centre network and function	
<p>PO1</p> <p>Development in the Local centre precinct is of a size, scale, range of services commensurate with the role and function of this precinct within the centres network.</p> <p>Note - Refer to Moreton Bay centres network Table 6.2.1.1</p>	No example provided.
Active frontage	
<p>PO2</p> <p>Development addresses and activates streets and public spaces by:</p> <p>a. establishing and maintaining interaction, pedestrian activity and casual surveillance through appropriate land uses and building design (e.g. the use of windows or glazing and avoiding blank walls with the use of sleeving);</p> <p>b. ensuring buildings and individual tenancies address street frontages and other areas of pedestrian movement;</p>	<p>E2.1</p> <p>Development addresses the street frontage.</p>
	<p>E2.2</p> <p>New buildings and extensions are built to the street alignment.</p>
	<p>E2.3</p> <p>At-grade car parking:</p>

- c. new buildings adjoin or are within 3m of a primary street frontage, civic space or public open space;
- d. locating car parking areas behind or under buildings to not dominate the street environment;
- e. providing visual interest to the façade (e.g. windows or glazing, variation in colours, materials, finishes, articulation, recesses or projections);
- f. establishing or maintaining human scale.

- a. does not adjoin a main street or a corner;
- b. where at-grade car parking adjoins a street (other than a main street) or civic space it does not take up more than 40% of the length of the street frontage.

Note - Refer to Planning scheme policy - Centre and neighbourhood hub design for details and examples.

E2.4

Development on corner lots:

- a. addresses both street frontages;
- b. expresses strong visual elements, including feature building entries.

E2.5

Development incorporates active uses adjacent to a street frontage, civic spaces, public open space or pedestrian thoroughfare.

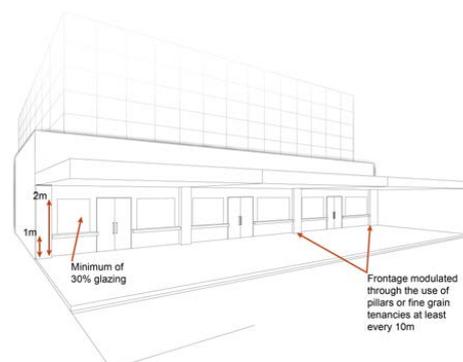

E2.6

The front facade of the building:

- a. is made up of a minimum of 50% windows or glazing between a height of 1m and 2m;
- b. the minimum area of window or glazing is to remain uncovered and free of signage.

Note - This does not apply to Adult stores⁽¹⁾.

Figure - Glazing

E2.7

6 Zones

	Individual tenancies do not exceed a frontage length of 20m.
	<p>E2.8</p> <p>Large format retail uses (e.g. showroom⁽⁷⁸⁾, supermarket or discount department store) are sleeved by smaller tenancies (e.g. retail and similar uses).</p> <p>Note - Refer to Planning scheme policy - Centre and neighbourhood hub design for details and examples.</p>
Setbacks	
<p>PO3</p> <p>Side and rear setbacks are of a dimension to:</p> <ol style="list-style-type: none"> cater for required openings, the location of loading docks and landscaped buffers etc; protect the amenity of adjoining sensitive land uses. 	No example provided.
Site area	
<p>PO4</p> <p>The development has sufficient area and dimensions to accommodate required buildings and structures, vehicular access, manoeuvring and parking and landscaping.</p>	No example provided.
Building height	
<p>PO5</p> <p>The height of buildings reflect the individual character of the centre.</p>	<p>E5</p> <p>Building height does not exceed the maximum height identified on Overlay map - Building heights.</p>
Public realm	
<p>PO6</p> <p>Developments incorporating a gross leasable area greater than 3,000m² include a public plaza on-site, that:</p> <ol style="list-style-type: none"> is integrated with adjacent development, in relation to built form, streetscape, landscaping and the street and pedestrian network; is directly accessible from adjacent development or tenancies and is easily and conveniently accessible to the public; is of a sufficient size and dimensions to cater for passive recreation activities (e.g. alfresco dining and temporary activities etc); 	No example provided.

<p>d. includes greening (e.g. Landscaping, planter boxes, street trees etc) that contributes to the identity of the centre;</p> <p>e. is lit and has adequate signage for way finding, ensuring adjoining and near by residential uses are not impacted by 'overspill';</p> <p>f. is designed to achieve CPTED principles e.g. visible at all times.</p> <p>Note - For details and examples of civic space requirements refer to Planning scheme policy - Centre and neighbourhood hub design.</p> <p>Note - Refer to Planning scheme policy - Centre and neighbourhood hub design for details and examples.</p>	
Streetscape	
<p>PO7</p> <p>Development contributes to an attractive and walkable street environment through the provision of streetscape features (e.g. footpaths, lighting, bins, furniture, landscaping, pedestrian crossings etc), as outlined in Planning scheme policy - Integrated design.</p> <p>Editor's note - Additional approvals may be required where works are required within road reserves.</p>	<p>No example provided.</p>
Built form	
<p>PO8</p> <p>Ground floor spaces are designed to enable the flexible re-use of floor area for commercial and retail activities.</p>	<p>E8</p> <p>The ground floor has a minimum ceiling height of 4.2m.</p>
<p>PO9</p> <p>Awnings are provided at the ground level floor fronting pedestrian footpaths. Awnings:</p> <p>a. provide adequate protection for pedestrians from solar exposure and inclement weather;</p> <p>b. are integrated with the design of the building and the form and function of the street;</p> <p>c. do not compromise the provision of street trees and signage;</p> <p>d. ensure the safety of pedestrians and vehicles (e.g. No support poles).</p>	<p>E9</p> <p>Buildings incorporate an awning that:</p> <p>a. is cantilevered;</p> <p>b. extends from the face of the building;</p> <p>c. has a minimum height of 3.2m and a maximum height of 4.2m above pavement level;</p> <p>d. does not extend past a vertical plane of 1.5m inside the kerb line to allow for street trees and regulatory signage;</p> <p>e. aligns with adjoining buildings to provide continuous shelter where possible.</p>

6 Zones

	<p style="text-align: center;">Figure - Awning requirements</p>
<p>PO10</p> <p>All buildings exhibit a high standard of design and construction, which:</p> <ol style="list-style-type: none"> adds visual interest to the streetscape (e.g. variation in materials, patterns, textures and colours, cantilevered awning); enables differentiation between buildings; contributes to a safe environment; incorporates architectural features within the building facade at the street level to create human scale; treat or break up blank walls that are visible from public areas; includes building entrances that are readily identifiable from the road frontage, located and oriented to favour active and public transport usage by connecting to pedestrian footpaths on the street frontage and adjoining sites; facilitate casual surveillance of all public spaces. 	<p>No example provided.</p>
<p>PO11</p> <p>Building entrances:</p> <ol style="list-style-type: none"> are readily identifiable from the road frontage; add visual interest to the streetscape; are designed to limit opportunities for concealment; are located and oriented to favour active and public transport usage by connecting to pedestrian footpaths on the street frontage; 	<p>No example provided.</p>

<p>e. include footpaths that connect with adjoining sites;</p> <p>f. provide a dedicated, sealed pedestrian footpath between the street frontage and the building entrance.</p> <p>Note - The design provisions for footpaths outlined in Planning scheme policy - Integrated design may assist in demonstrating compliance with this Performance Outcome.</p>													
Movement network													
<p>PO</p> <p>Development is designed to connect to and form part of the surrounding neighbourhood by providing interconnected street, pedestrian and cyclist pathways to adjoining development, nearby centres, neighbourhood hubs, community facilities, public transport nodes and open space.</p> <p>Note - Refer to Planning scheme policy - Neighbourhood design for guidance on achieving the above outcome.</p>	<p>E</p> <p>Development provides and maintains the connections shown on the movement figures located in Appendix A of Planning scheme policy - Neighbourhood design.</p> <p>E</p> <p>For areas not shown on a movement figure located in Appendix A of Planning scheme policy - Neighbourhood design, no example provided.</p> <p>Note - Refer to Planning scheme policy - Neighbourhood design for guidance on achieving the above example.</p>												
Car parking													
<p>PO12</p> <p>The number of car parking spaces is managed to:</p> <p>a. provide for the parking of visitors and employees that is appropriate to the use and the site's proximity to public and active transport options;</p> <p>b. not include an oversupply of car parking spaces.</p> <p>Note - Refer to Planning scheme policy - Integrated transport assessment for guidance on how to achieve compliance with this outcome.</p>	<p>E12</p> <p>Car parking is provided in accordance with the table below.</p> <table border="1" data-bbox="810 1361 1465 1702"> <thead> <tr> <th>Land use</th> <th>Maximum number of Car Spaces to be Provided</th> <th>Minimum Number of Car Spaces to be Provided</th> </tr> </thead> <tbody> <tr> <td>Non-residential</td> <td>1 per 30m² of GFA</td> <td>1 per 50m² of GFA</td> </tr> <tr> <td>Residential - Permanent/long term</td> <td>N/A</td> <td>1 per dwelling</td> </tr> <tr> <td>Residential - Serviced/short term</td> <td>3 per 4 dwellings + staff spaces</td> <td>1 per 5 dwelling + staff spaces</td> </tr> </tbody> </table> <p>Note - Car parking rates are to be rounded up to the nearest whole number.</p> <p>Note - Allocation of car parking spaces to dwellings is at the discretion of the developer.</p> <p>Note - Residential - Permanent/long term includes: Multiple dwelling⁽⁴⁹⁾, Relocatable home park⁽⁶²⁾, Residential care facility⁽⁶⁵⁾, Retirement facility⁽⁶⁷⁾.</p> <p>Note - Residential - Services/short term includes: Rooming accommodation⁽⁶⁹⁾ or Short-term accommodation⁽⁷⁷⁾.</p>	Land use	Maximum number of Car Spaces to be Provided	Minimum Number of Car Spaces to be Provided	Non-residential	1 per 30m ² of GFA	1 per 50m ² of GFA	Residential - Permanent/long term	N/A	1 per dwelling	Residential - Serviced/short term	3 per 4 dwellings + staff spaces	1 per 5 dwelling + staff spaces
Land use	Maximum number of Car Spaces to be Provided	Minimum Number of Car Spaces to be Provided											
Non-residential	1 per 30m ² of GFA	1 per 50m ² of GFA											
Residential - Permanent/long term	N/A	1 per dwelling											
Residential - Serviced/short term	3 per 4 dwellings + staff spaces	1 per 5 dwelling + staff spaces											

6 Zones

	<p>Note - The above rates exclude car parking spaces for people with a disability required by Disability Discrimination Act 1992 or the relevant disability discrimination legislation and standards.</p>
<p>PO13</p> <p>Car parking is designed to avoid the visual impact of large areas of surface car parking on the streetscape.</p>	<p>E13</p> <p>At-grade car parking:</p> <ol style="list-style-type: none"> does not adjoin a main street or a corner; where at-grade car parking adjoins a street (other than a main street) or civic spaces it does not take up more than 40% of the length of the street frontage.
<p>PO14</p> <p>Car parking design includes innovative solutions, including on-street parking and shared parking areas.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details and examples of on-street parking.</p>	<p>No example provided.</p>
<p>PO15</p> <p>The design of car parking areas:</p> <ol style="list-style-type: none"> does not impact on the safety of the external road network; ensures the safe movement of vehicles within the site. 	<p>E15</p> <p>All car parking areas are designed and constructed in accordance with Australian Standard AS 2890.1 Parking facilities Part 1: Off-street car parking.</p>
<p>PO16</p> <p>The safety and efficiency of pedestrian movement is prioritised in the design of car parking areas through providing pedestrian paths in car parking areas that are:</p> <ol style="list-style-type: none"> located along the most direct pedestrian routes between building entrances, car parks and adjoining uses; protected from vehicle intrusion through the use of physical and visual separation (e.g. wheel stops, trees etc); of a width to allow safe and efficient access for prams and wheelchairs. 	<p>No example provided.</p>
<p>Bicycle parking and end of trip facilities</p> <p>Note - Building work to which this code applies constitutes Major Development for purposes of development requirements for end of trip facilities prescribed in the Queensland Development Code MP 4.1.</p>	
<p>PO17</p>	<p>E17.1</p>

<p>a. End of trip facilities are provided for employees or occupants, in the building or on-site within a reasonable walking distance, and include:</p> <ol style="list-style-type: none"> i. adequate bicycle parking and storage facilities; and ii. adequate provision for securing belongings; and iii. change rooms that include adequate showers, sanitary compartments, wash basins and mirrors. <p>b. Notwithstanding a. there is no requirement to provide end of trip facilities if it would be unreasonable to provide these facilities having regard to:</p> <ol style="list-style-type: none"> i. the projected population growth and forward planning for road upgrading and development of cycle paths; or ii. whether it would be practical to commute to and from the building on a bicycle, having regard to the likely commute distances and nature of the terrain; or iii. the condition of the road and the nature and amount of traffic potentially affecting the safety of commuters. <p>Editor's note - The intent of b above is to ensure the requirements for bicycle parking and end of trip facilities are not applied in unreasonable circumstances. For example these requirements should not, and do not apply in the Rural zone or the Rural residential zone etc.</p> <p>Editor's note - This performance outcome is the same as the Performance Requirement prescribed for end of trip facilities under the Queensland Development Code. For development incorporating building work, that Queensland Development Code performance requirement cannot be altered by a local planning instrument and has been reproduced here solely for information purposes. Council's assessment in its building work concurrence agency role for end of trip facilities will be against the performance requirement in the Queensland Development Code. As it is subject to change at any time, applicants for development incorporating building work should ensure that proposals that do not comply with the examples under this heading meet the current performance requirement prescribed in the Queensland Development Code.</p>	<p>Minimum bicycle parking facilities are provided in accordance with the table below (rounded up to the nearest whole number).</p> <table border="1" data-bbox="810 324 1466 640"> <thead> <tr> <th>Use</th> <th>Minimum Bicycle Parking</th> </tr> </thead> <tbody> <tr> <td>Residential uses comprised of dwellings</td> <td>Minimum 1 space per dwelling</td> </tr> <tr> <td>All other residential uses</td> <td>Minimum 1 space per 2 car parking spaces identified in Schedule 7 – car parking</td> </tr> <tr> <td>Non-residential uses</td> <td>Minimum 1 space per 200m² of GFA</td> </tr> </tbody> </table> <p>Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is a combination of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.</p> <p>E17.2</p> <p>Bicycle parking is:</p> <ol style="list-style-type: none"> a. provided in accordance with <i>Austrroads (2008), Guide to Traffic Management - Part 11: Parking</i>; b. protected from the weather by its location or a dedicated roof structure; c. located within the building or in a dedicated, secure structure for residents and staff; d. adjacent to building entrances or in public areas for customers and visitors. <p>Note - Bicycle parking structures are to be constructed to the standards prescribed in AS2890.3.</p> <p>Note - Bicycle parking and end of trip facilities provided for residential and non-residential activities may be pooled, provided they are within 100 metres of the entrance to the building.</p> <p>Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is an amalgamation of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.</p> <p>E17.3</p> <p>For non-residential uses, storage lockers:</p>	Use	Minimum Bicycle Parking	Residential uses comprised of dwellings	Minimum 1 space per dwelling	All other residential uses	Minimum 1 space per 2 car parking spaces identified in Schedule 7 – car parking	Non-residential uses	Minimum 1 space per 200m ² of GFA
Use	Minimum Bicycle Parking								
Residential uses comprised of dwellings	Minimum 1 space per dwelling								
All other residential uses	Minimum 1 space per 2 car parking spaces identified in Schedule 7 – car parking								
Non-residential uses	Minimum 1 space per 200m ² of GFA								

- a. are provide at a rate of 1.6 per bicycle parking space (rounded up to the nearest whole number);
- b. have minimum dimensions of 900mm (height) x 300mm (width) x 450mm (depth).

Note - Storage lockers may be pooled across multiple sites and activities when within 100 metres of the entrance to the building and within 50 metres of bicycle parking and storage facilities.

Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is an amalgamation of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.

E17.4

For non-residential uses, changing rooms:

- a. are provided at a rate of 1 per 10 bicycle parking spaces;
- b. are fitted with a lockable door or otherwise screened from public view;
- c. are provided with shower(s), sanitary compartment(s) and wash basin(s) in accordance with the table below:

Bicycle spaces provided	Male/ Female	Change rooms required	Showers required	Sanitary compartments required	Washbasins required
1-5	Male and female	1 unisex change room	1	1 closet pan	1
6-19	Female	1	1	1 closet pan	1
20 or more	Male	1	1	1 closet pan	1
	Female	1	2, plus 1 for every 20 bicycle spaces provided thereafter	2 closet pans, plus 1 sanitary compartment for every 60 bicycle parking spaces provided thereafter	1, plus 1 for every 60 bicycle parking spaces provided thereafter
	Male	1	2, plus 1 for every 20 bicycle spaces provided thereafter	1 urinal and 1 closet pans, plus 1 sanitary compartment at the rate of 1 closet pan or 1 urinal for every 60 bicycle space provided thereafter	1, plus 1 for every 60 bicycle parking spaces provided thereafter

Note - All showers have a minimum 3-star Water Efficiency Labelling and Standards (WELS) rating shower head.

Note - All sanitary compartments are constructed in compliance with F2.3 (e) and F2.5 of BCA (Volume 1).

- d. are provided with:

	<ul style="list-style-type: none"> i. a mirror located above each wash basin; ii. a hook and bench seating within each shower compartment; iii. a socket-outlet located adjacent to each wash basin. <p>Note - Change rooms may be pooled across multiple sites, residential and non-residential activities when within 100 metres of the entrance to the building and within 50 metres of bicycle parking and storage facilities</p> <p>Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is an amalgamation of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.</p>
Loading and servicing	
<p>PO18</p> <p>Loading and servicing areas:</p> <ul style="list-style-type: none"> a. are not visible from any street frontage; b. are integrated into the design of the building; c. include screening and buffers to reduce negative impacts on adjoining sensitive land uses; d. are consolidated and shared with adjoining sites where possible. <p>Note - Refer to Planning scheme policy – Centre and neighbourhood hub design.</p>	No example provided.
Waste	
<p>PO19</p> <p>Bins and bin storage area/s are designed, located and managed to prevent amenity impacts on the locality.</p>	<p>E19</p> <p>Bins and bin storage area/s are provided, designed and managed in accordance with Planning scheme policy - Waste.</p> <p>Development is designed to meet the criteria in the Planning scheme policy - Waste and is demonstrated in a waste management program.</p>
Landscaping and fencing	
<p>PO20</p> <p>On-site landscaping:</p> <ul style="list-style-type: none"> a. is incorporated into the design of the development; 	No example provided.

6 Zones

<p>b. reduces the dominance of car parking and servicing areas from the street frontage;</p> <p>c. incorporates shade trees in car parking areas;</p> <p>d. retains mature trees wherever possible;</p> <p>e. contributes to quality public spaces and the microclimate by providing shelter and shade;</p> <p>f. maintains the achievement of active frontages and sightlines for casual surveillance.</p> <p>Note - All landscaping is to accord with Planning scheme policy - Integrated design.</p>	
<p>PO21</p> <p>Surveillance and overlooking are maintained between the road frontage and the main building line.</p>	<p>No example provided.</p>
<p>Lighting</p>	
<p>PO22</p> <p>Lighting is designed to provide adequate levels of illumination to public and communal spaces to maximise safety while minimising adverse impacts on sensitive land uses.</p>	<p>No example provided.</p>
<p>Amenity</p>	
<p>PO23</p> <p>The amenity of the area and adjacent sensitive land uses are protected from the impacts of dust, odour, chemicals and other environmental nuisances.</p>	<p>No example provided.</p>
<p>Noise</p>	
<p>PO24</p> <p>Noise generating uses do not adversely affect existing or potential noise sensitive uses.</p> <p>Note - The use of walls, barriers or fences that are visible from or adjoin a road or public area are not appropriate noise attenuation measures unless adjoining a motorway, arterial road or rail line.</p> <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p>	<p>No example provided.</p>
<p>PO25</p>	<p>E25.1</p>

<p>Sensitive land uses are provided with an appropriate acoustic environment within designated external private outdoor living spaces and internal areas while:</p> <ol style="list-style-type: none"> a. contributing to safe and usable public spaces, through maintaining high levels of surveillance of parks, streets and roads that serve active transport purposes (e.g. existing or future pedestrian paths or cycle lanes etc); b. maintaining the amenity of the streetscape. <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p> <p>Note - Refer to Planning Scheme Policy – Integrated design for details and examples of noise attenuation structures.</p>	<p>Development is designed to meet the criteria outlined in the Planning Scheme Policy – Noise.</p> <p>E25.2</p> <p>Noise attenuation structures (e.g. walls, barriers or fences):</p> <ol style="list-style-type: none"> a. are not visible from an adjoining road or public area unless: <ol style="list-style-type: none"> i. adjoining a motorway or rail line; or ii. adjoining part of an arterial road that does not serve an existing or future active transport purpose (e.g. pedestrian paths or cycle lanes) or where attenuation through building location and materials is not possible. b. do not remove existing or prevent future active transport routes or connections to the street network; c. are located, constructed and landscaped in accordance with Planning scheme policy - Integrated design. <p>Note - Refer to Planning scheme policy – Integrated design for details and examples of noise attenuation structures.</p> <p>Note - Refer to Overlay map – Active transport for future active transport routes.</p>
<p>Hazardous chemicals</p> <p>Note - To assist in demonstrating compliance with the following performance outcomes, a Hazard Assessment Report may be required to be prepared and submitted by a suitably qualified person in accordance with 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.</p> <p>Note - Terms used in this section are defined in 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.</p>	
<p>PO26</p> <p>Off sites risks from foreseeable hazard scenarios involving hazardous chemicals are commensurate with the sensitivity of the surrounding land use zones.</p>	<p>E26.1</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of land zoned for vulnerable or sensitive land uses as described below:</p> <p>Dangerous Dose</p> <ol style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ol style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. b. For any hazard scenario involving fire or explosion:

6 Zones

	<ul style="list-style-type: none"> i. 7kPa overpressure; ii. 4.7kW/m² heat radiation. <p>If criteria E26.1 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 0.5×10^{-6}/year.</p>
	<p>E26.2</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of a commercial or community activity land use zone as described below:</p> <p>Dangerous Dose</p> <ul style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ul style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter	4.0m						
Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).						
<p>PO</p> <p>Stormwater management facilities (excluding outlets) are located outside of riparian areas and prevent increased channel bed and bank erosion.</p>	<p>E</p> <p>No example provided.</p>						
<p>PO</p> <p>Council is provided with accurate representations of the completed stormwater management works within residential developments.</p>	<p>E</p> <p>"As Built" drawings and specifications of the stormwater management devices certified by an RPEQ is provided.</p> <p>Note - Documentation is to include:</p> <ol style="list-style-type: none"> photographic evidence and inspection date of the installation of approved underdrainage; copy of the bioretention filter media delivery dockets/quality certificates confirming the materials comply with specifications in the approved Stormwater Management Plan; date of the final inspection. 						
Site works and construction management							
<p>PO47</p> <p>The site and any existing structures are maintained in a tidy and safe condition.</p>	<p>No example provided.</p>						
<p>PO48</p> <p>All works on-site are managed to:</p>	<p>E48.1</p> <p>Works incorporate temporary stormwater runoff, erosion and sediment controls and trash traps removal devices designed in accordance with the Urban Stormwater</p>						

6 Zones

<ul style="list-style-type: none"> a. minimise as far as practicable, impacts on adjoining or adjacent premises and the streetscape in regard to erosion and sedimentation, dust, noise, safety and light; b. minimise as far as possible, impacts on the natural environment; c. ensure stormwater discharge is managed in a manner that does not cause actionable nuisance or annoyance to any person or premises; d. avoid adverse impacts on street trees and their critical root zone. 	<p>Quality Planning Guidelines, State Planning Policy, Schedule 10 - Stormwater management design objectives, Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design, including but not limited to the following:</p> <ul style="list-style-type: none"> a. stormwater is not discharged to adjacent properties in a manner that differs significantly from pre-existing conditions; b. stormwater discharged to adjoining and downstream properties does not cause scour and or erosion of any kind; c. stormwater discharge rates do not exceed pre-existing conditions; d. the 10% AEP storm event is the minimum design storm for all temporary diversion drains; and e. the 50% AEP storm event is the minimum design storm for all silt barriers and sedimentation basins. f. minimum design storm for all temporary diversion drains and sedimentation basins in accordance with Schedule 10 - Stormwater management design objectives; g. ponding or concentration of stormwater does not occur in adjoining properties.
	<p>E48.2</p> <p>Stormwater runoff, erosion and sediment controls are constructed in accordance with Planning scheme policy - Integrated design (Appendix C) prior to commencement of any clearing or earthworks and are maintained and adjusted as necessary at all times to ensure their ongoing effectiveness.</p> <p>Note - The measures are adjusted on-site to maximise their effectiveness.</p>
	<p>E48.3</p> <p>The completed earthworks area is stabilised using turf, established grass seeding, mulch or sprayed stabilisation techniques to control erosion and sediment and dust from leaving the property.</p>
	<p>E48.4</p> <p>Where works are proposed in proximity to an existing street tree, an inspection and a root management plan is undertaken by a qualified arborist which demonstrates and ensures that no permanent damage is caused to the tree.</p>

	<p>Existing street trees are protected and not damaged during works.</p> <p>Note - Where development occurs in the tree protection zone, measures and techniques as detailed in Australian Standard AS 4970 Protection of trees on development sites are adopted and implemented.</p>
<p>PO49</p> <p>Dust suppression measures are implemented during soil disturbances and construction works to protect nearby premises from unreasonable dust impacts.</p>	<p>E49</p> <p>No dust emissions extend beyond the boundaries of the site during soil disturbances and construction works.</p>
<p>PO50</p> <p>All development works on-site and including the transportation of material to and from the site are managed to not negatively impact the existing road network, the amenity of the surrounding area or the streetscape.</p> <p>Note - Where the amount of imported or exported material is greater than 50m³, a haulage route must be identified and approved by Council.</p> <p>Note - A Traffic Management Plan may be required to demonstrate compliance with this PO. A Traffic Management Plan is to be prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD).</p> <p>Note - A haulage route must be identified and approved by Council where imported or exported material is transported to the site via a road of Local Collector standard or less, and:</p> <ol style="list-style-type: none"> the aggregate volume of imported or exported material is greater than 1000m³; or the aggregate volume of imported or exported material is greater than 200m³ per day; or the proposed haulage route involves a vulnerable land use or shopping centre. <p>Note - A dilapidation report (including photographs) may be required for the haulage route to demonstrate compliance with this PO.</p> <p>Editor's note - Where associated with a State-controlled road, further requirements may apply, and approval may be required from the Department of Transport and Main Roads.</p>	<p>E50.1</p> <p>Construction traffic including contractor car parking is controlled in accordance with a traffic management plan, prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) to ensure all traffic movements to and from the site are safe.</p> <p>E50.2</p> <p>All contractor car parking is either provided on the development site, or on an alternative site in the general locality which has been set aside for car parking. Contractors vehicles are generally not to be parked in existing roads.</p> <p>Note - A Traffic Management Plan may be required for the site in accordance with the Manual of Uniform Traffic Control Devices (MUTCD).</p> <p>E50.3</p> <p>Any material dropped, deposited or spilled on the road(s) as a result of construction processes associated with the site are to be cleaned at all times.</p> <p>E</p> <p>Construction traffic to and from the development site uses the highest classification streets or roads where a choice of access routes is available. Haul routes for the transport of imported or spoil material and gravel pavement material along Council roads below sub-arterial standard must be approved routes.</p> <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p> <p>Note - A dilapidation report may be required to demonstrate compliance with this E.</p>

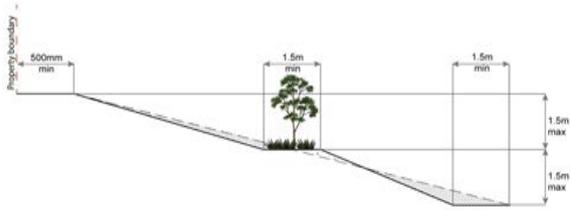

6 Zones

	<p>E</p> <p>Where works are carried out in existing roads, the works must be undertaken so that the existing roads are maintained in a safe and useable condition. Practical access for residents, visitors and services (including postal deliveries and refuse collection) is retained to existing lots during the construction period and after completion of the works.</p> <p>Note - A traffic control plan prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) will be required for any works that will affect access, traffic movements or traffic safety in existing roads.</p>
<p>PO51</p> <p>All disturbed areas are to be progressively stabilised during construction and the entire site rehabilitated and substantially stabilised at the completion of construction.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details.</p>	<p>E51</p> <p>At completion of construction all disturbed areas of the site are to be:</p> <ol style="list-style-type: none"> topsoiled with a minimum compacted thickness of fifty (50) millimetres; grassed stabilised using turf, established grass seeding, mulch or sprayed stabilisation techniques. <p>Note - These areas are to be maintained during any maintenance period to maximise grass coverage from grass seeding of these areas:</p>
<p>PO</p> <p>Earthworks are undertaken to ensure that soil disturbances are staged into manageable areas.</p> <p>Note - A site specific Erosion and Sediment Control Plan (ESCP) will be required to demonstrate compliance with this PO. An ECP is to be prepared in accordance with Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design (Appendix C).</p>	<p>E</p> <p>Soil disturbances are staged into manageable areas of not greater than 3.5 ha.</p>
<p>PO52</p> <p>The clearing of vegetation on-site:</p> <ol style="list-style-type: none"> is limited to the area of infrastructure works, building areas and other necessary areas for the works; and 	<p>E52.1</p> <p>All native vegetation to be retained on-site is temporarily fenced or protected prior to and during development works.</p> <p>Note - No parking of vehicles or storage of machinery or goods is to occur in these areas during development works.</p>

<p>b. includes the removal of declared weeds and other materials which are detrimental to the intended use of the land;</p> <p>c. is disposed of in a manner which minimises nuisance and annoyance to existing premises.</p> <p>Note - No burning of cleared vegetation is permitted.</p>	<p>E52.2</p> <p>Disposal of materials is managed in one or more of the following ways:</p> <p>a. all cleared vegetation, declared weeds, stumps, rubbish, car bodies, scrap metal and the like are removed and disposed of in a Council land fill facility; or</p> <p>b. all native vegetation with a diameter below 400mm is to be chipped and stored on-site.</p> <p>Note - The chipped vegetation must be stored in an approved location, preferably a park or public land.</p>
<p>PO</p> <p>All development works are carried out at times which minimise noise impacts to residents.</p>	<p>E</p> <p>All development works are carried out within the following times:</p> <p>a. Monday to Saturday (other than public holidays) between 6:30am and 6:30pm on the same day;</p> <p>b. no work is to be carried out on Sundays or public holidays.</p> <p>Note - Work outside the above hours may be approved (in writing) where it can be demonstrated that the work will not cause significant inconvenience or disruption to the public, or the work is unlikely to cause annoyance or inconvenience to occupants of adjacent properties.</p>
<p>PO53</p> <p>Any alteration or relocation in connection with or arising from the development to any service, installation, plant, equipment or other item belonging to or under the control of the telecommunications authority, electricity authorities, the Council or other person engaged in the provision of public utility services is to be carried with the development and at no cost to Council.</p>	<p>No example provided.</p>

Earthworks	
<p>PO54</p> <p>On-site earthworks are designed to consider the visual and amenity impact as they relate to:</p> <p>a. the natural topographical features of the site;</p> <p>b. short and long-term slope stability;</p> <p>c. soft or compressible foundation soils;</p>	<p>E54.1</p> <p>All cut and fill batters are provided with appropriate scour, erosion protection and run-off control measures including catch drains at the top of batters and lined batter drains as necessary.</p> <hr/> <p>E54.2</p>

6 Zones

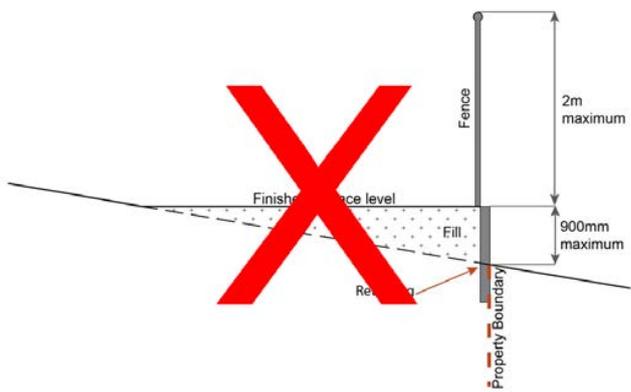

<p>d. reactive soils;</p> <p>e. low density or potentially collapsing soils;</p> <p>f. existing fill and soil contamination that may exist on-site;</p> <p>g. the stability and maintenance of steep rock slopes and batters;</p> <p>h. excavation (cut) and fill and impacts on the amenity of adjoining lots (e.g. residential).</p> <p><i>Note - Filling or excavation works are to be completed within six months of the commencement date.</i></p>	<p>Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance of steep rock slopes and batters.</p> <p>E54.3</p> <p>Inspection and certification of steep rock slopes and batters is required by a suitably qualified and experienced RPEQ.</p> <p>E54.4</p> <p>All filling or excavation is contained on-site and is free draining.</p> <p>E54.5</p> <p>All fill placed on-site is:</p> <ul style="list-style-type: none"> a. limited to that area required for the necessary for the approved use; b. clean and uncontaminated (i.e. no building waste, concrete, green waste, actual acid sulfate soils, potential acid sulfate soils or contaminated material etc.) material is used as fill). <p>E54.6</p> <p>The site is prepared and the fill placed on-site in accordance with AS3798.</p> <p>Note - The fill is to be inspected and tested in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p>
<p>PO55</p> <p>Embankments are stepped, terraced and landscaped to not adversely impact on the visual amenity of the surrounding area.</p>	<p>E55</p> <p>Any embankments more than 1.5 metres in height are stepped, terraced and landscaped.</p> <p style="text-align: center;">Figure - Embankment</p> 
<p>PO56</p> <p>Filling or excavation is undertaken in a manner that:</p>	<p>E56.1</p> <p>No filling or excavation is undertaken in an easement issued in favour of Council or a public sector entity.</p>

<p>a. does not adversely impact on a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land;</p> <p>b. does not preclude reasonable access to a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p>	<p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p> <p>E56.2</p> <p>Filling or excavation that would result in any of the following is not carried out on-site:</p> <p>a. a reduction in cover over any Council or public sector entity infrastructure service to less than 600mm;</p> <p>b. an increase in finished surface grade over, or within 1.5m on each side of, the Council or public sector entity infrastructure above that which existed prior to the earthworks being undertaken;</p> <p>c. prevent reasonable access to Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the site for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity as is defined in the Sustainable Planning Schedule 2 of the Act 2009.</p>
<p>PO57</p> <p>Filling or excavation does not result in land instability.</p> <p>Note - Steep rock slopes and batters are inspected and certified for long-term stability by a suitably qualified and experienced geotechnical engineer with RPEQ qualifications. Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance.</p>	<p>No example provided.</p>
<p>PO58</p> <p>Development Filling or excavation does not result in:</p> <p>a. adverse impacts on the hydrological and hydraulic capacity of the waterway or floodway;</p> <p>b. increased flood inundation outside the site;</p> <p>c. any reduction in the flood storage capacity in the floodway;</p> <p>d. and any clearing of native vegetation.</p> <p>Note - To demonstrate compliance with this outcome, Planning Scheme Policy - Stormwater Management provides guidance on the preparation of a site based stormwater management plan by a suitably qualified professional. Refer to Planning scheme policy - Integrated design for guidance on infrastructure design and modelling requirements.</p>	<p>No example provided.</p>
<p>PO</p>	<p>E</p> <p>Filling and excavation undertaken on the development site are shaped in a manner which does not:</p>

6 Zones

<p>Filling or excavation on the development site is undertaken in a manner which does not create or accentuate problems associated with stormwater flows and drainage systems on land adjoining the site.</p>	<ul style="list-style-type: none"> a. prevent stormwater surface flow which, prior to commencement of the earthworks, passed onto the development site, from entering the land; or b. redirect stormwater surface flow away from existing flow paths; or c. divert stormwater surface flow onto adjacent land, (other than a road), in a manner which: <ul style="list-style-type: none"> i. concentrates the flow; or ii. increases the flow rates of stormwater over the affected section of the adjacent land above the situation which existed prior to the diversion; or iii. causes actionable nuisance to any person, property or premises.
---	---

Retaining walls and structures

<p>PO59</p> <p>All earth retaining structures provide a positive interface with the streetscape and minimise impacts on the amenity of adjoining residents.</p> <p>Note - Refer to Planning scheme policy - Residential design for guidance on how to achieve compliance with this performance outcome.</p>	<p>E59</p> <p>Earth-retaining structures:-</p> <ul style="list-style-type: none"> a. are not constructed of boulder rocks or timber; b. where height is no greater than 900mm, are provided in accordance with Figure - Retaining on a boundary; <p style="text-align: center;">Figure - Retaining on boundary</p>  <ul style="list-style-type: none"> c. where height is greater than 900mm but no greater than 1.5m, are to be setback at least the equivalent height of the retaining structure from any property boundary; d. where height is greater than 1.5m, are to be setback and stepped 1.5m vertical: 1.5m horizontal; terraced, landscaped and drained as shown below. <p style="text-align: center;">Figure - Gut</p>
--	---

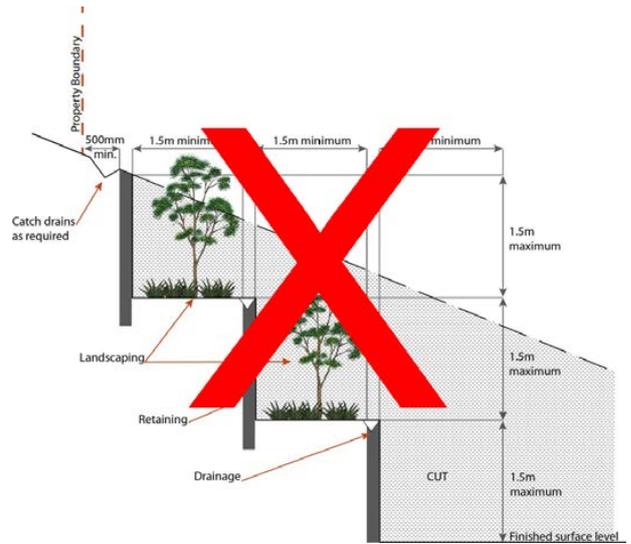

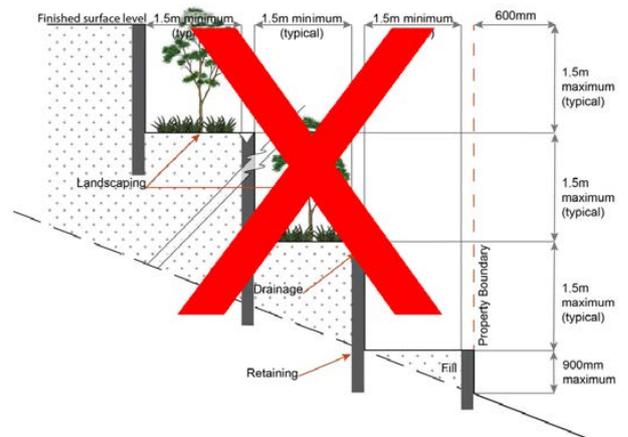

Figure--Fill

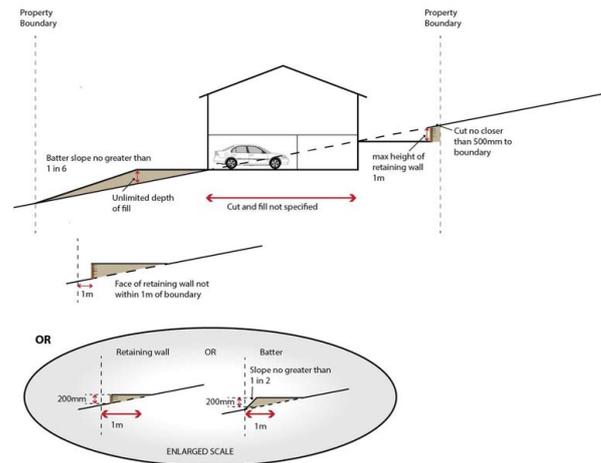

Filling or excavation does not:

- a. **involve a change in level of more than 1.0m relative to natural ground level;**
- OR**
- result in a batter greater than 1V to 6H;**
- b. **necessitate the construction of a freestanding retaining wall exceeding 1.0m in height relative to finished ground level;**

- c. result in the top of any cut batter, or the exposed face of any freestanding retaining wall supporting that cut, being closer than 500mm to a property boundary;
- d. result in the toe of any fill batter, or exposed face of any freestanding retaining wall supporting that fill, being closer than 1.0m to a property boundary unless:
 - i. the depth of fill within the 1.0m strip does not exceed 200mm relative to natural ground level; or
 - ii. the batter slope within that 1.0m strip is no steeper than 1V to 2H.

THE NEW FIGURE BELOW IS PROPOSED AS PART OF THIS AMENDMENT

Figure - Filling or Excavation

PO

All earth retaining structures are to be certified as being designed and constructed in accordance with relevant Australian Standards and Building Code requirements.

E

Retaining walls are designed and certified by a RPEQ so that:

- a. the minimum design life (the period assumed in design for which a structure or structural element is required to perform its intended purpose without replacement or major structural repairs) for the earth retaining structure is that specified in Australian Standard AS 4678 Earth-retaining structures;
- b. earth retaining structures within the land and around areas of cut on or near the boundaries of the site must be designed to allow for live and dead loads associated with the land/premise's current occupancy and use;

	<p>c. where the adjoining land use rights or zoning allows for industrial uses a minimum live load of 25kPA must be allowed in the design of the retaining structure for these adjoining premises.</p> <p>Note - Retaining walls will only be approved following submission of a full detailed design certified by a RPEQ.</p>
--	--

Fire Services

Note - The provisions under this heading only apply if:

- a. the development is for, or incorporates:
- reconfiguring a lot for a community title scheme creating 1 or more vacant lots; or
 - material change of use for 2 or more sole occupancy units on the same lot, or within the same community titles scheme; or
 - material change of use for a Tourist park⁽⁸⁴⁾ with accommodation in the form of caravans or tents; or
 - material change of use for outdoor sales⁽⁵⁴⁾, outdoor processing or outdoor storage where involving combustible materials.

AND

- b. none of the following exceptions apply:
- the distributor-retailer for the area has indicated, in its netserv plan, that the premises will not be served by that entity's reticulated water supply; or
 - every part of the development site is within 60m walking distance of an existing fire hydrant on the distributor-retailer's reticulated water supply network, measured around all obstructions, either on or adjacent to the site.

Note - The provisions under this heading do not apply to buildings that are required by the Building Code of Australia to have a fire hydrant system complying with Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations or other fire fighting facilities which provide equivalent protection.

PO60

Development incorporates a fire fighting system that:

- satisfies the reasonable needs of the fire fighting entity for the area;
- is appropriate for the size, shape and topography of the development and its surrounds;
- is compatible with the operational equipment available to the fire fighting entity for the area;
- considers the fire hazard inherent in the materials comprising the development and their proximity to one another;
- considers the fire hazard inherent in the surrounds to the development site;
- is maintained in effective operating order.

Note - The Queensland Fire and Emergency Services is the entity currently providing the fire fighting function for the urban areas of the Moreton Bay Region.

E60.1

External fire hydrant facilities are provided on site to the standard prescribed under the relevant parts of *Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations*.

Note - For this requirements for accepted development, the following are the relevant parts of AS 2419.1 (2005) that may be applicable:

- in regard to the form of any fire hydrant - Part 8.5 and Part 3.2.2.1, with the exception that for Tourist parks⁽⁸⁴⁾ or development comprised solely of dwellings and their associated outbuildings, single outlet above-ground hydrants or suitably signposted in-ground hydrants would be an acceptable alternative;
- in regard to the general locational requirements for fire hydrants - Part 3.2.2.2 (a), (e), (f), (g) and (h) as well as Appendix B of AS 2419.1 (2005);
- in regard to the proximity of hydrants to buildings and other facilities - Part 3.2.2.2 (b), (c) and (d), with the exception that:
 - for dwellings and their associated outbuildings, hydrant coverage need only extend to the roof and external walls of those buildings;
 - for caravans and tents, hydrant coverage need only extend to the roof of those tents and caravans;
 - for outdoor sales⁽⁵⁴⁾, processing or storage facilities, hydrant coverage is required across the entire area of

6 Zones

	<p>the outdoor sales⁽⁵⁴⁾, outdoor processing and outdoor storage facilities;</p> <p>d. in regard to fire hydrant accessibility and clearance requirements - Part 3.5 and, where applicable, Part 3.6.</p> <hr/> <p>E60.2</p> <p>A continuous path of travel having the following characteristics is provided between the vehicle access point to the site and each external fire hydrant and hydrant booster point on the land:</p> <p>a. an unobstructed width of no less than 3.5m;</p> <p>b. an unobstructed height of no less than 4.8m;</p> <p>c. constructed to be readily traversed by a 17 tonne HRV fire brigade pumping appliance;</p> <p>d. an area for a fire brigade pumping appliance to stand within 20m of each fire hydrant and 8m of each hydrant booster point.</p> <hr/> <p>E60.3</p> <p>On-site fire hydrant facilities are maintained in effective operating order in a manner prescribed in <i>Australian Standard AS1851 (2012) – Routine service of fire protection systems and equipment</i>.</p>

2 or more bedrooms	12m ²	3.0m					
<p>PO68</p> <p>Caretaker's accommodation⁽¹⁰⁾ and Dwelling units⁽²³⁾ are provided with a reasonable level of access, identification and privacy from adjoining residential and non-residential uses.</p> <p>Note - Refer to State Government standards for CPTED.</p> <p>Note - Refer to Planning scheme policy - Residential design for details and examples.</p>	<p>E68</p> <p>The dwelling:</p> <p>a. includes screening to a maximum external transparency of 50% for all habitable room windows that are visible from other dwellings and non-residential uses;</p> <p>b. clearly displays the street number at the entrance to the dwelling and at the front of the site to enable identification by emergency services;</p> <p>c. is provided with a separate entrance to that of any non-residential use on the site;</p> <p>d. where located on a site with a non-residential use the dwelling is located behind or above the non-residential use.</p> <p>Note - External fixed or movable screening, opaque glass and window tinting are considered acceptable forms of screening.</p>						
<p>Service station</p> <p>Note - Where the use specific outcomes relating to Service stations are inconsistent with other examples or Performance Outcomes in this Code, the use specific outcomes below prevail.</p>							
<p>PO</p> <p>Service stations are located, designed and orientated to:</p> <p>a. establish on heavily trafficked roads where the amenity of surrounding residential uses is already subject to impacts by road vehicle noise;</p>	<p>E</p> <p>Service stations are located:</p> <p>a. on the periphery of the Local centre, with at least one boundary adjoining land zoned other than Centre zone;</p>						

6 Zones

<p>b. not negatively impact active streets, public spaces or hubs of activity where the pedestrian safety and comfort is of high importance;</p> <p>c. not result in the fragmentation of active streets (e.g. site where active uses are located on adjoining lots);</p> <p>d. ensure the amenity of adjoining properties is protected;</p> <p>e. reduce the visual impact of the Service station from the streetscape while maintaining surveillance from the site to the street;</p> <p>f. minimise impacts on adjoining residential uses, to a level suitable relative to expected residential amenity of the area. (e.g. high order road in urban or next generation neighbourhood, likely to be noisy and not like suburban);</p> <p>g. provide ancillary uses that meet the convenience needs of users.</p>	<p>b. on the corner lot of an arterial or sub-arterial road.</p> <p>E</p> <p>Service stations are designed and orientated on site to:</p> <p>a. include a landscaping strip having a minimum depth of 1m adjoining all road frontages;</p> <p>b. buildings and structures (including fuel pump canopies) are setback a minimum of 3m from the primary and secondary frontage and a minimum of 5m from side and rear boundaries;</p> <p>c. include a screen fence, of a height and standard in accordance with a noise impact assessment (Note - Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise), on side and rear boundaries where adjoining land is able to contain a residential use;</p> <p>d. not include more than 2 driveway crossovers.</p>
<p>Telecommunications facility⁽⁸¹⁾</p> <p>Editor's note - In accordance with the Federal legislation Telecommunications facilities⁽⁸¹⁾ must be constructed and operated in a manner that will not cause human exposure to electromagnetic radiation beyond the limits outlined in the Radiocommunications (Electromagnetic Radiation - Human Exposure) Standard 2003 and Radio Protection Standard for Maximum Exposure Levels to Radiofrequency Fields - 3Khz to 300Ghz.</p>	
<p>PO69</p> <p>Telecommunications facilities⁽⁸¹⁾ are co-located with existing telecommunications facilities⁽⁸¹⁾, Utility installation⁽⁸⁶⁾, Major electricity infrastructure⁽⁴³⁾ or Substation⁽⁸⁰⁾ if there is already a facility in the same coverage area.</p>	<p>E69.1</p> <p>New telecommunication facilities⁽⁸¹⁾ are co-located on existing towers with new equipment shelter and associated structures positioned adjacent to the existing shelters and structures.</p> <p>E69.2</p> <p>If not co-located with an existing facility, all co-location opportunities have been investigated and fully exhausted within a 2km radius of the site.</p>
<p>PO70</p> <p>A new Telecommunications facility⁽⁸¹⁾ is designed and constructed to ensure co-masting or co-siting with other carriers both on the tower or pole and at ground level is possible in the future.</p>	<p>E70</p> <p>A minimum area of 45m² is available at ground level to allow for additional equipment shelters and associated structures for the purpose of co-locating on the proposed facility.</p>
<p>PO71</p> <p>Telecommunications facilities⁽⁸¹⁾ do not conflict with lawful existing land uses both on and adjoining the site.</p>	<p>E71</p> <p>The development results in no net reduction in the minimum quantity and standard of landscaping, private or communal open space or car parking spaces required under the planning scheme or under an existing development approval.</p>

<p>PO72</p> <p>The Telecommunications facility⁽⁸¹⁾ does not have an adverse impact on the visual amenity of a locality and is:</p> <ul style="list-style-type: none"> a. high quality design and construction; b. visually integrated with the surrounding area; c. not visually dominant or intrusive; d. located behind the main building line; e. below the level of the predominant tree canopy or the level of the surrounding buildings and structures; f. camouflaged through the use of colours and materials which blend into the landscape; g. treated to eliminate glare and reflectivity; h. landscaped; i. otherwise consistent with the amenity and character of the zone and surrounding area. 	<p>E72.1</p> <p>Where in an urban area, the development does not protrude more than 5m above the level of the existing treeline, prominent ridgeline or building rooftops in the surrounding townscape.</p> <p>E72.2</p> <p>In all other areas towers do not exceed 35m in height.</p> <p>E72.3</p> <p>Towers, equipment shelters and associated structures are of a design, colour and material to:</p> <ul style="list-style-type: none"> a. reduce recognition in the landscape; b. reduce glare and reflectivity. <p>E72.4</p> <p>All structures and buildings are setback behind the main building line and a minimum of 10m from side and rear boundaries, except where in the Industry and Extractive industry zones, the minimum side and rear setback is 3m.</p> <p>Where there is no established building line the facility is located at the rear of the site.</p> <p>E72.5</p> <p>The facility is enclosed by security fencing or by other means to ensure public access is prohibited.</p> <p>E72.6</p> <p>A minimum 3m wide strip of dense planting is provided around the perimeter of the fenced area, between the facility and street frontage and adjoining uses.</p> <p>Note - Landscaping is provided in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person, to ensure compliance with Planning scheme policy - Integrated design.</p>
<p>PO73</p> <p>Lawful access is maintained to the site at all times that does not alter the amenity of the landscape or surrounding uses.</p>	<p>E73</p> <p>An Access and Landscape Plan demonstrates how 24 hour vehicular access will be obtained and maintained to the facility in a manner that is appropriate to the site's context.</p>
<p>PO74</p>	<p>E74</p>

6 Zones

<p>All activities associated with the development occur within an environment incorporating sufficient controls to ensure the facility generates no audible sound at the site boundaries where in a residential setting.</p>	<p>All equipment comprising the Telecommunications facility⁽⁸¹⁾ which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure no noise from this equipment can be heard, or felt at the site boundary.</p>
<p style="text-align: center;">Values and constraints criteria</p> <p>Note - The relevant values and constraints criteria do not apply where the development is consistent with a current Development permit for Reconfiguring a lot or Material change of use or Operational work, where that approval has considered and addressed (e.g. through a development footprint plan (or similar in the case of Landslide hazard) or conditions of approval) the identified value or constraint under this planning scheme.</p>	
<p>Acid sulfate soils - (refer Overlay map - Acid sulfate soils to determine if the following assessment criteria apply)</p> <p>Note - To demonstrate achievement of the performance outcome, an Acid sulfate soils (ASS) investigation report and soil management plan is prepared by a qualified engineer. Guidance for the preparation an ASS investigation report and soil management plan is provided in Planning scheme policy - Acid sulfate soils.</p>	
<p>PO75</p> <p>Development avoids disturbing acid sulfate soils. Where development disturbs acid sulfate soils, development:</p> <ol style="list-style-type: none"> a. is managed to avoid or minimise the release of surface or groundwater flows containing acid and metal contaminants into the environment; b. protects the environmental and ecological values and health of receiving waters; c. protects buildings and infrastructure from the effects of acid sulfate soils. 	<p>E75</p> <p>Development does not involve:</p> <ol style="list-style-type: none"> a. excavation or otherwise removing of more than 100m³ of soil or sediment where below than 5m Australian Height datum AHD; or b. filling of land of more than 500m³ of material with an average depth of 0.5m or greater where below the 5m Australian Height datum AHD.
<p>Environmental areas (refer Overlay map - Environmental areas to determine if the following assessment criteria apply)</p> <p>Note – The following are excluded from the native vegetation clearing provisions of this planning scheme:</p> <ol style="list-style-type: none"> a. Clearing of native vegetation located within an approved development footprint; b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental Management and Conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence; e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes; f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council; g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens; 	

- h. Grazing of native pasture by stock;
- i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development

Note - Definition for native vegetation is located in Schedule 1 Definitions.

Note - Native vegetation subject to this criteria primarily comprises of matters of national environmental significance (MNES), matters of state environmental significance (MSES). They also comprise some matters of local environmental significance (MLES). A MLES is defined in Schedule 1.2, Administrative definitions. A list of the elements that apply to the mapped MSES and MLES is provided in Appendix 1 of the Planning scheme policy - Environmental areas.

Editors' Note - The accuracy of overlay mapping can be challenged through the development application process (code assessable development) or by way of a planning scheme amendment. See Council's website for details.

Note - To demonstrate achievement of the performance outcome, an ecological assessment, vegetation management plan and fauna management plan, as required, are prepared by a suitably qualified person. Guidance for the preparation of above mentioned reports is provided in Planning scheme policy - Environmental areas.

Vegetation clearing, ecological value and connectivity

PO76

Development avoids locating in a High Value Area or a Value Offset Area. Where it is not practicable or reasonable for development to avoid establishing in these areas, development must ensure that:

- a. the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area is maintained and not lost or degraded;
- b. on-site mitigation measures, mechanisms or processes are in place demonstrating the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area are maintained. For example, this can be achieved through replacement, restoration or rehabilitation planting as part of any proposed covenant, the development of a Vegetation Management Plan, a Fauna Management Plan, and any other on-site mitigation options identified in the Planning scheme policy - Environmental areas*.

* Editor's note - This is not a requirement for an environmental offset under the Environmental Offsets Act 2014.

No example provided.

PO77

Development provides for safe, unimpeded, convenient and ongoing wildlife movement and establishes and maintains habitat connectivity by:

- a. retaining habitat trees;
- b. providing contiguous patches of habitat;
- c. provide replacement and rehabilitation planting to improve connectivity;

No example provided.

6 Zones

<p>d. avoiding the creation of fragmented and isolated patches of habitat;</p> <p>e. providing wildlife movement infrastructure.</p> <p>Editor's note - Wildlife movement infrastructure may include refuge poles, tree boulevarding, 'stepping stone' vegetation plantings, tunnels, appropriate wildlife fencing; culverts with ledges, underpasses, overpasses, land bridges and rope bridges. Further information is provided in Planning scheme policy – Environmental areas.</p>	
<p>Vegetation clearing and habitat protection</p>	
<p>PO78</p> <p>Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected.</p>	<p>No example provided.</p>
<p>PO79</p> <p>Development does not result in the net loss or degradation of habitat value in a High Value Area or a Value Offset Area. Where development does result in the loss or degradation of habitat value, development will:</p> <p>a. rehabilitate, revegetate, restore and enhance an area to ensure it continues to function as a viable and healthy habitat area;</p> <p>b. provide replacement fauna nesting boxes in the event of habitat tree loss in accordance with Planning scheme policy - Environmental areas;</p> <p>c. undertake rehabilitation, revegetation and restoration in accordance with the South East Queensland Ecological Restoration Framework.</p>	<p>No example provided.</p>
<p>PO80</p> <p>Development ensures safe, unimpeded, convenient and ongoing wildlife movement and habitat connectivity by:</p> <p>a. providing contiguous patches of habitat;</p> <p>b. avoiding the creation of fragmented and isolated patches of habitat;</p> <p>c. providing wildlife movement infrastructure;</p> <p>d. providing replacement and rehabilitation planting to improve connectivity.</p>	<p>No example provided.</p>
<p>Vegetation clearing and soil resource stability</p>	
<p>PO81</p> <p>Development does not:</p> <p>a. result in soil erosion or land degradation;</p> <p>b. leave cleared land exposed for an unreasonable period of time but is rehabilitated in a timely manner.</p>	<p>No example provided.</p>

Vegetation clearing and water quality	
<p>PO82</p> <p>Development maintains or improves the quality of groundwater and surface water within, and downstream, of a site by:</p> <ol style="list-style-type: none"> ensuring an effective vegetated buffers and setbacks from waterbodies is retained to achieve natural filtration and reduce sediment loads; avoiding or minimising changes to landforms to maintain hydrological water flows; adopting suitable measures to exclude livestock from entering a waterbody where a site is being used for animal husbandry⁽⁴⁾ and animal keeping⁽⁵⁾ activities. 	No example provided.
<p>PO83</p> <p>Development minimises adverse impacts of stormwater run-off on water quality by:</p> <ol style="list-style-type: none"> minimising flow velocity to reduce erosion; minimising hard surface areas; maximising the use of permeable surfaces; incorporating sediment retention devices; minimising channelled flow. 	No example provided.
Vegetation clearing and access, edge effects and urban heat island effects	
<p>PO84</p> <p>Development retains safe and convenient public access in a manner that does not result in the adverse edge effects or the loss or degradation of biodiversity values within the environment.</p>	No example provided.
<p>PO85</p> <p>Development minimises potential adverse 'edge effects' on ecological values by:</p> <ol style="list-style-type: none"> providing dense planting buffers of native vegetation between a development and environmental areas; retaining patches of native vegetation of greatest possible size where located between a development and environmental areas ; restoring, rehabilitating and increasing the size of existing patches of native vegetation; ensuring that buildings and access (public and vehicle) are setback as far as possible from environmental areas and corridors; landscaping with native plants of local origin. <p>Editor's note - Edge effects are factors of development that go to detrimentally affecting the composition and density of natural populations at the fringe of natural areas. Factors include weed invasion, pets, public and vehicle access, nutrient loads, noise and</p>	No example provided.

6 Zones

<p>light pollution, increased fire frequency and changes in the groundwater and surface water flow.</p>	
<p>PO86</p> <p>Development avoids adverse microclimate change and does not result in increased urban heat island effects. Adverse urban heat island effects are minimised by:</p> <ol style="list-style-type: none"> pervious surfaces; providing deeply planted vegetation buffers and green linkage opportunities; landscaping with local native plant species to achieve well-shaded urban places; increasing the service extent of the urban forest canopy. 	<p>No example provided.</p>
<p>Vegetation clearing and Matters of Local Environmental Significance (MLES) environmental offsets</p>	
<p>PO87</p> <p>Where development results in the unavoidable loss of native vegetation within a Value Offset Area MLES waterway buffer or a Value Offset Area MLES wetland buffer, an environmental offset is required in accordance with the environmental offset requirements identified in Planning scheme policy - Environmental areas.</p> <p>Editor's note - For MSES Koala Offsets, the environmental offset provisions in Schedule 11 of the Regulation, in combination with the requirements of the Environmental Offsets Act 2014, apply.</p>	<p>No example provided.</p>
<p>Heritage and landscape character (refer Overlay map - Heritage and landscape character to determine if the following assessment criteria apply)</p> <p>Note - To assist in demonstrating achievement of heritage performance outcomes, a Cultural heritage impact assessment report is prepared by a suitably qualified person verifying the proposed development is in accordance with The Australia ICOMOS Burra Charter.</p> <p>Note - To assist in demonstrating achievement of this performance outcome, a Tree assessment report is prepared by a qualified arborist in accordance with Planning scheme policy – Heritage and landscape character. The Tree assessment report will also detail the measures adopted in accordance with AS 4970-2009 Protection of trees on development sites.</p> <p>Note - Places, including sites, objects and buildings having local cultural heritage significance, are identified on Overlay map - Heritage and landscape character and listed in Schedule 1 of Planning scheme policy - Heritage and landscape character. Places also having cultural heritage significance at a State level and being entered in the Queensland Heritage Register, are also identified in Schedule 1 of Planning scheme policy - Heritage and landscape character.</p>	
<p>PO88</p> <p>Development will:</p> <ol style="list-style-type: none"> not diminish or cause irreversible damage to the cultural heritage values present on the site, and associated with a heritage site, object or building; protect the fabric and setting of the heritage site, object or building; be consistent with the form, scale and style of the heritage site, object or building; 	<p>E88</p> <p>Development is for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value.</p> <p>Note - A cultural heritage conservation management plan for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value is prepared in accordance with Planning scheme policy - Heritage and landscape character. The</p>

<ul style="list-style-type: none"> d. utilise similar materials to those existing, or where this is not reasonable or practicable, neutral materials and finishes; e. incorporate complementary elements, detailing and ornamentation to those present on the heritage site, object or building; f. retain public access where this is currently provided. 	<p>plan is sent to, and approved by Council prior to the commencement of any preservation, maintenance, repair and restoration works.</p>
<p>PO89</p> <p>Demolition and removal is only considered where:</p> <ul style="list-style-type: none"> a. a report prepared by a suitably qualified conservation architect or conservation engineer demonstrates that the building is structurally unsound and is not reasonably capable of economic repair; or b. demolition is confined to the removal of outbuildings, extensions and alterations that are not part of the original structure; or c. limited demolition is performed in the course of repairs, maintenance or restoration; or d. demolition is performed following a catastrophic event which substantially destroys the building or object. 	<p>No example provided.</p>
<p>PO90</p> <p>Where development is occurring on land adjoining a site of cultural heritage value, the development is to be sympathetic to and consistent with the cultural heritage values present on the site and not result in their values being eroded, degraded or unreasonably obscured from public view.</p>	<p>No example provided.</p>
<p>Infrastructure buffers (refer Overlay map - Infrastructure buffers to determine if the following assessment criteria apply)</p>	
<p>PO91</p> <p>Development within a Pumping station buffer is located, designed and constructed to:</p> <ul style="list-style-type: none"> a. ensure that odour or other air pollutant impacts on the amenity of the development met the air quality objectives in the Environmental Protection (Air) Policy 2008; b. ensure that noise impacts on the amenity of the development met the indoor noise objectives set out in the Environmental Protection (Noise) Policy 2008. 	<p>E91</p> <p>Development does not involve the construction of any buildings or structures within a Pumping station buffer.</p>
<p>PO92</p> <p>Development does not adversely impact upon the health and vitality of significant trees. Where development occurs in proximity to a significant tree, construction</p>	<p>E92</p> <p>Development does:</p> <ul style="list-style-type: none"> a. not result in the removal of a significant tree;

6 Zones

<p>measures and techniques as detailed in AS 4970-2009 Protection of trees on development sites are adopted to ensure a significant tree's health, wellbeing and vitality.</p> <p>Significant trees are only removed where they are in a poor state of health or where they pose a health and safety risk to persons or property. A Tree Assessment report prepared by a suitably qualified arborist confirming a tree's state of health is required to demonstrate achievement of this performance outcome.</p>	<p>b. not occur within 20m of a protected tree; c. involve pruning of a tree in accordance with Australian Standard AS 4373-2007 – Pruning of Amenity Trees.</p>
<p>Overland flow path (refer Overlay map - Overland flow path to determine if the following assessment criteria apply)</p> <p>Note - The applicable river and creek flood planning levels associated with defined flood event (DFE) within the inundation area can be obtained by requesting a flood check property report from Council.</p>	
<p>PO93</p> <p>Development:</p> <p>a. minimises the risk to persons from overland flow; b. does not increase the potential for damage from overland flow either on the premises or other premises, public land, watercourses, roads or infrastructure.</p>	<p>No example provided.</p>
<p>PO94</p> <p>Development:</p> <p>a. maintains the conveyance of overland flow predominantly unimpeded through the premises for any event up to and including the 1% AEP for the fully developed upstream catchment; b. does not concentrate, intensify or divert overland flow onto an upstream, downstream or surrounding property.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow.</p>	<p>No example provided.</p>
<p>PO95</p> <p>Development does not:</p> <p>a. directly, indirectly or cumulatively cause any increase in overland flow velocity or level; b. increase the potential for flood damage from overland flow either on the premises or other premises, public lands, watercourses, roads or infrastructure.</p>	<p>No example provided.</p>

<p>Note - Open concrete drains greater than 1m in width are not an acceptable outcome, nor are any other design options that may increase scouring.</p>	
<p>PO96</p> <p>Development ensures that public safety and the risk to the environment are not adversely affected by a detrimental impact of overland flow on a hazardous chemical located or stored on the premises.</p>	<p>E96</p> <p>Development ensures that a hazardous chemical is not located or stored in an Overland flow path area.</p> <p>Note - Refer to the Work Health and Safety Act 2011 and associated Regulation and Guidelines, the Environmental Protection Act 1994 and the relevant building assessment provisions under the Building Act 1975 for requirements related to the manufacture and storage of hazardous substances.</p>
<p>PO97</p> <p>Development which is not in a Rural zone ensures that overland flow is not conveyed from a road or public open space onto a private lot.</p>	<p>E97</p> <p>Development which is not in a Rural zone that an overland flow paths and drainage infrastructure is provided to convey overland flow from a road or public open space area away from a private lot.</p>
<p>PO98</p> <p>Development ensures that inter-allotment drainage infrastructure, overland flow paths and open drains through private property cater for overland flows for a fully developed upstream catchment and are able to be easily maintained.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow</p>	<p>E98.1</p> <p>Development ensures that roof and allotment drainage infrastructure is provided in accordance with the following relevant level as identified in QUDM:</p> <ol style="list-style-type: none"> Urban area – Level III; Rural area – N/A; Industrial area – Level V; Commercial area – Level V. <p>E98.2</p> <p>Development ensures that inter-allotment drainage infrastructure is designed to accommodate any event up to and including the 1% AEP for the fully developed upstream catchment.</p>
<p>PO99</p> <p>Development protects the conveyance of overland flow such that an easement for drainage purposes is provided over:</p> <ol style="list-style-type: none"> a stormwater pipe if the nominal pipe diameter exceeds 300mm; an overland flow path where it crosses more than one premises; inter-allotment drainage infrastructure. <p>Note - Refer to Planning scheme policy - Integrated design for details and examples.</p>	<p>No example provided.</p>

6 Zones

<p>Note - Stormwater Drainage easement dimensions are provided in accordance with Section 3.8.5 of QUDM.</p>	
<p>Additional criteria for development for a Park⁽⁵⁷⁾</p>	
<p>PO100</p> <p>Development for a Park⁽⁵⁷⁾ ensures that the design and layout responds to the nature of the overland flow affecting the premises such that:</p> <ol style="list-style-type: none"> public benefit and enjoyment is maximised; impacts on the asset life and integrity of park structures is minimised; maintenance and replacement costs are minimised. 	<p>E100</p> <p>Development for a Park⁽⁵⁷⁾ ensures works are provided in accordance with the requirements set out in Appendix B of the Planning scheme policy - Integrated design.</p>
<p>Riparian and wetland setbacks</p>	
<p>PO101</p> <p>Development provides and maintains a suitable setback from waterways and wetlands that protects natural and environmental values. This is achieved by recognising and responding to the following matters:</p> <ol style="list-style-type: none"> impact on fauna habitats; impact on wildlife corridors and connectivity; impact on stream integrity; impact of opportunities for revegetation and rehabilitation planting; edge effects. 	<p>E101</p> <p>Development does not occur within:</p> <ol style="list-style-type: none"> 50m from top of bank for W1 waterway and drainage line 30m from top of bank for W2 waterway and drainage line 20m from top of bank for W3 waterway and drainage line 100m from the edge of a Ramsar wetland, 50m from all other wetlands. <p>Note - W1, W2 and W3 waterway and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.</p>
<p>Scenic amenity - Regionally significant (Hills) and Locally important (Coast) (refer Overlay map - Scenic amenity to determine if the following assessment criteria apply)</p>	
<p>PO102</p> <p>Landscaping</p> <ol style="list-style-type: none"> complements the coastal landscape character and amenity; has known resilience and robustness in the coastal environment; <p>Fences and walls:</p>	<p>E102</p> <p>Where located in the Locally Important (Coast) scenic amenity overlay:</p> <ol style="list-style-type: none"> landscaping comprises indigenous coastal species; fences and walls are no higher than 1m; and existing pine trees, palm trees, mature fig and cotton trees are retained. where over 12m in height, the building design includes the following architectural character elements:

<ul style="list-style-type: none"> a. do not appear visually dominant or conspicuous within its setting; b. reduce visual appearance through the use of built form articulation, setbacks, and plant screening; c. use materials and colours that are complementary to the coastal environment. <p>Building design responds to the bayside location and complements the particular bayside character and amenity by adopting and incorporating a range of architectural character elements.</p> <p>Vegetation that contributes to bayside character and identity are:</p> <ul style="list-style-type: none"> a. retained; b. protected from development diminishing their significance. 	<ul style="list-style-type: none"> i. curving balcony edges and walls, strong vertical blades and wall planes; ii. balcony roofs, wall articulation expressed with different colours, curves in plan and section, and window awnings; iii. roof top outlooks, tensile structures as shading devices; iv. lightweight structures use white frame elements in steel and timber, bold colour contrast.
--	---

6 Zones

6.2.1.7 Specialised centre precinct

6.2.1.7.1 Purpose - Specialised centre precinct

1. The purpose of the code will be achieved through the following overall outcomes for the Specialised centre precinct:
 - a. Development is of a size, scale and range of services commensurate with the role and function of this precinct within the centres network.

Note - Refer to the centre network identified in Table 6.2.1.1 Moreton Bay centres network.
 - b. Development is contained within precinct boundaries and does not result in the expansion of Specialised centre precincts into adjoining zones or the establishment of new Specialised centre precincts.
 - c. Specialised centres specifically accommodate large bulky goods retail activities, which due to their size, location or servicing requirements, are not located within the region's other centre precincts. Uses not of a bulky goods nature only service the convenience needs of users while on site.
 - d. **Service stations:**
 - i. **establish on heavily trafficked roads where the amenity of surrounding residential uses is already subject to impacts by road vehicle noise;**
 - ii. **establish in locations that will not have a negative impact on the street environments intended to include active frontages;**
 - iii. **ancillary uses or activities only service the convenience needs of users.**
 - e. Adverse impacts on the amenity of surrounding residential uses are minimised by mitigating noise, odour and air quality impacts on residents to a level consistent with the location within or adjoining a specialised centre.
 - f. Facilities and infrastructure are provided to improve pedestrian connectivity and walkability between key destinations within and external to the site through public realm improvements.
 - g. Development ensures the safety, comfort and enjoyment of residents, visitors and workers.
 - h. The design, siting and construction of buildings within a specialised centre:
 - i. contributes to a high quality centre consistent with the desired character of the centre and surrounding area;
 - ii. maintains a human scale, through appropriate building heights and form;
 - iii. provides attractive frontages that address internal and external public spaces and adjoining arterial roads;
 - iv. provides for active and passive surveillance of the public spaces and road frontages;
 - v. ensures parking, manoeuvring and servicing areas are designed, located and aesthetically treated to not be visually dominant features from the streetscape and public spaces.
 - i. General works associated with the development achieves the following:
 - i. new development is provided with a high standard of services to meet and support the current and future needs of users of the site, including roads, street lighting services, telecommunications and reticulated electricity (underground wherever possible), water and sewerage (where available);
 - ii. the development manages stormwater to:

- A. ensure the discharge of stormwater does not adversely affect the quality, environmental values or ecosystem functions of downstream receiving waters;
 - B. prevent stormwater contamination and the release of pollutants;
 - C. maintain or improve the structure and condition of drainage lines and riparian areas;
 - D. avoid off-site adverse impacts from stormwater.
- iii. the development does not result in unacceptable impacts on the capacity and safety of the external road network;
 - iv. the development ensures the safety, efficiency and useability of access ways and parking areas;
 - v. site works including earthworks are managed to be safe and have minimal impacts on adjoining or adjacent premises, the streetscape or the environment.
- j. Activities associated with the use do not cause a nuisance by way of aerosols, fumes, light, noise, odour, particles or smoke.
- k. Noise generating uses are designed, sited and constructed to minimise the transmission of noise to appropriate levels and do not cause environmental harm or nuisance.
- l. Noise sensitive uses are designed, sited and constructed so as not to be subject to unacceptable levels of noise.
- m. Development avoids areas subject to constraint, limitation, or environmental value. Where development cannot avoid these identified areas, it responds by:
 - i. adopting a 'least risk, least impact' approach when designing, siting and locating development in any area subject to a constraint, limitation or environmental value to minimise the potential risk to people, property and the environment;
 - ii. ensuring no further instability, erosion or degradation of the land, water or soil resource;
 - iii. when located within a Water buffer area, complying with the Water Quality Vision and Objectives contained in the Seqwater Development Guidelines: Development Guidelines for Water Quality Management in Drinking Water Catchments 2012.
 - iv. maintaining, restoring and rehabilitating environmental values, including natural, ecological, biological, aquatic, hydrological and amenity values, and enhancing these values through the provision of planting and landscaping, and facilitating safe wildlife movement and connectivity through:
 - A. the provision of replacement, restoration, rehabilitation planting and landscaping;
 - B. the location, design and management of development to avoid or minimise adverse impacts on ecological systems and processes;
 - C. the requiring of environmental offsets in accordance with the Environmental Offsets Act 2014.
 - v. protecting native species and protecting and enhancing species habitat;
 - vi. protecting and preserving the natural, aesthetic, architectural historic and cultural values of significant trees, places, objects and buildings of heritage and cultural significance;
 - vii. establishing effective separation distances, buffers and mitigation measures associated with identified infrastructure to minimise adverse effects on sensitive land uses from odour, noise, dust and other nuisance generating activities;
 - viii. establishing, maintaining and protecting appropriate buffers to waterways, wetlands, native vegetation and significant fauna habitat;
 - ix. ensuring it promotes and does not undermine the ongoing viability, integrity, operation, maintenance and safety of identified infrastructure;
 - x. ensuring effective and efficient disaster management response and recovery capabilities;
 - xi. where located in an overland flow path:
 - xii. A. development siting, built form, layout and access responds to the risk presented by the overland flow and minimises risk to personal safety;
 - B. development is resilient to the impacts of overland flow by ensuring the siting and design accounts for the potential risks to property associated with the overland flow;

6 Zones

- C. development does not impact on the conveyance of the overland flow for any event up to and including the 1% AEP for the fully developed upstream catchment;
- D. development directly, indirectly and cumulatively avoid an increase in the severity of overland flow and potential for damage on the premises or other premises, public lands, watercourses, roads or infrastructure.

n. Development in the Specialised centre precinct is for one or more of the uses identified below:

<ul style="list-style-type: none"> • Caretaker's accommodation⁽¹⁰⁾ • Car wash⁽¹¹⁾ • Emergency services⁽²⁵⁾ 	<ul style="list-style-type: none"> • Garden centre⁽³¹⁾ • Hardware and trade supplies⁽³²⁾ 	<ul style="list-style-type: none"> • Outdoor sales⁽⁵⁴⁾ • Showroom⁽⁷⁸⁾
--	--	---

o. Development in the Specialised centre precinct does not include one or more of the following uses:

<ul style="list-style-type: none"> • Air services⁽³⁾ • Animal husbandry⁽⁴⁾ • Animal keeping⁽⁵⁾ • Aquaculture⁽⁶⁾ • Bar⁽⁷⁾ • Brothel⁽⁸⁾ • Cemetery⁽¹²⁾ • Child care centres⁽¹³⁾ • Club⁽¹⁴⁾ • Community care centre⁽¹⁵⁾ • Community residence⁽¹⁶⁾ • Community use⁽¹⁷⁾ • Crematorium⁽¹⁸⁾ • Cropping⁽¹⁹⁾ • Detention facility⁽²⁰⁾ • Dwelling unit⁽²³⁾ • Dual occupancy⁽²¹⁾ • Dwelling house • Educational Establishment⁽²⁴⁾ • Extractive industry⁽²⁷⁾ 	<ul style="list-style-type: none"> • Hotel⁽³⁷⁾ • Intensive animal industry⁽³⁹⁾ • Intensive horticulture⁽⁴⁰⁾ • Low impact industry⁽⁴²⁾ • Major sport, recreation and entertainment facility⁽⁴⁴⁾ • Market⁽⁴⁶⁾ • Marine industry⁽⁴⁵⁾ • Medium impact industry⁽⁴⁷⁾ • Motor sport facility⁽⁴⁸⁾ • Multiple dwelling⁽⁴⁹⁾ • Nature-based tourism⁽⁵⁰⁾ • Nightclub entertainment facility⁽⁵¹⁾ • Non-resident workforce accommodation⁽⁵²⁾ • Office⁽⁵³⁾ • Outdoor sport and recreation⁽⁵⁵⁾ • Parking station⁽⁵⁸⁾ • Permanent plantation⁽⁵⁹⁾ • Port services⁽⁶¹⁾ • Relocatable home park⁽⁶²⁾ 	<ul style="list-style-type: none"> • Resort complex⁽⁶⁶⁾ • Retirement facility⁽⁶⁷⁾ • Roadside stall⁽⁶⁸⁾ • Rooming accommodation⁽⁶⁹⁾ • Rural industry⁽⁷⁰⁾ • Rural workers' accommodation⁽⁷¹⁾ • Sales office⁽⁷²⁾ • Service industry⁽⁷³⁾ • Shop⁽⁷⁵⁾ - if for a supermarket, department or discount department store or having a gfa less than 500m² • Shopping centre⁽⁷⁶⁾ - if including a supermarket, department or discount department store or a shop⁽⁷⁵⁾ having a gfa less than 500m² • Short-term accommodation⁽⁷⁷⁾ • Special industry⁽⁷⁹⁾ • Theatre⁽⁸²⁾ • Tourist attraction⁽⁸³⁾ • Tourist park⁽⁸⁴⁾
---	---	---

<ul style="list-style-type: none"> • Food and drink outlet⁽²⁸⁾ - if including a drive through • Function facility⁽²⁹⁾ • Health care services⁽²⁹⁾ • High impact industry⁽³⁴⁾ • Home based business⁽³⁵⁾ • Hospital⁽³⁶⁾ 	<ul style="list-style-type: none"> • Renewable energy facility⁽⁶³⁾ • Research and technology industry⁽⁶⁴⁾ • Residential care facility⁽⁶⁵⁾ 	<ul style="list-style-type: none"> • Transport depot⁽⁸⁵⁾ • Warehouse⁽⁸⁸⁾ • Winery⁽⁹⁰⁾
--	---	---

- p. Development not listed in the tables above may be considered on its merits where it reflects and supports the outcomes of the zone.

Part H - Criteria for assessable development - Specialised centre precinct

Where development is categorised as assessable development - code assessment in the Table of Assessment, the assessment benchmarks are the criteria set out in Part H, Table 6.2.1.7.1 as well as the purpose statement and overall outcomes of this code.

Where development is categorised as assessable development - impact assessable, the assessment benchmarks become the whole of the planning scheme.

Table 6.2.1.7.1 Assessable development - Specialised centre precinct

Performance outcomes	Examples that achieve aspects of the Performance Outcomes
General criteria	
Centre network and function	
<p>PO1</p> <p>Uses and activities:</p> <p>a. provide only for large bulky goods retail activities; or provide only for the immediate needs of users while on-site and do not provide for the day-to-day convenience needs of customers;</p> <p>b. are of a size, scale and range of services commensurate with the role and function of this precinct within the centres network.</p> <p>Note - Refer to Moreton Bay centres network Table 6.2.1.1.</p>	<p>E1.1</p> <p>Food and drink outlets⁽²⁸⁾:</p> <p>a. are located internally within large bulky goods tenancies, and do not have an external frontage;</p> <p>b. are ancillary and subordinate to the large bulky goods activities;</p> <p>c. have the same opening hours as the large bulky goods tenancy.</p>
	<p>E1.2</p> <p>All other uses, no example provided.</p>
Active frontage	
<p>PO2</p> <p>Buildings and individual tenancies address street frontages and other areas of pedestrian movement.</p>	<p>No example provided.</p>

6 Zones

Setbacks	
<p>PO3</p> <p>Side and rear setbacks are of a dimension to:</p> <ol style="list-style-type: none"> cater for required openings, the location of loading docks and landscaped buffers etc.; protect the amenity of adjoining sensitive land uses. 	No example provided.
Site area	
<p>PO4</p> <p>The development has sufficient area and dimensions to accommodate required buildings and structures, vehicular access, manoeuvring and parking and landscaping.</p>	No example provided.
Building height	
<p>PO5</p> <p>The height of buildings reflect the individual character of the centre.</p>	<p>E5</p> <p>Building height does not exceed the maximum height identified on Overlay map - Building heights.</p>
Built form	
<p>PO6</p> <p>Awnings are provided at the ground level floor fronting pedestrian footpaths. Awnings:</p> <ol style="list-style-type: none"> provide adequate protection for pedestrians from solar exposure and inclement weather; are integrated with the design of the building and the form and function of the street; are compatible with awnings on adjoining buildings where possible. 	<p>E6</p> <p>Buildings incorporate an awning that:</p> <ol style="list-style-type: none"> is cantilevered; extends from the face of the building; has a minimum height of 3.2m and not more than 4.2m above pavement level; does not extend past a vertical plane of 1.5m inside the kerb line to allow for street trees and regulatory signage; aligns with adjoining buildings to provide continuous shelter where possible.

	<p style="text-align: center;">Figure - Awning requirements</p>
<p>PO7</p> <p>All buildings exhibit a high standard of design and construction, which:</p> <ol style="list-style-type: none"> adds visual interest to the streetscape (e.g. variation in materials, patterns, textures and colours, a consistent building line, blank walls that are visible from public places are treated to not negatively impact the surrounding amenity); contributes to a safe environment (e.g. through the use of lighting and not resulting in concealed recesses or potential entrapment areas); incorporates architectural features within the building facade at the street level to create human scale. 	<p>No example provided.</p>
<p>PO8</p> <p>Building entrances:</p> <ol style="list-style-type: none"> are readily identifiable from the road frontage; add visual interest to the streetscape; are designed to limit opportunities for concealment; are located and oriented to favour active and public transport usage by connecting to pedestrian footpaths on the street frontage and adjoining sites; Include footpaths that connect with adjoining sites; provide a dedicated, sealed pedestrian footpath between the street frontage and the building entrance. <p>Note - The design provisions for footpaths outlined in Planning scheme policy - Integrated design may assist in demonstrating compliance with this Performance Outcome.</p>	<p>No example provided.</p>
<p>Movement network</p>	

6 Zones

<p>PO</p> <p>Development is designed to connect to and form part of the surrounding neighbourhood by providing interconnected street, pedestrian and cyclist pathways to adjoining development, nearby centres, neighbourhood hubs, community facilities, public transport nodes and open space.</p> <p>Note - Refer to Planning scheme policy - Neighbourhood design for guidance on achieving the above outcome.</p>	<p>E</p> <p>Development provides and maintains the connections shown on the movement figures located in Appendix A of Planning scheme policy - Neighbourhood design.</p> <p>E</p> <p>For areas not shown on a movement figure located in Appendix A of Planning scheme policy - Neighbourhood design, no example provided.</p> <p>Note - Refer to Planning scheme policy - Neighbourhood design for guidance on achieving the above example.</p>
<p>Car parking</p>	
<p>PO9</p> <p>The provision of car parking spaces is:</p> <ol style="list-style-type: none"> a. appropriate for the use; b. avoids an oversupply of car parking spaces. <p>Note - Refer to Planning scheme policy - Integrated transport assessment for guidance on how to achieve compliance with this outcome.</p>	<p>E9</p> <p>Car parking is provided in accordance with Schedule 7 - Car parking.</p> <p>Note - The above rates exclude car parking spaces for people with a disability required by Disability Discrimination Act 1992 or the relevant disability discrimination legislation and standards.</p>
<p>PO10</p> <p>Car parking is designed to avoid the visual impact of large areas of surface car parking.</p>	<p>No example provided.</p>
<p>PO11</p> <p>Car parking design includes innovative solutions, including on-street parking and shared parking areas.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details and examples of on-street parking.</p>	<p>No example provided.</p>
<p>PO12</p> <p>The design of car parking areas:</p> <ol style="list-style-type: none"> a. does not impact on the safety of the external road network; b. ensures the safe movement of vehicles within the site; c. interconnects with car parking areas on adjoining sites wherever possible. 	<p>E12</p> <p>All car parking areas are designed and constructed in accordance with Australian Standard AS 2890.1 Parking facilities Part 1: Off-street car parking.</p>
<p>PO13</p>	<p>No example provided.</p>

<p>The safety and efficiency of pedestrian movement is prioritised in the design of car parking areas through providing pedestrian paths in car parking areas that are:</p> <ol style="list-style-type: none"> located along the most direct pedestrian routes between building entrances, car parks and adjoining uses; protected from vehicle intrusion through the use of physical and visual separation (e.g. wheel stops, trees etc); are of a width to allow safe and efficient access for prams and wheelchairs. 	
Loading and servicing	
<p>PO14</p> <p>Loading and servicing areas:</p> <ol style="list-style-type: none"> are not visible from any street frontage; are integrated into the design of the building; include screening and buffers to reduce negative impacts on adjoining sensitive land uses; are consolidated and shared with adjoining sites where possible. <p>Note - Refer to Planning scheme policy - Centre and neighbourhood hub design</p>	<p>No example provided.</p>
Waste	
<p>PO15</p> <p>Bins and bin storage area/s are designed, located and managed to prevent amenity impacts on the locality.</p>	<p>E15</p> <p>Bins and bin storage area/s are provided, designed and managed in accordance with Planning scheme policy – Waste:</p> <p>Development is designed to meet the criteria in the Planning scheme policy - Waste and is demonstrated in a waste management program.</p>
Landscaping and fencing	
<p>PO16</p> <p>On-site landscaping:</p> <ol style="list-style-type: none"> is incorporated into the design of the development; reduces the dominance of car parking and servicing areas from the street frontage; incorporates shade trees in car parking areas; 	<p>No example provided.</p>

6 Zones

<p>d. retains mature trees wherever possible;</p> <p>e. contributes to quality public spaces and the microclimate by providing shelter and shade;</p> <p>f. maintains the achievement of active frontages and sightlines for casual surveillance.</p> <p>Note - All landscaping is to accord with Planning scheme policy - Integrated design.</p>	
<p>PO17</p> <p>Surveillance and overlooking are maintained between the road frontage and the main building line.</p>	<p>No example provided.</p>
<p>Lighting</p>	
<p>PO18</p> <p>Lighting is designed to provide adequate levels of illumination to public and communal spaces to maximise safety while minimising adverse impacts on sensitive land uses.</p>	<p>No example provided.</p>
<p>Amenity</p>	
<p>PO19</p> <p>The amenity of the area and adjacent sensitive land uses are protected from the impacts of dust, odour, chemicals and other environmental nuisances.</p>	<p>No example provided.</p>
<p>Noise</p>	
<p>PO20</p> <p>Noise generating uses do not adversely affect existing or potential noise sensitive uses.</p> <p>Note - The use of walls, barriers or fences that are visible from or adjoin a road or public area are not appropriate noise attenuation measures unless adjoining a motorway, arterial road or rail line.</p> <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p>	<p>No example provided.</p>
<p>PO21</p> <p>Sensitive land uses are provided with an appropriate acoustic environment within designated external private outdoor living spaces and internal areas while:</p> <p>a. contributing to safe and usable public spaces, through maintaining high levels of surveillance of parks,</p>	<p>E21.1</p> <p>Development is designed to meet the criteria outlined in the Planning Scheme Policy – Noise.</p> <p>E21.2</p>

<p>streets and roads that serve active transport purposes (e.g. existing or future pedestrian paths or cycle lanes etc);</p> <p>b. maintaining the amenity of the streetscape.</p> <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p> <p>Note - Refer to Planning Scheme Policy – Integrated design for details and examples of noise attenuation structures.</p>	<p>Noise attenuation structures (e.g. walls, barriers or fences):</p> <p>a. are not visible from an adjoining road or public area unless:</p> <ol style="list-style-type: none"> i. adjoining a motorway or rail line; or ii. adjoining part of an arterial road that does not serve an existing or future active transport purpose (e.g. pedestrian paths or cycle lanes) or where attenuation through building location and materials is not possible. <p>b. do not remove existing or prevent future active transport routes or connections to the street network;</p> <p>c. are located, constructed and landscaped in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Refer to Planning scheme policy – Integrated design for details and examples of noise attenuation structures.</p> <p>Note - Refer to Overlay map – Active transport for future active transport routes.</p>
<p>Hazardous chemicals</p> <p>Note - To assist in demonstrating compliance with the following performance outcomes, a Hazard Assessment Report may be required to be prepared and submitted by a suitably qualified person in accordance with 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.</p> <p>Note - Terms used in this section are defined in 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.</p>	
<p>PO22</p> <p>Off sites risks from foreseeable hazard scenarios involving hazardous chemicals are commensurate with the sensitivity of the surrounding land use zones.</p>	<p>E22.1</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of land zoned for vulnerable or sensitive land uses as described below:</p> <p>Dangerous Dose</p> <p>a. For any hazard scenario involving the release of gases or vapours:</p> <ol style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. <p>b. For any hazard scenario involving fire or explosion:</p>

6 Zones

	<ul style="list-style-type: none">i. 7kPa overpressure;ii. 4.7kW/m² heat radiation. <p>If criteria E22.1 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 0.5 x 10⁻⁶/year.</p> <p>E22.2</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of a commercial or community activity land use zone as described below:</p> <p>Dangerous Dose</p> <ul style="list-style-type: none">a. For any hazard scenario involving the release of gases or vapours:<ul style="list-style-type: none">i. AEGL2 (60minutes) or if not available ERPG2;ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure.b. For any hazard scenario involving fire or explosion:<ul style="list-style-type: none">i. 7kPa overpressure;ii. 4.7kW/m² heat radiation. <p>If criteria E22.2 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 5 x 10⁻⁶/year.</p> <p>E22.3</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of an industrial land use zone as described below:</p> <p>Dangerous Dose</p> <ul style="list-style-type: none">a. For any hazard scenario involving the release of gases or vapours:
--	--

	<ul style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. <ul style="list-style-type: none"> b. For any hazard scenario involving fire or explosion: <ul style="list-style-type: none"> i. 14kPa overpressure; ii. 12.6kW/m2 heat radiation. <p>If criteria E22.3 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 50×10^{-6}/year.</p>
<p>PO23</p> <p>Buildings and package stores containing fire-risk hazardous chemicals are designed to detect the early stages of a fire situation and notify a designated person.</p>	<p>E23</p> <p>Buildings and package stores containing fire-risk hazardous chemicals are provided with 24 hour monitored fire detection system for early detection of a fire event.</p>
<p>PO24</p> <p>Common storage areas containing packages of flammable and toxic hazardous chemicals are designed with spill containment system(s) that are adequate to contain releases, including fire fighting media.</p>	<p>E24</p> <p>Storage areas containing packages of flammable and toxic hazardous chemicals are designed with spill containment system(s) capable of containing a minimum of the total aggregate capacity of all packages plus the maximum operating capacity of any fire protection system for the storage area(s) over a minimum of 60 minutes.</p>
<p>PO25</p> <p>Storage and handling areas, including manufacturing areas, containing hazardous chemicals in quantities greater than 2,500L or kg within a Local Government "flood hazard area" are located and designed in a manner to minimise the likelihood of inundation of flood waters from creeks, rivers, lakes or estuaries.</p>	<p>E25.1</p> <p>The base of any tank with a WC >2,500L or kg is higher than any relevant flood height level identified in an area's flood hazard area. Alternatively:</p> <ul style="list-style-type: none"> a. bulk tanks are anchored so they cannot float if submerged or inundated by water; and b. tank openings not provided with a liquid tight seal, i.e. an atmospheric vent, are extended above the relevant flood height level. <p>E25.2</p> <p>The lowest point of any storage area for packages >2,500L or kg is higher than any relevant flood height level identified in an area's flood hazard area. Alternatively, package stores are provided with impervious bund walls or racking systems higher than the relevant flood height level.</p>

6 Zones

Clearing of habitat trees where not located within the Environmental areas overlay map	
<p>PO26</p> <p>a. Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected.</p> <p>b. Development does not result in the net loss of fauna habitat. Where development does result in the loss of a habitat tree, development will provide replacement fauna nesting boxes at the following rate of 1 nest box for every hollow removed. Where hollows have not yet formed in trees > 80cm in diameter at 1.3m height, 3 nest boxes are required for every habitat tree removed.</p> <p>c. Development does not result in soil erosion or land degradation or leave land exposed for an unreasonable period of time but is rehabilitated in a timely manner</p> <p>Note: Further guidance on habitat trees is provided in Planning scheme policy - Environmental areas</p>	<p>No example provided.</p>
Works criteria	

Utilities	
<p>PO</p> <p>All services including water supply, sewage disposal, electricity, street lighting, telecommunications and gas (if available) are provided in accordance with Planning scheme policy - Integrated design (Appendix A).</p>	<p>E</p> <p>No example provided.</p>
<p>PO27</p> <p>Where the site adjoins or is opposite to a Park⁽⁵⁷⁾; foreshore or Humpybong Reserve all existing overhead power lines are to be undergrounded for the full frontage of the site.</p>	<p>No example provided.</p>
<p>PO28</p> <p>The development is connected to an existing reticulated electricity supply system approved by the relevant energy regulating authority.</p>	<p>E28</p> <p>Development is connected to underground electricity.</p>
<p>PO29</p> <p>The development has access to telecommunications and broadband services in accordance with current standards.</p>	<p>No example provided.</p>
<p>PO30</p>	<p>No example provided.</p>

Where available the development is to safely connect to reticulated gas:	
PO31 The development provides for the treatment and disposal of sewage and other waste water in a way that will not cause environmental harm or pose a risk to public health.	E31.1 Where in a sewerage area, the development is connected to a reticulated sewerage network.
	E31.2 Trade waste is pre-treated on-site prior to discharging into the sewerage network.
PO32 The development is provided with an adequate and sustainable supply of potable (drinking and general use e.g. gardening, washing, fire fighting) water.	E32 Where in an existing connections area or a future connections area as detailed in the Unitywater Connections Policy, the development is connected to the reticulated water supply system in accordance with the South East Queensland Water Supply and Sewerage Design and Construction Code and the relevant Water Service Association of Australia (WSAA) codes and standards.
PO33 The development is provided with constructed and dedicated road access.	No example provided.

Access	
PO34 Development provides functional and integrated car parking and vehicle access, that: <ol style="list-style-type: none"> prioritises the movement and safety of pedestrians between car parking areas at the rear through to the 'main street' and the entrance to the building (e.g. rear entry, arcade etc.); provides safety and security of people and property at all times; does not impede active transport options; does not impact on the safe and efficient movement of traffic external to the site; where possible vehicle access points are consolidated and shared with adjoining sites. <p>Note - Refer to Planning scheme policy - Centre and neighbourhood hub design for details and examples.</p>	No example provided.
PO35	No example provided.

6 Zones

<p>Where required, access easements contain a driveway and provision for services appropriate to the use. The easement covers all works associated with the access in accordance with Planning scheme policy - Integrated design.</p>	
<p>PO36</p> <p>The layout of the development does not compromise:</p> <ol style="list-style-type: none"> the development of the road network in the area; the function or safety of the road network; the capacity of the road network. <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p>	<p>E36.1</p> <p>Direct vehicle access for residential development does not occur from arterial or sub-arterial roads or a motorway.</p> <p>Editor's note - Residential developments should consider amalgamation with the lot to the rear and gaining access via a laneway.</p> <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p> <hr/> <p>E36.2</p> <p>The development provides for the extension of the road network in the area in accordance with Council's road network planning.</p> <hr/> <p>E36.3</p> <p>The development does not compromise future road widening of frontage roads in accordance with the relevant standard and Council's road planning.</p> <hr/> <p>E36.4</p> <p>The lot development layout allows forward vehicular access to and from the site.</p>
<p>PO37</p> <p>Safe access is provided for all vehicles required to access the site.</p>	<p>E37.1</p> <p>Site access and driveways are designed and, located and constructed in accordance with:</p> <ol style="list-style-type: none"> where for a Council-controlled road and associated with a Dwelling house: <ol style="list-style-type: none"> Planning scheme policy - Integrated design; Where for a Council-controlled road; and not associated with a Dwelling house: <ol style="list-style-type: none"> AS/NZS2890.1 section 3; or Parking facilities Part 1: Off street car parking; AS 2890.2 - Parking facilities Part 2: Off-street commercial vehicle facilities;

	<ul style="list-style-type: none"> iii. Planning scheme policy - Integrated design; iv. Schedule 8 - Service vehicle requirements; <p>c. Where for a State-Controlled road, the Safe Intersection Sight Distance requirements in AustRoads and the appropriate IPWEAQ standard drawings, or a copy of a Transport Infrastructure Act 1994, section 62 approval.</p>
	<p>E37.2</p> <p>Internal driveways, car parks and access ways are designed and constructed with a sealed pavement and in accordance with:</p> <ul style="list-style-type: none"> a. AS/NZS 2890.1 Parking Facilities Part 1:– Off street car parking; b. AS 2890.2 Parking Facilities Part 2: Off street commercial vehicle facilities; and– c. the relevant standards in Planning scheme policy - Integrated design; and d. Schedule 8 - Service vehicle requirements. <p>Note - This includes queue lengths (refer to Schedule 8 Service vehicle requirements), pavement widths and construction.</p>
	<p>E37.3</p> <p>Access driveways, manoeuvring areas and loading facilities are sealed and provide for service vehicles listed in Schedule 8 Service vehicle requirements for the relevant use. The on-site manoeuvring is to be in accordance with Schedule 8 Service vehicle requirements.</p> <p>E</p> <p>Landscaping (including shade trees) is provided within car parks in accordance with Planning scheme policy - Integrated design.</p>
<p>PO</p> <p>Sealed and flood free road access during the minor storm event is available to the site from the nearest arterial or sub-arterial road.</p> <p>Editor's Note - Where associated with a State-controlled road, further requirements may apply, and approvals may be required from the Department of Transport and Main Roads.</p>	<p>E</p> <p>Roads or streets giving access to the development from the nearest arterial or sub-arterial road are flood free during the minor storm event and are sealed.</p> <p>Note - The road network is mapped on Overlay Map - Road Hierarchy.</p>

6 Zones

<p>PO</p> <p>Roads which provide access to the site from an arterial or sub-arterial road remain trafficable during major storm events without flooding or impacting upon residential properties or other premises.</p>	<p>E</p> <p>Access roads to the development have sufficient longitudinal and cross drainage to remain safely trafficable during major storm (1% AEP) events.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - Refer to QUDM for requirements regarding trafficability.</p>
	<p>E</p> <p>Culverts and causeways do not increase inundation levels or increase velocities, for all events up to the defined flood event, to upstream or downstream properties.</p>

Street design and layout	
<p>PO</p> <p>Streets are designed and constructed in accordance with Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures. The street design and construction accommodates the following functions:</p> <ol style="list-style-type: none"> a. access to premises by providing convenient vehicular movement for residents between their homes and the major road network; b. safe and convenient pedestrian and cycle movement; c. adequate on street parking; d. stormwater drainage paths and treatment facilities; e. efficient public transport routes; f. utility services location; g. emergency access and waste collection; h. setting and approach (streetscape, landscaping and street furniture) for adjoining residences; i. expected traffic speeds and volumes; and j. wildlife movement. <p>Note - Preliminary road design (including all services, street lighting, stormwater infrastructure, access locations, street trees and pedestrian network) may be required to demonstrate compliance with this PO.</p>	<p>No example provided</p>

<p>Note - Refer to Planning scheme policy - Environmental areas and corridors for examples of when and where wildlife movement infrastructure is required.</p>	
<p>PO38</p> <p>Upgrade works (whether trunk or non-trunk) are provided where necessary to:-</p> <ol style="list-style-type: none"> ensure the type or volume of traffic generated by the development does not have a negative impact on the external road network;- ensure the orderly and efficient continuation of the active transport network;- ensure the site frontage is constructed to a suitable urban standard generally in accordance with Planning scheme policy - Integrated design. <p>Note - An Integrated Transport Assessment (ITA) may be required to demonstrate compliance with this performance outcome refer to Planning scheme policy - Integrated transport assessment for guidance on when an ITA is required. An ITA should be prepared in accordance with Planning scheme policy - Integrated transport assessment.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - The primary and secondary active transport network is mapped on Overlay map - Active transport</p> <p>Note - To demonstrate compliance with c. of this performance outcome, site frontage works where in existing road reserve (non-trunk) are to be designed and constructed as follows:</p> <ol style="list-style-type: none"> Where the street is partially established to an urban standard, match the alignment of existing kerb and channel and provide carriageway widening and underground drainage where required; or Where the street is not established to an urban standard, prepare a design that demonstrates how the relevant features of the particular road as shown in the Planning scheme policy - Integrated Design can be achieved in the existing reserve. <p>Note - Refer to Planning scheme policy - Integrated design for road network and active transport network design standards.</p> <p>The existing road network (whether trunk or non-trunk) is upgraded where necessary to cater for the impact from the development.</p> <p>Note - An applicant will be required to submit an Integrated Transport Assessment (ITA), prepared in accordance with Planning scheme policy - Integrated transport assessment to demonstrate compliance with this PO, when any of the following occurs;</p> <ul style="list-style-type: none"> development is within 200m of a transport sensitive location such as a school, shopping centre, bus or train station or a large generator of pedestrian or vehicular traffic; 	<p>E</p> <p>No example provided.</p> <p>New intersections onto existing roads are designed to accommodate traffic volumes and traffic movements taken from a date 10 years from the date of completion of the last stage of the development. Detailed design is to be in accordance with Planning scheme policy - Integrated design.</p> <p>Note - All turns vehicular access to existing lots is to be retained at new road intersections wherever practicable.</p> <p>Note - Existing on-street parking is to be retained at new road intersections and along road frontages wherever practicable.</p> <p>E</p> <p>Existing intersections external to the site are upgraded as necessary to accommodate increased traffic from the development. Design is in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p> <p>Note - All turns vehicular access to existing lots is to be retained at new road intersections wherever practicable.</p> <p>Note - Existing on-street parking is to be retained at upgraded road intersections and along road frontages wherever practicable.</p> <p>E</p> <p>The active transport network is extended in accordance with Planning scheme policy - Integrated design.</p>

6 Zones

<ul style="list-style-type: none"> • forecast traffic to/from the development exceeds 5% of the two way flow on the adjoining road or intersection in the morning or afternoon transport peak within 10 years of the development completion; • Development access onto a sub arterial, or arterial road or within 100m of a signalised intersection; • Residential development greater than 50 lots or dwellings; • Offices greater than 4,000m² Gross Floor Area (GFA); • Retail activities including Hardware and trade supplies, • Showroom, Shop or Shopping centre greater than 1,000m² GFA; • Warehouses and Industry greater than 6000m² GFA; • On-site carpark greater than 100 spaces; • Development has a trip generation rate of 100 vehicles or more within the peak hour; • Development which dissects or significantly impacts on an environmental area or an environmental corridor. <p>The ITA is to review the development's impact upon the external road network for the period of 10 years from completion of the development. The ITA is to provide sufficient information for determining the impact and the type and extent of any ameliorative works required to cater for the additional traffic. The ITA must include a future structural road layout of adjoining properties that will form part of this catchment and road connecting to these properties. The ITA is to assess the ultimate developed catchment's impacts and necessary ameliorative works, and the works or contribution required by the applicant as identified in the study.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - The primary and secondary active transport network is mapped on Overlay map - Active transport.</p>	
<p>PO</p> <p>Intersections along all streets and roads are located and designed to provide safe and convenient movements for all users.</p>	<p>E</p> <p>Intersections are designed and constructed in accordance with Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p> <p>E</p> <p>Intersection spacing (centreline – centreline) along a through road conforms with the following:</p> <ol style="list-style-type: none"> a. where the through road provides an access function; <ol style="list-style-type: none"> i. intersecting road located on the same side = 60 metres;

	<ul style="list-style-type: none"> ii. intersecting road located on opposite side (Left Right Stagger) = 60 metres; iii. intersecting road located on opposite side (Right Left Stagger) = 40 metres. <p>b. Where the through road provides a collector or sub-arterial function:</p> <ul style="list-style-type: none"> i. intersecting road located on the same side = 100 metres; ii. intersecting road located on opposite side (Left Right Stagger) = 100 metres; iii. intersecting road located on opposite side (Right Left Stagger) = 60 metres. <p>c. Where the through road provides an arterial function:</p> <ul style="list-style-type: none"> i. intersecting road located on the same side = 300 metres; ii. intersecting road located on opposite side (Left Right Stagger) = 300 metres; iii. intersecting road located on opposite side (Right Left Stagger) = 300 metres; <p>d. Walkable block perimeter does not exceed 1000 metres.</p> <p>Note - Based on the absolute minimum intersection spacing identified above, all turns access may not be permitted (ie. left in/left out only) at intersections with sub-arterial roads or arterial roads.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - An Integrated Transport Assessment (ITA) including preliminary intersection designs, prepared in accordance with Planning scheme policy - Integrated transport assessment may be required to demonstrate compliance with this PO. Intersection spacing will be determined based on the deceleration and queue storage distances required for the intersection after considering vehicle speed and present/forecast turning and through volumes.</p>		
<p>PO</p> <p>All Council controlled frontage roads are designed and constructed in accordance with Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures. All new works are extended to join any existing works within 20m.</p>	<p>E</p> <p>Design and construct all Council controlled frontage roads in accordance with Planning scheme policy - Integrated design, Planning scheme policy - Operational works inspection, maintenance and bonding procedures and the following:</p> <table border="1" data-bbox="810 2011 1465 2065"> <thead> <tr> <th data-bbox="810 2011 1136 2065">Situation</th> <th data-bbox="1136 2011 1465 2065">Minimum construction</th> </tr> </thead> </table>	Situation	Minimum construction

<p>Note - Major roads are sub-arterial roads and arterial roads. Minor roads are roads that are not major roads.</p> <p>Note - Construction includes all associated works (services, street lighting and linemarking).</p> <p>Note - Alignment within road reserves is to be agreed with Council.</p> <p>Note - *Roads are considered to be constructed in accordance with Council standards when there is sufficient pavement width, geometry and depth to comply with the requirements of Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures. Testing of the existing pavement may be required to confirm whether the existing works meet the standards in Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p>			

<h2>Stormwater</h2>	
<p>PO</p> <p>Minor stormwater drainage systems (internal and external) have the capacity to convey stormwater flows from frequent storm events for the fully developed upstream catchment whilst ensuring pedestrian and vehicular traffic movements are safe and convenient.</p>	<p>E</p> <p>The capacity of all minor drainage systems are designed in accordance with Planning scheme policy - Integrated design.</p> <p>E</p> <p>Stormwater pipe network capacity is to be calculated in accordance with the Hydraulic Grade Line method as detailed in Australian Rainfall and Runoff or QUDM.</p> <p>E</p>

	Development ensures that roof and allotment drainage infrastructure is provided in accordance with the relevant level as identified in QUDM.
<p>PO</p> <p>Major stormwater drainage system(s) have the capacity to safely convey stormwater flows for the 1% AEP event for the fully developed upstream catchment.</p>	<p>E</p> <p>The internal drainage system safely and adequately conveys the stormwater flows for the 1% AEP event for the fully developed upstream catchment through the site.</p>
	<p>E</p> <p>The external (downstream) drainage system safely conveys the stormwater flows for the 1% AEP event for the fully developed upstream catchment without allowing the flows to encroach upon private lots.</p>
	<p>E</p> <p>Overland flow paths from roads and public open space areas do not pass through private lots. Drainage pathways are provided to accommodate overland flows from roads and public open space areas.</p>
	<p>E</p> <p>The flow velocity in all unlined or soft faced open drains is kept within acceptable limits for the type of material or lining and condition of the channel.</p> <p>Note - Refer to QUDM for recommended average flow velocities.</p>
<p>PO</p> <p>Provide measures to properly manage surface flows for the 1% AEP event (for the fully developed catchment) draining to and through the land to ensure no actionable nuisance is created to any person or premises as a result of the development. The development must not result in ponding on adjacent land, redirection of surface flows to other premises or blockage of a surface flow relief path for flows exceeding the design flows for any underground system within the development.</p>	<p>E</p> <p>The stormwater drainage system is designed and constructed in accordance with Planning scheme policy - Integrated design.</p>
<p>PO39</p> <p>Stormwater run-off from the site is conveyed to a point of lawful discharge without causing actionable nuisance or annoyance to any person, property or premises.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details.</p>	No example provided.

6 Zones

<p>Note - A downstream drainage discharge report in accordance with Planning scheme policy - Stormwater management may be required to demonstrate achievement of this performance outcome.</p> <p>Note - A watercourse as defined in the Water Act may be accepted as a lawful point of discharge providing the drainage discharge from the site does not increase the downstream flood levels during events up to and including the 1% AEP storm. An afflux of +20mm may be accepted on Council controlled land and road infrastructure. No worsening is ensured when stormwater is discharged into a catchment that includes State Transport Infrastructure.</p>	
<p>PO40</p> <p>Stormwater generated from the development does not compromise the capacity of existing stormwater infrastructure downstream of the site.</p> <p>Note - A downstream drainage discharge report in accordance with Planning scheme policy - Stormwater management may be required to demonstrate achievement of this performance outcome.</p>	<p>No example provided.</p>
<p>PO41</p> <p>Stormwater quality management systems are designed and constructed to minimise the environmental impact of stormwater discharge on surface and underground receiving water quality and meet the design objectives in Tables A and B in Appendix 2 of the SPP.</p> <p>Note - A stormwater management plan prepared by a suitably qualified professional will be required in accordance with Planning scheme policy - Stormwater management.</p> <p>Where development:</p> <ul style="list-style-type: none"> a. is for an urban purpose that involves a land area 2500m² or greater in size; and b. results in 6 or more dwellings; or c. results in an impervious area greater than 25% of the net developable area, <p>stormwater quality management systems are designed, constructed, established and maintained to minimise the environmental impact of stormwater on surface, groundwater and receiving water environments and meet the design objectives outlined in Schedule 10 - Stormwater management design objectives.</p> <p>Note - A site based stormwater management plan prepared by a suitably qualified professional will be required in accordance with Planning Scheme Policy - Stormwater Management. Stormwater quality infrastructure is to be design in accordance with Planning scheme policy - Integrated Design (Appendix C).</p>	<p>No example provided.</p>

<p>PO42</p> <p>Easements for drainage purposes are provided over:</p> <ol style="list-style-type: none"> stormwater pipes located in freehold land if the pipe diameter exceeds 300mm; overland flow paths where they cross more than one property boundary. <p>Note – Refer to Planning scheme policy – Integrated design for details:</p> <p>Note – Stormwater Drainage easement dimensions are provided in accordance with Section 3.8.5 of QUDM:</p> <p>Stormwater drainage pipes and structures through or within private land (including inter-allotment drainage) are protected by easements in favour of Council with sufficient area for practical access for maintenance purposes.</p> <p>Note - In order to achieve a lawful point of discharge, stormwater easements may also be required over temporary drainage channels/infrastructure where stormwater discharges to a balance lot prior to entering Council's stormwater drainage system.</p>	<p>E</p> <p>No example provided:</p> <p>Stormwater drainage infrastructure (excluding detention and bio-retention systems) through or within private land (including inter-allotment drainage) is protected by easements in favour of Council. Minimum easement widths are as follows:</p> <table border="1" data-bbox="810 506 1465 1032"> <thead> <tr> <th>Pipe Diameter</th> <th>Minimum easement width (excluding access requirements)</th> </tr> </thead> <tbody> <tr> <td>Stormwater pipe up to 825mm diameter</td> <td>3.0m</td> </tr> <tr> <td>Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter</td> <td>4.0m</td> </tr> <tr> <td>Stormwater pipe greater than 825mm diameter</td> <td>Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).</td> </tr> </tbody> </table> <p>Note - Additional easement width may be required in certain circumstances in order to facilitate maintenance access to the stormwater system.</p> <p>Note - Refer to Planning Scheme Policy - Integrated Design (Appendix C) for easement requirements over open channels.</p>	Pipe Diameter	Minimum easement width (excluding access requirements)	Stormwater pipe up to 825mm diameter	3.0m	Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter	4.0m	Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).
Pipe Diameter	Minimum easement width (excluding access requirements)								
Stormwater pipe up to 825mm diameter	3.0m								
Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter	4.0m								
Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).								
<p>PO</p> <p>Stormwater management facilities (excluding outlets) are located outside of riparian areas and prevent increased channel bed and bank erosion.</p>	<p>E</p> <p>No example provided.</p>								

Site works and construction management	
<p>PO43</p> <p>The site and any existing structures are maintained in a tidy and safe condition.</p>	<p>No example provided.</p>
<p>PO44</p> <p>All works on-site are managed to:</p> <ol style="list-style-type: none"> minimise as far as practicable, impacts on adjoining or adjacent premises and the streetscape in regard to erosion and sedimentation, dust, noise, safety and light; 	<p>E44.1</p> <p>Works incorporate temporary stormwater runoff, erosion and sediment controls and trash traps removal devices designed in accordance with the Urban Stormwater Quality Planning Guidelines, State Planning Policy, Schedule 10 - Stormwater management design objectives, Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design, including but not limited to the following:</p>

6 Zones

<ul style="list-style-type: none"> b. minimise as far as possible, impacts on the natural environment; c. ensure stormwater discharge is managed in a manner that does not cause actionable nuisance or annoyance to any person or premises; d. avoid adverse impacts on street trees and their critical root zone. 	<ul style="list-style-type: none"> a. stormwater is not discharged to adjacent properties in a manner that differs significantly from pre-existing conditions; b. stormwater discharged to adjoining and downstream properties does not cause scour and or erosion of any kind; c. stormwater discharge rates do not exceed pre-existing conditions; d. the 10% AEP storm event is the minimum design storm for all temporary diversion drains; and e. the 50% AEP storm event is the minimum design storm for all silt barriers and sedimentation basins. f. minimum design storm for all temporary diversion drains and sedimentation basins in accordance with Schedule 10 - Stormwater management design objectives; g. ponding or concentration of stormwater does not occur in adjoining properties.
	<p>E44.2</p> <p>Stormwater runoff, erosion and sediment controls are constructed in accordance with Planning scheme policy - Integrated design (Appendix C) prior to commencement of any clearing or earthworks and are maintained and adjusted as necessary at all times to ensure their ongoing effectiveness.</p> <p>Note - The measures are adjusted on-site to maximise their effectiveness.</p>
	<p>E44.3</p> <p>The completed earthworks area is stabilised using turf, established grass seeding, mulch or sprayed stabilisation techniques to control erosion and sediment and dust from leaving the property.</p>
	<p>E44.4</p> <p>Where works are proposed in proximity to an existing street tree, an inspection and a root management plan is undertaken by a qualified arborist which demonstrates and ensures that no permanent damage is caused to the tree.</p> <p>Existing street trees are protected and not damaged during works.</p>

	<p>Note - Where development occurs in the tree protection zone, measures and techniques as detailed in Australian Standard AS 4970 Protection of trees on development sites are adopted and implemented.</p>
<p>PO45</p> <p>Dust suppression measures are implemented during soil disturbances and construction works to protect nearby premises from unreasonable dust impacts.</p>	<p>E45</p> <p>No dust emissions extend beyond the boundaries of the site during soil disturbances and construction works.</p>
<p>PO46</p> <p>All development works on-site and including the transportation of material to and from the site are managed to not negatively impact the existing road network, the amenity of the surrounding area or the streetscape.</p> <p>Note – Where the amount of imported or exported material is greater than 50m³, a haulage route must be identified and approved by Council:</p> <p>Note - A Traffic Management Plan may be required to demonstrate compliance with this PO. A Traffic Management Plan is to be prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD).</p> <p>Note - A haulage route must be identified and approved by Council where imported or exported material is transported to the site via a road of Local Collector standard or less, and:</p> <ol style="list-style-type: none"> the aggregate volume of imported or exported material is greater than 1000m³; or the aggregate volume of imported or exported material is greater than 200m³ per day; or the proposed haulage route involves a vulnerable land use or shopping centre. <p>Note - A dilapidation report (including photographs) may be required for the haulage route to demonstrate compliance with this PO.</p> <p>Editor's note - Where associated with a State-controlled road, further requirements may apply, and approval may be required from the Department of Transport and Main Roads.</p>	<p>E46.1</p> <p>Construction traffic including contractor car parking is controlled in accordance with a traffic management plan, prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) to ensure all traffic movements to and from the site are safe.</p> <p>E46.2</p> <p>All contractor car parking is either provided on the development site, or on an alternative site in the general locality which has been set aside for car parking. Contractors vehicles are generally not to be parked in existing roads.</p> <p>Note – A Traffic Management Plan may be required for the site in accordance with the Manual of Uniform Traffic Control Devices (MUTCD):</p> <p>E46.3</p> <p>Any material dropped, deposited or spilled on the road(s) as a result of construction processes associated with the site are to be cleaned at all times.</p> <p>E</p> <p>Construction traffic to and from the development site uses the highest classification streets or roads where a choice of access routes is available. Haul routes for the transport of imported or spoil material and gravel pavement material along Council roads below sub-arterial standard must be approved routes.</p> <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p> <p>Note - A dilapidation report may be required to demonstrate compliance with this E.</p> <p>E</p>

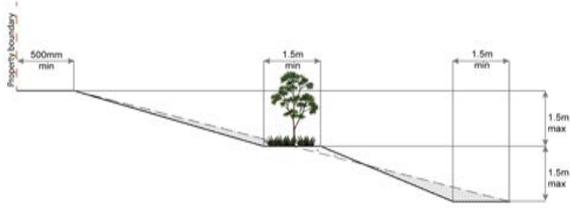

6 Zones

	<p>Where works are carried out in existing roads, the works must be undertaken so that the existing roads are maintained in a safe and useable condition. Practical access for residents, visitors and services (including postal deliveries and refuse collection) is retained to existing lots during the construction period and after completion of the works.</p> <p>Note - A traffic control plan prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) will be required for any works that will affect access, traffic movements or traffic safety in existing roads.</p> <p>E</p> <p>Access to the development site is obtained via an existing lawful access point.</p>
<p>PO47</p> <p>All disturbed areas are to be progressively stabilised during construction and the entire site rehabilitated and substantially stabilised at the completion of construction.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details.</p>	<p>E47</p> <p>At completion of construction all disturbed areas of the site are to be:</p> <ol style="list-style-type: none"> topsoiled with a minimum compacted thickness of fifty (50) millimetres; grassed stabilised using turf, established grass seeding, mulch or sprayed stabilisation techniques. <p>Note - These areas are to be maintained during any maintenance period to maximise grass coverage from grass seeding of these areas:</p>
<p>PO</p> <p>Earthworks are undertaken to ensure that soil disturbances are staged into manageable areas.</p> <p>Note - A site specific Erosion and Sediment Control Plan (ESCP) will be required to demonstrate compliance with this PO. An ECP is to be prepared in accordance with Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design (Appendix C).</p>	<p>E</p> <p>Soil disturbances are staged into manageable areas of not greater than 3.5 ha.</p>
<p>PO48</p> <p>The clearing of vegetation on-site:</p> <ol style="list-style-type: none"> is limited to the area of infrastructure works, building areas and other necessary areas for the works; and includes the removal of declared weeds and other materials which are detrimental to the intended use of the land; is disposed of in a manner which minimises nuisance and annoyance to existing premises. 	<p>E48.1</p> <p>All native vegetation to be retained on-site is temporarily fenced or protected prior to and during development works.</p> <p>Note - No parking of vehicles or storage of machinery or goods is to occur in these areas during development works.</p> <p>E48.2</p>

<p>Note - No burning of cleared vegetation is permitted.</p>	<p>Disposal of materials is managed in one or more of the following ways:</p> <ol style="list-style-type: none"> all cleared vegetation, declared weeds, stumps, rubbish, car bodies, scrap metal and the like are removed and disposed of in a Council land fill facility; or all native vegetation with a diameter below 400mm is to be chipped and stored on-site. <p>Note - The chipped vegetation must be stored in an approved location; preferably a park or public land.</p>
<p>PO</p> <p>All development works are carried out at times which minimise noise impacts to residents.</p>	<p>E</p> <p>All development works are carried out within the following times:</p> <ol style="list-style-type: none"> Monday to Saturday (other than public holidays) between 6:30am and 6:30pm on the same day; no work is to be carried out on Sundays or public holidays. <p>Note - Work outside the above hours may be approved (in writing) where it can be demonstrated that the work will not cause significant inconvenience or disruption to the public, or the work is unlikely to cause annoyance or inconvenience to occupants of adjacent properties.</p>
<p>PO49</p> <p>Any alteration or relocation in connection with or arising from the development to any service, installation, plant, equipment or other item belonging to or under the control of the telecommunications authority, electricity authorities, the Council or other person engaged in the provision of public utility services is to be carried with the development and at no cost to Council.</p>	<p>No example provided.</p>

Earthworks	
<p>PO50</p> <p>On-site earthworks are designed to consider the visual and amenity impact as they relate to:</p> <ol style="list-style-type: none"> the natural topographical features of the site; short and long-term slope stability; soft or compressible foundation soils; reactive soils; 	<p>E50.1</p> <p>All cut and fill batters are provided with appropriate scour, erosion protection and run-off control measures including catch drains at the top of batters and lined batter drains as necessary.</p> <hr/> <p>E50.2</p> <p>Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance of steep rock slopes and batters.</p>

6 Zones

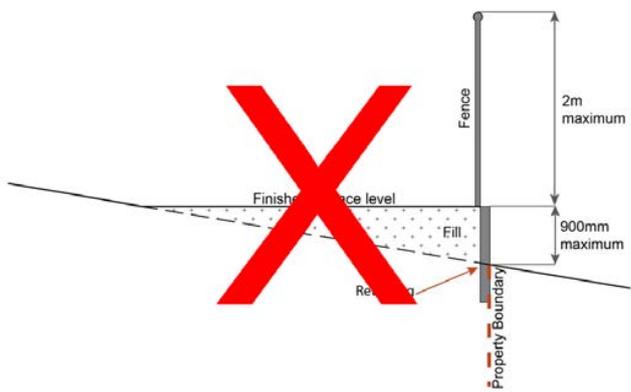

<p>e. low density or potentially collapsing soils;</p> <p>f. existing fill and soil contamination that may exist on-site;</p> <p>g. the stability and maintenance of steep rock slopes and batters;</p> <p>h. excavation (cut) and fill and impacts on the amenity of adjoining lots (e.g. residential).</p> <p><i>Note – Filling or excavation works are to be completed within six months of the commencement date.</i></p>	<p>E50.3</p> <p>Inspection and certification of steep rock slopes and batters is required by a suitably qualified and experienced RPEQ.</p> <p>E50.4</p> <p>All filling or excavation is contained on-site and is free draining.</p> <p>E50.5</p> <p>All fill placed on-site is:</p> <ol style="list-style-type: none"> limited to that area required for the necessary for the approved use; clean and uncontaminated (i.e. no building waste, concrete, green waste, actual acid sulfate soils, potential acid sulfate soils or contaminated material etc.) material is used as fill). <p>E50.6</p> <p>The site is prepared and the fill placed on-site in accordance with AS3798.</p> <p>Note - The fill is to be inspected and tested in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p>
<p>PO51</p> <p>Embankments are stepped, terraced and landscaped to not adversely impact on the visual amenity of the surrounding area.</p>	<p>E51</p> <p>Any embankments more than 1.5 metres in height are stepped, terraced and landscaped.</p> <p style="text-align: center;">Figure - Embankment</p> 
<p>PO52</p> <p>Filling or excavation is undertaken in a manner that:</p>	<p>E52.1</p> <p>No filling or excavation is undertaken in an easement issued in favour of Council or a public sector entity.</p>

<p>a. does not adversely impact on a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land;</p> <p>b. does not preclude reasonable access to a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p>	<p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p> <p>E52.2</p> <p>Filling or excavation that would result in any of the following is not carried out on-site:</p> <p>a. a reduction in cover over any Council or public sector entity infrastructure service to less than 600mm;</p> <p>b. an increase in finished surface grade over, or within 1.5m on each side of, the Council or public sector entity infrastructure above that which existed prior to the earthworks being undertaken;</p> <p>c. prevent reasonable access to Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the site for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity as is defined in the Sustainable Planning Schedule 2 of the Act 2009.</p>
<p>PO53</p> <p>Filling or excavation does not result in land instability.</p> <p>Note - Steep rock slopes and batters are inspected and certified for long-term stability by a suitably qualified and experienced geotechnical engineer with RPEQ qualifications. Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance.</p>	<p>No example provided.</p>
<p>PO54</p> <p>Development Filling or excavation does not result in:</p> <p>a. adverse impacts on the hydrological and hydraulic capacity of the waterway or floodway;</p> <p>b. increased flood inundation outside the site;</p> <p>c. any reduction in the flood storage capacity in the floodway;</p> <p>d. and any clearing of native vegetation.</p> <p>Note - To demonstrate compliance with this outcome, Planning Scheme Policy - Stormwater Management provides guidance on the preparation of a site based stormwater management plan by a suitably qualified professional. Refer to Planning scheme policy - Integrated design for guidance on infrastructure design and modelling requirements.</p>	<p>No example provided.</p>
<p>PO</p>	<p>E</p> <p>Filling and excavation undertaken on the development site are shaped in a manner which does not:</p>

6 Zones

<p>Filling or excavation on the development site is undertaken in a manner which does not create or accentuate problems associated with stormwater flows and drainage systems on land adjoining the site.</p>	<ol style="list-style-type: none"> a. prevent stormwater surface flow which, prior to commencement of the earthworks, passed onto the development site, from entering the land; or b. redirect stormwater surface flow away from existing flow paths; or c. divert stormwater surface flow onto adjacent land, (other than a road), in a manner which: <ol style="list-style-type: none"> i. concentrates the flow; or ii. increases the flow rates of stormwater over the affected section of the adjacent land above the situation which existed prior to the diversion; or iii. causes actionable nuisance to any person, property or premises.
---	---

Retaining walls and structures

<p>PO55</p> <p>All earth retaining structures provide a positive interface with the streetscape and minimise impacts on the amenity of adjoining residents.</p> <p>Note - Refer to Planning scheme policy - Residential design for guidance on how to achieve compliance with this performance outcome.</p>	<p>E55</p> <p>Earth-retaining structures:-</p> <ol style="list-style-type: none"> a. are not constructed of boulder rocks or timber; b. where height is no greater than 900mm, are provided in accordance with Figure - Retaining on a boundary; <p style="text-align: center;">Figure - Retaining on boundary</p>  <ol style="list-style-type: none"> c. where height is greater than 900mm but no greater than 1.5m, are to be setback at least the equivalent height of the retaining structure from any property boundary; d. where height is greater than 1.5m, are to be setback and stepped 1.5m vertical: 1.5m horizontal; terraced, landscaped and drained as shown below. <p style="text-align: center;">Figure - Gut</p>
--	---

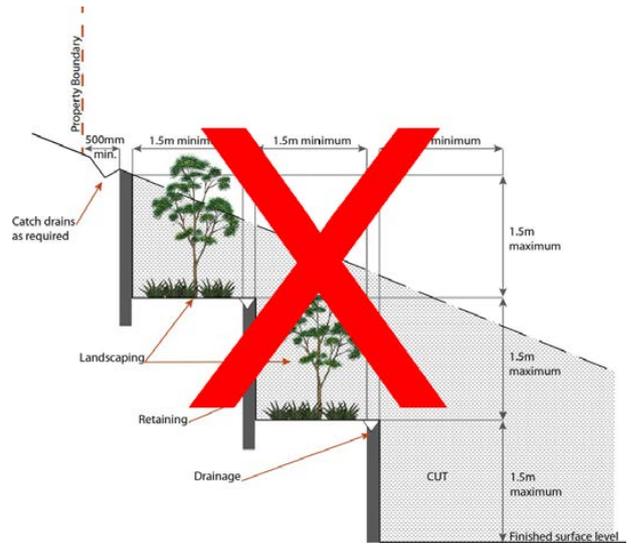

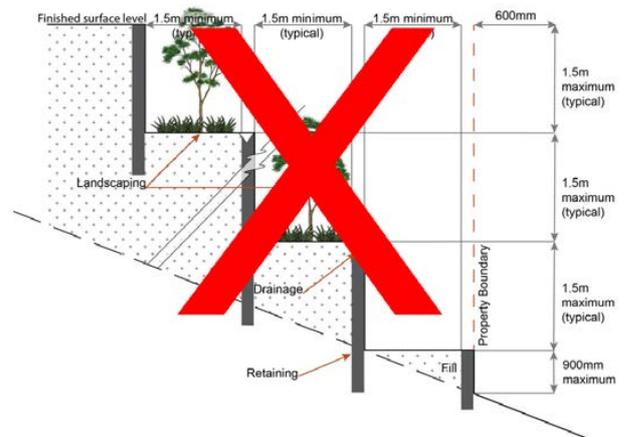

Figure--Fill

Filling or excavation does not:

- a. **involve a change in level of more than 1.0m relative to natural ground level;**

OR

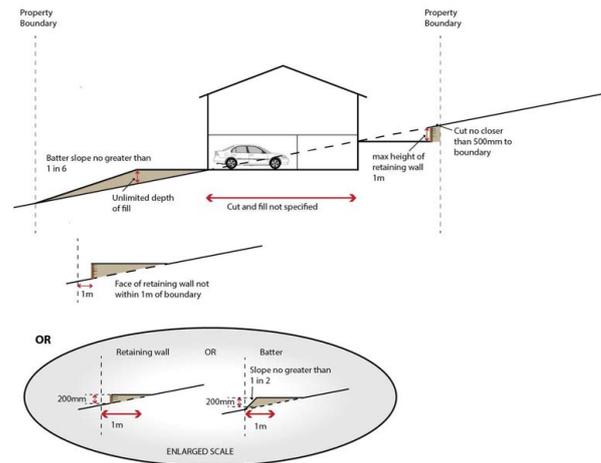

result in a batter greater than 1V to 6H;

- b. **necessitate the construction of a freestanding retaining wall exceeding 1.0m in height relative to finished ground level;**

- c. result in the top of any cut batter, or the exposed face of any freestanding retaining wall supporting that cut, being closer than 500mm to a property boundary;
- d. result in the toe of any fill batter, or exposed face of any freestanding retaining wall supporting that fill, being closer than 1.0m to a property boundary unless:
 - i. the depth of fill within the 1.0m strip does not exceed 200mm relative to natural ground level; or
 - ii. the batter slope within that 1.0m strip is no steeper than 1V to 2H.

THE NEW FIGURE BELOW IS PROPOSED AS PART OF THIS AMENDMENT

Figure - Filling or Excavation

PO

All earth retaining structures are to be certified as being designed and constructed in accordance with relevant Australian Standards and Building Code requirements.

E

Retaining walls are designed and certified by a RPEQ so that:

- a. the minimum design life (the period assumed in design for which a structure or structural element is required to perform its intended purpose without replacement or major structural repairs) for the earth retaining structure is that specified in Australian Standard AS 4678 Earth-retaining structures;
- b. earth retaining structures within the land and around areas of cut on or near the boundaries of the site must be designed to allow for live and dead loads associated with the land/premise's current occupancy and use;

	<p>c. where the adjoining land use rights or zoning allows for industrial uses a minimum live load of 25kPA must be allowed in the design of the retaining structure for these adjoining premises.</p> <p>Note - Retaining walls will only be approved following submission of a full detailed design certified by a RPEQ.</p>
--	--

Fire Services

Note - The provisions under this heading only apply if:

- a. the development is for, or incorporates:
- reconfiguring a lot for a community title scheme creating 1 or more vacant lots; or
 - material change of use for 2 or more sole occupancy units on the same lot, or within the same community titles scheme; or
 - material change of use for a Tourist park⁽⁸⁴⁾ with accommodation in the form of caravans or tents; or
 - material change of use for outdoor sales⁽⁵⁴⁾, outdoor processing or outdoor storage where involving combustible materials.

AND

- b. none of the following exceptions apply:
- the distributor-retailer for the area has indicated, in its netserv plan, that the premises will not be served by that entity's reticulated water supply; or
 - every part of the development site is within 60m walking distance of an existing fire hydrant on the distributor-retailer's reticulated water supply network, measured around all obstructions, either on or adjacent to the site.

Note - The provisions under this heading do not apply to buildings that are required by the Building Code of Australia to have a fire hydrant system complying with Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations or other fire fighting facilities which provide equivalent protection.

PO56

Development incorporates a fire fighting system that:

- satisfies the reasonable needs of the fire fighting entity for the area;
- is appropriate for the size, shape and topography of the development and its surrounds;
- is compatible with the operational equipment available to the fire fighting entity for the area;
- considers the fire hazard inherent in the materials comprising the development and their proximity to one another;
- considers the fire hazard inherent in the surrounds to the development site;
- is maintained in effective operating order.

Note - The Queensland Fire and Emergency Services is the entity currently providing the fire fighting function for the urban areas of the Moreton Bay Region.

E56.1

External fire hydrant facilities are provided on site to the standard prescribed under the relevant parts of *Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations*.

Note - For this requirement for accepted development, the following are the relevant parts of AS 2419.1 (2005) that may be applicable:

- in regard to the form of any fire hydrant - Part 8.5 and Part 3.2.2.1, with the exception that for Tourist parks⁽⁸⁴⁾ or development comprised solely of dwellings and their associated outbuildings, single outlet above-ground hydrants or suitably signposted in-ground hydrants would be an acceptable alternative;
- in regard to the general locational requirements for fire hydrants - Part 3.2.2.2 (a), (e), (f), (g) and (h) as well as Appendix B of AS 2419.1 (2005);
- in regard to the proximity of hydrants to buildings and other facilities - Part 3.2.2.2 (b), (c) and (d), with the exception that:
 - for dwellings and their associated outbuildings, hydrant coverage need only extend to the roof and external walls of those buildings;
 - for caravans and tents, hydrant coverage need only extend to the roof of those tents and caravans;
 - for outdoor sales⁽⁵⁴⁾, processing or storage facilities, hydrant coverage is required across the entire area of

6 Zones

	<p>the outdoor sales⁽⁵⁴⁾, outdoor processing and outdoor storage facilities;</p> <p>d. in regard to fire hydrant accessibility and clearance requirements - Part 3.5 and, where applicable, Part 3.6.</p> <hr/> <p>E56.2</p> <p>A continuous path of travel having the following characteristics is provided between the vehicle access point to the site and each external fire hydrant and hydrant booster point on the land:</p> <ol style="list-style-type: none"> a. an unobstructed width of no less than 3.5m; b. an unobstructed height of no less than 4.8m; c. constructed to be readily traversed by a 17 tonne HRV fire brigade pumping appliance; d. an area for a fire brigade pumping appliance to stand within 20m of each fire hydrant and 8m of each hydrant booster point. <hr/> <p>E56.3</p> <p>On-site fire hydrant facilities are maintained in effective operating order in a manner prescribed in <i>Australian Standard AS1851 (2012) – Routine service of fire protection systems and equipment</i>.</p>
<p>PO57</p> <p>On-site fire hydrants that are external to buildings, as well as the available fire fighting appliance access routes to those hydrants, can be readily identified at all times from, or at, the vehicular entry point to the development site.</p>	<p>E57</p> <p>For development that contains on-site fire hydrants external to buildings:</p> <ol style="list-style-type: none"> a. those external hydrants can be seen from the vehicular entry point to the site; or b. a sign identifying the following is provided at the vehicular entry point to the site: <ol style="list-style-type: none"> i. the overall layout of the development (to scale); ii. internal road names (where used); iii. all communal facilities (where provided); iv. the reception area and on-site manager's office (where provided); v. external hydrants and hydrant booster points; vi. physical constraints within the internal roadway system which would restrict access by fire fighting appliances to external hydrants and hydrant booster points. <p>Note - The sign prescribed above, and the graphics used are to be:</p>

	<p>a. in a form;</p> <p>b. of a size;</p> <p>c. illuminated to a level;</p> <p>which allows the information on the sign to be readily understood, at all times, by a person in a fire fighting appliance up to 4.5m from the sign.</p>
<p>PO58</p> <p>Each on-site fire hydrant that is external to a building is signposted in a way that enables it to be readily identified at all times by the occupants of any firefighting appliance traversing the development site.</p>	<p>E58</p> <p>For development that contains on-site fire hydrants external to buildings, those hydrants are identified by way of marker posts and raised reflective pavement markers in the manner prescribed in the technical note <i>Fire hydrant indication system</i> produced by the Queensland Department of Transport and Main Roads.</p> <p>Note - Technical note Fire hydrant indication system is available on the website of the Queensland Department of Transport and Main Roads.</p>
Use specific criteria	
Home based business⁽³⁵⁾	
<p>PO59</p> <p>The scale and intensity of the Home based business⁽³⁵⁾:</p> <p>a. is compatible with the physical characteristics of the site and the character of the local area;</p> <p>b. is able to accommodate anticipated car parking demand without negatively impacting the streetscape and road safety;</p> <p>c. does not adversely impact on the amenity of the adjoining and nearby premises;</p> <p>d. remains ancillary to the residential use of the dwelling house⁽²²⁾;</p> <p>e. does not create conditions which cause hazards or nuisances to neighbours or other persons not associated with the activity;</p> <p>f. ensures employees and visitors to the site do not negatively impact the expected amenity of adjoining properties.</p>	<p>E59.1</p> <p>A maximum of 1 employee (not a resident) OR 2 customers OR customers from within 1 Small rigid vehicle (SRV) or smaller are permitted on the site at any one time.</p> <p>E59.2</p> <p>The home based business⁽³⁵⁾ occupies an area of the existing dwelling or on-site structure not greater than 40m² gross floor area.</p>

<ul style="list-style-type: none"> a. establish on heavily trafficked roads where the amenity of surrounding residential uses is already subject to impacts by road vehicle noise; b. not negatively impact active streets, public spaces or hubs of activity where the pedestrian safety and comfort is of high importance; c. not result in the fragmentation of active streets (e.g. site where active uses are located on adjoining lots); d. ensure the amenity of adjoining properties is protected; e. reduce the visual impact of the Service station from the streetscape while maintaining surveillance from the site to the street; f. minimise impacts on adjoining residential uses, to a level suitable relative to expected residential amenity of the area; g. provide ancillary uses that meet the convenience needs of users. 	<p>E</p> <p>Service stations are designed and orientated on site to:</p> <ul style="list-style-type: none"> a. include a landscaping strip having a minimum depth of 1m adjoining all road frontages; b. buildings and structures (including fuel pump canopies) are setback a minimum of 3m from the primary and secondary frontage and a minimum of 5m from side and rear boundaries; c. include a screen fence, of a height and standard in accordance with a noise impact assessment (Note - Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise), on side and rear boundaries where adjoining land is able to contain a residential use; d. not include more than 2 driveway crossovers.
<p>Telecommunications facility⁽⁸¹⁾</p> <p>Editor's note - In accordance with the Federal legislation Telecommunications facilities⁽⁸¹⁾ must be constructed and operated in a manner that will not cause human exposure to electromagnetic radiation beyond the limits outlined in the Radiocommunications (Electromagnetic Radiation - Human Exposure) Standard 2003 and Radio Protection Standard for Maximum Exposure Levels to Radiofrequency Fields - 3Khz to 300Ghz.</p>	
<p>PO65</p> <p>Telecommunications facilities⁽⁸¹⁾ are co-located with existing telecommunications facilities⁽⁸¹⁾, Utility installation⁽⁸⁶⁾, Major electricity infrastructure⁽⁴³⁾ or Substation⁽⁸⁰⁾ if there is already a facility in the same coverage area.</p>	<p>E65.1</p> <p>New telecommunication facilities⁽⁸¹⁾ are co-located on existing towers with new equipment shelter and associated structures positioned adjacent to the existing shelters and structures.</p> <p>E65.2</p> <p>If not co-located with an existing facility, all co-location opportunities have been investigated and fully exhausted within a 2km radius of the site.</p>
<p>PO66</p> <p>A new Telecommunications facility⁽⁸¹⁾ is designed and constructed to ensure co-masting or co-siting with other carriers both on the tower or pole and at ground level is possible in the future.</p>	<p>E66</p> <p>A minimum area of 45m² is available at ground level to allow for additional equipment shelters and associated structures for the purpose of co-locating on the proposed facility.</p>
<p>PO67</p> <p>Telecommunications facilities⁽⁸¹⁾ do not conflict with lawful existing land uses both on and adjoining the site.</p>	<p>E67</p> <p>The development results in no net reduction in the minimum quantity and standard of landscaping, private or communal open space or car parking spaces required under the planning scheme or under an existing development approval.</p>

<p>PO68</p> <p>The Telecommunications facility⁽⁸¹⁾ does not have an adverse impact on the visual amenity of a locality and is:</p> <ul style="list-style-type: none"> a. high quality design and construction; b. visually integrated with the surrounding area; c. not visually dominant or intrusive; d. located behind the main building line; e. below the level of the predominant tree canopy or the level of the surrounding buildings and structures; f. camouflaged through the use of colours and materials which blend into the landscape; g. treated to eliminate glare and reflectivity; h. landscaped; i. otherwise consistent with the amenity and character of the zone and surrounding area. 	<p>E68.1</p> <p>Where in an urban area, the development does not protrude more than 5m above the level of the existing treeline, prominent ridgeline or building rooftops in the surrounding townscape.</p> <p>E68.2</p> <p>In all other areas towers do not exceed 35m in height.</p> <p>E68.3</p> <p>Towers, equipment shelters and associated structures are of a design, colour and material to:</p> <ul style="list-style-type: none"> a. reduce recognition in the landscape; b. reduce glare and reflectivity. <p>E68.4</p> <p>All structures and buildings are setback behind the main building line and a minimum of 10m from side and rear boundaries, except where in the Industry and Extractive industry zones, the minimum side and rear setback is 3m.</p> <p>Where there is no established building line the facility is located at the rear of the site.</p> <p>E68.5</p> <p>The facility is enclosed by security fencing or by other means to ensure public access is prohibited.</p> <p>E68.6</p> <p>A minimum 3m wide strip of dense planting is provided around the perimeter of the fenced area, between the facility and street frontage and adjoining uses.</p> <p>Note - Landscaping is provided in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person, to ensure compliance with Planning scheme policy - Integrated design.</p>
<p>PO69</p> <p>Lawful access is maintained to the site at all times that does not alter the amenity of the landscape or surrounding uses.</p>	<p>E69</p> <p>An Access and Landscape Plan demonstrates how 24 hour vehicular access will be obtained and maintained to the facility in a manner that is appropriate to the site's context.</p>
<p>PO70</p>	<p>E70</p>

6 Zones

<p>All activities associated with the development occur within an environment incorporating sufficient controls to ensure the facility generates no audible sound at the site boundaries where in a residential setting.</p>	<p>All equipment comprising the Telecommunications facility⁽⁸¹⁾ which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure no noise from this equipment can be heard, or felt at the site boundary.</p>
<p style="text-align: center;">Values and constraints criteria</p> <p>Note - The relevant values and constraints criteria do not apply where the development is consistent with a current Development permit for Reconfiguring a lot or Material change of use or Operational work, where that approval has considered and addressed (e.g. through a development footprint plan (or similar in the case of Landslide hazard) or conditions of approval) the identified value or constraint under this planning scheme.</p>	
<p>Acid sulfate soils - (refer Overlay map - Acid sulfate soils to determine if the following assessment criteria apply)</p> <p>Note - To demonstrate achievement of the performance outcome, an Acid sulfate soils (ASS) investigation report and soil management plan is prepared by a qualified engineer. Guidance for the preparation an ASS investigation report and soil management plan is provided in Planning scheme policy - Acid sulfate soils.</p>	
<p>PO71</p> <p>Development avoids disturbing acid sulfate soils. Where development disturbs acid sulfate soils, development:</p> <ol style="list-style-type: none"> a. is managed to avoid or minimise the release of surface or groundwater flows containing acid and metal contaminants into the environment; b. protects the environmental and ecological values and health of receiving waters; c. protects buildings and infrastructure from the effects of acid sulfate soils. 	<p>E71</p> <p>Development does not involve:</p> <ol style="list-style-type: none"> a. excavation or otherwise removing of more than 100m³ of soil or sediment where below than 5m Australian Height datum AHD; or b. filling of land of more than 500m³ of material with an average depth of 0.5m or greater where below the 5m Australian Height datum AHD.
<p>Environmental areas (refer Overlay map - Environmental areas to determine if the following assessment criteria apply)</p> <p>Note – The following are excluded from the native vegetation clearing provisions of this planning scheme:</p> <ol style="list-style-type: none"> a. Clearing of native vegetation located within an approved development footprint; b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental Management and Conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence; e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes; f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council; g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens; 	

- h. Grazing of native pasture by stock;
- i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development.

Note - Definition for native vegetation is located in Schedule 1 Definitions.

Note - Native vegetation subject to this criteria primarily comprises of matters of national environmental significance (MNES), matters of state environmental significance (MSES). They also comprise some matters of local environmental significance (MLES). A MLES is defined in Schedule 1.2, Administrative definitions. A list of the elements that apply to the mapped MSES and MLES is provided in Appendix 1 of the Planning scheme policy - Environmental areas.

Editors' Note - The accuracy of overlay mapping can be challenged through the development application process (code assessable development) or by way of a planning scheme amendment. See Council's website for details.

Note - To demonstrate achievement of the performance outcome, an ecological assessment, vegetation management plan and fauna management plan, as required, are prepared by a suitably qualified person. Guidance for the preparation of above mentioned reports is provided in Planning scheme policy - Environmental areas.

Vegetation clearing, ecological value and connectivity

PO72

Development avoids locating in a High Value Area or a Value Offset Area. Where it is not practicable or reasonable for development to avoid establishing in these areas, development must ensure that:

- a. the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area is maintained and not lost or degraded;
- b. on-site mitigation measures, mechanisms or processes are in place demonstrating the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area are maintained. For example, this can be achieved through replacement, restoration or rehabilitation planting as part of any proposed covenant, the development of a Vegetation Management Plan, a Fauna Management Plan, and any other on-site mitigation options identified in the Planning scheme policy - Environmental areas*.

* Editor's note - This is not a requirement for an environmental offset under the Environmental Offsets Act 2014.

No example provided.

PO73

Development provides for safe, unimpeded, convenient and ongoing wildlife movement and establishes and maintains habitat connectivity by:

- a. retaining habitat trees;
- b. providing contiguous patches of habitat;
- c. provide replacement and rehabilitation planting to improve connectivity;

No example provided.

<p>d. avoiding the creation of fragmented and isolated patches of habitat;</p> <p>e. providing wildlife movement infrastructure.</p> <p>Editor's note - Wildlife movement infrastructure may include refuge poles, tree boulevarding, 'stepping stone' vegetation plantings, tunnels, appropriate wildlife fencing; culverts with ledges, underpasses, overpasses, land bridges and rope bridges. Further information is provided in Planning scheme policy – Environmental areas.</p>	
<p>Vegetation clearing and habitat protection</p>	
<p>PO74</p> <p>Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected.</p>	<p>No example provided.</p>
<p>PO75</p> <p>Development does not result in the net loss or degradation of habitat value in a High Value Area or a Value Offset Area. Where development does result in the loss or degradation of habitat value, development will:</p> <p>a. rehabilitate, revegetate, restore and enhance an area to ensure it continues to function as a viable and healthy habitat area;</p> <p>b. provide replacement fauna nesting boxes in the event of habitat tree loss in accordance with Planning scheme policy - Environmental areas;</p> <p>c. undertake rehabilitation, revegetation and restoration in accordance with the South East Queensland Ecological Restoration Framework.</p>	<p>No example provided.</p>
<p>PO76</p> <p>Development ensures safe, unimpeded, convenient and ongoing wildlife movement and habitat connectivity by:</p> <p>a. providing contiguous patches of habitat;</p> <p>b. avoiding the creation of fragmented and isolated patches of habitat;</p> <p>c. providing wildlife movement infrastructure;</p> <p>d. providing replacement and rehabilitation planting to improve connectivity.</p>	<p>No example provided.</p>
<p>Vegetation clearing and soil resource stability</p>	
<p>PO77</p> <p>Development does not:</p> <p>a. result in soil erosion or land degradation;</p> <p>b. leave cleared land exposed for an unreasonable period of time but is rehabilitated in a timely manner.</p>	<p>No example provided.</p>

Vegetation clearing and water quality	
<p>PO78</p> <p>Development maintains or improves the quality of groundwater and surface water within, and downstream, of a site by:</p> <ol style="list-style-type: none"> ensuring an effective vegetated buffers and setbacks from waterbodies is retained to achieve natural filtration and reduce sediment loads; avoiding or minimising changes to landforms to maintain hydrological water flows; adopting suitable measures to exclude livestock from entering a waterbody where a site is being used for animal husbandry⁽⁴⁾ and animal keeping⁽⁵⁾ activities. 	No example provided.
<p>PO79</p> <p>Development minimises adverse impacts of stormwater run-off on water quality by:</p> <ol style="list-style-type: none"> minimising flow velocity to reduce erosion; minimising hard surface areas; maximising the use of permeable surfaces; incorporating sediment retention devices; minimising channelled flow. 	No example provided.
Vegetation clearing and access, edge effects and urban heat island effects	
<p>PO80</p> <p>Development retains safe and convenient public access in a manner that does not result in the adverse edge effects or the loss or degradation of biodiversity values within the environment.</p>	No example provided.
<p>PO81</p> <p>Development minimises potential adverse 'edge effects' on ecological values by:</p> <ol style="list-style-type: none"> providing dense planting buffers of native vegetation between a development and environmental areas; retaining patches of native vegetation of greatest possible size where located between a development and environmental areas ; restoring, rehabilitating and increasing the size of existing patches of native vegetation; ensuring that buildings and access (public and vehicle) are setback as far as possible from environmental areas and corridors; landscaping with native plants of local origin. <p>Editor's note - Edge effects are factors of development that go to detrimentally affecting the composition and density of natural populations at the fringe of natural areas. Factors include weed invasion, pets, public and vehicle access, nutrient loads, noise and</p>	No example provided.

6 Zones

<p>light pollution, increased fire frequency and changes in the groundwater and surface water flow.</p>	
<p>PO82</p> <p>Development avoids adverse microclimate change and does not result in increased urban heat island effects. Adverse urban heat island effects are minimised by:</p> <ol style="list-style-type: none"> pervious surfaces; providing deeply planted vegetation buffers and green linkage opportunities; landscaping with local native plant species to achieve well-shaded urban places; increasing the service extent of the urban forest canopy. 	<p>No example provided.</p>
<p>Vegetation clearing and Matters of Local Environmental Significance (MLES) environmental offsets</p>	
<p>PO83</p> <p>Where development results in the unavoidable loss of native vegetation within a Value Offset Area MLES waterway buffer or a Value Offset Area MLES wetland buffer, an environmental offset is required in accordance with the environmental offset requirements identified in Planning scheme policy - Environmental areas.</p> <p>Editor's note - For MSES Koala Offsets, the environmental offset provisions in Schedule 11 of the Regulation, in combination with the requirements of the Environmental Offsets Act 2014, apply.</p>	<p>No example provided.</p>
<p>Extractive resources transport route (refer Overlay map - Extractive resources (transport route and buffer) to determine if the following assessment criteria apply)</p>	
<p>PO84</p> <p>Development:</p> <ol style="list-style-type: none"> does not increase in the number of people living in close proximity to a transport route and being subject to the adverse effects from the transportation route; does not result in the establishment of uses that are incompatible with the operation of Extractive resources transport routes; adopts design and location measures to satisfactorily mitigate the potential adverse impacts associated with transportation routes on sensitive land uses. Such measures include, but are not limited to: <ol style="list-style-type: none"> locating the furthest distance possible from the transportation route; 	<p>E84</p> <p>The following uses are not located within the 100m wide transport route buffer:</p> <ol style="list-style-type: none"> Caretaker's accommodation⁽¹⁰⁾, except where located in the Extractive industry zone; Community residence⁽¹⁶⁾; Dual occupancy⁽²¹⁾; Dwelling house⁽²²⁾; Dwelling unit⁽²³⁾; Hospital⁽³⁶⁾; Rooming accommodation⁽⁶⁹⁾; Multiple dwelling⁽⁴⁹⁾; Non-resident workforce accommodation⁽⁵²⁾; Relocatable home park⁽⁶²⁾; Residential care facility⁽⁶⁵⁾; Resort complex⁽⁶⁶⁾;

<ul style="list-style-type: none"> ii. habitable rooms being located the furthest from the transportation route; iii. shielding and screening private outdoor recreation space from the transportation routes. 	<ul style="list-style-type: none"> m. Retirement facility⁽⁶⁷⁾; n. Rural workers' accommodation⁽⁷¹⁾; o. Short-term accommodation⁽⁷⁷⁾; p. Tourist park⁽⁸⁴⁾.
<p>PO85</p> <p>Development:</p> <ul style="list-style-type: none"> a. does not adversely impact upon the efficient and effective transportation of extractive material along a transportation route; b. ensures vehicle access and egress along transportation routes are designed and located to achieve a high degree of safety, having good visibility; c. utilises existing vehicle access points and where existing vehicle access points are sub-standard or poorly formed, they are upgraded to an appropriate standard. 	<p>E85.1</p> <p>Development does not create a new vehicle access point onto an Extractive resources transport route.</p> <hr/> <p>E85.2</p> <p>A vehicle access point is located, designed and constructed in accordance with Planning scheme policy - Integrated design.</p>
<p>Heritage and landscape character (refer Overlay map - Heritage and landscape character to determine if the following assessment criteria apply)</p> <p>Note - To assist in demonstrating achievement of heritage performance outcomes, a Cultural heritage impact assessment report is prepared by a suitably qualified person verifying the proposed development is in accordance with The Australia ICOMOS Burra Charter.</p> <p>Note - To assist in demonstrating achievement of this performance outcome, a Tree assessment report is prepared by a qualified arborist in accordance with Planning scheme policy – Heritage and landscape character. The Tree assessment report will also detail the measures adopted in accordance with AS 4970-2009 Protection of trees on development sites.</p> <p>Note - Places, including sites, objects and buildings having local cultural heritage significance, are identified on Overlay map - Heritage and landscape character and listed in Schedule 1 of Planning scheme policy - Heritage and landscape character. Places also having cultural heritage significance at a State level and being entered in the Queensland Heritage Register, are also identified in Schedule 1 of Planning scheme policy - Heritage and landscape character.</p>	
<p>PO86</p> <p>Development will:</p> <ul style="list-style-type: none"> a. not diminish or cause irreversible damage to the cultural heritage values present on the site, and associated with a heritage site, object or building; b. protect the fabric and setting of the heritage site, object or building; c. be consistent with the form, scale and style of the heritage site, object or building; d. utilise similar materials to those existing, or where this is not reasonable or practicable, neutral materials and finishes; e. incorporate complementary elements, detailing and ornamentation to those present on the heritage site, object or building; f. retain public access where this is currently provided. 	<p>E86</p> <p>Development is for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value.</p> <p>Note - A cultural heritage conservation management plan for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value is prepared in accordance with Planning scheme policy - Heritage and landscape character. The plan is sent to, and approved by Council prior to the commencement of any preservation, maintenance, repair and restoration works.</p>
<p>PO87</p> <p>Demolition and removal is only considered where:</p>	<p>No example provided.</p>

6 Zones

<ul style="list-style-type: none"> a. a report prepared by a suitably qualified conservation architect or conservation engineer demonstrates that the building is structurally unsound and is not reasonably capable of economic repair; or b. demolition is confined to the removal of outbuildings, extensions and alterations that are not part of the original structure; or c. limited demolition is performed in the course of repairs, maintenance or restoration; or d. demolition is performed following a catastrophic event which substantially destroys the building or object. 	
<p>PO88</p> <p>Where development is occurring on land adjoining a site of cultural heritage value, the development is to be sympathetic to and consistent with the cultural heritage values present on the site and not result in their values being eroded, degraded or unreasonably obscured from public view.</p>	<p>No example provided.</p>
<p>PO89</p> <p>Development does not adversely impact upon the health and vitality of significant trees. Where development occurs in proximity to a significant tree, construction measures and techniques as detailed in AS 4970-2009 Protection of trees on development sites are adopted to ensure a significant tree's health, wellbeing and vitality.</p> <p>Significant trees are only removed where they are in a poor state of health or where they pose a health and safety risk to persons or property. A Tree Assessment report prepared by a suitably qualified arborist confirming a tree's state of health is required to demonstrate achievement of this performance outcome.</p>	<p>E89</p> <p>Development does:</p> <ul style="list-style-type: none"> a. not result in the removal of a significant tree; b. not occur within 20m of a protected tree; c. involve pruning of a tree in accordance with Australian Standard AS 4373-2007 – Pruning of Amenity Trees.
<p>Overland flow path (refer Overlay map - Overland flow path to determine if the following assessment criteria apply)</p> <p>Note - The applicable river and creek flood planning levels associated with defined flood event (DFE) within the inundation area can be obtained by requesting a flood check property report from Council.</p>	
<p>PO90</p> <p>Development:</p> <ul style="list-style-type: none"> a. minimises the risk to persons from overland flow; b. does not increase the potential for damage from overland flow either on the premises or other premises, public land, watercourses, roads or infrastructure. 	<p>No example provided.</p>
<p>PO91</p> <p>Development:</p>	<p>No example provided.</p>

<p>a. maintains the conveyance of overland flow predominantly unimpeded through the premises for any event up to and including the 1% AEP for the fully developed upstream catchment;</p> <p>b. does not concentrate, intensify or divert overland flow onto an upstream, downstream or surrounding property.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow.</p>	
<p>PO92</p> <p>Development does not:</p> <p>a. directly, indirectly or cumulatively cause any increase in overland flow velocity or level;</p> <p>b. increase the potential for flood damage from overland flow either on the premises or other premises, public lands, watercourses, roads or infrastructure.</p> <p>Note - Open concrete drains greater than 1m in width are not an acceptable outcome, nor are any other design options that may increase scouring.</p>	<p>No example provided.</p>
<p>PO93</p> <p>Development ensures that public safety and the risk to the environment are not adversely affected by a detrimental impact of overland flow on a hazardous chemical located or stored on the premises.</p>	<p>E93</p> <p>Development ensures that a hazardous chemical is not located or stored in an Overland flow path area.</p> <p>Note - Refer to the Work Health and Safety Act 2011 and associated Regulation and Guidelines, the Environmental Protection Act 1994 and the relevant building assessment provisions under the Building Act 1975 for requirements related to the manufacture and storage of hazardous substances.</p>
<p>PO94</p> <p>Development which is not in a Rural zone ensures that overland flow is not conveyed from a road or public open space onto a private lot.</p>	<p>E94</p> <p>Development which is not in a Rural zone that an overland flow paths and drainage infrastructure is provided to convey overland flow from a road or public open space area away from a private lot.</p>
<p>PO95</p> <p>Development ensures that inter-allotment drainage infrastructure, overland flow paths and open drains through private property cater for overland flows for a fully developed upstream catchment and are able to be easily maintained.</p>	<p>E95.1</p> <p>Development ensures that roof and allotment drainage infrastructure is provided in accordance with the following relevant level as identified in QUDM:</p> <p>a. Urban area – Level III;</p> <p>b. Rural area – N/A;</p>

6 Zones

<p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow</p>	<p>c. Industrial area – Level V; d. Commercial area – Level V.</p>
<p>PO96</p> <p>Development protects the conveyance of overland flow such that an easement for drainage purposes is provided over:</p> <ol style="list-style-type: none"> a stormwater pipe if the nominal pipe diameter exceeds 300mm; an overland flow path where it crosses more than one premises; inter-allotment drainage infrastructure. <p>Note - Refer to Planning scheme policy - Integrated design for details and examples.</p> <p>Note - Stormwater Drainage easement dimensions are provided in accordance with Section 3.8.5 of QUDM.</p>	<p>E95.2</p> <p>Development ensures that inter-allotment drainage infrastructure is designed to accommodate any event up to and including the 1% AEP for the fully developed upstream catchment.</p> <p>No example provided.</p>
<p>Additional criteria for development for a Park⁽⁵⁷⁾</p>	
<p>PO97</p> <p>Development for a Park⁽⁵⁷⁾ ensures that the design and layout responds to the nature of the overland flow affecting the premises such that:</p> <ol style="list-style-type: none"> public benefit and enjoyment is maximised; impacts on the asset life and integrity of park structures is minimised; maintenance and replacement costs are minimised. 	<p>E97</p> <p>Development for a Park⁽⁵⁷⁾ ensures works are provided in accordance with the requirements set out in Appendix B of the Planning scheme policy - Integrated design.</p>
<p>Riparian and wetland setbacks</p>	
<p>PO98</p> <p>Development provides and maintains a suitable setback from waterways and wetlands that protects natural and environmental values. This is achieved by recognising and responding to the following matters:</p> <ol style="list-style-type: none"> impact on fauna habitats; impact on wildlife corridors and connectivity; 	<p>E98</p> <p>Development does not occur within:</p> <ol style="list-style-type: none"> 50m from top of bank for W1 waterway and drainage line 30m from top of bank for W2 waterway and drainage line

<ul style="list-style-type: none"> c. impact on stream integrity; d. impact of opportunities for revegetation and rehabilitation planting; e. edge effects. 	<ul style="list-style-type: none"> c. 20m from top of bank for W3 waterway and drainage line d. 100m from the edge of a Ramsar wetland, 50m from all other wetlands. <p>Note - W1, W2 and W3 waterway and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.</p>

6 Zones

6.2.2 Community facilities zone code

6.2.2.1 Application- Community facilities zone

This code applies to undertaking development in the Community facilities zone, if:

1. the development has been categorised as either accepted development subject to requirements or assessable development - code assessment, and this code is identified as applicable to that development in the assessment benchmarks for assessable development and requirements for accepted development column of a table of assessment (Part 5);
2. the development has been categorised as assessable development - impact assessment (Part 5).

When using this code, reference should be made to section 5.3.2 Determining the category of development and category of assessment and, where applicable, section 5.3.3 Determining and applying the requirements for accepted development and the assessment benchmarks for assessable development located in Part 5.

For accepted development subject to requirements or assessable development for this Code Part 6.2.2:

1. Part A of the code applies only to accepted development subject to requirements in the 6.2.2.1 'Abbey precinct';
2. Part B of the code applies only to assessable development in all 6.2.2.1 'Abbey precinct';
3. Part C of the code applies only to accepted development subject to requirements in the 6.2.2.2 'Airfield precinct';
4. Part D of the code applies only to assessable development in all 6.2.2.2 'Airfield precinct';
5. Part E of the code applies only to accepted development subject to requirements in the 6.2.2.3 'Utilities precinct';
6. Part F of the code applies only to assessable development in all 6.2.2.3 'Utilities precinct';
7. Part G of the code applies only to accepted development subject to requirements in the 6.2.2.4 'Lakeside precinct';
8. Part H of the code applies only to assessable development in all 6.2.2.4 'Lakeside precinct';
9. Part I of the code applies only to accepted development subject to requirements in the 6.2.2.5 'Special use precinct';
10. Part J of the code applies only to assessable development in all 6.2.2.5 'Special use precinct'.

6.2.2.2 Purpose - Community facilities zone

1. The purpose of the Community facilities zone code is to provide for community related activities and facilities whether under public or private ownership. These may include municipal services, public utilities, government installations, transport and telecommunication networks and community infrastructure of an artistic, social or cultural nature.
2. The Community facilities zone includes 5 precincts; Abbey, Airfield, Utilities, Lakeside and Special use.
3. The purpose of the Community facilities zone code is to implement the policy direction as set out in Part 3, Strategic Framework.

6.2.2.1 Abbey precinct

6.2.2.1.1 Purpose - Abbey precinct

1. The purpose of the code will be achieved through the following overall outcomes for the Abbey precinct:
 - a. Development supports, and does not diminish or detract from, the unique character created by established non-rural uses and activities namely Place of worship⁽⁶⁰⁾, Educational establishment⁽²⁴⁾, tourism and agriculture.
 - b. Areas within the precinct not associated with established non-rural uses maintain their primary role for rural and agricultural purposes, with tourism activities occurring on an occasional and temporary basis.
 - c. Development continues to play a significant role providing local employment, educational and cultural functions and attracting visitors to the Region.
 - d. Development provides appropriate on-site buffers and setbacks from established on-site uses occurring within the precinct and on adjoining land to internalise any potential nuisance impact.
 - e. Development for retail and commercial activities on-site are limited to those uses having a nexus with, and are ancillary to, the tourism use occurring and be of a scale that remains subordinate to the network of centres within the Region.
 - f. Residential uses are limited in number and location to achieve a low density, scale and intensity of use to retain the existing rural character and amenity. Residential uses are occupied by people associated with the Place of worship⁽⁶⁰⁾ on the site.
 - g. Development is properly separated and buffered from surrounding sensitive land uses and rural activities, and operates in a manner that does not adversely impact on the low density, low intensity rural character or amenity of the surrounds.
 - h. Development is designed and operated to achieve a high level of amenity and maintains the safety of people and property through crime prevention through environmental design principles (CPTED).
 - i. Development is of a scale, height and bulk that provides a high level of amenity and is consistent with the character of the surrounding area.
 - j. General works associated with the development achieves the following:
 - i. new development is provided with a high standard of services to meet and support the current and future needs of users of the site, including roads, street lighting services, telecommunications and reticulated electricity (underground wherever possible), water and sewerage (where available);
 - ii. the development manages stormwater to:
 - A. ensure the discharge of stormwater does not adversely affect the quality, environmental values or ecosystem functions of downstream receiving waters;
 - B. prevent stormwater contamination and the release of pollutants;
 - C. maintain or improve the structure and condition of drainage lines and riparian areas;
 - D. avoid off-site adverse impacts from stormwater.
 - iii. the development does not result in unacceptable impacts on the capacity and safety of the external road network;
 - iv. the development ensures the safety, efficiency and useability of access ways and parking areas;
 - v. site works including earthworks are managed to be safe and have minimal impacts on adjoining or adjacent premises, the streetscape or the environment.
 - k. Activities associated with the use do not cause a nuisance by way of aerosols, fumes, light, noise, odour, particles or smoke.
 - l. Noise generating uses are designed, sited and constructed to minimise the transmission of noise to appropriate levels and do not cause environmental harm or nuisance.

6 Zones

- m. Noise sensitive uses are designed, sited and constructed so as not to be subject to unacceptable levels of noise.
- n. Development avoids areas subject to constraint, limitation, or environmental value. Where development cannot avoid these identified areas, it responds by:
- i. adopting a 'least risk, least impact' approach when designing, siting and locating development in any area subject to a constraint, limitation or environmental value to minimise the potential risk to people, property and the environment;
 - ii. ensuring no further instability, erosion or degradation of the land, water or soil resource;
 - iii. when located within a Water buffer area, complying with the Water Quality Vision and Objectives contained in the Seqwater Development Guidelines: Development Guidelines for Water Quality Management in Drinking Water Catchments 2012.
 - iv. maintaining, restoring and rehabilitating environmental values, including natural, ecological, biological, aquatic, hydrological and amenity values, and enhancing these values through the provision of planting and landscaping, and facilitating safe wildlife movement and connectivity through:
 - A. the provision of replacement, restoration, rehabilitation planting and landscaping;
 - B. the location, design and management of development to avoid or minimise adverse impacts on ecological systems and processes;
 - C. the requiring of environmental offsets in accordance with the Environmental Offsets Act 2014.
 - v. protecting native species and protecting and enhancing species habitat;
 - vi. protecting and preserving the natural, aesthetic, architectural historic and cultural values of significant trees, places, objects and buildings of heritage and cultural significance;
 - vii. establishing effective separation distances, buffers and mitigation measures associated with identified infrastructure to minimise adverse effects on sensitive land uses from odour, noise, dust and other nuisance generating activities;
 - viii. establishing, maintaining and protecting appropriate buffers to waterways, wetlands, native vegetation and significant fauna habitat;
 - ix. ensuring it promotes and does not undermine the ongoing viability, integrity, operation, maintenance and safety of identified infrastructure;
 - x. ensuring effective and efficient disaster management response and recovery capabilities;
 - xi. where located in an overland flow path:
 - A. development siting, built form, layout and access responds to the risk presented by the overland flow and minimises risk to personal safety;
 - B. development is resilient to the impacts of overland flow by ensuring the siting and design accounts for the potential risks to property associated with the overland flow;
 - C. development does not impact on the conveyance of the overland flow for any event up to and including the 1% AEP for the fully developed upstream catchment;
 - D. development directly, indirectly and cumulatively avoid an increase in the severity of overland flow and potential for damage on the premises or other premises, public lands, watercourses, roads or infrastructure.
- o. Development in the Abbey precinct includes one or more of the following:

<ul style="list-style-type: none"> • Animal husbandry⁽⁴⁾ • Cemetery⁽¹²⁾ - if a maximum of 100 spaces • Child care centre⁽¹³⁾ • Cropping⁽¹⁹⁾ 	<ul style="list-style-type: none"> • Function facility⁽²⁹⁾ • Home based business⁽³⁵⁾ • Intensive horticulture⁽⁴⁰⁾ • Market⁽⁴⁶⁾ • Multiple dwelling⁽⁴⁹⁾ - if dwellings are detached and the number of dwellings does not exceed 20 	<ul style="list-style-type: none"> • Place of worship⁽⁶⁰⁾ • Rural workers' accommodation⁽⁷¹⁾ • Tourist attraction⁽⁸³⁾ • Tourist park⁽⁸⁴⁾
---	---	--

<ul style="list-style-type: none"> • Dwelling house⁽²²⁾ • Educational establishment⁽²⁴⁾ 		
---	--	--

p. Development in the Abbey precinct does not include any of the following:

<ul style="list-style-type: none"> • Adult store⁽¹⁾ • Agricultural supplies store⁽²⁾ • Air services⁽³⁾ • Animal keeping⁽⁵⁾ • Aquaculture⁽⁶⁾ • Bar⁽⁷⁾ • Brothel⁽⁸⁾ • Bulk landscape supplies⁽⁹⁾ • Car wash⁽¹¹⁾ • Club⁽¹⁴⁾ • Community care centre⁽¹⁵⁾ • Community residence⁽¹⁶⁾ • Crematorium⁽¹⁸⁾ • Detention facility⁽²⁰⁾ • Dual occupancy⁽²¹⁾ • Dwelling unit⁽²³⁾ • Emergency services⁽²⁵⁾ • Environmental facility⁽²⁶⁾ • Food and drink outlet⁽²⁸⁾ • Funeral parlour⁽³⁰⁾ • Garden centre⁽³¹⁾ • Hardware and trade supplies⁽³²⁾ 	<ul style="list-style-type: none"> • Health care services⁽³³⁾ • High Impact industry⁽³⁴⁾ • Hospital⁽³⁶⁾ • Hotel⁽³⁷⁾ • Indoor sport and recreation⁽³⁸⁾ • Intensive animal industry⁽³⁹⁾ • Landing⁽⁴¹⁾ • Low impact industry⁽⁴²⁾ • Major sport, recreation and entertainment facility⁽⁴⁴⁾ • Marine industry⁽⁴⁵⁾ • Medium impact industry⁽⁴⁷⁾ • Motor sport facility⁽⁴⁸⁾ • Multiple dwelling⁽⁴⁹⁾ - if dwellings are attached or the number of dwellings exceeds 20 • Nature-based tourism⁽⁵⁰⁾ • Nightclub entertainment facility⁽⁵¹⁾ • Non-resident workforce accommodation⁽⁵²⁾ • Office⁽⁵³⁾ • Outdoor sales⁽⁵⁴⁾ • Outdoor sport and recreation⁽⁵⁵⁾ • Parking station⁽⁵⁸⁾ • Port services⁽⁶¹⁾ 	<ul style="list-style-type: none"> • Relocatable home park⁽⁶²⁾ • Renewable energy facility⁽⁶³⁾ • Research and technology industry⁽⁶⁴⁾ • Residential care facility⁽⁶⁵⁾ • Resort complex⁽⁶⁶⁾ • Retirement facility⁽⁶⁷⁾ • Rooming accommodation⁽⁶⁹⁾ • Rural industry⁽⁷⁰⁾ • Sales office⁽⁷²⁾ • Service industry⁽⁷³⁾ • Service station⁽⁷⁴⁾ • Shop⁽⁷⁵⁾ • Shopping centre⁽⁷⁶⁾ • Short-term accommodation⁽⁷⁷⁾ • Showroom⁽⁷⁸⁾ • Special industry⁽⁷⁹⁾ • Theatre⁽⁸²⁾ • Transport depot⁽⁸⁵⁾ • Veterinary services⁽⁸⁷⁾ • Warehouse⁽⁸⁸⁾ • Wholesale nursery⁽⁸⁸⁾ • Winery⁽⁹⁰⁾
--	---	--

6 Zones

Note - A dwelling provided for a caretaker of a non-residential use in the Community facilities zone is defined as Rural workers' accommodation⁽⁷¹⁾

- q. Development not listed in the tables above may be considered on its merits and where it reflects and supports the outcomes of the zone.

6.2.2.1.2 Accepted development subject to requirements

If development is to be categorised as accepted development subject to requirements it must comply with the requirements for accepted development set out in Part A, Table 6.2.2.1.1. Where the development does not meet a requirement for accepted development (RAD) within Part A, Table 6.2.2.1.1, the category of development changes to assessable development under the rules outlined in section 5.3.3.(1), and assessment is against the corresponding performance outcome (PO) identified in the table below. This only occurs whenever a RAD is not met, and is therefore limited to the subject matter of the RADs that are not complied with. To remove any doubt, for those RADs that are complied with, there is no need for assessment against the corresponding.

RAD85	PO106
RAD86	PO107

Part A —Requirements for accepted development - Abbey precinct

Requirements for accepted development - Abbey precinct

Requirements for accepted development	
General requirements	
Building height	
RAD1	Building height does not exceed the maximum height identified on Overlay map - Building heights, except for architectural features associated with religious expression on Place of worship ⁽⁶⁰⁾ and Educational establishment ⁽²⁴⁾ buildings.
Setbacks	

RAD2	Buildings and structures, excluding Multiple dwelling ⁽⁴⁹⁾ , are setback as follows: <ul style="list-style-type: none"> a. road frontage - 10m b. side boundary - 10m c. rear boundary - 10m
Specific rural uses setbacks	
RAD3	The following uses, associated buildings and structures are setback from all lot boundaries as follows: <ul style="list-style-type: none"> a. Animal husbandry⁽⁴⁾ (buildings only) - 10m b. Cropping⁽¹⁹⁾ (buildings only) - 10m c. Intensive horticulture⁽⁴⁰⁾ - 20m
Site cover	
RAD4	Site cover of all buildings and structures does not exceed 20%.
Residential density	
RAD5	Residential density does not exceed 21 dwellings on the site, including 1 Dwelling house ⁽²²⁾ and 20 Multiple dwellings ⁽⁴⁹⁾ .
Car parking	
RAD6	On-site car parking is provided in accordance with Schedule 7 - Car parking.
Waste	
RAD7	Bins and bin storage areas are provided, designed and managed in accordance with Planning scheme policy - Waste.
Lighting	
RAD8	Artificial lighting on-site is directed and shielded in such a manner as not to exceed the recommended maximum values of light technical parameters for the control of obtrusive light given in Table 2.1 of the Australian Standard AS 4282 (1997) Control of Obtrusive Effects of Outdoor Lighting. Note - "Curfewed hours" are taken to be those between 10pm and 7am the following day.
Hazardous chemicals	
RAD9	All development that involves the storage or handling of hazardous chemicals listed in Schedule 9, Development involving hazardous chemicals, Table 9.0.1 Quantity thresholds for hazardous chemicals stored as accepted development subject to requirements complies with Table 9.0.3 Hazardous chemicals.
RAD10	Development does not involve the storage or handling of hazardous chemicals listed in Schedule 9, Development involving hazardous chemicals, Table 9.0.2 Hazardous chemicals assessable thresholds.
Clearing of habitat trees where not located in the Environmental areas overlay map	
RAD11	Development does not result in the damaging, destroyed or clearing of a habitat tree. This does not apply to: <ul style="list-style-type: none"> a. Clearing of a habitat tree located within an approved development footprint;

6 Zones

	<p>b. Clearing of a habitat tree within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency;</p> <p>c. Clearing of a habitat tree reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure;</p> <p>d. Clearing of a habitat tree reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural , Rural residential and Environmental management and conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence;</p> <p>e. Clearing of a habitat tree reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes;</p> <p>f. Clearing of a habitat tree in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council;</p> <p>g. Clearing of a habitat tree associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens;</p> <p>h. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development.</p> <p>Editor's note - A native tree measuring greater than 80cm in diameter when measured at 1.3m from the ground is recognised as a 'habitat tree'. For further information on habitat trees, refer to Planning scheme policy – Environmental areas and corridors. Information detailing how this measurement is undertaken is provided in Australian Standard AS 4970 2009 Protection of Trees on Development Sites - Appendix A.</p>
--	---

Works requirements

Utilities	
RAD12	<p>Where available, the development is connected to:-</p> <p>a. an existing reticulated electricity supply;-</p> <p>b. telecommunications and broadband;</p> <p>c. reticulated sewerage;</p> <p>d. reticulated water;</p> <p>e. constructed and dedicated road.</p> <p>Development is provided in an appropriate level of service and infrastructure in accordance with Planning scheme policy - Integrated design (Appendix A).</p>
RAD13	<p>Where not in a sewerage area, the development is serviced by an appropriate on-site sewerage facility.</p> <p>Note – A site and soil evaluation report is generally required to demonstrate compliance with this outcome. Reports are to be prepared in accordance with AS1547 On-site domestic wastewater management and the Queensland Plumbing and Wastewater Code.</p>
RAD14	<p>Where not in an existing connections area or a future connections area as detailed in the Unitywater Connections Policy, the development is provided with an adequate water supply of 45,000 litres by way of on-site storage which provides equivalent water quality and reliability to support the use requirements of the development.</p>

Access	
RAD	<p>The frontage road is fully constructed to Council's standards.</p> <p>Note - Roads are considered to be constructed in accordance with Council standards when there is sufficient pavement width, geometry and depth to comply with the requirements of Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures. Testing of the existing pavement may be required to confirm whether the existing works meet the standards in Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p> <p>Note - Frontage roads include streets where no direct lot access is provided.</p>
RAD15	<p>Any new or changes to existing site-access crossovers and driveways are designed, and located and constructed in accordance with:</p> <ol style="list-style-type: none"> a. where for a Council-controlled road and associated with a Dwelling house: <ol style="list-style-type: none"> i. Planning scheme policy - Integrated design; b. where for a Council-controlled road; and not associated with a Dwelling house: <ol style="list-style-type: none"> i. AS/NZS2890.1 section 3; or Parking facilities Part 1: Off street car parking; ii. AS/NZS 2890.2 - Parking facilities Part 2: Off-street commercial vehicle facilities; iii. Planning scheme policy - Integrated design; iv. Schedule 8 - Service vehicle requirements; c. where for a State-Controlled road, the Safe Intersection Sight Distance requirements in Austroads and the appropriate IPWEAQ standard drawings, or a copy of a Transport Infrastructure Act 1994, section 62 approval.
RAD16	<p>Any new or changes to existing internal driveways and access ways are designed and constructed in accordance with AS/NZS 2890.1 Parking Facilities Part 1: Off street car parking and the relevant standards in Planning scheme policy - Integrated design.</p>
RAD	<p>Access driveways, manoeuvring areas and loading facilities are sealed and provide for service vehicles listed in Schedule 8 - Service vehicle requirements for the relevant use. The on-site manoeuvring is to be in accordance with Schedule 8 - Service vehicle requirements.</p>
Stormwater	
RAD17	<p>Any new or changes to existing stormwater run-off from the site is conveyed to a point of lawful discharge without causing actionable nuisance or annoyance to any person, property or premises in accordance with Planning scheme policy – Integrated design.</p> <p>Note - A watercourse as defined in the Water Act may be accepted as a lawful point of discharge providing the drainage discharge from the site does not increase the downstream flood levels during events up to and including the 1% AEP storm. An afflux of +20mm may be accepted on Council controlled land and road infrastructure. No worsening is ensured when stormwater is discharged into a catchment that includes State Transport Infrastructure.</p>
RAD18	<p>Development incorporates a minimum of 2% of the site area constructed as a bioretention system in accordance with Planning scheme policy – Integrated design if the development:-</p>

6 Zones

	<p>a. is for urban purposes only;</p> <p>b. involves a land area greater than 2500m²;</p> <p>c. will result in 6 or more dwellings; OR will result in an impervious area greater than 25% of the net developable area.</p> <p>Where development:</p> <p>a. is for an urban purpose that involves a land area 2500m² or greater in size; and</p> <p>b. that results in 6 or more dwellings; or</p> <p>c. that result in an impervious area greater than 25% of the net developable area,</p> <p>incorporates a 'deemed to comply solution' to manage stormwater quality.</p> <p>Note - The deemed to comply solution is to be designed, constructed, established and maintained in accordance with the requirements of Water by Design 'Deemed to Comply Solutions - Stormwater Quality Management for South East Queensland' and Planning scheme policy - Integrated design.</p>								
RAD	<p>Development ensures that surface flows entering the premises from adjacent properties are not blocked, diverted or concentrated.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland may be required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p>								
RAD	<p>Development ensures that works (e.g. fences and walls) do not block, divert or concentrate the flow of stormwater to adjoining properties.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland may be required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p>								
RAD	<p>Stormwater drainage infrastructure (excluding detention and bio-retention systems) through or within private land is protected by easements in favour of Council (at no cost to Council). Minimum easement widths are as follows:</p> <table border="1" data-bbox="263 1574 1469 2013"> <thead> <tr> <th data-bbox="263 1574 866 1693">Pipe Diameter</th> <th data-bbox="866 1574 1469 1693">Minimum Easement Width (excluding access requirements)</th> </tr> </thead> <tbody> <tr> <td data-bbox="263 1693 866 1778">Stormwater Pipe up to 825mm diameter</td> <td data-bbox="866 1693 1469 1778">3.0m</td> </tr> <tr> <td data-bbox="263 1778 866 1899">Stormwater Pipe up to 825mm diameter with Sewer pipe up to 225mm diameter</td> <td data-bbox="866 1778 1469 1899">4.0m</td> </tr> <tr> <td data-bbox="263 1899 866 2013">Stormwater pipe greater than 825mm diameter</td> <td data-bbox="866 1899 1469 2013">Easement boundary to be 1m clear of the outside wall of the pipe and clear of all pits.</td> </tr> </tbody> </table>	Pipe Diameter	Minimum Easement Width (excluding access requirements)	Stormwater Pipe up to 825mm diameter	3.0m	Stormwater Pipe up to 825mm diameter with Sewer pipe up to 225mm diameter	4.0m	Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the pipe and clear of all pits.
Pipe Diameter	Minimum Easement Width (excluding access requirements)								
Stormwater Pipe up to 825mm diameter	3.0m								
Stormwater Pipe up to 825mm diameter with Sewer pipe up to 225mm diameter	4.0m								
Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the pipe and clear of all pits.								

	<p>Note - Additional easement width may be required in certain circumstances in order to facilitate maintenance access to the stormwater system.</p> <p>Note - Refer to Planning scheme policy - Integrated design (Appendix C) for easement requirements over open channels.</p>
Site works and construction management	
RAD19	The site and any existing structures are to be maintained in a tidy and safe condition.
RAD20	<p>Site construction works incorporate temporary stormwater run-off, erosion and sediment controls and trash traps designed in accordance with the Urban Stormwater Quality Planning Guidelines, Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design.</p> <p>Development does not cause erosion or allow sediment to leave the site.</p> <p>Note - The International Erosion Control Association (Australasia) Best Practice Erosion and Sediment Control provides guidance on strategies and techniques for managing erosion and sedimentation.</p>
RAD	No dust emissions extend beyond the boundaries of the site during soil disturbances and construction works.
RAD	<p>Existing street trees are protected and not damaged during works.</p> <p>Note - Where development occurs in the tree protection zone, measures and techniques as detailed in Australian Standard AS 4970 Protection of trees on developments sites are adopted and implemented.</p>
RAD23	Any damage to Council land or infrastructure is repaired or replaced with the same materials, prior to plan sealing, or final building classification.
RAD21	Construction traffic including contractor car parking is controlled in accordance with a traffic management plan, prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) to ensure all traffic movements to and from the site are safe.
RAD24	Any material dropped, deposited or spilled on the road(s) as a result of construction processes associated with the site are to be cleaned at all times.
RAD22	<p>All native vegetation to be retained on-site is temporarily fenced or protected prior to and during development works.</p> <p>Note - No parking of vehicles or storage of machinery or goods is to occur in these areas during development works</p>
RAD	<p>Disposal of materials is managed in one or more of the following ways:</p> <ol style="list-style-type: none"> a. all cleared vegetation, declared weeds, stumps, rubbish, car bodies, scrap metal and the like are removed and disposed of in a Council land fill facility; or b. all native vegetation with a diameter below 400mm is to be chipped and stored on-site. <p>Note - No burning of cleared vegetation is permitted.</p>

6 Zones

	Note - The chipped vegetation must be stored in an approved location.
RAD	<p>All development works are carried out within the following times:</p> <ul style="list-style-type: none"> a. Monday to Saturday (other than public holidays) between 6:30am and 6:30pm on the same day; b. no work is to be carried out on Sundays or public holidays.

Earthworks

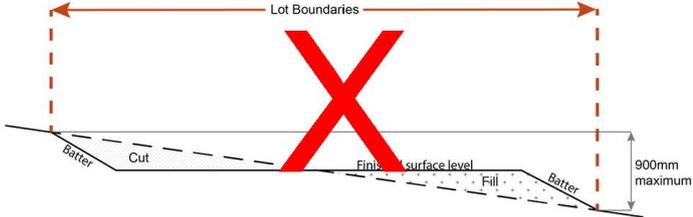

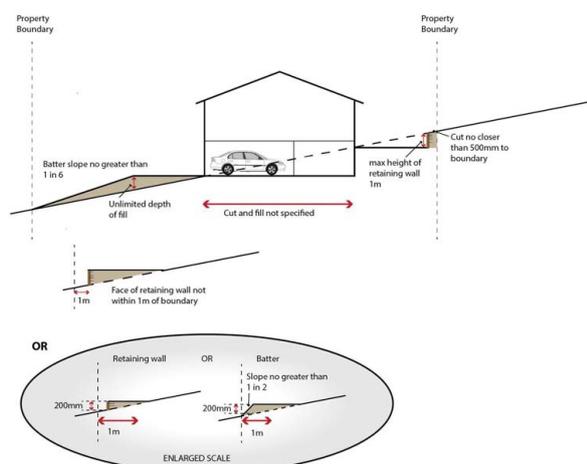

RAD26	<p>The total of all cut and fill on-site does not exceed 900mm in height.</p> <p style="text-align: center;">Figure -- Cut and Fill</p>  <p>Note -- This is site earthworks not building work.</p> <p>Filling or excavation does not:</p> <ul style="list-style-type: none"> a. involve a change in level of more than 1.0m relative to natural ground level <p>OR</p> <p>result in a batter greater than 1V to 6H;</p> <ul style="list-style-type: none"> b. necessitate the construction of a freestanding retaining wall exceeding 1.0m in height relative to finished ground level; c. result in the top of any cut batter, or the exposed face of any freestanding retaining wall supporting that cut, being closer than 500mm to a property boundary; d. result in the toe of any fill batter, or exposed face of any freestanding retaining wall supporting that fill, being closer than 1.0m to a property boundary unless: <ul style="list-style-type: none"> i. the depth of fill within the 1.0m strip does not exceed 200mm relative to natural ground level; or ii. the batter slope within that 1.0m strip is no steeper than 1V to 2H. <p style="text-align: center;">THE NEW FIGURE BELOW IS PROPOSED AS PART OF THIS AMENDMENT</p>
--------------	--

Figure - Filling or Excavation

<p>RAD</p>	<p>Cut and fill batters, (other than batters to dams and water impoundments), have a finished slope no steeper than the following:</p> <ol style="list-style-type: none"> any cut batter is no steeper than 1V in 4H; any fill batter, (other than a compacted fill batter), is no steeper than 1V in 4H; any compacted fill batter is no steeper than 1V in 4H.
<p>RAD</p>	<p>All cut and fill batters are provided with appropriate scour, erosion protection and run-off control measures including catch drains at the top of batters and lined batter drains as necessary.</p>
<p>RAD</p>	<p>Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance of steep slopes and batters.</p> <p>Note - Inspection and certification of steep slopes and batters may be required by a suitably qualified and experienced RPEQ.</p>
<p>RAD</p>	<p>All fill and excavation is contained on-site and is free draining.</p>
<p>RAD</p>	<p>Earthworks undertaken on the development site are shaped in a manner which does not:</p> <ol style="list-style-type: none"> prevent stormwater surface flow which, prior to commencement of the earthworks, passed onto the development site, from entering the land; or redirect stormwater surface flow away from existing flow paths; or divert stormwater surface flow onto adjacent land (other than a road) in a manner which: <ol style="list-style-type: none"> concentrates the flow; or increases the flow rates of stormwater over the affected section of the adjacent land above the situation which existed prior to the diversion; or causes actionable nuisance to any person, property or premises.
<p>RAD</p>	<p>All fill placed on-site is:</p>

6 Zones

	<p>a. limited to that necessary for the approved use;</p> <p>b. clean and uncontaminated (i.e. no building waste, concrete, green waste, actual acid sulfate soils, potential acid sulfate soils or contaminated material etc.) material is used as fill.</p>
RAD25	<p>The site is prepared and the fill placed on-site in accordance with Australian Standard AS3798.</p> <p>Note - The fill is to be inspected and tested in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures</p>
RAD	<p>No filling or excavation is undertaken in an easement issued in favour of Council or a public sector entity.</p> <p>Note - Public sector entity is defined in Schedule 2 of the Act.</p>
RAD27	<p>Filling or excavation that would result in any of the following is not carried out on site: does not result in:-</p> <p>a. reduction in cover over any Council or public sector entity infrastructure to less than 600mm;</p> <p>b. an increase in finished surface grade over, or within 1.5m on each side of, the Council or public sector entity infrastructure above that which existed prior to the filling or excavation works being undertaken.;</p> <p>c. prevent reasonable access to Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the site for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity is defined in Schedule 2 of the Act.</p>

Fire services

Note - The provisions under this heading only apply if:

- a. the development is for, or incorporates:
- i. reconfiguring a lot for a community title scheme creating 1 or more vacant lots; or
 - ii. material change of use for 2 or more sole occupancy units on the same lot, or within the same community titles scheme; or
 - iii. material change of use for a Tourist park⁽⁸⁴⁾ with accommodation in the form of caravans or tents; or
 - iv. material change of use for outdoor sales⁽⁵⁴⁾, outdoor processing or outdoor storage where involving combustible materials.

AND

- b. none of the following exceptions apply:
- i. the distributor-retailer for the area has indicated, in its netserv plan, that the premises will not be served by that entity's reticulated water supply; or
 - ii. every part of the development site is within 60m walking distance of an existing fire hydrant on the distributor-retailer's reticulated water supply network, measured around all obstructions, either on or adjacent to the site.

Note - The provisions under this heading do not apply to buildings that are required by the Building Code of Australia to have a fire hydrant system complying with Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations or other fire fighting facilities which provide equivalent protection.

RAD28	<p>External fire hydrant facilities are provided on site to the standard prescribed under the relevant parts of <i>Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations</i>.</p> <p>Note - For this requirement for accepted development, the following are the relevant parts of AS 2419.1 (2005):</p> <ol style="list-style-type: none"> a. in regard to the form of any fire hydrant - Part 8.5 and Part 3.2.2.1, with the exception that for Tourist parks⁽⁸⁴⁾ or development comprised solely of dwellings and their associated outbuildings, single outlet above-ground hydrants or suitably signposted in-ground hydrants would be an acceptable alternative; b. in regard to the general locational requirements for fire hydrants - Part 3.2.2.2 (a), (e), (f), (g) and (h) as well as Appendix B of AS 2419.1 (2005); c. in regard to the proximity of hydrants to buildings and other facilities - Part 3.2.2.2 (b), (c) and (d), with the exception that: <ol style="list-style-type: none"> i. - for dwellings and their associated outbuildings, hydrant coverage need only extend to the roof and external walls of those buildings; ii. - for caravans and tents, hydrant coverage need only extend to the roof of those tents and caravans; iii. - for outdoor sales⁽⁵⁴⁾, processing or storage facilities, hydrant coverage is required across the entire area of the outdoor sales⁽⁵⁴⁾, outdoor processing and outdoor storage facilities; and d. in regard to fire hydrant accessibility and clearance requirements - Part 3.5 and where applicable, Part 3.6.
RAD29	<p>A continuous path of travel having the following characteristics is provided between the vehicle access point to the site and each external fire hydrant and hydrant booster point on the land:</p> <ol style="list-style-type: none"> a. an unobstructed width of no less than 3.5m; b. an unobstructed height of no less than 4.8m; c. constructed to be readily traversed by a 17 tonne HRV fire brigade pumping appliance; d. an area for a fire brigade pumping appliance to stand within 20m of each fire hydrant and 8m of each hydrant booster point.
RAD30	<p>On-site fire hydrant facilities are maintained in effective operating order in a manner prescribed in <i>Australian Standard AS1851 (2012) – Routine service of fire protection systems and equipment</i>.</p>
RAD31	<p>For development that contains on-site fire hydrants external to buildings:</p> <ol style="list-style-type: none"> a. those external hydrants can be seen from the vehicular entry point to the site; or b. a sign identifying the following is provided at the vehicular entry point to the site: <ol style="list-style-type: none"> i. the overall layout of the development (to scale); ii. internal road names (where used); iii. all communal facilities (where provided); iv. the reception area and on-site manager's office (where provided); v. external hydrants and hydrant booster points; vi. physical constraints within the internal roadway system which would restrict access by fire fighting appliances to external hydrants and hydrant booster points. <p>Note - The sign prescribed above, and the graphics used are to be:</p> <ol style="list-style-type: none"> a. in a form;

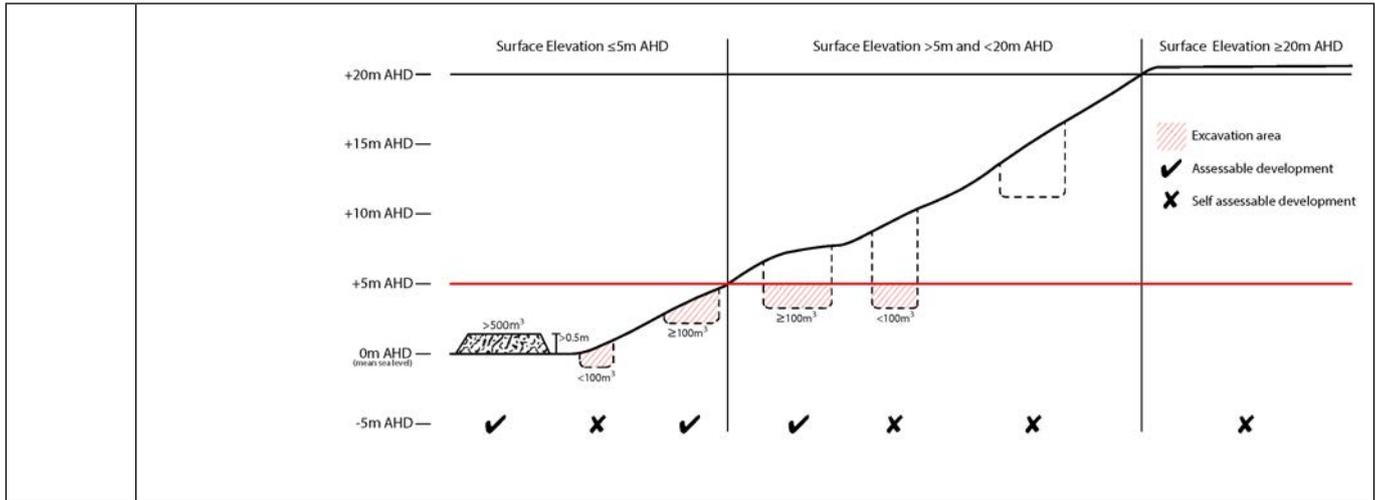

6 Zones

	<p>b. of a size;</p> <p>c. illuminated to a level;</p> <p>which allows the information on the sign to be readily understood, at all times, by a person in a fire fighting appliance up to 4.5m from the sign.</p>
RAD32	<p>For development that contains on-site fire hydrants external to buildings, those hydrants are identified by way of marker posts and raised reflective pavements markers in the manner prescribed in the technical note <i>Fire hydrant indication system</i> produced by the Queensland Department of Transport and Main Roads.</p> <p>Note - Technical note Fire hydrant indication system is available on the website of the Queensland Department of Transport and Main Roads.</p>
Use specific requirements	
Dwelling house⁽²²⁾	
RAD33	The dwelling house ⁽²²⁾ is only used to accommodate members of the Confraternity.
RAD34	<p>Where the dwelling house⁽²²⁾ includes a secondary dwelling, the secondary dwelling:</p> <ol style="list-style-type: none"> has a maximum GFA of 100m²; obtains access from the existing driveway giving access to the Dwelling house⁽²²⁾; is setback 50m from all property boundaries; is located within 20m of the principal Dwelling house⁽²²⁾; is separated from other dwellings by a minimum distance of 1.5m; is only used to accommodate members of the Confraternity.
Home based business⁽³⁵⁾	
RAD35	Home based business(es) ⁽³⁵⁾ are fully contained within a dwelling or on-site structure, except for a home based child care facility.
RAD36	The maximum total use area is 100m ² .
RAD37	<p>Only 1 additional non-resident, either an employee or customer, is permitted on the site at any one time.</p> <p>Note - This provision does not apply to Bed and Breakfast or farmstay business.</p>
RAD38	Service and delivery vehicles do not exceed one Small Rigid Vehicle (SRV) at any one time.
RAD39	Vehicle parking for the Home based business ⁽³⁵⁾ on-site is limited to 1 car or Small Rigid Vehicle (SRV).
RAD40	The amenity of the area and adjacent sensitive land uses are protected from the impacts of dust, odour, noise, light, chemicals and other environmental nuisances.
RAD41	<p>The Home based business⁽³⁵⁾ does not involve vehicle servicing or major repairs, including spray painting or panel beating.</p> <p>Note - Vehicle servicing excludes general maintenance of a vehicle such as, but not limited to, changing engine fluids, filters and parts such as batteries and plugs.</p>

RAD42	The hours of operation do not exceed 8:00am to 6:00pm, Monday to Saturday and are not open to the public on Sunday's, Christmas Day, Good Friday and Anzac Day. Note - Office ⁽⁵³⁾ or administrative activities that do not generate non-residents visiting the site, such as book-keeping and computer work, may operate outside the hours of operation.
RAD43	The Home based business ⁽³⁵⁾ does not generate noise that is audible from the boundary of the lot. Note - Guidance on acceptable noise is provided in the standards listed in the Environmental (Noise) Policy 2008. Note - This provision does not apply to the use of motor vehicles.
RAD44	The Home based business ⁽³⁵⁾ does not involve an environmentally relevant activity (ERA) as defined in the <i>Environmental Protection Regulation 2008</i> .
RAD45	Only goods grown, produced or manufactured on-site are sold from the site.
RAD46	Display of goods grown, produced or manufactured on-site are contained within a dwelling or on-site structure and the display of goods is not visible from boundary of the site.
RAD47	For bed and breakfast and farmstays: a. overnight accommodation is provided in the Dwelling house ⁽²²⁾ of the accommodation operator. b. maximum 4 bedrooms are provided for a maximum of 10 guests. c. meals are served to paying guests only. d. rooms do not contain food preparation facilities.
Multiple dwelling⁽⁴⁹⁾	
RAD48	Multiple dwellings ⁽⁴⁹⁾ are provided in the form of detached buildings.
RAD49	The number of Multiple dwellings ⁽⁴⁹⁾ located on the site does not exceed 20.
RAD50	Multiple dwellings ⁽⁴⁹⁾ are separated by a minimum distance of 1.5m and a maximum of 10m.
RAD51	Multiple dwellings ⁽⁴⁹⁾ are setback a minimum 50m from all property boundaries.
RAD52	Multiple dwellings ⁽⁴⁹⁾ are only used to accommodate members of the Confraternity.
Rural workers' accommodation⁽⁷¹⁾	
RAD53	Rural workers' accommodation ⁽⁷¹⁾ is located in the Residential Area on Map 1 - Abbey use areas.
RAD54	No more than 1 Rural workers' accommodation ⁽⁷¹⁾ per lot.
RAD55	Rural workers' accommodation ⁽⁷¹⁾ is contained within 1 structure.
RAD56	No more than 12 rural workers are accommodated.
RAD57	Access is obtained from the existing driveway giving access to the Dwelling house ⁽²²⁾ .
Telecommunications facility⁽⁸¹⁾	

6 Zones

<p>Editor's note - In accordance with the Federal legislation Telecommunications facilities⁽⁸¹⁾ must be constructed and operated in a manner that will not cause human exposure to electromagnetic radiation beyond the limits outlined in the Radiocommunications (Electromagnetic Radiation - Human Exposure) Standard 2003 and Radio Protection Standard for Maximum Exposure Levels to Radiofrequency Fields - 3KHz to 300Ghz.</p>	
RAD58	A minimum area of 45m ² is available at ground level to allow for additional equipment shelters and associated structures for the purpose of co-locating on the proposed facility.
RAD59	The development results in no net reduction in the minimum quantity and standard of landscaping, private or communal open space or car parking spaces required under the planning scheme or under an existing development approval.
RAD60	Equipment shelters and associated structures are located: <ul style="list-style-type: none"> a. directly beside the existing equipment shelter and associated structures; b. behind the main building line; c. further away from the frontage than the existing equipment shelter and associated structures; d. a minimum of 10m from side and rear boundaries, except where in the Industry and Extractive industry zones, the minimum side and rear setback is 3m.
RAD61	Equipment shelters and other associated structures are either the same type of colour or material to match the surrounding locality.
RAD62	The facility is enclosed by security fencing or by other means to ensure public access is prohibited.
RAD63	A minimum 3m wide strip of dense planting is provided around the perimeter of the fenced area, between the development and street frontage and adjoining uses. <p>Note - Landscaping is provided in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person to ensure compliance with Planning scheme policy - Integrated design.</p>
RAD64	All equipment comprising the telecommunications facility ⁽⁸¹⁾ which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure no noise from this equipment can be heard, or felt at the site boundary.
<p>Values and constraints requirements</p> <p>Note - The relevant values and constraints requirements do not apply where the development is consistent with a current Development permit for Reconfiguring a lot or Material change of use or Operational work, where that approval has considered and addressed (e.g. through a development footprint plan (or similar in the case of Landslide hazard) or conditions of approval) the identified value or constraint under this planning scheme.</p>	
<p>Acid sulfate soils - (refer Overlay map - Acid sulfate soils to determine if the following requirements apply)</p> <p>Note - Planning scheme policy - Acid sulfate soils provides guidance for requirements for accepted development that has the potential to disturb acid sulfate soils i.e. development involving filling or excavation works below the thresholds of 100m³ and 500m³ respectively.</p>	
RAD65	Development does not involve: <ul style="list-style-type: none"> a. excavation or otherwise removing of more than 100m³ of soil or sediment where below 5m Australian Height Datum AHD, or b. filling of land of more than 500m³ of material with an average depth of 0.5m or greater where below the 5m AHD.

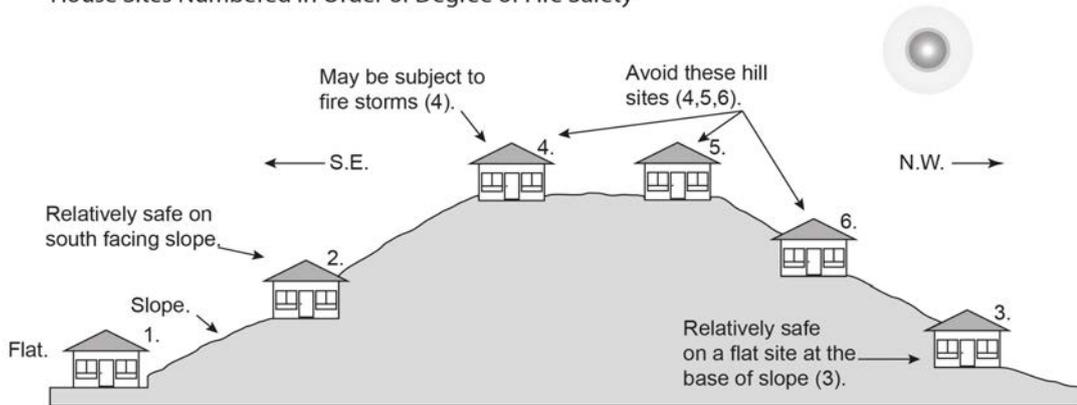

Bushfire hazard (refer Overlay map - Bushfire hazard to determine if the following requirements apply)

Note - For the purposes of section 12 of the Building Regulation 2006, land identified as very high potential bushfire intensity, high potential bushfire intensity, medium potential bushfire intensity or potential impact buffer on the Bushfire hazard overlay map is the 'designated bushfire hazard area'. AS 3959-2009 Construction of buildings in bushfire hazard areas applies within these areas.

RAD66

- a. Building and structures are:
 - i. not located on a ridgeline
 - ii. not located on land with a slope greater than 15% (see Overlay map – Landslide hazard)
- b. Dwellings are located on east to south facing slopes.

House Sites Numbered in Order of Degree of Fire Safety

(1 being the safest, 6 being the most hazardous.)
 From Bushfire Prone Areas: Siting and Design of Residential Buildings (1997), Queensland Department of Local Government and Planning, and Queensland Fire & Rescue Service.

RAD67

- Buildings and structures have contained within the site:
 - a. a separation from classified vegetation of 20m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater;

6 Zones

	<ul style="list-style-type: none"> b. a separation from low threat vegetation of 10m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater; c. a separation of no less than 10m between a fire fighting water supply extraction point and any classified vegetation, buildings and other roofed structures; d. an area suitable for a standard fire fighting appliance to stand within 3m of a fire fighting water supply extraction point; and e. an access path suitable for use by a standard fire fighting appliance having a formed width of at least 4m, a cross-fall of no greater than 5%, and a longitudinal gradient of no greater than 25%: <ul style="list-style-type: none"> i. to, and around, each building and other roofed structure; and ii. to each fire fighting water supply extraction point. <p>Note - The meaning of the terms classified vegetation and low threat vegetation as well as the method of calculating the bushfire attack level are as described in Australian Standard AS 3959.</p>
RAD68	<p>The length of driveway:</p> <ul style="list-style-type: none"> a. to a public road does not exceed 100m between the most distant part of a building used for any purpose other than storage and the nearest part of a public road; b. has a maximum gradient no greater than 12.5%; c. have a minimum width of 3.5m; d. accommodate turning areas for fire fighting appliances in accordance with Qld Fire and Emergency Services' Fire Hydrant and Vehicle Access Guideline.
RAD69	<ul style="list-style-type: none"> a. A reticulated water supply is provided by a distributor retailer for the area or, where not connected to a reticulated water supply, on-site fire fighting water storage containing not less than 10 000 litres (tanks with fire brigade tank fittings, swimming pools) is provided and located within 10m of buildings and structures. b. Where a swimming pool is the nominated on-site fire fighting water storage source, vehicle access to within 3m of that water storage source is provided. c. Where a tank is the nominated on-site fire fighting water storage source, it includes: <ul style="list-style-type: none"> i. a hardstand area allowing medium rigid vehicle (15 tonne fire appliance) access within 6m of the tank; ii. fire brigade tank fittings, comprising 50mm ball valve and male camlock coupling and, if underground, an access hole of 20mm (minimum) to accommodate suction lines.
RAD70	<p>Development does not involve the manufacture or storage of hazardous chemicals.</p>
<p>Environmental areas (refer Overlay map - Environmental areas to determine if the following requirements apply)</p> <p>Note - The following are excluded from the native clearing provisions of this planning scheme:</p> <ul style="list-style-type: none"> a. Clearing of native vegetation located within an approved development footprint; b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; 	

- d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental Management and Conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence;
- e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes;
- f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council;
- g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens;
- h. Grazing of native pasture by stock;
- i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development.

Note - Definition for native vegetation is located in Schedule 1 Definitions.

Note - Native vegetation subject to this requirement primarily comprises of matters of national environmental significance (MNES), matters of state environmental significance (MSES). They also comprise some matters of local environmental significance (MLES). A MLES is defined in Schedule 1.2, Administrative definitions. A list of the elements that apply to the mapped MSES and MLES is provided in Appendix 1 of the Planning scheme policy - Environmental areas.

Editors' Note - The accuracy of overlay mapping can be challenged through the development application process (code assessable development) or by way of a planning scheme amendment. See Council's website for details.

Editors' Note - When clearing native vegetation within a MSES area, you may still require approval from the State government.

RAD71	<p>Where no suitable land cleared of native vegetation exists, clearing of native vegetation in High Value Area or Value Offset Area is for the purpose of a new dwelling house⁽²²⁾ and all associated facilities* or an extension to an existing dwelling house⁽²²⁾ only, and comprises an area no greater than 1500m².</p> <p>Note - *All associated facilities includes: on-site wastewater treatment, all areas of disturbance, on-site parking, access and manoeuvring areas.</p> <p>Editor's note - See in heading above for other uses excluded from native vegetation clearing requirements.</p> <p>Editor's note - Where vegetation clearance is accepted development subject to requirements, care should be undertaken to avoid adverse impacts on koalas, koala habitat values and habitat connectivity and to encourage existing koala usage of the site. Measures to minimise impacts include:</p> <ul style="list-style-type: none"> i. co-locating all associated activities, infrastructure and access strips; ii. be the least valued area of koala habitat on the site; iii. minimise the footprint of the development envelope area; iv. minimise edge effects to areas external to the development envelope; v. location and design consideration to ensure koala safety and movement in accordance with the Koala-sensitive Design Guideline and Planning scheme policy – Environmental areas; vi. sufficient area between the development and koala habitat trees to achieve their long-term viability. <p>Editor's note - Where vegetation clearing is accepted development subject to requirements, consideration should be given to avoid clearing habitat trees. Habitat trees may contain structural hollows where animals live, breed and shelter. The provision of nest boxes or salvaging of hollows will provide compensatory roosting and nesting opportunities for local wildlife including sugar gliders, possums and owls. For further information see Planning scheme policy – Environmental areas.</p>
RAD72	<p>No clearing of native vegetation is to occur within the Value Offset Area MLES - Waterway buffer or Value Offset Area MLES - Wetland buffer.</p> <p>This does not apply to the following:</p>

6 Zones

	<ul style="list-style-type: none"> a. Clearing of native vegetation located within an approved development footprint; b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental management and conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence; e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes; f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council; g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens; h. Grazing of native pasture by stock; i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development.
<p>Heritage and landscape character (refer Overlay map - Heritage and landscape character to determine if the following requirements apply)</p> <p>Note - Places, including sites, objects and buildings having local cultural heritage significance, are identified on Overlay map - Heritage and landscape character and listed in Schedule 1 of Planning scheme policy - Heritage and landscape character. Places also having cultural heritage significance at a State level and being entered in the Queensland Heritage Register, are also identified in Schedule 1 of Planning scheme policy - Heritage and landscape character.</p>	
RAD73	<p>Development is for the preservation, maintenance, repair and restoration of the site, object or building.</p> <p>This does not apply to Listed item 99, in Schedule 1 - List of sites, objects and buildings of significant historical and cultural value of Planning scheme policy - Heritage and landscape character.</p> <p>Note - Preservation, maintenance, repair and restoration are defined in Schedule 1 - Definitions</p>
RAD74	<p>A cultural heritage conservation management plan is prepared in accordance with Planning scheme policy – Heritage and landscape character and submitted to Council prior to the commencement of any preservation, maintenance, repair and restoration works. Any preservation, maintenance, repair and restoration works are in accordance with the Council approved cultural heritage conservation management plan.</p> <p>This does not apply to Listed item 99 in Schedule 1 - List of sites, objects and buildings of significant historical and cultural value of Planning scheme policy - Heritage and landscape character.</p>
RAD75	<p>Development does not result in the removal of or damage to any significant tree identified on Overlay map – Heritage and landscape character and listed in Appendix 2 of Planning scheme policy – Heritage and landscape character.</p>
RAD76	<p>The following development does not occur within 20m of the base of any significant tree, identified on Overlay map – Heritage and landscape character and listed in Appendix 2 of Planning scheme policy – Heritage and landscape character:</p> <ul style="list-style-type: none"> a. construction of any building; b. laying of overhead or underground services; c. any sealing, paving, soil compaction; d. any alteration of more than 75mm to the ground surface level prior to work commencing.
RAD77	<p>Pruning of a significant tree occurs in accordance with Australian Standard AS 4373-2007 - Pruning of Amenity Trees.</p>

Landslide hazard (refer Overlay map - Landslide hazard to determine if the following requirements apply)	
RAD78	Development does not: <ul style="list-style-type: none"> a. involve earthworks exceeding 50m³; b. involve cut and fill having a height greater than 600mm; c. involve any retaining wall having a height greater than 600mm; d. redirect or alter the existing flow of surface or groundwater.
RAD79	Buildings, excluding domestic outbuildings: <ul style="list-style-type: none"> a. are split-level, multiple-slab, pier or pole construction; b. are not single plane slab on ground.
RAD80	Development does not involve the manufacture, handling or storage of hazardous chemicals.
Overland flow path (refer Overlay map - Overland flow path to determine if the following requirements apply)	
RAD81	Development for a material change of use or building work does not involve the construction of a building or structure in an Overland flow path area.
RAD82	Development for a material change of use or operational work does not impede the flow of flood waters through the premises or worsen flood flows to other premises. <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow</p>
RAD83	Development for a material change of use or building work ensures that fencing in an overland flow path area is at least 50% permeable.
RAD84	Development for a material change of use or building work that involves a hazardous chemical ensures the hazardous chemicals is not located within an overland flow path area.
RAD85	Development for a material change of use or building work for a Park ⁽⁵⁷⁾ ensures that work is provided in accordance with the requirements set out in Appendix B of the Planning scheme policy - Integrated design.
Riparian and wetland setbacks (refer Overlay map - Riparian and wetland setback to determine if the following requirements apply)	
Note - W1, W2 and W3 waterway and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.	
RAD86	No development is to occur within: <ul style="list-style-type: none"> a. 50m from top of bank for W1 waterway and drainage line b. 30m from top of bank for W2 waterway and drainage line c. 20m from top of bank for W3 waterway and drainage line d. 100m from the edge of a Ramsar wetland, 50m from all other wetlands. <p>Note - W1, W2 and W3 waterways and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.</p>

6 Zones

	<p>Note - In some cases, the top of bank may not be easily defined, as such a hydraulic measurement may be applied instead. Moreton Bay Regional Council will provide further direction on how to determine and locate the setback boundary in these locations.</p> <p>Note - The minimum setback distance applies to the each side of waterway.</p>
--	--

Transport noise corridors (refer Overlay map - Transport noise corridors)

Note - This is for information purposes only. No requirements for accepted development or criteria for assessable development apply. Development located within a Transport Noise Corridor must satisfy the requirements of the Queensland Development Code

Part B — Criteria for assessable development- Abbey precinct

Where development is categorised as assessable development - code assessment in the Table of Assessment, and located in a precinct, the assessment benchmarks are the criteria set out in Part B, Table 6.2.2.1.2 as well as the purpose statement and overall outcomes of this code.

Where development is categorised as assessable development - impact assessment, the assessment benchmarks become the whole of the planning scheme.

Table 6.2.2.1.1 Assessable development - Abbey precinct

Performance outcomes	Examples that achieve aspects of the Performance Outcomes
General criteria	
Building height	
<p>PO1</p> <p>Buildings and structures are of a height, scale and bulk which:</p> <ul style="list-style-type: none"> a. is consistent with the existing low rise, open and low density character and amenity of the site and its surrounds; b. is visually compatible with the existing buildings or structures and respects the existing amenity and character of the Abbey precinct; c. minimises the visual impact of large-scale built form whilst still providing for religious character heights associated with Place of worship⁽⁶⁰⁾; d. does not detract from the amenity of surrounding existing or future rural and residential uses. 	<p>E1</p> <p>Building height does not exceed the maximum height identified on Overlay map - Building heights, except for architectural features associated with religious expression on Place of worship⁽⁶⁰⁾ and Educational establishment⁽²⁴⁾ buildings.</p>
Setbacks	
<p>PO2</p> <p>Building setback:</p> <ul style="list-style-type: none"> a. is sufficient to minimise overlooking and maintain privacy of adjoining properties; 	<p>E2</p> <p>Buildings and structures are setback as follows, unless otherwise indicated:</p> <ul style="list-style-type: none"> a. road frontage - 10m

<ul style="list-style-type: none"> b. is sufficient to ensure development is not visually dominant or overbearing on adjoining properties; c. maintains the rural character of the site and its surrounds. 	<ul style="list-style-type: none"> b. side boundary - 10m c. rear boundary - 10m
Specific rural uses setbacks	
<p>PO3</p> <p>Development ensures:</p> <ul style="list-style-type: none"> a. chemical spray, fumes, odour, dust are contained on site; b. unreasonable nuisance or annoyance resulting from, but not limited to, noise, storage of materials and rubbish does not adversely impact upon land users adjacent to, or within the general vicinity; c. buildings and other structures are consistent with the open area, low density, low built form character and amenity associated with the surrounding rural environment. 	<p>E3</p> <p>The following uses, associated buildings and structures are setback from all lot boundaries as follows:</p> <ul style="list-style-type: none"> a. Animal husbandry⁽⁴⁾ (buildings only) – 10m b. Cropping⁽¹⁹⁾ (buildings only) – 10m c. Intensive horticulture⁽⁴⁰⁾ - 20m
Site cover	
<p>PO4</p> <p>Development:</p> <ul style="list-style-type: none"> a. maintains the low density, low rise built form and open space character of the site; b. ensures that buildings and structures are not overbearing, visually dominant or out of character with the surrounding built environment nor detract from the amenity of adjoining land. 	<p>E4</p> <p>Site cover of all buildings and structures does not exceed 20%.</p>
Residential density	
<p>PO5</p> <p>Housing provided on site:</p> <ul style="list-style-type: none"> a. does not exceed a site density of 0.85 dwellings/hectare; b. remains subordinate to the primary use of the site; c. provides accommodation for people engaged in a lawful use of the site; d. maintains a direct nexus with the Place of worship⁽⁶⁰⁾ on the site. 	<p>No example provided.</p>
Built form	

6 Zones

<p>PO6</p> <p>Buildings and structures are designed and constructed to:</p> <ol style="list-style-type: none"> incorporate a mix of colours and high quality materials to add diversification to treatments and finishes; avoid blank walls through facade articulation to create visual interest and deter graffiti and vandalism; activate and address the street, public area or public open space; reduce cluttering of plan and equipment on building roofs. 	<p>E6.1</p> <p>Development provides materials and finishes of a high quality that are not susceptible to stain, discolour or deterioration.</p> <hr/> <p>E6.2</p> <p>Development incorporates articulated walls with variation, detail and colour to reduce the bulk and impact of development and minimise expansive blank walls.</p> <hr/> <p>E6.3</p> <p>The main facade of the building directly addresses and faces the street and contains a mix of materials and colours.</p> <hr/> <p>E6.4</p> <p>Building utilities such as lift motor rooms and telecommunications equipment are designed to be visually integrated with the building.</p>
<p>Car parking</p>	
<p>PO7</p> <p>Traffic generation, vehicle movement and on-site car parking associated with an activity:</p> <ol style="list-style-type: none"> provides safe, convenient and accessible access for vehicles and pedestrians; provides safe and convenient on-site parking and manoeuvring to meet anticipated parking demand; is appropriate to the road classification and carrying capacity of the local network and able to meet the additional demands generated by the development; does not result adverse impacts on the efficient and safe functioning of the road network. <p>Note - Refer to Planning scheme policy - Integrated transport assessment for guidance on how to achieve compliance with this outcome.</p>	<p>E7</p> <p>On-site car parking is provided in accordance with Schedule 7 - Car parking.</p>
<p>Waste</p>	
<p>PO8</p> <p>Bins and bin storage areas are provided, designed and managed in accordance with Planning scheme policy – Waste.</p>	<p>No example provided. E8</p> <p>Development is designed to meet the criteria in the Planning scheme policy - Waste and is demonstrated in a waste management program.</p>

Personal and property safety	
<p>PO9</p> <p>Buildings and spaces are designed and constructed to create a safe and secure environment by incorporating key crime prevention through environmental design principles, including:</p> <ol style="list-style-type: none"> casual surveillance opportunities and sight lines; way-finding cues and signage; light illuminates pathways and potential entrapment areas as well as maximising opportunities for penetration of natural light into spaces; minimise predictable routes and entrapment locations. 	No example provided.
Amenity	
<p>PO10</p> <p>The amenity of the area and adjacent sensitive land uses are protected from the impacts of dust, odour, noise, light, chemicals and other environmental nuisances.</p>	No example provided.
Landscaping and screening	
<p>PO11</p> <p>Landscaping and screening is provided in a manner that:</p> <ol style="list-style-type: none"> achieves a high level of privacy and amenity to sensitive land uses on adjoining properties and when viewed from the street; reduces the visual impact of building bulk and presence and hard surface areas on the local character and amenity of adjoining sensitive land uses and from the street; creates a secure and safe environment by incorporating key elements of crime prevention through environmental design; achieves the design principles outlined in Planning scheme policy - Integrated design. 	No example provided.
Noise	
<p>PO12</p> <p>Noise generating uses do not adversely affect existing noise sensitive uses.</p>	No example provided.

6 Zones

<p>Note - The use of walls, barriers or fences that are visible from or adjoin a road or public area are not appropriate noise attenuation measures unless adjoining a motorway, arterial road or rail line.</p> <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p>	
<p>PO13</p> <p>Sensitive land uses are provided with an appropriate acoustic environment within designated external private outdoor living spaces and internal areas while:</p> <ol style="list-style-type: none"> a. contributing to safe and usable public spaces, through maintaining high levels of surveillance of parks, streets and roads that serve active transport purposes (e.g. existing or future pedestrian paths or cycle lanes etc); b. maintaining the amenity of the streetscape. <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p> <p>Note - Refer to Planning Scheme Policy – Integrated design for details and examples of noise attenuation structures.</p>	<p>E13.1</p> <p>Development is designed to meet the criteria outlined in the Planning Scheme Policy – Noise</p> <p>E13.2</p> <p>Noise attenuation structures (e.g. walls, barriers or fences):</p> <ol style="list-style-type: none"> a. are not visible from an adjoining road or public area unless: <ol style="list-style-type: none"> i. adjoining a motorway or rail line; or ii. adjoining part of an arterial road that does not serve an existing or future active transport purpose (e.g. pedestrian paths or cycle lanes) or where attenuation through building location and materials is not possible. b. do not remove existing or prevent future active transport routes or connections to the street network; c. are located, constructed and landscaped in accordance with Planning scheme policy - Integrated design. <p>Note - Refer to Planning scheme policy – Integrated design for details and examples of noise attenuation structures.</p> <p>Note - Refer to Overlay map – Active transport for future active transport routes.</p>
<p>Hazardous Chemicals</p> <p>Note - To assist in demonstrating compliance with the following performance outcomes, a Hazard Assessment Report may be required to be prepared and submitted by a suitably qualified person in accordance with 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.</p> <p>Note - Terms used in this section are defined in 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.</p>	
<p>PO14</p> <p>Off sites risks from foreseeable hazard scenarios involving hazardous chemicals are commensurate with the sensitivity of the surrounding land use zones.</p>	<p>E14.1</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of land zoned for vulnerable or sensitive land uses as described below:</p>

	<p>Dangerous Dose</p> <ol style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ol style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. b. For any hazard scenario involving fire or explosion: <ol style="list-style-type: none"> i. 7kPa overpressure; ii. 4.7kW/m2 heat radiation. <p>If criteria E13.1 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 0.5×10^{-6}/year.</p>
	<p>E14.2</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of a commercial or community activity land use zone as described below:</p> <p>Dangerous Dose</p> <ol style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ol style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. b. For any hazard scenario involving fire or explosion: <ol style="list-style-type: none"> i. 7kPa overpressure; ii. 4.7kW/m2 heat radiation. <p>If criteria E13.2 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 5×10^{-6}/year.</p>
	<p>E14.3</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of an industrial land use zone as described below:</p>

6 Zones

	<p>Dangerous Dose</p> <ul style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ul style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. b. For any hazard scenario involving fire or explosion: <ul style="list-style-type: none"> i. 14kPa overpressure; ii. 12.6kW/m2 heat radiation. <p>If criteria E13.3 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 50×10^{-6}/year.</p>
<p>PO15</p> <p>Buildings and package stores containing fire-risk hazardous chemicals are designed to detect the early stages of a fire situation and notify a designated person.</p>	<p>E15</p> <p>Buildings and package stores containing fire-risk hazardous chemicals are provided with 24 hour monitored fire detection system for early detection of a fire event.</p>
<p>PO16</p> <p>Common storage areas containing packages of flammable and toxic hazardous chemicals are designed with spill containment system(s) that are adequate to contain releases, including fire fighting media.</p>	<p>E16</p> <p>Storage areas containing packages of flammable and toxic hazardous chemicals are designed with spill containment system(s) capable of containing a minimum of the total aggregate capacity of all packages plus the maximum operating capacity of any fire protection system for the storage area(s) over a minimum of 60 minutes.</p>
<p>PO17</p> <p>Storage and handling areas, including manufacturing areas, containing hazardous chemicals in quantities greater than 2,500L or kg within a Local Government "flood hazard area" are located and designed in a manner to minimise the likelihood of inundation of flood waters from creeks, rivers, lakes or estuaries.</p>	<p>E17.1</p> <p>The base of any tank with a WC >2,500L or kg is higher than any relevant flood height level identified in an area's flood hazard area. Alternatively:</p> <ul style="list-style-type: none"> a. bulk tanks are anchored so they cannot float if submerged or inundated by water; and b. tank openings not provided with a liquid tight seal, i.e. an atmospheric vent, are extended above the relevant flood height level. <p>E17.2</p> <p>The lowest point of any storage area for packages >2,500L or kg is higher than any relevant flood height level identified in an area's flood hazard area.</p>

	Alternatively, package stores are provided with impervious bund walls or racking systems higher than the relevant flood height level.
Clearing of habitat trees where not located within the Environmental areas overlay map	
<p>PO18</p> <p>a. Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected.</p> <p>b. Development does not result in the net loss of fauna habitat. Where development does result in the loss of a habitat tree, development will provide replacement fauna nesting boxes at the following rate of 1 nest box for every hollow removed. Where hollows have not yet formed in trees > 80cm in diameter at 1.3m height, 3 nest boxes are required for every habitat tree removed.</p> <p>c. Development does not result in soil erosion or land degradation or leave land exposed for an unreasonable period of time but is rehabilitated in a timely manner</p> <p>Note: Further guidance on habitat trees is provided in Planning scheme policy - Environmental areas</p>	No example provided.
Works criteria	

Utilities	
<p>PO</p> <p>All services including water supply, sewage disposal, electricity, street lighting, telecommunications and gas (if available) are provided in a manner that:</p> <p>a. is effective in delivery of service and meets reasonable community expectations;</p> <p>b. has capacity to service the maximum lot yield envisaged for the zone and the service provider's design assumptions;</p> <p>c. ensures a logical, sequential, efficient and integrated roll out of the service network;</p> <p>d. is conveniently accessible in the event of maintenance or repair;</p> <p>e. minimises whole of life cycle costs for that infrastructure;</p> <p>f. minimises risk of potential adverse impacts on the natural and built environment;</p>	<p>E</p> <p>Development is provided with an appropriate level of service and infrastructure in accordance with Planning scheme policy - Integrated design (Appendix A).</p>

6 Zones

<p>g. minimises risk of potential adverse impact on amenity and character values;</p> <p>h. recognises and promotes Councils Total Water Cycle Management policy and the efficient use of water resources.</p>	
<p>PO19</p> <p>Where the site adjoins or is opposite to a Park⁽⁵⁷⁾, foreshore or Humpybong Reserve all existing overhead power lines are to be undergrounded for the full frontage of the site.</p>	<p>No example provided.</p>
<p>PO20</p> <p>The development is connected to an existing reticulated electricity supply system approved by the relevant energy regulating authority.</p>	<p>E20</p> <p>Development is connected to underground electricity.</p>
<p>PO21</p> <p>The development has access to telecommunications and broadband services in accordance with current standards.</p>	<p>No example provided.</p>
<p>PO22</p> <p>Where available the development is to safely connect to reticulated gas.</p>	<p>No example provided.</p>
<p>PO23</p> <p>The development provides for the treatment and disposal of sewage and other waste water in a way that will not cause environmental harm or pose a risk to public health.</p>	<p>E23.1</p> <p>Where in a sewerage area, the development is connected to a reticulated sewerage network.</p>
	<p>E23.2</p> <p>Where not in a sewerage area, the development is serviced by an appropriate on-site sewerage facility.</p> <p>Note – A site and soil evaluation report is generally required to demonstrate compliance with this outcome. Reports are to be prepared in accordance with AS1547 On-site domestic wastewater management and the Queensland Plumbing and Wastewater Code.</p>
	<p>E23.3</p> <p>Trade waste is pre-treated on-site prior to discharging into the sewerage network.</p>
<p>PO24</p>	<p>E24.1</p>

<p>The development is provided with an adequate and sustainable supply of potable (drinking and general use e.g. gardening, washing, fire fighting) water.</p>	<p>Where in an existing connections area or a future connections area as detailed in the Unitywater Connections Policy, the development is connected to the reticulated water supply system in accordance with the South East Queensland Water Supply and Sewerage Design and Construction Code and the relevant Water Service Association of Australia (WSAA) codes and standards.</p>
<p>PO25</p> <p>The development is provided with constructed and dedicated road access.</p>	<p>E24.2</p> <p>Where not in an existing connections area or a future connections area as detailed in the Unitywater Connections Policy, the development is provided with an adequate water supply of 45,000 litres by way of on-site storage which provides equivalent water quality and reliability to support the use requirements of the development.</p> <p>No example provided.</p>

Access	
<p>PO26</p> <p>Development provides functional and integrated car parking and vehicle access, that:</p> <ol style="list-style-type: none"> prioritises the movement and safety of pedestrians between car parking areas at the rear through to the 'main street' and the entrance to the building (e.g. rear entry, arcade etc.); provides safety and security of people and property at all times; does not impede active transport options; does not impact on the safe and efficient movement of traffic external to the site; where possible vehicle access points are consolidated and shared with adjoining sites. <p>Note - Refer to Planning scheme policy - Centre and neighbourhood hub design for details and examples.</p>	<p>No example provided.</p>
<p>PO27</p> <p>Where required, access easements contain a driveway and provision for services appropriate to the use. The easement covers all works associated with the access in accordance with Planning scheme policy - Integrated design.</p>	<p>No example provided.</p>
<p>PO28</p>	<p>E28.1</p>

6 Zones

<p>The layout of the development does not compromise:</p> <ol style="list-style-type: none"> a. the development of the road network in the area; b. the function or safety of the road network; c. the capacity of the road network. <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p>	<p>Direct vehicle access for residential development does not occur from arterial or sub-arterial roads or a motorway.</p> <p>Editor's note - Residential developments should consider amalgamation with the lot to the rear and gaining access via a laneway.</p> <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p> <p>E28.2</p> <p>The development provides for the extension of the road network in the area in accordance with Council's road network planning.</p> <p>E28.3</p> <p>The development does not compromise future road widening of frontage roads in accordance with the relevant standard and Council's road planning.</p> <p>E28.4</p> <p>The lot development layout allows forward vehicular access to and from the site.</p>
<p>PO29</p> <p>Safe access is provided for all vehicles required to access the site.</p>	<p>E29.1</p> <p>Site access and driveways are designed and, located and constructed in accordance with:</p> <ol style="list-style-type: none"> a. where for a Council-controlled road and associated with a Dwelling house: <ol style="list-style-type: none"> i. Planning scheme policy - Integrated design; b. Where for a Council-controlled road; and not associated with a Dwelling house: <ol style="list-style-type: none"> i. AS/NZS2890.1 section 3; or Parking facilities Part 1: Off street car parking; ii. AS 2890.2 - Parking facilities Part 2: Off-street commercial vehicle facilities; iii. Planning scheme policy - Integrated design; iv. Schedule 8 - Service vehicle requirements; c. Where for a State-Controlled road, the Safe Intersection Sight Distance requirements in AustR roads and the appropriate IPWEAQ standard drawings, or a copy of a Transport Infrastructure Act 1994, section 62 approval.

	<p>E29.2</p> <p>Internal driveways, car parks and access ways are designed and constructed with a sealed pavement and in accordance with:</p> <ol style="list-style-type: none"> AS/NZS 2890.1 Parking Facilities Part 1: Off street car parking; AS 2890.2 Parking Facilities Part 2: Off street commercial vehicle facilities; and the relevant standards in Planning scheme policy - Integrated design; and Schedule 8 - Service vehicle requirements. <p>Note - This includes queue lengths (refer to Schedule 8 - Service vehicle requirements), pavement widths and construction.</p>
	<p>E29.3</p> <p>Access driveways, manoeuvring areas and loading facilities are sealed and provide for service vehicles listed in Schedule 8 - Service vehicle requirements for the relevant use. The on-site manoeuvring is to be in accordance with Schedule 8 - Service vehicle requirements.</p>
<p>PO</p> <p>Sealed and flood free road access during the minor storm event is available to the site from the nearest arterial or sub-arterial road.</p> <p>Editor's Note - Where associated with a State-controlled road, further requirements may apply, and approvals may be required from the Department of Transport and Main Roads.</p>	<p>E</p> <p>Landscaping (including shade trees) is provided within car parks in accordance with Planning scheme policy - Integrated design.</p> <p>E</p> <p>Roads or streets giving access to the development from the nearest arterial or sub-arterial road are flood free during the minor storm event and are sealed.</p> <p>Note - The road network is mapped on Overlay Map - Road Hierarchy.</p>
<p>PO</p> <p>Roads which provide access to the site from an arterial or sub-arterial road remain trafficable during major storm events without flooding or impacting upon residential properties or other premises.</p>	<p>E</p> <p>Access roads to the development have sufficient longitudinal and cross drainage to remain safely trafficable during major storm (1% AEP) events.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - Refer to QUDM for requirements regarding trafficability.</p>

Pipe Diameter	Minimum easement width (excluding access requirements)						
Stormwater pipe up to 825mm diameter	3.0m						
Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter	4.0m						

6 Zones

<p>Note - In order to achieve a lawful point of discharge, stormwater easements may also be required over temporary drainage channels/infrastructure where stormwater discharges to a balance lot prior to entering Council's stormwater drainage system.</p>	<table border="1" data-bbox="810 203 1468 360"> <tr> <td data-bbox="815 215 1134 349">Stormwater pipe greater than 825mm diameter</td> <td data-bbox="1139 215 1458 349">Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).</td> </tr> </table> <p>Note - Additional easement width may be required in certain circumstances in order to facilitate maintenance access to the stormwater system.</p> <p>Note - Refer to Planning Scheme Policy - Integrated Design (Appendix C) for easement requirements over open channels.</p>	Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).
Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).		
<p>PO</p> <p>Stormwater management facilities (excluding outlets) are located outside of riparian areas and prevent increased channel bed and bank erosion.</p>	<p>No example provided.</p>		
<p>PO</p> <p>Council is provided with accurate representations of the completed stormwater management works within residential developments.</p>	<p>E</p> <p>"As Built" drawings and specifications of the stormwater management devices certified by an RPEQ is provided.</p> <p>Note - Documentation is to include:</p> <ol style="list-style-type: none"> photographic evidence and inspection date of the installation of approved underdrainage; copy of the bioretention filter media delivery dockets/quality certificates confirming the materials comply with specifications in the approved Stormwater Management Plan; date of the final inspection. 		

Site works and construction management	
<p>PO35</p> <p>The site and any existing structures are maintained in a tidy and safe condition.</p>	<p>No example provided.</p>
<p>PO36</p> <p>All works on-site are managed to:</p> <ol style="list-style-type: none"> minimise as far as practicable, impacts on adjoining or adjacent premises and the streetscape in regard to erosion and sedimentation, dust, noise, safety and light; minimise as far as possible, impacts on the natural environment; ensure stormwater discharge is managed in a manner that does not cause actionable nuisance or annoyance to any person or premises; 	<p>E36.1</p> <p>Works incorporate temporary stormwater runoff, erosion and sediment controls and trash traps removal devices designed in accordance with the Urban Stormwater Quality Planning Guidelines, State Planning Policy, Schedule 10 - Stormwater management design objectives, Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design, including but not limited to the following:</p> <ol style="list-style-type: none"> stormwater is not discharged to adjacent properties in a manner that differs significantly from pre-existing conditions;

<p>d. avoid adverse impacts on street trees and their critical root zone.</p>	<p>b. stormwater discharged to adjoining and downstream properties does not cause scour and or erosion of any kind;</p> <p>c. stormwater discharge rates do not exceed pre-existing conditions;</p> <p>d. the 10% AEP storm event is the minimum design storm for all temporary diversion drains; and</p> <p>e. the 50% AEP storm event is the minimum design storm for all silt barriers and sedimentation basins.</p> <p>f. minimum design storm for all temporary diversion drains and sedimentation basins in accordance with Schedule 10 - Stormwater management design objectives;</p> <p>g. ponding or concentration of stormwater does not occur in adjoining properties.</p> <p>E36.2</p> <p>Stormwater runoff, erosion and sediment controls are constructed in accordance with Planning scheme policy - Integrated design (Appendix C) prior to commencement of any clearing or earthworks and are maintained and adjusted as necessary at all times to ensure their ongoing effectiveness.</p> <p>Note - The measures are adjusted on-site to maximise their effectiveness.</p> <p>E36.3</p> <p>The completed earthworks area is stabilised using turf, established grass seeding, mulch or sprayed stabilisation techniques to control erosion and sediment and dust from leaving the property.</p> <p>E36.4</p> <p>Where works are proposed in proximity to an existing street tree, an inspection and a root management plan is undertaken by a qualified arborist which demonstrates and ensures that no permanent damage is caused to the tree.</p> <p>Existing street trees are protected and not damaged during works.</p> <p>Note - Where development occurs in the tree protection zone, measures and techniques as detailed in Australian Standard AS 4970 Protection of trees on development sites are adopted and implemented.</p>
<p>PO37</p>	<p>E37</p>

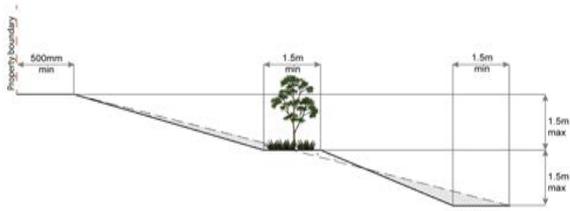

6 Zones

<p>Dust suppression measures are implemented during soil disturbances and construction works to protect nearby premises from unreasonable dust impacts.</p>	<p>No dust emissions extend beyond the boundaries of the site during soil disturbances and construction works.</p>
<p>PO38</p> <p>All development works on-site and including the transportation of material to and from the site are managed to not negatively impact the existing road network, the amenity of the surrounding area or the streetscape.</p> <p>Note – Where the amount of imported or exported material is greater than 50m³, a haulage route must be identified and approved by Council.</p> <p>Note - A Traffic Management Plan may be required to demonstrate compliance with this PO. A Traffic Management Plan is to be prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD).</p> <p>Note - A haulage route must be identified and approved by Council where imported or exported material is transported to the site via a road of Local Collector standard or less, and:</p> <ol style="list-style-type: none"> the aggregate volume of imported or exported material is greater than 1000m³; or the aggregate volume of imported or exported material is greater than 200m³ per day; or the proposed haulage route involves a vulnerable land use or shopping centre. <p>Note - A dilapidation report (including photographs) may be required for the haulage route to demonstrate compliance with this PO.</p> <p>Editor's note - Where associated with a State-controlled road, further requirements may apply, and approval may be required from the Department of Transport and Main Roads.</p>	<p>E38.1</p> <p>Construction traffic including contractor car parking is controlled in accordance with a traffic management plan, prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) to ensure all traffic movements to and from the site are safe.</p> <p>E38.2</p> <p>All contractor car parking is either provided on the development site, or on an alternative site in the general locality which has been set aside for car parking. Contractors vehicles are generally not to be parked in existing roads.</p> <p>Note – A Traffic Management Plan may be required for the site in accordance with the Manual of Uniform Traffic Control Devices (MUTCD).</p> <p>E38.3</p> <p>Any material dropped, deposited or spilled on the road(s) as a result of construction processes associated with the site are to be cleaned at all times.</p> <p>E</p> <p>Construction traffic to and from the development site uses the highest classification streets or roads where a choice of access routes is available. Haul routes for the transport of imported or spoil material and gravel pavement material along Council roads below sub-arterial standard must be approved routes.</p> <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p> <p>Note - A dilapidation report may be required to demonstrate compliance with this E.</p> <p>E</p> <p>Where works are carried out in existing roads, the works must be undertaken so that the existing roads are maintained in a safe and useable condition. Practical access for residents, visitors and services (including postal deliveries and refuse collection) is retained to existing lots during the construction period and after completion of the works.</p>

	<p>Note - A traffic control plan prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) will be required for any works that will affect access, traffic movements or traffic safety in existing roads.</p>
<p>PO39</p> <p>All disturbed areas are to be progressively stabilised during construction and the entire site rehabilitated and substantially stabilised at the completion of construction.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details.</p>	<p>E</p> <p>Access to the development site is obtained via an existing lawful access point.</p> <p>E39</p> <p>At completion of construction all disturbed areas of the site are to be:</p> <ol style="list-style-type: none"> topsoiled with a minimum compacted thickness of fifty (50) millimetres; grassed stabilised using turf, established grass seeding, mulch or sprayed stabilisation techniques. <p>Note - These areas are to be maintained during any maintenance period to maximise grass coverage from grass seeding of these areas:</p>
<p>PO</p> <p>Earthworks are undertaken to ensure that soil disturbances are staged into manageable areas.</p> <p>Note - A site specific Erosion and Sediment Control Plan (ESCP) will be required to demonstrate compliance with this PO. An ECP is to be prepared in accordance with Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design (Appendix C).</p>	<p>E</p> <p>Soil disturbances are staged into manageable areas of not greater than 3.5 ha.</p>
<p>PO40</p> <p>The clearing of vegetation on-site:</p> <ol style="list-style-type: none"> is limited to the area of infrastructure works, building areas and other necessary areas for the works; and includes the removal of declared weeds and other materials which are detrimental to the intended use of the land; is disposed of in a manner which minimises nuisance and annoyance to existing premises. <p>Note - No burning of cleared vegetation is permitted.</p>	<p>E40.1</p> <p>All native vegetation to be retained on-site is temporarily fenced or protected prior to and during development works.</p> <p>Note - No parking of vehicles of or storage of machinery or goods is to occur in these areas during development works.</p> <p>E40.2</p> <p>Disposal of materials is managed in one or more of the following ways:</p>

6 Zones

	<p>a. all cleared vegetation, declared weeds, stumps, rubbish, car bodies, scrap metal and the like are removed and disposed of in a Council land fill facility; or</p> <p>b. all native vegetation with a diameter below 400mm is to be chipped and stored on-site.</p> <p>Note - The chipped vegetation must be stored in an approved location; preferably a park or public land.</p>
<p>PO</p> <p>All development works are carried out at times which minimise noise impacts to residents.</p>	<p>E</p> <p>All development works are carried out within the following times:</p> <p>a. Monday to Saturday (other than public holidays) between 6:30am and 6:30pm on the same day;</p> <p>b. no work is to be carried out on Sundays or public holidays.</p> <p>Note - Work outside the above hours may be approved (in writing) where it can be demonstrated that the work will not cause significant inconvenience or disruption to the public, or the work is unlikely to cause annoyance or inconvenience to occupants of adjacent properties.</p>
<p>PO41</p> <p>Any alteration or relocation in connection with or arising from the development to any service, installation, plant, equipment or other item belonging to or under the control of the telecommunications authority, electricity authorities, the Council or other person engaged in the provision of public utility services is to be carried with the development and at no cost to Council.</p>	<p>No example provided.</p>
<p>Earthworks</p>	
<p>PO42</p> <p>On-site earthworks are designed to consider the visual and amenity impact as they relate to:</p> <p>a. the natural topographical features of the site;</p> <p>b. short and long-term slope stability;</p> <p>c. soft or compressible foundation soils;</p> <p>d. reactive soils;</p> <p>e. low density or potentially collapsing soils;</p>	<p>E42.1</p> <p>All cut and fill batters are provided with appropriate scour, erosion protection and run-off control measures including catch drains at the top of batters and lined batter drains as necessary.</p> <hr/> <p>E42.2</p> <p>Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance of steep rock slopes and batters.</p> <hr/> <p>E42.3</p>

<p>f. existing fill and soil contamination that may exist on-site;</p> <p>g. the stability and maintenance of steep reek slopes and batters;</p> <p>h. excavation (cut) and fill and impacts on the amenity of adjoining lots (e.g. residential).</p> <p>Note – Filling or excavation works are to be completed within six months of the commencement date.</p>	<p>Inspection and certification of steep reek slopes and batters is required by a suitably qualified and experienced RPEQ.</p> <p>E42.4</p> <p>All filling or excavation is contained on-site and is free draining.</p> <p>E42.5</p> <p>All fill placed on-site is:</p> <p>a. limited to that area required for the necessary for the approved use;</p> <p>b. clean and uncontaminated (i.e. no building waste, concrete, green waste, actual acid sulfate soils, potential acid sulfate soils or contaminated material etc.) material is used as fill).</p> <p>E42.6</p> <p>The site is prepared and the fill placed on-site in accordance with AS3798.</p> <p>Note - The fill is to be inspected and tested in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p>
<p>PO43</p> <p>Embankments are stepped, terraced and landscaped to not adversely impact on the visual amenity of the surrounding area.</p>	<p>E43</p> <p>Any embankments more than 1.5 metres in height are stepped, terraced and landscaped.</p> <p>Figure - Embankment</p> 
<p>PO44</p> <p>Filling or excavation is undertaken in a manner that:</p>	<p>E44.1</p> <p>No filling or excavation is undertaken in an easement issued in favour of Council or a public sector entity.</p>

6 Zones

<p>a. does not adversely impact on a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land;</p> <p>b. does not preclude reasonable access to a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p>	<p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p> <p>E44.2</p> <p>Filling or excavation that would result in any of the following is not carried out on-site:</p> <p>a. a reduction in cover over any Council or public sector entity infrastructure service to less than 600mm;</p> <p>b. an increase in finished surface grade over, or within 1.5m on each side of, the Council or public sector entity infrastructure above that which existed prior to the earthworks being undertaken;</p> <p>c. prevent reasonable access to Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the site for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity as is defined in the Sustainable Planning Schedule 2 of the Act 2009.</p>
<p>PO45</p> <p>Filling or excavation does not result in land instability.</p> <p>Note - Steep rock slopes and batters are inspected and certified for long-term stability by a suitably qualified and experienced geotechnical engineer with RPEQ qualifications. Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance.</p>	<p>No example provided.</p>
<p>PO46</p> <p>Development Filling or excavation does not result in:</p> <p>a. adverse impacts on the hydrological and hydraulic capacity of the waterway or floodway;</p> <p>b. increased flood inundation outside the site;</p> <p>c. any reduction in the flood storage capacity in the floodway;</p> <p>d. and any clearing of native vegetation.</p> <p>Note - To demonstrate compliance with this outcome, Planning Scheme Policy - Stormwater Management provides guidance on the preparation of a site based stormwater management plan by a suitably qualified professional. Refer to Planning scheme policy - Integrated design for guidance on infrastructure design and modelling requirements.</p>	<p>No example provided.</p>
<p>PO</p>	<p>E</p> <p>Filling and excavation undertaken on the development site are shaped in a manner which does not:</p>

<p>Filling or excavation on the development site is undertaken in a manner which does not create or accentuate problems associated with stormwater flows and drainage systems on land adjoining the site.</p>	<ul style="list-style-type: none"> a. prevent stormwater surface flow which, prior to commencement of the earthworks, passed onto the development site, from entering the land; or b. redirect stormwater surface flow away from existing flow paths; or c. divert stormwater surface flow onto adjacent land, (other than a road), in a manner which: <ul style="list-style-type: none"> i. concentrates the flow; or ii. increases the flow rates of stormwater over the affected section of the adjacent land above the situation which existed prior to the diversion; or iii. causes actionable nuisance to any person, property or premises.
---	---

Retaining walls and structures	
<p>PO47</p> <p>All earth retaining structures provide a positive interface with the streetscape and minimise impacts on the amenity of adjoining residents.</p> <p>Note - Refer to Planning scheme policy - Residential design for guidance on how to achieve compliance with this performance outcome.</p>	<p>E47</p> <p>Earth-retaining structures:-</p> <ul style="list-style-type: none"> a. are not constructed of boulder rocks or timber; b. where height is no greater than 900mm, are provided in accordance with Figure - Retaining on a boundary; <p style="text-align: center;">Figure - Retaining on boundary</p>  <ul style="list-style-type: none"> c. where height is greater than 900mm but no greater than 1.5m, are to be setback at least the equivalent height of the retaining structure from any property boundary; d. where height is greater than 1.5m, are to be setback and stepped 1.5m vertical: 1.5m horizontal; terraced, landscaped and drained as shown below. <p style="text-align: center;">Figure - Gut</p>

6 Zones

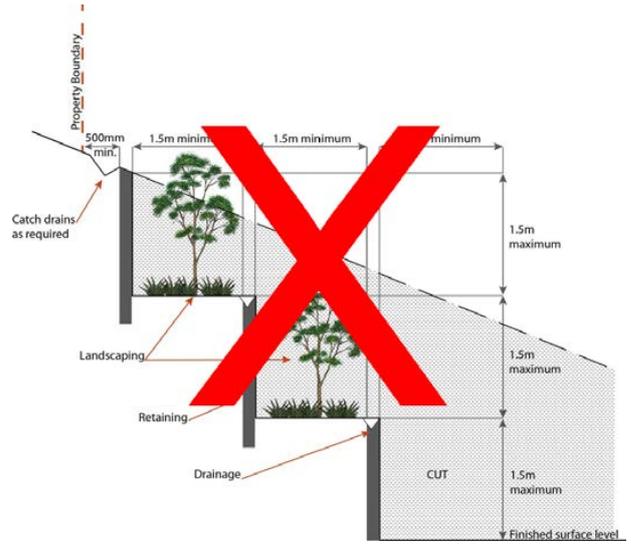

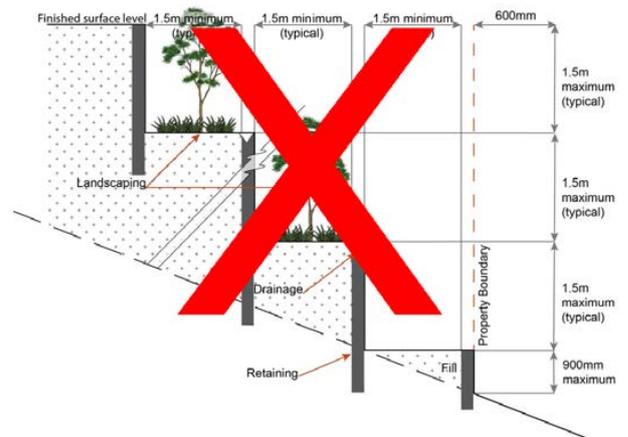

Figure--Fill

Filling or excavation does not:

- a. involve a change in level of more than 1.0m relative to natural ground level;

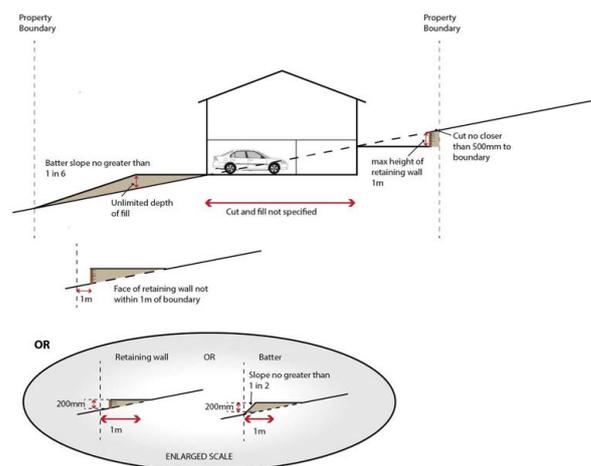

OR

- b. necessitate the construction of a freestanding retaining wall exceeding 1.0m in height relative to finished ground level;

- c. result in the top of any cut batter, or the exposed face of any freestanding retaining wall supporting that cut, being closer than 500mm to a property boundary;
- d. result in the toe of any fill batter, or exposed face of any freestanding retaining wall supporting that fill, being closer than 1.0m to a property boundary unless:
 - i. the depth of fill within the 1.0m strip does not exceed 200mm relative to natural ground level; or
 - ii. the batter slope within that 1.0m strip is no steeper than 1V to 2H.

THE NEW FIGURE BELOW IS PROPOSED AS PART OF THIS AMENDMENT

Figure - Filling or Excavation

PO

All earth retaining structures are to be certified as being designed and constructed in accordance with relevant Australian Standards and Building Code requirements.

E

Retaining walls are designed and certified by a RPEQ so that:

- a. the minimum design life (the period assumed in design for which a structure or structural element is required to perform its intended purpose without replacement or major structural repairs) for the earth retaining structure is that specified in Australian Standard AS 4678 Earth-retaining structures;
- b. earth retaining structures within the land and around areas of cut on or near the boundaries of the site must be designed to allow for live and dead loads associated with the land/premise's current occupancy and use;

6 Zones

	<p>c. where the adjoining land use rights or zoning allows for industrial uses a minimum live load of 25kPA must be allowed in the design of the retaining structure for these adjoining premises.</p> <p>Note - Retaining walls will only be approved following submission of a full detailed design certified by a RPEQ.</p>
--	--

Fire Services

Note - The provisions under this heading only apply if:

- a. the development is for, or incorporates:
 - i. reconfiguring a lot for a community title scheme creating 1 or more vacant lots; or
 - ii. material change of use for 2 or more sole occupancy units on the same lot, or within the same community titles scheme; or
 - iii. material change of use for a Tourist park⁽⁸⁴⁾ with accommodation in the form of caravans or tents; or
 - iv. material change of use for outdoor sales⁽⁵⁴⁾, outdoor processing or outdoor storage where involving combustible materials.

AND

- b. none of the following exceptions apply:
 - i. the distributor-retailer for the area has indicated, in its netserv plan, that the premises will not be served by that entity's reticulated water supply; or
 - ii. every part of the development site is within 60m walking distance of an existing fire hydrant on the distributor-retailer's reticulated water supply network, measured around all obstructions, either on or adjacent to the site.

Note - The provisions under this heading do not apply to buildings that are required by the Building Code of Australia to have a fire hydrant system complying with Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations or other fire fighting facilities which provide equivalent protection.

<p>PO48</p> <p>Development incorporates a fire fighting system that:</p> <ul style="list-style-type: none"> a. satisfies the reasonable needs of the fire fighting entity for the area; b. is appropriate for the size, shape and topography of the development and its surrounds; c. is compatible with the operational equipment available to the fire fighting entity for the area; d. considers the fire hazard inherent in the materials comprising the development and their proximity to one another; e. considers the fire hazard inherent in the surrounds to the development site; f. is maintained in effective operating order. <p>Note - The Queensland Fire and Emergency Services is the entity currently providing the fire fighting function for the urban areas of the Moreton Bay Region.</p>	<p>E48.1</p> <p>External fire hydrant facilities are provided on site to the standard prescribed under the relevant parts of <i>Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations</i>.</p> <p>Note - For this requirement for accepted development, the following are the relevant parts of AS 2419.1 (2005) that may be applicable:</p> <ul style="list-style-type: none"> a. in regard to the form of any fire hydrant - Part 8.5 and Part 3.2.2.1, with the exception that for Tourist parks⁽⁸⁴⁾ or development comprised solely of dwellings and their associated outbuildings, single outlet above-ground hydrants or suitably signposted in-ground hydrants would be an acceptable alternative; b. in regard to the general locational requirements for fire hydrants - Part 3.2.2.2 (a), (e), (f), (g) and (h) as well as Appendix B of AS 2419.1 (2005); c. in regard to the proximity of hydrants to buildings and other facilities - Part 3.2.2.2 (b), (c) and (d), with the exception that: <ul style="list-style-type: none"> i. for dwellings and their associated outbuildings, hydrant coverage need only extend to the roof and external walls of those buildings; ii. for caravans and tents, hydrant coverage need only extend to the roof of those tents and caravans; iii. for outdoor sales⁽⁵⁴⁾, processing or storage facilities, hydrant coverage is required across the entire area of
---	--

	<p>the outdoor sales⁽⁵⁴⁾, outdoor processing and outdoor storage facilities;</p> <p>d. in regard to fire hydrant accessibility and clearance requirements - Part 3.5 and, where applicable, Part 3.6.</p> <hr/> <p>E48.2</p> <p>A continuous path of travel having the following characteristics is provided between the vehicle access point to the site and each external fire hydrant and hydrant booster point on the land:</p> <p>a. an unobstructed width of no less than 3.5m;</p> <p>b. an unobstructed height of no less than 4.8m;</p> <p>c. constructed to be readily traversed by a 17 tonne HRV fire brigade pumping appliance;</p> <p>d. an area for a fire brigade pumping appliance to stand within 20m of each fire hydrant and 8m of each hydrant booster point.</p> <hr/> <p>E48.3</p> <p>On-site fire hydrant facilities are maintained in effective operating order in a manner prescribed in <i>Australian Standard AS1851 (2012) – Routine service of fire protection systems and equipment</i>.</p>
<p>PO49</p> <p>On-site fire hydrants that are external to buildings, as well as the available fire fighting appliance access routes to those hydrants, can be readily identified at all times from, or at, the vehicular entry point to the development site.</p>	<p>E49</p> <p>For development that contains on-site fire hydrants external to buildings:</p> <p>a. those external hydrants can be seen from the vehicular entry point to the site; or</p> <p>b. a sign identifying the following is provided at the vehicular entry point to the site:</p> <p>i. the overall layout of the development (to scale);</p> <p>ii. internal road names (where used);</p> <p>iii. all communal facilities (where provided);</p> <p>iv. the reception area and on-site manager's office (where provided);</p> <p>v. external hydrants and hydrant booster points;</p> <p>vi. physical constraints within the internal roadway system which would restrict access by fire fighting appliances to external hydrants and hydrant booster points.</p> <p>Note - The sign prescribed above, and the graphics used are to be:</p>

6 Zones

	<p>a. in a form;</p> <p>b. of a size;</p> <p>c. illuminated to a level;</p> <p>which allows the information on the sign to be readily understood, at all times, by a person in a fire fighting appliance up to 4.5m from the sign.</p>
<p>PO50</p> <p>Each on-site fire hydrant that is external to a building is signposted in a way that enables it to be readily identified at all times by the occupants of any firefighting appliance traversing the development site.</p>	<p>E50</p> <p>For development that contains on-site fire hydrants external to buildings, those hydrants are identified by way of marker posts and raised reflective pavement markers in the manner prescribed in the technical note <i>Fire hydrant indication system</i> produced by the Queensland Department of Transport and Main Roads.</p> <p>Note - Technical note Fire hydrant indication system is available on the website of the Queensland Department of Transport and Main Roads.</p>
Use specific criteria	
Cemetery⁽¹²⁾	
<p>PO51</p> <p>The columbarium is:</p> <p>a. for a maximum of 100 spaces;</p> <p>b. no greater than 2m in height;</p> <p>c. only for interment of members of the Confraternity;</p> <p>d. compatible with the scenic, ecological and rural qualities and function of the surrounding landscape.</p>	No example provided.
Child care centre⁽¹³⁾	
<p>PO52</p> <p>Development is:</p> <p>a. located in the School Area on Map 1 - Abbey use areas;</p> <p>b. setback 20m from the road frontage;</p> <p>c. accessed by shared vehicle access points and access ways with the school;</p> <p>d. compatible with the scenic, ecological or rural qualities and function of the surrounding landscape.</p>	No example provided.

Dwelling house⁽²²⁾	
<p>PO53</p> <p>Development is:</p> <ul style="list-style-type: none"> a. separated from other buildings by a minimum distance of 1.5m; b. setback 50m from all property boundaries; c. only used to accommodate members of the Confraternity; d. compatible with the scenic, ecological or rural qualities and function of the surrounding landscape. 	No example provided.
Dwelling house⁽²²⁾ where including a secondary dwelling	
<p>PO54</p> <p>Dwelling house⁽²²⁾ where including a secondary dwelling, the secondary dwelling:</p> <ul style="list-style-type: none"> a. remains subordinate to the principal dwelling; b. retains its connection with the principal dwelling by: <ul style="list-style-type: none"> i. avoiding the establishment of a separate access; ii. being located within 20m of the principal Dwelling house⁽²²⁾; iii. being a size, scale and design that is not visually dominant, overbearing and inconsistent with the low density, open area character of the precinct. 	<p>E54</p> <p>Dwelling house⁽²²⁾ where including a secondary dwelling, the secondary dwelling:</p> <ul style="list-style-type: none"> a. has a maximum GFA of 100m²; b. obtains access from the existing driveway giving access to the Dwelling house⁽²²⁾; c. is setback 50m from all property boundaries; d. is located within 20m of the principal Dwelling house⁽²²⁾; e. is separated from other dwellings by a minimum distance of 1.5m; f. is only used to accommodate members of the Confraternity.
Educational establishment⁽²⁴⁾	
<p>PO55</p> <p>Development is:</p> <ul style="list-style-type: none"> a. located in the School Area on Map 1 - Abbey use areas; b. compatible with the scenic, ecological or rural qualities and function of the surrounding landscape. 	No example provided.
Home based business⁽³⁵⁾	
<p>PO56</p> <p>Development:</p>	No example provided.

6 Zones

<ul style="list-style-type: none"> a. is subordinate in size and function of the primary use of the dwelling as a permanent residence; b. does not adversely impact upon the low density, low intensity built form and open area character and amenity of the precinct; c. ensures the nature, scale and intensity of the home based business⁽³⁵⁾ does not result in adverse visual or nuisance impacts on the residents in adjoining or nearby dwellings; d. results in a vehicular and pedestrian traffic generation consistent with that reasonably expected in the surrounding low density, low intensity built form and open area character and amenity of the surrounding rural area; e. ensures service and delivery vehicles do not negatively impact the amenity of the area. 	
<p>PO57</p> <p>Home based business⁽³⁵⁾ does not result in:</p> <ul style="list-style-type: none"> a. an adverse visual, odour, particle drift or noise nuisance impact on the residents in adjoining or nearby dwellings; b. an adverse impact upon the low intensity and open area character and amenity anticipated in the locality; c. the establishment of vehicle servicing or major repairs, spray painting, panel beating or any environmentally relevant activity (ERA). 	<p>E57.1</p> <p>Home based business(s)⁽³⁵⁾ do not comprise of vehicle servicing or major repairs, including spray painting or panel beating is carried out on-site.</p> <hr/> <p>E57.2</p> <p>Home based business(s)⁽³⁵⁾ do not comprise an environmentally relevant activity (ERA) as defined in the <i>Environmental Protection Regulation 2008</i>.</p> <hr/> <p>E57.3</p> <p>Home base business(s) do not generate noise that is audible from the boundary of the site or premise.</p>
<p>PO58</p> <p>On-site display and sale component is limited to the activities undertaken on the site and does not result in:</p> <ul style="list-style-type: none"> a. the display and sale of goods being viewed from beyond the site; b. the overall development on the site having a predominantly commercial appearance. 	<p>E58.1</p> <p>Only goods grown, produced or manufactured on-site are sold from the site.</p> <hr/> <p>E58.2</p> <p>Display of goods grown, produced or manufactured on-site are contained within a dwelling or on-site structure and the display of goods is not visible from boundary of the site.</p>
<p>PO59</p> <p>The hours of operation do not cause a nuisance or have a significant adverse impact on the amenity of residents on adjoining and surrounding properties.</p>	<p>E59</p> <p>The hours of operation do not exceed 8:00am to 6:00pm, Monday to Saturday and are not open to the public on Sunday's, Christmas Day, Good Friday and Anzac Day.</p>

	Note - Office ⁽⁵³⁾ or administrative activities that do not generate non-residents visiting the site, such as book-keeping and computer work, may operate outside the hours of operation.
<p>PO60</p> <p>Bed and breakfast and farmstays are of a size and scale that:</p> <ol style="list-style-type: none"> are consistent with the low intensity and open area character and amenity of the surrounding rural area; ensures acceptable levels of privacy and amenity for the residents in adjoining or nearby dwellings. 	<p>E60</p> <p>For bed and breakfast and farmstays:</p> <ol style="list-style-type: none"> overnight accommodation is provided in the Dwelling house⁽²²⁾ of the accommodation operator. maximum 4 bedrooms are provided for a maximum of 10 guests. meals are served to paying guests only. rooms do not contain food preparation facilities.
Major electricity infrastructure⁽⁴³⁾, Substation⁽⁸⁰⁾ and Utility installation⁽⁸⁶⁾	
<p>PO61</p> <p>The development does not have an adverse impact on the visual amenity of a locality and is:</p> <ol style="list-style-type: none"> high quality design and construction; visually integrated with the surrounding area; not visually dominant or intrusive; located behind the main building line; below the level of the predominant tree canopy or the level of the surrounding buildings and structures; camouflaged through the use of colours and materials which blend into the landscape; treated to eliminate glare and reflectivity; landscaped; otherwise consistent with the amenity and character of the zone and surrounding area. 	<p>E61.1</p> <p>Development is designed to minimise surrounding land use conflicts by ensuring infrastructure, buildings, structures and other equipment:</p> <ol style="list-style-type: none"> are enclosed within buildings or structures; are located behind the main building line; have a similar height, bulk and scale to the surrounding fabric; have horizontal and vertical articulation applied to all exterior walls.
	<p>E61.2</p> <p>A minimum 3m wide strip of dense planting is provided around the outside of the fenced area, between the development and street frontage, side and rear boundaries.</p>
<p>PO62</p> <p>Infrastructure does not have an impact on pedestrian health and safety.</p>	<p>E62</p> <p>Access control arrangements:</p> <ol style="list-style-type: none"> do not create dead-ends or dark alleyways adjacent to the infrastructure; minimise the number and width of crossovers and entry points; provide safe vehicular access to the site; do not utilise barbed wire or razor wire.
<p>PO63</p> <p>All activities associated with the development occur within an environment incorporating sufficient controls to ensure the facility:</p>	<p>E63</p> <p>All equipment which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure noise emissions meet the objectives as set out in the Environmental Protection (Noise) Policy 2008.</p>

6 Zones

<ul style="list-style-type: none"> a. generates no audible sound at the site boundaries where in a residential setting; or b. meet the objectives as set out in the Environmental Protection (Noise) Policy 2008. 	
Market⁽⁴⁶⁾	
<p>PO64</p> <p>Markets⁽⁴⁶⁾ are located and laid out in a manner that provides for:</p> <ul style="list-style-type: none"> a. convenient pedestrian access and movement between proposed stalls; b. view corridors and legibility between stalls to adjacent roads, c. directional and information signage and surrounding uses; d. pedestrian comfort and safety, including the provision of public toilet facilities; e. waste and rubbish disposal facilities appropriate to the type and scale of the proposed market⁽⁴⁶⁾; f. emergency vehicle access to and within the market⁽⁴⁶⁾; g. safe, convenient and accessible car parking is provided to meet demand. 	No example provided.
Multiple dwelling⁽⁴⁹⁾	
<p>PO65</p> <p>Dwellings are:</p> <ul style="list-style-type: none"> a. provided in the form of detached buildings; b. limited on-site to a maximum of 20; c. separated by a minimum distance of 1.5m and maximum distance of 10m; d. setback 50m from all property boundaries; e. used only to accommodate members of the Confraternity; f. compatible with the scenic, ecological or rural qualities and function of the surrounding landscape. 	No example provided.
Rural workers' accommodation⁽⁷¹⁾	
<p>PO66</p> <p>Rural workers' accommodation⁽⁷¹⁾:</p>	<p>E66</p> <p>Rural workers' accommodation⁽⁷¹⁾:</p>

<ul style="list-style-type: none"> a. provides quarters only for staff employed to work the land for rural purposes; b. is compatible with the scenic, ecological or rural qualities and function of the surrounding landscape; c. is screened and landscaped in a manner so it is not visible from a road; d. does not result in adverse visual or noise nuisance on the residents in adjoining or nearby dwellings. 	<ul style="list-style-type: none"> a. is located in the Residential Area of Map 1 - Abbey use areas; b. is limited to 1 per lot; c. consists of 1 structure; d. accommodates no more than 12 rural workers; e. obtains access from the existing driveway giving access to the Dwelling house⁽²²⁾.
<p>Telecommunications facility⁽⁸¹⁾</p> <p>Editor's note - In accordance with the Federal legislation Telecommunications facilities⁽⁸¹⁾ must be constructed and operated in a manner that will not cause human exposure to electromagnetic radiation beyond the limits outlined in the Radiocommunications (Electromagnetic Radiation - Human Exposure) Standard 2003 and Radio Protection Standard for Maximum Exposure Levels to Radiofrequency Fields - 3Khz to 300Ghz.</p>	
<p>PO67</p> <p>Telecommunications facilities⁽⁸¹⁾ are co-located with existing telecommunications facilities⁽⁸¹⁾, Utility installation⁽⁸⁶⁾, Major electricity infrastructure⁽⁴³⁾ or Substation⁽⁸⁰⁾ if there is already a facility in the same coverage area.</p>	<p>E67.1</p> <p>New telecommunication facilities⁽⁸¹⁾ are co-located on existing towers with new equipment shelter and associated structures positioned adjacent to the existing shelters and structures.</p> <p>E67.2</p> <p>If not co-located with an existing facility, all co-location opportunities have been investigated and fully exhausted within a 2km radius of the site.</p>
<p>PO68</p> <p>A new Telecommunications facility⁽⁸¹⁾ is designed and constructed to ensure co-masting or co-siting with other carriers both on the tower or pole and at ground level is possible in the future.</p>	<p>E68</p> <p>A minimum area of 45m² is available at-ground-level to allow for additional equipment shelters and associated structures for the purpose of co-locating on the proposed facility.</p>
<p>PO69</p> <p>Telecommunications facilities⁽⁸¹⁾ do not conflict with lawful existing land uses both on and adjoining the site.</p>	<p>E69</p> <p>The development results in no net reduction in the minimum quantity and standard of landscaping, private or communal open space or car parking spaces required under the planning scheme or under an existing development approval.</p>
<p>PO70</p> <p>The Telecommunications facility⁽⁸¹⁾ does not have an adverse impact on the visual amenity of a locality and is:</p> <ul style="list-style-type: none"> a. high quality design and construction; b. visually integrated with the surrounding area; c. not visually dominant or intrusive; d. located behind the main building line; 	<p>E70.1</p> <p>Where in an urban area, the development does not protrude more than 5m above the level of the existing treeline, prominent ridgeline or building rooftops in the surrounding townscape.</p> <p>E70.2</p>

6 Zones

<p>e. below the level of the predominant tree canopy or the level of the surrounding buildings and structures;</p> <p>f. camouflaged through the use of colours and materials which blend into the landscape;</p> <p>g. treated to eliminate glare and reflectivity;</p> <p>h. landscaped;</p> <p>i. otherwise consistent with the amenity and character of the zone and surrounding area.</p>	<p>In all other areas towers do not exceed 35m in height.</p> <p>E70.3</p> <p>Towers, equipment shelters and associated structures are of a design, colour and material to:</p> <p>a. reduce recognition in the landscape;</p> <p>b. reduce glare and reflectivity.</p> <p>E70.4</p> <p>All structures and buildings are setback behind the main building line and a minimum of 10m from side and rear boundaries, except where in the Industry and Extractive industry zones, the minimum side and rear setback is 3m.</p> <p>Where there is no established building line the facility is located at the rear of the site.</p> <p>E70.5</p> <p>The facility is enclosed by security fencing or by other means to ensure public access is prohibited.</p> <p>E70.6</p> <p>A minimum 3m wide strip of dense planting is provided around the perimeter of the fenced area, between the facility and street frontage and adjoining uses.</p> <p>Note - Landscaping is provided in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person, to ensure compliance with Planning scheme policy - Integrated design.</p>
<p>PO71</p> <p>Lawful access is maintained to the site at all times that does not alter the amenity of the landscape or surrounding uses.</p>	<p>E71</p> <p>An Access and Landscape Plan demonstrates how 24 hour vehicular access will be obtained and maintained to the facility in a manner that is appropriate to the site's context.</p>
<p>PO72</p> <p>All activities associated with the development occur within an environment incorporating sufficient controls to ensure the facility generates no audible sound at the site boundaries where in a residential setting.</p>	<p>E72</p> <p>All equipment comprising the Telecommunications facility⁽⁸¹⁾ which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure no noise from this equipment can be heard, or felt at the site boundary.</p>
<p>Tourist attraction⁽⁸³⁾</p>	

<p>PO73</p> <p>Development:</p> <ul style="list-style-type: none"> a. is compatible with the scenic, ecological or rural qualities and function of the surrounding landscape; b. involving events, occur on an occasional and sporadic basis; c. provides convenient and safe pedestrian access and movement; d. is of a size, scale, intensity and design that minimises the potential for adverse noise, visual, privacy and traffic impacts on adjoining or nearby residents. 	No example provided.
Tourist park⁽⁸⁴⁾	
<p>PO74</p> <p>Development:</p> <ul style="list-style-type: none"> a. is not, or does not act, as a permanent place of residence for persons where a typical period of time does not exceed 3 consecutive months; b. is of a size, scale, intensity and design that minimises the potential for adverse noise, visual, privacy and traffic impacts on adjoining or nearby residents; c. is compatible with the scenic, ecological or rural qualities and function of the surrounding landscape; d. provides suitable open space, buildings and facilities that meet the recreational, social and amenity needs of people staying on-site; e. provides landscaping to buffer adjoining properties from the activities occurring on-site. 	No example provided.
Values and constraints criteria	
<p>Note - The relevant values and constraints criteria do not apply where the development is consistent with a current Development permit for Reconfiguring a lot or Material change of use or Operational work, where that approval has considered and addressed (e.g. through a development footprint plan (or similar in the case of Landslide hazard) or conditions of approval) the identified value or constraint under this planning scheme.</p>	
<p>Acid sulfate soils - (refer Overlay map - Acid sulfate soils to determine if the following assessment criteria apply)</p> <p>Note - To demonstrate achievement of the performance outcome, an Acid sulfate soils (ASS) investigation report and soil management plan is prepared by a qualified engineer. Guidance for the preparation an ASS investigation report and soil management plan is provided in Planning scheme policy - Acid sulfate soils.</p>	
PO75	E75

6 Zones

<p>Development avoids disturbing acid sulfate soils. Where development disturbs acid sulfate soils, development:</p> <ol style="list-style-type: none"> is managed to avoid or minimise the release of surface or groundwater flows containing acid and metal contaminants into the environment; protects the environmental and ecological values and health of receiving waters; protects buildings and infrastructure from the effects of acid sulfate soils. 	<p>Development does not involve:</p> <ol style="list-style-type: none"> excavation or otherwise removing of more than 100m³ of soil or sediment where below than 5m Australian Height datum AHD; or filling of land of more than 500m³ of material with an average depth of 0.5m or greater where below the 5m Australian Height datum AHD.
<p>Bushfire hazard (refer Overlay map - Bushfire hazard to determine if the following assessment criteria apply)</p> <p>Note - To demonstrate achievement of the performance outcomes, a bushfire management plan is prepared by a suitably qualified person. Guidance for the preparation of a bushfire management plan is provided in Planning scheme policy – Bushfire prone areas.</p> <p>Note - Unacceptable risk is defined as a situation where people or property are exposed to a predictable hazard event that may result in serious injury, loss of life, failure of community infrastructure, or property damage.</p>	
<p>PO76</p> <p>Development:</p> <ol style="list-style-type: none"> minimises the number of buildings and people working and living on a site exposed to bushfire risk; ensures the protection of life during the passage of a fire front; is located and designed to increase the chance of survival of buildings and structures during a bushfire; minimises bushfire risk from build up of fuels around buildings and structures; ensure safe and effective access for emergency services during a bushfire. 	<p>E76.1</p> <p>Buildings and structures are:</p> <ol style="list-style-type: none"> not located on a ridgeline; not located on land with a slope greater than 15% (see Overlay map - Landslide hazard); dwelling are located on east to south facing slopes. <p>E76.2</p> <p>Buildings and structures have contained within the site:</p> <ol style="list-style-type: none"> a separation from classified vegetation of 20m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater; a separation from low threat vegetation of 10m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater; a separation of no less than 10m between a fire fighting water supply extraction point and any classified vegetation, buildings and other roofed structures; an area suitable for a standard fire fighting appliance to stand within 3m of a fire fighting water supply extraction point; and an access path suitable for use by a standard fire fighting appliance having a formed width of at least 4m, a cross-fall of no greater than 5%, and a longitudinal gradient of no greater than 25%:

	<ul style="list-style-type: none"> i. to, and around, each building and other roofed structure; and ii. to each fire fighting water supply extraction point. <p>Note - The meaning of the terms classified vegetation and low threat vegetation as well as the method of calculating the bushfire attack level are as described in Australian Standard AS 3959</p>
<p>PO77</p> <p>Development and associated driveways and access ways:</p> <ul style="list-style-type: none"> a. avoid potential for entrapment during a bushfire; b. ensure safe and effective access for emergency services during a bushfire; c. enable safe evacuation for occupants of a site during a bushfire. 	<p>E77</p> <p>A length of driveway:</p> <ul style="list-style-type: none"> a. to a road does not exceed 100m between the most distant part of a building used for any purpose other than storage and the nearest part of a public road; b. has a maximum gradient no greater than 12.5%; c. have a minimum width of 3.5m; d. accommodate turning areas for fire fighting appliances in accordance with Qld Fire and Emergency Services' Fire Hydrant and Vehicle Access Guideline.
<p>PO78</p> <p>Development provides an adequate water supply for fire-fighting purposes.</p>	<p>E78</p> <ul style="list-style-type: none"> a. a reticulated water supply is provided by a distributor retailer for the area or; b. where not connected to a reticulated water supply, on-site fire fighting water storage containing not less than 10 000 litres (tanks with fire brigade tank fittings, swimming pools) is located within 10m of buildings and structures. c. Where a swimming pool is the nominated on-site fire fighting water storage source, vehicle access is provided to within 3m of that water storage source. d. Where a tank is the nominated on-site fire fighting water storage source, it includes: <ul style="list-style-type: none"> i. a hardstand area allowing medium rigid vehicles (15 tonne fire appliance) access within 6m of the tank; ii. fire brigade tank fittings, comprising 50mm ball valve and male camlock coupling and, if underground, an access hole of 200mm (minimum) to accommodate suction lines.
<p>PO79</p> <p>Development:</p> <ul style="list-style-type: none"> a. does not present unacceptable risk to people or environment due to the impact of bushfire on dangerous goods or combustible liquids; b. does not present danger or difficulty to emergency services for emergency response or evacuation. 	<p>E79</p> <p>Development does not involve the manufacture or storage of hazardous chemicals.</p>

6 Zones

<p>Editor's note - Unacceptable risk is defined as a situation where people or property are exposed to a predictable hazard event that may result in serious injury, loss of life, failure of community infrastructure, or property damage.</p>	
<p>Environmental areas (refer Overlay map - Environmental areas to determine if the following assessment criteria apply)</p> <p>Note – The following are excluded from the native vegetation clearing provisions of this planning scheme:</p> <ol style="list-style-type: none"> a. Clearing of native vegetation located within an approved development footprint; b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental Management and Conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence; e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes; f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council; g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens; h. Grazing of native pasture by stock; i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development. <p>Note - Definition for native vegetation is located in Schedule 1 Definitions.</p> <p>Note - Native vegetation subject to this criteria primarily comprises of matters of national environmental significance (MNES), matters of state environmental significance (MSES). They also comprise some matters of local environmental significance (MLES). A MLES is defined in Schedule 1.2, Administrative definitions. A list of the elements that apply to the mapped MSES and MLES is provided in Appendix 1 of the Planning scheme policy - Environmental areas.</p> <p>Editors' Note - The accuracy of overlay mapping can be challenged through the development application process (code assessable development) or by way of a planning scheme amendment. See Council's website for details.</p> <p>Note - To demonstrate achievement of the performance outcome, an ecological assessment, vegetation management plan and fauna management plan, as required, are prepared by a suitably qualified person. Guidance for the preparation of above mentioned reports is provided in Planning scheme policy - Environmental areas.</p>	
<p>Vegetation clearing, ecological value and connectivity</p>	
<p>PO80</p> <p>Development avoids locating in a High Value Area or a Value Offset Area. Where it is not practicable or reasonable for development to avoid establishing in these areas, development must ensure that:</p> <ol style="list-style-type: none"> a. the quality and integrity of the biodiversity and ecological values inherent to a High Value Area 	<p>No example provided.</p>

<p>and a Value Offset Area is maintained and not lost or degraded;</p> <p>b. on-site mitigation measures, mechanisms or processes are in place demonstrating the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area are maintained. For example, this can be achieved through replacement, restoration or rehabilitation planting as part of any proposed covenant, the development of a Vegetation Management Plan, a Fauna Management Plan, and any other on-site mitigation options identified in the Planning scheme policy - Environmental areas*.</p> <p>* Editor's note - This is not a requirement for an environmental offset under the Environmental Offsets Act 2014.</p>	
<p>PO81</p> <p>Development provides for safe, unimpeded, convenient and ongoing wildlife movement and establishes and maintains habitat connectivity by:</p> <p>a. retaining habitat trees;</p> <p>b. providing contiguous patches of habitat;</p> <p>c. provide replacement and rehabilitation planting to improve connectivity;</p> <p>d. avoiding the creation of fragmented and isolated patches of habitat;</p> <p>e. providing wildlife movement infrastructure.</p> <p>Editor's note - Wildlife movement infrastructure may include refuge poles, tree boulevarding, 'stepping stone' vegetation plantings, tunnels, appropriate wildlife fencing; culverts with ledges, underpasses, overpasses, land bridges and rope bridges. Further information is provided in Planning scheme policy – Environmental areas.</p>	No example provided.
Vegetation clearing and habitat protection	
<p>PO82</p> <p>Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected.</p>	No example provided.
<p>PO83</p> <p>Development does not result in the net loss or degradation of habitat value in a High Value Area or a Value Offset Area. Where development does result in the loss or degradation of habitat value, development will:</p> <p>a. rehabilitate, revegetate, restore and enhance an area to ensure it continues to function as a viable and healthy habitat area;</p>	No example provided.

6 Zones

<ul style="list-style-type: none"> b. provide replacement fauna nesting boxes in the event of habitat tree loss in accordance with Planning scheme policy - Environmental areas; c. undertake rehabilitation, revegetation and restoration in accordance with the South East Queensland Ecological Restoration Framework. 	
<p>PO84</p> <p>Development ensures safe, unimpeded, convenient and ongoing wildlife movement and habitat connectivity by:</p> <ul style="list-style-type: none"> a. providing contiguous patches of habitat; b. avoiding the creation of fragmented and isolated patches of habitat; c. providing wildlife movement infrastructure; d. providing replacement and rehabilitation planting to improve connectivity. 	<p>No example provided.</p>
<p>Vegetation clearing and soil resource stability</p>	
<p>PO85</p> <p>Development does not:</p> <ul style="list-style-type: none"> a. result in soil erosion or land degradation; b. leave cleared land exposed for an unreasonable period of time but is rehabilitated in a timely manner. 	<p>No example provided.</p>
<p>Vegetation clearing and water quality</p>	
<p>PO86</p> <p>Development maintains or improves the quality of groundwater and surface water within, and downstream, of a site by:</p> <ul style="list-style-type: none"> a. ensuring an effective vegetated buffers and setbacks from waterbodies is retained to achieve natural filtration and reduce sediment loads; b. avoiding or minimising changes to landforms to maintain hydrological water flows; c. adopting suitable measures to exclude livestock from entering a waterbody where a site is being used for animal husbandry⁽⁴⁾ and animal keeping⁽⁵⁾ activities. 	<p>No example provided.</p>
<p>PO87</p> <p>Development minimises adverse impacts of stormwater run-off on water quality by:</p> <ul style="list-style-type: none"> a. minimising flow velocity to reduce erosion; b. minimising hard surface areas; c. maximising the use of permeable surfaces; d. incorporating sediment retention devices; e. minimising channelled flow. 	<p>No example provided.</p>
<p>Vegetation clearing and access, edge effects and urban heat island effects</p>	

<p>PO88</p> <p>Development retains safe and convenient public access in a manner that does not result in the adverse edge effects or the loss or degradation of biodiversity values within the environment.</p>	<p>No example provided.</p>
<p>PO89</p> <p>Development minimises potential adverse 'edge effects' on ecological values by:</p> <ol style="list-style-type: none"> a. providing dense planting buffers of native vegetation between a development and environmental areas; b. retaining patches of native vegetation of greatest possible size where located between a development and environmental areas ; c. restoring, rehabilitating and increasing the size of existing patches of native vegetation; d. ensuring that buildings and access (public and vehicle) are setback as far as possible from environmental areas and corridors; e. landscaping with native plants of local origin. <p>Editor's note - Edge effects are factors of development that go to detrimentally affecting the composition and density of natural populations at the fringe of natural areas. Factors include weed invasion, pets, public and vehicle access, nutrient loads, noise and light pollution, increased fire frequency and changes in the groundwater and surface water flow.</p>	<p>No example provided.</p>
<p>PO90</p> <p>Development avoids adverse microclimate change and does not result in increased urban heat island effects. Adverse urban heat island effects are minimised by:</p> <ol style="list-style-type: none"> a. pervious surfaces; b. providing deeply planted vegetation buffers and green linkage opportunities; c. landscaping with local native plant species to achieve well-shaded urban places; d. increasing the service extent of the urban forest canopy. 	<p>No example provided.</p>
<p>Vegetation clearing and Matters of Local Environmental Significance (MLES) environmental offsets</p>	
<p>PO91</p> <p>Where development results in the unavoidable loss of native vegetation within a Value Offset Area MLES waterway buffer or a Value Offset Area MLES wetland buffer, an environmental offset is required in accordance with the environmental offset requirements identified in Planning scheme policy - Environmental areas.</p> <p>Editor's note - For MSES Koala Offsets, the environmental offset provisions in Schedule 11 of the Regulation, in combination with the requirements of the Environmental Offsets Act 2014, apply.</p>	<p>No example provided.</p>

6 Zones

Heritage and landscape character (refer Overlay map - Heritage and landscape character to determine if the following assessment criteria apply)

Note - To assist in demonstrating achievement of heritage performance outcomes, a Cultural heritage impact assessment report is prepared by a suitably qualified person verifying the proposed development is in accordance with The Australia ICOMOS Burra Charter.

Note - To assist in demonstrating achievement of this performance outcome, a Tree assessment report is prepared by a qualified arborist in accordance with Planning scheme policy – Heritage and landscape character. The Tree assessment report will also detail the measures adopted in accordance with AS 4970-2009 Protection of trees on development sites.

Note - Places, including sites, objects and buildings having local cultural heritage significance, are identified on Overlay map - Heritage and landscape character and listed in Schedule 1 of Planning scheme policy - Heritage and landscape character. Places also having cultural heritage significance at a State level and being entered in the Queensland Heritage Register, are also identified in Schedule 1 of Planning scheme policy - Heritage and landscape character.

PO92

Development will:

- a. not diminish or cause irreversible damage to the cultural heritage values present on the site, and associated with a heritage site, object or building;
- b. protect the fabric and setting of the heritage site, object or building;
- c. be consistent with the form, scale and style of the heritage site, object or building;
- d. utilise similar materials to those existing, or where this is not reasonable or practicable, neutral materials and finishes;
- e. incorporate complementary elements, detailing and ornamentation to those present on the heritage site, object or building;
- f. retain public access where this is currently provided.

E92

Development is for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value.

Note - A cultural heritage conservation management plan for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value is prepared in accordance with Planning scheme policy - Heritage and landscape character. The plan is sent to, and approved by Council prior to the commencement of any preservation, maintenance, repair and restoration works.

PO93

Demolition and removal is only considered where:

- a. a report prepared by a suitably qualified conservation architect or conservation engineer demonstrates that the building is structurally unsound and is not reasonably capable of economic repair; or
- b. demolition is confined to the removal of outbuildings, extensions and alterations that are not part of the original structure; or
- c. limited demolition is performed in the course of repairs, maintenance or restoration; or
- d. demolition is performed following a catastrophic event which substantially destroys the building or object.

No example provided.

PO94

Where development is occurring on land adjoining a site of cultural heritage value, the development is to be sympathetic to and consistent with the cultural heritage values present on the site and not result in their values being eroded, degraded or unreasonably obscured from public view.

No example provided.

<p>PO95</p> <p>Development does not adversely impact upon the health and vitality of significant trees. Where development occurs in proximity to a significant tree, construction measures and techniques as detailed in AS 4970-2009 Protection of trees on development sites are adopted to ensure a significant tree's health, wellbeing and vitality.</p> <p>Significant trees are only removed where they are in a poor state of health or where they pose a health and safety risk to persons or property. A Tree Assessment report prepared by a suitably qualified arborist confirming a tree's state of health is required to demonstrate achievement of this performance outcome.</p>	<p>E95</p> <p>Development does:</p> <ol style="list-style-type: none"> not result in the removal of a significant tree; not occur within 20m of a protected tree; involve pruning of a tree in accordance with Australian Standard AS 4373-2007 – Pruning of Amenity Trees.
<p>Landslide hazard (refer Overlay map - Landslide hazard to determine if the following assessment criteria apply)</p> <p>Note - To demonstrate achievement of the performance outcomes, a site-specific geotechnical assessment report is prepared by a qualified engineer. Guidance for the preparation of a geotechnical assessment report is provided in Planning scheme policy – Landslide hazard.</p>	
<p>PO96</p> <p>Development:</p> <ol style="list-style-type: none"> maintains the safety of people and property on a site and neighbouring sites from landslides; ensures the long-term stability of the site considering the full nature and end use of the development; ensures site stability during all phases of construction and development; minimises disturbance of natural drainage patterns of the site and does not result in the redirection or alteration of the existing flow of surface or groundwater minimises adverse visual impacts on the amenity of adjoining residents and provides a positive interface with the streetscape. 	<p>E96</p> <p>Development does not:</p> <ol style="list-style-type: none"> involve earthworks exceeding 50m³; involve cut and fill having a height greater than 600mm; involve any retaining wall having a height greater than 600mm; redirect or alter the existing flow of surface or groundwater.
<p>PO97</p> <p>Buildings are designed to respond to sloping topography in the siting, design and form of buildings and structures by:</p> <ol style="list-style-type: none"> minimising overuse of cut and fill to create single flat pads and benching; avoiding expanses of retaining walls, loss of trees and vegetation and interference with natural drainage systems; minimising any adverse visual impact on the landscape character ; Protect the amenity of adjoining properties. 	<p>E97</p> <p>Buildings, excluding domestic outbuildings:</p> <ol style="list-style-type: none"> are split-level, multiple-slab, pier or pole construction; are not single plane slab on ground.
<p>PO98</p>	<p>E98</p>

6 Zones

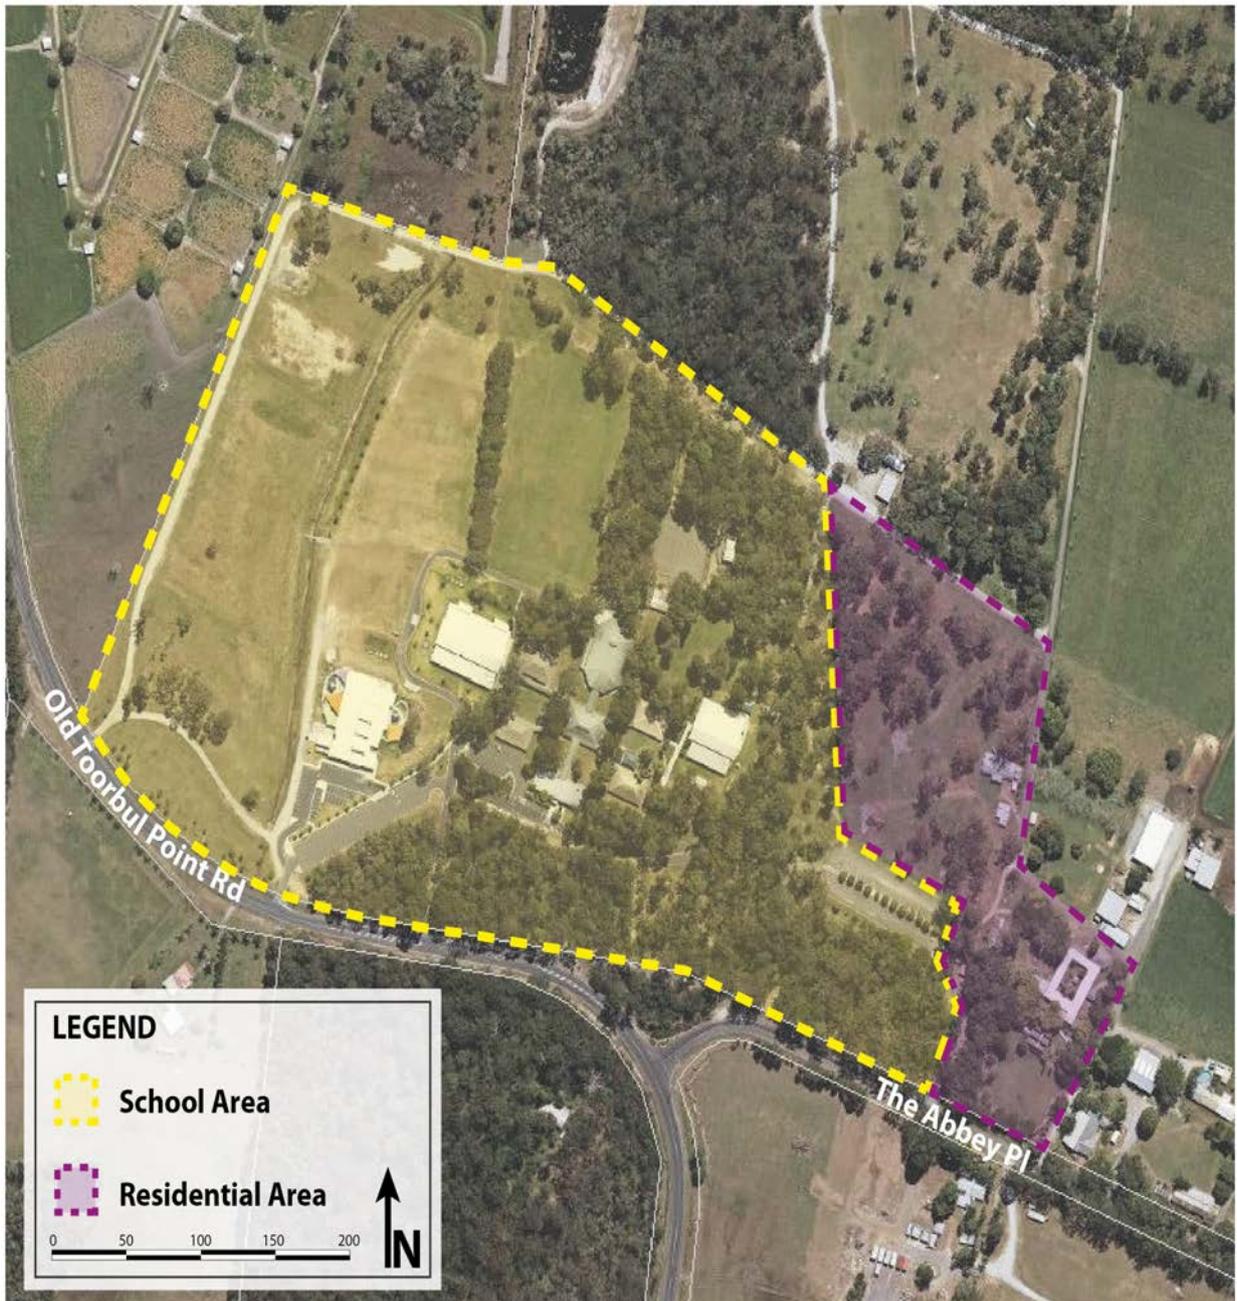

<p>Development protects the safety of people, property and the environment from the impacts of landslide on hazardous chemicals manufactured, handled or stored by incorporating design measures to ensure:</p> <ol style="list-style-type: none"> the long-term stability of the development site considering the full nature and end use of the development; site stability during all phases of construction and development; the development is not adversely affected by landslide activity originating on sloping land above the site; emergency access and access from the site for the public and emergency vehicles is available and is not at risk from landslide. 	<p>Development does not involve the manufacture, handling or storage of hazardous chemicals.</p>
<p>Overland flow path (refer Overlay map - Overland flow path to determine if the following assessment criteria apply)</p> <p>Note - The applicable river and creek flood planning levels associated with defined flood event (DFE) within the inundation area can be obtained by requesting a flood check property report from Council.</p>	
<p>PO99</p> <p>Development:</p> <ol style="list-style-type: none"> minimises the risk to persons from overland flow; does not increase the potential for damage from overland flow either on the premises or other premises, public land, watercourses, roads or infrastructure. 	<p>No example provided.</p>
<p>PO100</p> <p>Development:</p> <ol style="list-style-type: none"> maintains the conveyance of overland flow predominantly unimpeded through the premises for any event up to and including the 1% AEP for the fully developed upstream catchment; does not concentrate, intensify or divert overland flow onto an upstream, downstream or surrounding property. <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow.</p>	<p>No example provided.</p>
<p>PO101</p> <p>Development does not:</p>	<p>No example provided.</p>

<p>a. directly, indirectly or cumulatively cause any increase in overland flow velocity or level;</p> <p>b. increase the potential for flood damage from overland flow either on the premises or other premises, public lands, watercourses, roads or infrastructure.</p> <p>Note - Open concrete drains greater than 1m in width are not an acceptable outcome, nor are any other design options that may increase scouring.</p>	
<p>PO102</p> <p>Development ensures that public safety and the risk to the environment are not adversely affected by a detrimental impact of overland flow on a hazardous chemical located or stored on the premises.</p>	<p>E102</p> <p>Development ensures that a hazardous chemical is not located or stored in an Overland flow path area.</p> <p>Note - Refer to the Work Health and Safety Act 2011 and associated Regulation and Guidelines, the Environmental Protection Act 1994 and the relevant building assessment provisions under the Building Act 1975 for requirements related to the manufacture and storage of hazardous substances.</p>
<p>PO103</p> <p>Development which is not in a Rural zone ensures that overland flow is not conveyed from a road or public open space onto a private lot.</p>	<p>E103</p> <p>Development which is not in a Rural zone that an overland flow paths and drainage infrastructure is provided to convey overland flow from a road or public open space area away from a private lot.</p>
<p>PO104</p> <p>Development ensures that inter-allotment drainage infrastructure, overland flow paths and open drains through private property cater for overland flows for a fully developed upstream catchment and are able to be easily maintained.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow</p>	<p>E104.1</p> <p>Development ensures that roof and allotment drainage infrastructure is provided in accordance with the following relevant level as identified in QUDM:</p> <p>a. Urban area – Level III;</p> <p>b. Rural area – N/A;</p> <p>c. Industrial area – Level V;</p> <p>d. Commercial area – Level V.</p> <p>E104.2</p> <p>Development ensures that inter-allotment drainage infrastructure is designed to accommodate any event up to and including the 1% AEP for the fully developed upstream catchment.</p>
<p>PO105</p> <p>Development protects the conveyance of overland flow such that an easement for drainage purposes is provided over:</p> <p>a. a stormwater pipe if the nominal pipe diameter exceeds 300mm;</p>	<p>No example provided.</p>

6 Zones

<p>b. an overland flow path where it crosses more than one premises;</p> <p>c. inter-allotment drainage infrastructure.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details and examples.</p> <p>Note - Stormwater Drainage easement dimensions are provided in accordance with Section 3.8.5 of QUDM.</p>	
<p>Additional criteria for development for a Park⁽⁵⁷⁾</p>	
<p>PO106</p> <p>Development for a Park⁽⁵⁷⁾ ensures that the design and layout responds to the nature of the overland flow affecting the premises such that:</p> <p>a. public benefit and enjoyment is maximised;</p> <p>b. impacts on the asset life and integrity of park structures is minimised;</p> <p>c. maintenance and replacement costs are minimised.</p>	<p>E106</p> <p>Development for a Park⁽⁵⁷⁾ ensures works are provided in accordance with the requirements set out in Appendix B of the Planning scheme policy - Integrated design.</p>
<p>Riparian and wetland setbacks</p>	
<p>PO107</p> <p>Development provides and maintains a suitable setback from waterways and wetlands that protects natural and environmental values. This is achieved by recognising and responding to the following matters:</p> <p>a. impact on fauna habitats;</p> <p>b. impact on wildlife corridors and connectivity;</p> <p>c. impact on stream integrity;</p> <p>d. impact of opportunities for revegetation and rehabilitation planting;</p> <p>e. edge effects.</p>	<p>E107</p> <p>Development does not occur within:</p> <p>a. 50m from top of bank for W1 waterway and drainage line</p> <p>b. 30m from top of bank for W2 waterway and drainage line</p> <p>c. 20m from top of bank for W3 waterway and drainage line</p> <p>d. 100m from the edge of a Ramsar wetland, 50m from all other wetlands.</p> <p>Note - W1, W2 and W3 waterway and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.</p>
<p>Transport noise corridors (refer Overlay map - Transport noise corridors to determine if the following assessment criteria apply)</p> <p>Note - This is for information purposes only. No requirements for accepted development or criteria for assessable development apply. Development located within a Transport Noise Corridor must satisfy the requirements of the Queensland Development Code</p>	

Map 1 - Abbey uses area

6 Zones

6.2.2.2 Airfield precinct

6.2.2.2.1 Purpose – Airfield precinct

1. The purpose of the code will be achieved through the following overall outcomes for the Airfield precinct:
 - a. This precinct comprises the Caboolture and Redcliffe airfields, and is used predominantly for:
 - i. the arrival and departure of aircraft;
 - ii. the housing, refuelling, maintenance and repair of aircraft;
 - iii. the assembly and dispersal of passengers or goods on or from an aircraft;
 - iv. ancillary activities directly serving the needs of passengers and visitors;
 - v. associated training and education facilities;
 - vi. the operation of occasional air shows;
 - vii. other aviation facilities.
 - b. The Caboolture airfield is a recreational airstrip, where commercial operations are not located on the main airfield site;
 - c. The Redcliffe airfield provides a range of air services, including recreational and commercial operations;
 - d. Air traffic generated by air services remain within the capacity of the airfield;
 - e. Development protects and maintains safe and efficient airfield operations, avoids significant adverse effects on the natural environment and minimises impacts on adjacent land.
 - f. Development is designed and operated to provide a high level of amenity and maintains the safety of people and property through Crime Prevention Through Environmental Design principles (CPTED).
 - g. Development is of a scale, height and bulk that provides a high level of amenity and is consistent with the character of the surrounding area.
 - h. Where applicable, development is undertaken in accordance with a Council Master Plan approved under Council policy.
 - i. General works associated with the development achieves the following:
 - i. new development is provided with a high standard of services to meet and support the current and future needs of users of the site, including roads, street lighting services, telecommunications and reticulated electricity (underground wherever possible), water and sewerage (where available);
 - ii. the development manages stormwater to:
 - A. ensure the discharge of stormwater does not adversely affect the quality, environmental values or ecosystem functions of downstream receiving waters;
 - B. prevent stormwater contamination and the release of pollutants;
 - C. maintain or improve the structure and condition of drainage lines and riparian areas;
 - D. avoid off-site adverse impacts from stormwater.
 - iii. the development does not result in unacceptable impacts on the capacity and safety of the external road network;
 - iv. the development ensures the safety, efficiency and useability of access ways and parking areas;
 - v. site works including earthworks are managed to be safe and have minimal impacts on adjoining or adjacent premises, the streetscape or the environment.

- j. Activities associated with the use do not cause a nuisance by way of aerosols, fumes, light, noise, odour, particles or smoke.
- k. Noise generating uses are designed, sited, constructed and operated to minimise the transmission of noise to appropriate levels and do not cause environmental harm or nuisance.
- l. Noise sensitive uses are designed, sited and constructed so as not to be subject to unacceptable levels of noise.
- m. Development avoids areas subject to constraint, limitation, or environmental value. Where development cannot avoid these identified areas, it responds by:
- i. adopting a 'least risk, least impact' approach when designing, siting and locating development in any area subject to a constraint, limitation or environmental value to minimise the potential risk to people, property and the environment;
 - ii. ensuring no further instability, erosion or degradation of the land, water or soil resource;
 - iii. when located within a Water buffer area, complying with the Water Quality Vision and Objectives contained in the Seqwater Development Guidelines: Development Guidelines for Water Quality Management in Drinking Water Catchments 2012.
 - iv. maintaining, restoring and rehabilitating environmental values, including natural, ecological, biological, aquatic, hydrological and amenity values, and enhancing these values through the provision of planting and landscaping, and facilitating safe wildlife movement and connectivity through:
 - A. the provision of replacement, restoration, rehabilitation planting and landscaping;
 - B. the location, design and management of development to avoid or minimise adverse impacts on ecological systems and processes;
 - C. the requiring of environmental offsets in accordance with the Environmental Offsets Act 2014.
 - v. protecting native species and protecting and enhancing species habitat;
 - vi. protecting and preserving the natural, aesthetic, architectural historic and cultural values of significant trees, places, objects and buildings of heritage and cultural significance;
 - vii. establishing effective separation distances, buffers and mitigation measures associated with identified infrastructure to minimise adverse effects on sensitive land uses from odour, noise, dust and other nuisance generating activities;
 - viii. establishing, maintaining and protecting appropriate buffers to waterways, wetlands, native vegetation and significant fauna habitat;
 - ix. ensuring it promotes and does not undermine the ongoing viability, integrity, operation, maintenance and safety of identified infrastructure;
 - x. ensuring effective and efficient disaster management response and recovery capabilities;
 - xi. where located in an overland flow path:
 - A. development siting, built form, layout and access responds to the risk presented by the overland flow and minimises risk to personal safety;
 - B. development is resilient to the impacts of overland flow by ensuring the siting and design accounts for the potential risks to property associated with the overland flow;
 - C. development does not impact on the conveyance of the overland flow for any event up to and including the 1% AEP for the fully developed upstream catchment;
 - D. development directly, indirectly and cumulatively avoid an increase in the severity of overland flow and potential for damage on the premises or other premises, public lands, watercourses, roads or infrastructure.
- n. Development in the Airfield precinct includes one or more of the following:

<ul style="list-style-type: none"> • Air services⁽³⁾ 	<ul style="list-style-type: none"> • Caretaker's accommodation⁽¹⁰⁾ • Club⁽¹⁴⁾ - if associated with aviation 	<ul style="list-style-type: none"> • Community use⁽¹⁷⁾ - if for a Museum
--	---	--

6 Zones

- o. Development in the Airfield precinct does not include any of the following:

<ul style="list-style-type: none"> • Adult store⁽¹⁾ • Agricultural supplies store⁽²⁾ • Animal husbandry⁽⁴⁾ • Animal keeping⁽⁵⁾ • Aquaculture⁽⁶⁾ • Bar⁽⁷⁾ • Brothel⁽⁸⁾ • Bulk landscape supplies⁽⁹⁾ • Car wash⁽¹¹⁾ • Cemetery⁽¹²⁾ • Child care centre⁽¹³⁾ • Community care centre⁽¹⁵⁾ • Community residence⁽¹⁶⁾ • Crematorium⁽¹⁸⁾ • Cropping⁽¹⁹⁾ • Detention facility⁽²⁰⁾ • Dual occupancy⁽²¹⁾ • Dwelling house⁽²²⁾ • Dwelling unit⁽²³⁾ • Educational establishment⁽²⁴⁾ • Environmental facility⁽²⁶⁾ • Extractive industry⁽²⁷⁾ • Function facility⁽²⁹⁾ • Funeral parlour⁽³⁰⁾ • Garden centre⁽³¹⁾ • Hardware and trade supplies⁽³²⁾ • Health care services⁽³³⁾ 	<ul style="list-style-type: none"> • High Impact industry⁽³⁴⁾ • Home based business⁽³⁵⁾ • Hospital⁽³⁵⁾ • Hotel⁽³⁷⁾ • Indoor sport and recreation⁽³⁸⁾ • Intensive animal industry⁽³⁹⁾ • Intensive horticulture⁽⁴⁰⁾ • Landing⁽⁴¹⁾ • Low impact industry⁽⁴²⁾ • Major sport, recreation and entertainment facility⁽⁴⁴⁾ • Marine industry⁽⁴⁵⁾ • Market⁽⁴⁶⁾ • Medium impact industry⁽⁴⁷⁾ • Motor sport facility⁽⁴⁸⁾ • Multiple dwelling⁽⁴⁹⁾ • Nature-based tourism⁽⁵⁰⁾ • Nightclub entertainment facility⁽⁵¹⁾ • Non-resident workforce accommodation⁽⁵²⁾ • Outdoor sales⁽⁵⁴⁾ • Outdoor sport and recreation⁽⁵⁵⁾ • Parking station⁽⁵⁸⁾ • Permanent plantation⁽⁵⁹⁾ • Place of worship⁽⁶⁰⁾ • Port services⁽⁶¹⁾ • Relocatable home park⁽⁶²⁾ 	<ul style="list-style-type: none"> • Renewable energy facility⁽⁶³⁾ • Research and technology industry⁽⁶⁴⁾ • Residential care facility⁽⁶⁵⁾ • Resort complex⁽⁶⁶⁾ • Retirement facility⁽⁶⁷⁾ • Roadside stall⁽⁶⁸⁾ • Rooming accommodation⁽⁶⁹⁾ • Rural industry⁽⁷⁰⁾ • Rural workers' accommodation⁽⁷¹⁾ • Sales office⁽⁷²⁾ • Service industry⁽⁷³⁾ • Service station⁽⁷⁴⁾ • Shop⁽⁷⁵⁾ • Shopping centre⁽⁷⁶⁾ • Short-term accommodation⁽⁷⁷⁾ • Showroom⁽⁷⁶⁾ • Special industry⁽⁷⁹⁾ • Theatre⁽⁸²⁾ • Tourist attraction⁽⁸³⁾ • Tourist park⁽⁸⁴⁾ • Transport depot⁽⁸⁵⁾ • Veterinary services⁽⁸⁷⁾ • Warehouse⁽⁸⁸⁾ • Wholesale nursery⁽⁸⁹⁾ • Winery⁽⁹⁰⁾
--	---	--

- p. Development not listed in the tables above may be considered on its merits and where it reflects and supports the outcomes of the zone.

6.2.2.2 Accepted development subject to requirements

If development is to be categorised as accepted development subject to requirements it must comply with the requirements for accepted development set out in Part C, Table 6.2.2.2.1. Where the development does not meet a requirement for accepted development (RAD) within Part C Table 6.2.2.2.1, the category of development changes to assessable development under the rules outlined in section 5.3.3.(1), and assessment is against the corresponding performance outcome (PO) identified in the table below. This only occurs whenever a RAD is not met, and is therefore limited to the subject matter of the RADs that are not complied with. To remove any doubt, for those RADs that are complied with, there is no need for assessment against the corresponding PO.

Part C - Requirements for accepted development - Airfield precinct

Table 6.2.2.2.1 Requirements for accepted development - Airfield precinct

Requirements for accepted development	
General requirements	
Building height	
RAD1	<p>Building height:</p> <ul style="list-style-type: none"> a. complies with air regulations for obstacle heights with proximity to runways; b. does not exceed 8.5m where within 10m of the General residential zone.
Car parking	
RAD2	On-site car parking is provided in accordance with Schedule 7 - Car parking.
RAD3	Car parking at the Redcliffe airfield is not provided in the airside area (on the runway side of buildings).
RAD4	Cycle parking spaces are provided at a minimum of 1 space per 200m ² of GFA.
Waste	
RAD5	Bins and bin store areas are provided, designed and managed in accordance with Planning scheme policy - Waste.
Lighting	
RAD6	<p>Artificial lighting on-site is directed and shielded in such a manner as not to exceed the recommended maximum values of light technical parameters for the control of obtrusive light given in Table 2.1 of Australian Standard AS 4282 (1997) Control of Obtrusive Effects of Outdoor Lighting.</p> <p>Note - Lighting on the outside of hangars and other buildings comply with any relevant air traffic regulator legislative requirements.</p> <p>Note - "Curfewed hours" are taken to be those hours between 10pm and 7am on the following day.</p>
Hazardous Chemicals	
RAD7	All development that involves the storage or handling of hazardous chemicals listed in Schedule 9, Development involving hazardous chemicals, Table 9.0.1 Quantity thresholds for hazardous chemicals stored as accepted development subject to requirements complies with Table 9.0.3 Hazardous chemicals.
RAD8	Development does not involve the storage or handling of hazardous chemicals listed in Schedule 9, Development involving hazardous chemicals, Table 9.0.2 Hazardous chemicals assessable thresholds.
Clearing of habitat trees where not located in the Environmental areas overlay map	
RAD9	Development does not result in the damaging, destroyed or clearing of a habitat tree. This does not apply to:

6 Zones

	<ul style="list-style-type: none"> a. Clearing of a habitat tree located within an approved development footprint; b. Clearing of a habitat tree within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; c. Clearing of a habitat tree reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; d. Clearing of a habitat tree reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural , Rural residential and Environmental management and conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence; e. Clearing of a habitat tree reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes; f. Clearing of a habitat tree in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council; g. Clearing of a habitat tree associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens; h. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development. <p>Editor's note - A native tree measuring greater than 80cm in diameter when measured at 1.3m from the ground is recognised as a 'habitat tree'. For further information on habitat trees, refer to Planning scheme policy – Environmental areas and corridors. Information detailing how this measurement is undertaken is provided in Australian Standard AS 4970 2009 Protection of Trees on Development Sites - Appendix A.</p>
Works requirements	

Utilities	
RAD10	<p>Where available, the development is connected to:-</p> <ul style="list-style-type: none"> a. an existing reticulated electricity supply; b. telecommunications and broadband; c. reticulated sewerage; d. reticulated water; e. constructed and dedicated road. <p>Development is provided in an appropriate level of service and infrastructure in accordance with Planning scheme policy - Integrated design (Appendix A).</p>
RAD11	<p>Where not in a sewered area, the development is serviced by an appropriate on-site sewerage facility.</p> <p>Note – A site and soil evaluation report is generally required to demonstrate compliance with this outcome. Reports are to be prepared in accordance with AS1547 On-site domestic wastewater management and the Queensland Plumbing and Wastewater Code.</p>

RAD12	Where not in an existing connections area or a future connections area as detailed in the Unitywater Connections Policy, the development is provided with an adequate water supply of 45,000 litres by way of on-site storage which provides equivalent water quality and reliability to support the use requirements of the development.
--------------	--

Access	
RAD13	Any new or changes to existing site access crossovers and driveways are designed, and located and constructed in accordance with: <ul style="list-style-type: none"> a. where for a Council-controlled road and associated with a Dwelling house: <ul style="list-style-type: none"> i. Planning scheme policy - Integrated design; b. where for a Council-controlled road, and not associated with a Dwelling house: <ul style="list-style-type: none"> i. AS/NZS2890.1 section 3, or Parking facilities Part 1: Off street car parking; ii. AS/NZS 2890.2 - Parking facilities Part 2: Off-street commercial vehicle facilities; iii. Planning scheme policy - Integrated design; iv. Schedule 8 - Service vehicle requirements; c. where for a State-Controlled road, the Safe Intersection Sight Distance requirements in Austroads and the appropriate IPWEAQ standard drawings, or a copy of a Transport Infrastructure Act 1994, section 62 approval.
RAD14	Any new or changes to existing internal driveways and access ways are designed and constructed in accordance with AS/NZS 2890.1 Parking Facilities Part 1: Off street car parking and the relevant standards in Planning scheme policy - Integrated design.
RAD	Access driveways, manoeuvring areas and loading facilities are sealed and provide for service vehicles listed in Schedule 8 - Service vehicle requirements for the relevant use. The on-site manoeuvring is to be in accordance with Schedule 8 - Service vehicle requirements.

Stormwater	
RAD15	Any new or changes to existing stormwater run-off from the site is conveyed to a point of lawful discharge without causing actionable nuisance or annoyance to any person, property or premises in accordance with Planning scheme policy – Integrated design. <p>Note - A watercourse as defined in the Water Act may be accepted as a lawful point of discharge providing the drainage discharge from the site does not increase the downstream flood levels during events up to and including the 1% AEP storm. An afflux of +20mm may be accepted on Council controlled land and road infrastructure. No worsening is ensured when stormwater is discharged into a catchment that includes State Transport Infrastructure.</p>
RAD16	Development incorporates a minimum of 2% of the site area constructed as a bioretention system in accordance with Planning scheme policy – Integrated design if the development:- <ul style="list-style-type: none"> a. is for urban purposes only;-

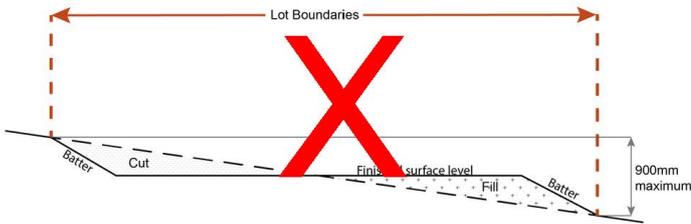

6 Zones

	<p>b. involves a land area greater than 2500m²;</p> <p>c. will result in 6 or more dwellings; OR will result in an impervious area greater than 25% of the net developable area.</p> <p>Where development:</p> <p>a. is for an urban purpose that involves a land area 2500m² or greater in size; and</p> <p>b. that results in 6 or more dwellings; or</p> <p>c. that result in an impervious area greater than 25% of the net developable area,</p> <p>incorporates a 'deemed to comply solution' to manage stormwater quality.</p> <p>Note - The deemed to comply solution is to be designed, constructed, established and maintained in accordance with the requirements of Water by Design 'Deemed to Comply Solutions - Stormwater Quality Management for South East Queensland' and Planning scheme policy - Integrated design.</p>								
RAD	<p>Development ensures that surface flows entering the premises from adjacent properties are not blocked, diverted or concentrated.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland may be required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p>								
RAD	<p>Development ensures that works (e.g. fences and walls) do not block, divert or concentrate the flow of stormwater to adjoining properties.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland may be required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p>								
RAD	<p>Stormwater drainage infrastructure (excluding detention and bio-retention systems) through or within private land is protected by easements in favour of Council (at no cost to Council). Minimum easement widths are as follows:</p> <table border="1" data-bbox="264 1514 1469 1955"> <thead> <tr> <th>Pipe Diameter</th> <th>Minimum Easement Width (excluding access requirements)</th> </tr> </thead> <tbody> <tr> <td>Stormwater Pipe up to 825mm diameter</td> <td>3.0m</td> </tr> <tr> <td>Stormwater Pipe up to 825mm diameter with Sewer pipe up to 225mm diameter</td> <td>4.0m</td> </tr> <tr> <td>Stormwater pipe greater than 825mm diameter</td> <td>Easement boundary to be 1m clear of the outside wall of the pipe and clear of all pits.</td> </tr> </tbody> </table> <p>Note - Additional easement width may be required in certain circumstances in order to facilitate maintenance access to the stormwater system.</p>	Pipe Diameter	Minimum Easement Width (excluding access requirements)	Stormwater Pipe up to 825mm diameter	3.0m	Stormwater Pipe up to 825mm diameter with Sewer pipe up to 225mm diameter	4.0m	Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the pipe and clear of all pits.
Pipe Diameter	Minimum Easement Width (excluding access requirements)								
Stormwater Pipe up to 825mm diameter	3.0m								
Stormwater Pipe up to 825mm diameter with Sewer pipe up to 225mm diameter	4.0m								
Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the pipe and clear of all pits.								

	Note - Refer to Planning scheme policy - Integrated design (Appendix C) for easement requirements over open channels.
Site works and construction management	
RAD17	The site and any existing structures are to be maintained in a tidy and safe condition.
RAD18	<p>Site construction works incorporate temporary stormwater run-off, erosion and sediment controls and trash traps designed in accordance with the Urban Stormwater Quality Planning Guidelines, Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design.</p> <p>Development does not cause erosion or allow sediment to leave the site.</p> <p>Note - The International Erosion Control Association (Australasia) Best Practice Erosion and Sediment Control provides guidance on strategies and techniques for managing erosion and sedimentation.</p>
RAD	No dust emissions extend beyond the boundaries of the site during soil disturbances and construction works.
RAD	<p>Existing street trees are protected and not damaged during works.</p> <p>Note - Where development occurs in the tree protection zone, measures and techniques as detailed in Australian Standard AS 4970 Protection of trees on developments sites are adopted and implemented.</p>
RAD21	Any damage to Council land or infrastructure is repaired or replaced with the same materials, prior to plan sealing, or final building classification.
RAD19	Construction traffic including contractor car parking is controlled in accordance with a traffic management plan, prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) to ensure all traffic movements to and from the site are safe.
RAD22	Any material dropped, deposited or spilled on the road(s) as a result of construction processes associated with the site are to be cleaned at all times.
RAD20	<p>All native vegetation to be retained on-site is temporarily fenced or protected prior to and during development works.</p> <p>Note - No parking of vehicles or storage of machinery or goods is to occur in these areas during development works</p>
RAD	<p>Disposal of materials is managed in one or more of the following ways:</p> <ol style="list-style-type: none"> all cleared vegetation, declared weeds, stumps, rubbish, car bodies, scrap metal and the like are removed and disposed of in a Council land fill facility; or all native vegetation with a diameter below 400mm is to be chipped and stored on-site. <p>Note - No burning of cleared vegetation is permitted.</p> <p>Note - The chipped vegetation must be stored in an approved location.</p>

6 Zones

RAD	<p>All development works are carried out within the following times:</p> <ol style="list-style-type: none"> Monday to Saturday (other than public holidays) between 6:30am and 6:30pm on the same day; no work is to be carried out on Sundays or public holidays.
------------	--

Earthworks	
RAD24	<p>The total of all cut and fill on-site does not exceed 900mm in height.</p> <p style="text-align: center;">Figure -- Cut and Fill</p>  <p>Note -- This is site earthworks not building work.</p> <p>Filling or excavation does not:</p> <ol style="list-style-type: none"> involve a change in level of more than 1.0m relative to natural ground level <p>OR</p> <p>result in a batter greater than 1V to 6H;</p> <ol style="list-style-type: none"> necessitate the construction of a freestanding retaining wall exceeding 1.0m in height relative to finished ground level; result in the top of any cut batter, or the exposed face of any freestanding retaining wall supporting that cut, being closer than 500mm to a property boundary; result in the toe of any fill batter, or exposed face of any freestanding retaining wall supporting that fill, being closer than 1.0m to a property boundary unless: <ol style="list-style-type: none"> the depth of fill within the 1.0m strip does not exceed 200mm relative to natural ground level; or the batter slope within that 1.0m strip is no steeper than 1V to 2H. <p style="text-align: center;">THE NEW FIGURE BELOW IS PROPOSED AS PART OF THIS AMENDMENT</p>

	<p style="text-align: center;">Figure - Filling or Excavation</p> 
<p>RAD</p>	<p>Cut and fill batters, (other than batters to dams and water impoundments), have a finished slope no steeper than the following:</p> <ol style="list-style-type: none"> any cut batter is no steeper than 1V in 4H; any fill batter, (other than a compacted fill batter), is no steeper than 1V in 4H; any compacted fill batter is no steeper than 1V in 4H.
<p>RAD</p>	<p>All cut and fill batters are provided with appropriate scour, erosion protection and run-off control measures including catch drains at the top of batters and lined batter drains as necessary.</p>
<p>RAD</p>	<p>Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance of steep slopes and batters.</p> <p>Note - Inspection and certification of steep slopes and batters may be required by a suitably qualified and experienced RPEQ.</p>
<p>RAD</p>	<p>All fill and excavation is contained on-site and is free draining.</p>
<p>RAD</p>	<p>Earthworks undertaken on the development site are shaped in a manner which does not:</p> <ol style="list-style-type: none"> prevent stormwater surface flow which, prior to commencement of the earthworks, passed onto the development site, from entering the land; or redirect stormwater surface flow away from existing flow paths; or divert stormwater surface flow onto adjacent land (other than a road) in a manner which: <ol style="list-style-type: none"> concentrates the flow; or increases the flow rates of stormwater over the affected section of the adjacent land above the situation which existed prior to the diversion; or causes actionable nuisance to any person, property or premises.
<p>RAD</p>	<p>All fill placed on-site is:</p>

6 Zones

	<p>a. limited to that necessary for the approved use;</p> <p>b. clean and uncontaminated (i.e. no building waste, concrete, green waste, actual acid sulfate soils, potential acid sulfate soils or contaminated material etc.) material is used as fill.</p>
RAD23	<p>The site is prepared and the fill placed on-site in accordance with Australian Standard AS3798.</p> <p>Note - The fill is to be inspected and tested in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures</p>
RAD	<p>No filling or excavation is undertaken in an easement issued in favour of Council or a public sector entity.</p> <p>Note - Public sector entity is defined in Schedule 2 of the Act.</p>
RAD25	<p>Filling or excavation that would result in any of the following is not carried out on site: does not result in:-</p> <p>a. reduction in cover over any Council or public sector entity infrastructure to less than 600mm;</p> <p>b. an increase in finished surface grade over, or within 1.5m on each side of, the Council or public sector entity infrastructure above that which existed prior to the filling or excavation works being undertaken.;</p> <p>c. prevent reasonable access to Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the site for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity is defined in Schedule 2 of the Act.</p>

Fire services

Note - The provisions under this heading only apply if:

- a. the development is for, or incorporates:
- i. reconfiguring a lot for a community title scheme creating 1 or more vacant lots; or
 - ii. material change of use for 2 or more sole occupancy units on the same lot, or within the same community titles scheme; or
 - iii. material change of use for a Tourist park⁽⁸⁴⁾ with accommodation in the form of caravans or tents; or
 - iv. material change of use for outdoor sales⁽⁵⁴⁾, outdoor processing or outdoor storage where involving combustible materials.

AND

- b. none of the following exceptions apply:
- i. the distributor-retailer for the area has indicated, in its netserv plan, that the premises will not be served by that entity's reticulated water supply; or
 - ii. every part of the development site is within 60m walking distance of an existing fire hydrant on the distributor-retailer's reticulated water supply network, measured around all obstructions, either on or adjacent to the site.

Note - The provisions under this heading do not apply to buildings that are required by the Building Code of Australia to have a fire hydrant system complying with Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations or other fire fighting facilities which provide equivalent protection.

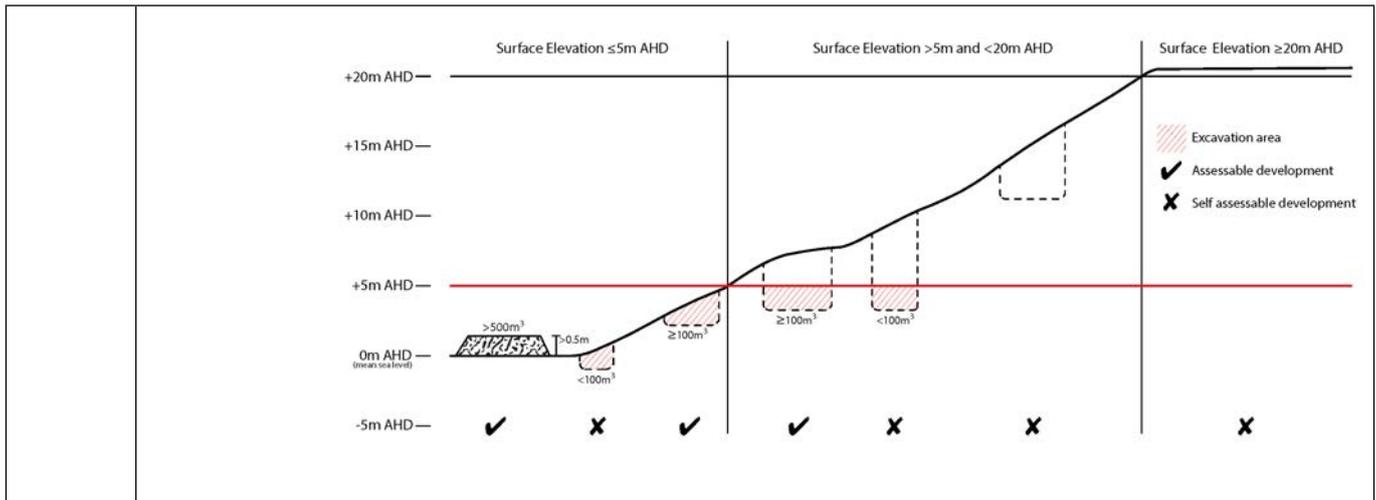

RAD26	<p>External fire hydrant facilities are provided on site to the standard prescribed under the relevant parts of <i>Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations</i>.</p> <p>Note - For this requirement for accepted development, the following are the relevant parts of AS 2419.1 (2005):</p> <ol style="list-style-type: none"> a. in regard to the form of any fire hydrant - Part 8.5 and Part 3.2.2.1, with the exception that for Tourist parks⁽⁸⁴⁾ or development comprised solely of dwellings and their associated outbuildings, single outlet above-ground hydrants or suitably signposted in-ground hydrants would be an acceptable alternative; b. in regard to the general locational requirements for fire hydrants - Part 3.2.2.2 (a), (e), (f), (g) and (h) as well as Appendix B of AS 2419.1 (2005); c. in regard to the proximity of hydrants to buildings and other facilities - Part 3.2.2.2 (b), (c) and (d), with the exception that: <ol style="list-style-type: none"> i. - for dwellings and their associated outbuildings, hydrant coverage need only extend to the roof and external walls of those buildings; ii. - for caravans and tents, hydrant coverage need only extend to the roof of those tents and caravans; iii. - for outdoor sales⁽⁵⁴⁾, processing or storage facilities, hydrant coverage is required across the entire area of the outdoor sales⁽⁵⁴⁾, outdoor processing and outdoor storage facilities; and d. in regard to fire hydrant accessibility and clearance requirements - Part 3.5 and where applicable, Part 3.6.
RAD27	<p>A continuous path of travel having the following characteristics is provided between the vehicle access point to the site and each external fire hydrant and hydrant booster point on the land:</p> <ol style="list-style-type: none"> a. an unobstructed width of no less than 3.5m; b. an unobstructed height of no less than 4.8m; c. constructed to be readily traversed by a 17 tonne HRV fire brigade pumping appliance; d. an area for a fire brigade pumping appliance to stand within 20m of each fire hydrant and 8m of each hydrant booster point.
RAD28	<p>On-site fire hydrant facilities are maintained in effective operating order in a manner prescribed in <i>Australian Standard AS1851 (2012) – Routine service of fire protection systems and equipment</i>.</p>
RAD29	<p>For development that contains on-site fire hydrants external to buildings:</p> <ol style="list-style-type: none"> a. those external hydrants can be seen from the vehicular entry point to the site; or b. a sign identifying the following is provided at the vehicular entry point to the site: <ol style="list-style-type: none"> i. the overall layout of the development (to scale); ii. internal road names (where used); iii. all communal facilities (where provided); iv. the reception area and on-site manager's office (where provided); v. external hydrants and hydrant booster points; vi. physical constraints within the internal roadway system which would restrict access by fire fighting appliances to external hydrants and hydrant booster points. <p>Note - The sign prescribed above, and the graphics used are to be:</p> <ol style="list-style-type: none"> a. in a form;

6 Zones

	<p>b. of a size;</p> <p>c. illuminated to a level;</p> <p>which allows the information on the sign to be readily understood, at all times, by a person in a fire fighting appliance up to 4.5m from the sign.</p>
RAD30	<p>For development that contains on-site fire hydrants external to buildings, those hydrants are identified by way of marker posts and raised reflective pavements markers in the manner prescribed in the technical note <i>Fire hydrant indication system</i> produced by the Queensland Department of Transport and Main Roads.</p> <p>Note - Technical note Fire hydrant indication system is available on the website of the Queensland Department of Transport and Main Roads.</p>
Use specific requirements	
Air services⁽³⁾	
RAD31	Air services ⁽³⁾ do not involve flight training or education activities that increase the number of fixed or rotary wing aircraft take-offs, landings or circuits.
RAD32	Activities on Lot 451 on SP169564 are not commercial in nature unless specified in the Management Plan (under the <i>Land Act 1994</i>) for that parcel.
Caretaker's accommodation⁽¹⁰⁾	
RAD33	A caretaker's accommodation ⁽¹⁰⁾ has a maximum GFA of 80m ² .
RAD34	No more than 1 caretaker's accommodation ⁽¹⁰⁾ is established per site.
RAD35	Does not gain access from a separate driveway to the main use on the site.
RAD36	Includes a minimum 16m ² of private open space directly accessible from a habitable room.
RAD37	Provide car parking in accordance with Schedule 7 - Car parking.
Club⁽¹⁴⁾	
RAD38	Limited to 1 club ⁽¹⁴⁾ each at the Caboolture and Redcliffe Airfields respectively.
RAD39	Development does not exceed 200m ² GFA.
Telecommunications facility⁽⁸¹⁾	
<p>Editor's note - In accordance with the Federal legislation Telecommunications facilities⁽⁸¹⁾ must be constructed and operated in a manner that will not cause human exposure to electromagnetic radiation beyond the limits outlined in the Radiocommunications (Electromagnetic Radiation - Human Exposure) Standard 2003 and Radio Protection Standard for Maximum Exposure Levels to Radiofrequency Fields - 3Khz to 300Ghz.</p>	
RAD40	A minimum area of 45m ² is available at ground level to allow for additional equipment shelters and associated structures for the purpose of co-locating on the proposed facility.
RAD41	The development results in no net reduction in the minimum quantity and standard of landscaping, private or communal open space or car parking spaces required under the planning scheme or under an existing development approval.

RAD42	<p>Equipment shelters and associated structures are located:</p> <ol style="list-style-type: none"> directly beside the existing equipment shelter and associated structures; behind the main building line; further away from the frontage than the existing equipment shelter and associated structures; a minimum of 10m from side and rear boundaries, except where in the Industry and Extractive industry zones, the minimum side and rear setback is 3m.
RAD43	Equipment shelters and other associated structures are either the same type of colour or material to match the surrounding locality.
RAD44	The facility is enclosed by security fencing or by other means to ensure public access is prohibited.
RAD45	<p>A minimum 3m wide strip of dense planting is provided around the perimeter of the fenced area, between the development and street frontage and adjoining uses.</p> <p>Note - Landscaping is provided in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person to ensure compliance with Planning scheme policy - Integrated design.</p>
RAD46	All equipment comprising the telecommunications facility ⁽⁸¹⁾ which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure no noise from this equipment can be heard, or felt at the site boundary.
Values and constraints requirements	
<p>Note - The relevant values and constraints requirements do not apply where the development is consistent with a current Development permit for Reconfiguring a lot or Material change of use or Operational work, where that approval has considered and addressed (e.g. through a development footprint plan (or similar in the case of Landslide hazard) or conditions of approval) the identified value or constraint under this planning scheme.</p>	
Acid sulfate soils - (refer Overlay map - Acid sulfate soils to determine if the following requirements apply)	
<p>Note - Planning scheme policy - Acid sulfate soils provides guidance for requirements for accepted development that has the potential to disturb acid sulfate soils i.e. development involving filling or excavation works below the thresholds of 100m³ and 500m³ respectively.</p>	
RAD47	<p>Development does not involve:</p> <ol style="list-style-type: none"> excavation or otherwise removing of more than 100m³ of soil or sediment where below 5m Australian Height Datum AHD, or filling of land of more than 500m³ of material with an average depth of 0.5m or greater where below the 5m AHD.

6 Zones

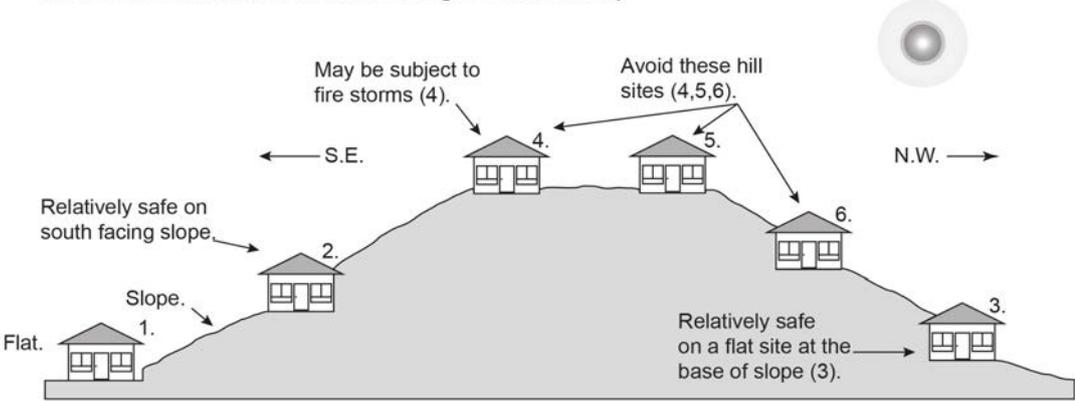

Bushfire hazard (refer Overlay map - Bushfire hazard to determine if the following requirements apply)

Note - For the purposes of section 12 of the Building Regulation 2006, land identified as very high potential bushfire intensity, high potential bushfire intensity, medium potential bushfire intensity or potential impact buffer on the Bushfire hazard overlay map is the 'designated bushfire hazard area'. AS 3959-2009 Construction of buildings in bushfire hazard areas applies within these areas.

RAD48

- a. Building and structures are:
 - i. not located on a ridgeline
 - ii. not located on land with a slope greater than 15% (see Overlay map – Landslide hazard)
- b. Dwellings are located on east to south facing slopes.

House Sites Numbered in Order of Degree of Fire Safety

(1 being the safest , 6 being the most hazardous.)
 From Bushfire Prone Areas: Siting and Design of Residential Buildings (1997), Queensland Department of Local Government and Planning, and Queensland Fire & Rescue Service.

RAD49

- Buildings and structures have contained within the site:
 - a. a separation from classified vegetation of 20m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater;

	<ul style="list-style-type: none"> b. a separation from low threat vegetation of 10m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater; c. a separation of no less than 10m between a fire fighting water supply extraction point and any classified vegetation, buildings and other roofed structures; d. an area suitable for a standard fire fighting appliance to stand within 3m of a fire fighting water supply extraction point; and e. an access path suitable for use by a standard fire fighting appliance having a formed width of at least 4m, a cross-fall of no greater than 5%, and a longitudinal gradient of no greater than 25%: <ul style="list-style-type: none"> i. to, and around, each building and other roofed structure; and ii. to each fire fighting water supply extraction point. <p>Note - The meaning of the terms classified vegetation and low threat vegetation as well as the method of calculating the bushfire attack level are as described in Australian Standard AS 3959.</p>
RAD50	<p>The length of driveway:</p> <ul style="list-style-type: none"> a. to a public road does not exceed 100m between the most distant part of a building used for any purpose other than storage and the nearest part of a public road; b. has a maximum gradient no greater than 12.5%; c. have a minimum width of 3.5m; d. accommodate turning areas for fire fighting appliances in accordance with Qld Fire and Emergency Services' Fire Hydrant and Vehicle Access Guideline.
RAD51	<ul style="list-style-type: none"> a. A reticulated water supply is provided by a distributor retailer for the area or, where not connected to a reticulated water supply, on-site fire fighting water storage containing not less than 10 000 litres (tanks with fire brigade tank fittings, swimming pools) is provided and located within 10m of buildings and structures. b. Where a swimming pool is the nominated on-site fire fighting water storage source, vehicle access to within 3m of that water storage source is provided. c. Where a tank is the nominated on-site fire fighting water storage source, it includes: <ul style="list-style-type: none"> i. a hardstand area allowing medium rigid vehicle (15 tonne fire appliance) access within 6m of the tank; ii. fire brigade tank fittings, comprising 50mm ball valve and male camlock coupling and, if underground, an access hole of 20mm (minimum) to accommodate suction lines.
RAD52	Development does not involve the manufacture or storage of hazardous chemicals.
<p>Environmental areas (refer Overlay map - Environmental areas to determine if the following requirements apply)</p> <p>Note - The following are excluded from the native clearing provisions of this planning scheme:</p> <ul style="list-style-type: none"> a. Clearing of native vegetation located within an approved development footprint; b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; 	

6 Zones

- d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental Management and Conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence;
- e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes;
- f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council;
- g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens;
- h. Grazing of native pasture by stock;
- i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development.

Note - Definition for native vegetation is located in Schedule 1 Definitions.

Note - Native vegetation subject to this requirement primarily comprises of matters of national environmental significance (MNES), matters of state environmental significance (MSES). They also comprise some matters of local environmental significance (MLES). A MLES is defined in Schedule 1.2, Administrative definitions. A list of the elements that apply to the mapped MSES and MLES is provided in Appendix 1 of the Planning scheme policy - Environmental areas.

Editors' Note - The accuracy of overlay mapping can be challenged through the development application process (code assessable development) or by way of a planning scheme amendment. See Council's website for details.

Editors' Note - When clearing native vegetation within a MSES area, you may still require approval from the State government.

RAD53

Where no suitable land cleared of native vegetation exists, clearing of native vegetation in High Value Area or Value Offset Area is for the purpose of a new dwelling house⁽²²⁾ and all associated facilities* or an extension to an existing dwelling house⁽²²⁾ only, and comprises an area no greater than 1500m².

Note - *All associated facilities includes: on-site wastewater treatment, all areas of disturbance, on-site parking, access and manoeuvring areas.

Editor's note - See in heading above for other uses excluded from native vegetation clearing requirements.

Editor's note - Where vegetation clearance is accepted development subject to requirements, care should be undertaken to avoid adverse impacts on koalas, koala habitat values and habitat connectivity and to encourage existing koala usage of the site. Measures to minimise impacts include:

- i. co-locating all associated activities, infrastructure and access strips;
- ii. be the least valued area of koala habitat on the site;
- iii. minimise the footprint of the development envelope area;
- iv. minimise edge effects to areas external to the development envelope;
- v. location and design consideration to ensure koala safety and movement in accordance with the Koala-sensitive Design Guideline and Planning scheme policy – Environmental areas;
- vi. sufficient area between the development and koala habitat trees to achieve their long-term viability.

Editor's note - Where vegetation clearing is accepted development subject to requirements, consideration should be given to avoid clearing habitat trees. Habitat trees may contain structural hollows where animals live, breed and shelter. The provision of nest boxes or salvaging of hollows will provide compensatory roosting and nesting opportunities for local wildlife including sugar gliders, possums and owls. For further information see Planning scheme policy – Environmental areas.

RAD54

No clearing of native vegetation is to occur within the Value Offset Area MLES - Waterway buffer or Value Offset Area MLES - Wetland buffer.

This does not apply to the following:

	<ul style="list-style-type: none"> a. Clearing of native vegetation located within an approved development footprint; b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental management and conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence; e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes; f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council; g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens; h. Grazing of native pasture by stock; i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development.
<p>Heritage and landscape character (refer Overlay map - Heritage and landscape character to determine if the following requirements apply)</p> <p>Note - Places, including sites, objects and buildings having local cultural heritage significance, are identified on Overlay map - Heritage and landscape character and listed in Schedule 1 of Planning scheme policy - Heritage and landscape character. Places also having cultural heritage significance at a State level and being entered in the Queensland Heritage Register, are also identified in Schedule 1 of Planning scheme policy - Heritage and landscape character.</p>	
RAD55	<p>Development is for the preservation, maintenance, repair and restoration of the site, object or building.</p> <p>This does not apply to Listed item 99, in Schedule 1 - List of sites, objects and buildings of significant historical and cultural value of Planning scheme policy - Heritage and landscape character.</p> <p>Note - Preservation, maintenance, repair and restoration are defined in Schedule 1 - Definitions</p>
RAD56	<p>A cultural heritage conservation management plan is prepared in accordance with Planning scheme policy – Heritage and landscape character and submitted to Council prior to the commencement of any preservation, maintenance, repair and restoration works. Any preservation, maintenance, repair and restoration works are in accordance with the Council approved cultural heritage conservation management plan.</p> <p>This does not apply to Listed item 99 in Schedule 1 - List of sites, objects and buildings of significant historical and cultural value of Planning scheme policy - Heritage and landscape character.</p>
RAD57	<p>Development does not result in the removal of or damage to any significant tree identified on Overlay map – Heritage and landscape character and listed in Appendix 2 of Planning scheme policy – Heritage and landscape character.</p>
RAD58	<p>The following development does not occur within 20m of the base of any significant tree, identified on Overlay map – Heritage and landscape character and listed in Appendix 2 of Planning scheme policy – Heritage and landscape character:</p> <ul style="list-style-type: none"> a. construction of any building; b. laying of overhead or underground services; c. any sealing, paving, soil compaction; d. any alteration of more than 75mm to the ground surface level prior to work commencing.
RAD59	<p>Pruning of a significant tree occurs in accordance with Australian Standard AS 4373-2007 - Pruning of Amenity Trees.</p>

6 Zones

Landslide hazard (refer Overlay map - Landslide hazard to determine if the following requirements apply)	
RAD60	Development does not: <ol style="list-style-type: none"> involve earthworks exceeding 50m³; involve cut and fill having a height greater than 600mm; involve any retaining wall having a height greater than 600mm; redirect or alter the existing flow of surface or groundwater.
RAD61	Buildings, excluding domestic outbuildings: <ol style="list-style-type: none"> are split-level, multiple-slab, pier or pole construction; are not single plane slab on ground.
RAD62	Development does not involve the manufacture, handling or storage of hazardous chemicals.
Infrastructure buffers (refer Overlay map - Infrastructure buffers to determine if the following requirements apply)	
RAD63	Development does not include the following uses located within a landfill site buffer: <ol style="list-style-type: none"> caretaker's accommodation⁽¹⁰⁾; community residence⁽¹⁶⁾; dual occupancy⁽²¹⁾; dwelling house⁽²²⁾; dwelling unit⁽²³⁾; hospital⁽³⁶⁾; rooming accommodation⁽⁶⁹⁾; multiple dwelling⁽⁴⁹⁾; non-resident workforce accommodation⁽⁵²⁾; relocatable home park⁽⁶²⁾; residential care facility⁽⁶⁵⁾; resort complex⁽⁶⁶⁾; retirement facility⁽⁶⁷⁾; rural workers' accommodation⁽⁷¹⁾; short term accommodation⁽⁷⁷⁾; tourist park⁽⁸⁴⁾.
Overland flow path (refer Overlay map - Overland flow path to determine if the following requirements apply)	
RAD64	Development for a material change of use or building work does not involve the construction of a building or structure in an Overland flow path area.
RAD65	Development for a material change of use or operational work does not impede the flow of flood waters through the premises or worsen flood flows to other premises. <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow</p>
RAD66	Development for a material change of use or building work ensures that fencing in an overland flow path area is at least 50% permeable.
RAD67	Development for a material change of use or building work that involves a hazardous chemical ensures the hazardous chemicals is not located within an overland flow path area.

RAD68	Development for a material change of use or building work for a Park ⁽⁵⁷⁾ ensures that work is provided in accordance with the requirements set out in Appendix B of the Planning scheme policy - Integrated design.
<p>Riparian and wetland setbacks (refer Overlay map - Riparian and wetland setback to determine if the following requirements apply)</p> <p>Note - W1, W2 and W3 waterway and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.</p>	
RAD69	<p>No development is to occur within:</p> <ul style="list-style-type: none"> a. 50m from top of bank for W1 waterway and drainage line b. 30m from top of bank for W2 waterway and drainage line c. 20m from top of bank for W3 waterway and drainage line d. 100m from the edge of a Ramsar wetland, 50m from all other wetlands. <p>Note - W1, W2 and W3 waterways and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.</p> <p>Note - In some cases, the top of bank may not be easily defined, as such a hydraulic measurement may be applied instead. Moreton Bay Regional Council will provide further direction on how to determine and locate the setback boundary in these locations.</p> <p>Note - The minimum setback distance applies to the each side of waterway.</p>
<p>Transport noise corridors (refer Overlay map - Transport noise)</p> <p>Note - This is for information purposes only. No requirements for accepted development or criteria for assessable development apply. Development located within a Transport Noise Corridor must satisfy the requirements of the Queensland Development Code.</p>	

Part D — Criteria for assessable development- Airfield precinct

Where development is categorised as assessable development - code assessment in the Table of Assessment, and located in a precinct, the assessment benchmarks are the criteria set out in Part D, Table 6.2.2.2.2 as well as the purpose statement and overall outcomes of this code.

Where development is categorised as assessable development - impact assessment, the assessment benchmarks become the whole of the planning scheme.

Table 6.2.2.2 Assessable development - Airfield precinct

Performance outcomes	Examples that achieve aspects of the Performance Outcomes
Built form and design	
PO1 Buildings and structures are of a height, scale and bulk which:	E1 Building height:

6 Zones

<ul style="list-style-type: none"> a. is consistent with the operation of an airfield; b. is in keeping with existing buildings or structures; c. minimises the visual impact of large-scale built form; d. does not cause adverse amenity impacts on nearby sensitive land uses and zones. 	<ul style="list-style-type: none"> a. complies with air regulations for obstacle heights with proximity to runways; b. does not exceed 8.5m where within 10m of the General residential zone.
<p>PO2</p> <p>Buildings and structures are designed and constructed to a high standard of design and construction, which:</p> <ul style="list-style-type: none"> a. adds visual interest to the streetscape, through variation in building materials, colours and features; b. does not result in blank, unarticulated walls fronting streets or public areas; c. articulates and identifies the administration and customer service areas of the building; d. avoid blank walls through façade articulation to create visual interest and deter graffiti and vandalism; e. incorporates high quality, low maintenance building materials; f. does not utilise reflective materials; g. reduce cluttering and visibility of plant and equipment on building roofs. 	<p>E2.1</p> <p>Development provides materials and finishes of a high quality that are not susceptible to stain, discolour or deterioration.</p>
	<p>E2.2</p> <p>Development incorporates articulated walls with variation, detail and colour to reduce the bulk and impact of development and minimise expansive blank walls.</p>
	<p>E2.3</p> <p>The main facade of the building directly addresses and faces the street and contains a mix of materials and colours.</p>
	<p>E2.4</p> <p>Building utilities such as air conditioning units and telecommunications equipment are designed to be visually integrated with the building.</p>
<p>Landscaping</p>	
<p>PO3</p> <p>Landscaping and screening is provided on the site to:</p> <ul style="list-style-type: none"> a. visually soften the built form, areas of hardstand and storage areas; b. reduces the visual impact of building bulk and presence, hard surface areas and mechanical plant associated with the on-site activities when viewed from the street; c. creates a secure and safe environment by incorporating key elements of crime prevention through environmental design; d. achieves the design principles outlined in Planning scheme policy - Integrated design. 	<p>E3</p> <p>Landscaping is provided and maintained in accordance with Planning scheme policy - Integrated design.</p>
<p>Fencing</p>	

<p>PO4</p> <p>The provision of fencing on site:</p> <ol style="list-style-type: none"> does not dominate the street or create safety issues; provides the level of security suitable to the nature of the use. 	<p>E4</p> <p>Where fencing is provided on the street frontage, it has a minimum transparency of 70%.</p>
Public access	
<p>PO5</p> <p>The use has a safe, clearly identifiable public access separate from service and vehicle and aircraft parking areas.</p>	<p>E5.1</p> <p>Pedestrian linkages are provided from the car parking areas directly to the main entrance of the building.</p>
	<p>E5.2</p> <p>Public access to the building is not provided through aircraft parking areas, service areas or, in the case of the Redcliffe airfield, in the airside area.</p>
Personal and property safety	
<p>PO6</p> <p>Buildings and spaces are designed and constructed to create a safe and secure environment by incorporating key crime prevention through environmental design principles, including:</p> <ol style="list-style-type: none"> casual surveillance opportunities and sight lines; way-finding cues and signage; light illuminates pathways and potential entrapment areas as well as maximising opportunities for penetration of natural light into spaces; minimise predictable routes and entrapment locations. 	<p>No example provided.</p>
Amenity	
<p>PO7</p> <p>The amenity of the area and adjacent sensitive land uses are protected from the impacts of dust, odour, noise, light, chemicals and other environmental nuisances.</p>	<p>No example provided.</p>
Car parking	
<p>PO8</p> <p>Car parking is provided on-site to meet the anticipated demand of employees and visitors and avoid adverse impacts on the external road network.</p>	<p>E8</p> <p>Car parking is provided in accordance with Schedule 7 - Car parking.</p>

6 Zones

<p>Note - Refer to Planning scheme policy - Integrated transport assessment for guidance on how to achieve compliance with this outcome.</p>	
<p>PO9</p> <p>At the Redcliffe airfield, adequate parking is provided away from aircraft movement areas.</p>	<p>E9</p> <p>Car parking at the Redcliffe airfield is not located in the airside area.</p>
<p>PO10</p> <p>The design of vehicle entry points and car parking areas:</p> <ol style="list-style-type: none"> does not impact on the safety of the external road network; ensures the safety of pedestrians at all times; ensures the safe movement of vehicles within the site; provides connections with car parking areas on adjoining sites where possible. 	<p>E10</p> <p>All vehicle entry points and car parking areas are designed and constructed in accordance with Australian Standard AS 2890.1 Parking facilities Part 1: Off-street car parking.</p>
<p>Traffic matters</p>	
<p>PO11</p> <p>Traffic generation, vehicle movement and on-site car parking associated with an activity:</p> <ol style="list-style-type: none"> provides safe, convenient and accessible access for vehicles and pedestrians; provides safe and convenient on-site parking and manoeuvring to meet anticipated parking demand; is appropriate to the road classification and carrying capacity of the local network and able to meet the additional demands generated by the development; does not result adverse impacts on the efficient and safe functioning of the road network. 	<p>No example provided.</p>
<p>Environmental impacts</p>	
<p>PO12</p> <p>Where a use is not an environmentally relevant activity under the <i>Environmental Protection Act 1994</i>, the release of any contaminant that may cause environmental harm is mitigated to an acceptable level.</p>	<p>E12</p> <p>Development achieves the standard listed in <i>Schedule 1 Air Quality Objectives, Environmental Protection (Air) Policy 2008</i>.</p>
<p>PO13</p>	<p>E13</p>

<p>Where a use is not an environmentally relevant activity under the <i>Environmental Protection Act 1994</i>, noise emissions at receptor sites are mitigated to an acceptable level.</p>	<p>Development does not generate noise exceeding the standards listed in <i>Schedule 1 Acoustic Quality Objectives, Environmental Protection (Noise) Policy 2008</i>.</p>
Loading and servicing	
<p>PO14</p> <p>Loading and servicing areas:</p> <ol style="list-style-type: none"> a. are not visible from the street frontage; b. are integrated into the design of the building; c. include screening and buffers to reduce negative impacts on adjoining sensitive land uses; d. where possible loading and servicing areas are consolidated and shared with adjoining sites. 	<p>No example provided.</p>
Waste	
<p>PO15</p> <p>Bins and bin storage areas are provided, designed and managed in accordance with Planning scheme policy – Waste.</p>	<p>No example provided:</p> <p>E</p> <p>Development is designed to meet the criteria in the Planning scheme policy - Waste and is demonstrated in a waste management program.</p>
Noise	
<p>PO16</p> <p>Noise generating uses do not adversely affect existing noise sensitive uses.</p> <p>Note - The use of walls, barriers or fences that are visible from or adjoin a road or public area are not appropriate noise attenuation measures unless adjoining a motorway, arterial road or rail line.</p> <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p>	<p>No example provided.</p>
<p>PO17</p> <p>Sensitive land uses are provided with an appropriate acoustic environment within designated external private outdoor living spaces and internal areas while:</p> <ol style="list-style-type: none"> a. contributing to safe and usable public spaces, through maintaining high levels of surveillance of parks, streets and roads that serve active transport 	<p>E17.1</p> <p>Development is designed to meet the criteria outlined in the Planning Scheme Policy – Noise.</p> <hr/> <p>E17.2</p> <p>Noise attenuation structures (e.g. walls, barriers or fences):</p>

6 Zones

<p>purposes (e.g. existing or future pedestrian paths or cycle lanes etc);</p> <p>b. maintaining the amenity of the streetscape.</p> <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p> <p>Note - Refer to Planning Scheme Policy – Integrated design for details and examples of noise attenuation structures.</p>	<p>a. are not visible from an adjoining road or public area unless:</p> <ul style="list-style-type: none"> i. adjoining a motorway or rail line; or ii. adjoining part of an arterial road that does not serve an existing or future active transport purpose (e.g. pedestrian paths or cycle lanes) or where attenuation through building location and materials is not possible. <p>b. do not remove existing or prevent future active transport routes or connections to the street network;</p> <p>c. are located, constructed and landscaped in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Refer to Planning scheme policy – Integrated design for details and examples of noise attenuation structures.</p> <p>Note - Refer to Overlay map – Active transport for future active transport routes.</p>
---	--

Hazardous chemicals

Note - To assist in demonstrating compliance with the following performance outcomes, a Hazard Assessment Report may be required to be prepared and submitted by a suitably qualified person in accordance with 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.

Note - Terms used in this section are defined in 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.

<p>PO18</p> <p>Off sites risks from foreseeable hazard scenarios involving hazardous chemicals are commensurate with the sensitivity of the surrounding land use zones.</p>	<p>E18.1</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of land zoned for vulnerable or sensitive land uses as described below:</p> <p>Dangerous Dose</p> <ul style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ul style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. b. For any hazard scenario involving fire or explosion: <ul style="list-style-type: none"> i. 7kPa overpressure; ii. 4.7kW/m2 heat radiation.
--	--

	<p>If criteria E19.1 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 0.5×10^{-6}/year.</p>
	<p>E18.2</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of a commercial or community activity land use zone as described below:</p> <p>Dangerous Dose</p> <ol style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ol style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air $<19.5\%$ or $>23.5\%$ at normal atmospheric pressure. b. For any hazard scenario involving fire or explosion: <ol style="list-style-type: none"> i. 7kPa overpressure; ii. 4.7kW/m² heat radiation. <p>If criteria E19.2 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 5×10^{-6}/year.</p>
	<p>E18.3</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of an industrial land use zone as described below:</p> <p>Dangerous Dose</p> <ol style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ol style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air $<19.5\%$ or $>23.5\%$ at normal atmospheric pressure. b. For any hazard scenario involving fire or explosion: <ol style="list-style-type: none"> i. 14kPa overpressure; ii. 12.6kW/m² heat radiation.

6 Zones

	If criteria E19.3 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 50×10^{-6} /year.
<p>PO19</p> <p>Buildings and package stores containing fire-risk hazardous chemicals are designed to detect the early stages of a fire situation and notify a designated person.</p>	<p>E19</p> <p>Buildings and package stores containing fire-risk hazardous chemicals are provided with 24 hour monitored fire detection system for early detection of a fire event.</p>
<p>PO20</p> <p>Common storage areas containing packages of flammable and toxic hazardous chemicals are designed with spill containment system(s) that are adequate to contain releases, including fire fighting media.</p>	<p>E20</p> <p>Storage areas containing packages of flammable and toxic hazardous chemicals are designed with spill containment system(s) capable of containing a minimum of the total aggregate capacity of all packages plus the maximum operating capacity of any fire protection system for the storage area(s) over a minimum of 60 minutes.</p>
<p>PO21</p> <p>Storage and handling areas, including manufacturing areas, containing hazardous chemicals in quantities greater than 2,500L or kg within a Local Government "flood hazard area" are located and designed in a manner to minimise the likelihood of inundation of flood waters from creeks, rivers, lakes or estuaries.</p>	<p>E21.1</p> <p>The base of any tank with a WC >2,500L or kg is higher than any relevant flood height level identified in an area's flood hazard area. Alternatively:</p> <ol style="list-style-type: none"> bulk tanks are anchored so they cannot float if submerged or inundated by water; and tank openings not provided with a liquid tight seal, i.e. an atmospheric vent, are extended above the relevant flood height level.
	<p>E21.2</p> <p>The lowest point of any storage area for packages >2,500L or kg is higher than any relevant flood height level identified in an area's flood hazard area. Alternatively, package stores are provided with impervious bund walls or racking systems higher than the relevant flood height level.</p>
Clearing of habitat trees where not located within the Environmental areas overlay map	
<p>PO22</p> <ol style="list-style-type: none"> Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected. Development does not result in the net loss of fauna habitat. Where development does result in the loss of a habitat tree, development will provide replacement fauna nesting boxes at the following rate of 1 nest box for every hollow removed. Where 	No example provided.

<p>hollows have not yet formed in trees > 80cm in diameter at 1.3m height, 3 nest boxes are required for every habitat tree removed.</p> <p>c. Development does not result in soil erosion or land degradation or leave land exposed for an unreasonable period of time but is rehabilitated in a timely manner</p> <p>Note: Further guidance on habitat trees is provided in Planning scheme policy - Environmental areas</p>

Stormwater	
<p>PO</p> <p>Minor stormwater drainage systems (internal and external) have the capacity to convey stormwater flows from frequent storm events for the fully developed upstream catchment whilst ensuring pedestrian and vehicular traffic movements are safe and convenient.</p>	<p>E</p> <p>The capacity of all minor drainage systems are designed in accordance with Planning scheme policy - Integrated design.</p>
	<p>E</p> <p>Stormwater pipe network capacity is to be calculated in accordance with the Hydraulic Grade Line method as detailed in Australian Rainfall and Runoff or QUDM.</p>
	<p>E</p> <p>Development ensures that roof and allotment drainage infrastructure is provided in accordance with the relevant level as identified in QUDM.</p>
<p>PO</p> <p>Major stormwater drainage system(s) have the capacity to safely convey stormwater flows for the 1% AEP event for the fully developed upstream catchment.</p>	<p>E</p> <p>The internal drainage system safely and adequately conveys the stormwater flows for the 1% AEP event for the fully developed upstream catchment through the site.</p>
	<p>E</p> <p>The external (downstream) drainage system safely conveys the stormwater flows for the 1% AEP event for the fully developed upstream catchment without allowing the flows to encroach upon private lots.</p>
	<p>E</p>

	<p>Overland flow paths from roads and public open space areas do not pass through private lots. Drainage pathways are provided to accommodate overland flows from roads and public open space areas.</p> <p>E</p> <p>The flow velocity in all unlined or soft faced open drains is kept within acceptable limits for the type of material or lining and condition of the channel.</p> <p>Note - Refer to QUDM for recommended average flow velocities.</p>
<p>PO</p> <p>Provide measures to properly manage surface flows for the 1% AEP event (for the fully developed catchment) draining to and through the land to ensure no actionable nuisance is created to any person or premises as a result of the development. The development must not result in ponding on adjacent land, redirection of surface flows to other premises or blockage of a surface flow relief path for flows exceeding the design flows for any underground system within the development.</p>	<p>E</p> <p>The stormwater drainage system is designed and constructed in accordance with Planning scheme policy - Integrated design.</p>
<p>PO32</p> <p>Stormwater run-off from the site is conveyed to a point of lawful discharge without causing actionable nuisance or annoyance to any person, property or premises.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details.</p> <p>Note - A downstream drainage discharge report in accordance with Planning scheme policy - Stormwater management may be required to demonstrate achievement of this performance outcome.</p> <p>Note - A watercourse as defined in the Water Act may be accepted as a lawful point of discharge providing the drainage discharge from the site does not increase the downstream flood levels during events up to and including the 1% AEP storm. An afflux of +20mm may be accepted on Council controlled land and road infrastructure. No worsening is ensured when stormwater is discharged into a catchment that includes State Transport Infrastructure.</p>	<p>No example provided.</p>
<p>PO33</p> <p>Stormwater generated from the development does not compromise the capacity of existing stormwater infrastructure downstream of the site.</p> <p>Note - A downstream drainage discharge report in accordance with Planning scheme policy - Stormwater management may be required to demonstrate achievement of this performance outcome.</p>	<p>No example provided.</p>

6 Zones

<p>PO34</p> <p>Stormwater quality management systems are designed and constructed to minimise the environmental impact of stormwater discharge on surface and underground receiving water quality and meet the design objectives in Tables A and B in Appendix 2 of the SPP.</p> <p>Note – A stormwater management plan prepared by a suitably qualified professional will be required in accordance with Planning scheme policy – Stormwater management.</p> <p>Where development:</p> <ol style="list-style-type: none"> is for an urban purpose that involves a land area 2500m² or greater in size; and results in 6 or more dwellings; or results in an impervious area greater than 25% of the net developable area, <p>stormwater quality management systems are designed, constructed, established and maintained to minimise the environmental impact of stormwater on surface, groundwater and receiving water environments and meet the design objectives outlined in Schedule 10 - Stormwater management design objectives.</p> <p>Note - A site based stormwater management plan prepared by a suitably qualified professional will be required in accordance with Planning Scheme Policy - Stormwater Management. Stormwater quality infrastructure is to be design in accordance with Planning scheme policy - Integrated Design (Appendix C).</p>	<p>No example provided.</p>						
<p>PO35</p> <p>Easements for drainage purposes are provided over:</p> <ol style="list-style-type: none"> stormwater pipes located in freehold land if the pipe diameter exceeds 300mm; overland flow paths where they cross more than one property boundary. <p>Note – Refer to Planning scheme policy – Integrated design for details:</p> <p>Note – Stormwater Drainage easement dimensions are provided in accordance with Section 3.8.5 of QUDM:</p> <p>Stormwater drainage pipes and structures through or within private land (including inter-allotment drainage) are protected by easements in favour of Council with sufficient area for practical access for maintenance purposes.</p>	<p>E</p> <p>No example provided:</p> <p>Stormwater drainage infrastructure (excluding detention and bio-retention systems) through or within private land (including inter-allotment drainage) is protected by easements in favour of Council. Minimum easement widths are as follows:</p> <table border="1" data-bbox="810 1664 1465 2033"> <thead> <tr> <th>Pipe Diameter</th> <th>Minimum easement width (excluding access requirements)</th> </tr> </thead> <tbody> <tr> <td>Stormwater pipe up to 825mm diameter</td> <td>3.0m</td> </tr> <tr> <td>Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter</td> <td>4.0m</td> </tr> </tbody> </table>	Pipe Diameter	Minimum easement width (excluding access requirements)	Stormwater pipe up to 825mm diameter	3.0m	Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter	4.0m

Stormwater pipe up to 825mm diameter	3.0m						
Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter	4.0m						

<p>Note - In order to achieve a lawful point of discharge, stormwater easements may also be required over temporary drainage channels/infrastructure where stormwater discharges to a balance lot prior to entering Council's stormwater drainage system.</p>	<table border="1" data-bbox="820 203 1452 353"> <tr> <td data-bbox="820 203 1139 353">Stormwater pipe greater than 825mm diameter</td> <td data-bbox="1139 203 1452 353">Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).</td> </tr> </table> <p>Note - Additional easement width may be required in certain circumstances in order to facilitate maintenance access to the stormwater system.</p> <p>Note - Refer to Planning Scheme Policy - Integrated Design (Appendix C) for easement requirements over open channels.</p>	Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).
Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).		
<p>PO</p> <p>Stormwater management facilities (excluding outlets) are located outside of riparian areas and prevent increased channel bed and bank erosion.</p>	<p>No example provided.</p>		

Site works and construction management	
<p>PO36</p> <p>The site and any existing structures are maintained in a tidy and safe condition.</p>	<p>No example provided.</p>
<p>PO37</p> <p>All works on-site are managed to:</p> <ol style="list-style-type: none"> minimise as far as practicable, impacts on adjoining or adjacent premises and the streetscape in regard to erosion and sedimentation, dust, noise, safety and light; minimise as far as possible, impacts on the natural environment; ensure stormwater discharge is managed in a manner that does not cause actionable nuisance or annoyance to any person or premises; avoid adverse impacts on street trees and their critical root zone. 	<p>E37.1</p> <p>Works incorporate temporary stormwater runoff, erosion and sediment controls and trash traps removal devices designed in accordance with the Urban Stormwater Quality Planning Guidelines, State Planning Policy, Schedule 10 - Stormwater management design objectives, Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design, including but not limited to the following:</p> <ol style="list-style-type: none"> stormwater is not discharged to adjacent properties in a manner that differs significantly from pre-existing conditions; stormwater discharged to adjoining and downstream properties does not cause scour and or erosion of any kind; stormwater discharge rates do not exceed pre-existing conditions; the 10% AEP storm event is the minimum design storm for all temporary diversion drains; and the 50% AEP storm event is the minimum design storm for all silt barriers and sedimentation basins.

6 Zones

	<p>f. minimum design storm for all temporary diversion drains and sedimentation basins in accordance with Schedule 10 - Stormwater management design objectives;</p> <p>g. ponding or concentration of stormwater does not occur in adjoining properties.</p> <p>E37.2</p> <p>Stormwater runoff, erosion and sediment controls are constructed in accordance with Planning scheme policy - Integrated design (Appendix C) prior to commencement of any clearing or earthworks and are maintained and adjusted as necessary at all times to ensure their ongoing effectiveness.</p> <p>Note - The measures are adjusted on-site to maximise their effectiveness.</p> <p>E37.3</p> <p>The completed earthworks area is stabilised using turf, established grass seeding, mulch or sprayed stabilisation techniques to control erosion and sediment and dust from leaving the property.</p> <p>E37.4</p> <p>Where works are proposed in proximity to an existing street tree, an inspection and a root management plan is undertaken by a qualified arborist which demonstrates and ensures that no permanent damage is caused to the tree:</p> <p>Existing street trees are protected and not damaged during works.</p> <p>Note - Where development occurs in the tree protection zone, measures and techniques as detailed in Australian Standard AS 4970 Protection of trees on development sites are adopted and implemented.</p>
<p>PO38</p> <p>Dust suppression measures are implemented during soil disturbances and construction works to protect nearby premises from unreasonable dust impacts.</p>	<p>E38</p> <p>No dust emissions extend beyond the boundaries of the site during soil disturbances and construction works.</p>
<p>PO39</p> <p>All development works on-site and including the transportation of material to and from the site are managed to not negatively impact the existing road network, the amenity of the surrounding area or the streetscape.</p>	<p>E39.1</p> <p>Construction traffic including contractor car parking is controlled in accordance with a traffic management plan, prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) to ensure all traffic movements to and from the site are safe.</p>

<p>Note – Where the amount of imported or exported material is greater than 50m³, a haulage route must be identified and approved by Council:</p> <p>Note - A Traffic Management Plan may be required to demonstrate compliance with this PO. A Traffic Management Plan is to be prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD).</p> <p>Note - A haulage route must be identified and approved by Council where imported or exported material is transported to the site via a road of Local Collector standard or less, and:</p> <ol style="list-style-type: none"> the aggregate volume of imported or exported material is greater than 1000m³; or the aggregate volume of imported or exported material is greater than 200m³ per day; or the proposed haulage route involves a vulnerable land use or shopping centre. <p>Note - A dilapidation report (including photographs) may be required for the haulage route to demonstrate compliance with this PO.</p> <p>Editor's note - Where associated with a State-controlled road, further requirements may apply, and approval may be required from the Department of Transport and Main Roads.</p>	<p>E39.2</p> <p>All contractor car parking is either provided on the development site, or on an alternative site in the general locality which has been set aside for car parking. Contractors vehicles are generally not to be parked in existing roads.</p> <p>Note – A Traffic Management Plan may be required for the site in accordance with the Manual of Uniform Traffic Control Devices (MUTCD):</p>
	<p>E39.3</p> <p>Any material dropped, deposited or spilled on the road(s) as a result of construction processes associated with the site are to be cleaned at all times.</p>
	<p>E</p> <p>Construction traffic to and from the development site uses the highest classification streets or roads where a choice of access routes is available. Haul routes for the transport of imported or spoil material and gravel pavement material along Council roads below sub-arterial standard must be approved routes.</p> <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p> <p>Note - A dilapidation report may be required to demonstrate compliance with this E.</p>
	<p>E</p> <p>Where works are carried out in existing roads, the works must be undertaken so that the existing roads are maintained in a safe and useable condition. Practical access for residents, visitors and services (including postal deliveries and refuse collection) is retained to existing lots during the construction period and after completion of the works.</p> <p>Note - A traffic control plan prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) will be required for any works that will affect access, traffic movements or traffic safety in existing roads.</p>
	<p>E</p> <p>Access to the development site is obtained via an existing lawful access point.</p>
<p>PO40</p>	<p>E40</p>

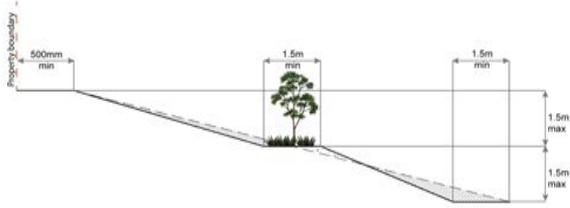

6 Zones

<p>All disturbed areas are to be progressively stabilised during construction and the entire site rehabilitated and substantially stabilised at the completion of construction.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details.</p>	<p>At completion of construction all disturbed areas of the site are to be:</p> <ol style="list-style-type: none"> topsoiled with a minimum compacted thickness of fifty (50) millimetres; grassed stabilised using turf, established grass seeding, mulch or sprayed stabilisation techniques. <p>Note - These areas are to be maintained during any maintenance period to maximise grass coverage from grass seeding of these areas:</p>
<p>PO</p> <p>Earthworks are undertaken to ensure that soil disturbances are staged into manageable areas.</p> <p>Note - A site specific Erosion and Sediment Control Plan (ESCP) will be required to demonstrate compliance with this PO. An ECP is to be prepared in accordance with Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design (Appendix C).</p>	<p>E</p> <p>Soil disturbances are staged into manageable areas of not greater than 3.5 ha.</p>
<p>PO41</p> <p>The clearing of vegetation on-site:</p> <ol style="list-style-type: none"> is limited to the area of infrastructure works, building areas and other necessary areas for the works; and includes the removal of declared weeds and other materials which are detrimental to the intended use of the land; is disposed of in a manner which minimises nuisance and annoyance to existing premises. <p>Note - No burning of cleared vegetation is permitted.</p>	<p>E41.1</p> <p>All native vegetation to be retained on-site is temporarily fenced or protected prior to and during development works.</p> <p>Note - No parking of vehicles of or storage of machinery or goods is to occur in these areas during development works.</p> <p>E41.2</p> <p>Disposal of materials is managed in one or more of the following ways:</p> <ol style="list-style-type: none"> all cleared vegetation, declared weeds, stumps, rubbish, car bodies, scrap metal and the like are removed and disposed of in a Council land fill facility; or all native vegetation with a diameter below 400mm is to be chipped and stored on-site. <p>Note - The chipped vegetation must be stored in an approved location, preferably a park or public land.</p>
<p>PO</p>	<p>E</p> <p>All development works are carried out within the following times:</p>

<p>All development works are carried out at times which minimise noise impacts to residents.</p>	<p>a. Monday to Saturday (other than public holidays) between 6:30am and 6:30pm on the same day;</p> <p>b. no work is to be carried out on Sundays or public holidays.</p> <p>Note - Work outside the above hours may be approved (in writing) where it can be demonstrated that the work will not cause significant inconvenience or disruption to the public, or the work is unlikely to cause annoyance or inconvenience to occupants of adjacent properties.</p>
<p>PO42</p> <p>Any alteration or relocation in connection with or arising from the development to any service, installation, plant, equipment or other item belonging to or under the control of the telecommunications authority, electricity authorities, the Council or other person engaged in the provision of public utility services is to be carried with the development and at no cost to Council.</p>	<p>No example provided.</p>

Earthworks	
<p>PO43</p> <p>On-site earthworks are designed to consider the visual and amenity impact as they relate to:</p> <ol style="list-style-type: none"> the natural topographical features of the site; short and long-term slope stability; soft or compressible foundation soils; reactive soils; low density or potentially collapsing soils; existing fill and soil contamination that may exist on-site; the stability and maintenance of steep rock slopes and batters; excavation (cut) and fill and impacts on the amenity of adjoining lots (e.g. residential). <p>Note – Filling or excavation works are to be completed within six months of the commencement date.</p>	<p>E43.1</p> <p>All cut and fill batters are provided with appropriate scour, erosion protection and run-off control measures including catch drains at the top of batters and lined batter drains as necessary.</p> <p>E43.2</p> <p>Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance of steep rock slopes and batters.</p> <p>E43.3</p> <p>Inspection and certification of steep rock slopes and batters is required by a suitably qualified and experienced RPEQ.</p> <p>E43.4</p> <p>All filling or excavation is contained on-site and is free draining.</p> <p>E43.5</p> <p>All fill placed on-site is:</p>

6 Zones

	<p>a. limited to that area required for the necessary for the approved use;</p> <p>b. clean and uncontaminated (i.e. no building waste, concrete, green waste, actual acid sulfate soils, potential acid sulfate soils or contaminated material etc.) material is used as fill).</p> <p>E43.6</p> <p>The site is prepared and the fill placed on-site in accordance with AS3798.</p> <p>Note - The fill is to be inspected and tested in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p>
<p>PO44</p> <p>Embankments are stepped, terraced and landscaped to not adversely impact on the visual amenity of the surrounding area.</p>	<p>E44</p> <p>Any embankments more than 1.5 metres in height are stepped, terraced and landscaped.</p> <p>Figure - Embankment</p> 
<p>PO45</p> <p>Filling or excavation is undertaken in a manner that:</p> <p>a. does not adversely impact on a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land;</p> <p>b. does not preclude reasonable access to a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p>	<p>E45.1</p> <p>No filling or excavation is undertaken in an easement issued in favour of Council or a public sector entity.</p> <p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p> <p>E45.2</p> <p>Filling or excavation that would result in any of the following is not carried out on-site:</p> <p>a. a reduction in cover over any Council or public sector entity infrastructure service to less than 600mm;</p>

	<p>b. an increase in finished surface grade over, or within 1.5m on each side of, the Council or public sector entity infrastructure above that which existed prior to the earthworks being undertaken;</p> <p>c. prevent reasonable access to Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the site for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity as is defined in the Sustainable Planning Schedule 2 of the Act 2009.</p>
<p>PO46</p> <p>Filling or excavation does not result in land instability.</p> <p>Note - Steep rock slopes and batters are inspected and certified for long-term stability by a suitably qualified and experienced geotechnical engineer with RPEQ qualifications. Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance.</p>	<p>No example provided.</p>
<p>PO47</p> <p>Development Filling or excavation does not result in:</p> <p>a. adverse impacts on the hydrological and hydraulic capacity of the waterway or floodway;</p> <p>b. increased flood inundation outside the site;</p> <p>c. any reduction in the flood storage capacity in the floodway;</p> <p>d. and any clearing of native vegetation.</p> <p>Note - To demonstrate compliance with this outcome, Planning Scheme Policy - Stormwater Management provides guidance on the preparation of a site based stormwater management plan by a suitably qualified professional. Refer to Planning scheme policy - Integrated design for guidance on infrastructure design and modelling requirements.</p>	<p>No example provided.</p>
<p>PO</p> <p>Filling or excavation on the development site is undertaken in a manner which does not create or accentuate problems associated with stormwater flows and drainage systems on land adjoining the site.</p>	<p>E</p> <p>Filling and excavation undertaken on the development site are shaped in a manner which does not:</p> <p>a. prevent stormwater surface flow which, prior to commencement of the earthworks, passed onto the development site, from entering the land; or</p> <p>b. redirect stormwater surface flow away from existing flow paths; or</p> <p>c. divert stormwater surface flow onto adjacent land, (other than a road), in a manner which:</p> <p>i. concentrates the flow; or</p>

6 Zones

	<ul style="list-style-type: none"> ii. increases the flow rates of stormwater over the affected section of the adjacent land above the situation which existed prior to the diversion; or iii. causes actionable nuisance to any person, property or premises.
--	--

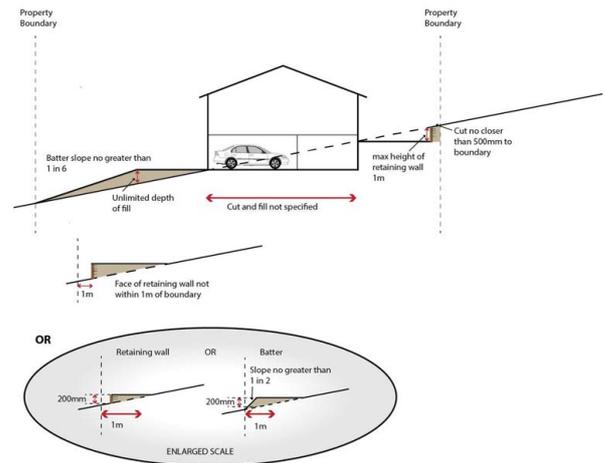

Retaining walls and structures

<p>PO48</p> <p>All earth retaining structures provide a positive interface with the streetscape and minimise impacts on the amenity of adjoining residents.</p> <p>Note - Refer to Planning scheme policy - Residential design for guidance on how to achieve compliance with this performance outcome.</p>	<p>E48</p> <p>Earth retaining structures:-</p> <ul style="list-style-type: none"> a. are not constructed of boulder rocks or timber; b. where height is no greater than 900mm, are provided in accordance with Figure - Retaining on a boundary; <p style="text-align: center;">Figure - Retaining on boundary</p>  <ul style="list-style-type: none"> c. where height is greater than 900mm but no greater than 1.5m, are to be setback at least the equivalent height of the retaining structure from any property boundary; d. where height is greater than 1.5m, are to be setback and stepped 1.5m vertical: 1.5m horizontal, terraced, landscaped and drained as shown below. <p style="text-align: center;">Figure - Cut</p>
---	--

- c. result in the top of any cut batter, or the exposed face of any freestanding retaining wall supporting that cut, being closer than 500mm to a property boundary;
- d. result in the toe of any fill batter, or exposed face of any freestanding retaining wall supporting that fill, being closer than 1.0m to a property boundary unless:
 - i. the depth of fill within the 1.0m strip does not exceed 200mm relative to natural ground level; or
 - ii. the batter slope within that 1.0m strip is no steeper than 1V to 2H.

THE NEW FIGURE BELOW IS PROPOSED AS PART OF THIS AMENDMENT

Figure - Filling or Excavation

PO

All earth retaining structures are to be certified as being designed and constructed in accordance with relevant Australian Standards and Building Code requirements.

E

Retaining walls are designed and certified by a RPEQ so that:

- a. the minimum design life (the period assumed in design for which a structure or structural element is required to perform its intended purpose without replacement or major structural repairs) for the earth retaining structure is that specified in Australian Standard AS 4678 Earth-retaining structures;
- b. earth retaining structures within the land and around areas of cut on or near the boundaries of the site must be designed to allow for live and dead loads associated with the land/premise's current occupancy and use;

	<p>c. where the adjoining land use rights or zoning allows for industrial uses a minimum live load of 25kPA must be allowed in the design of the retaining structure for these adjoining premises.</p> <p>Note - Retaining walls will only be approved following submission of a full detailed design certified by a RPEQ.</p>
--	--

Fire Services

Note - The provisions under this heading only apply if:

- a. the development is for, or incorporates:
- reconfiguring a lot for a community title scheme creating 1 or more vacant lots; or
 - material change of use for 2 or more sole occupancy units on the same lot, or within the same community titles scheme; or
 - material change of use for a Tourist park⁽⁸⁴⁾ with accommodation in the form of caravans or tents; or
 - material change of use for outdoor sales⁽⁵⁴⁾, outdoor processing or outdoor storage where involving combustible materials.

AND

- b. none of the following exceptions apply:
- the distributor-retailer for the area has indicated, in its netserv plan, that the premises will not be served by that entity's reticulated water supply; or
 - every part of the development site is within 60m walking distance of an existing fire hydrant on the distributor-retailer's reticulated water supply network, measured around all obstructions, either on or adjacent to the site.

Note - The provisions under this heading do not apply to buildings that are required by the Building Code of Australia to have a fire hydrant system complying with Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations or other fire fighting facilities which provide equivalent protection.

PO49

Development incorporates a fire fighting system that:

- satisfies the reasonable needs of the fire fighting entity for the area;
- is appropriate for the size, shape and topography of the development and its surrounds;
- is compatible with the operational equipment available to the fire fighting entity for the area;
- considers the fire hazard inherent in the materials comprising the development and their proximity to one another;
- considers the fire hazard inherent in the surrounds to the development site;
- is maintained in effective operating order.

Note - The Queensland Fire and Emergency Services is the entity currently providing the fire fighting function for the urban areas of the Moreton Bay Region.

E49.1

External fire hydrant facilities are provided on site to the standard prescribed under the relevant parts of *Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations*.

Note - For this requirement for accepted development, the following are the relevant parts of AS 2419.1 (2005) that may be applicable:

- in regard to the form of any fire hydrant - Part 8.5 and Part 3.2.2.1, with the exception that for Tourist parks⁽⁸⁴⁾ or development comprised solely of dwellings and their associated outbuildings, single outlet above-ground hydrants or suitably signposted in-ground hydrants would be an acceptable alternative;
- in regard to the general locational requirements for fire hydrants - Part 3.2.2.2 (a), (e), (f), (g) and (h) as well as Appendix B of AS 2419.1 (2005);
- in regard to the proximity of hydrants to buildings and other facilities - Part 3.2.2.2 (b), (c) and (d), with the exception that:
 - for dwellings and their associated outbuildings, hydrant coverage need only extend to the roof and external walls of those buildings;
 - for caravans and tents, hydrant coverage need only extend to the roof of those tents and caravans;
 - for outdoor sales⁽⁵⁴⁾, processing or storage facilities, hydrant coverage is required across the entire area of

6 Zones

	<p>the outdoor sales⁽⁵⁴⁾, outdoor processing and outdoor storage facilities;</p> <p>d. in regard to fire hydrant accessibility and clearance requirements - Part 3.5 and, where applicable, Part 3.6.</p> <hr/> <p>E49.2</p> <p>A continuous path of travel having the following characteristics is provided between the vehicle access point to the site and each external fire hydrant and hydrant booster point on the land:</p> <ol style="list-style-type: none"> a. an unobstructed width of no less than 3.5m; b. an unobstructed height of no less than 4.8m; c. constructed to be readily traversed by a 17 tonne HRV fire brigade pumping appliance; d. an area for a fire brigade pumping appliance to stand within 20m of each fire hydrant and 8m of each hydrant booster point. <hr/> <p>E49.3</p> <p>On-site fire hydrant facilities are maintained in effective operating order in a manner prescribed in <i>Australian Standard AS1851 (2012) – Routine service of fire protection systems and equipment</i>.</p>
<p>PO50</p> <p>On-site fire hydrants that are external to buildings, as well as the available fire fighting appliance access routes to those hydrants, can be readily identified at all times from, or at, the vehicular entry point to the development site.</p>	<p>E50</p> <p>For development that contains on-site fire hydrants external to buildings:</p> <ol style="list-style-type: none"> a. those external hydrants can be seen from the vehicular entry point to the site; or b. a sign identifying the following is provided at the vehicular entry point to the site: <ol style="list-style-type: none"> i. the overall layout of the development (to scale); ii. internal road names (where used); iii. all communal facilities (where provided); iv. the reception area and on-site manager's office (where provided); v. external hydrants and hydrant booster points; vi. physical constraints within the internal roadway system which would restrict access by fire fighting appliances to external hydrants and hydrant booster points. <p>Note - The sign prescribed above, and the graphics used are to be:</p>

	<p>a. in a form;</p> <p>b. of a size;</p> <p>c. illuminated to a level;</p> <p>which allows the information on the sign to be readily understood, at all times, by a person in a fire fighting appliance up to 4.5m from the sign.</p>
<p>PO51</p> <p>Each on-site fire hydrant that is external to a building is signposted in a way that enables it to be readily identified at all times by the occupants of any firefighting appliance traversing the development site.</p>	<p>E51</p> <p>For development that contains on-site fire hydrants external to buildings, those hydrants are identified by way of marker posts and raised reflective pavement markers in the manner prescribed in the technical note <i>Fire hydrant indication system</i> produced by the Queensland Department of Transport and Main Roads.</p> <p>Note - Technical note Fire hydrant indication system is available on the website of the Queensland Department of Transport and Main Roads.</p>
Use specific criteria	
Air services⁽³⁾	
<p>PO52</p> <p>Demonstrate capacity of existing infrastructure and airstrip to accommodate additional aircraft movements without adversely impacting amenity of surrounding residential uses and affecting the safe operation of the aerodrome.</p>	No example provided.
Caretaker's accommodation⁽¹⁰⁾	
<p>PO53</p> <p>Development for a caretaker's accommodation⁽¹⁰⁾:</p> <p>a. does not compromise the productivity of the use;</p> <p>b. is domestic in scale;</p> <p>c. provides adequate car parking provisions exclusive to the primary use of the site;</p> <p>d. is safe for the residents;</p> <p>e. has regard to the landscape and private recreation needs of the resident.</p>	<p>E53</p> <p>Caretaker's accommodation⁽¹⁰⁾:</p> <p>a. has a maximum GFA of 80m²;</p> <p>b. no more than 1 caretaker's accommodation⁽¹⁰⁾ is established per site;</p> <p>c. does not gain access from a separate driveway to the main use on the site;</p> <p>d. provides a minimum 16m² of private open space directly accessible from a habitable room;</p> <p>e. provides car parking in accordance with Schedule 7 - Car parking.</p>
Club⁽¹⁴⁾ and Community Use⁽¹⁷⁾	

6 Zones

<p>PO54</p> <p>Development is of a low scale and intensity that;</p> <ul style="list-style-type: none"> a. maintains its subordinate function and nexus to the airfield and aviation activities; b. does not interfere with the operation of the airfield. 	<p>No example provided.</p>
<p>Major electricity infrastructure⁽⁴³⁾, Substation⁽⁸⁰⁾ and Utility installation⁽⁸⁶⁾</p>	
<p>PO55</p> <p>The development does not have an adverse impact on the visual amenity of a locality and is:</p> <ul style="list-style-type: none"> a. high quality design and construction; b. visually integrated with the surrounding area; c. not visually dominant or intrusive; d. located behind the main building line; e. below the level of the predominant tree canopy or the level of the surrounding buildings and structures; f. camouflaged through the use of colours and materials which blend into the landscape; g. treated to eliminate glare and reflectivity; h. landscaped; i. otherwise consistent with the amenity and character of the zone and surrounding area. 	<p>E55.1</p> <p>Development is designed to minimise surrounding land use conflicts by ensuring infrastructure, buildings, structures and other equipment:</p> <ul style="list-style-type: none"> a. are enclosed within buildings or structures; b. are located behind the main building line; c. have a similar height, bulk and scale to the surrounding fabric; d. have horizontal and vertical articulation applied to all exterior walls. <p>E55.2</p> <p>A minimum 3m wide strip of dense planting is provided around the outside of the fenced area, between the development and street frontage, side and rear boundaries.</p>
<p>PO56</p> <p>Infrastructure does not have an impact on pedestrian health and safety.</p>	<p>E56</p> <p>Access control arrangements:</p> <ul style="list-style-type: none"> a. do not create dead-ends or dark alleyways adjacent to the infrastructure; b. minimise the number and width of crossovers and entry points; c. provide safe vehicular access to the site; d. do not utilise barbed wire or razor wire.
<p>PO57</p> <p>All activities associated with the development occur within an environment incorporating sufficient controls to ensure the facility:</p> <ul style="list-style-type: none"> a. generates no audible sound at the site boundaries where in a residential setting; or b. meet the objectives as set out in the Environmental Protection (Noise) Policy 2008. 	<p>E57</p> <p>All equipment which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure noise emissions meet the objectives as set out in the Environmental Protection (Noise) Policy 2008.</p>
<p>Telecommunications facility⁽⁸¹⁾</p> <p>Editor's note - In accordance with the Federal legislation Telecommunications facilities ⁽⁸¹⁾ must be constructed and operated in a manner that will not cause human exposure to electromagnetic radiation beyond the limits outlined in the Radiocommunications (Electromagnetic Radiation - Human Exposure) Standard 2003 and Radio Protection Standard for Maximum Exposure Levels to Radiofrequency Fields - 3Khz to 300Ghz.</p>	

<p>PO58</p> <p>Telecommunications facilities⁽⁸¹⁾ are co-located with existing telecommunications facilities⁽⁸¹⁾, Utility installation⁽⁸⁶⁾, Major electricity infrastructure⁽⁴³⁾ or Substation⁽⁸⁰⁾ if there is already a facility in the same coverage area.</p>	<p>E58.1</p> <p>New telecommunication facilities⁽⁸¹⁾ are co-located on existing towers with new equipment shelter and associated structures positioned adjacent to the existing shelters and structures.</p>
<p>PO59</p> <p>A new Telecommunications facility⁽⁸¹⁾ is designed and constructed to ensure co-masting or co-siting with other carriers both on the tower or pole and at ground level is possible in the future.</p>	<p>E58.2</p> <p>If not co-located with an existing facility, all co-location opportunities have been investigated and fully exhausted within a 2km radius of the site.</p>
<p>PO60</p> <p>Telecommunications facilities⁽⁸¹⁾ do not conflict with lawful existing land uses both on and adjoining the site.</p>	<p>E59</p> <p>A minimum area of 45m² is available at ground level to allow for additional equipment shelters and associated structures for the purpose of co-locating on the proposed facility.</p>
<p>PO61</p> <p>The Telecommunications facility⁽⁸¹⁾ does not have an adverse impact on the visual amenity of a locality and is:</p> <ol style="list-style-type: none"> high quality design and construction; visually integrated with the surrounding area; not visually dominant or intrusive; located behind the main building line; below the level of the predominant tree canopy or the level of the surrounding buildings and structures; camouflaged through the use of colours and materials which blend into the landscape; treated to eliminate glare and reflectivity; landscaped; otherwise consistent with the amenity and character of the zone and surrounding area. 	<p>E60</p> <p>The development results in no net reduction in the minimum quantity and standard of landscaping, private or communal open space or car parking spaces required under the planning scheme or under an existing development approval.</p> <p>E61.1</p> <p>Where in an urban area, the development does not protrude more than 5m above the level of the existing treeline, prominent ridgeline or building rooftops in the surrounding townscape.</p> <p>E61.2</p> <p>In all other areas towers do not exceed 35m in height.</p> <p>E61.3</p> <p>Towers, equipment shelters and associated structures are of a design, colour and material to:</p> <ol style="list-style-type: none"> reduce recognition in the landscape; reduce glare and reflectivity. <p>E61.4</p> <p>All structures and buildings are setback behind the main building line and a minimum of 10m from side and rear boundaries, except where in the Industry and Extractive industry zones, the minimum side and rear setback is 3m.</p> <p>Where there is no established building line the facility is located at the rear of the site.</p>

6 Zones

	<p>E61.5</p> <p>The facility is enclosed by security fencing or by other means to ensure public access is prohibited.</p>
<p>PO62</p> <p>Lawful access is maintained to the site at all times that does not alter the amenity of the landscape or surrounding uses.</p>	<p>E61.6</p> <p>A minimum 3m wide strip of dense planting is provided around the perimeter of the fenced area, between the facility and street frontage and adjoining uses.</p> <p>Note - Landscaping is provided in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person, to ensure compliance with Planning scheme policy - Integrated design.</p>
<p>PO63</p> <p>All activities associated with the development occur within an environment incorporating sufficient controls to ensure the facility generates no audible sound at the site boundaries where in a residential setting.</p>	<p>E62</p> <p>An Access and Landscape Plan demonstrates how 24 hour vehicular access will be obtained and maintained to the facility in a manner that is appropriate to the site's context.</p>
	<p>E63</p> <p>All equipment comprising the Telecommunications facility⁽⁸¹⁾ which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure no noise from this equipment can be heard, or felt at the site boundary.</p>
<p>Values and constraints criteria</p> <p>Note - The relevant values and constraints criteria do not apply where the development is consistent with a current Development permit for Reconfiguring a lot or Material change of use or Operational work, where that approval has considered and addressed (e.g. through a development footprint plan (or similar in the case of Landslide hazard) or conditions of approval) the identified value or constraint under this planning scheme.</p>	
<p>Acid sulfate soils - (refer Overlay map - Acid sulfate soils to determine if the following assessment criteria apply)</p> <p>Note - To demonstrate achievement of the performance outcome, an Acid sulfate soils (ASS) investigation report and soil management plan is prepared by a qualified engineer. Guidance for the preparation an ASS investigation report and soil management plan is provided in Planning scheme policy - Acid sulfate soils.</p>	
<p>PO64</p> <p>Development avoids disturbing acid sulfate soils. Where development disturbs acid sulfate soils, development:</p>	<p>E64</p> <p>Development does not involve:</p>

<ul style="list-style-type: none"> a. is managed to avoid or minimise the release of surface or groundwater flows containing acid and metal contaminants into the environment; b. protects the environmental and ecological values and health of receiving waters; c. protects buildings and infrastructure from the effects of acid sulfate soils. 	<ul style="list-style-type: none"> a. excavation or otherwise removing of more than 100m³ of soil or sediment where below than 5m Australian Height datum AHD; or b. filling of land of more than 500m³ of material with an average depth of 0.5m or greater where below the 5m Australian Height datum AHD.
<p>Bushfire hazard (refer Overlay map - Bushfire hazard to determine if the following assessment criteria apply)</p> <p>Note - To demonstrate achievement of the performance outcomes, a bushfire management plan is prepared by a suitably qualified person. Guidance for the preparation of a bushfire management plan is provided in Planning scheme policy – Bushfire prone areas.</p> <p>Note - Unacceptable risk is defined as a situation where people or property are exposed to a predictable hazard event that may result in serious injury, loss of life, failure of community infrastructure, or property damage.</p>	
<p>PO65</p> <p>Development:</p> <ul style="list-style-type: none"> a. minimises the number of buildings and people working and living on a site exposed to bushfire risk; b. ensures the protection of life during the passage of a fire front; c. is located and designed to increase the chance of survival of buildings and structures during a bushfire; d. minimises bushfire risk from build up of fuels around buildings and structures; e. ensure safe and effective access for emergency services during a bushfire. 	<p>E65.1</p> <p>Buildings and structures are:</p> <ul style="list-style-type: none"> a. not located on a ridgeline; b. not located on land with a slope greater than 15% (see Overlay map - Landslide hazard); c. dwellings are located on east to south facing slopes. <p>E65.2</p> <p>Buildings and structures have contained within the site:</p> <ul style="list-style-type: none"> a. a separation from classified vegetation of 20m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater; b. a separation from low threat vegetation of 10m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater; c. a separation of no less than 10m between a fire fighting water supply extraction point and any classified vegetation, buildings and other roofed structures; d. an area suitable for a standard fire fighting appliance to stand within 3m of a fire fighting water supply extraction point; and e. an access path suitable for use by a standard fire fighting appliance having a formed width of at least 4m, a cross-fall of no greater than 5%, and a longitudinal gradient of no greater than 25%: <ul style="list-style-type: none"> i. to, and around, each building and other roofed structure; and ii. to each fire fighting water supply extraction point.

6 Zones

	<p>Note - The meaning of the terms classified vegetation and low threat vegetation as well as the method of calculating the bushfire attack level are as described in Australian Standard AS 3959</p>
<p>PO66</p> <p>Development and associated driveways and access ways:</p> <ol style="list-style-type: none"> avoid potential for entrapment during a bushfire; ensure safe and effective access for emergency services during a bushfire; enable safe evacuation for occupants of a site during a bushfire. 	<p>E66</p> <p>A length of driveway:</p> <ol style="list-style-type: none"> to a road does not exceed 100m between the most distant part of a building used for any purpose other than storage and the nearest part of a public road; has a maximum gradient no greater than 12.5%; have a minimum width of 3.5m; accommodate turning areas for fire fighting appliances in accordance with Qld Fire and Emergency Services' Fire Hydrant and Vehicle Access Guideline.
<p>PO67</p> <p>Development provides an adequate water supply for fire-fighting purposes.</p>	<p>E67</p> <ol style="list-style-type: none"> a reticulated water supply is provided by a distributor retailer for the area or; where not connected to a reticulated water supply, on-site fire fighting water storage containing not less than 10 000 litres (tanks with fire brigade tank fittings, swimming pools) is located within 10m of buildings and structures. Where a swimming pool is the nominated on-site fire fighting water storage source, vehicle access is provided to within 3m of that water storage source. Where a tank is the nominated on-site fire fighting water storage source, it includes: <ol style="list-style-type: none"> a hardstand area allowing medium rigid vehicles (15 tonne fire appliance) access within 6m of the tank; fire brigade tank fittings, comprising 50mm ball valve and male camlock coupling and, if underground, an access hole of 200mm (minimum) to accommodate suction lines.
<p>PO68</p> <p>Development:</p> <ol style="list-style-type: none"> does not present unacceptable risk to people or environment due to the impact of bushfire on dangerous goods or combustible liquids; does not present danger or difficulty to emergency services for emergency response or evacuation. <p>Editor's note - Unacceptable risk is defined as a situation where people or property are exposed to a predictable hazard event that may result in serious injury, loss of life, failure of community infrastructure, or property damage.</p>	<p>E68</p> <p>Development does not involve the manufacture or storage of hazardous chemicals.</p>

Environmental areas (refer Overlay map - Environmental areas to determine if the following assessment criteria apply)

Note – The following are excluded from the native vegetation clearing provisions of this planning scheme:

- a. Clearing of native vegetation located within an approved development footprint;
- b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency;
- c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure;
- d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental Management and Conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence;
- e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes;
- f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council;
- g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens;
- h. Grazing of native pasture by stock;
- i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development

Note - Definition for native vegetation is located in Schedule 1 Definitions.

Note - Native vegetation subject to this criteria primarily comprises of matters of national environmental significance (MNES), matters of state environmental significance (MSES). They also comprise some matters of local environmental significance (MLES). A MLES is defined in Schedule 1.2, Administrative definitions. A list of the elements that apply to the mapped MSES and MLES is provided in Appendix 1 of the Planning scheme policy - Environmental areas.

Editors' Note - The accuracy of overlay mapping can be challenged through the development application process (code assessable development) or by way of a planning scheme amendment. See Council's website for details.

Note - To demonstrate achievement of the performance outcome, an ecological assessment, vegetation management plan and fauna management plan, as required, are prepared by a suitably qualified person. Guidance for the preparation of above mentioned reports is provided in Planning scheme policy - Environmental areas.

Vegetation clearing, ecological value and connectivity

PO69

Development avoids locating in a High Value Area or a Value Offset Area. Where it is not practicable or reasonable for development to avoid establishing in these areas, development must ensure that:

- a. the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area is maintained and not lost or degraded;
- b. on-site mitigation measures, mechanisms or processes are in place demonstrating the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area are maintained. For example, this can

No example provided.

6 Zones

<p>be achieved through replacement, restoration or rehabilitation planting as part of any proposed covenant, the development of a Vegetation Management Plan, a Fauna Management Plan, and any other on-site mitigation options identified in the Planning scheme policy - Environmental areas*.</p> <p>* Editor's note - This is not a requirement for an environmental offset under the Environmental Offsets Act 2014.</p>	
<p>PO70</p> <p>Development provides for safe, unimpeded, convenient and ongoing wildlife movement and establishes and maintains habitat connectivity by:</p> <ol style="list-style-type: none"> retaining habitat trees; providing contiguous patches of habitat; provide replacement and rehabilitation planting to improve connectivity; avoiding the creation of fragmented and isolated patches of habitat; providing wildlife movement infrastructure. <p>Editor's note - Wildlife movement infrastructure may include refuge poles, tree boulevarding, 'stepping stone' vegetation plantings, tunnels, appropriate wildlife fencing; culverts with ledges, underpasses, overpasses, land bridges and rope bridges. Further information is provided in Planning scheme policy – Environmental areas.</p>	<p>No example provided.</p>
<p>Vegetation clearing and habitat protection</p>	
<p>PO71</p> <p>Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected.</p>	<p>No example provided.</p>
<p>PO72</p> <p>Development does not result in the net loss or degradation of habitat value in a High Value Area or a Value Offset Area. Where development does result in the loss or degradation of habitat value, development will:</p> <ol style="list-style-type: none"> rehabilitate, revegetate, restore and enhance an area to ensure it continues to function as a viable and healthy habitat area; provide replacement fauna nesting boxes in the event of habitat tree loss in accordance with Planning scheme policy - Environmental areas; undertake rehabilitation, revegetation and restoration in accordance with the South East Queensland Ecological Restoration Framework. 	<p>No example provided.</p>

<p>PO73</p> <p>Development ensures safe, unimpeded, convenient and ongoing wildlife movement and habitat connectivity by:</p> <ul style="list-style-type: none"> a. providing contiguous patches of habitat; b. avoiding the creation of fragmented and isolated patches of habitat; c. providing wildlife movement infrastructure; d. providing replacement and rehabilitation planting to improve connectivity. 	No example provided.
Vegetation clearing and soil resource stability	
<p>PO74</p> <p>Development does not:</p> <ul style="list-style-type: none"> a. result in soil erosion or land degradation; b. leave cleared land exposed for an unreasonable period of time but is rehabilitated in a timely manner. 	No example provided.
Vegetation clearing and water quality	
<p>PO75</p> <p>Development maintains or improves the quality of groundwater and surface water within, and downstream, of a site by:</p> <ul style="list-style-type: none"> a. ensuring an effective vegetated buffers and setbacks from waterbodies is retained to achieve natural filtration and reduce sediment loads; b. avoiding or minimising changes to landforms to maintain hydrological water flows; c. adopting suitable measures to exclude livestock from entering a waterbody where a site is being used for animal husbandry⁽⁴⁾ and animal keeping⁽⁵⁾ activities. 	No example provided.
<p>PO76</p> <p>Development minimises adverse impacts of stormwater run-off on water quality by:</p> <ul style="list-style-type: none"> a. minimising flow velocity to reduce erosion; b. minimising hard surface areas; c. maximising the use of permeable surfaces; d. incorporating sediment retention devices; e. minimising channelled flow. 	No example provided.
Vegetation clearing and access, edge effects and urban heat island effects	
<p>PO77</p> <p>Development retains safe and convenient public access in a manner that does not result in the adverse edge effects or the loss or degradation of biodiversity values within the environment.</p>	No example provided.

6 Zones

<p>PO78</p> <p>Development minimises potential adverse ‘edge effects’ on ecological values by:</p> <ol style="list-style-type: none"> providing dense planting buffers of native vegetation between a development and environmental areas; retaining patches of native vegetation of greatest possible size where located between a development and environmental areas ; restoring, rehabilitating and increasing the size of existing patches of native vegetation; ensuring that buildings and access (public and vehicle) are setback as far as possible from environmental areas and corridors; landscaping with native plants of local origin. <p>Editor's note - Edge effects are factors of development that go detrimentally affecting the composition and density of natural populations at the fringe of natural areas. Factors include weed invasion, pets, public and vehicle access, nutrient loads, noise and light pollution, increased fire frequency and changes in the groundwater and surface water flow.</p>	<p>No example provided.</p>
<p>PO79</p> <p>Development avoids adverse microclimate change and does not result in increased urban heat island effects. Adverse urban heat island effects are minimised by:</p> <ol style="list-style-type: none"> pervious surfaces; providing deeply planted vegetation buffers and green linkage opportunities; landscaping with local native plant species to achieve well-shaded urban places; increasing the service extent of the urban forest canopy. 	<p>No example provided.</p>
<p>Vegetation clearing and Matters of Local Environmental Significance (MLES) environmental offsets</p>	
<p>PO80</p> <p>Where development results in the unavoidable loss of native vegetation within a Value Offset Area MLES waterway buffer or a Value Offset Area MLES wetland buffer, an environmental offset is required in accordance with the environmental offset requirements identified in Planning scheme policy - Environmental areas.</p> <p>Editor's note - For MSES Koala Offsets, the environmental offset provisions in Schedule 11 of the Regulation, in combination with the requirements of the Environmental Offsets Act 2014, apply.</p>	<p>No example provided.</p>
<p>Heritage and landscape character (refer Overlay map - Heritage and landscape character to determine if the following assessment criteria apply)</p> <p>Note - To assist in demonstrating achievement of heritage performance outcomes, a Cultural heritage impact assessment report is prepared by a suitably qualified person verifying the proposed development is in accordance with The Australia ICOMOS Burra Charter.</p>	

Note - To assist in demonstrating achievement of this performance outcome, a Tree assessment report is prepared by a qualified arborist in accordance with Planning scheme policy – Heritage and landscape character. The Tree assessment report will also detail the measures adopted in accordance with AS 4970-2009 Protection of trees on development sites.

Note - Places, including sites, objects and buildings having local cultural heritage significance, are identified on Overlay map - Heritage and landscape character and listed in Schedule 1 of Planning scheme policy - Heritage and landscape character. Places also having cultural heritage significance at a State level and being entered in the Queensland Heritage Register, are also identified in Schedule 1 of Planning scheme policy - Heritage and landscape character.

<p>PO81</p> <p>Development will:</p> <ol style="list-style-type: none"> a. not diminish or cause irreversible damage to the cultural heritage values present on the site, and associated with a heritage site, object or building; b. protect the fabric and setting of the heritage site, object or building; c. be consistent with the form, scale and style of the heritage site, object or building; d. utilise similar materials to those existing, or where this is not reasonable or practicable, neutral materials and finishes; e. incorporate complementary elements, detailing and ornamentation to those present on the heritage site, object or building; f. retain public access where this is currently provided. 	<p>E81</p> <p>Development is for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value.</p> <p>Note - A cultural heritage conservation management plan for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value is prepared in accordance with Planning scheme policy - Heritage and landscape character. The plan is sent to, and approved by Council prior to the commencement of any preservation, maintenance, repair and restoration works.</p>
<p>PO82</p> <p>Demolition and removal is only considered where:</p> <ol style="list-style-type: none"> a. a report prepared by a suitably qualified conservation architect or conservation engineer demonstrates that the building is structurally unsound and is not reasonably capable of economic repair; or b. demolition is confined to the removal of outbuildings, extensions and alterations that are not part of the original structure; or c. limited demolition is performed in the course of repairs, maintenance or restoration; or d. demolition is performed following a catastrophic event which substantially destroys the building or object. 	<p>No example provided.</p>
<p>PO83</p> <p>Where development is occurring on land adjoining a site of cultural heritage value, the development is to be sympathetic to and consistent with the cultural heritage values present on the site and not result in their values being eroded, degraded or unreasonably obscured from public view.</p>	<p>No example provided.</p>
<p>PO84</p>	<p>E84</p> <p>Development does:</p>

6 Zones

<p>Development does not adversely impact upon the health and vitality of significant trees. Where development occurs in proximity to a significant tree, construction measures and techniques as detailed in AS 4970-2009 Protection of trees on development sites are adopted to ensure a significant tree's health, wellbeing and vitality.</p> <p>Significant trees are only removed where they are in a poor state of health or where they pose a health and safety risk to persons or property. A Tree Assessment report prepared by a suitably qualified arborist confirming a tree's state of health is required to demonstrate achievement of this performance outcome.</p>	<ul style="list-style-type: none"> a. not result in the removal of a significant tree; b. not occur within 20m of a protected tree; c. involve pruning of a tree in accordance with Australian Standard AS 4373-2007 – Pruning of Amenity Trees.
<p>Landslide hazard (refer Overlay map - Landslide hazard to determine if the following assessment criteria apply)</p> <p>Note - To demonstrate achievement of the performance outcomes, a site-specific geotechnical assessment report is prepared by a qualified engineer. Guidance for the preparation of a geotechnical assessment report is provided in Planning scheme policy – Landslide hazard.</p>	
<p>PO85</p> <p>Development:</p> <ul style="list-style-type: none"> a. maintains the safety of people and property on a site and neighbouring sites from landslides; b. ensures the long-term stability of the site considering the full nature and end use of the development; c. ensures site stability during all phases of construction and development; d. minimises disturbance of natural drainage patterns of the site and does not result in the redirection or alteration of the existing flow of surface or groundwater e. minimises adverse visual impacts on the amenity of adjoining residents and provides a positive interface with the streetscape. 	<p>E85</p> <p>Development does not:</p> <ul style="list-style-type: none"> a. involve earthworks exceeding 50m³; b. involve cut and fill having a height greater than 600mm; c. involve any retaining wall having a height greater than 600mm; d. redirect or alter the existing flow of surface or groundwater.
<p>PO86</p> <p>Buildings are designed to respond to sloping topography in the siting, design and form of buildings and structures by:</p> <ul style="list-style-type: none"> a. minimising overuse of cut and fill to create single flat pads and benching; b. avoiding expanses of retaining walls, loss of trees and vegetation and interference with natural drainage systems; c. minimising any adverse visual impact on the landscape character ; d. Protect the amenity of adjoining properties. 	<p>E86</p> <p>Buildings, excluding domestic outbuildings:</p> <ul style="list-style-type: none"> a. are split-level, multiple-slab, pier or pole construction; b. are not single plane slab on ground.
<p>PO87</p>	<p>E87</p> <p>Development does not involve the manufacture, handling or storage of hazardous chemicals.</p>

<p>Development protects the safety of people, property and the environment from the impacts of landslide on hazardous chemicals manufactured, handled or stored by incorporating design measures to ensure:</p> <ol style="list-style-type: none"> the long-term stability of the development site considering the full nature and end use of the development; site stability during all phases of construction and development; the development is not adversely affected by landslide activity originating on sloping land above the site; emergency access and access from the site for the public and emergency vehicles is available and is not at risk from landslide. 	
<p>Infrastructure buffers (refer Overlay map - Infrastructure buffers to determine if the following assessment criteria apply)</p>	
<p>PO88</p> <p>Odour sensitive development is separated from landfill sites so they are not adversely affected by odour emission or other air pollutant impacts.</p>	<p>E88</p> <p>The following uses are not located within a Landfill buffer:</p> <ol style="list-style-type: none"> Caretaker's accommodation⁽¹⁰⁾; Community residence⁽¹⁶⁾; Dual occupancy⁽²¹⁾; Dwelling house⁽²²⁾; Dwelling unit⁽²³⁾; Hospital⁽³⁶⁾; Rooming accommodation⁽⁶⁹⁾; Multiple dwelling⁽⁴⁹⁾; Non-resident workforce accommodation⁽⁵²⁾; Relocatable home park⁽⁶²⁾; Residential care facility⁽⁶⁵⁾; Resort complex⁽⁶⁶⁾; Retirement facility⁽⁶⁷⁾; Rural workers' accommodation⁽⁷¹⁾; Short-term accommodation⁽⁷⁷⁾; Tourist park⁽⁸⁴⁾.
<p>Overland flow path (refer Overlay map - Overland flow path to determine if the following assessment criteria apply)</p> <p>Note - The applicable river and creek flood planning levels associated with defined flood event (DFE) within the inundation area can be obtained by requesting a flood check property report from Council.</p>	
<p>PO89</p> <p>Development:</p> <ol style="list-style-type: none"> minimises the risk to persons from overland flow; does not increase the potential for damage from overland flow either on the premises or other premises, public land, watercourses, roads or infrastructure. 	<p>No example provided.</p>
<p>PO90</p>	<p>No example provided.</p>

6 Zones

<p>Development:</p> <ol style="list-style-type: none"> maintains the conveyance of overland flow predominantly unimpeded through the premises for any event up to and including the 1% AEP for the fully developed upstream catchment; does not concentrate, intensify or divert overland flow onto an upstream, downstream or surrounding property. <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow.</p>	
<p>PO91</p> <p>Development does not:</p> <ol style="list-style-type: none"> directly, indirectly or cumulatively cause any increase in overland flow velocity or level; increase the potential for flood damage from overland flow either on the premises or other premises, public lands, watercourses, roads or infrastructure. <p>Note - Open concrete drains greater than 1m in width are not an acceptable outcome, nor are any other design options that may increase scouring.</p>	<p>No example provided.</p>
<p>PO92</p> <p>Development ensures that public safety and the risk to the environment are not adversely affected by a detrimental impact of overland flow on a hazardous chemical located or stored on the premises.</p>	<p>E92</p> <p>Development ensures that a hazardous chemical is not located or stored in an Overland flow path area.</p> <p>Note - Refer to the Work Health and Safety Act 2011 and associated Regulation and Guidelines, the Environmental Protection Act 1994 and the relevant building assessment provisions under the Building Act 1975 for requirements related to the manufacture and storage of hazardous substances.</p>
<p>PO93</p> <p>Development which is not in a Rural zone ensures that overland flow is not conveyed from a road or public open space onto a private lot.</p>	<p>E93</p> <p>Development which is not in a Rural zone that an overland flow paths and drainage infrastructure is provided to convey overland flow from a road or public open space area away from a private lot.</p>
<p>PO94</p>	<p>E94.1</p> <p>Development ensures that roof and allotment drainage infrastructure is provided in accordance with the following relevant level as identified in QUDM:</p>

<p>Development ensures that inter-allotment drainage infrastructure, overland flow paths and open drains through private property cater for overland flows for a fully developed upstream catchment and are able to be easily maintained.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow</p>	<p>a. Urban area – Level III; b. Rural area – N/A; c. Industrial area – Level V; d. Commercial area – Level V.</p> <p>E94.2</p> <p>Development ensures that inter-allotment drainage infrastructure is designed to accommodate any event up to and including the 1% AEP for the fully developed upstream catchment.</p>
<p>PO95</p> <p>Development protects the conveyance of overland flow such that an easement for drainage purposes is provided over:</p> <p>a. a stormwater pipe if the nominal pipe diameter exceeds 300mm;</p> <p>b. an overland flow path where it crosses more than one premises;</p> <p>c. inter-allotment drainage infrastructure.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details and examples.</p> <p>Note - Stormwater Drainage easement dimensions are provided in accordance with Section 3.8.5 of QUDM.</p>	<p>No example provided.</p>
<p>Additional criteria for development for a Park⁽⁵⁷⁾</p>	
<p>PO96</p> <p>Development for a Park⁽⁵⁷⁾ ensures that the design and layout responds to the nature of the overland flow affecting the premises such that:</p> <p>a. public benefit and enjoyment is maximised;</p> <p>b. impacts on the asset life and integrity of park structures is minimised;</p> <p>c. maintenance and replacement costs are minimised.</p>	<p>E96</p> <p>Development for a Park⁽⁵⁷⁾ ensures works are provided in accordance with the requirements set out in Appendix B of the Planning scheme policy - Integrated design.</p>
<p>Riparian and wetland setbacks</p>	
<p>PO97</p> <p>Development provides and maintains a suitable setback from waterways and wetlands that protects natural and environmental values. This is achieved by recognising and responding to the following matters:</p>	<p>E97</p> <p>Development does not occur within:</p> <p>a. 50m from top of bank for W1 waterway and drainage line</p>

6 Zones

<ul style="list-style-type: none">a. impact on fauna habitats;b. impact on wildlife corridors and connectivity;c. impact on stream integrity;d. impact of opportunities for revegetation and rehabilitation planting;e. edge effects.	<ul style="list-style-type: none">b. 30m from top of bank for W2 waterway and drainage linec. 20m from top of bank for W3 waterway and drainage lined. 100m from the edge of a Ramsar wetland, 50m from all other wetlands. <p>Note - W1, W2 and W3 waterway and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.</p>
---	---

Transport noise corridors (refer Overlay map - Transport noise corridors to determine if the following assessment criteria apply)

Note - This is for information purposes only. No requirements for accepted development or criteria for assessable development apply. Development located within a Transport Noise Corridor must satisfy the requirements of the Queensland Development Code

6.2.2.3 Utilities precinct

6.2.2.3.1 Purpose – Utilities

1. The Utilities precinct comprises a number of the Regions' key infrastructure facilities including, but not limited to, Lake Samsonvale (North Pine Dam), Lake Kurwongbah (Sideling Creek Dam), bulk electricity supply substations, rail lines, wastewater treatment plants, landfill sites, infrastructure provider depots and operations areas and some Council facilities. The purpose of the code will be achieved through the following overall outcomes for the Utilities precinct:
 - a. Development supports and meets the servicing needs of the community.
 - b. Development establishes in a concentrated and integrated manner to achieve efficient and effective functioning of utilities.
 - c. Development ensures the ongoing viability and operation of essential utilities.
 - d. Restrict development that may compromise or limit the ongoing operation and expansion of necessary utilities.
 - e. Adequate and sensible buffering and separation is provided between development and sensitive land uses.
 - f. Crime prevention through environmental design principles (CPTED) are incorporated into the design of buildings and structures to ensure the safety of people and property.
 - g. Development is of a scale, height and bulk that provides a high level of amenity and is sensitive to the character of the surrounding area.
 - h. General works associated with the development achieves the following:
 - i. new development is provided with a high standard of services to meet and support the current and future needs of users of the site, including roads, street lighting services, telecommunications and reticulated electricity (underground wherever possible), water and sewerage (where available);
 - ii. the development manages stormwater to:
 - A. ensure the discharge of stormwater does not adversely affect the quality, environmental values or ecosystem functions of downstream receiving waters;
 - B. prevent stormwater contamination and the release of pollutants;
 - C. maintain or improve the structure and condition of drainage lines and riparian areas;
 - D. avoid off-site adverse impacts from stormwater.
 - iii. the development does not result in unacceptable impacts on the capacity and safety of the external road network;
 - iv. the development ensures the safety, efficiency and useability of access ways and parking areas;
 - v. site works including earthworks are managed to be safe and have minimal impacts on adjoining or adjacent premises, the streetscape or the environment.
 - i. Activities associated with the use do not cause a nuisance by way of aerosols, fumes, light, noise, odour, particles or smoke.
 - j. Noise generating uses are designed, sited and constructed to minimise the transmission of noise to appropriate levels and do not cause environmental harm or nuisance.
 - k. Noise sensitive uses are designed, sited and constructed so as not to be subject to unacceptable levels of noise.

6 Zones

- I. Development in a Water supply buffer is undertaken in a manner which contributes to the maintenance and enhancement where possible of water quality to protect the drinking water and aquatic ecosystem environmental values in those catchments.
- m. Development avoids areas subject to constraint, limitation, or environmental value. Where development cannot avoid these identified areas, it responds by:
- i. adopting a 'least risk, least impact' approach when designing, siting and locating development in any area subject to a constraint, limitation or environmental value to minimise the potential risk to people, property and the environment;
 - ii. ensuring no further instability, erosion or degradation of the land, water or soil resource;
 - iii. when located within a Water buffer area, complying with the Water Quality Vision and Objectives contained in the Seqwater Development Guidelines: Development Guidelines for Water Quality Management in Drinking Water Catchments 2012.
 - iv. maintaining, restoring and rehabilitating environmental values, including natural, ecological, biological, aquatic, hydrological and amenity values, and enhancing these values through the provision of planting and landscaping, and facilitating safe wildlife movement and connectivity through:
 - A. the provision of replacement, restoration, rehabilitation planting and landscaping;
 - B. the location, design and management of development to avoid or minimise adverse impacts on ecological systems and processes;
 - C. the requiring of environmental offsets in accordance with the Environmental Offsets Act 2014.
 - v. protecting native species and protecting and enhancing species habitat;
 - vi. protecting and preserving the natural, aesthetic, architectural historic and cultural values of significant trees, places, objects and buildings of heritage and cultural significance;
 - vii. establishing effective separation distances, buffers and mitigation measures associated with identified infrastructure to minimise adverse effects on sensitive land uses from odour, noise, dust and other nuisance generating activities;
 - viii. establishing, maintaining and protecting appropriate buffers to waterways, wetlands, native vegetation and significant fauna habitat;
 - ix. ensuring it promotes and does not undermine the ongoing viability, integrity, operation, maintenance and safety of identified infrastructure;
 - x. ensuring effective and efficient disaster management response and recovery capabilities;
 - xi. where located in an overland flow path:
 - A. development siting, built form, layout and access responds to the risk presented by the overland flow and minimises risk to personal safety;
 - B. development is resilient to the impacts of overland flow by ensuring the siting and design accounts for the potential risks to property associated with the overland flow;
 - C. development does not impact on the conveyance of the overland flow for any event up to and including the 1% AEP for the fully developed upstream catchment;
 - D. development directly, indirectly and cumulatively avoid an increase in the severity of overland flow and potential for damage on the premises or other premises, public lands, watercourses, roads or infrastructure.

- m. Development in the Utilities precinct includes 1 or more of the following:

<ul style="list-style-type: none"> • Emergency services⁽²⁵⁾ • Indoor sport and recreation⁽³⁸⁾ - if in accordance with a Council Master Plan approved under Council policy 	<ul style="list-style-type: none"> • Major electricity infrastructure⁽⁴³⁾ • Outdoor sport and recreation⁽⁵⁵⁾ - if in accordance with a Council Master Plan approved under Council policy • Park⁽⁵⁷⁾ 	<ul style="list-style-type: none"> • Transport depot⁽⁸⁵⁾ - if located on Council owned or controlled land • Substation⁽⁸⁰⁾ • Telecommunications facility⁽⁸¹⁾ • Utility installation⁽⁸⁶⁾
---	---	---

n. Development in the Utilities precinct does not include any of the following:

<ul style="list-style-type: none"> • Adult store⁽¹⁾ • Agricultural supplies store⁽²⁾ • Air services⁽³⁾ • Animal husbandry⁽⁴⁾ • Animal keeping⁽⁵⁾ • Aquaculture⁽⁶⁾ • Bar⁽⁷⁾ • Brothel⁽⁸⁾ • Bulk landscape supplies⁽⁹⁾ • Caretaker's accommodation⁽¹⁰⁾ • Car wash⁽¹¹⁾ • Cemetery⁽¹²⁾ • Child care centre⁽¹³⁾ • Club⁽¹⁴⁾ • Community care centre⁽¹⁵⁾ • Community residence⁽¹⁶⁾ • Community use⁽¹⁷⁾ • Crematorium⁽¹⁸⁾ • Cropping⁽¹⁹⁾ • Detention facility⁽²⁰⁾ • Dual occupancy⁽²¹⁾ • Dwelling house⁽²²⁾ • Dwelling unit⁽²³⁾ • Educational establishment⁽²⁴⁾ • Environmental facility⁽²⁶⁾ 	<ul style="list-style-type: none"> • Function facility⁽²⁹⁾ • Funeral parlour⁽³⁰⁾ • Garden centre⁽³¹⁾ • Hardware and trade supplies⁽³²⁾ • Health care services⁽³³⁾ • High Impact industry⁽³⁴⁾ • Home based business⁽³⁵⁾ • Hospital⁽³⁶⁾ • Hotel⁽³⁷⁾ • Intensive animal industry⁽³⁹⁾ • Intensive horticulture⁽⁴⁰⁾ • Landing⁽⁴¹⁾ • Low impact industry⁽⁴²⁾ • Major sport, recreation and entertainment facility⁽⁴⁴⁾ • Marine industry⁽⁴⁵⁾ • Market⁽⁴⁶⁾ • Medium impact industry⁽⁴⁷⁾ • Motor sport facility⁽⁴⁸⁾ • Multiple dwelling⁽⁴⁹⁾ • Nature-based tourism⁽⁵⁰⁾ • Nightclub entertainment facility⁽⁵¹⁾ • Non-resident workforce accommodation⁽⁵²⁾ • Office⁽⁵³⁾ • Outdoor sales⁽⁵⁴⁾ 	<ul style="list-style-type: none"> • Port services⁽⁶¹⁾ • Relocatable home park⁽⁶²⁾ • Research and technology industry⁽⁶⁴⁾ • Residential care facility⁽⁶⁵⁾ • Resort complex⁽⁶⁶⁾ • Retirement facility⁽⁶⁷⁾ • Roadside stall⁽⁶⁸⁾ • Rooming accommodation⁽⁶⁹⁾ • Rural industry⁽⁷⁰⁾ • Rural workers⁽⁷¹⁾ accommodation⁽⁷¹⁾ • Sales office⁽⁷²⁾ • Service industry⁽⁷³⁾ • Service station⁽⁷⁴⁾ • Shop⁽⁷⁵⁾ • Shopping centre⁽⁷⁶⁾ • Short-term accommodation⁽⁷⁷⁾ • Showroom⁽⁷⁸⁾ • Special industry⁽⁷⁹⁾ • Theatre⁽⁸²⁾ • Tourist attraction⁽⁸³⁾ • Tourist park⁽⁸⁴⁾ • Transport depot⁽⁸⁵⁾ (if not located on Council or State owned land) • Veterinary services⁽⁸⁷⁾
--	--	---

6 Zones

<ul style="list-style-type: none"> • Extractive industry⁽²⁷⁾ • Food and drink outlet⁽²⁸⁾ 	<ul style="list-style-type: none"> • Permanent plantation⁽⁵⁹⁾ • Place of worship⁽⁶⁰⁾ 	<ul style="list-style-type: none"> • Warehouse⁽⁸⁸⁾ • Wholesale nursery⁽⁸⁹⁾ • Winery⁽⁹⁰⁾

- o. Development not listed in the tables above may be considered on its merits and where it reflects and supports the outcomes of the zone.

6.2.2.3 Accepted development subject to requirements

If development is to be categorised as accepted development subject to requirements it must comply with the requirements for accepted development set out in Part E, Table 6.2.2.3.1. Where the development does not meet a requirement for accepted development (RAD) within Part E Table 6.2.2.3.1, the category of development changes to assessable development under the rules outlined in section 5.3.3.(1), and assessment is against the corresponding performance outcome (PO) identified in the table below. This only occurs whenever a RAD is not met, and is therefore limited to the subject matter of the RADs that are not complied with. To remove any doubt, for those RADs that are complied with, there is no need for assessment against the corresponding PO.

Requirements for accepted development (RAD)	Corresponding performance outcomes (PO)

Part E - Requirements for accepted development - Utilities precinct

Table 6.2.2.3.1 Requirements for accepted development - Utilities precinct

Requirements for accepted development	
General requirements	
Hazardous Chemicals	
RAD1	All development that involves the storage or handling of hazardous chemicals listed in Schedule 9, Development involving hazardous chemicals, Table 9.0.1 Quantity thresholds for hazardous chemicals stored as accepted development subject to requirements complies with Table 9.0.3 Hazardous chemicals.
RAD2	Development does not involve the storage or handling of hazardous chemicals listed in Schedule 9, Development involving hazardous chemicals, Table 9.0.2 Hazardous chemicals assessable thresholds.
Site cover	
RAD3	Site cover of all buildings and structures does not exceed 40%.

Lighting	
RAD4	<p>Artificial lighting on-site is directed and shielded in such a manner as not to exceed the recommended maximum values of light technical parameters for the control of obtrusive light given in Table 2.1 of Australian Standard AS 4282 (1997) Control of Obtrusive Effects of Outdoor Lighting.</p> <p>Note - "Curfewed hours" are taken to be those hours between 10pm and 7am on the following day.</p>
Traffic matters	
RAD5	On-site car parking is provided in accordance with Schedule 7 - Car parking.
Waste	
RAD6	Bins and bin storage area/s are provided, designed and managed in accordance with Planning scheme policy – Waste.
Clearing of habitat trees where not located in the Environmental areas overlay map	
RAD7	<p>Development does not result in the damaging, destroyed or clearing of a habitat tree. This does not apply to:</p> <ol style="list-style-type: none"> Clearing of a habitat tree located within an approved development footprint; Clearing of a habitat tree within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; Clearing of a habitat tree reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; Clearing of a habitat tree reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural , Rural residential and Environmental management and conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence; Clearing of a habitat tree reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes; Clearing of a habitat tree in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council; Clearing of a habitat tree associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens; Native forest practice where accepted development under Part 1, 1.7.7 Accepted development. <p>Editor's note - A native tree measuring greater than 80cm in diameter when measured at 1.3m from the ground is recognised as a 'habitat tree'. For further information on habitat trees, refer to Planning scheme policy – Environmental areas and corridors. Information detailing how this measurement is undertaken is provided in Australian Standard AS 4970 2009 Protection of Trees on Development Sites - Appendix A.</p>
Works requirements	
Utilities	
RAD8	<p>Where available, the development is connected to:-</p> <ol style="list-style-type: none"> an existing reticulated electricity supply;

6 Zones

	<p>b. telecommunications and broadband;</p> <p>c. reticulated sewerage;</p> <p>d. reticulated water;</p> <p>e. constructed and dedicated road.</p> <p>Development is provided in an appropriate level of service and infrastructure in accordance with Planning scheme policy - Integrated design (Appendix A).</p>
RAD9	<p>Where not in a sewerage area, the development is serviced by an appropriate on-site sewerage facility.</p> <p>Note – A site and soil evaluation report is generally required to demonstrate compliance with this outcome. Reports are to be prepared in accordance with AS1547 On-site domestic wastewater management and the Queensland Plumbing and Wastewater Code.</p>
RAD10	<p>Where not in an existing connections area or a future connections area as detailed in the Unitywater Connections Policy, the development is provided with an adequate water supply of 45,000 litres by way of on-site storage which provides equivalent water quality and reliability to support the use requirements of the development.</p>

Access	
RAD	<p>The frontage road is fully constructed to Council's standards.</p> <p>Note - Roads are considered to be constructed in accordance with Council standards when there is sufficient pavement width, geometry and depth to comply with the requirements of Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures. Testing of the existing pavement may be required to confirm whether the existing works meet the standards in Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p> <p>Note - Frontage roads include streets where no direct lot access is provided.</p>
RAD11	<p>Any new or changes to existing site access crossovers and driveways are designed, and located and constructed in accordance with:</p> <p>a. where for a Council-controlled road and associated with a Dwelling house:</p> <ol style="list-style-type: none"> Planning scheme policy - Integrated design; <p>b. where for a Council-controlled road; and not associated with a Dwelling house:</p> <ol style="list-style-type: none"> AS/NZS2890.1 section 3; or Parking facilities Part 1: Off street car parking; AS/NZS 2890.2 - Parking facilities Part 2: Off-street commercial vehicle facilities; Planning scheme policy - Integrated design; Schedule 8 - Service vehicle requirements; <p>c. where for a State-Controlled road, the Safe Intersection Sight Distance requirements in Austroads and the appropriate IPWEAQ standard drawings, or a copy of a Transport Infrastructure Act 1994, section 62 approval.</p>

RAD12	Any new or changes to existing internal driveways and access ways are designed and constructed in accordance with AS/NZS 2890.1 Parking Facilities Part 1 : Off street car parking and the relevant standards in Planning scheme policy - Integrated design.
RAD	Access driveways, manoeuvring areas and loading facilities are sealed and provide for service vehicles listed in Schedule 8 - Service vehicle requirements for the relevant use. The on-site manoeuvring is to be in accordance with Schedule 8 - Service vehicle requirements.

Stormwater

RAD13	<p>Any new or changes to existing stormwater run-off from the site is conveyed to a point of lawful discharge without causing actionable nuisance or annoyance to any person, property or premises in accordance with Planning scheme policy – Integrated design.</p> <p>Note - A watercourse as defined in the Water Act may be accepted as a lawful point of discharge providing the drainage discharge from the site does not increase the downstream flood levels during events up to and including the 1% AEP storm. An afflux of +20mm may be accepted on Council controlled land and road infrastructure. No worsening is ensured when stormwater is discharged into a catchment that includes State Transport Infrastructure.</p>
RAD14	<p>Development incorporates a minimum of 2% of the site area constructed as a bioretention system in accordance with Planning scheme policy – Integrated design if the development:-</p> <ol style="list-style-type: none"> a. is for urban purposes only;- b. involves a land area greater than 2500m²; c. will result in 6 or more dwellings; OR will result in an impervious area greater than 25% of the net developable area. <p>Where development:</p> <ol style="list-style-type: none"> a. is for an urban purpose that involves a land area 2500m² or greater in size; and b. that results in 6 or more dwellings; or c. that result in an impervious area greater than 25% of the net developable area, <p>incorporates a 'deemed to comply solution' to manage stormwater quality.</p> <p>Note - The deemed to comply solution is to be designed, constructed, established and maintained in accordance with the requirements of Water by Design 'Deemed to Comply Solutions - Stormwater Quality Management for South East Queensland' and Planning scheme policy - Integrated design.</p>
RAD	<p>Development ensures that surface flows entering the premises from adjacent properties are not blocked, diverted or concentrated.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland may be required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p>
RAD	Development ensures that works (e.g. fences and walls) do not block, divert or concentrate the flow of stormwater to adjoining properties.

6 Zones

	<p>Note - A report from a suitably qualified Registered Professional Engineer Queensland may be required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p>								
RAD	<p>Stormwater drainage infrastructure (excluding detention and bio-retention systems) through or within private land is protected by easements in favour of Council (at no cost to Council). Minimum easement widths are as follows:</p> <table border="1"> <thead> <tr> <th>Pipe Diameter</th> <th>Minimum Easement Width (excluding access requirements)</th> </tr> </thead> <tbody> <tr> <td>Stormwater Pipe up to 825mm diameter</td> <td>3.0m</td> </tr> <tr> <td>Stormwater Pipe up to 825mm diameter with Sewer pipe up to 225mm diameter</td> <td>4.0m</td> </tr> <tr> <td>Stormwater pipe greater than 825mm diameter</td> <td>Easement boundary to be 1m clear of the outside wall of the pipe and clear of all pits.</td> </tr> </tbody> </table> <p>Note - Additional easement width may be required in certain circumstances in order to facilitate maintenance access to the stormwater system.</p> <p>Note - Refer to Planning scheme policy - Integrated design (Appendix C) for easement requirements over open channels.</p>	Pipe Diameter	Minimum Easement Width (excluding access requirements)	Stormwater Pipe up to 825mm diameter	3.0m	Stormwater Pipe up to 825mm diameter with Sewer pipe up to 225mm diameter	4.0m	Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the pipe and clear of all pits.
Pipe Diameter	Minimum Easement Width (excluding access requirements)								
Stormwater Pipe up to 825mm diameter	3.0m								
Stormwater Pipe up to 825mm diameter with Sewer pipe up to 225mm diameter	4.0m								
Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the pipe and clear of all pits.								

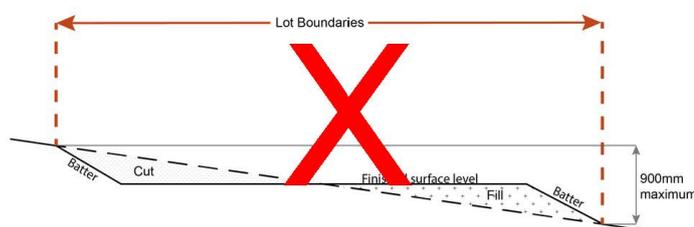

Site works and construction management	
RAD15	The site and any existing structures are to be maintained in a tidy and safe condition.
RAD16	<p>Site construction works incorporate temporary stormwater run-off, erosion and sediment controls and trash traps designed in accordance with the Urban Stormwater Quality Planning Guidelines, Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design.</p> <p>Development does not cause erosion or allow sediment to leave the site.</p> <p>Note - The International Erosion Control Association (Australasia) Best Practice Erosion and Sediment Control provides guidance on strategies and techniques for managing erosion and sedimentation.</p>
RAD	No dust emissions extend beyond the boundaries of the site during soil disturbances and construction works.
RAD	<p>Existing street trees are protected and not damaged during works.</p> <p>Note - Where development occurs in the tree protection zone, measures and techniques as detailed in Australian Standard AS 4970 Protection of trees on developments sites are adopted and implemented.</p>
RAD19	Any damage to Council land or infrastructure is repaired or replaced with the same materials, prior to plan sealing, or final building classification.

RAD17	Construction traffic including contractor car parking is controlled in accordance with a traffic management plan, prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) to ensure all traffic movements to and from the site are safe.
RAD20	Any material dropped, deposited or spilled on the road(s) as a result of construction processes associated with the site are to be cleaned at all times.
RAD18	All native vegetation to be retained on-site is temporarily fenced or protected prior to and during development works. Note - No parking of vehicles or storage of machinery or goods is to occur in these areas during development works
RAD	<p>Disposal of materials is managed in one or more of the following ways:</p> <ol style="list-style-type: none"> all cleared vegetation, declared weeds, stumps, rubbish, car bodies, scrap metal and the like are removed and disposed of in a Council land fill facility; or all native vegetation with a diameter below 400mm is to be chipped and stored on-site. <p>Note - No burning of cleared vegetation is permitted.</p> <p>Note - The chipped vegetation must be stored in an approved location.</p>
RAD	<p>All development works are carried out within the following times:</p> <ol style="list-style-type: none"> Monday to Saturday (other than public holidays) between 6:30am and 6:30pm on the same day; no work is to be carried out on Sundays or public holidays.

Earthworks

RAD22 The total of all cut and fill on-site does not exceed 900mm in height.

Figure -- Cut and Fill

Note -- This is site earthworks not building work.

Filling or excavation does not:

- involve a change in level of more than 1.0m relative to natural ground level

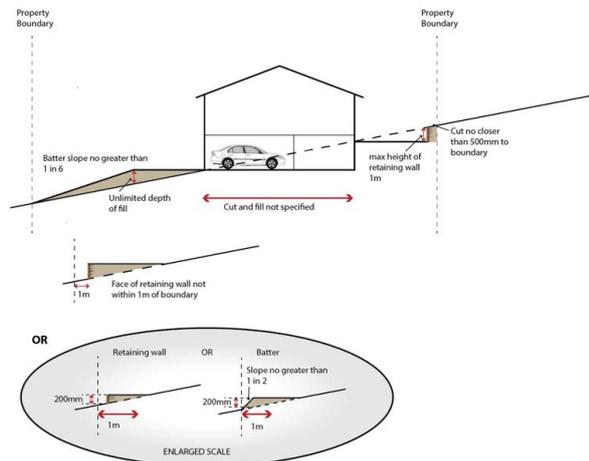

OR

6 Zones

- result in a batter greater than 1V to 6H;
- b. necessitate the construction of a freestanding retaining wall exceeding 1.0m in height relative to finished ground level;
- c. result in the top of any cut batter, or the exposed face of any freestanding retaining wall supporting that cut, being closer than 500mm to a property boundary;
- d. result in the toe of any fill batter, or exposed face of any freestanding retaining wall supporting that fill, being closer than 1.0m to a property boundary unless:
 - i. the depth of fill within the 1.0m strip does not exceed 200mm relative to natural ground level; or
 - ii. the batter slope within that 1.0m strip is no steeper than 1V to 2H.

THE NEW FIGURE BELOW IS PROPOSED AS PART OF THIS AMENDMENT

Figure - Filling or Excavation

RAD	<p>Cut and fill batters, (other than batters to dams and water impoundments), have a finished slope no steeper than the following:</p> <ul style="list-style-type: none"> a. any cut batter is no steeper than 1V in 4H; b. any fill batter, (other than a compacted fill batter), is no steeper than 1V in 4H; c. any compacted fill batter is no steeper than 1V in 4H.
RAD	<p>All cut and fill batters are provided with appropriate scour, erosion protection and run-off control measures including catch drains at the top of batters and lined batter drains as necessary.</p>
RAD	<p>Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance of steep slopes and batters.</p> <p>Note - Inspection and certification of steep slopes and batters may be required by a suitably qualified and experienced RPEQ.</p>
RAD	<p>All fill and excavation is contained on-site and is free draining.</p>
RAD	<p>Earthworks undertaken on the development site are shaped in a manner which does not:</p>

	<ul style="list-style-type: none"> a. prevent stormwater surface flow which, prior to commencement of the earthworks, passed onto the development site, from entering the land; or b. redirect stormwater surface flow away from existing flow paths; or c. divert stormwater surface flow onto adjacent land (other than a road) in a manner which: <ul style="list-style-type: none"> i. concentrates the flow; or ii. increases the flow rates of stormwater over the affected section of the adjacent land above the situation which existed prior to the diversion; or iii. causes actionable nuisance to any person, property or premises.
RAD	<p>All fill placed on-site is:</p> <ul style="list-style-type: none"> a. limited to that necessary for the approved use; b. clean and uncontaminated (i.e. no building waste, concrete, green waste, actual acid sulfate soils, potential acid sulfate soils or contaminated material etc.) material is used as fill.
RAD21	<p>The site is prepared and the fill placed on-site in accordance with Australian Standard AS3798.</p> <p>Note - The fill is to be inspected and tested in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures</p>
RAD	<p>No filling or excavation is undertaken in an easement issued in favour of Council or a public sector entity.</p> <p>Note - Public sector entity is defined in Schedule 2 of the Act.</p>
RAD23	<p>Filling or excavation that would result in any of the following is not carried out on site: does not result in:-</p> <ul style="list-style-type: none"> a. reduction in cover over any Council or public sector entity infrastructure to less than 600mm; b. an increase in finished surface grade over, or within 1.5m on each side of, the Council or public sector entity infrastructure above that which existed prior to the filling or excavation works being undertaken; c. prevent reasonable access to Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the site for monitoring, maintenance or replacement purposes. <p>Note - Public sector entity is defined in Schedule 2 of the Act.</p>

Fire services

Note - The provisions under this heading only apply if:

- a. the development is for, or incorporates:
 - i. reconfiguring a lot for a community title scheme creating 1 or more vacant lots; or
 - ii. material change of use for 2 or more sole occupancy units on the same lot, or within the same community titles scheme; or

6 Zones

- iii. material change of use for a Tourist park⁽⁸⁴⁾ with accommodation in the form of caravans or tents; or
- iv. material change of use for outdoor sales⁽⁵⁴⁾, outdoor processing or outdoor storage where involving combustible materials.

AND

- b. none of the following exceptions apply:
 - i. the distributor-retailer for the area has indicated, in its netserv plan, that the premises will not be served by that entity's reticulated water supply; or
 - ii. every part of the development site is within 60m walking distance of an existing fire hydrant on the distributor-retailer's reticulated water supply network, measured around all obstructions, either on or adjacent to the site.

Note - The provisions under this heading do not apply to buildings that are required by the Building Code of Australia to have a fire hydrant system complying with Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations or other fire fighting facilities which provide equivalent protection.

RAD24	<p>External fire hydrant facilities are provided on site to the standard prescribed under the relevant parts of <i>Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations</i>.</p> <p>Note - For this requirement for accepted development, the following are the relevant parts of AS 2419.1 (2005):</p> <ul style="list-style-type: none"> a. in regard to the form of any fire hydrant - Part 8.5 and Part 3.2.2.1, with the exception that for Tourist parks⁽⁸⁴⁾ or development comprised solely of dwellings and their associated outbuildings, single outlet above-ground hydrants or suitably signposted in-ground hydrants would be an acceptable alternative; b. in regard to the general locational requirements for fire hydrants - Part 3.2.2.2 (a), (e), (f), (g) and (h) as well as Appendix B of AS 2419.1 (2005); c. in regard to the proximity of hydrants to buildings and other facilities - Part 3.2.2.2 (b), (c) and (d), with the exception that: <ul style="list-style-type: none"> i. - for dwellings and their associated outbuildings, hydrant coverage need only extend to the roof and external walls of those buildings; ii. - for caravans and tents, hydrant coverage need only extend to the roof of those tents and caravans; iii. - for outdoor sales⁽⁵⁴⁾, processing or storage facilities, hydrant coverage is required across the entire area of the outdoor sales⁽⁵⁴⁾, outdoor processing and outdoor storage facilities; and d. in regard to fire hydrant accessibility and clearance requirements - Part 3.5 and where applicable, Part 3.6.
RAD25	<p>A continuous path of travel having the following characteristics is provided between the vehicle access point to the site and each external fire hydrant and hydrant booster point on the land:</p> <ul style="list-style-type: none"> a. an unobstructed width of no less than 3.5m; b. an unobstructed height of no less than 4.8m; c. constructed to be readily traversed by a 17 tonne HRV fire brigade pumping appliance; d. an area for a fire brigade pumping appliance to stand within 20m of each fire hydrant and 8m of each hydrant booster point.
RAD26	<p>On-site fire hydrant facilities are maintained in effective operating order in a manner prescribed in <i>Australian Standard AS1851 (2012) – Routine service of fire protection systems and equipment</i>.</p>
RAD27	<p>For development that contains on-site fire hydrants external to buildings:</p>

	<p>a. those external hydrants can be seen from the vehicular entry point to the site; or</p> <p>b. a sign identifying the following is provided at the vehicular entry point to the site:</p> <ul style="list-style-type: none"> i. the overall layout of the development (to scale); ii. internal road names (where used); iii. all communal facilities (where provided); iv. the reception area and on-site manager's office (where provided); v. external hydrants and hydrant booster points; vi. physical constraints within the internal roadway system which would restrict access by fire fighting appliances to external hydrants and hydrant booster points. <p>Note - The sign prescribed above, and the graphics used are to be:</p> <ul style="list-style-type: none"> a. in a form; b. of a size; c. illuminated to a level; <p>which allows the information on the sign to be readily understood, at all times, by a person in a fire fighting appliance up to 4.5m from the sign.</p>
RAD28	<p>For development that contains on-site fire hydrants external to buildings, those hydrants are identified by way of marker posts and raised reflective pavements markers in the manner prescribed in the technical note <i>Fire hydrant indication system</i> produced by the Queensland Department of Transport and Main Roads.</p> <p>Note - Technical note Fire hydrant indication system is available on the website of the Queensland Department of Transport and Main Roads.</p>
Use specific requirements	
Telecommunications facility⁽⁸¹⁾	
<p>Editor's note - In accordance with the Federal legislation Telecommunications facilities⁽⁸¹⁾ must be constructed and operated in a manner that will not cause human exposure to electromagnetic radiation beyond the limits outlined in the Radiocommunications (Electromagnetic Radiation - Human Exposure) Standard 2003 and Radio Protection Standard for Maximum Exposure Levels to Radiofrequency Fields - 3KHz to 300Ghz.</p>	
RAD29	<p>A minimum area of 45m² is available at ground level to allow for additional equipment shelters and associated structures for the purpose of co-locating on the proposed facility.</p>
RAD30	<p>The development results in no net reduction in the minimum quantity and standard of landscaping, private or communal open space or car parking spaces required under the planning scheme or under an existing development approval.</p>
RAD31	<p>Equipment shelters and associated structures are located:</p> <ul style="list-style-type: none"> a. directly beside the existing equipment shelter and associated structures; b. behind the main building line; c. further away from the frontage than the existing equipment shelter and associated structures; d. a minimum of 10m from side and rear boundaries, except where in the Industry and Extractive industry zones, the minimum side and rear setback is 3m.
RAD32	<p>Equipment shelters and other associated structures are either the same type of colour or material to match the surrounding locality.</p>

6 Zones

RAD33	The facility is enclosed by security fencing or by other means to ensure public access is prohibited.
RAD34	<p>A minimum 3m wide strip of dense planting is provided around the perimeter of the fenced area, between the development and street frontage and adjoining uses.</p> <p>Note - Landscaping is provided in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person to ensure compliance with Planning scheme policy - Integrated design.</p>
RAD35	All equipment comprising the telecommunications facility ⁽⁸¹⁾ which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure no noise from this equipment can be heard, or felt at the site boundary.

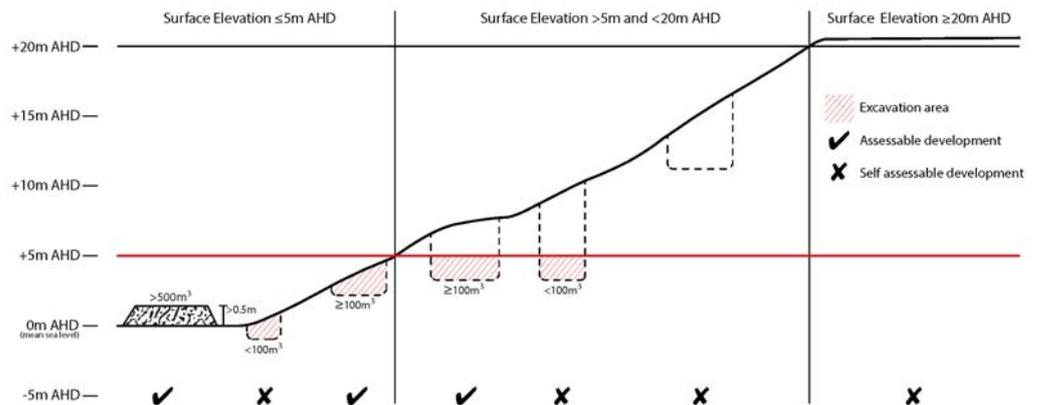

Values and constraints requirements

Note - The relevant values and constraints requirements do not apply where the development is consistent with a current Development permit for Reconfiguring a lot or Material change of use or Operational work, where that approval has considered and addressed (e.g. through a development footprint plan (or similar in the case of Landslide hazard) or conditions of approval) the identified value or constraint under this planning scheme.

Acid sulfate soils - (refer Overlay map - Acid sulfate soils to determine if the following requirements apply)

Note - Planning scheme policy - Acid sulfate soils provides guidance for requirements for accepted development that has the potential to disturb acid sulfate soils i.e. development involving filling or excavation works below the thresholds of 100m³ and 500m³ respectively.

- RAD36** Development does not involve:
- excavation or otherwise removing of more than 100m³ of soil or sediment where below 5m Australian Height Datum AHD, or
 - filling of land of more than 500m³ of material with an average depth of 0.5m or greater where below the 5m AHD.

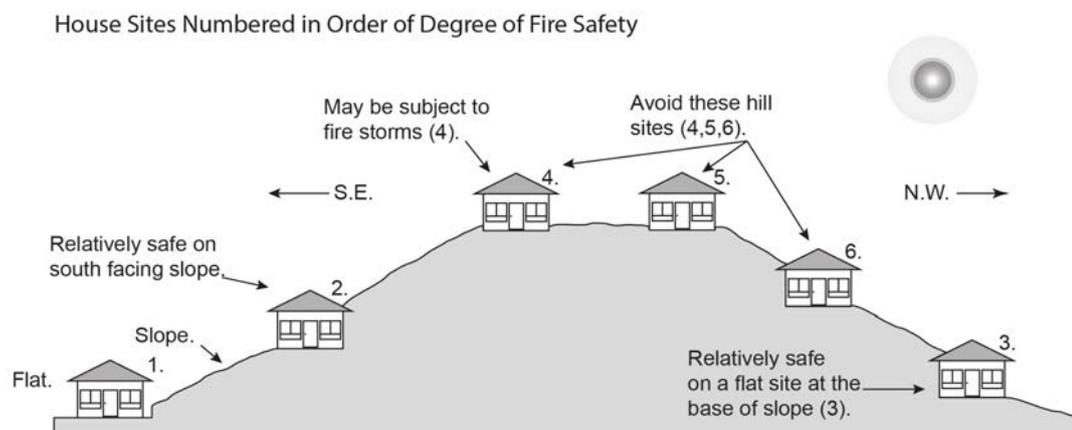

Bushfire hazard (refer Overlay map - Bushfire hazard to determine if the following requirements apply)

Note - For the purposes of section 12 of the Building Regulation 2006, land identified as very high potential bushfire intensity, high potential bushfire intensity, medium potential bushfire intensity or potential impact buffer on the Bushfire hazard overlay map is the 'designated bushfire hazard area'. AS 3959-2009 Construction of buildings in bushfire hazard areas applies within these areas.

- RAD37** a. Building and structures are:

- i. not located on a ridgeline
 - ii. not located on land with a slope greater than 15% (see Overlay map – Landslide hazard)
- b. Dwellings are located on east to south facing slopes.

(1 being the safest , 6 being the most hazardous.)
 From Bushfire Prone Areas: Siting and Design of Residential Buildings (1997), Queensland Department of Local Government and Planning, and Queensland Fire & Rescue Service.

RAD38 Buildings and structures have contained within the site:

- a. a separation from classified vegetation of 20m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater;
- b. a separation from low threat vegetation of 10m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater;
- c. a separation of no less than 10m between a fire fighting water supply extraction point and any classified vegetation, buildings and other roofed structures;
- d. an area suitable for a standard fire fighting appliance to stand within 3m of a fire fighting water supply extraction point; and
- e. an access path suitable for use by a standard fire fighting appliance having a formed width of at least 4m, a cross-fall of no greater than 5%, and a longitudinal gradient of no greater than 25%:
 - i. to, and around, each building and other roofed structure; and
 - ii. to each fire fighting water supply extraction point.

Note - The meaning of the terms classified vegetation and low threat vegetation as well as the method of calculating the bushfire attack level are as described in Australian Standard AS 3959.

RAD39 The length of driveway:

- a. to a public road does not exceed 100m between the most distant part of a building used for any purpose other than storage and the nearest part of a public road;
- b. has a maximum gradient no greater than 12.5%;
- c. have a minimum width of 3.5m;
- d. accommodate turning areas for fire fighting appliances in accordance with Qld Fire and Emergency Services' Fire Hydrant and Vehicle Access Guideline.

6 Zones

RAD40	<p>a. A reticulated water supply is provided by a distributor retailer for the area or, where not connected to a reticulated water supply, on-site fire fighting water storage containing not less than 10 000 litres (tanks with fire brigade tank fittings, swimming pools) is provided and located within 10m of buildings and structures.</p> <p>b. Where a swimming pool is the nominated on-site fire fighting water storage source, vehicle access to within 3m of that water storage source is provided.</p> <p>c. Where a tank is the nominated on-site fire fighting water storage source, it includes:</p> <ul style="list-style-type: none"> i. a hardstand area allowing medium rigid vehicle (15 tonne fire appliance) access within 6m of the tank; ii. fire brigade tank fittings, comprising 50mm ball valve and male camlock coupling and, if underground, an access hole of 20mm (minimum) to accommodate suction lines.
--------------	---

RAD41	Development does not involve the manufacture or storage of hazardous chemicals.
--------------	---

Environmental areas (refer Overlay map - Environmental areas to determine if the following requirements apply)

Note - The following are excluded from the native clearing provisions of this planning scheme:

- a. Clearing of native vegetation located within an approved development footprint;
- b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency;
- c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure;
- d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental Management and Conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence;
- e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes;
- f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council;
- g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens;
- h. Grazing of native pasture by stock;
- i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development.

Note - Definition for native vegetation is located in Schedule 1 Definitions.

Note - Native vegetation subject to this requirement primarily comprises of matters of national environmental significance (MNES), matters of state environmental significance (MSES). They also comprise some matters of local environmental significance (MLES). A MLES is defined in Schedule 1.2, Administrative definitions. A list of the elements that apply to the mapped MSES and MLES is provided in Appendix 1 of the Planning scheme policy - Environmental areas.

Editors' Note - The accuracy of overlay mapping can be challenged through the development application process (code assessable development) or by way of a planning scheme amendment. See Council's website for details.

Editors' Note - When clearing native vegetation within a MSES area, you may still require approval from the State government.

RAD42	<p>Where no suitable land cleared of native vegetation exists, clearing of native vegetation in High Value Area or Value Offset Area is for the purpose of a new dwelling house⁽²²⁾ and all associated facilities* or an extension to an existing dwelling house⁽²²⁾ only, and comprises an area no greater than 1500m².</p> <p>Note - *All associated facilities includes: on-site wastewater treatment, all areas of disturbance, on-site parking, access and manoeuvring areas.</p> <p>Editor's note - See in heading above for other uses excluded from native vegetation clearing requirements.</p> <p>Editor's note - Where vegetation clearance is accepted development subject to requirements, care should be undertaken to avoid adverse impacts on koalas, koala habitat values and habitat connectivity and to encourage existing koala usage of the site. Measures to minimise impacts include:</p> <ol style="list-style-type: none"> i. co-locating all associated activities, infrastructure and access strips; ii. be the least valued area of koala habitat on the site; iii. minimise the footprint of the development envelope area; iv. minimise edge effects to areas external to the development envelope; v. location and design consideration to ensure koala safety and movement in accordance with the Koala-sensitive Design Guideline and Planning scheme policy – Environmental areas; vi. sufficient area between the development and koala habitat trees to achieve their long-term viability. <p>Editor's note - Where vegetation clearing is accepted development subject to requirements, consideration should be given to avoid clearing habitat trees. Habitat trees may contain structural hollows where animals live, breed and shelter. The provision of nest boxes or salvaging of hollows will provide compensatory roosting and nesting opportunities for local wildlife including sugar gliders, possums and owls. For further information see Planning scheme policy – Environmental areas.</p>
RAD43	<p>No clearing of native vegetation is to occur within the Value Offset Area MLES - Waterway buffer or Value Offset Area MLES - Wetland buffer.</p> <p>This does not apply to the following:</p> <ol style="list-style-type: none"> a. Clearing of native vegetation located within an approved development footprint; b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental management and conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence; e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes; f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council; g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens; h. Grazing of native pasture by stock; i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development.
Extractive resources separation area (refer Overlay map - Extractive resources (separation area) to determine if the following requirements apply)	
RAD44	Development does not result in more than one dwelling house ⁽²²⁾ per lot within separation areas.
RAD45	<p>Development within the separation area does not include the following uses:</p> <ol style="list-style-type: none"> a. caretaker's accommodation⁽¹⁰⁾; b. community residence⁽¹⁶⁾; c. dual occupancy⁽²¹⁾;

6 Zones

	<ul style="list-style-type: none"> d. dwelling unit⁽²³⁾; e. hospital⁽³⁶⁾; f. rooming accommodation⁽⁶⁹⁾; g. multiple dwelling⁽⁴⁹⁾; h. non-resident workforce accommodation⁽⁵²⁾; i. relocatable home park⁽⁶²⁾; j. residential care facility⁽⁶⁵⁾; k. resort complex⁽⁶⁶⁾; l. retirement facility⁽⁶⁷⁾; m. rural workers' accommodation⁽⁷¹⁾; n. short-term accommodation⁽⁷⁷⁾; o. tourist park⁽⁸⁴⁾.
RAD46	<p>All habitable rooms within the separation area are:</p> <ul style="list-style-type: none"> a. acoustically insulated to achieve the noise levels listed in Schedule 1 Acoustic Quality Objectives, Environmental Protection (Noise) Policy 2008; b. provided with mechanical ventilation.
RAD47	Private open space areas are separated from the resource processing area by buildings or a 1.8m high solid structure.
Extractive resources transport routes (refer Overlay map - Extractive resources (transport route and buffer) to determine if the following requirements apply)	
RAD48	<p>The following uses are not located within the 100m wide transport route buffer:</p> <ul style="list-style-type: none"> a. Caretaker's accommodation⁽¹⁰⁾, except where located in the Extractive industry zone; b. Community residence⁽¹⁶⁾; c. Dual occupancy⁽²¹⁾; d. Dwelling house⁽²²⁾; e. Dwelling unit⁽²³⁾; f. Hospital⁽³⁶⁾; g. Rooming accommodation⁽⁶⁹⁾; h. Multiple dwelling⁽⁴⁹⁾; i. Non-resident workforce accommodation⁽⁵²⁾; j. Relocatable home park⁽⁶²⁾; k. Residential care facility⁽⁶⁵⁾; l. Resort complex⁽⁶⁶⁾; m. Retirement facility⁽⁶⁷⁾; n. Rural workers' accommodation⁽⁷¹⁾; o. Short-term accommodation⁽⁷⁷⁾; p. Tourist park⁽⁸⁴⁾.
RAD49	Except for an existing vacant lot, development does not create a new vehicle access point onto an Extractive resources transport route.
RAD50	A vehicle access point is located, designed and constructed in accordance with Planning scheme policy - Integrated design.
Heritage and landscape character (refer Overlay map - Heritage and landscape character to determine if the following requirements apply)	
<p>Note - Places, including sites, objects and buildings having local cultural heritage significance, are identified on Overlay map - Heritage and landscape character and listed in Schedule 1 of Planning scheme policy - Heritage and landscape character. Places also having cultural heritage significance at a State level and being entered in the Queensland Heritage Register, are also identified in Schedule 1 of Planning scheme policy - Heritage and landscape character.</p>	

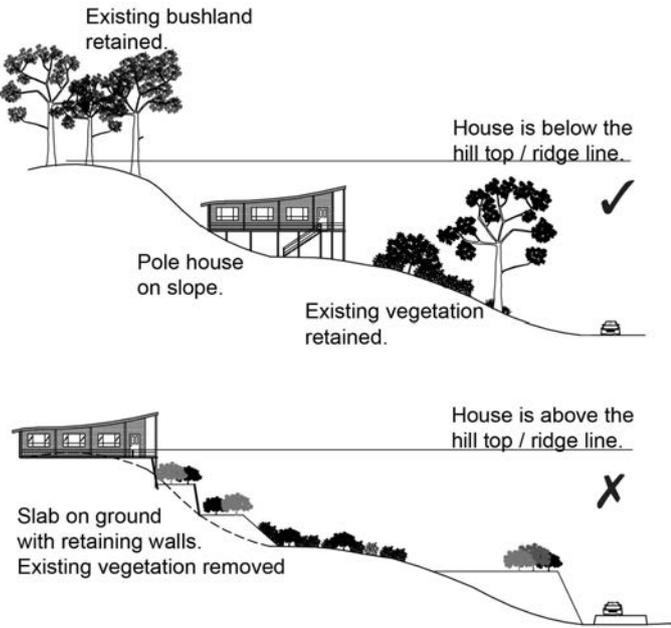

RAD51	<p>Development is for the preservation, maintenance, repair and restoration of the site, object or building.</p> <p>This does not apply to Listed item 99, in Schedule 1 - List of sites, objects and buildings of significant historical and cultural value of Planning scheme policy - Heritage and landscape character.</p> <p>Note - Preservation, maintenance, repair and restoration are defined in Schedule 1 - Definitions</p>
RAD52	<p>A cultural heritage conservation management plan is prepared in accordance with Planning scheme policy – Heritage and landscape character and submitted to Council prior to the commencement of any preservation, maintenance, repair and restoration works. Any preservation, maintenance, repair and restoration works are in accordance with the Council approved cultural heritage conservation management plan.</p> <p>This does not apply to Listed item 99 in Schedule 1 - List of sites, objects and buildings of significant historical and cultural value of Planning scheme policy - Heritage and landscape character.</p>
RAD53	<p>Development does not result in the removal of or damage to any significant tree identified on Overlay map – Heritage and landscape character and listed in Appendix 2 of Planning scheme policy – Heritage and landscape character.</p>
RAD54	<p>The following development does not occur within 20m of the base of any significant tree, identified on Overlay map – Heritage and landscape character and listed in Appendix 2 of Planning scheme policy – Heritage and landscape character:</p> <ol style="list-style-type: none"> construction of any building; laying of overhead or underground services; any sealing, paving, soil compaction; any alteration of more than 75mm to the ground surface level prior to work commencing.
RAD55	<p>Pruning of a significant tree occurs in accordance with Australian Standard AS 4373-2007 - Pruning of Amenity Trees.</p>
Landslide hazard (refer Overlay map - Landslide hazard to determine if the following requirements apply)	
RAD56	<p>Development does not:</p> <ol style="list-style-type: none"> involve earthworks exceeding 50m³; involve cut and fill having a height greater than 600mm; involve any retaining wall having a height greater than 600mm; redirect or alter the existing flow of surface or groundwater.
RAD57	<p>Buildings, excluding domestic outbuildings:</p> <ol style="list-style-type: none"> are split-level, multiple-slab, pier or pole construction; are not single plane slab on ground.
RAD58	<p>Development does not involve the manufacture, handling or storage of hazardous chemicals.</p>
Infrastructure buffers (refer Overlay map - Infrastructure buffers to determine if the following requirements apply)	
RAD59	<p>Development does not include the following uses within a Wastewater treatment site buffer:</p> <ol style="list-style-type: none"> Caretaker's accommodation⁽¹⁰⁾; Community residence⁽¹⁶⁾; Dual occupancy⁽²¹⁾; Dwelling house;⁽²²⁾ Dwelling unit⁽²³⁾;

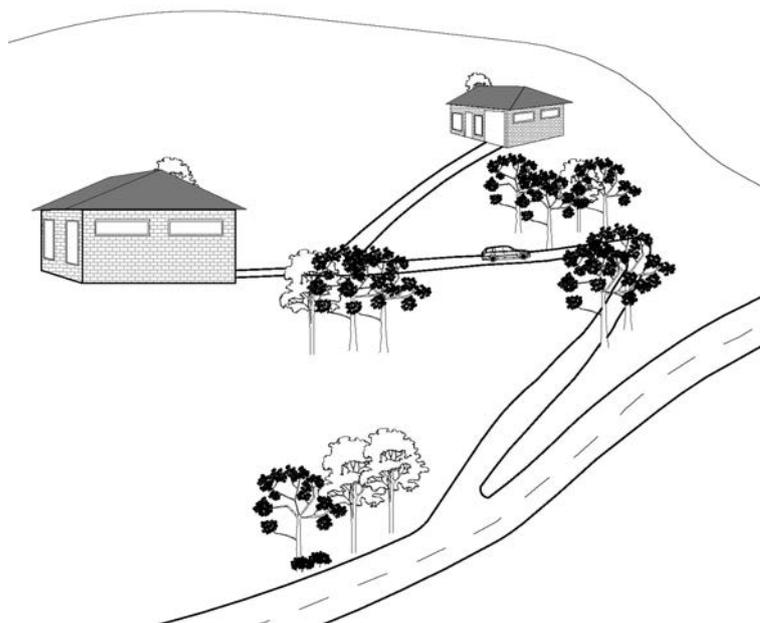

6 Zones

	<ul style="list-style-type: none"> f. Hospital⁽³⁶⁾; g. Rooming accommodation⁽⁶⁹⁾; h. Multiple dwelling⁽⁴⁹⁾; i. Non-resident workforce accommodation⁽⁵²⁾; j. Relocatable home park⁽⁶²⁾; k. Residential care facility⁽⁶⁵⁾; l. Resort complex⁽⁶⁶⁾; m. Retirement facility⁽⁶⁷⁾; n. Rural workers' accommodation⁽⁷¹⁾; o. Short-term accommodation⁽⁷⁷⁾; p. Tourist park⁽⁸⁴⁾.
RAD60	Development within a Water supply buffer does not include the incineration or burial of waste and all other waste is collected and stored in weather proof, sealed waste receptacles, located in roofed and bunded areas, for disposal by a licenced contractor.
RAD61	Management, handling and storage of hazardous chemicals (including fuelling of vehicles) within a Water supply buffer, is undertaken in secured, climate controlled, weather proof, level and bunded enclosures.
RAD62	Development does not restrict access to Bulk water supply infrastructure of any type or size, having regard to (among other things): <ul style="list-style-type: none"> a. buildings or structures; b. gates and fences; c. storage of equipment or materials; d. landscaping or earthworks or stormwater or other infrastructure.
RAD63	On-site sewerage facilities in a Water supply buffer produce a minimum secondary treated effluent (90th percentile) and effluent application to ensure water quality is maintained and protected.
RAD64	On-site sewerage facilities in a Water supply buffer for a dwelling house ⁽²²⁾ include: <ul style="list-style-type: none"> a. emergency storage capacity of 1,000 litres and adequate buffering for shock loading/down time; b. a reserve land application area of 100% of the effluent irrigation design area; c. land application areas that are vegetated; d. the base of the land application field is at least 2 metres above the seasonal high water table/bedrock (whichever is the closest to the base of the application area); e. wastewater collection and storage systems must have capacity to accommodate full load at peak times.
RAD65	On-site sewerage facilities in a Water supply buffer for development other than a dwelling house include emergency storage capable of holding 3-6 hours peak flow of treated effluent in the event of emergencies/overload with provision for de-sludging.
RAD66	Development involving Permanent plantation ⁽⁵⁹⁾ within a Water supply buffer maintains a minimum of 30% ground cover at all times.
RAD67	Development does not involve the construction of any buildings or structures within a Bulk water supply infrastructure buffer.
RAD68	Development involving a major hazard facility or an Environmentally Relevant Activity (ERA) is setback 30m from a Bulk water supply infrastructure buffer.
RAD69	Development does not involve the construction of any buildings or structures within the Gas pipeline buffer.

RAD70	Development does not include the following uses located within a landfill site buffer: <ul style="list-style-type: none"> a. caretaker's accommodation⁽¹⁰⁾; b. community residence⁽¹⁶⁾; c. dual occupancy⁽²¹⁾; d. dwelling house⁽²²⁾; e. dwelling unit⁽²³⁾; f. hospital⁽³⁶⁾; g. rooming accommodation⁽⁶⁹⁾; h. multiple dwelling⁽⁴⁹⁾; i. non-resident workforce accommodation⁽⁵²⁾; j. relocatable home park⁽⁶²⁾; k. residential care facility⁽⁶⁵⁾; l. resort complex⁽⁶⁶⁾; m. retirement facility⁽⁶⁷⁾; n. rural workers' accommodation⁽⁷¹⁾; o. short term accommodation⁽⁷⁷⁾; p. tourist park⁽⁸⁴⁾.
RAD71	All habitable rooms located within an Electricity supply substation buffer are: <ul style="list-style-type: none"> a. located a minimum of 10m from an electricity supply substation⁽⁸⁰⁾; and b. acoustically insulated to achieve the noise levels listed in Schedule 1, Acoustic Quality Objectives, Environmental Protection (Noise) Policy 2008.
RAD72	Development does not involve the construction of any buildings or structures containing habitable rooms or sensitive land uses within a High voltage electricity line buffer.
Overland flow path (refer Overlay map - Overland flow path to determine if the following requirements apply)	
RAD73	Development for a material change of use or building work does not involve the construction of a building or structure in an Overland flow path area.
RAD74	Development for a material change of use or operational work does not impede the flow of flood waters through the premises or worsen flood flows to other premises. <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow</p>
RAD75	Development for a material change of use or building work ensures that fencing in an overland flow path area is at least 50% permeable.
RAD76	Development for a material change of use or building work that involves a hazardous chemical ensures the hazardous chemicals is not located within an overland flow path area.
RAD77	Development for a material change of use or building work for a Park ⁽⁵⁷⁾ ensures that work is provided in accordance with the requirements set out in Appendix B of the Planning scheme policy - Integrated design.
Riparian and wetland setbacks (refer Overlay map - Riparian and wetland setback to determine if the following requirements apply)	
Note - W1, W2 and W3 waterway and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.	

6 Zones

<p>RAD78</p>	<p>No development is to occur within:</p> <ol style="list-style-type: none"> 50m from top of bank for W1 waterway and drainage line 30m from top of bank for W2 waterway and drainage line 20m from top of bank for W3 waterway and drainage line 100m from the edge of a Ramsar wetland, 50m from all other wetlands. <p>Note - W1, W2 and W3 waterways and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.</p> <p>Note - In some cases, the top of bank may not be easily defined, as such a hydraulic measurement may be applied instead. Moreton Bay Regional Council will provide further direction on how to determine and locate the setback boundary in these locations.</p> <p>Note - The minimum setback distance applies to the each side of waterway.</p>
<p>Scenic amenity - Regionally significant (Hills) and Locally important (Coast) - (refer Overlay map - Scenic amenity to determine if the following requirements apply)</p>	
<p>RAD79</p>	<p>Where located in the Regionally significant (Hills) scenic amenity overlay, buildings and structures are not:</p> <ol style="list-style-type: none"> located on a hill top or ridge line; and all parts of the building and structure are located below the hill top or ridge line. 
<p>RAD80</p>	<p>Where located in the Regionally significant (Hills) scenic amenity overlay, driveways and accessways:</p> <ol style="list-style-type: none"> go across land contours and do not cut straight up slopes; follow natural contours, not resulting in batters or retaining walls being greater than 1m in height.

RAD81 Where located in the Regionally significant (Hills) scenic amenity overlay, roofs and wall surfaces of buildings and structures adopt the following colours:

Colours from Australian Standard AS2700s – 1996

G12 – Holly	G53 – Banksia	N44 – Bridge Grey
G13 – Emerald	G54 – Mist Green	N45 – Koala Grey
G14 – Moss Green	G55 – Lichen	N52 – Mid Grey
G15 – Rainforest Green	G56 – Sage Green	N54 – Basalt
G16 – Traffic Green	G62 – Rivergum	N55 – Lead Grey
G17 – Mint Green	G64 – Slate	X54 – Brown
G21 – Jade	G65 – Ti Tree	X61 – Wombat
G22 – Serpentine	N25 – Birch Grey	X62 – Dark Earth
G23 – Shamrock	N32 – Green Grey	X63 – Iron Bark
G24 – Fern Green	N33 – Lightbox Grey	Y51 – Bronze Olive
G25 – Olive	N35 – Light Grey	Y61 – Black Olive
G34 – Avocado	N41 – Oyster	Y63 – Khaki
G52 – Eucalyptus	N42 – Storm Grey	Y66 – Mudstone
	N43 – Pipeline Grey	

RAD82 Where located in the Regionally significant (Hills) scenic amenity overlay, roofs and wall surfaces of buildings and structures are painted or finished such that reflectivity is less than 35%.

Transport noise corridors (refer Overlay map - Transport noise corridors)

6 Zones

Note - This is for information purposes only. No requirements for accepted development or criteria for assessable development apply. Development located within a Transport Noise Corridor must satisfy the requirements of the Queensland Development Code

Part F — Criteria for assessable development- Utilities precinct

Where development is categorised as assessable development - code assessment in the Table of Assessment, and located in a precinct, the assessment benchmarks are the criteria set out in Part F, Table 6.2.2.3.2 as well as the purpose statement and overall outcomes of this code.

Where development is categorised as assessable development - impact assessment, the assessment benchmarks become the whole of the planning scheme.

Table 6.2.2.3.2 Assessable development - Utilities precinct

Performance outcomes	Examples that achieve aspects of the Performance Outcomes
General criteria	
General	
<p>PO1</p> <p>The site is sufficient in area and dimension to accommodate the use, buildings and structures as well as required buffering measures, treatments, access, parking and manoeuvring.</p>	No example provided.
<p>PO2</p> <p>Development does not hinder or constrain the ongoing operation and expansion of uses anticipated in the Utilities precinct.</p>	No example provided.
Built form and design	
<p>PO3</p> <p>Buildings and structures are of a height, scale and bulk which:</p> <ul style="list-style-type: none"> a. are consistent with the existing amenity and character; b. minimise the visual impact of large-scale built form; c. do not result in a significant loss of amenity. 	No example provided.
<p>PO4</p> <p>Buildings and structures are designed and constructed to:</p> <ul style="list-style-type: none"> a. incorporate a mix of colours and high-quality materials to add diversification to treatments and finishes; 	<p>E4.1</p> <p>Development provides materials and finishes of a high quality that are not susceptible to stain, discolour or deterioration.</p>
	<p>E4.2</p>

<ul style="list-style-type: none"> b. avoid blank walls through façade articulation to create visual interest and deter graffiti and vandalism; c. activate and address the street, public areas and public open space; d. reduce cluttering of plant and equipment on building roofs. 	<p>Development incorporates articulated walls with variation, detail and colour to reduce the bulk and impact of development and minimise expansive blank walls.</p> <hr/> <p>E4.3</p> <p>The main facade of the building directly addresses and faces the street and contains a mix of materials and colours.</p> <hr/> <p>E4.4</p> <p>Building utilities such as lift motor rooms and telecommunications equipment are designed to be visually integrated with the building.</p>
<p>PO5</p> <p>Development:</p> <ul style="list-style-type: none"> a. maintain a balance area of the site that is open and uncluttered by building and structures; b. ensure that buildings and structures are not overbearing, visually dominant or out of character with the surrounding environment nor detract from the amenity of adjoining land. 	<p>E5</p> <p>Site cover of all buildings and structures does not exceed 40%.</p>
Building setbacks	
<p>PO6</p> <p>Building setback:</p> <ul style="list-style-type: none"> a. ensures impacts from the use are buffered and ameliorated; b. is compatible with established setbacks; c. is sufficient to minimise overlooking and maintain privacy of adjoining properties; d. is sufficient to ensure development is not visually dominant or overbearing on adjoining properties. 	<p>No example provided.</p>
Personal and property safety	
<p>PO7</p> <p>Buildings, structures and spaces are designed and constructed to create a safe and secure environment by incorporating key crime prevention through environmental design principles (CPTED), including:</p> <ul style="list-style-type: none"> a. casual surveillance opportunities and sight lines; b. way-finding cues and signage; 	<p>No example provided.</p>

6 Zones

<ul style="list-style-type: none"> c. defined different uses and private and public ownership through adequate fencing and signage; d. light illuminates pathways and potential entrapment areas as well as maximising opportunities for penetration of natural light into spaces; e. minimise predictable routes and entrapment locations. 	
Amenity	
<p>PO8</p> <p>The amenity of the area and adjacent sensitive land uses are protected from the impacts of dust, odour, light, chemicals and other environmental nuisances.</p>	<p>No example provided.</p>
Car parking	
<p>PO9</p> <p>On-site car parking associated with an activity:</p> <ul style="list-style-type: none"> a. provides safe and convenient on-site parking and manoeuvring to meet anticipated parking demand; b. does not result adverse impacts on the efficient and safe functioning of the road network; c. does not compromise the ongoing operation of existing or planned infrastructure and utilities. <p>Note - Refer to Planning scheme policy - Integrated transport assessment for guidance on how to achieve compliance with this outcome</p>	<p>E9</p> <p>On-site car parking is provided in accordance with Schedule 7 - Car parking.</p>
Landscaping and screening	
<p>PO10</p> <p>Landscaping and screening is provided in a manner that :</p> <ul style="list-style-type: none"> a. achieves a high level of privacy and amenity to sensitive land use on adjoining properties and when viewed from the street; b. reduces the visual impact of building bulk and presence and hard surface areas on the local character and amenity of adjoining sensitive land use and from the street; 	<p>No example provided.</p>

<p>c. creates a secure and safe environment by incorporating key elements of crime prevention through environmental design;</p> <p>d. achieves the design principles outlined in Planning scheme policy - Integrated design.</p>	
Loading and servicing	
<p>PO11</p> <p>Loading and servicing areas:</p> <p>a. are not visible from the street frontage;</p> <p>b. are integrated into the design of the building;</p> <p>c. include screening and buffers to reduce negative impacts on adjoining sensitive land uses;</p> <p>d. where possible loading and servicing areas are consolidated and shared with adjoining sites.</p>	<p>No example provided.</p>
Waste	
<p>PO12</p> <p>Bins and bin storage areas are provided, designed and managed in accordance with Planning scheme policy – Waste.</p>	<p>No example provided.</p> <p>E12</p> <p>Development is designed to meet the criteria in the Planning scheme policy - Waste and is demonstrated in a waste management program.</p>
Noise	
<p>PO13</p> <p>Noise generating uses do not adversely affect existing noise sensitive uses.</p> <p>Note - The use of walls, barriers or fences that are visible from or adjoin a road or public area are not appropriate noise attenuation measures unless adjoining a motorway, arterial road or rail line.</p> <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p>	<p>No example provided.</p>
<p>PO14</p> <p>Sensitive land uses are provided with an appropriate acoustic environment within designated external private outdoor living spaces and internal areas while:</p> <p>a. contributing to safe and usable public spaces, through maintaining high levels of surveillance of parks, streets and roads that serve active transport</p>	<p>E14.1</p> <p>Development is designed to meet the criteria outlined in the Planning Scheme Policy – Noise</p> <hr/> <p>E14.2</p> <p>Noise attenuation structures (e.g. walls, barriers or fences):</p>

6 Zones

<p>purposes (e.g. existing or future pedestrian paths or cycle lanes etc);</p> <p>b. maintaining the amenity of the streetscape.</p> <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p> <p>Note - Refer to Planning Scheme Policy – Integrated design for details and examples of noise attenuation structures.</p>	<p>a. are not visible from an adjoining road or public area unless:</p> <ul style="list-style-type: none"> i. adjoining a motorway or rail line; or ii. adjoining part of an arterial road that does not serve an existing or future active transport purpose (e.g. pedestrian paths or cycle lanes) or where attenuation through building location and materials is not possible. <p>b. do not remove existing or prevent future active transport routes or connections to the street network;</p> <p>c. are located, constructed and landscaped in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Refer to Planning scheme policy – Integrated design for details and examples of noise attenuation structures.</p> <p>Note - Refer to Overlay map – Active transport for future active transport routes.</p>
---	--

Hazardous chemicals

Note - To assist in demonstrating compliance with the following performance outcomes, a Hazard Assessment Report may be required to be prepared and submitted by a suitably qualified person in accordance with 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.

Note - Terms used in this section are defined in 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.

<p>PO15</p> <p>Off sites risks from foreseeable hazard scenarios involving hazardous chemicals are commensurate with the sensitivity of the surrounding land use zones.</p>	<p>E15.1</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of land zoned for vulnerable or sensitive land uses as described below:</p> <p>Dangerous Dose</p> <ul style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ul style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. b. For any hazard scenario involving fire or explosion: <ul style="list-style-type: none"> i. 7kPa overpressure; ii. 4.7kW/m2 heat radiation.
--	--

	<p>If criteria E17.1 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 0.5×10^{-6}/year.</p> <hr/> <p>E15.2</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of a commercial or community activity land use zone as described below:</p> <p>Dangerous Dose</p> <p>a. For any hazard scenario involving the release of gases or vapours:</p> <ul style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. <p>b. For any hazard scenario involving fire or explosion:</p> <ul style="list-style-type: none"> i. 7kPa overpressure; ii. 4.7kW/m² heat radiation. <p>If criteria E17.2 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 5×10^{-6}/year.</p> <hr/> <p>E15.3</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of an industrial land use zone as described below:</p> <p>Dangerous Dose</p> <p>a. Stormwater pipe up to 825mm diameter	3.0m						
Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter	4.0m						

<p>Note - In order to achieve a lawful point of discharge, stormwater easements may also be required over temporary drainage channels/infrastructure where stormwater discharges to a balance lot prior to entering Council's stormwater drainage system.</p>	<table border="1" data-bbox="810 203 1469 353"> <tr> <td data-bbox="818 217 1137 344">Stormwater pipe greater than 825mm diameter</td> <td data-bbox="1145 217 1461 344">Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).</td> </tr> </table> <p>Note - Additional easement width may be required in certain circumstances in order to facilitate maintenance access to the stormwater system.</p> <p>Note - Refer to Planning Scheme Policy - Integrated Design (Appendix C) for easement requirements over open channels.</p>	Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).
Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).		
<p>PO</p> <p>Stormwater management facilities (excluding outlets) are located outside of riparian areas and prevent increased channel bed and bank erosion.</p>	<p>E</p> <p>No example provided.</p>		

Site works and construction management	
<p>PO33</p> <p>The site and any existing structures are maintained in a tidy and safe condition.</p>	<p>No example provided.</p>
<p>PO34</p> <p>All works on-site are managed to:</p> <ol style="list-style-type: none"> minimise as far as practicable, impacts on adjoining or adjacent premises and the streetscape in regard to erosion and sedimentation, dust, noise, safety and light; minimise as far as possible, impacts on the natural environment; ensure stormwater discharge is managed in a manner that does not cause actionable nuisance or annoyance to any person or premises; avoid adverse impacts on street trees and their critical root zone. 	<p>E34.1</p> <p>Works incorporate temporary stormwater runoff, erosion and sediment controls and trash traps removal devices designed in accordance with the Urban Stormwater Quality Planning Guidelines, State Planning Policy, Schedule 10 - Stormwater management design objectives, Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design, including but not limited to the following:</p> <ol style="list-style-type: none"> stormwater is not discharged to adjacent properties in a manner that differs significantly from pre-existing conditions; stormwater discharged to adjoining and downstream properties does not cause scour and or erosion of any kind; stormwater discharge rates do not exceed pre-existing conditions; the 10% AEP storm event is the minimum design storm for all temporary diversion drains; and the 50% AEP storm event is the minimum design storm for all silt barriers and sedimentation basins.

6 Zones

	<p>f. minimum design storm for all temporary diversion drains and sedimentation basins in accordance with Schedule 10 - Stormwater management design objectives;</p> <p>g. ponding or concentration of stormwater does not occur in adjoining properties.</p>
<p>PO35</p> <p>Dust suppression measures are implemented during soil disturbances and construction works to protect nearby premises from unreasonable dust impacts.</p>	<p>E34.2</p> <p>Stormwater runoff, erosion and sediment controls are constructed in accordance with Planning scheme policy - Integrated design (Appendix C) prior to commencement of any clearing or earthworks and are maintained and adjusted as necessary at all times to ensure their ongoing effectiveness.</p> <p>Note - The measures are adjusted on-site to maximise their effectiveness.</p> <p>E34.3</p> <p>The completed earthworks area is stabilised using turf, established grass seeding, mulch or sprayed stabilisation techniques to control erosion and sediment and dust from leaving the property.</p> <p>E</p> <p>Existing street trees are protected and not damaged during works.</p> <p>Note - Where development occurs in the tree protection zone, measures and techniques as detailed in Australian Standard AS 4970 Protection of trees on development sites are adopted and implemented.</p>
<p>PO36</p> <p>All development works on-site and including the transportation of material to and from the site are managed to not negatively impact the existing road network, the amenity of the surrounding area or the streetscape.</p> <p>Note - Where the amount of imported or exported material is greater than 50m³, a haulage route must be identified and approved by Council.</p>	<p>E</p> <p>No example provided.</p> <p>No dust emissions extend beyond the boundaries of the site during soil disturbances and construction works.</p> <p>E36.1</p> <p>Construction traffic including contractor car parking is controlled in accordance with a traffic management plan, prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) to ensure all traffic movements to and from the site are safe.</p> <p>E36.2</p>

<p>Note - A Traffic Management Plan may be required to demonstrate compliance with this PO. A Traffic Management Plan is to be prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD).</p> <p>Note - A haulage route must be identified and approved by Council where imported or exported material is transported to the site via a road of Local Collector standard or less, and:</p> <ol style="list-style-type: none"> the aggregate volume of imported or exported material is greater than 1000m³; or the aggregate volume of imported or exported material is greater than 200m³ per day; or the proposed haulage route involves a vulnerable land use or shopping centre. <p>Note - A dilapidation report (including photographs) may be required for the haulage route to demonstrate compliance with this PO.</p> <p>Editor's note - Where associated with a State-controlled road, further requirements may apply, and approval may be required from the Department of Transport and Main Roads.</p>	<p>All contractor car parking is either provided on the development site, or on an alternative site in the general locality which has been set aside for car parking. Contractors vehicles are generally not to be parked in existing roads.</p> <p>Note - A Traffic Management Plan may be required for the site in accordance with the Manual of Uniform Traffic Control Devices (MUTCD).</p>
	<p>E36.3</p> <p>Any material dropped, deposited or spilled on the road(s) as a result of construction processes associated with the site are to be cleaned at all times.</p>
	<p>E</p> <p>Construction traffic to and from the development site uses the highest classification streets or roads where a choice of access routes is available. Haul routes for the transport of imported or spoil material and gravel pavement material along Council roads below sub-arterial standard must be approved routes.</p> <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p> <p>Note - A dilapidation report may be required to demonstrate compliance with this E.</p>
	<p>E</p> <p>Where works are carried out in existing roads, the works must be undertaken so that the existing roads are maintained in a safe and useable condition. Practical access for residents, visitors and services (including postal deliveries and refuse collection) is retained to existing lots during the construction period and after completion of the works.</p> <p>Note - A traffic control plan prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) will be required for any works that will affect access, traffic movements or traffic safety in existing roads.</p>
	<p>E</p> <p>Access to the development site is obtained via an existing lawful access point.</p>
<p>PO37</p> <p>All disturbed areas are to be progressively stabilised during construction and the entire site rehabilitated and substantially stabilised at the completion of construction.</p>	<p>E37</p> <p>At completion of construction all disturbed areas of the site are to be:</p>

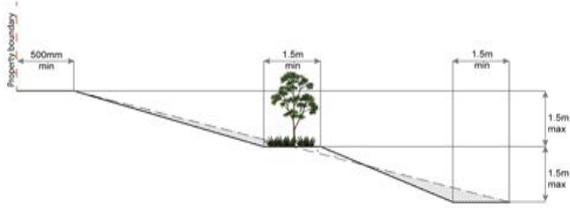

6 Zones

<p>Note - Refer to Planning scheme policy - Integrated design for details.</p>	<p>a. topsoiled with a minimum compacted thickness of fifty (50) millimetres;</p> <p>b. grassed stabilised using turf, established grass seeding, mulch or sprayed stabilisation techniques.</p> <p>Note - These areas are to be maintained during any maintenance period to maximise grass coverage from grass seeding of these areas:</p>
<p>PO</p> <p>Earthworks are undertaken to ensure that soil disturbances are staged into manageable areas.</p> <p>Note - A site specific Erosion and Sediment Control Plan (ESCP) will be required to demonstrate compliance with this PO. An ECP is to be prepared in accordance with Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design (Appendix C).</p>	<p>E</p> <p>Soil disturbances are staged into manageable areas of not greater than 3.5 ha.</p>
<p>PO38</p> <p>The clearing of vegetation on-site:</p> <p>a. is limited to the area of infrastructure works, building areas and other necessary areas for the works; and</p> <p>b. includes the removal of declared weeds and other materials which are detrimental to the intended use of the land;</p> <p>c. is disposed of in a manner which minimises nuisance and annoyance to existing premises.</p> <p>Note - No burning of cleared vegetation is permitted.</p>	<p>E38</p> <p>All native vegetation to be retained on-site is temporarily fenced or protected prior to and during development works.</p> <p>Note - No parking of vehicles of or storage of machinery or goods is to occur in these areas during development works.</p> <p>E</p> <p>Disposal of materials is managed in one or more of the following ways:</p> <p>a. all cleared vegetation, declared weeds, stumps, rubbish, car bodies, scrap metal and the like are removed and disposed of in a Council land fill facility; or</p> <p>b. all native vegetation with a diameter below 400mm is to be chipped and stored on-site.</p> <p>Note - The chipped vegetation must be stored in an approved location.</p>
<p>PO</p> <p>All development works are carried out at times which minimise noise impacts to residents.</p>	<p>E</p> <p>All development works are carried out within the following times:</p> <p>a. Monday to Saturday (other than public holidays) between 6:30am and 6:30pm on the same day;</p> <p>b. no work is to be carried out on Sundays or public holidays.</p>

	Note - Work outside the above hours may be approved (in writing) where it can be demonstrated that the work will not cause significant inconvenience or disruption to the public, or the work is unlikely to cause annoyance or inconvenience to occupants of adjacent properties.
PO39 Any alteration or relocation in connection with or arising from the development to any service, installation, plant, equipment or other item belonging to or under the control of the telecommunications authority, electricity authorities, the Council or other person engaged in the provision of public utility services is to be carried with the development and at no cost to Council.	No example provided.

Earthworks	
PO40 On-site earthworks are designed to consider the visual and amenity impact as they relate to: <ol style="list-style-type: none"> the natural topographical features of the site; short and long-term slope stability; soft or compressible foundation soils; reactive soils; low density or potentially collapsing soils; existing fill and soil contamination that may exist on-site; the stability and maintenance of steep rock slopes and batters; excavation (cut) and fill and impacts on the amenity of adjoining lots (e.g. residential). Note – Filling or excavation works are to be completed within six months of the commencement date.	E40.1 All cut and fill batters are provided with appropriate scour, erosion protection and run-off control measures including catch drains at the top of batters and lined batter drains as necessary.
	E40.2 Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance of steep rock slopes and batters.
	E40.3 Inspection and certification of steep rock slopes and batters is required by a suitably qualified and experienced RPEQ.
	E40.4 All filling or excavation is contained on-site and is free draining .
	E40.5 All fill placed on-site is: <ol style="list-style-type: none"> limited to that area required for the necessary for the approved use; clean and uncontaminated (i.e. no building waste, concrete, green waste, actual acid sulfate soils, potential acid sulfate soils or contaminated material etc.) material is used as fill).

6 Zones

	<p>E40.6</p> <p>The site is prepared and the fill placed on-site in accordance with AS3798.</p> <p>Note - The fill is to be inspected and tested in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p>
<p>PO41</p> <p>Embankments are stepped, terraced and landscaped to not adversely impact on the visual amenity of the surrounding area.</p>	<p>E40.7</p> <p>Materials used for structural fill are in accordance with AS3798.</p> <p>E41</p> <p>Any embankments more than 1.5 metres in height are stepped, terraced and landscaped.</p> <p>Figure - Embankment</p> 
<p>PO42</p> <p>Filling or excavation is undertaken in a manner that:</p> <ol style="list-style-type: none"> does not adversely impact on a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land; does not preclude reasonable access to a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land for monitoring, maintenance or replacement purposes. <p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p>	<p>E42.1</p> <p>No filling or excavation is undertaken in an easement issued in favour of Council or a public sector entity.</p> <p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p> <p>E42.2</p> <p>Filling or excavation that would result in any of the following is not carried out on-site:</p> <ol style="list-style-type: none"> a reduction in cover over any Council or public sector entity infrastructure service to less than 600mm; an increase in finished surface grade over, or within 1.5m on each side of, the Council or public sector entity infrastructure above that which existed prior to the earthworks being undertaken; prevent reasonable access to Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the site for monitoring, maintenance or replacement purposes.

	Note - Public sector entity as is defined in the Sustainable Planning Schedule 2 of the Act 2009.
<p>PO43</p> <p>Filling or excavation does not result in land instability.</p> <p>Note - Steep rock slopes and batters are inspected and certified for long-term stability by a suitably qualified and experienced geotechnical engineer with RPEQ qualifications. Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance.</p>	No example provided.
<p>PO44</p> <p>Development Filling or excavation does not result in:</p> <ol style="list-style-type: none"> adverse impacts on the hydrological and hydraulic capacity of the waterway or floodway; increased flood inundation outside the site; any reduction in the flood storage capacity in the floodway; and any clearing of native vegetation. <p>Note - To demonstrate compliance with this outcome, Planning Scheme Policy - Stormwater Management provides guidance on the preparation of a site based stormwater management plan by a suitably qualified professional. Refer to Planning scheme policy - Integrated design for guidance on infrastructure design and modelling requirements.</p>	No example provided.
<p>PO</p> <p>Filling or excavation on the development site is undertaken in a manner which does not create or accentuate problems associated with stormwater flows and drainage systems on land adjoining the site.</p>	<p>E</p> <p>Filling and excavation undertaken on the development site are shaped in a manner which does not:</p> <ol style="list-style-type: none"> prevent stormwater surface flow which, prior to commencement of the earthworks, passed onto the development site, from entering the land; or redirect stormwater surface flow away from existing flow paths; or divert stormwater surface flow onto adjacent land, (other than a road), in a manner which: <ol style="list-style-type: none"> concentrates the flow; or increases the flow rates of stormwater over the affected section of the adjacent land above the situation which existed prior to the diversion; or causes actionable nuisance to any person, property or premises.

Retaining walls and structures

PO45

All earth retaining structures provide a positive interface with the streetscape and minimise impacts on the amenity of adjoining residents.

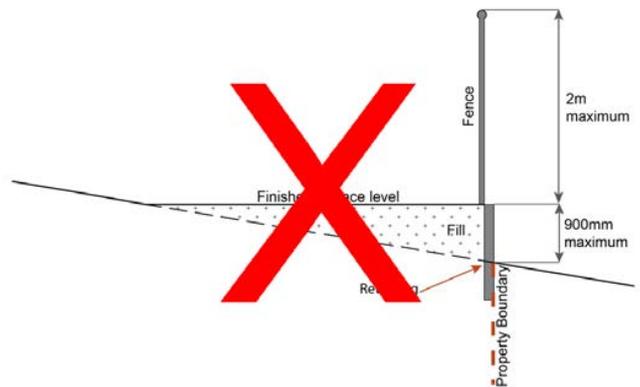

Note - Refer to Planning scheme policy - Residential design for guidance on how to achieve compliance with this performance outcome.

E45

Earth retaining structures:-

- a. are not constructed of boulder rocks or timber;
- b. where height is no greater than 900mm, are provided in accordance with Figure - Retaining on a boundary;

Figure - Retaining on boundary

- c. where height is greater than 900mm but no greater than 1.5m, are to be setback at least the equivalent height of the retaining structure from any property boundary;
- d. where height is greater than 1.5m, are to be setback and stepped 1.5m vertical: 1.5m horizontal, terraced, landscaped and drained as shown below.

Figure - Cut

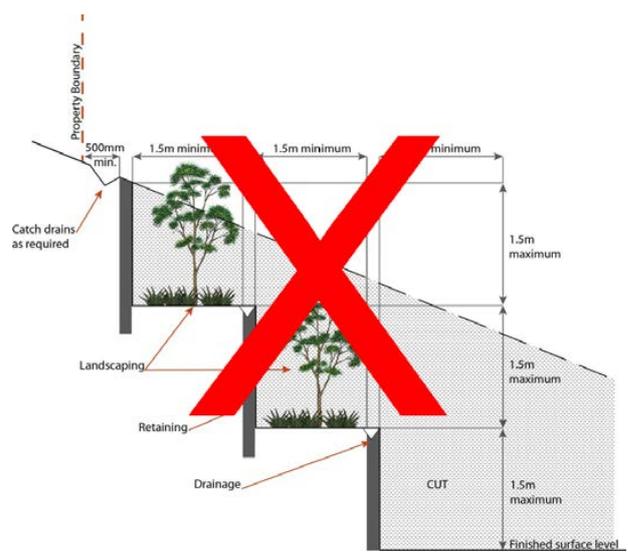

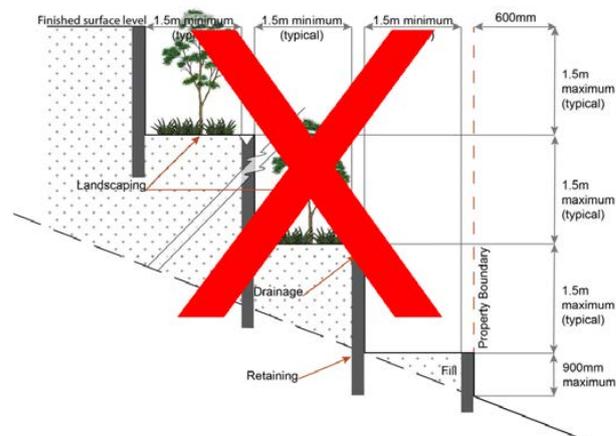

Figure - Fill

Filling or excavation does not:

- a. involve a change in level of more than 1.0m relative to natural ground level;

OR

result in a batter greater than 1V to 6H;

- b. necessitate the construction of a freestanding retaining wall exceeding 1.0m in height relative to finished ground level;
- c. result in the top of any cut batter, or the exposed face of any freestanding retaining wall supporting that cut, being closer than 500mm to a property boundary;
- d. result in the toe of any fill batter, or exposed face of any freestanding retaining wall supporting that fill, being closer than 1.0m to a property boundary unless:
- i. the depth of fill within the 1.0m strip does not exceed 200mm relative to natural ground level; or
 - ii. the batter slope within that 1.0m strip is no steeper than 1V to 2H.

THE NEW FIGURE BELOW IS PROPOSED AS PART OF THIS AMENDMENT

6 Zones

	<p style="text-align: center;">Figure - Filling or Excavation</p>
<p>PO</p> <p>All earth retaining structures are to be certified as being designed and constructed in accordance with relevant Australian Standards and Building Code requirements.</p>	<p>E</p> <p>Retaining walls are designed and certified by a RPEQ so that:</p> <ol style="list-style-type: none"> a. the minimum design life (the period assumed in design for which a structure or structural element is required to perform its intended purpose without replacement or major structural repairs) for the earth retaining structure is that specified in Australian Standard AS 4678 Earth-retaining structures; b. earth retaining structures within the land and around areas of cut on or near the boundaries of the site must be designed to allow for live and dead loads associated with the land/premise's current occupancy and use; c. where the adjoining land use rights or zoning allows for industrial uses a minimum live load of 25kPA must be allowed in the design of the retaining structure for these adjoining premises. <p>Note - Retaining walls will only be approved following submission of a full detailed design certified by a RPEQ.</p>

Fire Services

Note - The provisions under this heading only apply if:

- a. the development is for, or incorporates:
 - i. reconfiguring a lot for a community title scheme creating 1 or more vacant lots; or
 - ii. material change of use for 2 or more sole occupancy units on the same lot, or within the same community titles scheme; or
 - iii. material change of use for a Tourist park⁽⁸⁴⁾ with accommodation in the form of caravans or tents; or
 - iv. material change of use for outdoor sales⁽⁵⁴⁾, outdoor processing or outdoor storage where involving combustible materials.

AND

- b. none of the following exceptions apply:
- i. the distributor-retailer for the area has indicated, in its netserv plan, that the premises will not be served by that entity's reticulated water supply; or
 - ii. every part of the development site is within 60m walking distance of an existing fire hydrant on the distributor-retailer's reticulated water supply network, measured around all obstructions, either on or adjacent to the site.

Note - The provisions under this heading do not apply to buildings that are required by the Building Code of Australia to have a fire hydrant system complying with Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations or other fire fighting facilities which provide equivalent protection.

PO46

Development incorporates a fire fighting system that:

- a. satisfies the reasonable needs of the fire fighting entity for the area;
- b. is appropriate for the size, shape and topography of the development and its surrounds;
- c. is compatible with the operational equipment available to the fire fighting entity for the area;
- d. considers the fire hazard inherent in the materials comprising the development and their proximity to one another;
- e. considers the fire hazard inherent in the surrounds to the development site;
- f. is maintained in effective operating order.

Note - The Queensland Fire and Emergency Services is the entity currently providing the fire fighting function for the urban areas of the Moreton Bay Region.

E46.1

External fire hydrant facilities are provided on site to the standard prescribed under the relevant parts of *Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations*.

Note - For this requirement for accepted development, the following are the relevant parts of AS 2419.1 (2005) that may be applicable:

- a. in regard to the form of any fire hydrant - Part 8.5 and Part 3.2.2.1, with the exception that for Tourist parks⁽⁸⁴⁾ or development comprised solely of dwellings and their associated outbuildings, single outlet above-ground hydrants or suitably signposted in-ground hydrants would be an acceptable alternative;
- b. in regard to the general locational requirements for fire hydrants - Part 3.2.2.2 (a), (e), (f), (g) and (h) as well as Appendix B of AS 2419.1 (2005);
- c. in regard to the proximity of hydrants to buildings and other facilities - Part 3.2.2.2 (b), (c) and (d), with the exception that:
 - i. for dwellings and their associated outbuildings, hydrant coverage need only extend to the roof and external walls of those buildings;
 - ii. for caravans and tents, hydrant coverage need only extend to the roof of those tents and caravans;
 - iii. for outdoor sales⁽⁵⁴⁾, processing or storage facilities, hydrant coverage is required across the entire area of the outdoor sales⁽⁵⁴⁾, outdoor processing and outdoor storage facilities;
- d. in regard to fire hydrant accessibility and clearance requirements - Part 3.5 and, where applicable, Part 3.6.

E46.2

A continuous path of travel having the following characteristics is provided between the vehicle access point to the site and each external fire hydrant and hydrant booster point on the land:

- a. an unobstructed width of no less than 3.5m;
- b. an unobstructed height of no less than 4.8m;
- c. constructed to be readily traversed by a 17 tonne HRV fire brigade pumping appliance;
- d. an area for a fire brigade pumping appliance to stand within 20m of each fire hydrant and 8m of each hydrant booster point.

E46.3

6 Zones

	<p>On-site fire hydrant facilities are maintained in effective operating order in a manner prescribed in <i>Australian Standard AS1851 (2012) – Routine service of fire protection systems and equipment</i>.</p>
<p>PO47</p> <p>On-site fire hydrants that are external to buildings, as well as the available fire fighting appliance access routes to those hydrants, can be readily identified at all times from, or at, the vehicular entry point to the development site.</p>	<p>E47</p> <p>For development that contains on-site fire hydrants external to buildings:</p> <ol style="list-style-type: none"> a. those external hydrants can be seen from the vehicular entry point to the site; or b. a sign identifying the following is provided at the vehicular entry point to the site: <ol style="list-style-type: none"> i. the overall layout of the development (to scale); ii. internal road names (where used); iii. all communal facilities (where provided); iv. the reception area and on-site manager’s office (where provided); v. external hydrants and hydrant booster points; vi. physical constraints within the internal roadway system which would restrict access by fire fighting appliances to external hydrants and hydrant booster points. <p>Note - The sign prescribed above, and the graphics used are to be:</p> <ol style="list-style-type: none"> a. in a form; b. of a size; c. illuminated to a level; <p>which allows the information on the sign to be readily understood, at all times, by a person in a fire fighting appliance up to 4.5m from the sign.</p>
<p>PO48</p> <p>Each on-site fire hydrant that is external to a building is signposted in a way that enables it to be readily identified at all times by the occupants of any firefighting appliance traversing the development site.</p>	<p>E48</p> <p>For development that contains on-site fire hydrants external to buildings, those hydrants are identified by way of marker posts and raised reflective pavement markers in the manner prescribed in the technical note <i>Fire hydrant indication system</i> produced by the Queensland Department of Transport and Main Roads.</p> <p>Note - Technical note Fire hydrant indication system is available on the website of the Queensland Department of Transport and Main Roads.</p>

Use specific criteria	
Major electricity infrastructure⁽⁴³⁾, Substation⁽⁸⁰⁾ and Utility installation⁽⁸⁶⁾	
<p>PO49</p> <p>The development does not have an adverse impact on the visual amenity of a locality and is:</p> <ol style="list-style-type: none"> a. high quality design and construction; b. visually integrated with the surrounding area; c. not visually dominant or intrusive; d. located behind the main building line; e. below the level of the predominant tree canopy or the level of the surrounding buildings and structures; f. camouflaged through the use of colours and materials which blend into the landscape; g. treated to eliminate glare and reflectivity; h. landscaped; i. otherwise consistent with the amenity and character of the zone and surrounding area. 	<p>E49.1</p> <p>Development is designed to minimise surrounding land use conflicts by ensuring infrastructure, buildings, structures and other equipment:</p> <ol style="list-style-type: none"> a. are enclosed within buildings or structures; b. are located behind the main building line; c. have a similar height, bulk and scale to the surrounding fabric; d. have horizontal and vertical articulation applied to all exterior walls. <p>E49.2</p> <p>A minimum 3m wide strip of dense planting is provided around the outside of the fenced area, between the development and street frontage, side and rear boundaries.</p>
<p>PO50</p> <p>Infrastructure does not have an impact on pedestrian health and safety.</p>	<p>E50</p> <p>Access control arrangements:</p> <ol style="list-style-type: none"> a. do not create dead-ends or dark alleyways adjacent to the infrastructure; b. minimise the number and width of crossovers and entry points; c. provide safe vehicular access to the site; d. do not utilise barbed wire or razor wire.
<p>PO51</p> <p>All activities associated with the development occur within an environment incorporating sufficient controls to ensure the facility:</p> <ol style="list-style-type: none"> a. generates no audible sound at the site boundaries where in a residential setting; or b. meet the objectives as set out in the Environmental Protection (Noise) Policy 2008. 	<p>E51</p> <p>All equipment which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure noise emissions meet the objectives as set out in the Environmental Protection (Noise) Policy 2008.</p>
<p>Telecommunications facility⁽⁸¹⁾</p> <p>Editor's note - In accordance with the Federal legislation Telecommunications facilities ⁽⁸¹⁾ must be constructed and operated in a manner that will not cause human exposure to electromagnetic radiation beyond the limits outlined in the Radiocommunications (Electromagnetic Radiation - Human Exposure) Standard 2003 and Radio Protection Standard for Maximum Exposure Levels to Radiofrequency Fields - 3Khz to 300Ghz.</p>	
<p>PO52</p>	<p>E52.1</p> <p>New telecommunication facilities⁽⁸¹⁾ are co-located on existing towers with new equipment shelter and associated structures positioned adjacent to the existing shelters and structures.</p>

6 Zones

<p>Telecommunications facilities⁽⁸¹⁾ are co-located with existing telecommunications facilities⁽⁸¹⁾, Utility installation⁽⁸⁶⁾, Major electricity infrastructure⁽⁴³⁾ or Substation⁽⁸⁰⁾ if there is already a facility in the same coverage area.</p>	<p>E52.2</p> <p>If not co-located with an existing facility, all co-location opportunities have been investigated and fully exhausted within a 2km radius of the site.</p>
<p>PO53</p> <p>A new Telecommunications facility⁽⁸¹⁾ is designed and constructed to ensure co-masting or co-siting with other carriers both on the tower or pole and at ground level is possible in the future.</p>	<p>E53</p> <p>A minimum area of 45m² is available at ground level to allow for additional equipment shelters and associated structures for the purpose of co-locating on the proposed facility.</p>
<p>PO54</p> <p>Telecommunications facilities⁽⁸¹⁾ do not conflict with lawful existing land uses both on and adjoining the site.</p>	<p>E54</p> <p>The development results in no net reduction in the minimum quantity and standard of landscaping, private or communal open space or car parking spaces required under the planning scheme or under an existing development approval.</p>
<p>PO55</p> <p>The Telecommunications facility⁽⁸¹⁾ does not have an adverse impact on the visual amenity of a locality and is:</p> <ol style="list-style-type: none"> high quality design and construction; visually integrated with the surrounding area; not visually dominant or intrusive; located behind the main building line; below the level of the predominant tree canopy or the level of the surrounding buildings and structures; camouflaged through the use of colours and materials which blend into the landscape; treated to eliminate glare and reflectivity; landscaped; otherwise consistent with the amenity and character of the zone and surrounding area. 	<p>E55.1</p> <p>Where in an urban area, the development does not protrude more than 5m above the level of the existing treeline, prominent ridgeline or building rooftops in the surrounding townscape.</p>
	<p>E55.2</p> <p>In all other areas towers do not exceed 35m in height.</p>
	<p>E55.3</p> <p>Towers, equipment shelters and associated structures are of a design, colour and material to:</p> <ol style="list-style-type: none"> reduce recognition in the landscape; reduce glare and reflectivity.
	<p>E55.4</p> <p>All structures and buildings are setback behind the main building line and a minimum of 10m from side and rear boundaries, except where in the Industry and Extractive industry zones, the minimum side and rear setback is 3m.</p> <p>Where there is no established building line the facility is located at the rear of the site.</p>
	<p>E55.5</p> <p>The facility is enclosed by security fencing or by other means to ensure public access is prohibited.</p>

	<p>E55.6</p> <p>A minimum 3m wide strip of dense planting is provided around the perimeter of the fenced area, between the facility and street frontage and adjoining uses.</p> <p>Note - Landscaping is provided in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person, to ensure compliance with Planning scheme policy - Integrated design.</p>
<p>PO56</p> <p>Lawful access is maintained to the site at all times that does not alter the amenity of the landscape or surrounding uses.</p>	<p>E56</p> <p>An Access and Landscape Plan demonstrates how 24 hour vehicular access will be obtained and maintained to the facility in a manner that is appropriate to the site's context.</p>
<p>PO57</p> <p>All activities associated with the development occur within an environment incorporating sufficient controls to ensure the facility generates no audible sound at the site boundaries where in a residential setting.</p>	<p>E57</p> <p>All equipment comprising the Telecommunications facility⁽⁸¹⁾ which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure no noise from this equipment can be heard, or felt at the site boundary.</p>
Transport depot⁽⁸⁵⁾	
<p>PO58</p> <p>Development is located on a site of sufficient size to ensure:</p> <p>a. the scale and intensity of the development does not result in adverse visual or nuisance impacts on the residents in adjoining or nearby dwellings;</p> <p>b. vehicular and pedestrian traffic generation consistent with that reasonably expected in the surrounding locality.</p>	<p>E58.1</p> <p>Development, including all vehicle parking, drive way areas and storage areas, is set back 30m from all property boundaries.</p> <p>E58.2</p> <p>The maximum number of heavy vehicles, trailers and motor vehicles stored on-site is as follows:</p> <p>a. 4 heavy vehicles</p> <p>b. 4 trailers</p> <p>c. 6 motor vehicles.</p>
<p>PO59</p> <p>Development is suitably screened to ensure adverse visual impacts on the residents in adjoining or nearby dwellings are minimised.</p>	<p>E59</p> <p>Vehicle parking areas, vehicle standing areas and outdoor storage areas of plant and equipment are screened from adjoining sites by either planting, wall(s), fence(s) or a combination to at least 1.8m in height along the length of those areas.</p> <p>Planting for screening is to have a minimum depth of 3m.</p>

6 Zones

Values and constraints criteria

Note - The relevant values and constraints criteria do not apply where the development is consistent with a current Development permit for Reconfiguring a lot or Material change of use or Operational work, where that approval has considered and addressed (e.g. through a development footprint plan (or similar in the case of Landslide hazard) or conditions of approval) the identified value or constraint under this planning scheme.

Acid sulfate soils - (refer Overlay map - Acid sulfate soils to determine if the following assessment criteria apply)

Note - To demonstrate achievement of the performance outcome, an Acid sulfate soils (ASS) investigation report and soil management plan is prepared by a qualified engineer. Guidance for the preparation an ASS investigation report and soil management plan is provided in Planning scheme policy - Acid sulfate soils.

PO60

Development avoids disturbing acid sulfate soils. Where development disturbs acid sulfate soils, development:

- a. is managed to avoid or minimise the release of surface or groundwater flows containing acid and metal contaminants into the environment;
- b. protects the environmental and ecological values and health of receiving waters;
- c. protects buildings and infrastructure from the effects of acid sulfate soils.

E60

Development does not involve:

- a. excavation or otherwise removing of more than 100m³ of soil or sediment where below than 5m Australian Height datum AHD; or
- b. filling of land of more than 500m³ of material with an average depth of 0.5m or greater where below the 5m Australian Height datum AHD.

Bushfire hazard (refer Overlay map - Bushfire hazard to determine if the following assessment criteria apply)

Note - To demonstrate achievement of the performance outcomes, a bushfire management plan is prepared by a suitably qualified person. Guidance for the preparation of a bushfire management plan is provided in Planning scheme policy – Bushfire prone areas.

Note - Unacceptable risk is defined as a situation where people or property are exposed to a predictable hazard event that may result in serious injury, loss of life, failure of community infrastructure, or property damage.

PO61

Development:

- a. minimises the number of buildings and people working and living on a site exposed to bushfire risk;
- b. ensures the protection of life during the passage of a fire front;
- c. is located and designed to increase the chance of survival of buildings and structures during a bushfire;
- d. minimises bushfire risk from build up of fuels around buildings and structures;
- e. ensure safe and effective access for emergency services during a bushfire.

E61.1

Buildings and structures are:

- a. not located on a ridgeline;
- b. not located on land with a slope greater than 15% (see Overlay map - Landslide hazard);
- c. dwellings are located on east to south facing slopes.

E61.2

Buildings and structures have contained within the site:

- a. a separation from classified vegetation of 20m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater;

	<ul style="list-style-type: none"> b. a separation from low threat vegetation of 10m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater; c. a separation of no less than 10m between a fire fighting water supply extraction point and any classified vegetation, buildings and other roofed structures; d. an area suitable for a standard fire fighting appliance to stand within 3m of a fire fighting water supply extraction point; and e. an access path suitable for use by a standard fire fighting appliance having a formed width of at least 4m, a cross-fall of no greater than 5%, and a longitudinal gradient of no greater than 25%: <ul style="list-style-type: none"> i. to, and around, each building and other roofed structure; and ii. to each fire fighting water supply extraction point. <p>Note - The meaning of the terms classified vegetation and low threat vegetation as well as the method of calculating the bushfire attack level are as described in Australian Standard AS 3959</p>
<p>PO62</p> <p>Development and associated driveways and access ways:</p> <ul style="list-style-type: none"> a. avoid potential for entrapment during a bushfire; b. ensure safe and effective access for emergency services during a bushfire; c. enable safe evacuation for occupants of a site during a bushfire. 	<p>E62</p> <p>A length of driveway:</p> <ul style="list-style-type: none"> a. to a road does not exceed 100m between the most distant part of a building used for any purpose other than storage and the nearest part of a public road; b. has a maximum gradient no greater than 12.5%; c. have a minimum width of 3.5m; d. accommodate turning areas for fire fighting appliances in accordance with Qld Fire and Emergency Services' Fire Hydrant and Vehicle Access Guideline.
<p>PO63</p> <p>Development provides an adequate water supply for fire-fighting purposes.</p>	<p>E63</p> <ul style="list-style-type: none"> a. a reticulated water supply is provided by a distributor retailer for the area or; b. where not connected to a reticulated water supply, on-site fire fighting water storage containing not less than 10 000 litres (tanks with fire brigade tank fittings, swimming pools) is located within 10m of buildings and structures. c. Where a swimming pool is the nominated on-site fire fighting water storage source, vehicle access is provided to within 3m of that water storage source. d. Where a tank is the nominated on-site fire fighting water storage source, it includes:

6 Zones

	<ul style="list-style-type: none"> i. a hardstand area allowing medium rigid vehicles (15 tonne fire appliance) access within 6m of the tank; ii. fire brigade tank fittings, comprising 50mm ball valve and male camlock coupling and, if underground, an access hole of 200mm (minimum) to accommodate suction lines.
<p>PO64</p> <p>Development:</p> <ul style="list-style-type: none"> a. does not present unacceptable risk to people or environment due to the impact of bushfire on dangerous goods or combustible liquids; b. does not present danger or difficulty to emergency services for emergency response or evacuation. <p>Editor's note - Unacceptable risk is defined as a situation where people or property are exposed to a predictable hazard event that may result in serious injury, loss of life, failure of community infrastructure, or property damage.</p>	<p>E64</p> <p>Development does not involve the manufacture or storage of hazardous chemicals.</p>

Environmental areas (refer Overlay map - Environmental areas to determine if the following assessment criteria apply)

Note – The following are excluded from the native vegetation clearing provisions of this planning scheme:

- a. Clearing of native vegetation located within an approved development footprint;
- b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency;
- c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure;
- d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental Management and Conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence;
- e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes;
- f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council;
- g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens;
- h. Grazing of native pasture by stock;
- i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development

Note - Definition for native vegetation is located in Schedule 1 Definitions.

Note - Native vegetation subject to this criteria primarily comprises of matters of national environmental significance (MNES), matters of state environmental significance (MSES). They also comprise some matters of local environmental significance (MLES). A MLES is defined in Schedule 1.2, Administrative definitions. A list of the elements that apply to the mapped MSES and MLES is provided in Appendix 1 of the Planning scheme policy - Environmental areas.

Editors' Note - The accuracy of overlay mapping can be challenged through the development application process (code assessable development) or by way of a planning scheme amendment. See Council's website for details.

Note - To demonstrate achievement of the performance outcome, an ecological assessment, vegetation management plan and fauna management plan, as required, are prepared by a suitably qualified person. Guidance for the preparation of above mentioned reports is provided in Planning scheme policy - Environmental areas.

Vegetation clearing, ecological value and connectivity

PO65

Development avoids locating in a High Value Area or a Value Offset Area. Where it is not practicable or reasonable for development to avoid establishing in these areas, development must ensure that:

- a. the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area is maintained and not lost or degraded;
- b. on-site mitigation measures, mechanisms or processes are in place demonstrating the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area are maintained. For example, this can be achieved through replacement, restoration or rehabilitation planting as part of any proposed covenant, the development of a Vegetation Management Plan, a Fauna Management Plan, and any other on-site mitigation options identified in the Planning scheme policy - Environmental areas*.

* Editor's note - This is not a requirement for an environmental offset under the Environmental Offsets Act 2014.

No example provided.

PO66

Development provides for safe, unimpeded, convenient and ongoing wildlife movement and establishes and maintains habitat connectivity by:

- a. retaining habitat trees;
- b. providing contiguous patches of habitat;
- c. provide replacement and rehabilitation planting to improve connectivity;
- d. avoiding the creation of fragmented and isolated patches of habitat;
- e. providing wildlife movement infrastructure.

Editor's note - Wildlife movement infrastructure may include refuge poles, tree boulevarding, 'stepping stone' vegetation plantings, tunnels, appropriate wildlife fencing; culverts with ledges, underpasses, overpasses, land bridges and rope bridges. Further information is provided in Planning scheme policy – Environmental areas.

No example provided.

Vegetation clearing and habitat protection

PO67

No example provided.

6 Zones

<p>Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected.</p>	
<p>PO68</p> <p>Development does not result in the net loss or degradation of habitat value in a High Value Area or a Value Offset Area. Where development does result in the loss or degradation of habitat value, development will:</p> <ol style="list-style-type: none"> rehabilitate, revegetate, restore and enhance an area to ensure it continues to function as a viable and healthy habitat area; provide replacement fauna nesting boxes in the event of habitat tree loss in accordance with Planning scheme policy - Environmental areas; undertake rehabilitation, revegetation and restoration in accordance with the South East Queensland Ecological Restoration Framework. 	<p>No example provided.</p>
<p>PO69</p> <p>Development ensures safe, unimpeded, convenient and ongoing wildlife movement and habitat connectivity by:</p> <ol style="list-style-type: none"> providing contiguous patches of habitat; avoiding the creation of fragmented and isolated patches of habitat; providing wildlife movement infrastructure; providing replacement and rehabilitation planting to improve connectivity. 	<p>No example provided.</p>
<p>Vegetation clearing and soil resource stability</p>	
<p>PO70</p> <p>Development does not:</p> <ol style="list-style-type: none"> result in soil erosion or land degradation; leave cleared land exposed for an unreasonable period of time but is rehabilitated in a timely manner. 	<p>No example provided.</p>
<p>Vegetation clearing and water quality</p>	
<p>PO71</p> <p>Development maintains or improves the quality of groundwater and surface water within, and downstream, of a site by:</p> <ol style="list-style-type: none"> ensuring an effective vegetated buffers and setbacks from waterbodies is retained to achieve natural filtration and reduce sediment loads; avoiding or minimising changes to landforms to maintain hydrological water flows; adopting suitable measures to exclude livestock from entering a waterbody where a site is being 	<p>No example provided.</p>

used for animal husbandry ⁽⁴⁾ and animal keeping ⁽⁵⁾ activities.	
<p>PO72</p> <p>Development minimises adverse impacts of stormwater run-off on water quality by:</p> <ol style="list-style-type: none"> minimising flow velocity to reduce erosion; minimising hard surface areas; maximising the use of permeable surfaces; incorporating sediment retention devices; minimising channelled flow. 	No example provided.
Vegetation clearing and access, edge effects and urban heat island effects	
<p>PO73</p> <p>Development retains safe and convenient public access in a manner that does not result in the adverse edge effects or the loss or degradation of biodiversity values within the environment.</p>	No example provided.
<p>PO74</p> <p>Development minimises potential adverse 'edge effects' on ecological values by:</p> <ol style="list-style-type: none"> providing dense planting buffers of native vegetation between a development and environmental areas; retaining patches of native vegetation of greatest possible size where located between a development and environmental areas ; restoring, rehabilitating and increasing the size of existing patches of native vegetation; ensuring that buildings and access (public and vehicle) are setback as far as possible from environmental areas and corridors; landscaping with native plants of local origin. <p>Editor's note - Edge effects are factors of development that go to detrimentally affecting the composition and density of natural populations at the fringe of natural areas. Factors include weed invasion, pets, public and vehicle access, nutrient loads, noise and light pollution, increased fire frequency and changes in the groundwater and surface water flow.</p>	No example provided.
<p>PO75</p> <p>Development avoids adverse microclimate change and does not result in increased urban heat island effects. Adverse urban heat island effects are minimised by:</p> <ol style="list-style-type: none"> pervious surfaces; providing deeply planted vegetation buffers and green linkage opportunities; 	No example provided.

6 Zones

<ul style="list-style-type: none"> c. landscaping with local native plant species to achieve well-shaded urban places; d. increasing the service extent of the urban forest canopy. 	
Vegetation clearing and Matters of Local Environmental Significance (MLES) environmental offsets	
<p>PO76</p> <p>Where development results in the unavoidable loss of native vegetation within a Value Offset Area MLES waterway buffer or a Value Offset Area MLES wetland buffer, an environmental offset is required in accordance with the environmental offset requirements identified in Planning scheme policy - Environmental areas.</p> <p>Editor's note - For MSES Koala Offsets, the environmental offset provisions in Schedule 11 of the Regulation, in combination with the requirements of the Environmental Offsets Act 2014, apply.</p>	<p>No example provided.</p>
<p>Extractive resources separation area (refer Overlay map - Extractive resources (separation area) to determine if the following assessment criteria apply)</p> <p>Note - To demonstrate achievement of the performance outcomes, a noise impact assessment report is prepared by a suitably qualified person. Guidance to preparing noise impact assessment report is provided in Planning scheme policy – Noise.</p>	
<p>PO77</p> <p>Development does not increase the number of people living in the Extractive Resources separation area.</p>	<p>E77</p> <p>One dwelling house⁽²²⁾ permitted per lot within separation area.</p>
<p>PO78</p> <p>Development:</p> <ul style="list-style-type: none"> a. does not introduce or increase uses that are sensitive to the impacts of an Extractive industry⁽²⁷⁾; b. is compatible with the operation of an Extractive industry⁽²⁷⁾; c. does not comprise or undermine the function and integrity of the separation area in providing a buffer between key extractive and processing activities and sensitive, incompatible uses outside the separation area. 	<p>E78</p> <p>Development within the separation area does not include the following activities:</p> <ul style="list-style-type: none"> a. Caretaker's accommodation⁽¹⁰⁾; b. Community residence⁽¹⁶⁾; c. Dual occupancy⁽²¹⁾; d. Dwelling unit⁽²³⁾; e. Hospital⁽³⁶⁾; f. Rooming accommodation⁽⁶⁹⁾; g. Multiple dwelling⁽⁴⁹⁾; h. Non-resident workforce accommodation⁽⁵²⁾; i. Relocatable home park⁽⁶²⁾; j. Residential care facility⁽⁶⁵⁾; k. Resort complex⁽⁶⁶⁾; l. Retirement facility⁽⁶⁷⁾; m. Rural workers' accommodation⁽⁷¹⁾; n. Short-term accommodation⁽⁷⁷⁾; o. Tourist park⁽⁸⁴⁾.
<p>PO79</p>	<p>E79</p> <p>All habitable rooms within the separation area are:</p>

<p>Habitable rooms achieve the noise levels listed in Schedule 1 Acoustic Quality Objectives, Environmental Protection (Noise) Policy 2008 and provides a safe, healthy and disturbance free living environment.</p>	<p>a. acoustically insulated to achieve the noise levels listed in Schedule 1 Acoustic Quality Objectives, Environmental Protection (Noise) Policy 2008;</p> <p>b. provided with mechanical ventilation.</p>
<p>PO80</p> <p>Development provides open space areas for passive recreation in a manner where impacts from key extractive/processing activities, particularly noise, is minimised.</p>	<p>E80</p> <p>Private open space areas are separated from the resource processing area by buildings or a 1.8m high solid structure.</p>
<p>Extractive resources transport route (refer Overlay map - Extractive resources (transport route and buffer) to determine if the following assessment criteria apply)</p>	
<p>PO81</p> <p>Development:</p> <p>a. does not increase in the number of people living in close proximity to a transport route and being subject to the adverse effects from the transportation route;</p> <p>b. does not result in the establishment of uses that are incompatible with the operation of Extractive resources transport routes;</p> <p>c. adopts design and location measures to satisfactorily mitigate the potential adverse impacts associated with transportation routes on sensitive land uses. Such measures include, but are not limited to:</p> <p>i. locating the furthest distance possible from the transportation route;</p> <p>ii. habitable rooms being located the furthest from the transportation route;</p> <p>iii. shielding and screening private outdoor recreation space from the transportation routes.</p>	<p>E81</p> <p>The following uses are not located within the 100m wide transport route buffer:</p> <p>a. Caretaker's accommodation⁽¹⁰⁾, except where located in the Extractive industry zone;</p> <p>b. Community residence⁽¹⁶⁾;</p> <p>c. Dual occupancy⁽²¹⁾;</p> <p>d. Dwelling house⁽²²⁾;</p> <p>e. Dwelling unit⁽²³⁾;</p> <p>f. Hospital⁽³⁶⁾;</p> <p>g. Rooming accommodation⁽⁶⁹⁾;</p> <p>h. Multiple dwelling⁽⁴⁹⁾;</p> <p>i. Non-resident workforce accommodation⁽⁵²⁾;</p> <p>j. Relocatable home park⁽⁶²⁾;</p> <p>k. Residential care facility⁽⁶⁵⁾;</p> <p>l. Resort complex⁽⁶⁶⁾;</p> <p>m. Retirement facility⁽⁶⁷⁾;</p> <p>n. Rural workers' accommodation⁽⁷¹⁾;</p> <p>o. Short-term accommodation⁽⁷⁷⁾;</p> <p>p. Tourist park⁽⁸⁴⁾.</p>
<p>PO82</p> <p>Development:</p> <p>a. does not adversely impact upon the efficient and effective transportation of extractive material along a transportation route;</p> <p>b. ensures vehicle access and egress along transportation routes are designed and located to achieve a high degree of safety, having good visibility;</p> <p>c. utilises existing vehicle access points and where existing vehicle access points are sub-standard or poorly formed, they are upgraded to an appropriate standard.</p>	<p>E82.1</p> <p>Development does not create a new vehicle access point onto an Extractive resources transport route.</p> <p>E82.2</p> <p>A vehicle access point is located, designed and constructed in accordance with Planning scheme policy - Integrated design.</p>
<p>Heritage and landscape character (refer Overlay map - Heritage and landscape character to determine if the following assessment criteria apply)</p>	

6 Zones

Note - To assist in demonstrating achievement of heritage performance outcomes, a Cultural heritage impact assessment report is prepared by a suitably qualified person verifying the proposed development is in accordance with The Australia ICOMOS Burra Charter.

Note - To assist in demonstrating achievement of this performance outcome, a Tree assessment report is prepared by a qualified arborist in accordance with Planning scheme policy – Heritage and landscape character. The Tree assessment report will also detail the measures adopted in accordance with AS 4970-2009 Protection of trees on development sites.

Note - Places, including sites, objects and buildings having local cultural heritage significance, are identified on Overlay map - Heritage and landscape character and listed in Schedule 1 of Planning scheme policy - Heritage and landscape character. Places also having cultural heritage significance at a State level and being entered in the Queensland Heritage Register, are also identified in Schedule 1 of Planning scheme policy - Heritage and landscape character.

<p>PO83</p> <p>Development will:</p> <ol style="list-style-type: none"> not diminish or cause irreversible damage to the cultural heritage values present on the site, and associated with a heritage site, object or building; protect the fabric and setting of the heritage site, object or building; be consistent with the form, scale and style of the heritage site, object or building; utilise similar materials to those existing, or where this is not reasonable or practicable, neutral materials and finishes; incorporate complementary elements, detailing and ornamentation to those present on the heritage site, object or building; retain public access where this is currently provided. 	<p>E83</p> <p>Development is for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value.</p> <p>Note - A cultural heritage conservation management plan for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value is prepared in accordance with Planning scheme policy - Heritage and landscape character. The plan is sent to, and approved by Council prior to the commencement of any preservation, maintenance, repair and restoration works.</p>
<p>PO84</p> <p>Demolition and removal is only considered where:</p> <ol style="list-style-type: none"> a report prepared by a suitably qualified conservation architect or conservation engineer demonstrates that the building is structurally unsound and is not reasonably capable of economic repair; or demolition is confined to the removal of outbuildings, extensions and alterations that are not part of the original structure; or limited demolition is performed in the course of repairs, maintenance or restoration; or demolition is performed following a catastrophic event which substantially destroys the building or object. 	<p>No example provided.</p>
<p>PO85</p> <p>Where development is occurring on land adjoining a site of cultural heritage value, the development is to be sympathetic to and consistent with the cultural heritage values present on the site and not result in their values being eroded, degraded or unreasonably obscured from public view.</p>	<p>No example provided.</p>
<p>PO86</p>	<p>E86</p>

<p>Development does not adversely impact upon the health and vitality of significant trees. Where development occurs in proximity to a significant tree, construction measures and techniques as detailed in AS 4970-2009 Protection of trees on development sites are adopted to ensure a significant tree's health, wellbeing and vitality.</p> <p>Significant trees are only removed where they are in a poor state of health or where they pose a health and safety risk to persons or property. A Tree Assessment report prepared by a suitably qualified arborist confirming a tree's state of health is required to demonstrate achievement of this performance outcome.</p>	<p>Development does:</p> <ol style="list-style-type: none"> not result in the removal of a significant tree; not occur within 20m of a protected tree; involve pruning of a tree in accordance with Australian Standard AS 4373-2007 – Pruning of Amenity Trees.
<p>Landslide hazard (refer Overlay map - Landslide hazard to determine if the following assessment criteria apply)</p> <p>Note - To demonstrate achievement of the performance outcomes, a site-specific geotechnical assessment report is prepared by a qualified engineer. Guidance for the preparation of a geotechnical assessment report is provided in Planning scheme policy – Landslide hazard.</p>	
<p>PO87</p> <p>Development:</p> <ol style="list-style-type: none"> maintains the safety of people and property on a site and neighbouring sites from landslides; ensures the long-term stability of the site considering the full nature and end use of the development; ensures site stability during all phases of construction and development; minimises disturbance of natural drainage patterns of the site and does not result in the redirection or alteration of the existing flow of surface or groundwater minimises adverse visual impacts on the amenity of adjoining residents and provides a positive interface with the streetscape. 	<p>E87</p> <p>Development does not:</p> <ol style="list-style-type: none"> involve earthworks exceeding 50m³; involve cut and fill having a height greater than 600mm; involve any retaining wall having a height greater than 600mm; redirect or alter the existing flow of surface or groundwater.
<p>PO88</p> <p>Buildings are designed to respond to sloping topography in the siting, design and form of buildings and structures by:</p> <ol style="list-style-type: none"> minimising overuse of cut and fill to create single flat pads and benching; avoiding expanses of retaining walls, loss of trees and vegetation and interference with natural drainage systems; minimising any adverse visual impact on the landscape character ; Protect the amenity of adjoining properties. 	<p>E88</p> <p>Buildings, excluding domestic outbuildings:</p> <ol style="list-style-type: none"> are split-level, multiple-slab, pier or pole construction; are not single plane slab on ground.
<p>PO89</p>	<p>E89</p> <p>Development does not involve the manufacture, handling or storage of hazardous chemicals.</p>

6 Zones

<p>Development protects the safety of people, property and the environment from the impacts of landslide on hazardous chemicals manufactured, handled or stored by incorporating design measures to ensure:</p> <ol style="list-style-type: none"> the long-term stability of the development site considering the full nature and end use of the development; site stability during all phases of construction and development; the development is not adversely affected by landslide activity originating on sloping land above the site; emergency access and access from the site for the public and emergency vehicles is available and is not at risk from landslide. 	
<p>Infrastructure buffers (refer Overlay map - Infrastructure buffers to determine if the following assessment criteria apply)</p>	
<p>PO90</p> <p>Odour sensitive development is separated from Wastewater treatment plants so they are not adversely affected by odour emission or other air pollutant impacts.</p>	<p>E90</p> <p>The following uses are not located within a wastewater treatment site buffer:</p> <ol style="list-style-type: none"> Caretaker's accommodation⁽¹⁰⁾; Community residence⁽¹⁶⁾; Dual occupancy⁽²¹⁾; Dwelling house⁽²²⁾; Dwelling unit⁽²³⁾; Hospital⁽³⁶⁾; Rooming accommodation⁽⁶⁹⁾; Multiple dwelling⁽⁴⁹⁾; Non-resident workforce accommodation⁽⁵²⁾; Relocatable home park⁽⁶²⁾; Residential care facility⁽⁶⁵⁾; Resort complex⁽⁶⁶⁾; Retirement facility⁽⁶⁷⁾; Rural workers' accommodation⁽⁷¹⁾; Short-term accommodation⁽⁷⁷⁾; Tourist park⁽⁸⁴⁾.
<p>PO91</p> <p>Development within a Water supply buffer captures solid or liquid waste from all land use, development and activities is designed, constructed and managed to prevent the release of contaminants to surface water or groundwater bodies.</p>	<p>E91.1</p> <p>Run-off and sediment from roadways and impervious surfaces within a Water supply buffer are intercepted and treated on-site to remove oil, grease, chemicals, silt, trace metals and nutrients such as nitrogen and phosphorous.</p> <hr/> <p>E91.2</p> <p>Incineration or burial of waste within a Water supply buffer is not undertaken onsite.</p> <hr/> <p>E91.3</p>

	<p>Solid waste within a Water supply buffer is collected and stored in weather proof, sealed waste receptacles, located in roofed and bunded areas, for disposal by a licenced contractor.</p> <p>E91.4</p> <p>Holding tanks within a Water supply buffer are used for all liquid waste and provide for the separation of oils/solvents and solids prior to pump-out and collection by a licenced contractor.</p> <p>E91.5</p> <p>Management, handling and storage of hazardous chemicals (including fuelling of vehicles) within a Water supply buffer, is undertaken in secured, climate controlled, weather proof, level and bunded enclosures.</p>
<p>PO92</p> <p>On-site sewerage systems within a Water supply buffer are designed and operated to ensure there is no worsening or adverse impacts to health risks, environmental risks and water quality.</p> <p>Editor's Note - For guidance refer to the Seq water Development Guidelines: Development Guidelines for Water Quality Management in Drinking Water Catchments 2012.</p>	<p>E92</p> <p>Secondary treated wastewater treatment systems within a Water supply buffer include:</p> <ol style="list-style-type: none"> emergency storage capable of holding 3-6 hours peak flow of treated effluent in the event of emergencies or overload with provision for de-sludging; back up pump installation and backup power; MEDLI modelling to determine irrigation rates and sizing of irrigation areas; vegetated land application areas are not located in overland flow paths or on areas that perform groundwater recharge or discharge functions; and wastewater collection and storage systems have a capacity to accommodate full load at peak times and includes temporary facilities.
<p>PO93</p> <p>Development within a Bulk water supply infrastructure buffer is located, designed and constructed to:</p> <ol style="list-style-type: none"> protect the integrity of the water supply pipeline; maintain adequate access for any required maintenance or upgrading work to the water supply pipeline; 	<p>E93</p> <p>Development:</p> <ol style="list-style-type: none"> does not involve the construction of any buildings or structures within a Bulk water supply infrastructure buffer; involving a major hazard facility or environmentally relevant activity (ERA) is setback 30m from a Bulk water supply infrastructure buffer.
<p>PO94</p> <p>Development is located and designed to maintain required access to Bulk water supply infrastructure.</p>	<p>E94</p> <p>Development does not restrict access to Bulk water supply infrastructure of any type or size, having regard to (among other things):</p>

6 Zones

	<ul style="list-style-type: none"> a. buildings or structures; b. gates and fences; c. storage of equipment or materials; d. landscaping or earthworks or stormwater or other infrastructure.
<p>PO95</p> <p>Odour sensitive development is separated from landfill sites so they are not adversely affected by odour emission or other air pollutant impacts.</p>	<p>E95</p> <p>The following uses are not located within a Landfill buffer:</p> <ul style="list-style-type: none"> a. Caretaker's accommodation⁽¹⁰⁾; b. Community residence⁽¹⁶⁾; c. Dual occupancy⁽²¹⁾; d. Dwelling house⁽²²⁾; e. Dwelling unit⁽²³⁾; f. Hospital⁽³⁶⁾; g. Rooming accommodation⁽⁶⁹⁾; h. Multiple dwelling⁽⁴⁹⁾; i. Non-resident workforce accommodation⁽⁵²⁾; j. Relocatable home park⁽⁶²⁾; k. Residential care facility⁽⁶⁵⁾; l. Resort complex⁽⁶⁶⁾; m. Retirement facility⁽⁶⁷⁾; n. Rural workers' accommodation⁽⁷¹⁾; o. Short-term accommodation⁽⁷⁷⁾; p. Tourist park⁽⁸⁴⁾.
<p>PO96</p> <p>Habitable rooms within an Electricity supply substation buffer are located a sufficient distance from substations⁽⁸⁰⁾ to avoid any potential adverse impacts on personal health and wellbeing from electromagnetic fields.</p> <p>Note - Habitable room is defined in the Building Code of Australia (Volume 1)</p>	<p>E96</p> <p>Habitable rooms:</p> <ul style="list-style-type: none"> a. are not located within an Electricity supply substation buffer; and b. proposed on a site subject to an Electricity supply substation⁽⁸⁰⁾ are acoustically insulated to achieve the noise levels listed in Schedule 1, Acoustic Quality Objectives, Environmental Protection (Noise) Policy 2008. <p>Note - Habitable room is defined in the Building Code of Australia (Volume 1)</p>
<p>PO97</p> <p>Habitable rooms within an Electricity supply substation buffer are acoustically insulated from the noise of a substation⁽⁸⁰⁾ to achieve the noise levels listed in Schedule 1 Acoustic Quality Objectives, Environmental Protection (Noise) Policy 2008 and provides a safe, healthy and disturbance free living environment.</p> <p>Note - To demonstrate achievement of the performance outcome, a noise impact assessment report is prepared by a suitably qualified person. Guidance to preparing an noise impact assessment report is provided in Planning scheme policy – Noise.</p> <p>Note - Habitable room is defined in the Building Code of Australia (Volume 1)</p>	<p>No example provided.</p>

<p>PO98</p> <p>Development within a High voltage electricity line buffer provides adequate buffers to high voltage electricity lines to protect amenity and health by ensuring development:</p> <ul style="list-style-type: none"> a. is located and designed to avoid any potential adverse impacts on personal health and wellbeing from electromagnetic fields in accordance with the principle of prudent avoidance; b. is located and designed in a manner that maintains a high level of security of supply; c. is located and design so not to impede upon the functioning and maintenance of high voltage electrical infrastructure. 	<p>E98</p> <p>Development does not involve the construction of any buildings or structures within a High voltage electricity line buffer.</p>
<p>PO99</p> <p>Development within a Pumping station buffer is located, designed and constructed to:</p> <ul style="list-style-type: none"> a. ensure that odour or other air pollutant impacts on the amenity of the development met the air quality objectives in the Environmental Protection (Air) Policy 2008; b. ensure that noise impacts on the amenity of the development met the indoor noise objectives set out in the Environmental Protection (Noise) Policy 2008. 	<p>E99</p> <p>Development does not involve the construction of any buildings or structures within a Pumping station buffer.</p>
<p>Overland flow path (refer Overlay map - Overland flow path to determine if the following assessment criteria apply)</p> <p>Note - The applicable river and creek flood planning levels associated with defined flood event (DFE) within the inundation area can be obtained by requesting a flood check property report from Council.</p>	
<p>PO100</p> <p>Development:</p> <ul style="list-style-type: none"> a. minimises the risk to persons from overland flow; b. does not increase the potential for damage from overland flow either on the premises or other premises, public land, watercourses, roads or infrastructure. 	<p>No example provided.</p>
<p>PO101</p> <p>Development:</p> <ul style="list-style-type: none"> a. maintains the conveyance of overland flow predominantly unimpeded through the premises for any event up to and including the 1% AEP for the fully developed upstream catchment; b. does not concentrate, intensify or divert overland flow onto an upstream, downstream or surrounding property. 	<p>No example provided.</p>

6 Zones

<p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow.</p>	
<p>PO102</p> <p>Development does not:</p> <ol style="list-style-type: none"> directly, indirectly or cumulatively cause any increase in overland flow velocity or level; increase the potential for flood damage from overland flow either on the premises or other premises, public lands, watercourses, roads or infrastructure. <p>Note - Open concrete drains greater than 1m in width are not an acceptable outcome, nor are any other design options that may increase scouring.</p>	<p>No example provided.</p>
<p>PO103</p> <p>Development ensures that public safety and the risk to the environment are not adversely affected by a detrimental impact of overland flow on a hazardous chemical located or stored on the premises.</p>	<p>E103</p> <p>Development ensures that a hazardous chemical is not located or stored in an Overland flow path area.</p> <p>Note - Refer to the Work Health and Safety Act 2011 and associated Regulation and Guidelines, the Environmental Protection Act 1994 and the relevant building assessment provisions under the Building Act 1975 for requirements related to the manufacture and storage of hazardous substances.</p>
<p>PO104</p> <p>Development which is not in a Rural zone ensures that overland flow is not conveyed from a road or public open space onto a private lot.</p>	<p>E104</p> <p>Development which is not in a Rural zone that an overland flow paths and drainage infrastructure is provided to convey overland flow from a road or public open space area away from a private lot.</p>
<p>PO105</p> <p>Development ensures that inter-allotment drainage infrastructure, overland flow paths and open drains through private property cater for overland flows for a fully developed upstream catchment and are able to be easily maintained.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow</p>	<p>E105.1</p> <p>Development ensures that roof and allotment drainage infrastructure is provided in accordance with the following relevant level as identified in QUDM:</p> <ol style="list-style-type: none"> Urban area – Level III; Rural area – N/A; Industrial area – Level V; Commercial area – Level V. <p>E105.2</p>

	Development ensures that inter-allotment drainage infrastructure is designed to accommodate any event up to and including the 1% AEP for the fully developed upstream catchment.
<p>PO106</p> <p>Development protects the conveyance of overland flow such that an easement for drainage purposes is provided over:</p> <ol style="list-style-type: none"> a stormwater pipe if the nominal pipe diameter exceeds 300mm; an overland flow path where it crosses more than one premises; inter-allotment drainage infrastructure. <p>Note - Refer to Planning scheme policy - Integrated design for details and examples.</p> <p>Note - Stormwater Drainage easement dimensions are provided in accordance with Section 3.8.5 of QUDM.</p>	No example provided.
Additional criteria for development for a Park⁽⁵⁷⁾	
<p>PO107</p> <p>Development for a Park⁽⁵⁷⁾ ensures that the design and layout responds to the nature of the overland flow affecting the premises such that:</p> <ol style="list-style-type: none"> public benefit and enjoyment is maximised; impacts on the asset life and integrity of park structures is minimised; maintenance and replacement costs are minimised. 	<p>E107</p> <p>Development for a Park⁽⁵⁷⁾ ensures works are provided in accordance with the requirements set out in Appendix B of the Planning scheme policy - Integrated design.</p>
Riparian and wetland setbacks	
<p>PO108</p> <p>Development provides and maintains a suitable setback from waterways and wetlands that protects natural and environmental values. This is achieved by recognising and responding to the following matters:</p> <ol style="list-style-type: none"> impact on fauna habitats; impact on wildlife corridors and connectivity; 	<p>E108</p> <p>Development does not occur within:</p> <ol style="list-style-type: none"> 50m from top of bank for W1 waterway and drainage line 30m from top of bank for W2 waterway and drainage line

6 Zones

<p>c. impact on stream integrity;</p> <p>d. impact of opportunities for revegetation and rehabilitation planting;</p> <p>e. edge effects.</p>	<p>c. 20m from top of bank for W3 waterway and drainage line</p> <p>d. 100m from the edge of a Ramsar wetland, 50m from all other wetlands.</p> <p>Note - W1, W2 and W3 waterway and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.</p>																											
<p>Scenic amenity - Regionally significant (Hills) and Locally important (Coast) (refer Overlay map - Scenic amenity to determine if the following assessment criteria apply)</p>																												
<p>PO109</p> <p>Development:</p> <p>a. avoids being viewed as a visually conspicuous built form on a hill top or ridgeline;</p> <p>b. retain the natural character or bushland settings as the dominant landscape characteristic;</p> <p>c. is viewed as being visually consistent with the natural landscape setting and does not diminish the scenic and visual qualities present in the environment.</p>	<p>E109</p> <p>Where located in the Regionally significant (Hills) scenic amenity overlay, buildings and structures are not:</p> <p>a. located on a hill top or ridge line;</p> <p>b. all parts of the building and structure are located below the hill top or ridge line.</p>																											
<p>PO110</p> <p>Development:</p> <p>a. does not adversely detract or degrade the quality of views, vista or key landmarks;</p> <p>b. retains the natural character or bushland settings as the dominant landscape characteristic.</p>	<p>E110</p> <p>Where located in the Regionally significant (Hills) scenic amenity overlay, driveways and accessways:</p> <p>a. go across land contours, and do not cut straight up slopes;</p> <p>b. follow natural contours, not resulting in batters or retaining walls being greater than 900mm in height.</p>																											
<p>PO111</p> <p>Buildings and structures incorporate colours and finishes that:</p> <p>a. are consistent with a natural, open space character and bushland environment;</p> <p>b. do not produce glare or appear visual incompatible with the surrounding natural character and bushland environment;</p> <p>c. are not visually dominant or detract from the natural qualities of the landscape.</p>	<p>E111.1</p> <p>Where located in the Regionally significant (hills) scenic amenity overlay, roofs and wall surfaces of buildings and structures adopt the following colours:</p> <table border="1" data-bbox="810 1563 1471 2063"> <thead> <tr> <th colspan="3">Colours from Australian Standard AS2700s – 1996</th> </tr> </thead> <tbody> <tr> <td>G12 – Holly</td> <td>G54 – Mist Green</td> <td>N 44 – Bridge Grey</td> </tr> <tr> <td>G13 – Emerald</td> <td>G55 – Lichen</td> <td>N45 – Koala Grey</td> </tr> <tr> <td>G14 – Moss Green</td> <td>G56 – Sage Green</td> <td>N52 – Mid Grey</td> </tr> <tr> <td>G15 – Rainforest Green</td> <td>G62 – Rivergum</td> <td>N54 – Basalt</td> </tr> <tr> <td>G16 – Traffic Green</td> <td>G64 – Slate</td> <td>N55 – Lead Grey</td> </tr> <tr> <td>G17 – Mint Green</td> <td>G65 – Ti Tree</td> <td>X54 – Brown</td> </tr> <tr> <td>G21 – Jade</td> <td>N25 – Birch Grey</td> <td>X61 – Wombat</td> </tr> <tr> <td>G22 – Serpentine</td> <td>N32 – Green Grey</td> <td>X62 – Dark Earth</td> </tr> </tbody> </table>	Colours from Australian Standard AS2700s – 1996			G12 – Holly	G54 – Mist Green	N 44 – Bridge Grey	G13 – Emerald	G55 – Lichen	N45 – Koala Grey	G14 – Moss Green	G56 – Sage Green	N52 – Mid Grey	G15 – Rainforest Green	G62 – Rivergum	N54 – Basalt	G16 – Traffic Green	G64 – Slate	N55 – Lead Grey	G17 – Mint Green	G65 – Ti Tree	X54 – Brown	G21 – Jade	N25 – Birch Grey	X61 – Wombat	G22 – Serpentine	N32 – Green Grey	X62 – Dark Earth

<p>PO112</p> <p>Landscaping</p> <ol style="list-style-type: none"> complements the coastal landscape character and amenity; has known resilience and robustness in the coastal environment; <p>Fences and walls:</p> <ol style="list-style-type: none"> do not appear visually dominant or conspicuous within its setting; reduce visual appearance through the use of built form articulation, setbacks, and plant screening; use materials and colours that are complementary to the coastal environment. <p>Building design responds to the bayside location and complements the particular bayside character and amenity by adopting and incorporating a range of architectural character elements.</p> <p>Vegetation that contributes to bayside character and identity are:</p> <ol style="list-style-type: none"> retained; protected from development diminishing their significance. 	<p>E111.2</p> <p>Where located in the Regionally significant (hills) scenic amenity overlay, roofs and wall surfaces of buildings and structures are painted or finished such that reflectivity is less than 35%.</p> <p>E112</p> <p>Where located in the Locally Important (Coast) scenic amenity overlay:</p> <ol style="list-style-type: none"> landscaping comprises indigenous coastal species; fences and walls are no higher than 1m; and existing pine trees, palm trees, mature fig and cotton trees are retained. where over 12m in height, the building design includes the following architectural character elements: <ol style="list-style-type: none"> curving balcony edges and walls, strong vertical blades and wall planes; balcony roofs, wall articulation expressed with different colours, curves in plan and section, and window awnings; roof top outlooks, tensile structures as shading devices; lightweight structures use white frame elements in steel and timber, bold colour contrast. 																		
<p>Transport noise corridors (refer Overlay map - Transport noise corridors to determine if the following assessment criteria apply)</p> <p>Note - This is for information purposes only. No requirements for accepted development or criteria for assessable development apply. Development located within a Transport Noise Corridor must satisfy the requirements of the Queensland Development Code</p>																			

6 Zones

6.2.2.4 Lakeside precinct

6.2.2.4.1 Purpose – Lakeside precinct

1. The purpose of the code will be achieved through the following overall outcomes for the Lakeside precinct:
 - a. Development supports, and has a nexus with, the continued operation of the established motor sport facility⁽⁴⁸⁾ whilst minimising nuisance impacts and managing unreasonable amenity impacts on the surrounding sensitive land uses, wildlife and natural environment.
 - b. Development does not compromise, depart or detract from the primary role of the precinct, that being for a motor sport facility⁽⁴⁸⁾ use. Where development is not for a motor sport facility⁽⁴⁸⁾ use, uses consistent with the Rural Zone (see Part 6.2.10.2.3(s)) are anticipated to establish.
 - c. Development is designed and operated to provide a high level of amenity and maintains the safety of people and property through crime prevention through environmental design principles (CPTED).
 - d. Development is of a scale, height and built form consistent with the low density, low intensity character of the surrounding rural and open space and recreation area.
 - e. Noise sensitive uses are designed, sited and constructed so as not to be subject to unacceptable levels of noise.
 - f. Where applicable, development is undertaken in accordance with an approved Council Master Plan.
 - g. Development in a Water supply buffer is undertaken in a manner which contributes to the maintenance and enhancement where possible of water quality to protect the drinking water and aquatic ecosystem environmental values in those catchments.
 - h. General works associated with the development achieves the following:
 - i. new development is provided with a high standard of services to meet and support the current and future needs of users of the site, including roads, street lighting services, telecommunications and reticulated electricity (underground wherever possible), water and sewerage (where available);
 - ii. the development manages stormwater to:
 - A. ensure the discharge of stormwater does not adversely affect the quality, environmental values or ecosystem functions of downstream receiving waters;
 - B. prevent stormwater contamination and the release of pollutants;
 - C. maintain or improve the structure and condition of drainage lines and riparian areas;
 - D. avoid off-site adverse impacts from stormwater.
 - iii. the development does not result in unacceptable impacts on the capacity and safety of the external road network;
 - iv. the development ensures the safety, efficiency and useability of access ways and parking areas;
 - v. site works including earthworks are managed to be safe and have minimal impacts on adjoining or adjacent premises, the streetscape or the environment.
 - i. Development avoids areas subject to constraint, limitation, or environmental value. Where development cannot avoid these identified areas, it responds by:
 - i. adopting a 'least risk, least impact' approach when designing, siting and locating development in any area subject to a constraint, limitation or environmental value to minimise the potential risk to people, property and the environment;
 - ii. ensuring no further instability, erosion or degradation of the land, water or soil resource;
 - iii. when located within a Water buffer area, complying with the Water Quality Vision and Objectives contained in the Seqwater Development Guidelines: Development Guidelines for Water Quality Management in Drinking Water Catchments 2012.
 - iv. maintaining, restoring and rehabilitating environmental values, including natural, ecological, biological, aquatic, hydrological and amenity values, and enhancing these values through the provision of planting and landscaping, and facilitating safe wildlife movement and connectivity through:

- A. the provision of replacement, restoration, rehabilitation planting and landscaping;
- B. the location, design and management of development to avoid or minimise adverse impacts on ecological systems and processes;
- C. the requiring of environmental offsets in accordance with the Environmental Offsets Act 2014.
- v. protecting native species and protecting and enhancing species habitat;
- vi. protecting and preserving the natural, aesthetic, architectural historic and cultural values of significant trees, places, objects and buildings of heritage and cultural significance;
- vii. establishing effective separation distances, buffers and mitigation measures associated with identified infrastructure to minimise adverse effects on sensitive land uses from odour, noise, dust and other nuisance generating activities;
- viii. establishing, maintaining and protecting appropriate buffers to waterways, wetlands, native vegetation and significant fauna habitat;
- ix. ensuring it promotes and does not undermine the ongoing viability, integrity, operation, maintenance and safety of identified infrastructure;
- x. ensuring effective and efficient disaster management response and recovery capabilities;
- xi. where located in an overland flow path:
- A. development siting, built form, layout and access responds to the risk presented by the overland flow and minimises risk to personal safety;
- B. development is resilient to the impacts of overland flow by ensuring the siting and design accounts for the potential risks to property associated with the overland flow;
- C. development does not impact on the conveyance of the overland flow for any event up to and including the 1% AEP for the fully developed upstream catchment;
- D. development directly, indirectly and cumulatively avoid an increase in the severity of overland flow and potential for damage on the premises or other premises, public lands, watercourses, roads or infrastructure.

- j. Development in the Lakeside precinct includes one or more of the following:

<ul style="list-style-type: none"> • Caretaker's accommodation⁽¹⁰⁾ • Club* ⁽¹⁴⁾ • Function facility* ⁽²⁹⁾ • Indoor sport and recreation*⁽³⁸⁾ 	<ul style="list-style-type: none"> • Market*⁽⁴⁶⁾ • Motor sport facility⁽⁴⁸⁾ • Outdoor sport and recreation* ⁽⁵⁵⁾ 	<ul style="list-style-type: none"> • Tourist attraction* ⁽⁸³⁾ • Tourist park* ⁽⁸⁴⁾
--	--	--

Note - Uses indicated with an * are appropriate if located on Council owned or controlled land and in accordance with an approved Council Master Plan.

- k. Development in the Lakeside precinct does not include any of the following:

<ul style="list-style-type: none"> • Adult store⁽¹⁾ • Agricultural supplies store⁽²⁾ • Air services⁽³⁾ • Animal husbandry⁽⁴⁾ • Animal keeping⁽⁵⁾ • Aquaculture⁽⁶⁾ 	<ul style="list-style-type: none"> • Funeral parlour⁽³⁰⁾ • Garden centre⁽³¹⁾ • Hardware and trade supplies⁽³²⁾ • Health care services⁽³³⁾ • High Impact industry⁽³⁴⁾ • Home based business⁽³⁵⁾ 	<ul style="list-style-type: none"> • Renewable energy facility⁽⁶³⁾ • Research and technology industry⁽⁶⁴⁾ • Residential care facility⁽⁶⁵⁾ • Resort complex⁽⁶⁶⁾ • Retirement facility⁽⁶⁷⁾
---	--	--

6 Zones

<ul style="list-style-type: none"> • Bar⁽⁷⁾ • Brothel⁽⁸⁾ • Bulk landscape supplies⁽⁹⁾ • Car wash⁽¹¹⁾ • Cemetery⁽¹²⁾ • Child care centre⁽¹³⁾ • Community care centre⁽¹⁵⁾ • Community residence⁽¹⁶⁾ • Community use⁽¹⁷⁾ • Crematorium⁽¹⁸⁾ • Cropping⁽¹⁹⁾ • Detention facility⁽²⁰⁾ • Dual occupancy⁽²¹⁾ • Dwelling house⁽²²⁾ • Dwelling unit⁽²³⁾ • Educational establishment⁽²⁴⁾ • Emergency services⁽²⁵⁾ • Environmental facility⁽²⁶⁾ • Extractive industry⁽²⁷⁾ • Food and drink outlet⁽²⁸⁾ (if including a drive-through facility) 	<ul style="list-style-type: none"> • Hospital⁽³⁶⁾ • Hotel⁽³⁷⁾ • Intensive animal industry⁽³⁹⁾ • Intensive horticulture⁽⁴⁰⁾ • Landing⁽⁴¹⁾ • Low impact industry⁽⁴²⁾ • Marine industry⁽⁴⁵⁾ • Medium impact industry⁽⁴⁷⁾ • Multiple dwelling⁽⁴⁹⁾ • Nature-based tourism⁽⁵⁰⁾ • Nightclub entertainment facility⁽⁵¹⁾ • Non-resident workforce accommodation⁽⁵²⁾ • Office⁽⁵³⁾ • Outdoor sales⁽⁵⁴⁾ • Parking station⁽⁵⁸⁾ • Permanent plantation⁽⁵⁹⁾ • Place of worship⁽⁶⁰⁾ • Port services⁽⁶¹⁾ • Relocatable home park⁽⁶²⁾ 	<ul style="list-style-type: none"> • Roadside stall⁽⁶⁸⁾ • Rooming accommodation⁽⁶⁹⁾ • Rural industry⁽⁷⁰⁾ • Rural workers' accommodation⁽⁷¹⁾ • Sales office⁽⁷²⁾ • Service industry⁽⁷³⁾ • Service station⁽⁷⁴⁾ • Shop⁽⁷⁵⁾ • Shopping centre⁽⁷⁶⁾ • Showroom⁽⁷⁸⁾ • Special industry⁽⁷⁹⁾ • Theatre⁽⁸²⁾ • Transport depot⁽⁸⁵⁾ • Veterinary services⁽⁸⁷⁾ • Warehouse⁽⁸⁸⁾ • Wholesale nursery⁽⁸⁹⁾ • Winery⁽⁹⁰⁾
---	---	---

- I. Development not listed in the tables above may be considered on its merits and where it reflects and supports the outcomes of the zone.

6.2.2.3 Accepted development subject to requirements

If development is to be categorised as accepted development subject to requirements it must comply with the requirements for accepted development set out in Part G, Table 6.2.2.4.1. Where the development does not meet a requirement for accepted development (RAD) within Part G Table 6.2.2.4.1, the category of development changes to assessable development under the rules outlined in section 5.3.3.(1), and assessment is against the corresponding performance outcome (PO) identified in the table below. This only occurs whenever a RAD is not met, and is therefore limited to the subject matter of the RADs that are not complied with. To remove any doubt, for those RADs that are complied with, there is no need for assessment against the corresponding PO.

Part G - Requirements for accepted development - Lakeside precinct

Table 6.2.2.4.1 Requirements for accepted development - Lakeside precinct

Requirements for accepted development	
General requirements	
Building setbacks	
RAD1	Buildings and structures are setback as follows: <ul style="list-style-type: none"> a. road frontage - 6m b. side boundary - 3m c. rear boundary - 3m.
Site cover	
RAD2	Site cover does not exceed 40%.
Car parking	
RAD3	On-site car parking is provided in accordance with Schedule 7 - Car parking.
RAD4	Minimum cycle parking spaces are provided at minimum 1 employee space per 200m ² of GFA.
Waste	
RAD5	Bins and bin storage areas are provided, designed and managed in accordance with Planning scheme policy – Waste.
Lighting	
RAD6	Artificial lighting on-site is directed and shielded in such a manner as not to exceed the recommended maximum values of light technical parameters for the control of obtrusive light given in Table 2.1 of Australian Standard AS 4282 (1997) Control of Obtrusive Effects of Outdoor Lighting. <p>Note - "Curfewed hours" are taken to be those hours between 10pm and 7am on the following day.</p>
Hazardous chemicals	
RAD7	All development that involves the storage or handling of hazardous chemicals listed in Schedule 9, Development involving hazardous chemicals, Table 9.0.1 Quantity thresholds for hazardous chemicals stored as accepted development subject to requirements complies with Table 9.0.3 Hazardous chemicals.
RAD8	Development does not involve the storage or handling of hazardous chemicals listed in Schedule 9, Development involving hazardous chemicals, Table 9.0.2 Hazardous chemicals assessable thresholds.
Clearing of habitat trees where not located in the Environmental areas overlay map	
RAD9	Development does not result in the damaging, destroyed or clearing of a habitat tree. This does not apply to:

6 Zones

	<ul style="list-style-type: none"> a. Clearing of a habitat tree located within an approved development footprint; b. Clearing of a habitat tree within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; c. Clearing of a habitat tree reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; d. Clearing of a habitat tree reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural , Rural residential and Environmental management and conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence; e. Clearing of a habitat tree reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes; f. Clearing of a habitat tree in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council; g. Clearing of a habitat tree associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens; h. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development. <p>Editor's note - A native tree measuring greater than 80cm in diameter when measured at 1.3m from the ground is recognised as a 'habitat tree'. For further information on habitat trees, refer to Planning scheme policy – Environmental areas and corridors. Information detailing how this measurement is undertaken is provided in Australian Standard AS 4970 2009 Protection of Trees on Development Sites - Appendix A.</p>
Works requirements	

Utilities	
RAD10	<p>Where available, the development is connected to:-</p> <ul style="list-style-type: none"> a. an existing reticulated electricity supply; b. telecommunications and broadband; c. reticulated sewerage; d. reticulated water; e. constructed and dedicated road. <p>Development is provided in an appropriate level of service and infrastructure in accordance with Planning scheme policy - Integrated design (Appendix A).</p>
RAD14	<p>Where not in a seweraged area, the development is serviced by an appropriate on-site sewerage facility.</p> <p>Note – A site and soil evaluation report is generally required to demonstrate compliance with this outcome. Reports are to be prepared in accordance with AS1547 On-site domestic wastewater management and the Queensland Plumbing and Wastewater Code.</p>

RAD12	Where not in an existing connections area or a future connections area as detailed in the Unitywater Connections Policy, the development is provided with an adequate water supply of 45,000 litres by way of on-site storage which provides equivalent water quality and reliability to support the use requirements of the development.
--------------	---

Access	
RAD	<p>The frontage road is fully constructed to Council's standards.</p> <p>Note - Roads are considered to be constructed in accordance with Council standards when there is sufficient pavement width, geometry and depth to comply with the requirements of Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures. Testing of the existing pavement may be required to confirm whether the existing works meet the standards in Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p> <p>Note - Frontage roads include streets where no direct lot access is provided.</p>
RAD13	<p>Any new or changes to existing site access crossovers and driveways are designed, and located and constructed in accordance with:</p> <ol style="list-style-type: none"> a. where for a Council-controlled road and associated with a Dwelling house: <ol style="list-style-type: none"> i. Planning scheme policy - Integrated design; b. where for a Council-controlled road; and not associated with a Dwelling house: <ol style="list-style-type: none"> i. AS/NZS2890.1 section 3; or Parking facilities Part 1: Off street car parking; ii. AS/NZS 2890.2 - Parking facilities Part 2: Off-street commercial vehicle facilities; iii. Planning scheme policy - Integrated design; iv. Schedule 8 - Service vehicle requirements; c. where for a State-Controlled road, the Safe Intersection Sight Distance requirements in Austroads and the appropriate IPWEAQ standard drawings, or a copy of a Transport Infrastructure Act 1994, section 62 approval.
RAD14	Any new or changes to existing internal driveways and access ways are designed and constructed in accordance with AS/NZS 2890.1 Parking Facilities Part 1: Off street car parking and the relevant standards in Planning scheme policy - Integrated design.
RAD	Access driveways, manoeuvring areas and loading facilities are sealed and provide for service vehicles listed in Schedule 8 - Service vehicle requirements for the relevant use. The on-site manoeuvring is to be in accordance with Schedule 8 - Service vehicle requirements.

Stormwater	
RAD15	Any new or changes to existing stormwater run-off from the site is conveyed to a point of lawful discharge without causing actionable nuisance or annoyance to any person, property or premises in accordance with Planning scheme policy – Integrated design.

6 Zones

	<p>Note - A watercourse as defined in the Water Act may be accepted as a lawful point of discharge providing the drainage discharge from the site does not increase the downstream flood levels during events up to and including the 1% AEP storm. An afflux of +20mm may be accepted on Council controlled land and road infrastructure. No worsening is ensured when stormwater is discharged into a catchment that includes State Transport Infrastructure.</p>								
RAD	<p>Where development:</p> <ul style="list-style-type: none"> a. is for an urban purpose that involves a land area 2500m² or greater in size; and b. that results in 6 or more dwelling; or c. that results in an impervious area greater than 25% of the net developable area, <p>incorporates a 'deemed to comply solution' to manage stormwater quality.</p> <p>Note - The deemed to comply solution is to be designed, constructed, established and maintained in accordance with the requirements of Water by Design 'Deemed to Comply Solutions - Stormwater Quality Management for South East Queensland' and Planning scheme policy - Integrated design.</p>								
RAD	<p>Development ensures that surface flows entering the premises from adjacent properties are not blocked, diverted or concentrated.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland may be required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p>								
RAD	<p>Development ensures that works (e.g. fences and walls) do not block, divert or concentrate the flow of stormwater to adjoining properties.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland may be required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p>								
RAD	<p>Stormwater drainage infrastructure (excluding detention and bio-retention systems) through or within private land is protected by easements in favour of Council (at no cost to Council). Minimum easement widths are as follows:</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: center;">Pipe Diameter</th> <th style="text-align: center;">Minimum Easement Width (excluding access requirements)</th> </tr> </thead> <tbody> <tr> <td>Stormwater Pipe up to 825mm diameter</td> <td style="text-align: center;">3.0m</td> </tr> <tr> <td>Stormwater Pipe up to 825mm diameter with Sewer pipe up to 225mm diameter</td> <td style="text-align: center;">4.0m</td> </tr> <tr> <td>Stormwater pipe greater than 825mm diameter</td> <td>Easement boundary to be 1m clear of the outside wall of the pipe and clear of all pits.</td> </tr> </tbody> </table> <p>Note - Additional easement width may be required in certain circumstances in order to facilitate maintenance access to the stormwater system.</p> <p>Note - Refer to Planning scheme policy - Integrated design (Appendix C) for easement requirements over open channels.</p>	Pipe Diameter	Minimum Easement Width (excluding access requirements)	Stormwater Pipe up to 825mm diameter	3.0m	Stormwater Pipe up to 825mm diameter with Sewer pipe up to 225mm diameter	4.0m	Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the pipe and clear of all pits.
Pipe Diameter	Minimum Easement Width (excluding access requirements)								
Stormwater Pipe up to 825mm diameter	3.0m								
Stormwater Pipe up to 825mm diameter with Sewer pipe up to 225mm diameter	4.0m								
Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the pipe and clear of all pits.								

Site works and construction management	
RAD16	The site and any existing structures are to be maintained in a tidy and safe condition.
RAD17	<p>Site construction works incorporate temporary stormwater run-off, erosion and sediment controls and trash traps designed in accordance with the Urban Stormwater Quality Planning Guidelines, Planning scheme policy – Stormwater management and Planning scheme policy – Integrated design.</p> <p>Development does not cause erosion or allow sediment to leave the site.</p> <p>Note - The International Erosion Control Association (Australasia) Best Practice Erosion and Sediment Control provides guidance on strategies and techniques for managing erosion and sedimentation.</p>
RAD	No dust emissions extend beyond the boundaries of the site during soil disturbances and construction works.
RAD	<p>Existing street trees are protected and not damaged during works.</p> <p>Note - Where development occurs in the tree protection zone, measures and techniques as detailed in Australian Standard AS 4970 Protection of trees on developments sites are adopted and implemented.</p>
RAD20	Any damage to Council land or infrastructure is repaired or replaced with the same materials, prior to plan sealing, or final building classification.
RAD18	Construction traffic including contractor car parking is controlled in accordance with a traffic management plan, prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) to ensure all traffic movements to and from the site are safe.
RAD21	Any material dropped, deposited or spilled on the road(s) as a result of construction processes associated with the site are to be cleaned at all times.
RAD19	<p>All native vegetation to be retained on-site is temporarily fenced or protected prior to and during development works.</p> <p>Note - No parking of vehicles or storage of machinery or goods is to occur in these areas during development works</p>
RAD	<p>Disposal of materials is managed in one or more of the following ways:</p> <ol style="list-style-type: none"> all cleared vegetation, declared weeds, stumps, rubbish, car bodies, scrap metal and the like are removed and disposed of in a Council land fill facility; or all native vegetation with a diameter below 400mm is to be chipped and stored on-site. <p>Note - No burning of cleared vegetation is permitted.</p> <p>Note - The chipped vegetation must be stored in an approved location.</p>

6 Zones

RAD	<p>All development works are carried out within the following times:</p> <ol style="list-style-type: none"> Monday to Saturday (other than public holidays) between 6:30am and 6:30pm on the same day; no work is to be carried out on Sundays or public holidays.
------------	--

Earthworks

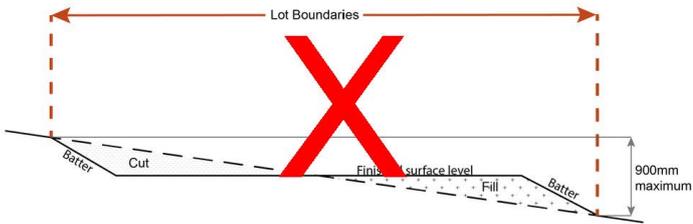

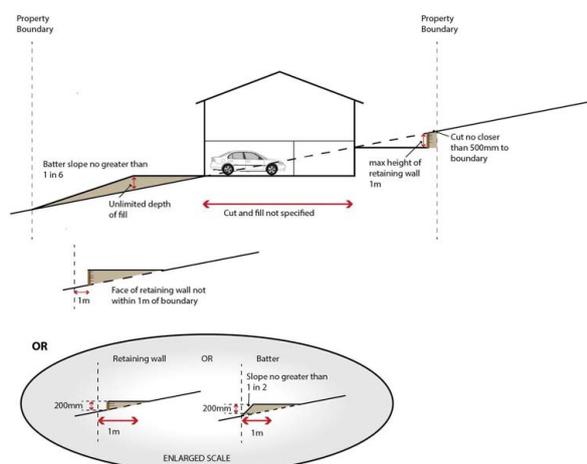

RAD23	<p>The total of all cut and fill on-site does not exceed 900mm in height.</p> <p style="text-align: center;">Figure -- Cut and Fill</p>  <p>Note -- This is site earthworks not building work.</p> <p>Filling or excavation does not:</p> <ol style="list-style-type: none"> involve a change in level of more than 1.0m relative to natural ground level <p>OR</p> <p>result in a batter greater than 1V to 6H;</p> <ol style="list-style-type: none"> necessitate the construction of a freestanding retaining wall exceeding 1.0m in height relative to finished ground level; result in the top of any cut batter, or the exposed face of any freestanding retaining wall supporting that cut, being closer than 500mm to a property boundary; result in the toe of any fill batter, or exposed face of any freestanding retaining wall supporting that fill, being closer than 1.0m to a property boundary unless: <ol style="list-style-type: none"> the depth of fill within the 1.0m strip does not exceed 200mm relative to natural ground level; or the batter slope within that 1.0m strip is no steeper than 1V to 2H. <p style="text-align: center;">THE NEW FIGURE BELOW IS PROPOSED AS PART OF THIS AMENDMENT</p>
--------------	--

Figure - Filling or Excavation

<p>RAD</p>	<p>Cut and fill batters, (other than batters to dams and water impoundments), have a finished slope no steeper than the following:</p> <ol style="list-style-type: none"> any cut batter is no steeper than 1V in 4H; any fill batter, (other than a compacted fill batter), is no steeper than 1V in 4H; any compacted fill batter is no steeper than 1V in 4H.
<p>RAD</p>	<p>All cut and fill batters are provided with appropriate scour, erosion protection and run-off control measures including catch drains at the top of batters and lined batter drains as necessary.</p>
<p>RAD</p>	<p>Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance of steep slopes and batters.</p> <p>Note - Inspection and certification of steep slopes and batters may be required by a suitably qualified and experienced RPEQ.</p>
<p>RAD</p>	<p>All fill and excavation is contained on-site and is free draining.</p>
<p>RAD</p>	<p>Earthworks undertaken on the development site are shaped in a manner which does not:</p> <ol style="list-style-type: none"> prevent stormwater surface flow which, prior to commencement of the earthworks, passed onto the development site, from entering the land; or redirect stormwater surface flow away from existing flow paths; or divert stormwater surface flow onto adjacent land (other than a road) in a manner which: <ol style="list-style-type: none"> concentrates the flow; or increases the flow rates of stormwater over the affected section of the adjacent land above the situation which existed prior to the diversion; or causes actionable nuisance to any person, property or premises.
<p>RAD</p>	<p>All fill placed on-site is:</p>

6 Zones

	<p>a. limited to that necessary for the approved use;</p> <p>b. clean and uncontaminated (i.e. no building waste, concrete, green waste, actual acid sulfate soils, potential acid sulfate soils or contaminated material etc.) material is used as fill.</p>
RAD22	<p>The site is prepared and the fill placed on-site in accordance with Australian Standard AS3798.</p> <p>Note - The fill is to be inspected and tested in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures</p>
RAD	<p>No filling or excavation is undertaken in an easement issued in favour of Council or a public sector entity.</p> <p>Note - Public sector entity is defined in Schedule 2 of the Act.</p>
RAD24	<p>Filling or excavation that would result in any of the following is not carried out on site: does not result in:-</p> <p>a. reduction in cover over any Council or public sector entity infrastructure to less than 600mm;</p> <p>b. an increase in finished surface grade over, or within 1.5m on each side of, the Council or public sector entity infrastructure above that which existed prior to the filling or excavation works being undertaken.;</p> <p>c. prevent reasonable access to Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the site for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity is defined in Schedule 2 of the Act.</p>

Fire services

Note - The provisions under this heading only apply if:

- a. the development is for, or incorporates:
- i. reconfiguring a lot for a community title scheme creating 1 or more vacant lots; or
 - ii. material change of use for 2 or more sole occupancy units on the same lot, or within the same community titles scheme; or
 - iii. material change of use for a Tourist park⁽⁸⁴⁾ with accommodation in the form of caravans or tents; or
 - iv. material change of use for outdoor sales⁽⁵⁴⁾, outdoor processing or outdoor storage where involving combustible materials.

AND

- b. none of the following exceptions apply:
- i. the distributor-retailer for the area has indicated, in its netserv plan, that the premises will not be served by that entity's reticulated water supply; or
 - ii. every part of the development site is within 60m walking distance of an existing fire hydrant on the distributor-retailer's reticulated water supply network, measured around all obstructions, either on or adjacent to the site.

Note - The provisions under this heading do not apply to buildings that are required by the Building Code of Australia to have a fire hydrant system complying with Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations or other fire fighting facilities which provide equivalent protection.

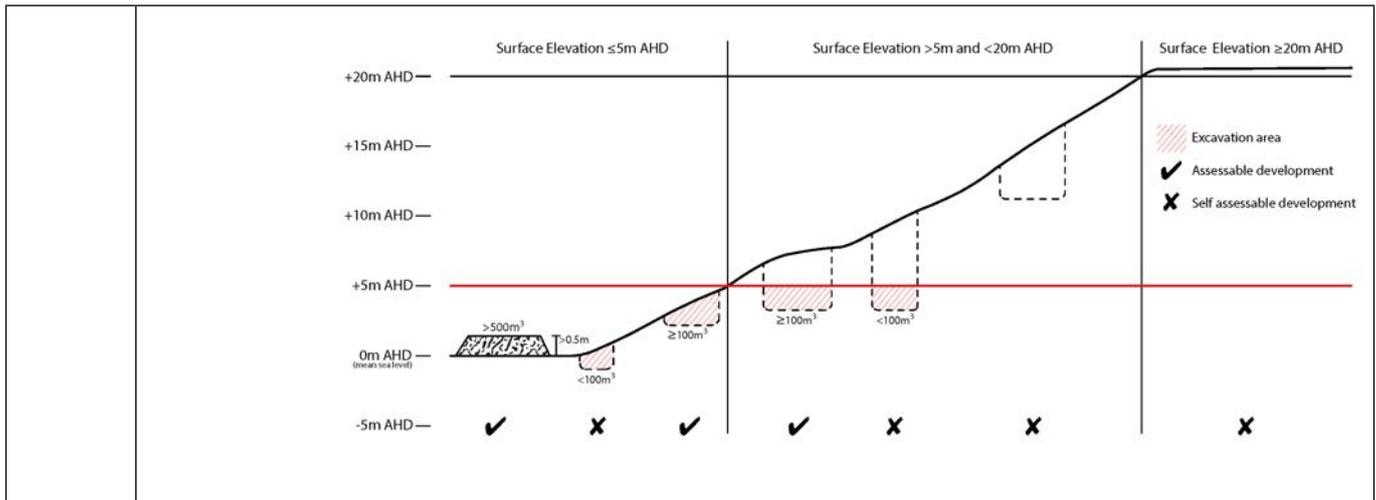

RAD25	<p>External fire hydrant facilities are provided on site to the standard prescribed under the relevant parts of <i>Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations</i>.</p> <p>Note - For this requirement for accepted development, the following are the relevant parts of AS 2419.1 (2005):</p> <ol style="list-style-type: none"> a. in regard to the form of any fire hydrant - Part 8.5 and Part 3.2.2.1, with the exception that for Tourist parks⁽⁸⁴⁾ or development comprised solely of dwellings and their associated outbuildings, single outlet above-ground hydrants or suitably signposted in-ground hydrants would be an acceptable alternative; b. in regard to the general locational requirements for fire hydrants - Part 3.2.2.2 (a), (e), (f), (g) and (h) as well as Appendix B of AS 2419.1 (2005); c. in regard to the proximity of hydrants to buildings and other facilities - Part 3.2.2.2 (b), (c) and (d), with the exception that: <ol style="list-style-type: none"> i. - for dwellings and their associated outbuildings, hydrant coverage need only extend to the roof and external walls of those buildings; ii. - for caravans and tents, hydrant coverage need only extend to the roof of those tents and caravans; iii. - for outdoor sales⁽⁵⁴⁾, processing or storage facilities, hydrant coverage is required across the entire area of the outdoor sales⁽⁵⁴⁾, outdoor processing and outdoor storage facilities; and d. in regard to fire hydrant accessibility and clearance requirements - Part 3.5 and where applicable, Part 3.6.
RAD26	<p>A continuous path of travel having the following characteristics is provided between the vehicle access point to the site and each external fire hydrant and hydrant booster point on the land:</p> <ol style="list-style-type: none"> a. an unobstructed width of no less than 3.5m; b. an unobstructed height of no less than 4.8m; c. constructed to be readily traversed by a 17 tonne HRV fire brigade pumping appliance; d. an area for a fire brigade pumping appliance to stand within 20m of each fire hydrant and 8m of each hydrant booster point.
RAD27	<p>On-site fire hydrant facilities are maintained in effective operating order in a manner prescribed in <i>Australian Standard AS1851 (2012) – Routine service of fire protection systems and equipment</i>.</p>
RAD28	<p>For development that contains on-site fire hydrants external to buildings:</p> <ol style="list-style-type: none"> a. those external hydrants can be seen from the vehicular entry point to the site; or b. a sign identifying the following is provided at the vehicular entry point to the site: <ol style="list-style-type: none"> i. the overall layout of the development (to scale); ii. internal road names (where used); iii. all communal facilities (where provided); iv. the reception area and on-site manager's office (where provided); v. external hydrants and hydrant booster points; vi. physical constraints within the internal roadway system which would restrict access by fire fighting appliances to external hydrants and hydrant booster points. <p>Note - The sign prescribed above, and the graphics used are to be:</p> <ol style="list-style-type: none"> a. in a form;

6 Zones

	<p>b. of a size;</p> <p>c. illuminated to a level;</p> <p>which allows the information on the sign to be readily understood, at all times, by a person in a fire fighting appliance up to 4.5m from the sign.</p>
RAD29	<p>For development that contains on-site fire hydrants external to buildings, those hydrants are identified by way of marker posts and raised reflective pavements markers in the manner prescribed in the technical note <i>Fire hydrant indication system</i> produced by the Queensland Department of Transport and Main Roads.</p> <p>Note - Technical note Fire hydrant indication system is available on the website of the Queensland Department of Transport and Main Roads.</p>
Use specific requirements	
Caretaker's accommodation⁽¹⁰⁾	
RAD30	A caretaker's accommodation ⁽¹⁰⁾ has a maximum GFA of 80m ² .
RAD31	No more than 1 caretaker's accommodation ⁽¹⁰⁾ is established per site.
RAD32	Does not gain access from a separate driveway to the main use on the site.
RAD33	Includes a minimum 16m ² of private open space directly accessible from a habitable room.
RAD34	Provide car parking in accordance with Schedule 7 - Car parking.
Club⁽¹⁴⁾	
RAD35	Limited to 1 club ⁽¹⁴⁾ .
RAD36	Development does not exceed 150m ² GFA.
Motor sport facility⁽⁴⁸⁾	
RAD37	Competitive use of the track by motor vehicles is limited to the hours of 9am to 7pm.
RAD38	<p>Non-competitive motor vehicle use complying with the vehicle standards in the <i>Transport Operations (Road Use Management—Vehicle Standards and Safety) Regulation 2010</i> for use of the track is limited to the hours of 7am to 9pm.</p> <p>Note - for vehicle standards, see section 4 of the <i>Transport Operations (Road Use Management—Vehicle Standards and Safety) Regulation 2010</i></p>
RAD39	Use of the track by motor vehicles is not to occur before 7am or after 9pm.
Telecommunications facility⁽⁸¹⁾	
<p>Editor's note - In accordance with the Federal legislation Telecommunications facilities⁽⁸¹⁾ must be constructed and operated in a manner that will not cause human exposure to electromagnetic radiation beyond the limits outlined in the Radiocommunications (Electromagnetic Radiation - Human Exposure) Standard 2003 and Radio Protection Standard for Maximum Exposure Levels to Radiofrequency Fields - 3Khz to 300Ghz.</p>	

RAD40	A minimum area of 45m ² is available at ground level to allow for additional equipment shelters and associated structures for the purpose of co-locating on the proposed facility.
RAD41	The development results in no net reduction in the minimum quantity and standard of landscaping, private or communal open space or car parking spaces required under the planning scheme or under an existing development approval.
RAD42	Equipment shelters and associated structures are located: <ul style="list-style-type: none"> a. directly beside the existing equipment shelter and associated structures; b. behind the main building line; c. further away from the frontage than the existing equipment shelter and associated structures; d. a minimum of 10m from side and rear boundaries, except where in the Industry and Extractive industry zones, the minimum side and rear setback is 3m.
RAD43	Equipment shelters and other associated structures are either the same type of colour or material to match the surrounding locality.
RAD44	The facility is enclosed by security fencing or by other means to ensure public access is prohibited.
RAD45	A minimum 3m wide strip of dense planting is provided around the perimeter of the fenced area, between the development and street frontage and adjoining uses. <p>Note - Landscaping is provided in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person to ensure compliance with Planning scheme policy - Integrated design.</p>
RAD46	All equipment comprising the telecommunications facility ⁽⁸¹⁾ which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure no noise from this equipment can be heard, or felt at the site boundary.
Values and constraints requirements	
Note - The relevant values and constraints requirements do not apply where the development is consistent with a current Development permit for Reconfiguring a lot or Material change of use or Operational work, where that approval has considered and addressed (e.g. through a development footprint plan (or similar in the case of Landslide hazard) or conditions of approval) the identified value or constraint under this planning scheme.	
Acid sulfate soils - (refer Overlay map - Acid sulfate soils to determine if the following requirements apply)	
Note - Planning scheme policy - Acid sulfate soils provides guidance for requirements for accepted development that has the potential to disturb acid sulfate soils i.e. development involving filling or excavation works below the thresholds of 100m ³ and 500m ³ respectively.	
RAD47	Development does not involve: <ul style="list-style-type: none"> a. excavation or otherwise removing of more than 100m³ of soil or sediment where below 5m Australian Height Datum AHD, or b. filling of land of more than 500m³ of material with an average depth of 0.5m or greater where below the 5m AHD.

6 Zones

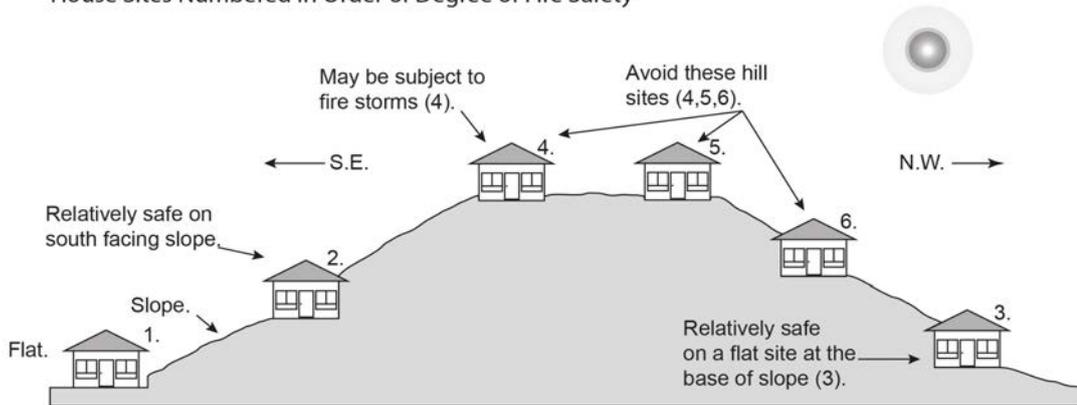

Bushfire hazard (refer Overlay map - Bushfire hazard to determine if the following requirements apply)

Note - For the purposes of section 12 of the Building Regulation 2006, land identified as very high potential bushfire intensity, high potential bushfire intensity, medium potential bushfire intensity or potential impact buffer on the Bushfire hazard overlay map is the 'designated bushfire hazard area'. AS 3959-2009 Construction of buildings in bushfire hazard areas applies within these areas.

RAD48

- a. Building and structures are:
 - i. not located on a ridgeline
 - ii. not located on land with a slope greater than 15% (see Overlay map – Landslide hazard)
- b. Dwellings are located on east to south facing slopes.

House Sites Numbered in Order of Degree of Fire Safety

(1 being the safest, 6 being the most hazardous.)
 From Bushfire Prone Areas: Siting and Design of Residential Buildings (1997), Queensland Department of Local Government and Planning, and Queensland Fire & Rescue Service.

RAD49

- Buildings and structures have contained within the site:
- a. a separation from classified vegetation of 20m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater;

	<ul style="list-style-type: none"> b. a separation from low threat vegetation of 10m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater; c. a separation of no less than 10m between a fire fighting water supply extraction point and any classified vegetation, buildings and other roofed structures; d. an area suitable for a standard fire fighting appliance to stand within 3m of a fire fighting water supply extraction point; and e. an access path suitable for use by a standard fire fighting appliance having a formed width of at least 4m, a cross-fall of no greater than 5%, and a longitudinal gradient of no greater than 25%: <ul style="list-style-type: none"> i. to, and around, each building and other roofed structure; and ii. to each fire fighting water supply extraction point. <p>Note - The meaning of the terms classified vegetation and low threat vegetation as well as the method of calculating the bushfire attack level are as described in Australian Standard AS 3959.</p>
RAD50	<p>The length of driveway:</p> <ul style="list-style-type: none"> a. to a public road does not exceed 100m between the most distant part of a building used for any purpose other than storage and the nearest part of a public road; b. has a maximum gradient no greater than 12.5%; c. have a minimum width of 3.5m; d. accommodate turning areas for fire fighting appliances in accordance with Qld Fire and Emergency Services' Fire Hydrant and Vehicle Access Guideline.
RAD51	<ul style="list-style-type: none"> a. A reticulated water supply is provided by a distributor retailer for the area or, where not connected to a reticulated water supply, on-site fire fighting water storage containing not less than 10 000 litres (tanks with fire brigade tank fittings, swimming pools) is provided and located within 10m of buildings and structures. b. Where a swimming pool is the nominated on-site fire fighting water storage source, vehicle access to within 3m of that water storage source is provided. c. Where a tank is the nominated on-site fire fighting water storage source, it includes: <ul style="list-style-type: none"> i. a hardstand area allowing medium rigid vehicle (15 tonne fire appliance) access within 6m of the tank; ii. fire brigade tank fittings, comprising 50mm ball valve and male camlock coupling and, if underground, an access hole of 20mm (minimum) to accommodate suction lines.
RAD52	Development does not involve the manufacture or storage of hazardous chemicals.
<p>Environmental areas (refer Overlay map - Environmental areas to determine if the following requirements apply)</p> <p>Note - The following are excluded from the native clearing provisions of this planning scheme:</p> <ul style="list-style-type: none"> a. Clearing of native vegetation located within an approved development footprint; b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; 	

6 Zones

- d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental Management and Conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence;
- e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes;
- f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council;
- g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens;
- h. Grazing of native pasture by stock;
- i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development.

Note - Definition for native vegetation is located in Schedule 1 Definitions.

Note - Native vegetation subject to this requirement primarily comprises of matters of national environmental significance (MNES), matters of state environmental significance (MSES). They also comprise some matters of local environmental significance (MLES). A MLES is defined in Schedule 1.2, Administrative definitions. A list of the elements that apply to the mapped MSES and MLES is provided in Appendix 1 of the Planning scheme policy - Environmental areas.

Editors' Note - The accuracy of overlay mapping can be challenged through the development application process (code assessable development) or by way of a planning scheme amendment. See Council's website for details.

Editors' Note - When clearing native vegetation within a MSES area, you may still require approval from the State government.

RAD53	<p>Where no suitable land cleared of native vegetation exists, clearing of native vegetation in High Value Area or Value Offset Area is for the purpose of a new dwelling house⁽²²⁾ and all associated facilities* or an extension to an existing dwelling house⁽²²⁾ only, and comprises an area no greater than 1500m².</p> <p>Note - *All associated facilities includes: on-site wastewater treatment, all areas of disturbance, on-site parking, access and manoeuvring areas.</p> <p>Editor's note - See in heading above for other uses excluded from native vegetation clearing requirements.</p> <p>Editor's note - Where vegetation clearance is accepted development subject to requirements, care should be undertaken to avoid adverse impacts on koalas, koala habitat values and habitat connectivity and to encourage existing koala usage of the site. Measures to minimise impacts include:</p> <ul style="list-style-type: none"> i. co-locating all associated activities, infrastructure and access strips; ii. be the least valued area of koala habitat on the site; iii. minimise the footprint of the development envelope area; iv. minimise edge effects to areas external to the development envelope; v. location and design consideration to ensure koala safety and movement in accordance with the Koala-sensitive Design Guideline and Planning scheme policy – Environmental areas; vi. sufficient area between the development and koala habitat trees to achieve their long-term viability. <p>Editor's note - Where vegetation clearing is accepted development subject to requirements, consideration should be given to avoid clearing habitat trees. Habitat trees may contain structural hollows where animals live, breed and shelter. The provision of nest boxes or salvaging of hollows will provide compensatory roosting and nesting opportunities for local wildlife including sugar gliders, possums and owls. For further information see Planning scheme policy – Environmental areas.</p>
RAD54	<p>No clearing of native vegetation is to occur within the Value Offset Area MLES - Waterway buffer or Value Offset Area MLES - Wetland buffer.</p> <p>This does not apply to the following:</p>

	<ul style="list-style-type: none"> a. Clearing of native vegetation located within an approved development footprint; b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental management and conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence; e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes; f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council; g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens; h. Grazing of native pasture by stock; i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development.
<p>Heritage and landscape character (refer Overlay map - Heritage and landscape character to determine if the following requirements apply)</p> <p>Note - Places, including sites, objects and buildings having local cultural heritage significance, are identified on Overlay map - Heritage and landscape character and listed in Schedule 1 of Planning scheme policy - Heritage and landscape character. Places also having cultural heritage significance at a State level and being entered in the Queensland Heritage Register, are also identified in Schedule 1 of Planning scheme policy - Heritage and landscape character.</p>	
RAD55	<p>Development is for the preservation, maintenance, repair and restoration of the site, object or building.</p> <p>This does not apply to Listed item 99, in Schedule 1 - List of sites, objects and buildings of significant historical and cultural value of Planning scheme policy - Heritage and landscape character.</p> <p>Note - Preservation, maintenance, repair and restoration are defined in Schedule 1 - Definitions</p>
RAD56	<p>A cultural heritage conservation management plan is prepared in accordance with Planning scheme policy – Heritage and landscape character and submitted to Council prior to the commencement of any preservation, maintenance, repair and restoration works. Any preservation, maintenance, repair and restoration works are in accordance with the Council approved cultural heritage conservation management plan.</p> <p>This does not apply to Listed item 99 in Schedule 1 - List of sites, objects and buildings of significant historical and cultural value of Planning scheme policy - Heritage and landscape character.</p>
RAD57	<p>Development does not result in the removal of or damage to any significant tree identified on Overlay map – Heritage and landscape character and listed in Appendix 2 of Planning scheme policy – Heritage and landscape character.</p>
RAD58	<p>The following development does not occur within 20m of the base of any significant tree, identified on Overlay map – Heritage and landscape character and listed in Appendix 2 of Planning scheme policy – Heritage and landscape character:</p> <ul style="list-style-type: none"> a. construction of any building; b. laying of overhead or underground services; c. any sealing, paving, soil compaction; d. any alteration of more than 75mm to the ground surface level prior to work commencing.
RAD59	<p>Pruning of a significant tree occurs in accordance with Australian Standard AS 4373-2007 - Pruning of Amenity Trees.</p>

6 Zones

Landslide hazard (refer Overlay map - Landslide hazard to determine if the following requirements apply)	
RAD60	Development does not: <ol style="list-style-type: none"> involve earthworks exceeding 50m³; involve cut and fill having a height greater than 600mm; involve any retaining wall having a height greater than 600mm; redirect or alter the existing flow of surface or groundwater.
RAD61	Buildings, excluding domestic outbuildings: <ol style="list-style-type: none"> are split-level, multiple-slab, pier or pole construction; are not single plane slab on ground.
RAD62	Development does not involve the manufacture, handling or storage of hazardous chemicals.
Infrastructure buffers (refer Overlay map - Infrastructure buffers to determine if the following requirements apply)	
RAD63	Development within a Water supply buffer does not include the incineration or burial of waste and all other waste is collected and stored in weather proof, sealed waste receptacles, located in roofed and bunded areas, for disposal by a licenced contractor.
RAD64	Management, handling and storage of hazardous chemicals (including fuelling of vehicles) within a Water supply buffer, is undertaken in secured, climate controlled, weather proof, level and bunded enclosures.
RAD65	Development does not restrict access to Bulk water supply infrastructure of any type or size, having regard to (among other things): <ol style="list-style-type: none"> buildings or structures; gates and fences; storage of equipment or materials; landscaping or earthworks or stormwater or other infrastructure.
RAD66	On-site sewerage facilities in a Water supply buffer produce a minimum secondary treated effluent (90th percentile) and effluent application to ensure water quality is maintained and protected.
RAD67	On-site sewerage facilities in a Water supply buffer for a dwelling house ⁽²²⁾ include: <ol style="list-style-type: none"> emergency storage capacity of 1,000 litres and adequate buffering for shock loading/down time; a reserve land application area of 100% of the effluent irrigation design area; land application areas that are vegetated; the base of the land application field is at least 2 metres above the seasonal high water table/bedrock (whichever is the closest to the base of the application area); wastewater collection and storage systems must have capacity to accommodate full load at peak times.
RAD68	On-site sewerage facilities in a Water supply buffer for development other than a dwelling house include emergency storage capable of holding 3-6 hours peak flow of treated effluent in the event of emergencies/overload with provision for de-sludging.
RAD69	Development involving Permanent plantation ⁽⁵⁹⁾ within a Water supply buffer maintains a minimum of 30% ground cover at all times.
RAD70	Development does not involve the construction of any buildings or structures within a Bulk water supply infrastructure buffer.

Overland flow path (refer Overlay map - Overland flow path to determine if the following requirements apply)	
RAD71	Development for a material change of use or building work does not involve the construction of a building or structure in an Overland flow path area.
RAD72	<p>Development for a material change of use or operational work does not impede the flow of flood waters through the premises or worsen flood flows to other premises.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow</p>
RAD73	Development for a material change of use or building work ensures that fencing in an overland flow path area is at least 50% permeable.
RAD74	Development for a material change of use or building work that involves a hazardous chemical ensures the hazardous chemicals is not located within an overland flow path area.
RAD75	Development for a material change of use or building work for a Park ⁽⁵⁷⁾ ensures that work is provided in accordance with the requirements set out in Appendix B of the Planning scheme policy - Integrated design.
Riparian and wetland setbacks (refer Overlay map - Riparian and wetland setback to determine if the following requirements apply)	
<p>Note - W1, W2 and W3 waterway and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.</p>	
RAD76	<p>No development is to occur within:</p> <ol style="list-style-type: none"> 50m from top of bank for W1 waterway and drainage line 30m from top of bank for W2 waterway and drainage line 20m from top of bank for W3 waterway and drainage line 100m from the edge of a Ramsar wetland, 50m from all other wetlands. <p>Note - W1, W2 and W3 waterways and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.</p> <p>Note - In some cases, the top of bank may not be easily defined, as such a hydraulic measurement may be applied instead. Moreton Bay Regional Council will provide further direction on how to determine and locate the setback boundary in these locations.</p> <p>Note - The minimum setback distance applies to the each side of waterway.</p>
Transport noise corridors (refer Overlay map - Transport noise corridors)	
<p>Note - This is for information purposes only. No requirements for accepted development or criteria for assessable development apply. Development located within a Transport Noise Corridor must satisfy the requirements of the Queensland Development Code</p>	

Part H — Criteria for assessable development- Lakeside precinct

6 Zones

Where development is categorised as assessable development - code assessment in the Table of Assessment, and located in a precinct, the assessment benchmarks are the criteria set out in Part H, Table 6.2.2.4.2 as well as the purpose statement and overall outcomes of this code.

Where development is categorised as assessable development - impact assessment, the assessment benchmarks become the whole of the planning scheme.

Table 6.2.2.4.2 Assessable development - Lakeside precinct

Performance outcomes	Examples that achieve aspects of the Performance Outcomes
General criteria	
Precinct function	
<p>PO1</p> <p>Development does not compromise, depart or detract from the primary role of the precinct for motor sport facility⁽⁴⁸⁾ use.</p>	No example provided.
Built form and design	
<p>PO2</p> <p>Buildings and structures are of a height, scale and bulk which:</p> <ol style="list-style-type: none"> is visually compatible with existing buildings or structures; does not appear dominant, overbearing or out-of-character with the surrounding low density, low intensity built form environment; minimises the visual impact of large-scale built form; does not result in a significant loss of visual amenity or outlook. 	No example provided.
<p>PO3</p> <p>Buildings and structures are designed and constructed to:</p> <ol style="list-style-type: none"> incorporate a mix of colours and high quality materials to add diversification to treatments and finishes; avoid blank walls through façade articulation to create visual interest and deter graffiti and vandalism; reduce cluttering of plant and equipment on building roofs. 	<p>E3.1</p> <p>Development provides materials and finishes of a high quality that are not susceptible to stain, discolour or deterioration.</p>
	<p>E3.2</p> <p>Development incorporates articulated walls with variation, detail and colour to reduce the bulk and impact of development and minimise expansive blank walls.</p>
	<p>E3.3</p> <p>Building utilities such as lift motor rooms and telecommunications equipment are designed to be visually integrated with the building.</p>

<p>PO4</p> <p>Development will ensure that buildings and structures are not overbearing, visually dominant or out of character with the surrounding built environment nor detract from the amenity of adjoining land.</p>	<p>E4</p> <p>Site cover of all buildings and structures does not exceed 40%.</p>
Building setbacks	
<p>PO5</p> <p>Building setback:</p> <ol style="list-style-type: none"> a. is sufficient to minimise overlooking and maintain privacy of adjoining properties; b. is sufficient to ensure development is not visually dominant or overbearing on adjoining properties. 	<p>E5</p> <p>Buildings and structures are setback as follows, unless otherwise indicated:</p> <ol style="list-style-type: none"> a. road frontage - 6m b. side boundary - 3m c. rear boundary - 3m
Personal and property safety	
<p>PO6</p> <p>Buildings and spaces are designed and constructed to create a safe and secure environment by incorporating key crime prevention through environmental design principles, including:</p> <ol style="list-style-type: none"> a. casual surveillance opportunities and sight lines; b. way-finding cues and signage; c. light illuminates pathways and potential entrapment areas as well as maximising opportunities for penetration of natural light into spaces; d. minimise predictable routes and entrapment locations. 	<p>No example provided.</p>
Amenity	
<p>PO7</p> <p>The amenity of the area and adjacent sensitive land uses are protected from the impacts of dust, odour, light, chemicals and other environmental nuisances.</p>	<p>No example provided.</p>
<p>Hazardous chemicals</p> <p>Note - To assist in demonstrating compliance with the following performance outcomes, a Hazard Assessment Report may be required to be prepared and submitted by a suitably qualified person in accordance with 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.</p> <p>Note - Terms used in this section are defined in 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.</p>	

6 Zones

<p>PO8</p> <p>Off sites risks from foreseeable hazard scenarios involving hazardous chemicals are commensurate with the sensitivity of the surrounding land use zones.</p>	<p>E8.1</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of land zoned for vulnerable or sensitive land uses as described below:</p> <p>Dangerous Dose</p> <ul style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ul style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. b. For any hazard scenario involving fire or explosion: <ul style="list-style-type: none"> i. 7kPa overpressure; ii. 4.7kW/m² heat radiation. <p>If criteria E8.1 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 0.5 x 10⁻⁶/year.</p>
	<p>E8.2</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of a commercial or community activity land use zone as described below:</p> <p>Dangerous Dose</p> <ul style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ul style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. b. For any hazard scenario involving fire or explosion: <ul style="list-style-type: none"> i. 7kPa overpressure; ii. 4.7kW/m² heat radiation. <p>If criteria E8.2 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 5 x 10⁻⁶/year.</p>
	<p>E8.3</p>

	<p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of an industrial land use zone as described below:</p> <p>Dangerous Dose</p> <ol style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ol style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. b. For any hazard scenario involving fire or explosion: <ol style="list-style-type: none"> i. 14kPa overpressure; ii. 12.6kW/m² heat radiation. <p>If criteria E8.3 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 50 x 10⁻⁶/year.</p>
<p>PO9</p> <p>Buildings and package stores containing fire-risk hazardous chemicals are designed to detect the early stages of a fire situation and notify a designated person.</p>	<p>E9</p> <p>Buildings and package stores containing fire-risk hazardous chemicals are provided with 24 hour monitored fire detection system for early detection of a fire event.</p>
<p>PO10</p> <p>Common storage areas containing packages of flammable and toxic hazardous chemicals are designed with spill containment system(s) that are adequate to contain releases, including fire fighting media.</p>	<p>E10</p> <p>Storage areas containing packages of flammable and toxic hazardous chemicals are designed with spill containment system(s) capable of containing a minimum of the total aggregate capacity of all packages plus the maximum operating capacity of any fire protection system for the storage area(s) over a minimum of 60 minutes.</p>
<p>PO11</p> <p>Storage and handling areas, including manufacturing areas, containing hazardous chemicals in quantities greater than 2,500L or kg within a Local Government “flood hazard area” are located and designed in a manner to minimise the likelihood of inundation of flood waters from creeks, rivers, lakes or estuaries.</p>	<p>E11.1</p> <p>The base of any tank with a WC >2,500L or kg is higher than any relevant flood height level identified in an area’s flood hazard area. Alternatively:</p> <ol style="list-style-type: none"> a. bulk tanks are anchored so they cannot float if submerged or inundated by water; and b. tank openings not provided with a liquid tight seal, i.e. an atmospheric vent, are extended above the relevant flood height level. <p>E11.2</p>

6 Zones

	<p>The lowest point of any storage area for packages >2,500L or kg is higher than any relevant flood height level identified in an area's flood hazard area. Alternatively, package stores are provided with impervious bund walls or racking systems higher than the relevant flood height level.</p>
<p>Traffic matters</p>	
<p>PO12</p> <p>Traffic generation, vehicle movement and on-site car parking associated with an activity:</p> <ul style="list-style-type: none"> a. provides safe, convenient and accessible access for vehicles and pedestrians; b. provides safe and convenient on-site parking and manoeuvring to meet anticipated parking demand; c. is appropriate to the road classification and carrying capacity of the local network and able to meet the additional demands generated by the development; d. does not result in adverse impacts on the efficient and safe functioning of the road network. 	<p>No example provided.</p>
<p>Bicycle parking and end of trip facilities</p> <p>Note - Building work to which this code applies constitutes Major Development for purposes of development requirements for end of trip facilities prescribed in the Queensland Development Code MP 4.1.</p>	
<p>PO13</p> <ul style="list-style-type: none"> a. End of trip facilities are provided for employees or occupants, in the building or on-site within a reasonable walking distance, and include: <ul style="list-style-type: none"> i. adequate bicycle parking and storage facilities; and ii. adequate provision for securing belongings; and iii. change rooms that include adequate showers, sanitary compartments, wash basins and mirrors. b. Notwithstanding a. there is no requirement to provide end of trip facilities if it would be unreasonable to provide these facilities having regard to: <ul style="list-style-type: none"> i. the projected population growth and forward planning for road upgrading and development of cycle paths; or 	<p>E13.1</p> <p>Minimum bicycle parking facilities are provided at a rate of 1 bicycle parking space for every 3 vehicles parking spaces required by Schedule 7 – Car parking.</p> <p>Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is a combination of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.</p> <hr/> <p>E13.2</p> <p>Bicycle parking is:</p> <ul style="list-style-type: none"> a. provided in accordance with <i>Austrroads (2008), Guide to Traffic Management - Part 11: Parking</i>; b. protected from the weather by its location or a dedicated roof structure;

- ii. whether it would be practical to commute to and from the building on a bicycle, having regard to the likely commute distances and nature of the terrain; or
- iii. the condition of the road and the nature and amount of traffic potentially affecting the safety of commuters.

Editor's note - The intent of b above is to ensure the requirements for bicycle parking and end of trip facilities are not applied in unreasonable circumstances. For example these requirements should not, and do not apply in the Rural zone or the Rural residential zone etc.

Editor's note - This performance outcome is the same as the Performance Requirement prescribed for end of trip facilities under the Queensland Development Code. For development incorporating building work, that Queensland Development Code performance requirement cannot be altered by a local planning instrument and has been reproduced here solely for information purposes. Council's assessment in its building work concurrence agency role for end of trip facilities will be against the performance requirement in the Queensland Development Code. As it is subject to change at any time, applicants for development incorporating building work should ensure that proposals that do not comply with the examples under this heading meet the current performance requirement prescribed in the Queensland Development Code.

- c. located within the building or in a dedicated, secure structure for residents and staff;
- d. adjacent to building entrances or in public areas for customers and visitors.

Note - Bicycle parking structures are to be constructed to the standards prescribed in AS2890.3.

Note - Bicycle parking and end of trip facilities provided for residential and non-residential activities may be pooled, provided they are within 100 metres of the entrance to the building.

Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is an amalgamation of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.

E13.3

For non-residential uses, storage lockers:

- a. are provide at a rate of 1.6 per bicycle parking space (rounded up to the nearest whole number);
- b. have minimum dimensions of 900mm (height) x 300mm (width) x 450mm (depth).

Note - Storage lockers may be pooled across multiple sites and activities when within 100 metres of the entrance to the building and within 50 metres of bicycle parking and storage facilities.

Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is an amalgamation of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.

E13.4

For non-residential uses, changing rooms:

- a. are provided at a rate of 1 per 10 bicycle parking spaces;
- b. are fitted with a lockable door or otherwise screened from public view;
- c. are provided with shower(s), sanitary compartment(s) and wash basin(s) in accordance with the table below:

Bicycle spaces provided	Male/ Female	Change rooms required	Showers required	Sanitary compartments required	Washbasins required
1-5	Male and female	1 unisex change room	1	1 closet pan	1

6 Zones

	<table border="1" data-bbox="783 203 1471 645"> <tr> <td>6-19</td> <td>Female</td> <td>1</td> <td>1</td> <td>1 closet pan</td> <td>1</td> </tr> <tr> <td rowspan="3">20 or more</td> <td>Male</td> <td>1</td> <td>1</td> <td>1 closet pan</td> <td>1</td> </tr> <tr> <td>Female</td> <td>1</td> <td>2, plus 1 for every 20 bicycle spaces provided thereafter</td> <td>2 closet pans, plus 1 sanitary compartment for every 60 bicycle parking spaces provided thereafter</td> <td>1, plus 1 for every 60 bicycle parking spaces provided thereafter</td> </tr> <tr> <td>Male</td> <td>1</td> <td>2, plus 1 for every 20 bicycle spaces provided thereafter</td> <td>1 urinal and 1 closet pans, plus 1 sanitary compartment at the rate of 1 closet pan or 1 urinal for every 60 bicycle space provided thereafter</td> <td>1, plus 1 for every 60 bicycle parking spaces provided thereafter</td> </tr> </table> <p data-bbox="794 685 1452 734">Note - All showers have a minimum 3-star Water Efficiency Labelling and Standards (WELS) rating shower head.</p> <p data-bbox="794 763 1445 813">Note - All sanitary compartments are constructed in compliance with F2.3 (e) and F2.5 of BCA (Volume 1).</p> <p data-bbox="783 882 1458 1099">d. are provided with:</p> <ul style="list-style-type: none"> i. a mirror located above each wash basin; ii. a hook and bench seating within each shower compartment; iii. a socket-outlet located adjacent to each wash basin. <p data-bbox="794 1171 1458 1270">Note - Change rooms may be pooled across multiple sites, residential and non-residential activities when within 100 metres of the entrance to the building and within 50 metres of bicycle parking and storage facilities</p> <p data-bbox="794 1328 1458 1476">Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. 	Male	1	2, plus 1 for every 20 bicycle spaces provided thereafter	1 urinal and 1 closet pans, plus 1 sanitary compartment at the rate of 1 closet pan or 1 urinal for every 60 bicycle space provided thereafter	1, plus 1 for every 60 bicycle parking spaces provided thereafter																		
Landscaping and screening																							
<p data-bbox="124 1608 197 1635">PO14</p> <p data-bbox="124 1666 743 1727">Landscaping and screening is provided in a manner that :</p> <ul style="list-style-type: none"> a. achieves a high level of privacy and amenity to sensitive land uses on adjoining properties and when viewed from the street; b. reduces the visual impact of building bulk and presence and hard surface areas on the local character and amenity of adjoining sensitive land uses and from the street; 	<p data-bbox="783 1608 1043 1635">No example provided.</p>																						

<p>c. creates a secure and safe environment by incorporating key elements of crime prevention through environmental design;</p> <p>d. achieves the design principles outlined in Planning scheme policy - Integrated design.</p>	
Loading and servicing	
<p>PO15</p> <p>Loading and servicing areas:</p> <p>a. are not visible from the street frontage;</p> <p>b. are integrated into the design of the building;</p> <p>c. include screening and buffers to reduce negative impacts on adjoining sensitive land uses.</p>	<p>No example provided.</p>
Waste	
<p>PO16</p> <p>Bins and bin storage areas are provided, designed and managed in accordance with Planning scheme policy – Waste.</p>	<p>No example provided: E16</p> <p>Development is designed to meet the criteria in the Planning scheme policy - Waste and is demonstrated in a waste management program.</p>
Noise	
<p>PO17</p> <p>Noise generating uses do not adversely affect existing noise sensitive uses.</p> <p>Note - The use of walls, barriers or fences that are visible from or adjoin a road or public area are not appropriate noise attenuation measures unless adjoining a motorway, arterial road or rail line.</p> <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p>	<p>No example provided.</p>
Clearing of habitat trees where not located within the Environmental areas overlay map	
<p>PO18</p> <p>a. Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected.</p> <p>b. Development does not result in the net loss of fauna habitat. Where development does result in the loss of a habitat tree, development will provide replacement fauna nesting boxes at the following rate of 1 nest box for every hollow</p>	<p>No example provided.</p>

6 Zones

<p>removed. Where hollows have not yet formed in trees > 80cm in diameter at 1.3m height, 3 nest boxes are required for every habitat tree removed.</p> <p>c. Development does not result in soil erosion or land degradation or leave land exposed for an unreasonable period of time but is rehabilitated in a timely manner</p> <p>Note: Further guidance on habitat trees is provided in Planning scheme policy - Environmental areas</p>	
--	--

Works criteria

Utilities	
<p>PO</p> <p>All services including water supply, sewage disposal, electricity, street lighting, telecommunications and gas (if available) are provided in a manner that:</p> <ol style="list-style-type: none"> is effective in delivery of service and meets reasonable community expectations; has capacity to service the maximum lot yield envisaged for the zone and the service provider's design assumptions; ensures a logical, sequential, efficient and integrated roll out of the service network; is conveniently accessible in the event of maintenance or repair; minimises whole of life cycle costs for that infrastructure; minimises risk of potential adverse impacts on the natural and built environment; minimises risk of potential adverse impact on amenity and character values; recognises and promotes Councils Total Water Cycle Management policy and the efficient use of water resources. 	<p>E</p> <p>Development is provided with an appropriate level of service and infrastructure in accordance with Planning scheme policy - Integrated design (Appendix A).</p>
<p>PO19</p> <p>The development is connected to an existing reticulated electricity supply system approved by the relevant energy regulating authority.</p>	<p>E19</p> <p>Development is connected to underground electricity.</p>
<p>PO20</p>	<p>No example provided.</p>

The development has access to telecommunications and broadband services in accordance with current standards.	
PO21 The development provides for the treatment and disposal of sewage and other waste water in a way that will not cause environmental harm or pose a risk to public health.	E21.1 Where in a sewerage area, the development is connected to a reticulated sewerage network.
	E21.2 Where not in a sewerage area, the development is serviced by an appropriate on-site sewerage facility. Note – A site and soil evaluation report is generally required to demonstrate compliance with this outcome. Reports are to be prepared in accordance with AS1547 On-site domestic wastewater management and the Queensland Plumbing and Wastewater Code.
	E21.3 Trade waste is pre-treated on-site prior to discharging into the sewerage network.
PO22 The development is provided with an adequate and sustainable supply of potable (drinking and general use e.g. gardening, washing, fire fighting) water.	E22.1 Where in an existing connections area or a future connections area as detailed in the Unitywater Connections Policy, the development is connected to the reticulated water supply system in accordance with the South East Queensland Water Supply and Sewerage Design and Construction Code and the relevant Water Service Association of Australia (WSAA) codes and standards.
	E22.2 Where not in an existing connections area or a future connections area as detailed in the Unitywater Connections Policy, the development is provided with an adequate water supply of 45,000 litres by way of on-site storage which provides equivalent water quality and reliability to support the use requirements of the development.
PO23 The development is provided with constructed and dedicated road access.	No example provided.
Access	
PO24	No example provided.

6 Zones

<p>Where required, access easements contain a driveway and provision for services appropriate to the use. The easement covers all works associated with the access in accordance with Planning scheme policy - Integrated design.</p>	
<p>PO25</p> <p>The layout of the development does not compromise:</p> <ol style="list-style-type: none"> a. the development of the road network in the area; b. the function or safety of the road network; c. the capacity of the road network. <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p>	<p>E25.1</p> <p>The development provides for the extension of the road network in the area in accordance with Council's road network planning.</p>
	<p>E25.2</p> <p>The development does not compromise future road widening of frontage roads in accordance with the relevant standard and Council's road planning.</p>
	<p>E25.3</p> <p>The lot development layout allows forward vehicular access to and from the site.</p>
<p>PO26</p> <p>Safe access is provided for all vehicles required to access the site.</p>	<p>E26.1</p> <p>Site access and driveways are designed and, located and constructed in accordance with:</p> <ol style="list-style-type: none"> a. where for a Council-controlled road and associated with a Dwelling house: <ol style="list-style-type: none"> i. Planning scheme policy - Integrated design; b. Where for a Council-controlled road; and not associated with a Dwelling house: <ol style="list-style-type: none"> i. AS/NZS2890.1 section 3; or Parking facilities Part 1: Off street car parking; ii. AS 2890.2 - Parking facilities Part 2: Off-street commercial vehicle facilities; iii. Planning scheme policy - Integrated design; iv. Schedule 8 - Service vehicle requirements; c. Where for a State-Controlled road, the Safe Intersection Sight Distance requirements in AustRoads and the appropriate IPWEAQ standard drawings, or a copy of a Transport Infrastructure Act 1994, section 62 approval.
	<p>E26.2</p>

	<p>Internal driveways, car parks and access ways are designed and constructed with a sealed pavement and in accordance with:</p> <ol style="list-style-type: none"> AS/NZS 2890.1 Parking Facilities Part 1: Off street car parking; AS 2890.2 Parking Facilities Part 2: Off street commercial vehicle facilities; and the relevant standards in Planning scheme policy - Integrated design; and Schedule 8 - Service vehicle requirements. <p>Note - This includes queue lengths (refer to Schedule 8 - Service vehicle requirements), pavement widths and construction.</p>
	<p>E26.3</p> <p>Access driveways, manoeuvring areas and loading facilities are sealed and provide for service vehicles listed in Schedule 8 - Service vehicle requirements for the relevant use. The on-site manoeuvring is to be in accordance with Schedule 8 - Service vehicle requirements.</p>
	<p>E</p> <p>Landscaping (including shade trees) is provided within car parks in accordance with Planning scheme policy - Integrated design.</p>
<p>PO</p> <p>Sealed and flood free road access during the minor storm event is available to the site from the nearest arterial or sub-arterial road.</p> <p>Editor's Note - Where associated with a State-controlled road, further requirements may apply, and approvals may be required from the Department of Transport and Main Roads.</p>	<p>E</p> <p>Roads or streets giving access to the development from the nearest arterial or sub-arterial road are flood free during the minor storm event and are sealed.</p> <p>Note - The road network is mapped on Overlay Map - Road Hierarchy.</p>
<p>PO</p> <p>Roads which provide access to the site from an arterial or sub-arterial road remain trafficable during major storm events without flooding or impacting upon residential properties or other premises.</p>	<p>E</p> <p>Access roads to the development have sufficient longitudinal and cross drainage to remain safely trafficable during major storm (1% AEP) events.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - Refer to QUDM for requirements regarding trafficability.</p>
	<p>E</p>

6 Zones

	<p>Culverts and causeways do not increase inundation levels or increase velocities, for all events up to the defined flood event, to upstream or downstream properties.</p>
<p>Street design and layout</p>	
<p>PO</p> <p>Streets are designed and constructed in accordance with Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures. The street design and construction accommodates the following functions:</p> <ol style="list-style-type: none"> access to premises by providing convenient vehicular movement for residents between their homes and the major road network; safe and convenient pedestrian and cycle movement; adequate on street parking; stormwater drainage paths and treatment facilities; efficient public transport routes; utility services location; emergency access and waste collection; setting and approach (streetscape, landscaping and street furniture) for adjoining residences; expected traffic speeds and volumes; and wildlife movement. <p>Note - Preliminary road design (including all services, street lighting, stormwater infrastructure, access locations, street trees and pedestrian network) may be required to demonstrate compliance with this PO.</p> <p>Note - Refer to Planning scheme policy - Environmental areas and corridors for examples of when and where wildlife movement infrastructure is required.</p>	<p>No example provided</p>
<p>PO27</p> <p>Upgrade works (whether trunk or non-trunk) are provided where necessary to:-</p> <ol style="list-style-type: none"> ensure the type or volume of traffic generated by the development does not have a negative impact on the external road network;- 	<p>E</p> <p>No example provided.</p> <p>New intersections onto existing roads are designed to accommodate traffic volumes and traffic movements taken from a date 10 years from the date of completion of the last stage of the development. Detailed design is to be in accordance with Planning scheme policy - Integrated design.</p>

<p>b. ensure the orderly and efficient continuation of the active transport network;</p> <p>c. ensure the site frontage is constructed to a suitable urban standard generally in accordance with Planning scheme policy – Integrated design.</p> <p>Note – An Integrated Transport Assessment (ITA) may be required to demonstrate compliance with this performance outcome refer to Planning scheme policy – Integrated transport assessment for guidance on when an ITA is required. An ITA should be prepared in accordance with Planning scheme policy – Integrated transport assessment.</p> <p>Note – The road network is mapped on Overlay map – Road hierarchy.</p> <p>Note – The primary and secondary active transport network is mapped on Overlay map – Active transport</p> <p>Note – To demonstrate compliance with c. of this performance outcome, site frontage works where in existing road reserve (non-trunk) are to be designed and constructed as follows:</p> <p>i. Where the street is partially established to an urban standard, match the alignment of existing kerb and channel and provide carriageway widening and underground drainage where required; or</p> <p>ii. Where the street is not established to an urban standard, prepare a design that demonstrates how the relevant features of the particular road as shown in the Planning scheme policy – Integrated Design can be achieved in the existing reserve.</p> <p>Note – Refer to Planning scheme policy – Integrated design for road network and active transport network design standards.</p> <p>The existing road network (whether trunk or non-trunk) is upgraded where necessary to cater for the impact from the development.</p> <p>Note - An applicant will be required to submit an Integrated Transport Assessment (ITA), prepared in accordance with Planning scheme policy - Integrated transport assessment to demonstrate compliance with this PO, when any of the following occurs;</p> <ul style="list-style-type: none"> • development is within 200m of a transport sensitive location such as a school, shopping centre, bus or train station or a large generator of pedestrian or vehicular traffic; • forecast traffic to/from the development exceeds 5% of the two way flow on the adjoining road or intersection in the morning or afternoon transport peak within 10 years of the development completion; • Development access onto a sub arterial, or arterial road or within 100m of a signalised intersection; • Residential development greater than 50 lots or dwellings; • Offices greater than 4,000m² Gross Floor Area (GFA); • Retail activities including Hardware and trade supplies; • Showroom, Shop or Shopping centre greater than 1,000m² GFA; 	<p>Note - All turns vehicular access to existing lots is to be retained at new road intersections wherever practicable.</p> <p>Note - Existing on-street parking is to be retained at new road intersections and along road frontages wherever practicable.</p> <p>E</p> <p>Existing intersections external to the site are upgraded as necessary to accommodate increased traffic from the development. Design is in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p> <p>Note - All turns vehicular access to existing lots is to be retained at new road intersections wherever practicable.</p> <p>Note - Existing on-street parking is to be retained at upgraded road intersections and along road frontages wherever practicable.</p> <p>E</p> <p>The active transport network is extended in accordance with Planning scheme policy - Integrated design.</p>
--	---

6 Zones

<ul style="list-style-type: none"> Warehouses and Industry greater than 6000m² GFA; On-site carpark greater than 100 spaces; Development has a trip generation rate of 100 vehicles or more within the peak hour; Development which dissects or significantly impacts on an environmental area or an environmental corridor. <p>The ITA is to review the development's impact upon the external road network for the period of 10 years from completion of the development. The ITA is to provide sufficient information for determining the impact and the type and extent of any ameliorative works required to cater for the additional traffic. The ITA must include a future structural road layout of adjoining properties that will form part of this catchment and road connecting to these properties. The ITA is to assess the ultimate developed catchment's impacts and necessary ameliorative works, and the works or contribution required by the applicant as identified in the study.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - The primary and secondary active transport network is mapped on Overlay map - Active transport.</p>												
<p>PO</p> <p>All Council controlled frontage roads are designed and constructed in accordance with Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures. All new works are extended to join any existing works within 20m.</p> <p>Note - Frontage roads include streets where no direct lot access is provided.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - The Primary and Secondary active transport network is mapped on Overlay map - Active transport.</p> <p>Note - Roads are considered to be constructed in accordance with Council's standards when there is sufficient pavement width, geometry and depth to comply with the requirements of Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p>	<p>E</p> <p>Design and construct all Council controlled frontage roads in accordance with Planning scheme policy - Integrated design, Planning scheme policy - Operational works inspection, maintenance and bonding procedures and the following:</p> <table border="1" data-bbox="810 1317 1465 2112"> <thead> <tr> <th>Situation</th> <th>Minimum construction</th> </tr> </thead> <tbody> <tr> <td>Frontage road unconstructed or gravel road only;</td> <td rowspan="3">Construct the verge adjoining the development and the carriageway (including development side kerb and channel) to a minimum sealed width containing near side parking lane (if required), cycle lane (if required), 2 travel lanes plus 1.5m wide (full depth pavement) gravel shoulder and table drainage to the opposite side.</td> </tr> <tr> <td>OR</td> </tr> <tr> <td>Frontage road sealed but not constructed* to Planning scheme policy - Integrated design standard;</td> </tr> <tr> <td>OR</td> <td rowspan="2">The minimum total travel lane width is:</td> </tr> <tr> <td>Frontage road partially constructed* to Planning scheme policy - Integrated design standard.</td> </tr> <tr> <td></td> <td> <ul style="list-style-type: none"> 6m for minor roads; 7m for major roads. </td> </tr> </tbody> </table>	Situation	Minimum construction	Frontage road unconstructed or gravel road only;	Construct the verge adjoining the development and the carriageway (including development side kerb and channel) to a minimum sealed width containing near side parking lane (if required), cycle lane (if required), 2 travel lanes plus 1.5m wide (full depth pavement) gravel shoulder and table drainage to the opposite side. Stormwater	
<p>PO</p> <p>Minor stormwater drainage systems (internal and external) have the capacity to convey stormwater flows from frequent storm events for the fully developed upstream catchment whilst ensuring pedestrian and vehicular traffic movements are safe and convenient.</p>	<p>E</p> <p>The capacity of all minor drainage systems are designed in accordance with Planning scheme policy - Integrated design.</p> <p>E</p> <p>Stormwater pipe network capacity is to be calculated in accordance with the Hydraulic Grade Line method as detailed in Australian Rainfall and Runoff or QUDM.</p> <p>E</p> <p>Development ensures that roof and allotment drainage infrastructure is provided in accordance with the relevant level as identified in QUDM.</p>
<p>PO</p> <p>Major stormwater drainage system(s) have the capacity to safely convey stormwater flows for the 1% AEP event for the fully developed upstream catchment.</p>	<p>E</p> <p>The internal drainage system safely and adequately conveys the stormwater flows for the 1% AEP event for the fully developed upstream catchment through the site.</p> <p>E</p> <p>The external (downstream) drainage system safely conveys the stormwater flows for the 1% AEP event for the fully developed upstream catchment without allowing the flows to encroach upon private lots.</p> <p>E</p>

6 Zones

	<p>Overland flow paths from roads and public open space areas do not pass through private lots. Drainage pathways are provided to accommodate overland flows from roads and public open space areas.</p> <p>E</p> <p>The flow velocity in all unlined or soft faced open drains is kept within acceptable limits for the type of material or lining and condition of the channel.</p> <p>Note - Refer to QUDM for recommended average flow velocities.</p>
<p>PO</p> <p>Provide measures to properly manage surface flows for the 1% AEP event (for the fully developed catchment) draining to and through the land to ensure no actionable nuisance is created to any person or premises as a result of the development. The development must not result in ponding on adjacent land, redirection of surface flows to other premises or blockage of a surface flow relief path for flows exceeding the design flows for any underground system within the development.</p>	<p>E</p> <p>The stormwater drainage system is designed and constructed in accordance with Planning scheme policy - Integrated design.</p>
<p>PO28</p> <p>Stormwater run-off from the site is conveyed to a point of lawful discharge without causing actionable nuisance or annoyance to any person, property or premises.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details.</p> <p>Note - A downstream drainage discharge report in accordance with Planning scheme policy - Stormwater management may be required to demonstrate achievement of this performance outcome.</p> <p>Note - A watercourse as defined in the Water Act may be accepted as a lawful point of discharge providing the drainage discharge from the site does not increase the downstream flood levels during events up to and including the 1% AEP storm. An afflux of +20mm may be accepted on Council controlled land and road infrastructure. No worsening is ensured when stormwater is discharged into a catchment that includes State Transport Infrastructure.</p>	<p>No example provided.</p>
<p>PO29</p> <p>Stormwater generated from the development does not compromise the capacity of existing stormwater infrastructure downstream of the site.</p> <p>Note - A downstream drainage discharge report in accordance with Planning scheme policy - Stormwater management may be required to demonstrate achievement of this performance outcome.</p>	<p>No example provided.</p>

<p>PO30</p> <p>Stormwater quality management systems are designed and constructed to minimise the environmental impact of stormwater discharge on surface and underground receiving water quality and meet the design objectives in Tables A and B in Appendix 2 of the SPP.</p> <p>Note – A stormwater management plan prepared by a suitably qualified professional will be required in accordance with Planning scheme policy – Stormwater management.</p> <p>Where development:</p> <ol style="list-style-type: none"> is for an urban purpose that involves a land area 2500m² or greater in size; and results in 6 or more dwellings; or results in an impervious area greater than 25% of the net developable area, <p>stormwater quality management systems are designed, constructed, established and maintained to minimise the environmental impact of stormwater on surface, groundwater and receiving water environments and meet the design objectives outlined in Schedule 10 - Stormwater management design objectives.</p> <p>Note - A site based stormwater management plan prepared by a suitably qualified professional will be required in accordance with Planning Scheme Policy - Stormwater Management. Stormwater quality infrastructure is to be design in accordance with Planning scheme policy - Integrated Design (Appendix C).</p>	<p>No example provided.</p>						
<p>PO31</p> <p>Easements for drainage purposes are provided over:</p> <ol style="list-style-type: none"> stormwater pipes located in freehold land if the pipe diameter exceeds 300mm; overland flow paths where they cross more than one property boundary. <p>Note – Refer to Planning scheme policy – Integrated design for details.</p> <p>Note – Stormwater Drainage easement dimensions are provided in accordance with Section 3.8.5 of QUDM.</p> <p>Stormwater drainage pipes and structures through or within private land (including inter-allotment drainage) are protected by easements in favour of Council with sufficient area for practical access for maintenance purposes.</p>	<p>E</p> <p>No example provided.</p> <p>Stormwater drainage infrastructure (excluding detention and bio-retention systems) through or within private land (including inter-allotment drainage) is protected by easements in favour of Council. Minimum easement widths are as follows:</p> <table border="1" data-bbox="810 1637 1466 2007"> <thead> <tr> <th>Pipe Diameter</th> <th>Minimum easement width (excluding access requirements)</th> </tr> </thead> <tbody> <tr> <td>Stormwater pipe up to 825mm diameter</td> <td>3.0m</td> </tr> <tr> <td>Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter</td> <td>4.0m</td> </tr> </tbody> </table>	Pipe Diameter	Minimum easement width (excluding access requirements)	Stormwater pipe up to 825mm diameter	3.0m	Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter	4.0m
Pipe Diameter	Minimum easement width (excluding access requirements)						
Stormwater pipe up to 825mm diameter	3.0m						
Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter	4.0m						

6 Zones

<p>Note - In order to achieve a lawful point of discharge, stormwater easements may also be required over temporary drainage channels/infrastructure where stormwater discharges to a balance lot prior to entering Council's stormwater drainage system.</p>	<table border="1" data-bbox="810 203 1468 356"> <tr> <td data-bbox="815 210 1134 349">Stormwater pipe greater than 825mm diameter</td> <td data-bbox="1139 210 1458 349">Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).</td> </tr> </table> <p>Note - Additional easement width may be required in certain circumstances in order to facilitate maintenance access to the stormwater system.</p> <p>Note - Refer to Planning Scheme Policy - Integrated Design (Appendix C) for easement requirements over open channels.</p>	Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).
Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).		
<p>PO</p> <p>Stormwater management facilities (excluding outlets) are located outside of riparian areas and prevent increased channel bed and bank erosion.</p>	<p>No example provided.</p>		

Site works and construction management	
<p>PO32</p> <p>The site and any existing structures are maintained in a tidy and safe condition.</p>	<p>No example provided.</p>
<p>PO33</p> <p>All works on-site are managed to:</p> <ol style="list-style-type: none"> minimise as far as practicable, impacts on adjoining or adjacent premises and the streetscape in regard to erosion and sedimentation, dust, noise, safety and light; minimise as far as possible, impacts on the natural environment; ensure stormwater discharge is managed in a manner that does not cause actionable nuisance or annoyance to any person or premises; avoid adverse impacts on street trees and their critical root zone. 	<p>E33.1</p> <p>Works incorporate temporary stormwater runoff, erosion and sediment controls and trash traps removal devices designed in accordance with the Urban Stormwater Quality Planning Guidelines, State Planning Policy, Schedule 10 - Stormwater management design objectives, Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design, including but not limited to the following:</p> <ol style="list-style-type: none"> stormwater is not discharged to adjacent properties in a manner that differs significantly from pre-existing conditions; stormwater discharged to adjoining and downstream properties does not cause scour and or erosion of any kind; stormwater discharge rates do not exceed pre-existing conditions; the 10% AEP storm event is the minimum design storm for all temporary diversion drains; and the 50% AEP storm event is the minimum design storm for all silt barriers and sedimentation basins.

	<p>f. minimum design storm for all temporary diversion drains and sedimentation basins in accordance with Schedule 10 - Stormwater management design objectives;</p> <p>g. ponding or concentration of stormwater does not occur in adjoining properties.</p>
	<p>E33.2</p> <p>Stormwater runoff, erosion and sediment controls are constructed in accordance with Planning scheme policy - Integrated design (Appendix C) prior to commencement of any clearing or earthworks and are maintained and adjusted as necessary at all times to ensure their ongoing effectiveness.</p> <p>Note - The measures are adjusted on-site to maximise their effectiveness.</p>
	<p>E33.3</p> <p>The completed earthworks area is stabilised using turf, established grass seeding, mulch or sprayed stabilisation techniques to control erosion and sediment and dust from leaving the property.</p>
	<p>E33.4</p> <p>Where works are proposed in proximity to an existing street tree, an inspection and a root management plan is undertaken by a qualified arborist which demonstrates and ensures that no permanent damage is caused to the tree:</p> <p>Existing street trees are protected and not damaged during works.</p> <p>Note - Where development occurs in the tree protection zone, measures and techniques as detailed in Australian Standard AS 4970 Protection of trees on development sites are adopted and implemented.</p>
<p>PO34</p> <p>Dust suppression measures are implemented during soil disturbances and construction works to protect nearby premises from unreasonable dust impacts.</p>	<p>E34</p> <p>No dust emissions extend beyond the boundaries of the site during soil disturbances and construction works.</p>
<p>PO35</p> <p>All development works on-site and including the transportation of material to and from the site are managed to not negatively impact the existing road network, the amenity of the surrounding area or the streetscape.</p>	<p>E35.1</p> <p>Construction traffic including contractor car parking is controlled in accordance with a traffic management plan, prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) to ensure all traffic movements to and from the site are safe.</p>

6 Zones

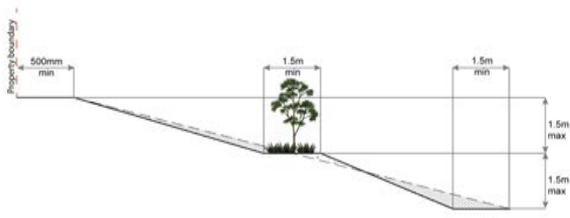

<p>Note – Where the amount of imported or exported material is greater than 50m³, a haulage route must be identified and approved by Council:</p> <p>Note - A Traffic Management Plan may be required to demonstrate compliance with this PO. A Traffic Management Plan is to be prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD).</p> <p>Note - A haulage route must be identified and approved by Council where imported or exported material is transported to the site via a road of Local Collector standard or less, and:</p> <ol style="list-style-type: none"> the aggregate volume of imported or exported material is greater than 1000m³; or the aggregate volume of imported or exported material is greater than 200m³ per day; or the proposed haulage route involves a vulnerable land use or shopping centre. <p>Note - A dilapidation report (including photographs) may be required for the haulage route to demonstrate compliance with this PO.</p> <p>Editor's note - Where associated with a State-controlled road, further requirements may apply, and approval may be required from the Department of Transport and Main Roads.</p>	<p>E35.2</p> <p>All contractor car parking is either provided on the development site, or on an alternative site in the general locality which has been set aside for car parking. Contractors vehicles are generally not to be parked in existing roads.</p> <p>Note – A Traffic Management Plan may be required for the site in accordance with the Manual of Uniform Traffic Control Devices (MUTCD):</p>
	<p>E35.3</p> <p>Any material dropped, deposited or spilled on the road(s) as a result of construction processes associated with the site are to be cleaned at all times.</p>
	<p>E</p> <p>Construction traffic to and from the development site uses the highest classification streets or roads where a choice of access routes is available. Haul routes for the transport of imported or spoil material and gravel pavement material along Council roads below sub-arterial standard must be approved routes.</p> <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p> <p>Note - A dilapidation report may be required to demonstrate compliance with this E.</p>
	<p>E</p> <p>Where works are carried out in existing roads, the works must be undertaken so that the existing roads are maintained in a safe and useable condition. Practical access for residents, visitors and services (including postal deliveries and refuse collection) is retained to existing lots during the construction period and after completion of the works.</p> <p>Note - A traffic control plan prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) will be required for any works that will affect access, traffic movements or traffic safety in existing roads.</p>
	<p>E</p> <p>Access to the development site is obtained via an existing lawful access point.</p>
<p>PO36</p>	<p>E36</p>

<p>All disturbed areas are to be progressively stabilised during construction and the entire site rehabilitated and substantially stabilised at the completion of construction.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details.</p>	<p>At completion of construction all disturbed areas of the site are to be:</p> <ol style="list-style-type: none"> topsoiled with a minimum compacted thickness of fifty (50) millimetres; grassed stabilised using turf, established grass seeding, mulch or sprayed stabilisation techniques. <p>Note - These areas are to be maintained during any maintenance period to maximise grass coverage from grass seeding of these areas:</p>
<p>PO</p> <p>Earthworks are undertaken to ensure that soil disturbances are staged into manageable areas.</p> <p>Note - A site specific Erosion and Sediment Control Plan (ESCP) will be required to demonstrate compliance with this PO. An ECP is to be prepared in accordance with Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design (Appendix C).</p>	<p>E</p> <p>Soil disturbances are staged into manageable areas of not greater than 3.5 ha.</p>
<p>PO37</p> <p>The clearing of vegetation on-site:</p> <ol style="list-style-type: none"> is limited to the area of infrastructure works, building areas and other necessary areas for the works; and includes the removal of declared weeds and other materials which are detrimental to the intended use of the land; is disposed of in a manner which minimises nuisance and annoyance to existing premises. <p>Note - No burning of cleared vegetation is permitted.</p>	<p>E37.1</p> <p>All native vegetation to be retained on-site is temporarily fenced or protected prior to and during development works.</p> <p>Note - No parking of vehicles of or storage of machinery or goods is to occur in these areas during development works.</p> <p>E37.2</p> <p>Disposal of materials is managed in one or more of the following ways:</p> <ol style="list-style-type: none"> all cleared vegetation, declared weeds, stumps, rubbish, car bodies, scrap metal and the like are removed and disposed of in a Council land fill facility; or all native vegetation with a diameter below 400mm is to be chipped and stored on-site. <p>Note - The chipped vegetation must be stored in an approved location, preferably a park or public land.</p>
<p>PO</p>	<p>E</p> <p>All development works are carried out within the following times:</p>

6 Zones

<p>All development works are carried out at times which minimise noise impacts to residents.</p>	<p>a. Monday to Saturday (other than public holidays) between 6:30am and 6:30pm on the same day;</p> <p>b. no work is to be carried out on Sundays or public holidays.</p> <p>Note - Work outside the above hours may be approved (in writing) where it can be demonstrated that the work will not cause significant inconvenience or disruption to the public, or the work is unlikely to cause annoyance or inconvenience to occupants of adjacent properties.</p>
<p>PO38</p> <p>Any alteration or relocation in connection with or arising from the development to any service, installation, plant, equipment or other item belonging to or under the control of the telecommunications authority, electricity authorities, the Council or other person engaged in the provision of public utility services is to be carried with the development and at no cost to Council.</p>	<p>No example provided.</p>

Earthworks	
<p>PO39</p> <p>On-site earthworks are designed to consider the visual and amenity impact as they relate to:</p> <ul style="list-style-type: none"> a. the natural topographical features of the site; b. short and long-term slope stability; c. soft or compressible foundation soils; d. reactive soils; e. low density or potentially collapsing soils; f. existing fill and soil contamination that may exist on-site; g. the stability and maintenance of steep rock slopes and batters; h. excavation (cut) and fill and impacts on the amenity of adjoining lots (e.g. residential). <p>Note – Filling or excavation works are to be completed within six months of the commencement date.</p>	<p>E39.1</p> <p>All cut and fill batters are provided with appropriate scour, erosion protection and run-off control measures including catch drains at the top of batters and lined batter drains as necessary.</p> <p>E39.2</p> <p>Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance of steep rock slopes and batters.</p> <p>E39.3</p> <p>Inspection and certification of steep rock slopes and batters is required by a suitably qualified and experienced RPEQ.</p> <p>E39.4</p> <p>All filling or excavation is contained on-site and is free draining.</p> <p>E39.5</p> <p>All fill placed on-site is:</p>

	<ul style="list-style-type: none"> a. limited to that area required for the necessary for the approved use; b. clean and uncontaminated (i.e. no building waste, concrete, green waste, actual acid sulfate soils, potential acid sulfate soils or contaminated material etc.) material is used as fill).
	<p>E39.6</p> <p>The site is prepared and the fill placed on-site in accordance with AS3798.</p> <p>Note - The fill is to be inspected and tested in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p>
<p>PO40</p> <p>Embankments are stepped, terraced and landscaped to not adversely impact on the visual amenity of the surrounding area.</p>	<p>E40</p> <p>Any embankments more than 1.5 metres in height are stepped, terraced and landscaped.</p> <p style="text-align: center;">Figure - Embankment</p> 
<p>PO41</p> <p>Filling or excavation is undertaken in a manner that:</p> <ul style="list-style-type: none"> a. does not adversely impact on a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land; b. does not preclude reasonable access to a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land for monitoring, maintenance or replacement purposes. <p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p>	<p>E41.1</p> <p>No filling or excavation is undertaken in an easement issued in favour of Council or a public sector entity.</p> <p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p>
	<p>E41.2</p> <p>Filling or excavation that would result in any of the following is not carried out on-site:</p> <ul style="list-style-type: none"> a. a reduction in cover over any Council or public sector entity infrastructure service to less than 600mm;

6 Zones

	<p>b. an increase in finished surface grade over, or within 1.5m on each side of, the Council or public sector entity infrastructure above that which existed prior to the earthworks being undertaken;</p> <p>c. prevent reasonable access to Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the site for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity as is defined in the Sustainable Planning Schedule 2 of the Act 2009.</p>
<p>PO42</p> <p>Filling or excavation does not result in land instability.</p> <p>Note - Steep rock slopes and batters are inspected and certified for long-term stability by a suitably qualified and experienced geotechnical engineer with RPEQ qualifications. Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance.</p>	<p>No example provided.</p>
<p>PO43</p> <p>Development Filling or excavation does not result in:</p> <ol style="list-style-type: none"> adverse impacts on the hydrological and hydraulic capacity of the waterway or floodway; increased flood inundation outside the site; any reduction in the flood storage capacity in the floodway; and any clearing of native vegetation. <p>Note - To demonstrate compliance with this outcome, Planning Scheme Policy - Stormwater Management provides guidance on the preparation of a site based stormwater management plan by a suitably qualified professional. Refer to Planning scheme policy - Integrated design for guidance on infrastructure design and modelling requirements.</p>	<p>No example provided.</p>
<p>PO</p> <p>Filling or excavation on the development site is undertaken in a manner which does not create or accentuate problems associated with stormwater flows and drainage systems on land adjoining the site.</p>	<p>E</p> <p>Filling and excavation undertaken on the development site are shaped in a manner which does not:</p> <ol style="list-style-type: none"> prevent stormwater surface flow which, prior to commencement of the earthworks, passed onto the development site, from entering the land; or redirect stormwater surface flow away from existing flow paths; or divert stormwater surface flow onto adjacent land, (other than a road), in a manner which: <ol style="list-style-type: none"> concentrates the flow; or

	<ul style="list-style-type: none"> ii. increases the flow rates of stormwater over the affected section of the adjacent land above the situation which existed prior to the diversion; or iii. causes actionable nuisance to any person, property or premises.
--	--

Retaining walls and structures

PO44

All earth retaining structures provide a positive interface with the streetscape and minimise impacts on the amenity of adjoining residents.

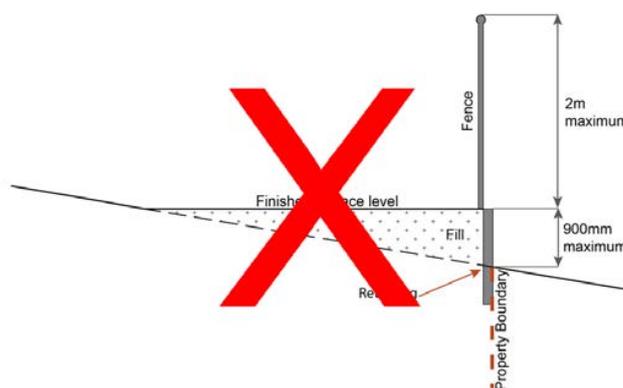

Note - Refer to Planning scheme policy - Residential design for guidance on how to achieve compliance with this performance outcome.

E44

Earth retaining structures:-

- a. **are not constructed of boulder rocks or timber;**
- b. **where height is no greater than 900mm, are provided in accordance with Figure - Retaining on a boundary;**

Figure - Retaining on boundary

- c. **where height is greater than 900mm but no greater than 1.5m, are to be setback at least the equivalent height of the retaining structure from any property boundary;**
- d. **where height is greater than 1.5m, are to be setback and stepped 1.5m vertical: 1.5m horizontal, terraced, landscaped and drained as shown below.**

Figure - Cut

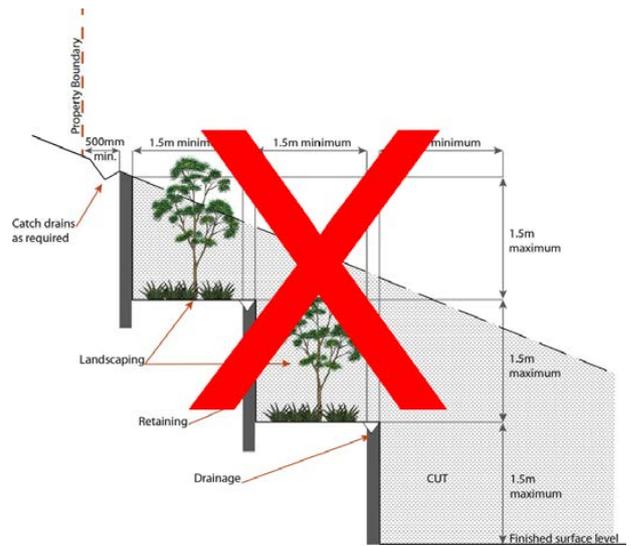

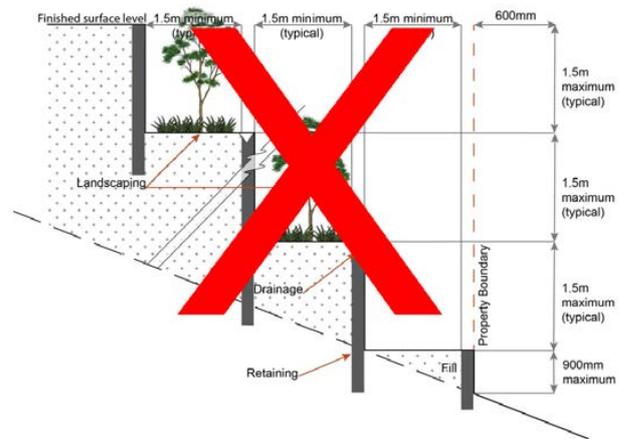

Figure--Fill

Filling or excavation does not:

- a. **involve a change in level of more than 1.0m relative to natural ground level;**

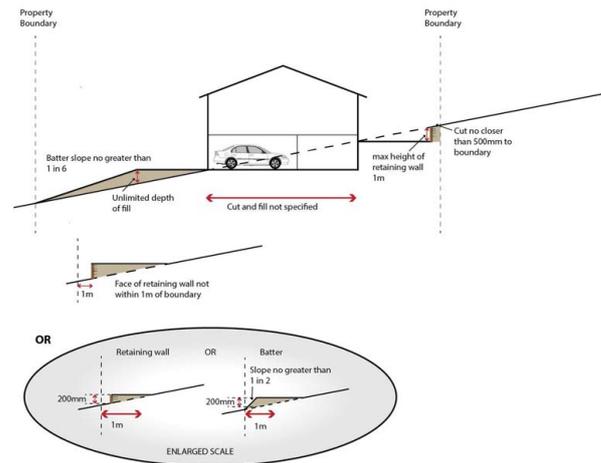

OR

- b. **necessitate the construction of a freestanding retaining wall exceeding 1.0m in height relative to finished ground level;**

- c. result in the top of any cut batter, or the exposed face of any freestanding retaining wall supporting that cut, being closer than 500mm to a property boundary;
- d. result in the toe of any fill batter, or exposed face of any freestanding retaining wall supporting that fill, being closer than 1.0m to a property boundary unless:
 - i. the depth of fill within the 1.0m strip does not exceed 200mm relative to natural ground level; or
 - ii. the batter slope within that 1.0m strip is no steeper than 1V to 2H.

THE NEW FIGURE BELOW IS PROPOSED AS PART OF THIS AMENDMENT

Figure - Filling or Excavation

PO

All earth retaining structures are to be certified as being designed and constructed in accordance with relevant Australian Standards and Building Code requirements.

E

Retaining walls are designed and certified by a RPEQ so that:

- a. the minimum design life (the period assumed in design for which a structure or structural element is required to perform its intended purpose without replacement or major structural repairs) for the earth retaining structure is that specified in Australian Standard AS 4678 Earth-retaining structures;
- b. earth retaining structures within the land and around areas of cut on or near the boundaries of the site must be designed to allow for live and dead loads associated with the land/premise's current occupancy and use;

6 Zones

	<p>c. where the adjoining land use rights or zoning allows for industrial uses a minimum live load of 25kPA must be allowed in the design of the retaining structure for these adjoining premises.</p> <p>Note - Retaining walls will only be approved following submission of a full detailed design certified by a RPEQ.</p>
--	--

Fire Services

Note - The provisions under this heading only apply if:

- a. the development is for, or incorporates:
 - i. reconfiguring a lot for a community title scheme creating 1 or more vacant lots; or
 - ii. material change of use for 2 or more sole occupancy units on the same lot, or within the same community titles scheme; or
 - iii. material change of use for a Tourist park⁽⁸⁴⁾ with accommodation in the form of caravans or tents; or
 - iv. material change of use for outdoor sales⁽⁵⁴⁾, outdoor processing or outdoor storage where involving combustible materials.

AND

- b. none of the following exceptions apply:
 - i. the distributor-retailer for the area has indicated, in its netserv plan, that the premises will not be served by that entity's reticulated water supply; or
 - ii. every part of the development site is within 60m walking distance of an existing fire hydrant on the distributor-retailer's reticulated water supply network, measured around all obstructions, either on or adjacent to the site.

Note - The provisions under this heading do not apply to buildings that are required by the Building Code of Australia to have a fire hydrant system complying with Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations or other fire fighting facilities which provide equivalent protection.

<p>PO45</p> <p>Development incorporates a fire fighting system that:</p> <ul style="list-style-type: none"> a. satisfies the reasonable needs of the fire fighting entity for the area; b. is appropriate for the size, shape and topography of the development and its surrounds; c. is compatible with the operational equipment available to the fire fighting entity for the area; d. considers the fire hazard inherent in the materials comprising the development and their proximity to one another; e. considers the fire hazard inherent in the surrounds to the development site; f. is maintained in effective operating order. <p>Note - The Queensland Fire and Emergency Services is the entity currently providing the fire fighting function for the urban areas of the Moreton Bay Region.</p>	<p>E45.1</p> <p>External fire hydrant facilities are provided on site to the standard prescribed under the relevant parts of <i>Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations</i>.</p> <p>Note - For this requirement for accepted development, the following are the relevant parts of AS 2419.1 (2005) that may be applicable:</p> <ul style="list-style-type: none"> a. in regard to the form of any fire hydrant - Part 8.5 and Part 3.2.2.1, with the exception that for Tourist parks⁽⁸⁴⁾ or development comprised solely of dwellings and their associated outbuildings, single outlet above-ground hydrants or suitably signposted in-ground hydrants would be an acceptable alternative; b. in regard to the general locational requirements for fire hydrants - Part 3.2.2.2 (a), (e), (f), (g) and (h) as well as Appendix B of AS 2419.1 (2005); c. in regard to the proximity of hydrants to buildings and other facilities - Part 3.2.2.2 (b), (c) and (d), with the exception that: <ul style="list-style-type: none"> i. for dwellings and their associated outbuildings, hydrant coverage need only extend to the roof and external walls of those buildings; ii. for caravans and tents, hydrant coverage need only extend to the roof of those tents and caravans; iii. for outdoor sales⁽⁵⁴⁾, processing or storage facilities, hydrant coverage is required across the entire area of
---	--

	<p>the outdoor sales⁽⁵⁴⁾, outdoor processing and outdoor storage facilities;</p> <p>d. in regard to fire hydrant accessibility and clearance requirements - Part 3.5 and, where applicable, Part 3.6.</p> <hr/> <p>E45.2</p> <p>A continuous path of travel having the following characteristics is provided between the vehicle access point to the site and each external fire hydrant and hydrant booster point on the land:</p> <p>a. an unobstructed width of no less than 3.5m;</p> <p>b. an unobstructed height of no less than 4.8m;</p> <p>c. constructed to be readily traversed by a 17 tonne HRV fire brigade pumping appliance;</p> <p>d. an area for a fire brigade pumping appliance to stand within 20m of each fire hydrant and 8m of each hydrant booster point.</p> <hr/> <p>E45.3</p> <p>On-site fire hydrant facilities are maintained in effective operating order in a manner prescribed in <i>Australian Standard AS1851 (2012) – Routine service of fire protection systems and equipment</i>.</p>
<p>PO46</p> <p>On-site fire hydrants that are external to buildings, as well as the available fire fighting appliance access routes to those hydrants, can be readily identified at all times from, or at, the vehicular entry point to the development site.</p>	<p>E46</p> <p>For development that contains on-site fire hydrants external to buildings:</p> <p>a. those external hydrants can be seen from the vehicular entry point to the site; or</p> <p>b. a sign identifying the following is provided at the vehicular entry point to the site:</p> <p>i. the overall layout of the development (to scale);</p> <p>ii. internal road names (where used);</p> <p>iii. all communal facilities (where provided);</p> <p>iv. the reception area and on-site manager's office (where provided);</p> <p>v. external hydrants and hydrant booster points;</p> <p>vi. physical constraints within the internal roadway system which would restrict access by fire fighting appliances to external hydrants and hydrant booster points.</p> <p>Note - The sign prescribed above, and the graphics used are to be:</p>

6 Zones

	<ul style="list-style-type: none"> a. in a form; b. of a size; c. illuminated to a level; <p>which allows the information on the sign to be readily understood, at all times, by a person in a fire fighting appliance up to 4.5m from the sign.</p>
<p>PO47</p> <p>Each on-site fire hydrant that is external to a building is signposted in a way that enables it to be readily identified at all times by the occupants of any firefighting appliance traversing the development site.</p>	<p>E47</p> <p>For development that contains on-site fire hydrants external to buildings, those hydrants are identified by way of marker posts and raised reflective pavement markers in the manner prescribed in the technical note <i>Fire hydrant indication system</i> produced by the Queensland Department of Transport and Main Roads.</p> <p>Note - Technical note Fire hydrant indication system is available on the website of the Queensland Department of Transport and Main Roads.</p>
Use specific criteria	
Caretaker's accommodation⁽¹⁰⁾	
<p>PO48</p> <p>Development for a Caretaker's accommodation⁽¹⁰⁾:</p> <ul style="list-style-type: none"> a. does not compromise the productivity of the use; b. is domestic in scale; c. provides adequate car parking provisions exclusive to the primary use of the site; d. is safe for the residents; e. has regards to the landscape and private recreation needs of the resident. 	<p>E48</p> <p>Caretaker's accommodation⁽¹⁰⁾:</p> <ul style="list-style-type: none"> a. has a maximum GFA of 80m²; b. no more than 1 caretaker's accommodation⁽¹⁰⁾ is established per site; c. does not gain access from a separate driveway to the main use on the site; d. provides a minimum 16m² of private open space directly accessible from a habitable room; e. provides car parking in accordance with Schedule 7 - Car parking.
Club⁽¹⁴⁾	
<p>PO49</p> <p>Development will be of a low scale and intensity that;</p> <ul style="list-style-type: none"> a. maintains its subordinate function and nexus to the motor sport facility⁽⁴⁸⁾; b. does not interfere with operation of the motor sport facility⁽⁴⁸⁾. 	No example provided.

Food and drink outlet⁽²⁸⁾	
PO50 Development does not involve the use of a drive-through facility.	No example provided.
Major electricity infrastructure⁽⁴³⁾, Substation⁽⁸⁰⁾ and Utility installation⁽⁸⁶⁾	
PO51 The development does not have an adverse impact on the visual amenity of a locality and is: a. high quality design and construction; b. visually integrated with the surrounding area; c. not visually dominant or intrusive; d. located behind the main building line; e. below the level of the predominant tree canopy or the level of the surrounding buildings and structures; f. camouflaged through the use of colours and materials which blend into the landscape; g. treated to eliminate glare and reflectivity; h. landscaped; i. otherwise consistent with the amenity and character of the zone and surrounding area.	E51.1 Development is designed to minimise surrounding land use conflicts by ensuring infrastructure, buildings, structures and other equipment: a. are enclosed within buildings or structures; b. are located behind the main building line; c. have a similar height, bulk and scale to the surrounding fabric; d. have horizontal and vertical articulation applied to all exterior walls.
	E51.2 A minimum 3m wide strip of dense planting is provided around the outside of the fenced area, between the development and street frontage, side and rear boundaries.
PO52 Infrastructure does not have an impact on pedestrian health and safety.	E52 Access control arrangements: a. do not create dead-ends or dark alleyways adjacent to the infrastructure; b. minimise the number and width of crossovers and entry points; c. provide safe vehicular access to the site; d. do not utilise barbed wire or razor wire.
PO53 All activities associated with the development occur within an environment incorporating sufficient controls to ensure the facility: a. generates no audible sound at the site boundaries where in a residential setting; or b. meet the objectives as set out in the Environmental Protection (Noise) Policy 2008.	E53 All equipment which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure noise emissions meet the objectives as set out in the Environmental Protection (Noise) Policy 2008.
Motor sport facility⁽⁴⁸⁾	
PO54 Development will: a. ensure safety of people and property;	No example provided.

6 Zones

<ul style="list-style-type: none"> b. minimise amenity impacts including noise nuisance to sensitive land uses; c. minimise noise impacts on wildlife outside of daylight hours; d. ensure development is consistent with objectives setout in Planning scheme policy - Noise. 	
<p>Telecommunications facility⁽⁸¹⁾</p> <p>Editor's note - In accordance with the Federal legislation Telecommunications facilities⁽⁸¹⁾ must be constructed and operated in a manner that will not cause human exposure to electromagnetic radiation beyond the limits outlined in the Radiocommunications (Electromagnetic Radiation - Human Exposure) Standard 2003 and Radio Protection Standard for Maximum Exposure Levels to Radiofrequency Fields - 3Khz to 300Ghz.</p>	
<p>PO55</p> <p>Telecommunications facilities⁽⁸¹⁾ are co-located with existing telecommunications facilities⁽⁸¹⁾, Utility installation⁽⁸⁶⁾, Major electricity infrastructure⁽⁴³⁾ or Substation⁽⁸⁰⁾ if there is already a facility in the same coverage area.</p>	<p>E55.1</p> <p>New telecommunication facilities⁽⁸¹⁾ are co-located on existing towers with new equipment shelter and associated structures positioned adjacent to the existing shelters and structures.</p> <p>E55.2</p> <p>If not co-located with an existing facility, all co-location opportunities have been investigated and fully exhausted within a 2km radius of the site.</p>
<p>PO56</p> <p>A new Telecommunications facility⁽⁸¹⁾ is designed and constructed to ensure co-masting or co-siting with other carriers both on the tower or pole and at ground level is possible in the future.</p>	<p>E56</p> <p>A minimum area of 45m² is available at ground level to allow for additional equipment shelters and associated structures for the purpose of co-locating on the proposed facility.</p>
<p>PO57</p> <p>Telecommunications facilities⁽⁸¹⁾ do not conflict with lawful existing land uses both on and adjoining the site.</p>	<p>E57</p> <p>The development results in no net reduction in the minimum quantity and standard of landscaping, private or communal open space or car parking spaces required under the planning scheme or under an existing development approval.</p>
<p>PO58</p> <p>The Telecommunications facility⁽⁸¹⁾ does not have an adverse impact on the visual amenity of a locality and is:</p> <ul style="list-style-type: none"> a. high quality design and construction; b. visually integrated with the surrounding area; c. not visually dominant or intrusive; d. located behind the main building line; e. below the level of the predominant tree canopy or the level of the surrounding buildings and structures; 	<p>E58.1</p> <p>Where in an urban area, the development does not protrude more than 5m above the level of the existing treeline, prominent ridgeline or building rooftops in the surrounding townscape.</p> <p>E58.2</p> <p>In all other areas towers do not exceed 35m in height.</p>

<p>f. camouflaged through the use of colours and materials which blend into the landscape;</p> <p>g. treated to eliminate glare and reflectivity;</p> <p>h. landscaped;</p> <p>i. otherwise consistent with the amenity and character of the zone and surrounding area.</p>	<p>E58.3</p> <p>Towers, equipment shelters and associated structures are of a design, colour and material to:</p> <p>a. reduce recognition in the landscape;</p> <p>b. reduce glare and reflectivity.</p> <hr/> <p>E58.4</p> <p>All structures and buildings are setback behind the main building line and a minimum of 10m from side and rear boundaries, except where in the Industry and Extractive industry zones, the minimum side and rear setback is 3m.</p> <p>Where there is no established building line the facility is located at the rear of the site.</p> <hr/> <p>E58.5</p> <p>The facility is enclosed by security fencing or by other means to ensure public access is prohibited.</p> <hr/> <p>E58.6</p> <p>A minimum 3m wide strip of dense planting is provided around the perimeter of the fenced area, between the facility and street frontage and adjoining uses.</p> <p>Note - Landscaping is provided in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person, to ensure compliance with Planning scheme policy - Integrated design.</p>
<p>PO59</p> <p>Lawful access is maintained to the site at all times that does not alter the amenity of the landscape or surrounding uses.</p>	<p>E59</p> <p>An Access and Landscape Plan demonstrates how 24 hour vehicular access will be obtained and maintained to the facility in a manner that is appropriate to the site's context.</p>
<p>PO60</p> <p>All activities associated with the development occur within an environment incorporating sufficient controls to ensure the facility generates no audible sound at the site boundaries where in a residential setting.</p>	<p>E60</p> <p>All equipment comprising the Telecommunications facility⁽⁸¹⁾ which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure no noise from this equipment can be heard, or felt at the site boundary.</p>
<p>Values and constraints criteria</p>	

6 Zones

Note - The relevant values and constraints criteria do not apply where the development is consistent with a current Development permit for Reconfiguring a lot or Material change of use or Operational work, where that approval has considered and addressed (e.g. through a development footprint plan (or similar in the case of Landslide hazard) or conditions of approval) the identified value or constraint under this planning scheme.

Acid sulfate soils - (refer Overlay map - Acid sulfate soils to determine if the following assessment criteria apply)

Note - To demonstrate achievement of the performance outcome, an Acid sulfate soils (ASS) investigation report and soil management plan is prepared by a qualified engineer. Guidance for the preparation an ASS investigation report and soil management plan is provided in Planning scheme policy - Acid sulfate soils.

PO61

Development avoids disturbing acid sulfate soils. Where development disturbs acid sulfate soils, development:

- a. is managed to avoid or minimise the release of surface or groundwater flows containing acid and metal contaminants into the environment;
- b. protects the environmental and ecological values and health of receiving waters;
- c. protects buildings and infrastructure from the effects of acid sulfate soils.

E61

Development does not involve:

- a. excavation or otherwise removing of more than 100m³ of soil or sediment where below than 5m Australian Height datum AHD; or
- b. filling of land of more than 500m³ of material with an average depth of 0.5m or greater where below the 5m Australian Height datum AHD.

Bushfire hazard (refer Overlay map - Bushfire hazard to determine if the following assessment criteria apply)

Note - To demonstrate achievement of the performance outcomes, a bushfire management plan is prepared by a suitably qualified person. Guidance for the preparation of a bushfire management plan is provided in Planning scheme policy – Bushfire prone areas.

Note - Unacceptable risk is defined as a situation where people or property are exposed to a predictable hazard event that may result in serious injury, loss of life, failure of community infrastructure, or property damage.

PO62

Development:

- a. minimises the number of buildings and people working and living on a site exposed to bushfire risk;
- b. ensures the protection of life during the passage of a fire front;
- c. is located and designed to increase the chance of survival of buildings and structures during a bushfire;
- d. minimises bushfire risk from build up of fuels around buildings and structures;
- e. ensure safe and effective access for emergency services during a bushfire.

E62.1

Buildings and structures are:

- a. not located on a ridgeline;
- b. not located on land with a slope greater than 15% (see Overlay map - Landslide hazard);
- c. dwellings are located on east to south facing slopes.

E62.2

Buildings and structures have contained within the site:

- a. a separation from classified vegetation of 20m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater;
- b. a separation from low threat vegetation of 10m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater;

	<ul style="list-style-type: none"> c. a separation of no less than 10m between a fire fighting water supply extraction point and any classified vegetation, buildings and other roofed structures; d. an area suitable for a standard fire fighting appliance to stand within 3m of a fire fighting water supply extraction point; and e. an access path suitable for use by a standard fire fighting appliance having a formed width of at least 4m, a cross-fall of no greater than 5%, and a longitudinal gradient of no greater than 25%: <ul style="list-style-type: none"> i. to, and around, each building and other roofed structure; and ii. to each fire fighting water supply extraction point. <p>Note - The meaning of the terms classified vegetation and low threat vegetation as well as the method of calculating the bushfire attack level are as described in Australian Standard AS 3959</p>
<p>PO63</p> <p>Development and associated driveways and access ways:</p> <ul style="list-style-type: none"> a. avoid potential for entrapment during a bushfire; b. ensure safe and effective access for emergency services during a bushfire; c. enable safe evacuation for occupants of a site during a bushfire. 	<p>E63</p> <p>A length of driveway:</p> <ul style="list-style-type: none"> a. to a road does not exceed 100m between the most distant part of a building used for any purpose other than storage and the nearest part of a public road; b. has a maximum gradient no greater than 12.5%; c. have a minimum width of 3.5m; d. accommodate turning areas for fire fighting appliances in accordance with Qld Fire and Emergency Services' Fire Hydrant and Vehicle Access Guideline.
<p>PO64</p> <p>Development provides an adequate water supply for fire-fighting purposes.</p>	<p>E64</p> <ul style="list-style-type: none"> a. a reticulated water supply is provided by a distributor retailer for the area or; b. where not connected to a reticulated water supply, on-site fire fighting water storage containing not less than 10 000 litres (tanks with fire brigade tank fittings, swimming pools) is located within 10m of buildings and structures. c. Where a swimming pool is the nominated on-site fire fighting water storage source, vehicle access is provided to within 3m of that water storage source. d. Where a tank is the nominated on-site fire fighting water storage source, it includes: <ul style="list-style-type: none"> i. a hardstand area allowing medium rigid vehicles (15 tonne fire appliance) access within 6m of the tank; ii. fire brigade tank fittings, comprising 50mm ball valve and male camlock coupling and, if underground, an access hole of 200mm (minimum) to accommodate suction lines.

6 Zones

<p>PO65</p> <p>Development:</p> <ol style="list-style-type: none"> a. does not present unacceptable risk to people or environment due to the impact of bushfire on dangerous goods or combustible liquids; b. does not present danger or difficulty to emergency services for emergency response or evacuation. <p>Editor's note - Unacceptable risk is defined as a situation where people or property are exposed to a predictable hazard event that may result in serious injury, loss of life, failure of community infrastructure, or property damage.</p>	<p>E65</p> <p>Development does not involve the manufacture or storage of hazardous chemicals.</p>
<p>Environmental areas (refer Overlay map - Environmental areas to determine if the following assessment criteria apply)</p> <p>Note – The following are excluded from the native vegetation clearing provisions of this planning scheme:</p> <ol style="list-style-type: none"> a. Clearing of native vegetation located within an approved development footprint; b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental Management and Conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence; e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes; f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council; g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens; h. Grazing of native pasture by stock; i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development <p>Note - Definition for native vegetation is located in Schedule 1 Definitions.</p> <p>Note - Native vegetation subject to this criteria primarily comprises of matters of national environmental significance (MNES), matters of state environmental significance (MSES). They also comprise some matters of local environmental significance (MLES). A MLES is defined in Schedule 1.2, Administrative definitions. A list of the elements that apply to the mapped MSES and MLES is provided in Appendix 1 of the Planning scheme policy - Environmental areas.</p> <p>Editors' Note - The accuracy of overlay mapping can be challenged through the development application process (code assessable development) or by way of a planning scheme amendment. See Council's website for details.</p> <p>Note - To demonstrate achievement of the performance outcome, an ecological assessment, vegetation management plan and fauna management plan, as required, are prepared by a suitably qualified person. Guidance for the preparation of above mentioned reports is provided in Planning scheme policy - Environmental areas.</p>	
<p>Vegetation clearing, ecological value and connectivity</p>	

<p>PO66</p> <p>Development avoids locating in a High Value Area or a Value Offset Area. Where it is not practicable or reasonable for development to avoid establishing in these areas, development must ensure that:</p> <ol style="list-style-type: none"> a. the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area is maintained and not lost or degraded; b. on-site mitigation measures, mechanisms or processes are in place demonstrating the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area are maintained. For example, this can be achieved through replacement, restoration or rehabilitation planting as part of any proposed covenant, the development of a Vegetation Management Plan, a Fauna Management Plan, and any other on-site mitigation options identified in the Planning scheme policy - Environmental areas*. <p>* Editor's note - This is not a requirement for an environmental offset under the Environmental Offsets Act 2014.</p>	No example provided.
<p>PO67</p> <p>Development provides for safe, unimpeded, convenient and ongoing wildlife movement and establishes and maintains habitat connectivity by:</p> <ol style="list-style-type: none"> a. retaining habitat trees; b. providing contiguous patches of habitat; c. provide replacement and rehabilitation planting to improve connectivity; d. avoiding the creation of fragmented and isolated patches of habitat; e. providing wildlife movement infrastructure. <p>Editor's note - Wildlife movement infrastructure may include refuge poles, tree boulevarding, 'stepping stone' vegetation plantings, tunnels, appropriate wildlife fencing; culverts with ledges, underpasses, overpasses, land bridges and rope bridges. Further information is provided in Planning scheme policy – Environmental areas.</p>	No example provided.
Vegetation clearing and habitat protection	
<p>PO68</p> <p>Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected.</p>	No example provided.
<p>PO69</p>	No example provided.

6 Zones

<p>Development does not result in the net loss or degradation of habitat value in a High Value Area or a Value Offset Area. Where development does result in the loss or degradation of habitat value, development will:</p> <ul style="list-style-type: none"> a. rehabilitate, revegetate, restore and enhance an area to ensure it continues to function as a viable and healthy habitat area; b. provide replacement fauna nesting boxes in the event of habitat tree loss in accordance with Planning scheme policy - Environmental areas; c. undertake rehabilitation, revegetation and restoration in accordance with the South East Queensland Ecological Restoration Framework. 	
<p>PO70</p> <p>Development ensures safe, unimpeded, convenient and ongoing wildlife movement and habitat connectivity by:</p> <ul style="list-style-type: none"> a. providing contiguous patches of habitat; b. avoiding the creation of fragmented and isolated patches of habitat; c. providing wildlife movement infrastructure; d. providing replacement and rehabilitation planting to improve connectivity. 	<p>No example provided.</p>
<p>Vegetation clearing and soil resource stability</p>	
<p>PO71</p> <p>Development does not:</p> <ul style="list-style-type: none"> a. result in soil erosion or land degradation; b. leave cleared land exposed for an unreasonable period of time but is rehabilitated in a timely manner. 	<p>No example provided.</p>
<p>Vegetation clearing and water quality</p>	
<p>PO72</p> <p>Development maintains or improves the quality of groundwater and surface water within, and downstream, of a site by:</p> <ul style="list-style-type: none"> a. ensuring an effective vegetated buffers and setbacks from waterbodies is retained to achieve natural filtration and reduce sediment loads; b. avoiding or minimising changes to landforms to maintain hydrological water flows; c. adopting suitable measures to exclude livestock from entering a waterbody where a site is being used for animal husbandry⁽⁴⁾ and animal keeping⁽⁵⁾ activities. 	<p>No example provided.</p>
<p>PO73</p> <p>Development minimises adverse impacts of stormwater run-off on water quality by:</p>	<p>No example provided.</p>

<ul style="list-style-type: none"> a. minimising flow velocity to reduce erosion; b. minimising hard surface areas; c. maximising the use of permeable surfaces; d. incorporating sediment retention devices; e. minimising channelled flow. 	
Vegetation clearing and access, edge effects and urban heat island effects	
<p>PO74</p> <p>Development retains safe and convenient public access in a manner that does not result in the adverse edge effects or the loss or degradation of biodiversity values within the environment.</p>	No example provided.
<p>PO75</p> <p>Development minimises potential adverse 'edge effects' on ecological values by:</p> <ul style="list-style-type: none"> a. providing dense planting buffers of native vegetation between a development and environmental areas; b. retaining patches of native vegetation of greatest possible size where located between a development and environmental areas ; c. restoring, rehabilitating and increasing the size of existing patches of native vegetation; d. ensuring that buildings and access (public and vehicle) are setback as far as possible from environmental areas and corridors; e. landscaping with native plants of local origin. <p>Editor's note - Edge effects are factors of development that go to detrimentally affecting the composition and density of natural populations at the fringe of natural areas. Factors include weed invasion, pets, public and vehicle access, nutrient loads, noise and light pollution, increased fire frequency and changes in the groundwater and surface water flow.</p>	No example provided.
<p>PO76</p> <p>Development avoids adverse microclimate change and does not result in increased urban heat island effects. Adverse urban heat island effects are minimised by:</p> <ul style="list-style-type: none"> a. pervious surfaces; b. providing deeply planted vegetation buffers and green linkage opportunities; c. landscaping with local native plant species to achieve well-shaded urban places; d. increasing the service extent of the urban forest canopy. 	No example provided.
Vegetation clearing and Matters of Local Environmental Significance (MLES) environmental offsets	
PO77	No example provided.

6 Zones

<p>Where development results in the unavoidable loss of native vegetation within a Value Offset Area MLES waterway buffer or a Value Offset Area MLES wetland buffer, an environmental offset is required in accordance with the environmental offset requirements identified in Planning scheme policy - Environmental areas.</p> <p>Editor's note - For MSES Koala Offsets, the environmental offset provisions in Schedule 11 of the Regulation, in combination with the requirements of the Environmental Offsets Act 2014, apply.</p>	
<p>Heritage and landscape character (refer Overlay map - Heritage and landscape character to determine if the following assessment criteria apply)</p> <p>Note - To assist in demonstrating achievement of heritage performance outcomes, a Cultural heritage impact assessment report is prepared by a suitably qualified person verifying the proposed development is in accordance with The Australia ICOMOS Burra Charter.</p> <p>Note - To assist in demonstrating achievement of this performance outcome, a Tree assessment report is prepared by a qualified arborist in accordance with Planning scheme policy – Heritage and landscape character. The Tree assessment report will also detail the measures adopted in accordance with AS 4970-2009 Protection of trees on development sites.</p> <p>Note - Places, including sites, objects and buildings having local cultural heritage significance, are identified on Overlay map - Heritage and landscape character and listed in Schedule 1 of Planning scheme policy - Heritage and landscape character. Places also having cultural heritage significance at a State level and being entered in the Queensland Heritage Register, are also identified in Schedule 1 of Planning scheme policy - Heritage and landscape character.</p>	
<p>PO78</p> <p>Development will:</p> <ol style="list-style-type: none"> not diminish or cause irreversible damage to the cultural heritage values present on the site, and associated with a heritage site, object or building; protect the fabric and setting of the heritage site, object or building; be consistent with the form, scale and style of the heritage site, object or building; utilise similar materials to those existing, or where this is not reasonable or practicable, neutral materials and finishes; incorporate complementary elements, detailing and ornamentation to those present on the heritage site, object or building; retain public access where this is currently provided. 	<p>E78</p> <p>Development is for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value.</p> <p>Note - A cultural heritage conservation management plan for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value is prepared in accordance with Planning scheme policy - Heritage and landscape character. The plan is sent to, and approved by Council prior to the commencement of any preservation, maintenance, repair and restoration works.</p>
<p>PO79</p> <p>Demolition and removal is only considered where:</p> <ol style="list-style-type: none"> a report prepared by a suitably qualified conservation architect or conservation engineer demonstrates that the building is structurally unsound and is not reasonably capable of economic repair; or demolition is confined to the removal of outbuildings, extensions and alterations that are not part of the original structure; or 	<p>No example provided.</p>

<ul style="list-style-type: none"> c. limited demolition is performed in the course of repairs, maintenance or restoration; or d. demolition is performed following a catastrophic event which substantially destroys the building or object. 	
<p>PO80</p> <p>Where development is occurring on land adjoining a site of cultural heritage value, the development is to be sympathetic to and consistent with the cultural heritage values present on the site and not result in their values being eroded, degraded or unreasonably obscured from public view.</p>	<p>No example provided.</p>
<p>PO81</p> <p>Development does not adversely impact upon the health and vitality of significant trees. Where development occurs in proximity to a significant tree, construction measures and techniques as detailed in AS 4970-2009 Protection of trees on development sites are adopted to ensure a significant tree's health, wellbeing and vitality.</p> <p>Significant trees are only removed where they are in a poor state of health or where they pose a health and safety risk to persons or property. A Tree Assessment report prepared by a suitably qualified arborist confirming a tree's state of health is required to demonstrate achievement of this performance outcome.</p>	<p>E81</p> <p>Development does:</p> <ul style="list-style-type: none"> a. not result in the removal of a significant tree; b. not occur within 20m of a protected tree; c. involve pruning of a tree in accordance with Australian Standard AS 4373-2007 – Pruning of Amenity Trees.
<p>Landslide hazard (refer Overlay map - Landslide hazard to determine if the following assessment criteria apply)</p> <p>Note - To demonstrate achievement of the performance outcomes, a site-specific geotechnical assessment report is prepared by a qualified engineer. Guidance for the preparation of a geotechnical assessment report is provided in Planning scheme policy – Landslide hazard.</p>	
<p>PO82</p> <p>Development:</p> <ul style="list-style-type: none"> a. maintains the safety of people and property on a site and neighbouring sites from landslides; b. ensures the long-term stability of the site considering the full nature and end use of the development; c. ensures site stability during all phases of construction and development; d. minimises disturbance of natural drainage patterns of the site and does not result in the redirection or alteration of the existing flow of surface or groundwater e. minimises adverse visual impacts on the amenity of adjoining residents and provides a positive interface with the streetscape. 	<p>E82</p> <p>Development does not:</p> <ul style="list-style-type: none"> a. involve earthworks exceeding 50m³; b. involve cut and fill having a height greater than 600mm; c. involve any retaining wall having a height greater than 600mm; d. redirect or alter the existing flow of surface or groundwater.
<p>PO83</p>	<p>E83</p>

6 Zones

<p>Buildings are designed to respond to sloping topography in the siting, design and form of buildings and structures by:</p> <ol style="list-style-type: none"> minimising overuse of cut and fill to create single flat pads and benching; avoiding expanses of retaining walls, loss of trees and vegetation and interference with natural drainage systems; minimising any adverse visual impact on the landscape character ; Protect the amenity of adjoining properties. 	<p>Buildings, excluding domestic outbuildings:</p> <ol style="list-style-type: none"> are split-level, multiple-slab, pier or pole construction; are not single plane slab on ground.
<p>PO84</p> <p>Development protects the safety of people, property and the environment from the impacts of landslide on hazardous chemicals manufactured, handled or stored by incorporating design measures to ensure:</p> <ol style="list-style-type: none"> the long-term stability of the development site considering the full nature and end use of the development; site stability during all phases of construction and development; the development is not adversely affected by landslide activity originating on sloping land above the site; emergency access and access from the site for the public and emergency vehicles is available and is not at risk from landslide. 	<p>E84</p> <p>Development does not involve the manufacture, handling or storage of hazardous chemicals.</p>
<p>Infrastructure buffers (refer Overlay map - Infrastructure buffers to determine if the following assessment criteria apply)</p>	
<p>PO85</p> <p>Development within a Water supply buffer captures solid or liquid waste from all land use, development and activities is designed, constructed and managed to prevent the release of contaminants to surface water or groundwater bodies.</p>	<p>E85.1</p> <p>Run-off and sediment from roadways and impervious surfaces within a Water supply buffer are intercepted and treated on-site to remove oil, grease, chemicals, silt, trace metals and nutrients such as nitrogen and phosphorous.</p>
	<p>E85.2</p> <p>Incineration or burial of waste within a Water supply buffer is not undertaken onsite.</p>
	<p>E85.3</p> <p>Solid waste within a Water supply buffer is collected and stored in weather proof, sealed waste receptacles, located in roofed and bunded areas, for disposal by a licenced contractor.</p>
	<p>E85.4</p>

	<p>Holding tanks within a Water supply buffer are used for all liquid waste and provide for the separation of oils/solvents and solids prior to pump-out and collection by a licenced contractor.</p>
	<p>E85.5</p> <p>Management, handling and storage of hazardous chemicals (including fuelling of vehicles) within a Water supply buffer, is undertaken in secured, climate controlled, weather proof, level and bunded enclosures.</p>
<p>PO86</p> <p>On-site sewerage systems within a Water supply buffer are designed and operated to ensure there is no worsening or adverse impacts to health risks, environmental risks and water quality.</p> <p>Editor's Note - For guidance refer to the Seq water Development Guidelines: Development Guidelines for Water Quality Management in Drinking Water Catchments 2012.</p>	<p>E86</p> <p>Secondary treated wastewater treatment systems within a Water supply buffer include:</p> <ol style="list-style-type: none"> emergency storage capable of holding 3-6 hours peak flow of treated effluent in the event of emergencies or overload with provision for de-sludging; back up pump installation and backup power; MEDLI modelling to determine irrigation rates and sizing of irrigation areas; vegetated land application areas are not located in overland flow paths or on areas that perform groundwater recharge or discharge functions; and wastewater collection and storage systems have a capacity to accommodate full load at peak times and includes temporary facilities.
<p>PO87</p> <p>Development within a Bulk water supply infrastructure buffer is located, designed and constructed to:</p> <ol style="list-style-type: none"> protect the integrity of the water supply pipeline; maintain adequate access for any required maintenance or upgrading work to the water supply pipeline; 	<p>E87</p> <p>Development:</p> <ol style="list-style-type: none"> does not involve the construction of any buildings or structures within a Bulk water supply infrastructure buffer; involving a major hazard facility or environmentally relevant activity (ERA) is setback 30m from a Bulk water supply infrastructure buffer.
<p>PO88</p> <p>Development is located and designed to maintain required access to Bulk water supply infrastructure.</p>	<p>E88</p> <p>Development does not restrict access to Bulk water supply infrastructure of any type or size, having regard to (among other things):</p> <ol style="list-style-type: none"> buildings or structures; gates and fences; storage of equipment or materials; landscaping or earthworks or stormwater or other infrastructure.

6 Zones

Overland flow path (refer Overlay map - Overland flow path to determine if the following assessment criteria apply)

Note - The applicable river and creek flood planning levels associated with defined flood event (DFE) within the inundation area can be obtained by requesting a flood check property report from Council.

<p>PO89</p> <p>Development:</p> <ul style="list-style-type: none"> a. minimises the risk to persons from overland flow; b. does not increase the potential for damage from overland flow either on the premises or other premises, public land, watercourses, roads or infrastructure. 	<p>No example provided.</p>
<p>PO90</p> <p>Development:</p> <ul style="list-style-type: none"> a. maintains the conveyance of overland flow predominantly unimpeded through the premises for any event up to and including the 1% AEP for the fully developed upstream catchment; b. does not concentrate, intensify or divert overland flow onto an upstream, downstream or surrounding property. <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow.</p>	<p>E90</p> <p>No example provided.</p>
<p>PO91</p> <p>Development does not:</p> <ul style="list-style-type: none"> a. directly, indirectly or cumulatively cause any increase in overland flow velocity or level; b. increase the potential for flood damage from overland flow either on the premises or other premises, public lands, watercourses, roads or infrastructure. <p>Note - Open concrete drains greater than 1m in width are not an acceptable outcome, nor are any other design options that may increase scouring.</p>	<p>No example provided.</p>
<p>PO92</p> <p>Development ensures that public safety and the risk to the environment are not adversely affected by a detrimental impact of overland flow on a hazardous chemical located or stored on the premises.</p>	<p>E92</p> <p>Development ensures that a hazardous chemical is not located or stored in an Overland flow path area.</p>

	Note - Refer to the Work Health and Safety Act 2011 and associated Regulation and Guidelines, the Environmental Protection Act 1994 and the relevant building assessment provisions under the Building Act 1975 for requirements related to the manufacture and storage of hazardous substances.
<p>PO93</p> <p>Development which is not in a Rural zone ensures that overland flow is not conveyed from a road or public open space onto a private lot.</p>	<p>E93</p> <p>Development which is not in a Rural zone that an overland flow paths and drainage infrastructure is provided to convey overland flow from a road or public open space area away from a private lot.</p>
<p>PO94</p> <p>Development ensures that inter-allotment drainage infrastructure, overland flow paths and open drains through private property cater for overland flows for a fully developed upstream catchment and are able to be easily maintained.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow</p>	<p>E94.1</p> <p>Development ensures that roof and allotment drainage infrastructure is provided in accordance with the following relevant level as identified in QUDM:</p> <ol style="list-style-type: none"> Urban area – Level III; Rural area – N/A; Industrial area – Level V; Commercial area – Level V. <p>E94.2</p> <p>Development ensures that inter-allotment drainage infrastructure is designed to accommodate any event up to and including the 1% AEP for the fully developed upstream catchment.</p>
<p>PO95</p> <p>Development protects the conveyance of overland flow such that an easement for drainage purposes is provided over:</p> <ol style="list-style-type: none"> a stormwater pipe if the nominal pipe diameter exceeds 300mm; an overland flow path where it crosses more than one premises; inter-allotment drainage infrastructure. <p>Note - Refer to Planning scheme policy - Integrated design for details and examples.</p> <p>Note - Stormwater Drainage easement dimensions are provided in accordance with Section 3.8.5 of QUDM.</p>	No example provided.
Additional criteria for development for a Park⁽⁵⁷⁾	
PO96	E96

6 Zones

<p>Development for a Park⁽⁵⁷⁾ ensures that the design and layout responds to the nature of the overland flow affecting the premises such that:</p> <ul style="list-style-type: none"> a. public benefit and enjoyment is maximised; b. impacts on the asset life and integrity of park structures is minimised; c. maintenance and replacement costs are minimised. 	<p>Development for a Park⁽⁵⁷⁾ ensures works are provided in accordance with the requirements set out in Appendix B of the Planning scheme policy - Integrated design.</p>
<p>Riparian and wetland setbacks</p>	
<p>PO97</p> <p>Development provides and maintains a suitable setback from waterways and wetlands that protects natural and environmental values. This is achieved by recognising and responding to the following matters:</p> <ul style="list-style-type: none"> a. impact on fauna habitats; b. impact on wildlife corridors and connectivity; c. impact on stream integrity; d. impact of opportunities for revegetation and rehabilitation planting; e. edge effects. 	<p>E97</p> <p>Development does not occur within:</p> <ul style="list-style-type: none"> a. 50m from top of bank for W1 waterway and drainage line b. 30m from top of bank for W2 waterway and drainage line c. 20m from top of bank for W3 waterway and drainage line d. 100m from the edge of a Ramsar wetland, 50m from all other wetlands. <p>Note - W1, W2 and W3 waterway and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.</p>
<p>Transport noise corridors (refer Overlay map - Transport noise corridors to determine if the following assessment criteria apply)</p> <p>Note - This is for information purposes only. No requirements for accepted development or criteria for assessable development apply. Development located within a Transport Noise Corridor must satisfy the requirements of the Queensland Development Code</p>	

6.2.2.5 Special use precinct

6.2.2.5.1 Purpose – Special use precinct

1. The Special use precinct comprises a number of community based uses including, but not limited to emergency services, Shaftsbury citizen centre, Woodford correctional centre, tourist attractions, cemeteries, and building and facilities associated with religious groups. The purpose of the code will be achieved through the following overall outcomes for the Special use precinct:
 - a. Development supports the continued use of the precinct in appropriate locations for artistic, cultural and social community activities and emergency services.
 - b. Development is designed and operated to provide a high level of amenity and maintains the safety of people and property through crime prevention through environmental design principles (CPTED).
 - c. Development is of a scale, height and bulk that provides a high level of amenity and is sensitive to the character of the surrounding area.
 - d. Markets⁽⁴⁶⁾ and outdoor entertainment events are temporary or periodic in nature, and of a scale and intensity where any adverse impacts on the surrounds are mitigated and internalised to the site. Markets⁽⁴⁶⁾ and outdoor events do not adversely impact on the safe and efficient operation of the external road network.
 - e. General works associated with the development achieves the following:
 - i. new development is provided with a high standard of services to meet and support the current and future needs of users of the site, including roads, street lighting services, telecommunications and reticulated electricity (underground wherever possible), water and sewerage (where available);
 - ii. the development manages stormwater to:
 - A. ensure the discharge of stormwater does not adversely affect the quality, environmental values or ecosystem functions of downstream receiving waters;
 - B. prevent stormwater contamination and the release of pollutants;
 - C. maintain or improve the structure and condition of drainage lines and riparian areas;
 - D. avoid off-site adverse impacts from stormwater.
 - iii. the development does not result in unacceptable impacts on the capacity and safety of the external road network;
 - iv. the development ensures the safety, efficiency and useability of access ways and parking areas;
 - v. site works including earthworks are managed to be safe and have minimal impacts on adjoining or adjacent premises, the streetscape or the environment.
 - f. Activities associated with the use do not cause a nuisance by way of aerosols, fumes, light, noise, odour, particles or smoke.
 - g. Noise generating uses are designed, sited and constructed to minimise the transmission of noise to appropriate levels and do not cause environmental harm or nuisance.
 - h. Noise sensitive uses are designed, sited and constructed so as not to be subject to unacceptable levels of noise.
 - i. Development in a Water supply buffer is undertaken in a manner which contributes to the maintenance and enhancement where possible of water quality to protect the drinking water and aquatic ecosystem environmental values in those catchments.
 - j. Development avoids areas subject to constraint, limitation, or environmental value. Where development cannot avoid these identified areas, it responds by:
 - i. adopting a 'least risk, least impact' approach when designing, siting and locating development in any area subject to a constraint, limitation or environmental value to minimise the potential risk to people, property and the environment;
 - ii. ensuring no further instability, erosion or degradation of the land, water or soil resource;

6 Zones

- iii. when located within a Water buffer area, complying with the Water Quality Vision and Objectives contained in the Seqwater Development Guidelines: Development Guidelines for Water Quality Management in Drinking Water Catchments 2012.
- iv. maintaining, restoring and rehabilitating environmental values, including natural, ecological, biological, aquatic, hydrological and amenity values, and enhancing these values through the provision of planting and landscaping, and facilitating safe wildlife movement and connectivity through:
 - A. the provision of replacement, restoration, rehabilitation planting and landscaping;
 - B. the location, design and management of development to avoid or minimise adverse impacts on ecological systems and processes;
 - C. the requiring of environmental offsets in accordance with the Environmental Offsets Act 2014.
- v. protecting native species and protecting and enhancing species habitat;
- vi. protecting and preserving the natural, aesthetic, architectural historic and cultural values of significant trees, places, objects and buildings of heritage and cultural significance;
- vii. establishing effective separation distances, buffers and mitigation measures associated with identified infrastructure to minimise adverse effects on sensitive land uses from odour, noise, dust and other nuisance generating activities;
- viii. establishing, maintaining and protecting appropriate buffers to waterways, wetlands, native vegetation and significant fauna habitat;
- ix. ensuring it promotes and does not undermine the ongoing viability, integrity, operation, maintenance and safety of identified infrastructure;
- x. ensuring effective and efficient disaster management response and recovery capabilities;
- xi. where located in an overland flow path:
 - A. development siting, built form, layout and access responds to the risk presented by the overland flow and minimises risk to personal safety;
 - B. development is resilient to the impacts of overland flow by ensuring the siting and design accounts for the potential risks to property associated with the overland flow;
 - C. development does not impact on the conveyance of the overland flow for any event up to and including the 1% AEP for the fully developed upstream catchment;
 - D. development directly, indirectly and cumulatively avoid an increase in the severity of overland flow and potential for damage on the premises or other premises, public lands, watercourses, roads or infrastructure.

- k. Development in the Special use precinct includes one or more of the following:

<ul style="list-style-type: none"> • Caretaker's accommodation⁽¹⁰⁾ • Cemetery⁽¹²⁾ - if involving the extension of an existing Cemetery or located on Council or State owned land • Community use⁽¹⁷⁾ 	<ul style="list-style-type: none"> • Emergency services⁽²⁵⁾ - if located on Council or State owned land • Tourist attraction⁽⁸³⁾ - if located on Lot 3 SP256486 [Caboolture Historical Village] or located on Lot3 SP136818, Lot 28 SL6772 or Lot 5 S31161[North Pine Country Park] 	<ul style="list-style-type: none"> • Tourist park⁽⁸⁴⁾ - if involving extension to an existing Tourist park⁽⁸⁴⁾ • Transport depot⁽⁸⁵⁾ (if in accordance with a Council Master Plan approved under Council policy) • Telecommunication facilities⁽⁸¹⁾
--	---	--

- m. Development in the Special use precinct does not include any of the following:

<ul style="list-style-type: none"> • Adult store⁽¹⁾ • Agricultural supplies store⁽²⁾ 	<ul style="list-style-type: none"> • Hospital⁽³⁶⁾ • Hotel⁽³⁷⁾ 	<ul style="list-style-type: none"> • Retirement facility⁽⁶⁷⁾ • Roadside stall⁽⁶⁸⁾
--	---	---

<ul style="list-style-type: none"> • Air services⁽³⁾ • Animal husbandry⁽⁴⁾ • Animal keeping⁽⁵⁾ • Aquaculture⁽⁶⁾ • Bar⁽⁷⁾ • Brothel⁽⁸⁾ • Bulk landscape supplies⁽⁹⁾ • Car wash⁽¹¹⁾ • Cemetery⁽¹²⁾ (if not located on Council or State owned land) • Club⁽¹⁴⁾ • Community care centre⁽¹⁵⁾ • Community residence⁽¹⁶⁾ • Crematorium⁽¹⁸⁾ (where within 500m of a sensitive land use or a residential dwelling) • Cropping⁽¹⁹⁾ • Detention facility⁽²⁰⁾ • Dual occupancy⁽²¹⁾ • Dwelling house⁽²²⁾ • Dwelling unit⁽²³⁾ • Environmental facility⁽²⁶⁾ • Extractive industry⁽²⁷⁾ • Function facility⁽²⁹⁾ • Garden centre⁽³¹⁾ • Hardware and trade supplies⁽³²⁾ • Health care services⁽³³⁾ • High Impact industry⁽³⁴⁾ • Home based business⁽³⁵⁾ 	<ul style="list-style-type: none"> • Indoor sport and recreation⁽³⁸⁾ • Intensive animal industry⁽³⁹⁾ • Intensive horticulture⁽⁴⁰⁾ • Landing⁽⁴¹⁾ • Low impact industry⁽⁴²⁾ • Major electricity infrastructure⁽⁴³⁾ • Major sport, recreation and entertainment facility⁽⁴⁴⁾ • Marine industry⁽⁴⁵⁾ • Medium impact industry⁽⁴⁷⁾ • Motor sport facility⁽⁴⁸⁾ • Multiple dwelling⁽⁴⁹⁾ • Nature-based tourism⁽⁵⁰⁾ • Nightclub entertainment facility⁽⁵¹⁾ • Non-resident workforce accommodation⁽⁵²⁾ • Office⁽⁵³⁾ • Outdoor sales⁽⁵⁴⁾ • Outdoor sport and recreation⁽⁵⁵⁾ • Parking station⁽⁵⁸⁾ • Permanent plantation⁽⁵⁹⁾ • Port services⁽⁶¹⁾ • Relocatable home park⁽⁶²⁾ • Renewable energy facility⁽⁶³⁾ • Research and technology industry⁽⁶⁴⁾ • Residential care facility⁽⁶⁵⁾ • Resort complex⁽⁶⁶⁾ 	<ul style="list-style-type: none"> • Rooming accommodation⁽⁶⁹⁾ • Rural industry⁽⁷⁰⁾ • Rural workers' accommodation⁽⁷¹⁾ • Sales office⁽⁷²⁾ • Service industry⁽⁷³⁾ • Service station⁽⁷⁴⁾ • Shop⁽⁷⁵⁾ • Shopping centre⁽⁷⁶⁾ • Short-term accommodation⁽⁷⁷⁾ • Showroom⁽⁷⁸⁾ • Special industry⁽⁷⁹⁾ • Theatre⁽⁸²⁾ • Tourist attraction⁽⁸³⁾ (if not located on Lot 3 SP256486 [Caboolture Historical Village] or Located on Lot3 SP136818, Lot 28 SL6772 or Lot 5 S31161[North Pine Country Park]) • Tourist park⁽⁸⁴⁾ (if not involving the extension of an existing Tourist Park⁽⁸⁴⁾) • Transport depot⁽⁸⁵⁾ (if not located on Council or State owned land) • Veterinary services⁽⁸⁷⁾ • Warehouse⁽⁸⁸⁾ • Wholesale nursery⁽⁸⁹⁾ • Winery⁽⁹⁰⁾
--	---	--

- n. Development not listed in the tables above may be considered on its merits and where it reflects and supports the outcomes of the zone.

6 Zones

6.2.2.5.2 Accepted development subject to requirements

If development is to be categorised as accepted development subject to requirements it must comply with the requirements for accepted development set out in Part I, Table 6.2.2.5.1. Where the development does not meet a requirement for accepted development (RAD) within Part I, Table 6.2.2.5.1, the category of development changes to assessable development under the rules outlined in section 5.3.3.(1), and assessment is against the corresponding performance outcome (PO) identified in the table below. This only occurs whenever a RAD is not met, and is therefore limited to the subject matter of the RADs that are not complied with. To remove any doubt, for those RADs that are complied with, there is no need for assessment against the corresponding PO.

Part I - Requirements for accepted development - Special use precinct

Table 6.2.2.5.1 Requirements for accepted development - Special use precinct

Requirements for accepted development	
General requirements	
Building setbacks	
RAD1	Buildings and structures are setback as follows: <ul style="list-style-type: none"> a. road frontage - 6m b. side boundary - 3m c. rear boundary - 3m
Building height	
RAD2	Building height does not exceed the maximum height identified on Overlay map - Building heights.
Site cover	
RAD3	Site cover does not exceed 40%.
Lighting	
RAD4	Artificial lighting on-site is directed and shielded in such a manner as not to exceed the recommended maximum values of light technical parameters for the control of obtrusive light given in Table 2.1 of Australian Standard AS 4282 (1997) Control of Obtrusive Effects of Outdoor Lighting. <p>Note - "Curfewed hours" are taken to be those hours between 10pm and 7am on the following day.</p>
Car parking	

RAD5	On-site car parking is provided in accordance with Schedule 7 - Car parking.
Waste	
RAD6	Bins and bin storage areas are provided, designed and managed in accordance with Planning scheme policy – Waste.
Hazardous chemicals	
RAD7	All development that involves the storage or handling of hazardous chemicals listed in Schedule 9, Development involving hazardous chemicals, Table 9.0.1 Quantity thresholds for hazardous chemicals stored as accepted development subject to requirements complies with Table 9.0.3 Hazardous chemicals.
RAD8	Development does not involve the storage or handling of hazardous chemicals listed in Schedule 9, Development involving hazardous chemicals, Table 9.0.2 Hazardous chemicals assessable thresholds.
Building on sloping land	
RAD9	<p>Building and site design on slope between 10% and 15%:</p> <ol style="list-style-type: none"> use split-level, multiple-slab, pier or pole construction; avoid single-plane slabs and benching; and ensure the height of any cut or fill, whether retained or not, does not exceed 900mm. <p>Note - This provision does not apply to outbuildings or any building works.</p> <p>Note - This provision does not apply where a development footprint exists for a lot.</p>
Clearing of habitat trees where not located in the Environmental areas overlay map	
RAD10	<p>Development does not result in the damaging, destroyed or clearing of a habitat tree. This does not apply to:</p> <ol style="list-style-type: none"> Clearing of a habitat tree located within an approved development footprint; Clearing of a habitat tree within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; Clearing of a habitat tree reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; Clearing of a habitat tree reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural , Rural residential and Environmental management and conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence; Clearing of a habitat tree reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes; Clearing of a habitat tree in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council; Clearing of a habitat tree associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens; Native forest practice where accepted development under Part 1, 1.7.7 Accepted development.

6 Zones

	<p>Editor's note - A native tree measuring greater than 80cm in diameter when measured at 1.3m from the ground is recognised as a 'habitat tree'. For further information on habitat trees, refer to Planning scheme policy – Environmental areas and corridors. Information detailing how this measurement is undertaken is provided in Australian Standard AS 4970 2009 Protection of Trees on Development Sites - Appendix A.</p>
Works requirements	
Utilities	
RAD11	<p>Where available, the development is connected to:-</p> <ol style="list-style-type: none"> a. an existing reticulated electricity supply; b. telecommunications and broadband; c. reticulated sewerage; d. reticulated water; e. constructed and dedicated road. <p>Development is provided in an appropriate level of service and infrastructure in accordance with Planning scheme policy - Integrated design (Appendix A).</p>
RAD12	<p>Where not in a sewerage area, the development is serviced by an appropriate on-site sewerage facility.</p> <p>Note – A site and soil evaluation report is generally required to demonstrate compliance with this outcome. Reports are to be prepared in accordance with AS1547 On-site domestic wastewater management and the Queensland Plumbing and Wastewater Code.</p>
RAD13	<p>Where not in an existing connections area or a future connections area as detailed in the Unitywater Connections Policy, the development is provided with an adequate water supply of 45,000 litres by way of on-site storage which provides equivalent water quality and reliability to support the use requirements of the development.</p>
Access	
RAD	<p>The frontage road is fully constructed to Council's standards.</p> <p>Note - Roads are considered to be constructed in accordance with Council standards when there is sufficient pavement width, geometry and depth to comply with the requirements of Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures. Testing of the existing pavement may be required to confirm whether the existing works meet the standards in Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p> <p>Note - Frontage roads include streets where no direct lot access is provided.</p>
RAD14	<p>Any new or changes to existing site access crossovers and driveways are designed, and located and constructed in accordance with:</p> <ol style="list-style-type: none"> where for a Council-controlled road and associated with a Dwelling house: <ol style="list-style-type: none"> Planning scheme policy - Integrated design;

	<p>b. where for a Council-controlled road; and not associated with a Dwelling house:</p> <ul style="list-style-type: none"> i. AS/NZS2890.1 section 3; or Parking facilities Part 1: Off street car parking; ii. AS/NZS 2890.2 - Parking facilities Part 2: Off-street commercial vehicle facilities; iii. Planning scheme policy - Integrated design; iv. Schedule 8 - Service vehicle requirements; <p>c. where for a State-Controlled road, the Safe Intersection Sight Distance requirements in Austroads and the appropriate IPWEAQ standard drawings, or a copy of a Transport Infrastructure Act 1994, section 62 approval.</p>
RAD15	Any new or changes to existing internal driveways and access ways are designed and constructed in accordance with AS/NZS 2890.1 Parking Facilities Part 1: Off street car parking and the relevant standards in Planning scheme policy - Integrated design.
RAD	Access driveways, manoeuvring areas and loading facilities are sealed and provide for service vehicles listed in Schedule 8 - Service vehicle requirements for the relevant use. The on-site manoeuvring is to be in accordance with Schedule 8 - Service vehicle requirements.

Stormwater

RAD16	<p>Any new or changes to existing stormwater run-off from the site is conveyed to a point of lawful discharge without causing actionable nuisance or annoyance to any person, property or premises in accordance with Planning scheme policy – Integrated design.</p> <p>Note - A watercourse as defined in the Water Act may be accepted as a lawful point of discharge providing the drainage discharge from the site does not increase the downstream flood levels during events up to and including the 1% AEP storm. An afflux of +20mm may be accepted on Council controlled land and road infrastructure. No worsening is ensured when stormwater is discharged into a catchment that includes State Transport Infrastructure.</p>
RAD17	<p>Development incorporates a minimum of 2% of the site area constructed as a bioretention system in accordance with Planning scheme policy – Integrated design if the development-</p> <ul style="list-style-type: none"> a. is for urban purposes only; b. involves a land area greater than 2500m²; c. will result in 6 or more dwellings; OR will result in an impervious area greater than 25% of the net developable area. <p>Where development:</p> <ul style="list-style-type: none"> a. is for an urban purpose that involves a land area 2500m² or greater in size; and b. that results in 6 or more dwellings; or c. that result in an impervious area greater than 25% of the net developable area, <p>incorporates a 'deemed to comply solution' to manage stormwater quality.</p>

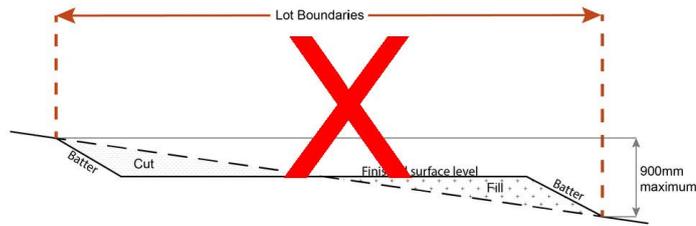

6 Zones

	<p>Note - The deemed to comply solution is to be designed, constructed, established and maintained in accordance with the requirements of Water by Design 'Deemed to Comply Solutions - Stormwater Quality Management for South East Queensland' and Planning scheme policy - Integrated design.</p>								
RAD	<p>Development ensures that surface flows entering the premises from adjacent properties are not blocked, diverted or concentrated.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland may be required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p>								
RAD	<p>Development ensures that works (e.g. fences and walls) do not block, divert or concentrate the flow of stormwater to adjoining properties.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland may be required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p>								
RAD	<p>Stormwater drainage infrastructure (excluding detention and bio-retention systems) through or within private land is protected by easements in favour of Council (at no cost to Council). Minimum easement widths are as follows:</p> <table border="1" data-bbox="263 981 1468 1422"> <thead> <tr> <th>Pipe Diameter</th> <th>Minimum Easement Width (excluding access requirements)</th> </tr> </thead> <tbody> <tr> <td>Stormwater Pipe up to 825mm diameter</td> <td>3.0m</td> </tr> <tr> <td>Stormwater Pipe up to 825mm diameter with Sewer pipe up to 225mm diameter</td> <td>4.0m</td> </tr> <tr> <td>Stormwater pipe greater than 825mm diameter</td> <td>Easement boundary to be 1m clear of the outside wall of the pipe and clear of all pits.</td> </tr> </tbody> </table> <p>Note - Additional easement width may be required in certain circumstances in order to facilitate maintenance access to the stormwater system.</p> <p>Note - Refer to Planning scheme policy - Integrated design (Appendix C) for easement requirements over open channels.</p>	Pipe Diameter	Minimum Easement Width (excluding access requirements)	Stormwater Pipe up to 825mm diameter	3.0m	Stormwater Pipe up to 825mm diameter with Sewer pipe up to 225mm diameter	4.0m	Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the pipe and clear of all pits.
Pipe Diameter	Minimum Easement Width (excluding access requirements)								
Stormwater Pipe up to 825mm diameter	3.0m								
Stormwater Pipe up to 825mm diameter with Sewer pipe up to 225mm diameter	4.0m								
Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the pipe and clear of all pits.								

Site works and construction management

RAD18	The site and any existing structures are to be maintained in a tidy and safe condition.
RAD19	<p>Site construction works incorporate temporary stormwater run-off, erosion and sediment controls and trash traps designed in accordance with the Urban Stormwater Quality Planning Guidelines, Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design.</p> <p>Development does not cause erosion or allow sediment to leave the site.</p> <p>Note - The International Erosion Control Association (Australasia) Best Practice Erosion and Sediment Control provides guidance on strategies and techniques for managing erosion and sedimentation.</p>

RAD	No dust emissions extend beyond the boundaries of the site during soil disturbances and construction works.
RAD	Existing street trees are protected and not damaged during works. Note - Where development occurs in the tree protection zone, measures and techniques as detailed in Australian Standard AS 4970 Protection of trees on developments sites are adopted and implemented.
RAD22	Any damage to Council land or infrastructure is repaired or replaced with the same materials, prior to plan sealing, or final building classification.
RAD20	Construction traffic including contractor car parking is controlled in accordance with a traffic management plan, prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) to ensure all traffic movements to and from the site are safe.
RAD23	Any material dropped, deposited or spilled on the road(s) as a result of construction processes associated with the site are to be cleaned at all times.
RAD21	All native vegetation to be retained on-site is temporarily fenced or protected prior to and during development works. Note - No parking of vehicles or storage of machinery or goods is to occur in these areas during development works
RAD	Disposal of materials is managed in one or more of the following ways: a. all cleared vegetation, declared weeds, stumps, rubbish, car bodies, scrap metal and the like are removed and disposed of in a Council land fill facility; or b. all native vegetation with a diameter below 400mm is to be chipped and stored on-site. Note - No burning of cleared vegetation is permitted. Note - The chipped vegetation must be stored in an approved location.
RAD	All development works are carried out within the following times: a. Monday to Saturday (other than public holidays) between 6:30am and 6:30pm on the same day; b. no work is to be carried out on Sundays or public holidays.
Earthworks	
RAD25	The total of all cut and fill on-site does not exceed 900mm in height. Figure -- Cut and Fill

Note—This is site earthworks not building work.

Filling or excavation does not:

- a. involve a change in level of more than 1.0m relative to natural ground level

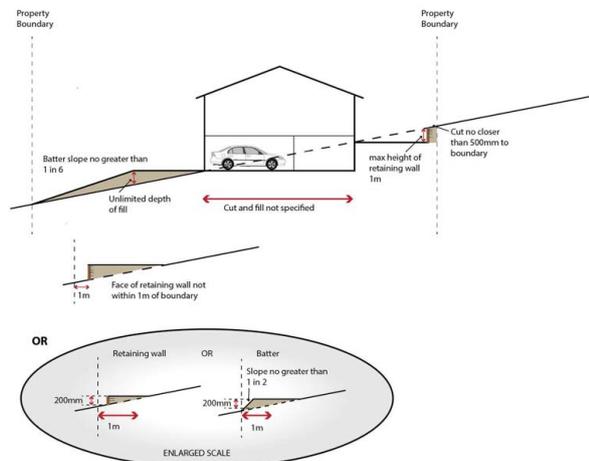

OR

result in a batter greater than 1V to 6H;

- b. necessitate the construction of a freestanding retaining wall exceeding 1.0m in height relative to finished ground level;
- c. result in the top of any cut batter, or the exposed face of any freestanding retaining wall supporting that cut, being closer than 500mm to a property boundary;
- d. result in the toe of any fill batter, or exposed face of any freestanding retaining wall supporting that fill, being closer than 1.0m to a property boundary unless:
 - i. the depth of fill within the 1.0m strip does not exceed 200mm relative to natural ground level; or
 - ii. the batter slope within that 1.0m strip is no steeper than 1V to 2H.

THE NEW FIGURE BELOW IS PROPOSED AS PART OF THIS AMENDMENT

Figure - Filling or Excavation

RAD

Cut and fill batters, (other than batters to dams and water impoundments), have a finished slope no steeper than the following:

	<ul style="list-style-type: none"> a. any cut batter is no steeper than 1V in 4H; b. any fill batter, (other than a compacted fill batter), is no steeper than 1V in 4H; c. any compacted fill batter is no steeper than 1V in 4H.
RAD	All cut and fill batters are provided with appropriate scour, erosion protection and run-off control measures including catch drains at the top of batters and lined batter drains as necessary.
RAD	<p>Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance of steep slopes and batters.</p> <p>Note - Inspection and certification of steep slopes and batters may be required by a suitably qualified and experienced RPEQ.</p>
RAD	All fill and excavation is contained on-site and is free draining.
RAD	<p>Earthworks undertaken on the development site are shaped in a manner which does not:</p> <ul style="list-style-type: none"> a. prevent stormwater surface flow which, prior to commencement of the earthworks, passed onto the development site, from entering the land; or b. redirect stormwater surface flow away from existing flow paths; or c. divert stormwater surface flow onto adjacent land (other than a road) in a manner which: <ul style="list-style-type: none"> i. concentrates the flow; or ii. increases the flow rates of stormwater over the affected section of the adjacent land above the situation which existed prior to the diversion; or iii. causes actionable nuisance to any person, property or premises.
RAD	<p>All fill placed on-site is:</p> <ul style="list-style-type: none"> a. limited to that necessary for the approved use; b. clean and uncontaminated (i.e. no building waste, concrete, green waste, actual acid sulfate soils, potential acid sulfate soils or contaminated material etc.) material is used as fill.
RAD24	<p>The site is prepared and the fill placed on-site in accordance with Australian Standard AS3798.</p> <p>Note - The fill is to be inspected and tested in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures</p>
RAD	<p>No filling or excavation is undertaken in an easement issued in favour of Council or a public sector entity.</p> <p>Note - Public sector entity is defined in Schedule 2 of the Act.</p>
RAD26	<p>Filling or excavation that would result in any of the following is not carried out on site: does not result in:-</p> <ul style="list-style-type: none"> a. reduction in cover over any Council or public sector entity infrastructure to less than 600mm;

6 Zones

	<p>b. an increase in finished surface grade over, or within 1.5m on each side of, the Council or public sector entity infrastructure above that which existed prior to the filling or excavation works being undertaken;</p> <p>c. prevent reasonable access to Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the site for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity is defined in Schedule 2 of the Act.</p>
--	--

Fire services

Note - The provisions under this heading only apply if:

- a. the development is for, or incorporates:
- i. reconfiguring a lot for a community title scheme creating 1 or more vacant lots; or
 - ii. material change of use for 2 or more sole occupancy units on the same lot, or within the same community titles scheme; or
 - iii. material change of use for a Tourist park⁽⁸⁴⁾ with accommodation in the form of caravans or tents; or
 - iv. material change of use for outdoor sales⁽⁵⁴⁾, outdoor processing or outdoor storage where involving combustible materials.

AND

- b. none of the following exceptions apply:
- i. the distributor-retailer for the area has indicated, in its netserv plan, that the premises will not be served by that entity's reticulated water supply; or
 - ii. every part of the development site is within 60m walking distance of an existing fire hydrant on the distributor-retailer's reticulated water supply network, measured around all obstructions, either on or adjacent to the site.

Note - The provisions under this heading do not apply to buildings that are required by the Building Code of Australia to have a fire hydrant system complying with Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations or other fire fighting facilities which provide equivalent protection.

RAD27	<p>External fire hydrant facilities are provided on site to the standard prescribed under the relevant parts of <i>Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations</i>.</p> <p>Note - For this requirement for accepted development, the following are the relevant parts of AS 2419.1 (2005):</p> <ol style="list-style-type: none"> a. in regard to the form of any fire hydrant - Part 8.5 and Part 3.2.2.1, with the exception that for Tourist parks⁽⁸⁴⁾ or development comprised solely of dwellings and their associated outbuildings, single outlet above-ground hydrants or suitably signposted in-ground hydrants would be an acceptable alternative; b. in regard to the general locational requirements for fire hydrants - Part 3.2.2.2 (a), (e), (f), (g) and (h) as well as Appendix B of AS 2419.1 (2005); c. in regard to the proximity of hydrants to buildings and other facilities - Part 3.2.2.2 (b), (c) and (d), with the exception that: <ol style="list-style-type: none"> i. - for dwellings and their associated outbuildings, hydrant coverage need only extend to the roof and external walls of those buildings; ii. - for caravans and tents, hydrant coverage need only extend to the roof of those tents and caravans; iii. - for outdoor sales⁽⁵⁴⁾, processing or storage facilities, hydrant coverage is required across the entire area of the outdoor sales⁽⁵⁴⁾, outdoor processing and outdoor storage facilities; and d. in regard to fire hydrant accessibility and clearance requirements - Part 3.5 and where applicable, Part 3.6.
--------------	--

RAD28	<p>A continuous path of travel having the following characteristics is provided between the vehicle access point to the site and each external fire hydrant and hydrant booster point on the land:</p> <ol style="list-style-type: none"> a. an unobstructed width of no less than 3.5m; b. an unobstructed height of no less than 4.8m; c. constructed to be readily traversed by a 17 tonne HRV fire brigade pumping appliance; d. an area for a fire brigade pumping appliance to stand within 20m of each fire hydrant and 8m of each hydrant booster point.
RAD29	<p>On-site fire hydrant facilities are maintained in effective operating order in a manner prescribed in <i>Australian Standard AS1851 (2012) – Routine service of fire protection systems and equipment</i>.</p>
RAD30	<p>For development that contains on-site fire hydrants external to buildings:</p> <ol style="list-style-type: none"> a. those external hydrants can be seen from the vehicular entry point to the site; or b. a sign identifying the following is provided at the vehicular entry point to the site: <ol style="list-style-type: none"> i. the overall layout of the development (to scale); ii. internal road names (where used); iii. all communal facilities (where provided); iv. the reception area and on-site manager's office (where provided); v. external hydrants and hydrant booster points; vi. physical constraints within the internal roadway system which would restrict access by fire fighting appliances to external hydrants and hydrant booster points. <p>Note - The sign prescribed above, and the graphics used are to be:</p> <ol style="list-style-type: none"> a. in a form; b. of a size; c. illuminated to a level; <p>which allows the information on the sign to be readily understood, at all times, by a person in a fire fighting appliance up to 4.5m from the sign.</p>
RAD31	<p>For development that contains on-site fire hydrants external to buildings, those hydrants are identified by way of marker posts and raised reflective pavements markers in the manner prescribed in the technical note <i>Fire hydrant indication system</i> produced by the Queensland Department of Transport and Main Roads.</p> <p>Note - Technical note Fire hydrant indication system is available on the website of the Queensland Department of Transport and Main Roads.</p>
Use specific requirements	
Caretaker's accommodation⁽¹⁰⁾	
RAD32	Caretaker's accommodation ⁽¹⁰⁾ has a maximum GFA of 80m ² .
RAD33	No more than 1 caretaker's accommodation ⁽¹⁰⁾ is established per site.
RAD34	Does not gain access from a separate driveway to the main use on the site.

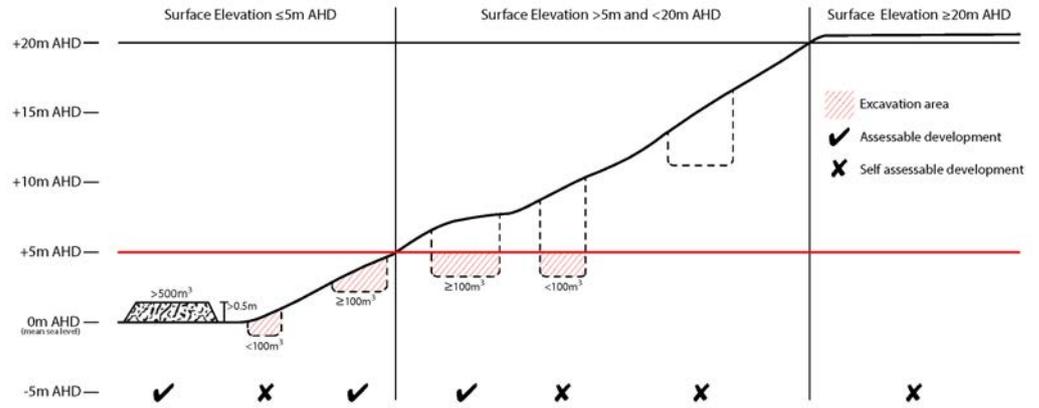

6 Zones

RAD35	Includes a minimum 16m ² of private open space directly accessible from a habitable room.
RAD36	Provide car parking in accordance with Schedule 7 - Car parking.
<p>Telecommunications facility⁽⁸¹⁾</p> <p>Editor's note - In accordance with the Federal legislation Telecommunications facilities⁽⁸¹⁾ must be constructed and operated in a manner that will not cause human exposure to electromagnetic radiation beyond the limits outlined in the Radiocommunications (Electromagnetic Radiation - Human Exposure) Standard 2003 and Radio Protection Standard for Maximum Exposure Levels to Radiofrequency Fields - 3Khz to 300Ghz.</p>	
RAD37	A minimum area of 45m ² is available at ground level to allow for additional equipment shelters and associated structures for the purpose of co-locating on the proposed facility.
RAD38	The development results in no net reduction in the minimum quantity and standard of landscaping, private or communal open space or car parking spaces required under the planning scheme or under an existing development approval.
RAD39	Equipment shelters and associated structures are located: <ul style="list-style-type: none"> a. directly beside the existing equipment shelter and associated structures; b. behind the main building line; c. further away from the frontage than the existing equipment shelter and associated structures; d. a minimum of 10m from side and rear boundaries, except where in the Industry and Extractive industry zones, the minimum side and rear setback is 3m.
RAD40	Equipment shelters and other associated structures are either the same type of colour or material to match the surrounding locality.
RAD41	The facility is enclosed by security fencing or by other means to ensure public access is prohibited.
RAD42	A minimum 3m wide strip of dense planting is provided around the perimeter of the fenced area, between the development and street frontage and adjoining uses. <p>Note - Landscaping is provided in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person to ensure compliance with Planning scheme policy - Integrated design.</p>
RAD43	All equipment comprising the telecommunications facility ⁽⁸¹⁾ which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure no noise from this equipment can be heard, or felt at the site boundary.
<p>Values and constraints requirements</p> <p>Note - The relevant values and constraints requirements do not apply where the development is consistent with a current Development permit for Reconfiguring a lot or Material change of use or Operational work, where that approval has considered and addressed (e.g. through a development footprint plan (or similar in the case of Landslide hazard) or conditions of approval) the identified value or constraint under this planning scheme.</p>	
<p>Acid sulfate soils - (refer Overlay map - Acid sulfate soils to determine if the following requirements apply)</p> <p>Note - Planning scheme policy - Acid sulfate soils provides guidance for requirements for accepted development that has the potential to disturb acid sulfate soils i.e. development involving filling or excavation works below the thresholds of 100m³ and 500m³ respectively.</p>	

RAD44

Development does not involve:

- a. excavation or otherwise removing of more than 100m³ of soil or sediment where below 5m Australian Height Datum AHD, or
- b. filling of land of more than 500m³ of material with an average depth of 0.5m or greater where below the 5m AHD.

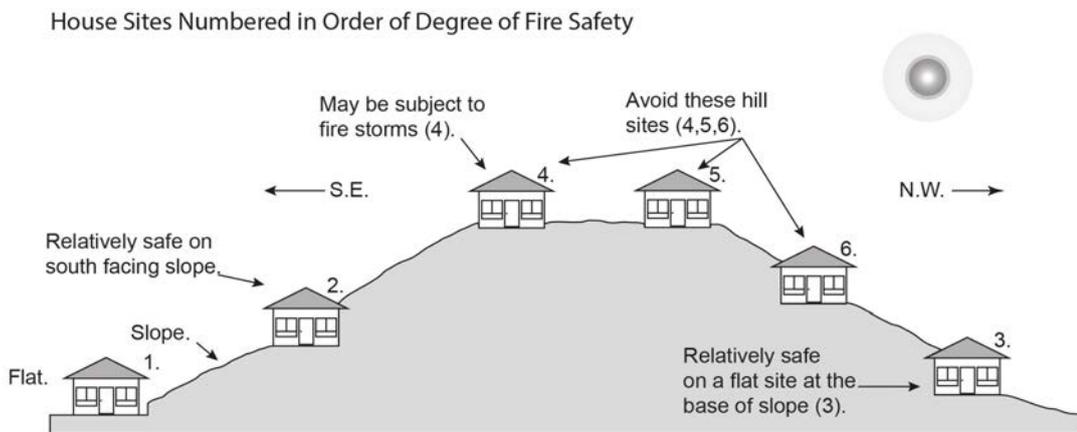

Bushfire hazard (refer Overlay map - Bushfire hazard to determine if the following requirements apply)

Note - For the purposes of section 12 of the Building Regulation 2006, land identified as very high potential bushfire intensity, high potential bushfire intensity, medium potential bushfire intensity or potential impact buffer on the Bushfire hazard overlay map is the 'designated bushfire hazard area'. AS 3959-2009 Construction of buildings in bushfire hazard areas applies within these areas.

RAD45

- a. Building and structures are:
 - i. not located on a ridgeline
 - ii. not located on land with a slope greater than 15% (see Overlay map – Landslide hazard)
- b. Dwellings are located on east to south facing slopes.

(1 being the safest , 6 being the most hazardous.)
 From Bushfire Prone Areas: Siting and Design of Residential Buildings (1997), Queensland Department of Local Government and Planning, and Queensland Fire & Rescue Service.

6 Zones

<p>RAD46</p>	<p>Buildings and structures have contained within the site:</p> <ol style="list-style-type: none"> a. a separation from classified vegetation of 20m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater; b. a separation from low threat vegetation of 10m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater; c. a separation of no less than 10m between a fire fighting water supply extraction point and any classified vegetation, buildings and other roofed structures; d. an area suitable for a standard fire fighting appliance to stand within 3m of a fire fighting water supply extraction point; and e. an access path suitable for use by a standard fire fighting appliance having a formed width of at least 4m, a cross-fall of no greater than 5%, and a longitudinal gradient of no greater than 25%: <ol style="list-style-type: none"> i. to, and around, each building and other roofed structure; and ii. to each fire fighting water supply extraction point. <p>Note - The meaning of the terms classified vegetation and low threat vegetation as well as the method of calculating the bushfire attack level are as described in Australian Standard AS 3959.</p>
<p>RAD47</p>	<p>The length of driveway:</p> <ol style="list-style-type: none"> a. to a public road does not exceed 100m between the most distant part of a building used for any purpose other than storage and the nearest part of a public road; b. has a maximum gradient no greater than 12.5%; c. have a minimum width of 3.5m; d. accommodate turning areas for fire fighting appliances in accordance with Qld Fire and Emergency Services' Fire Hydrant and Vehicle Access Guideline.
<p>RAD48</p>	<ol style="list-style-type: none"> a. A reticulated water supply is provided by a distributor retailer for the area or, where not connected to a reticulated water supply, on-site fire fighting water storage containing not less than 10 000 litres (tanks with fire brigade tank fittings, swimming pools) is provided and located within 10m of buildings and structures. b. Where a swimming pool is the nominated on-site fire fighting water storage source, vehicle access to within 3m of that water storage source is provided. c. Where a tank is the nominated on-site fire fighting water storage source, it includes: <ol style="list-style-type: none"> i. a hardstand area allowing medium rigid vehicle (15 tonne fire appliance) access within 6m of the tank; ii. fire brigade tank fittings, comprising 50mm ball valve and male camlock coupling and, if underground, an access hole of 20mm (minimum) to accommodate suction lines.
<p>RAD49</p>	<p>Development does not involve the manufacture or storage of hazardous chemicals.</p>
<p>Environmental areas (refer Overlay map - Environmental areas to determine if the following requirements apply)</p> <p>Note - The following are excluded from the native clearing provisions of this planning scheme:</p> <ol style="list-style-type: none"> a. Clearing of native vegetation located within an approved development footprint; b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; 	

- c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure;
- d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental Management and Conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence;
- e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes;
- f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council;
- g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens;
- h. Grazing of native pasture by stock;
- i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development.

Note - Definition for native vegetation is located in Schedule 1 Definitions.

Note - Native vegetation subject to this requirement primarily comprises of matters of national environmental significance (MNES), matters of state environmental significance (MSES). They also comprise some matters of local environmental significance (MLES). A MLES is defined in Schedule 1.2, Administrative definitions. A list of the elements that apply to the mapped MSES and MLES is provided in Appendix 1 of the Planning scheme policy - Environmental areas.

Editors' Note - The accuracy of overlay mapping can be challenged through the development application process (code assessable development) or by way of a planning scheme amendment. See Council's website for details.

Editors' Note - When clearing native vegetation within a MSES area, you may still require approval from the State government.

RAD50	<p>Where no suitable land cleared of native vegetation exists, clearing of native vegetation in a High Value Area or Value Area is for the purpose of a new dwelling house⁽²²⁾ or extension to an existing dwelling house⁽²²⁾ only on lots less than 750m².</p> <p>Editor's note - See in heading above for other uses excluded from native vegetation clearing requirements.</p> <p>Editor's note - Where vegetation clearance is accepted development subject to requirements, care should be undertaken to avoid adverse impacts on koalas, koala habitat values and habitat connectivity and to encourage existing koala usage of the site. Measures to minimise impacts include:</p> <ul style="list-style-type: none"> i. co-locating all associated activities, infrastructure and access strips; ii. be the least valued area of koala habitat on the site; iii. minimise the footprint of the development envelope area; iv. minimise edge effects to areas external to the development envelope; v. location and design consideration to ensure koala safety and movement in accordance with the Koala-sensitive Design Guideline and Planning scheme policy – Environmental areas; vi. sufficient area between the development and koala habitat trees to achieve their long-term viability. <p>Editor's note - Where vegetation clearing is accepted development subject to requirements, consideration should be given to avoid clearing habitat trees. Habitat trees may contain structural hollows where animals live, breed and shelter. The provision of nest boxes or salvaging of hollows will provide compensatory roosting and nesting opportunities for local wildlife including sugar gliders, possums and owls. For further information see Planning scheme policy – Environmental areas.</p>
RAD51	<p>No clearing of native vegetation is to occur within the Value Offset Area MLES - Waterway buffer or Value Offset Area MLES - Wetland buffer.</p> <p>This does not apply to the following:</p>

6 Zones

	<ul style="list-style-type: none"> a. Clearing of native vegetation located within an approved development footprint; b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental management and conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence; e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes; f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council; g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens; h. Grazing of native pasture by stock; i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development.
<p>Extractive resources transport routes (refer Overlay map - Extractive resources (transport route and buffer) to determine if the following requirements apply)</p>	
RAD52	<p>The following uses are not located within the 100m wide transport route buffer:</p> <ul style="list-style-type: none"> a. Caretaker's accommodation⁽¹⁰⁾, except where located in the Extractive industry zone; b. Community residence⁽¹⁶⁾; c. Dual occupancy⁽²¹⁾; d. Dwelling house⁽²²⁾; e. Dwelling unit⁽²³⁾; f. Hospital⁽³⁶⁾; g. Rooming accommodation⁽⁶⁹⁾; h. Multiple dwelling⁽⁴⁹⁾; i. Non-resident workforce accommodation⁽⁵²⁾; j. Relocatable home park⁽⁶²⁾; k. Residential care facility⁽⁶⁵⁾; l. Resort complex⁽⁶⁶⁾; m. Retirement facility⁽⁶⁷⁾; n. Rural workers' accommodation⁽⁷¹⁾; o. Short-term accommodation⁽⁷⁷⁾; p. Tourist park⁽⁸⁴⁾.
RAD53	<p>Except for an existing vacant lot, development does not create a new vehicle access point onto an Extractive resources transport route.</p>
RAD54	<p>A vehicle access point is located, designed and constructed in accordance with Planning scheme policy - Integrated design.</p>
<p>Heritage and landscape character (refer Overlay map - Heritage and landscape character to determine if the following requirements apply)</p> <p>Note - Places, including sites, objects and buildings having local cultural heritage significance, are identified on Overlay map - Heritage and landscape character and listed in Schedule 1 of Planning scheme policy - Heritage and landscape character. Places also having cultural heritage significance at a State level and being entered in the Queensland Heritage Register, are also identified in Schedule 1 of Planning scheme policy - Heritage and landscape character.</p>	
RAD55	<p>Development is for the preservation, maintenance, repair and restoration of the site, object or building.</p> <p>This does not apply to Listed item 99, in Schedule 1 - List of sites, objects and buildings of significant historical and cultural value of Planning scheme policy - Heritage and landscape character.</p>

	Note - Preservation, maintenance, repair and restoration are defined in Schedule 1 - Definitions
RAD56	<p>A cultural heritage conservation management plan is prepared in accordance with Planning scheme policy – Heritage and landscape character and submitted to Council prior to the commencement of any preservation, maintenance, repair and restoration works. Any preservation, maintenance, repair and restoration works are in accordance with the Council approved cultural heritage conservation management plan.</p> <p>This does not apply to Listed item 99 in Schedule 1 - List of sites, objects and buildings of significant historical and cultural value of Planning scheme policy - Heritage and landscape character.</p>
RAD57	Development does not result in the removal of or damage to any significant tree identified on Overlay map – Heritage and landscape character and listed in Appendix 2 of Planning scheme policy – Heritage and landscape character.
RAD58	<p>The following development does not occur within 20m of the base of any significant tree, identified on Overlay map – Heritage and landscape character and listed in Appendix 2 of Planning scheme policy – Heritage and landscape character:</p> <ol style="list-style-type: none"> construction of any building; laying of overhead or underground services; any sealing, paving, soil compaction; any alteration of more than 75mm to the ground surface level prior to work commencing.
RAD59	Pruning of a significant tree occurs in accordance with Australian Standard AS 4373-2007 - Pruning of Amenity Trees.
Landslide hazard (refer Overlay map - Landslide hazard to determine if the following requirements apply)	
RAD60	<p>Development does not:</p> <ol style="list-style-type: none"> involve earthworks exceeding 50m³; involve cut and fill having a height greater than 600mm; involve any retaining wall having a height greater than 600mm; redirect or alter the existing flow of surface or groundwater.
RAD61	<p>Buildings, excluding domestic outbuildings:</p> <ol style="list-style-type: none"> are split-level, multiple-slab, pier or pole construction; are not single plane slab on ground.
RAD62	Development does not involve the manufacture, handling or storage of hazardous chemicals.
Infrastructure buffers (refer Overlay map - Infrastructure buffers to determine if the following requirements apply)	
RAD63	<p>Development does not include the following uses within a Wastewater treatment site buffer:</p> <ol style="list-style-type: none"> Caretaker's accommodation⁽¹⁰⁾; Community residence⁽¹⁶⁾; Dual occupancy⁽²¹⁾; Dwelling house⁽²²⁾; Dwelling unit⁽²³⁾; Hospital⁽³⁶⁾; Rooming accommodation⁽⁶⁹⁾; Multiple dwelling⁽⁴⁹⁾; Non-resident workforce accommodation⁽⁵²⁾; Relocatable home park⁽⁶²⁾;

6 Zones

	<ul style="list-style-type: none"> k. Residential care facility⁽⁶⁵⁾; l. Resort complex⁽⁶⁶⁾; m. Retirement facility⁽⁶⁷⁾; n. Rural workers' accommodation⁽⁷¹⁾; o. Short-term accommodation⁽⁷⁷⁾; p. Tourist park⁽⁸⁴⁾.
RAD64	Development within a Water supply buffer does not include the incineration or burial of waste and all other waste is collected and stored in weather proof, sealed waste receptacles, located in roofed and bunded areas, for disposal by a licenced contractor.
RAD65	Management, handling and storage of hazardous chemicals (including fuelling of vehicles) within a Water supply buffer, is undertaken in secured, climate controlled, weather proof, level and bunded enclosures.
RAD66	<p>Development does not restrict access to Bulk water supply infrastructure of any type or size, having regard to (among other things):</p> <ul style="list-style-type: none"> a. buildings or structures; b. gates and fences; c. storage of equipment or materials; d. landscaping or earthworks or stormwater or other infrastructure.
RAD67	On-site sewerage facilities in a Water supply buffer produce a minimum secondary treated effluent (90th percentile) and effluent application to ensure water quality is maintained and protected.
RAD68	<p>On-site sewerage facilities in a Water supply buffer for a dwelling house⁽²²⁾ include:</p> <ul style="list-style-type: none"> a. emergency storage capacity of 1,000 litres and adequate buffering for shock loading/down time; b. a reserve land application area of 100% of the effluent irrigation design area; c. land application areas that are vegetated; d. the base of the land application field is at least 2 metres above the seasonal high water table/bedrock (whichever is the closest to the base of the application area); e. wastewater collection and storage systems must have capacity to accommodate full load at peak times.
RAD69	On-site sewerage facilities in a Water supply buffer for development other than a dwelling house include emergency storage capable of holding 3-6 hours peak flow of treated effluent in the event of emergencies/overload with provision for de-sludging.
RAD70	Development involving Permanent plantation ⁽⁵⁹⁾ within a Water supply buffer maintains a minimum of 30% ground cover at all times.
RAD71	Development does not involve the construction of any buildings or structures within a Bulk water supply infrastructure buffer.
RAD72	Development involving a major hazard facility or an Environmentally Relevant Activity (ERA) is setback 30m from a Bulk water supply infrastructure buffer.
RAD73	<p>Development does not include the following uses located within a landfill site buffer:</p> <ul style="list-style-type: none"> a. caretaker's accommodation⁽¹⁰⁾; b. community residence⁽¹⁶⁾; c. dual occupancy⁽²¹⁾; d. dwelling house⁽²²⁾; e. dwelling unit⁽²³⁾; f. hospital⁽³⁶⁾;

	<ul style="list-style-type: none"> g. rooming accommodation⁽⁶⁹⁾; h. multiple dwelling⁽⁴⁹⁾; i. non-resident workforce accommodation⁽⁵²⁾; j. relocatable home park⁽⁶²⁾; k. residential care facility⁽⁶⁵⁾; l. resort complex⁽⁶⁶⁾; m. retirement facility⁽⁶⁷⁾; n. rural workers' accommodation⁽⁷¹⁾; o. short term accommodation⁽⁷⁷⁾; p. tourist park⁽⁸⁴⁾.
RAD74	Development does not involve the construction of any buildings or structures containing habitable rooms or sensitive land uses within a High voltage electricity line buffer.
Overland flow path (refer Overlay map - Overland flow path to determine if the following requirements apply)	
RAD75	Development for a material change of use or building work does not involve the construction of a building or structure in an Overland flow path area.
RAD76	<p>Development for a material change of use or operational work does not impede the flow of flood waters through the premises or worsen flood flows to other premises.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow</p>
RAD77	Development for a material change of use or building work ensures that fencing in an overland flow path area is at least 50% permeable.
RAD78	Development for a material change of use or building work that involves a hazardous chemical ensures the hazardous chemicals is not located within an overland flow path area.
RAD79	Development for a material change of use or building work for a Park ⁽⁵⁷⁾ ensures that work is provided in accordance with the requirements set out in Appendix B of the Planning scheme policy - Integrated design.
Riparian and wetland setbacks (refer Overlay map - Riparian and wetland setback to determine if the following requirements apply)	
<p>Note - W1, W2 and W3 waterway and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.</p>	
RAD80	<p>No development is to occur within:</p> <ul style="list-style-type: none"> a. 50m from top of bank for W1 waterway and drainage line b. 30m from top of bank for W2 waterway and drainage line c. 20m from top of bank for W3 waterway and drainage line d. 100m from the edge of a Ramsar wetland, 50m from all other wetlands. <p>Note - W1, W2 and W3 waterways and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.</p>

6 Zones

Note - In some cases, the top of bank may not be easily defined, as such a hydraulic measurement may be applied instead. Moreton Bay Regional Council will provide further direction on how to determine and locate the setback boundary in these locations.

Note - The minimum setback distance applies to the each side of waterway.

Transport noise corridors (refer Overlay map - Transport noise corridors)

Note - This is for information purposes only. No requirements for accepted development or criteria for assessable development apply. Development located within a Transport Noise Corridor must satisfy the requirements of the Queensland Development Code

Part H — Criteria for assessable development- Special use precinct

Where development is categorised as assessable development - code assessment in the Table of Assessment, and located in a precinct, the assessment benchmarks are the criteria set out in Part H, Table 6.2.2.5.2 as well as the purpose statement and overall outcomes of this code.

Where development is categorised as assessable development - impact assessment, the assessment benchmarks become the whole of the planning scheme.

Assessable development - Special use precinct

Performance outcomes	Examples that achieve aspects of the Performance Outcomes
General criteria	
Built form and design outcomes for all development	
<p>PO1</p> <p>Buildings and structures are of a height, scale and bulk which:</p> <ol style="list-style-type: none"> a. is visually compatible with existing buildings or structures; b. is consistent with existing amenity and character and does not appear overbearing, visually dominant or out of character with the surrounding environment; c. minimises the visual impact of large-scale built form; d. does not result in an adverse impact of visual amenity, privacy or impinge upon the receipt of natural sunlight or outlook; e. is designed in accordance with the principles of Crime Prevention Through Environment Design (CPTED) to achieve a high level of safety, surveillance and security. 	<p>E1</p> <p>Building height does not exceed the maximum height identified on Overlay map - Building heights.</p>
PO2	E2.1

<p>Buildings and structures are designed and constructed to:</p> <ul style="list-style-type: none"> a. incorporate a mix of colours and high quality materials to add diversification to treatments and finishes; b. avoid blank walls through façade articulation to create visual interest and deter graffiti and vandalism; c. activate and address the street, public area or public open space; d. reduce cluttering of plant and equipment on building roofs. 	<p>Development provides materials and finishes of a high quality that are not susceptible to stain, discolour or deterioration.</p> <p>E2.2</p> <p>Development incorporates articulated walls with variation, detail and colour to reduce the bulk and impact of development and minimise expansive blank walls.</p> <p>E2.3</p> <p>The main facade of the building directly addresses and faces the street and contains a mix of materials and colours.</p> <p>E2.4</p> <p>Building utilities such as lift motor rooms and telecommunications equipment are designed to be visually integrated with the building.</p>
<p>PO3</p> <p>Development will:</p> <ul style="list-style-type: none"> a. maintain a balance area of the site that is open and uncluttered by building and structures; b. ensure that buildings and structures are not overbearing, visually dominant or out of character with the surrounding built environment nor detract from the amenity of adjoining land. 	<p>E3</p> <p>Site cover of all buildings and structures does not exceed 40%.</p>
Building setbacks	
<p>PO4</p> <p>Building setback:</p> <ul style="list-style-type: none"> a. is sufficient to minimise overlooking and maintain privacy of adjoining properties; b. is sufficient to ensure development is not visually dominant or overbearing on adjoining properties. 	<p>E4</p> <p>Buildings and structures are setback as follows</p> <ul style="list-style-type: none"> a. road frontage - 6m b. side boundary - 3m c. rear boundary - 3m
Building on sloping land between 10% and 15%	
<p>PO5</p> <p>On slopes between 10% and 15%, building and site design must achieve the following:</p> <ul style="list-style-type: none"> a. use split-level, multiple-slab, pier or pole construction; 	<p>E5</p> <p>Building and site design on slopes between 10% and 15%;</p> <ul style="list-style-type: none"> a. use split-level, multiple-slab, pier or pole construction;

6 Zones

<ul style="list-style-type: none"> b. avoid single-plane slabs and benching; c. ensure the height of any cut or fill, whether retained or not, does not exceed 900mm; d. minimise any visual impact on the landscape character; and e. protect the amenity of adjoining properties. 	<ul style="list-style-type: none"> b. avoid single-plane slabs and benching; and c. ensure the height of any cut or fill, whether retained or not, does not exceed 900mm.
Personal and property safety	
<p>PO6</p> <p>Buildings and spaces are designed and constructed to create a safe and secure environment by incorporating key crime prevention through environmental design principles, including:</p> <ul style="list-style-type: none"> a. casual surveillance opportunities and sight lines; b. way-finding cues and signage; c. defined different uses and private and public ownership through adequate fencing and signage; d. light illuminates pathways and potential entrapment areas as well as maximising opportunities for penetration of natural light into spaces; e. minimise predictable routes and entrapment locations. 	<p>No example provided.</p>
Amenity	
<p>PO7</p> <p>The amenity of the area and adjacent sensitive land uses are protected from the impacts of dust, odour, light, chemicals and other environmental nuisances.</p>	<p>No example provided.</p>
<p>Hazardous chemicals</p> <p>Note - To assist in demonstrating compliance with the following performance outcomes, a Hazard Assessment Report may be required to be prepared and submitted by a suitably qualified person in accordance with 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.</p> <p>Note - Terms used in this section are defined in 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.</p>	
<p>PO8</p> <p>Off sites risks from foreseeable hazard scenarios involving hazardous chemicals are commensurate with the sensitivity of the surrounding land use zones.</p>	<p>E8.1</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of land zoned for vulnerable or sensitive land uses as described below:</p>

	<p>Dangerous Dose</p> <ul style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ul style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. b. For any hazard scenario involving fire or explosion: <ul style="list-style-type: none"> i. 7kPa overpressure; ii. 4.7kW/m2 heat radiation. <p>If criteria E8.1 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 0.5×10^{-6}/year.</p> <hr/> <p>E8.2</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of a commercial or community activity land use zone as described below:</p> <p>Dangerous Dose</p> <ul style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ul style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. b. For any hazard scenario involving fire or explosion: <ul style="list-style-type: none"> i. 7kPa overpressure; ii. 4.7kW/m2 heat radiation. <p>If criteria E8.2 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 5×10^{-6}/year.</p> <hr/> <p>E8.3</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of an industrial land use zone as described below:</p> <p>Dangerous Dose</p>
--	--

6 Zones

	<p>a. For any hazard scenario involving the release of gases or vapours:</p> <ul style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. <p>b. For any hazard scenario involving fire or explosion:</p> <ul style="list-style-type: none"> i. 14kPa overpressure; ii. 12.6kW/m² heat radiation. <p>If criteria E8.3 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 50 x 10⁻⁶/year.</p>
<p>PO9</p> <p>Buildings and package stores containing fire-risk hazardous chemicals are designed to detect the early stages of a fire situation and notify a designated person.</p>	<p>E9</p> <p>Buildings and package stores containing fire-risk hazardous chemicals are provided with 24 hour monitored fire detection system for early detection of a fire event.</p>
<p>PO10</p> <p>Common storage areas containing packages of flammable and toxic hazardous chemicals are designed with spill containment system(s) that are adequate to contain releases, including fire fighting media.</p>	<p>E10</p> <p>Storage areas containing packages of flammable and toxic hazardous chemicals are designed with spill containment system(s) capable of containing a minimum of the total aggregate capacity of all packages plus the maximum operating capacity of any fire protection system for the storage area(s) over a minimum of 60 minutes.</p>
<p>PO11</p> <p>Storage and handling areas, including manufacturing areas, containing hazardous chemicals in quantities greater than 2,500L or kg within a Local Government “flood hazard area” are located and designed in a manner to minimise the likelihood of inundation of flood waters from creeks, rivers, lakes or estuaries.</p>	<p>E11.1</p> <p>The base of any tank with a WC >2,500L or kg is higher than any relevant flood height level identified in an area’s flood hazard area. Alternatively:</p> <ul style="list-style-type: none"> a. bulk tanks are anchored so they cannot float if submerged or inundated by water; and b. tank openings not provided with a liquid tight seal, i.e. an atmospheric vent, are extended above the relevant flood height level. <p>E11.2</p> <p>The lowest point of any storage area for packages >2,500L or kg is higher than any relevant flood height level identified in an area’s flood hazard area. Alternatively, package stores are provided with impervious bund walls or racking systems higher than the relevant flood height level.</p>

Car parking	
<p>PO12</p> <p>Traffic generation, vehicle movement and on-site car parking associated with an activity:</p> <ol style="list-style-type: none"> a. provides safe, convenient and accessible access for vehicles and pedestrians; b. provides safe and convenient on-site parking and manoeuvring to meet anticipated parking demand; c. is appropriate to the road classification and carrying capacity of the local network and able to meet the additional demands generated by the development; d. does not result adverse impacts on the efficient and safe functioning of the road network. <p>Note - Refer to Planning scheme policy - Integrated transport assessment for guidance on how to achieve compliance with this outcome.</p>	<p>E12</p> <p>On-site car parking is provided in accordance with Schedule 7 - Car parking.</p>
Bicycle parking and end of trip facilities	
<p>Note - Building work to which this code applies constitutes Major Development for purposes of development requirements for end of trip facilities prescribed in the Queensland Development Code MP 4.1.</p>	
<p>PO13</p> <ol style="list-style-type: none"> a. End of trip facilities are provided for employees or occupants, in the building or on-site within a reasonable walking distance, and include: <ol style="list-style-type: none"> i. adequate bicycle parking and storage facilities; and ii. adequate provision for securing belongings; and iii. change rooms that include adequate showers, sanitary compartments, wash basins and mirrors. b. Notwithstanding a. there is no requirement to provide end of trip facilities if it would be unreasonable to provide these facilities having regard to: <ol style="list-style-type: none"> i. the projected population growth and forward planning for road upgrading and development of cycle paths; or 	<p>E13.1</p> <p>Minimum bicycle parking facilities are provided at a rate of 1 bicycle parking space for every 3 vehicles parking spaces required by Schedule 7 – Car parking.</p> <p>Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is a combination of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.</p> <hr/> <p>E13.2</p> <p>Bicycle parking is:</p> <ol style="list-style-type: none"> a. provided in accordance with <i>Austroads (2008), Guide to Traffic Management - Part 11: Parking</i>; b. protected from the weather by its location or a dedicated roof structure;

6 Zones

- ii. whether it would be practical to commute to and from the building on a bicycle, having regard to the likely commute distances and nature of the terrain; or
- iii. the condition of the road and the nature and amount of traffic potentially affecting the safety of commuters.

Editor's note - The intent of b above is to ensure the requirements for bicycle parking and end of trip facilities are not applied in unreasonable circumstances. For example these requirements should not, and do not apply in the Rural zone or the Rural residential zone etc.

Editor's note - This performance outcome is the same as the Performance Requirement prescribed for end of trip facilities under the Queensland Development Code. For development incorporating building work, that Queensland Development Code performance requirement cannot be altered by a local planning instrument and has been reproduced here solely for information purposes. Council's assessment in its building work concurrence agency role for end of trip facilities will be against the performance requirement in the Queensland Development Code. As it is subject to change at any time, applicants for development incorporating building work should ensure that proposals that do not comply with the examples under this heading meet the current performance requirement prescribed in the Queensland Development Code.

- c. located within the building or in a dedicated, secure structure for residents and staff;
- d. adjacent to building entrances or in public areas for customers and visitors.

Note - Bicycle parking structures are to be constructed to the standards prescribed in AS2890.3.

Note - Bicycle parking and end of trip facilities provided for residential and non-residential activities may be pooled, provided they are within 100 metres of the entrance to the building.

Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is an amalgamation of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.

E13.3

For non-residential uses, storage lockers:

- a. are provide at a rate of 1.6 per bicycle parking space (rounded up to the nearest whole number);
- b. have minimum dimensions of 900mm (height) x 300mm (width) x 450mm (depth).

Note - Storage lockers may be pooled across multiple sites and activities when within 100 metres of the entrance to the building and within 50 metres of bicycle parking and storage facilities.

Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is an amalgamation of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.

E13.4

For non-residential uses, changing rooms:

- a. are provided at a rate of 1 per 10 bicycle parking spaces;
- b. are fitted with a lockable door or otherwise screened from public view;
- c. are provided with shower(s), sanitary compartment(s) and wash basin(s) in accordance with the table below:

Bicycle spaces provided	Male/ Female	Change rooms required	Showers required	Sanitary compartments required	Washbasins required
-------------------------	--------------	-----------------------	------------------	--------------------------------	---------------------

	1-5	Male and female	1 unisex change room	1	1 closet pan	1
	6-19	Female	1	1	1 closet pan	1
	20 or more	Male	1	1	1 closet pan	1
		Female	1	2, plus 1 for every 20 bicycle spaces provided thereafter	2 closet pans, plus 1 sanitary compartment for every 60 bicycle parking spaces provided thereafter	1, plus 1 for every 60 bicycle parking spaces provided thereafter
		Male	1	2, plus 1 for every 20 bicycle spaces provided thereafter	1 urinal and 1 closet pans, plus 1 sanitary compartment at the rate of 1 closet pan or 1 urinal for every 60 bicycle space provided thereafter	1, plus 1 for every 60 bicycle parking spaces provided thereafter
	<p>Note - All showers have a minimum 3-star Water Efficiency Labelling and Standards (WELS) rating shower head.</p> <p>Note - All sanitary compartments are constructed in compliance with F2.3 (e) and F2.5 of BCA (Volume 1).</p> <p>d. are provided with:</p> <ol style="list-style-type: none"> i. a mirror located above each wash basin; ii. a hook and bench seating within each shower compartment; iii. a socket-outlet located adjacent to each wash basin. <p>Note - Change rooms may be pooled across multiple sites, residential and non-residential activities when within 100 metres of the entrance to the building and within 50 metres of bicycle parking and storage facilities</p> <p>Editor's note - The examples for end of trip facilities prescribed under the Queensland Development Code permit a local planning instrument to prescribe facility levels higher than the default levels identified in those acceptable solutions. This example is an amalgamation of the default levels set for end of trip facilities in the Queensland Development Code and the additional facilities required by Council.</p>					
Landscaping and screening						
PO14	No example provided.					
Landscaping and screening is provided in a manner that:						
a. achieves a high level of privacy and amenity to sensitive land uses on adjoining properties and when viewed from the street;						

6 Zones

<ul style="list-style-type: none"> b. reduces the visual impact of building bulk and presence and hard surface areas on the local character and amenity of adjoining sensitive land uses and from the street; c. creates a secure and safe environment by incorporating key elements of crime prevention through environmental design; d. achieves the design principles outlined in Planning scheme policy - Integrated design. 	
Loading and servicing	
<p>PO15</p> <p>Loading and servicing areas:</p> <ul style="list-style-type: none"> a. are not visible from the street frontage; b. are integrated into the design of the building; c. include screening and buffers to reduce negative impacts on adjoining sensitive land uses; d. where possible loading and servicing areas are consolidated and shared with adjoining sites. 	<p>No example provided.</p>
Waste	
<p>PO16</p> <p>Bins and bin storage areas are provided, designed and managed in accordance with Planning scheme policy – Waste.</p>	<p>No example provided:</p> <p>E16</p> <p>Development is designed to meet the criteria in the Planning scheme policy - Waste and is demonstrated in a waste management program.</p>
Noise	
<p>PO17</p> <p>Noise generating uses do not adversely affect existing noise sensitive uses.</p> <p>Note - The use of walls, barriers or fences that are visible from or adjoin a road or public area are not appropriate noise attenuation measures unless adjoining a motorway, arterial road or rail line.</p> <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p>	<p>No example provided.</p>
<p>PO18</p> <p>Sensitive land uses are provided with an appropriate acoustic environment within designated external private outdoor living spaces and internal areas while:</p>	<p>E18.1</p> <p>Development is designed to meet the criteria outlined in the Planning Scheme Policy – Noise.</p>

<p>a. contributing to safe and usable public spaces, through maintaining high levels of surveillance of parks, streets and roads that serve active transport purposes (e.g. existing or future pedestrian paths or cycle lanes etc);</p> <p>b. maintaining the amenity of the streetscape.</p> <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p> <p>Note - Refer to Planning Scheme Policy – Integrated design for details and examples of noise attenuation structures.</p>	<p>E18.2</p> <p>Noise attenuation structures (e.g. walls, barriers or fences):</p> <p>a. are not visible from an adjoining road or public area unless:</p> <p>i. adjoining a motorway or rail line; or</p> <p>ii. adjoining part of an arterial road that does not serve an existing or future active transport purpose (e.g. pedestrian paths or cycle lanes) or where attenuation through building location and materials is not possible.</p> <p>b. do not remove existing or prevent future active transport routes or connections to the street network;</p> <p>c. are located, constructed and landscaped in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Refer to Planning scheme policy – Integrated design for details and examples of noise attenuation structures.</p> <p>Note - Refer to Overlay map – Active transport for future active transport routes.</p>
---	---

Clearing of habitat trees where not located within the Environmental areas overlay map

<p>PO19</p> <p>a. Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected.</p> <p>b. Development does not result in the net loss of fauna habitat. Where development does result in the loss of a habitat tree, development will provide replacement fauna nesting boxes at the following rate of 1 nest box for every hollow removed. Where hollows have not yet formed in trees > 80cm in diameter at 1.3m height, 3 nest boxes are required for every habitat tree removed.</p> <p>c. Development does not result in soil erosion or land degradation or leave land exposed for an unreasonable period of time but is rehabilitated in a timely manner</p> <p>Note: Further guidance on habitat trees is provided in Planning scheme policy - Environmental areas</p>	<p>No example provided.</p>

Utilities	
<p>All services including water supply, sewage disposal, electricity, street lighting, telecommunications and gas (if available) are provided in a manner that:</p> <ol style="list-style-type: none"> is effective in delivery of service and meets reasonable community expectations; has capacity to service the maximum lot yield envisaged for the zone and the service provider's design assumptions; ensures a logical, sequential, efficient and integrated roll out of the service network; is conveniently accessible in the event of maintenance or repair; minimises whole of life cycle costs for that infrastructure; minimises risk of potential adverse impacts on the natural and built environment; minimises risk of potential adverse impact on amenity and character values; recognises and promotes Councils Total Water Cycle Management policy and the efficient use of water resources. 	<p>Development is provided with an appropriate level of service and infrastructure in accordance with Planning scheme policy - Integrated design (Appendix A).</p>
<p>PO20</p> <p>Where the site adjoins or is opposite to a Park⁽⁵⁷⁾; foreshore or Humpybong Reserve all existing overhead power lines are to be undergrounded for the full frontage of the site.</p>	<p>No example provided.</p>
<p>PO21</p> <p>The development is connected to an existing reticulated electricity supply system approved by the relevant energy regulating authority.</p>	<p>E21</p> <p>Development is connected to underground electricity.</p>
<p>PO22</p> <p>The development has access to telecommunications and broadband services in accordance with current standards.</p>	<p>No example provided.</p>
<p>PO23</p> <p>Where available the development is to safely connect to reticulated gas.</p>	<p>No example provided.</p>
<p>PO24</p>	<p>E24.1</p>

Utilities	
<p>The development provides for the treatment and disposal of sewage and other waste water in a way that will not cause environmental harm or pose a risk to public health.</p>	<p>Where in a sewerage area, the development is connected to a reticulated sewerage network.</p>
	<p>E24.2</p> <p>Where not in a sewerage area, the development is serviced by an appropriate on-site sewerage facility.</p> <p>Note – A site and soil evaluation report is generally required to demonstrate compliance with this outcome. Reports are to be prepared in accordance with AS1547 On-site domestic wastewater management and the Queensland Plumbing and Wastewater Code.</p>
	<p>E24.3</p> <p>Trade waste is pre-treated on-site prior to discharging into the sewerage network.</p>
<p>PO25</p> <p>The development is provided with an adequate and sustainable supply of potable (drinking and general use e.g. gardening, washing, fire fighting) water.</p>	<p>E25.1</p> <p>Where in an existing connections area or a future connections area as detailed in the Unitywater Connections Policy, the development is connected to the reticulated water supply system in accordance with the South East Queensland Water Supply and Sewerage Design and Construction Code and the relevant Water Service Association of Australia (WSAA) codes and standards.</p>
	<p>E25.2</p> <p>Where not in an existing connections area or a future connections area as detailed in the Unitywater Connections Policy, the development is provided with an adequate water supply of 45,000 litres by way of on-site storage which provides equivalent water quality and reliability to support the use requirements of the development.</p>
<p>PO26</p> <p>The development is provided with constructed and dedicated road access.</p>	<p>No example provided.</p>
Access	
<p>PO27</p> <p>Development provides functional and integrated car parking and vehicle access, that:</p> <p>a. prioritises the movement and safety of pedestrians between car parking areas at the rear through to</p>	<p>No example provided.</p>

6 Zones

<p>the 'main street' and the entrance to the building (e.g. rear entry, arcade etc.);</p> <ul style="list-style-type: none"> b. provides safety and security of people and property at all times; c. does not impede active transport options; d. does not impact on the safe and efficient movement of traffic external to the site; e. where possible vehicle access points are consolidated and shared with adjoining sites. <p>Note - Refer to Planning scheme policy - Centre and neighbourhood hub design for details and examples.</p>	
<p>PO28</p> <p>Where required, access easements contain a driveway and provision for services appropriate to the use. The easement covers all works associated with the access in accordance with Planning scheme policy - Integrated design.</p>	<p>No example provided.</p>
<p>PO29</p> <p>The layout of the development does not compromise:</p> <ul style="list-style-type: none"> a. the development of the road network in the area; b. the function or safety of the road network; c. the capacity of the road network. <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p>	<p>E29.1</p> <p>Direct vehicle access for residential development does not occur from arterial or sub-arterial roads or a motorway.</p> <p>Editor's note - Residential developments should consider amalgamation with the lot to the rear and gaining access via a laneway.</p> <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p>
	<p>E29.2</p> <p>The development provides for the extension of the road network in the area in accordance with Council's road network planning.</p>
	<p>E29.3</p> <p>The development does not compromise future road widening of frontage roads in accordance with the relevant standard and Council's road planning.</p>
	<p>E29.4</p> <p>The lot development layout allows forward vehicular access to and from the site.</p>
<p>PO30</p> <p>Safe access is provided for all vehicles required to access the site.</p>	<p>E30.1</p> <p>Site access and driveways are designed and, located and constructed in accordance with:</p>

	<p>a. where for a Council-controlled road and associated with a Dwelling house:</p> <p>i. Planning scheme policy - Integrated design;</p> <p>b. Where for a Council-controlled road; and not associated with a Dwelling house:</p> <p>i. AS/NZS2890.1 section 3; or Parking facilities Part 1: Off street car parking;</p> <p>ii. AS 2890.2 - Parking facilities Part 2: Off-street commercial vehicle facilities;</p> <p>iii. Planning scheme policy - Integrated design;</p> <p>iv. Schedule 8 - Service vehicle requirements;</p> <p>c. Where for a State-Controlled road, the Safe Intersection Sight Distance requirements in AustRoads and the appropriate IPWEAQ standard drawings, or a copy of a Transport Infrastructure Act 1994, section 62 approval.</p>
	<p>E30.2</p> <p>Internal driveways, car parks and access ways are designed and constructed with a sealed pavement and in accordance with:</p> <p>a. AS/NZS 2890.1 Parking Facilities Part 1: Off street car parking;</p> <p>b. AS 2890.2 Parking Facilities Part 2: Off street commercial vehicle facilities; and</p> <p>c. the relevant standards in Planning scheme policy - Integrated design; and</p> <p>d. Schedule 8 - Service vehicle requirements.</p> <p>Note - This includes queue lengths (refer to Schedule 8 - Service vehicle requirements), pavement widths and construction.</p>
	<p>E30.3</p> <p>Access driveways, manoeuvring areas and loading facilities are sealed and provide for service vehicles listed in Schedule 8 - Service vehicle requirements for the relevant use. The on-site manoeuvring is to be in accordance with Schedule 8 - Service vehicle requirements.</p>
	<p>E</p>

6 Zones

	<p>Landscaping (including shade trees) is provided within car parks in accordance with Planning scheme policy - Integrated design.</p>
<p>PO</p> <p>Sealed and flood free road access during the minor storm event is available to the site from the nearest arterial or sub-arterial road.</p> <p>Editor's Note - Where associated with a State-controlled road, further requirements may apply, and approvals may be required from the Department of Transport and Main Roads.</p>	<p>E</p> <p>Roads or streets giving access to the development from the nearest arterial or sub-arterial road are flood free during the minor storm event and are sealed.</p> <p>Note - The road network is mapped on Overlay Map - Road Hierarchy.</p>
<p>PO</p> <p>Roads which provide access to the site from an arterial or sub-arterial road remain trafficable during major storm events without flooding or impacting upon residential properties or other premises.</p>	<p>E</p> <p>Access roads to the development have sufficient longitudinal and cross drainage to remain safely trafficable during major storm (1% AEP) events.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - Refer to QUDM for requirements regarding trafficability.</p>
	<p>E</p> <p>Culverts and causeways do not increase inundation levels or increase velocities, for all events up to the defined flood event, to upstream or downstream properties.</p>

Street design and layout	
<p>PO</p> <p>Streets are designed and constructed in accordance with Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures. The street design and construction accommodates the following functions:</p> <ol style="list-style-type: none"> a. access to premises by providing convenient vehicular movement for residents between their homes and the major road network; b. safe and convenient pedestrian and cycle movement; c. adequate on street parking; d. stormwater drainage paths and treatment facilities; e. efficient public transport routes; f. utility services location; 	<p>No example provided</p>

<p>g. emergency access and waste collection;</p> <p>h. setting and approach (streetscape, landscaping and street furniture) for adjoining residences;</p> <p>i. expected traffic speeds and volumes; and</p> <p>j. wildlife movement.</p> <p>Note - Preliminary road design (including all services, street lighting, stormwater infrastructure, access locations, street trees and pedestrian network) may be required to demonstrate compliance with this PO.</p> <p>Note - Refer to Planning scheme policy - Environmental areas and corridors for examples of when and where wildlife movement infrastructure is required.</p>	
<p>PO31</p> <p>Upgrade works (whether trunk or non-trunk) are provided where necessary to:-</p> <p>a. ensure the type or volume of traffic generated by the development does not have a negative impact on the external road network;-</p> <p>b. ensure the orderly and efficient continuation of the active transport network;-</p> <p>c. ensure the site frontage is constructed to a suitable urban standard generally in accordance with Planning scheme policy -- Integrated design.</p> <p>Note -- An Integrated Transport Assessment (ITA) may be required to demonstrate compliance with this performance outcome refer to Planning scheme policy -- Integrated transport assessment for guidance on when an ITA is required. An ITA should be prepared in accordance with Planning scheme policy -- Integrated transport assessment.</p> <p>Note -- The road network is mapped on Overlay map -- Road hierarchy.</p> <p>Note -- The primary and secondary active transport network is mapped on Overlay map -- Active transport</p> <p>Note -- To demonstrate compliance with c. of this performance outcome, site frontage works where in existing road reserve (non-trunk) are to be designed and constructed as follows:</p> <p>i. Where the street is partially established to an urban standard, match the alignment of existing kerb and channel and provide carriageway widening and underground drainage where required;- or</p> <p>ii. Where the street is not established to an urban standard, prepare a design that demonstrates how the relevant features of the particular road as shown in the Planning scheme policy -- Integrated Design can be achieved in the existing reserve.</p> <p>Note -- Refer to Planning scheme policy -- Integrated design for road network and active transport network design standards:</p>	<p>E</p> <p>No example provided:</p> <p>New intersections onto existing roads are designed to accommodate traffic volumes and traffic movements taken from a date 10 years from the date of completion of the last stage of the development. Detailed design is to be in accordance with Planning scheme policy - Integrated design.</p> <p>Note - All turns vehicular access to existing lots is to be retained at new road intersections wherever practicable.</p> <p>Note - Existing on-street parking is to be retained at new road intersections and along road frontages wherever practicable.</p> <p>E</p> <p>Existing intersections external to the site are upgraded as necessary to accommodate increased traffic from the development. Design is in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p> <p>Note - All turns vehicular access to existing lots is to be retained at new road intersections wherever practicable.</p> <p>Note - Existing on-street parking is to be retained at upgraded road intersections and along road frontages wherever practicable.</p> <p>E</p> <p>The active transport network is extended in accordance with Planning scheme policy - Integrated design.</p>

6 Zones

<p>The existing road network (whether trunk or non-trunk) is upgraded where necessary to cater for the impact from the development.</p> <p>Note - An applicant will be required to submit an Integrated Transport Assessment (ITA), prepared in accordance with Planning scheme policy - Integrated transport assessment to demonstrate compliance with this PO, when any of the following occurs;</p> <ul style="list-style-type: none"> • development is within 200m of a transport sensitive location such as a school, shopping centre, bus or train station or a large generator of pedestrian or vehicular traffic; • forecast traffic to/from the development exceeds 5% of the two way flow on the adjoining road or intersection in the morning or afternoon transport peak within 10 years of the development completion; • Development access onto a sub arterial, or arterial road or within 100m of a signalised intersection; • Residential development greater than 50 lots or dwellings; • Offices greater than 4,000m² Gross Floor Area (GFA); • Retail activities including Hardware and trade supplies; • Showroom, Shop or Shopping centre greater than 1,000m² GFA; • Warehouses and Industry greater than 6000m² GFA; • On-site carpark greater than 100 spaces; • Development has a trip generation rate of 100 vehicles or more within the peak hour; • Development which dissects or significantly impacts on an environmental area or an environmental corridor. <p>The ITA is to review the development's impact upon the external road network for the period of 10 years from completion of the development. The ITA is to provide sufficient information for determining the impact and the type and extent of any ameliorative works required to cater for the additional traffic. The ITA must include a future structural road layout of adjoining properties that will form part of this catchment and road connecting to these properties. The ITA is to assess the ultimate developed catchment's impacts and necessary ameliorative works, and the works or contribution required by the applicant as identified in the study.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - The primary and secondary active transport network is mapped on Overlay map - Active transport.</p>	
<p>PO</p> <p>All Council controlled frontage roads are designed and constructed in accordance with Planning scheme policy - Integrated design and Planning scheme policy -</p>	<p>E</p> <p>Design and construct all Council controlled frontage roads in accordance with Planning scheme policy - Integrated design, Planning scheme policy - Operational works inspection, maintenance and bonding procedures and the following:</p>

<p>Operational works inspection, maintenance and bonding procedures. All new works are extended to join any existing works within 20m.</p> <p>Note - Frontage roads include streets where no direct lot access is provided.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - The Primary and Secondary active transport network is mapped on Overlay map - Active transport.</p> <p>Note - Roads are considered to be constructed in accordance with Council's standards when there is sufficient pavement width, geometry and depth to comply with the requirements of Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p>	<table border="1"> <thead> <tr> <th data-bbox="810 201 1134 259">Situation</th> <th data-bbox="1142 201 1453 259">Minimum construction</th> </tr> </thead> <tbody> <tr> <td data-bbox="810 271 1134 371"> Frontage road unconstructed or gravel road only; </td> <td data-bbox="1142 271 1453 719" rowspan="3"> Construct the verge adjoining the development and the carriageway (including development side kerb and channel) to a minimum sealed width containing near side parking lane (if required), cycle lane (if required), 2 travel lanes plus 1.5m wide (full depth pavement) gravel shoulder and table drainage to the opposite side. </td> </tr> <tr> <td data-bbox="810 394 1134 618"> OR Frontage road sealed but not constructed* to Planning scheme policy - Integrated design standard; </td> </tr> <tr> <td data-bbox="810 640 1134 831"> OR Frontage road partially constructed* to Planning scheme policy - Integrated design standard. </td> </tr> <tr> <td colspan="2" data-bbox="1142 741 1453 999"> The minimum total travel lane width is: <ul style="list-style-type: none"> • 6m for minor roads; • 7m for major roads. </td> </tr> </tbody> </table> <p>Note - Major roads are sub-arterial roads and arterial roads. Minor roads are roads that are not major roads.</p> <p>Note - Construction includes all associated works (services, street lighting and linemarking).</p> <p>Note - Alignment within road reserves is to be agreed with Council.</p> <p>Note - *Roads are considered to be constructed in accordance with Council standards when there is sufficient pavement width, geometry and depth to comply with the requirements of Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures. Testing of the existing pavement may be required to confirm whether the existing works meet the standards in Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p>	Situation	Minimum construction	Frontage road unconstructed or gravel road only;	Construct the verge adjoining the development and the carriageway (including development side kerb and channel) to a minimum sealed width containing near side parking lane (if required), cycle lane (if required), 2 travel lanes plus 1.5m wide (full depth pavement) gravel shoulder and table drainage to the opposite side.	OR Frontage road sealed but not constructed* to Planning scheme policy - Integrated design standard;	OR Frontage road partially constructed* to Planning scheme policy - Integrated design standard.	The minimum total travel lane width is: <ul style="list-style-type: none"> • 6m for minor roads; • 7m for major roads. 	
Situation	Minimum construction								
Frontage road unconstructed or gravel road only;	Construct the verge adjoining the development and the carriageway (including development side kerb and channel) to a minimum sealed width containing near side parking lane (if required), cycle lane (if required), 2 travel lanes plus 1.5m wide (full depth pavement) gravel shoulder and table drainage to the opposite side.								
OR Frontage road sealed but not constructed* to Planning scheme policy - Integrated design standard;									
OR Frontage road partially constructed* to Planning scheme policy - Integrated design standard.									
The minimum total travel lane width is: <ul style="list-style-type: none"> • 6m for minor roads; • 7m for major roads. 									

Stormwater	
<p>PO</p> <p>Minor stormwater drainage systems (internal and external) have the capacity to convey stormwater flows from frequent storm events for the fully developed upstream catchment whilst ensuring pedestrian and vehicular traffic movements are safe and convenient.</p>	<p>E</p> <p>The capacity of all minor drainage systems are designed in accordance with Planning scheme policy - Integrated design.</p> <hr/> <p>E</p> <p>Stormwater pipe network capacity is to be calculated in accordance with the Hydraulic Grade Line method as detailed in Australian Rainfall and Runoff or QUDM.</p>

6 Zones

	<p>E</p> <p>Development ensures that roof and allotment drainage infrastructure is provided in accordance with the relevant level as identified in QUDM.</p>
<p>PO</p> <p>Major stormwater drainage system(s) have the capacity to safely convey stormwater flows for the 1% AEP event for the fully developed upstream catchment.</p>	<p>E</p> <p>The internal drainage system safely and adequately conveys the stormwater flows for the 1% AEP event for the fully developed upstream catchment through the site.</p> <p>E</p> <p>The external (downstream) drainage system safely conveys the stormwater flows for the 1% AEP event for the fully developed upstream catchment without allowing the flows to encroach upon private lots.</p> <p>E</p> <p>Overland flow paths from roads and public open space areas do not pass through private lots. Drainage pathways are provided to accommodate overland flows from roads and public open space areas.</p> <p>E</p> <p>The flow velocity in all unlined or soft faced open drains is kept within acceptable limits for the type of material or lining and condition of the channel.</p> <p>Note - Refer to QUDM for recommended average flow velocities.</p>
<p>PO</p> <p>Provide measures to properly manage surface flows for the 1% AEP event (for the fully developed catchment) draining to and through the land to ensure no actionable nuisance is created to any person or premises as a result of the development. The development must not result in ponding on adjacent land, redirection of surface flows to other premises or blockage of a surface flow relief path for flows exceeding the design flows for any underground system within the development.</p>	<p>E</p> <p>The stormwater drainage system is designed and constructed in accordance with Planning scheme policy - Integrated design.</p>
<p>PO32</p> <p>Stormwater run-off from the site is conveyed to a point of lawful discharge without causing actionable nuisance or annoyance to any person, property or premises.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details.</p>	<p>No example provided.</p>

<p>Note - A downstream drainage discharge report in accordance with Planning scheme policy - Stormwater management may be required to demonstrate achievement of this performance outcome.</p> <p>Note - A watercourse as defined in the Water Act may be accepted as a lawful point of discharge providing the drainage discharge from the site does not increase the downstream flood levels during events up to and including the 1% AEP storm. An afflux of +20mm may be accepted on Council controlled land and road infrastructure. No worsening is ensured when stormwater is discharged into a catchment that includes State Transport Infrastructure.</p>	
<p>PO33</p> <p>Stormwater generated from the development does not compromise the capacity of existing stormwater infrastructure downstream of the site.</p> <p>Note - A downstream drainage discharge report in accordance with Planning scheme policy - Stormwater management may be required to demonstrate achievement of this performance outcome.</p>	<p>No example provided.</p>
<p>PO34</p> <p>Stormwater quality management systems are designed and constructed to minimise the environmental impact of stormwater discharge on surface and underground receiving water quality and meet the design objectives in Tables A and B in Appendix 2 of the SPP.</p> <p>Note - A stormwater management plan prepared by a suitably qualified professional will be required in accordance with Planning scheme policy - Stormwater management.</p> <p>Where development:</p> <ol style="list-style-type: none"> is for an urban purpose that involves a land area 2500m² or greater in size; and results in 6 or more dwellings; or results in an impervious area greater than 25% of the net developable area, <p>stormwater quality management systems are designed, constructed, established and maintained to minimise the environmental impact of stormwater on surface, groundwater and receiving water environments and meet the design objectives outlined in Schedule 10 - Stormwater management design objectives.</p> <p>Note - A site based stormwater management plan prepared by a suitably qualified professional will be required in accordance with Planning Scheme Policy - Stormwater Management. Stormwater quality infrastructure is to be design in accordance with Planning scheme policy - Integrated Design (Appendix C).</p>	<p>No example provided.</p>

6 Zones

<p>PO35</p> <p>Easements for drainage purposes are provided over:</p> <ol style="list-style-type: none"> stormwater pipes located in freehold land if the pipe diameter exceeds 300mm; overland flow paths where they cross more than one property boundary. <p>Note – Refer to Planning scheme policy – Integrated design for details:</p> <p>Note – Stormwater Drainage easement dimensions are provided in accordance with Section 3.8.5 of QUDM:</p> <p>Stormwater drainage pipes and structures through or within private land (including inter-allotment drainage) are protected by easements in favour of Council with sufficient area for practical access for maintenance purposes.</p> <p>Note - In order to achieve a lawful point of discharge, stormwater easements may also be required over temporary drainage channels/infrastructure where stormwater discharges to a balance lot prior to entering Council's stormwater drainage system.</p>	<p>E</p> <p>No example provided:</p> <p>Stormwater drainage infrastructure (excluding detention and bio-retention systems) through or within private land (including inter-allotment drainage) is protected by easements in favour of Council. Minimum easement widths are as follows:</p> <table border="1" data-bbox="810 506 1466 1032"> <thead> <tr> <th>Pipe Diameter</th> <th>Minimum easement width (excluding access requirements)</th> </tr> </thead> <tbody> <tr> <td>Stormwater pipe up to 825mm diameter</td> <td>3.0m</td> </tr> <tr> <td>Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter</td> <td>4.0m</td> </tr> <tr> <td>Stormwater pipe greater than 825mm diameter</td> <td>Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).</td> </tr> </tbody> </table> <p>Note - Additional easement width may be required in certain circumstances in order to facilitate maintenance access to the stormwater system.</p> <p>Note - Refer to Planning Scheme Policy - Integrated Design (Appendix C) for easement requirements over open channels.</p>	Pipe Diameter	Minimum easement width (excluding access requirements)	Stormwater pipe up to 825mm diameter	3.0m	Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter	4.0m	Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).
Pipe Diameter	Minimum easement width (excluding access requirements)								
Stormwater pipe up to 825mm diameter	3.0m								
Stormwater pipe up to 825mm diameter with sewer pipe up to 225m diameter	4.0m								
Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the stormwater pipe (each side).								
<p>PO</p> <p>Stormwater management facilities (excluding outlets) are located outside of riparian areas and prevent increased channel bed and bank erosion.</p>	<p>No example provided.</p>								

Site works and construction management	
<p>PO36</p> <p>The site and any existing structures are maintained in a tidy and safe condition.</p>	<p>No example provided.</p>
<p>PO37</p> <p>All works on-site are managed to:</p> <ol style="list-style-type: none"> minimise as far as practicable, impacts on adjoining or adjacent premises and the streetscape in regard to erosion and sedimentation, dust, noise, safety and light; 	<p>E37.1</p> <p>Works incorporate temporary stormwater runoff, erosion and sediment controls and trash traps removal devices designed in accordance with the Urban Stormwater Quality Planning Guidelines, State Planning Policy, Schedule 10 - Stormwater management design objectives, Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design, including but not limited to the following:</p>

<p>b. minimise as far as possible, impacts on the natural environment;</p> <p>c. ensure stormwater discharge is managed in a manner that does not cause actionable nuisance or annoyance to any person or premises;</p> <p>d. avoid adverse impacts on street trees and their critical root zone.</p>	<p>a. stormwater is not discharged to adjacent properties in a manner that differs significantly from pre-existing conditions;</p> <p>b. stormwater discharged to adjoining and downstream properties does not cause scour and or erosion of any kind;</p> <p>c. stormwater discharge rates do not exceed pre-existing conditions;</p> <p>d. the 10% AEP storm event is the minimum design storm for all temporary diversion drains; and</p> <p>e. the 50% AEP storm event is the minimum design storm for all silt barriers and sedimentation basins.</p> <p>f. minimum design storm for all temporary diversion drains and sedimentation basins in accordance with Schedule 10 - Stormwater management design objectives;</p> <p>g. ponding or concentration of stormwater does not occur in adjoining properties.</p>
	<p>E37.2</p> <p>Stormwater runoff, erosion and sediment controls are constructed in accordance with Planning scheme policy - Integrated design (Appendix C) prior to commencement of any clearing or earthworks and are maintained and adjusted as necessary at all times to ensure their ongoing effectiveness.</p> <p>Note - The measures are adjusted on-site to maximise their effectiveness.</p>
	<p>E37.3</p> <p>The completed earthworks area is stabilised using turf, established grass seeding, mulch or sprayed stabilisation techniques to control erosion and sediment and dust from leaving the property.</p>
	<p>E37.4</p> <p>Where works are proposed in proximity to an existing street tree, an inspection and a root management plan is undertaken by a qualified arborist which demonstrates and ensures that no permanent damage is caused to the tree.</p> <p>Existing street trees are protected and not damaged during works.</p>

6 Zones

	<p>Note - Where development occurs in the tree protection zone, measures and techniques as detailed in Australian Standard AS 4970 Protection of trees on development sites are adopted and implemented.</p>
<p>PO38</p> <p>Dust suppression measures are implemented during soil disturbances and construction works to protect nearby premises from unreasonable dust impacts.</p>	<p>E38</p> <p>No dust emissions extend beyond the boundaries of the site during soil disturbances and construction works.</p>
<p>PO39</p> <p>All development works on-site and including the transportation of material to and from the site are managed to not negatively impact the existing road network, the amenity of the surrounding area or the streetscape.</p> <p>Note – Where the amount of imported or exported material is greater than 50m³, a haulage route must be identified and approved by Council:</p> <p>Note - A Traffic Management Plan may be required to demonstrate compliance with this PO. A Traffic Management Plan is to be prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD).</p> <p>Note - A haulage route must be identified and approved by Council where imported or exported material is transported to the site via a road of Local Collector standard or less, and:</p> <ol style="list-style-type: none"> the aggregate volume of imported or exported material is greater than 1000m³; or the aggregate volume of imported or exported material is greater than 200m³ per day; or the proposed haulage route involves a vulnerable land use or shopping centre. <p>Note - A dilapidation report (including photographs) may be required for the haulage route to demonstrate compliance with this PO.</p> <p>Editor's note - Where associated with a State-controlled road, further requirements may apply, and approval may be required from the Department of Transport and Main Roads.</p>	<p>E39.1</p> <p>Construction traffic including contractor car parking is controlled in accordance with a traffic management plan, prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) to ensure all traffic movements to and from the site are safe.</p> <p>E39.2</p> <p>All contractor car parking is either provided on the development site, or on an alternative site in the general locality which has been set aside for car parking. Contractors vehicles are generally not to be parked in existing roads.</p> <p>Note – A Traffic Management Plan may be required for the site in accordance with the Manual of Uniform Traffic Control Devices (MUTCD):</p> <p>E39.3</p> <p>Any material dropped, deposited or spilled on the road(s) as a result of construction processes associated with the site are to be cleaned at all times.</p> <p>E</p> <p>Construction traffic to and from the development site uses the highest classification streets or roads where a choice of access routes is available. Haul routes for the transport of imported or spoil material and gravel pavement material along Council roads below sub-arterial standard must be approved routes.</p> <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p> <p>Note - A dilapidation report may be required to demonstrate compliance with this E.</p> <p>E</p>

	<p>Where works are carried out in existing roads, the works must be undertaken so that the existing roads are maintained in a safe and useable condition. Practical access for residents, visitors and services (including postal deliveries and refuse collection) is retained to existing lots during the construction period and after completion of the works.</p> <p>Note - A traffic control plan prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) will be required for any works that will affect access, traffic movements or traffic safety in existing roads.</p>
	<p>E</p> <p>Access to the development site is obtained via an existing lawful access point.</p>
<p>PO40</p> <p>All disturbed areas are to be progressively stabilised during construction and the entire site rehabilitated and substantially stabilised at the completion of construction.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details.</p>	<p>E40</p> <p>At completion of construction all disturbed areas of the site are to be:</p> <ol style="list-style-type: none"> topsoiled with a minimum compacted thickness of fifty (50) millimetres; grassed stabilised using turf, established grass seeding, mulch or sprayed stabilisation techniques. <p>Note - These areas are to be maintained during any maintenance period to maximise grass coverage from grass seeding of these areas:</p>
<p>PO</p> <p>Earthworks are undertaken to ensure that soil disturbances are staged into manageable areas.</p> <p>Note - A site specific Erosion and Sediment Control Plan (ESCP) will be required to demonstrate compliance with this PO. An ECP is to be prepared in accordance with Planning scheme policy - Stormwater management and Planning scheme policy - Integrated design (Appendix C).</p>	<p>E</p> <p>Soil disturbances are staged into manageable areas of not greater than 3.5 ha.</p>
<p>PO41</p> <p>The clearing of vegetation on-site:</p> <ol style="list-style-type: none"> is limited to the area of infrastructure works, building areas and other necessary areas for the works; and includes the removal of declared weeds and other materials which are detrimental to the intended use of the land; is disposed of in a manner which minimises nuisance and annoyance to existing premises. 	<p>E41.1</p> <p>All native vegetation to be retained on-site is temporarily fenced or protected prior to and during development works.</p> <p>Note - No parking of vehicles or storage of machinery or goods is to occur in these areas during development works.</p> <p>E41.2</p>

6 Zones

<p>Note - No burning of cleared vegetation is permitted.</p>	<p>Disposal of materials is managed in one or more of the following ways:</p> <ol style="list-style-type: none"> all cleared vegetation, declared weeds, stumps, rubbish, car bodies, scrap metal and the like are removed and disposed of in a Council land fill facility; or all native vegetation with a diameter below 400mm is to be chipped and stored on-site. <p>Note - The chipped vegetation must be stored in an approved location; preferably a park or public land.</p>
<p>PO</p> <p>All development works are carried out at times which minimise noise impacts to residents.</p>	<p>E</p> <p>All development works are carried out within the following times:</p> <ol style="list-style-type: none"> Monday to Saturday (other than public holidays) between 6:30am and 6:30pm on the same day; no work is to be carried out on Sundays or public holidays. <p>Note - Work outside the above hours may be approved (in writing) where it can be demonstrated that the work will not cause significant inconvenience or disruption to the public, or the work is unlikely to cause annoyance or inconvenience to occupants of adjacent properties.</p>
<p>PO42</p> <p>Any alteration or relocation in connection with or arising from the development to any service, installation, plant, equipment or other item belonging to or under the control of the telecommunications authority, electricity authorities, the Council or other person engaged in the provision of public utility services is to be carried with the development and at no cost to Council.</p>	<p>No example provided.</p>

<h2>Earthworks</h2>	
<p>PO43</p> <p>On-site earthworks are designed to consider the visual and amenity impact as they relate to:</p> <ol style="list-style-type: none"> the natural topographical features of the site; short and long-term slope stability; soft or compressible foundation soils; reactive soils; 	<p>E43.1</p> <p>All cut and fill batters are provided with appropriate scour, erosion protection and run-off control measures including catch drains at the top of batters and lined batter drains as necessary.</p> <hr/> <p>E43.2</p> <p>Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance of steep rock slopes and batters.</p>

<p>e. low density or potentially collapsing soils;</p> <p>f. existing fill and soil contamination that may exist on-site;</p> <p>g. the stability and maintenance of steep rock slopes and batters;</p> <p>h. excavation (cut) and fill and impacts on the amenity of adjoining lots (e.g. residential).</p> <p><i>Note – Filling or excavation works are to be completed within six months of the commencement date.</i></p>	<p>E43.3</p> <p>Inspection and certification of steep rock slopes and batters is required by a suitably qualified and experienced RPEQ.</p> <p>E43.4</p> <p>All filling or excavation is contained on-site and is free draining.</p> <p>E43.5</p> <p>All fill placed on-site is:</p> <p>a. limited to that area required for the necessary for the approved use;</p> <p>b. clean and uncontaminated (i.e. no building waste, concrete, green waste, actual acid sulfate soils, potential acid sulfate soils or contaminated material etc.) material is used as fill).</p> <p>E43.6</p> <p>The site is prepared and the fill placed on-site in accordance with AS3798.</p> <p>Note - The fill is to be inspected and tested in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p>
<p>PO44</p> <p>Embankments are stepped, terraced and landscaped to not adversely impact on the visual amenity of the surrounding area.</p>	<p>E44</p> <p>Any embankments more than 1.5 metres in height are stepped, terraced and landscaped.</p> <p>Figure - Embankment</p> 
<p>PO45</p> <p>Filling or excavation is undertaken in a manner that:</p>	<p>E45.1</p> <p>No filling or excavation is undertaken in an easement issued in favour of Council or a public sector entity.</p>

6 Zones

<p>a. does not adversely impact on a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land;</p> <p>b. does not preclude reasonable access to a Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the land for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p>	<p>Note - Public sector entity as is defined in Schedule 2 of the Act the Sustainable Planning Act 2009.</p> <p>E45.2</p> <p>Filling or excavation that would result in any of the following is not carried out on-site:</p> <p>a. a reduction in cover over any Council or public sector entity infrastructure service to less than 600mm;</p> <p>b. an increase in finished surface grade over, or within 1.5m on each side of, the Council or public sector entity infrastructure above that which existed prior to the earthworks being undertaken;</p> <p>c. prevent reasonable access to Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the site for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity as is defined in the Sustainable Planning Schedule 2 of the Act 2009.</p>
<p>PO46</p> <p>Filling or excavation does not result in land instability.</p> <p>Note - Steep rock slopes and batters are inspected and certified for long-term stability by a suitably qualified and experienced geotechnical engineer with RPEQ qualifications. Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance.</p>	<p>No example provided.</p>
<p>PO47</p> <p>Development Filling or excavation does not result in:</p> <p>a. adverse impacts on the hydrological and hydraulic capacity of the waterway or floodway;</p> <p>b. increased flood inundation outside the site;</p> <p>c. any reduction in the flood storage capacity in the floodway;</p> <p>d. and any clearing of native vegetation.</p> <p>Note - To demonstrate compliance with this outcome, Planning Scheme Policy - Stormwater Management provides guidance on the preparation of a site based stormwater management plan by a suitably qualified professional. Refer to Planning scheme policy - Integrated design for guidance on infrastructure design and modelling requirements.</p>	<p>No example provided.</p>
<p>PO</p>	<p>E</p> <p>Filling and excavation undertaken on the development site are shaped in a manner which does not:</p>

Filling or excavation on the development site is undertaken in a manner which does not create or accentuate problems associated with stormwater flows and drainage systems on land adjoining the site.

- a. prevent stormwater surface flow which, prior to commencement of the earthworks, passed onto the development site, from entering the land; or
- b. redirect stormwater surface flow away from existing flow paths; or
- c. divert stormwater surface flow onto adjacent land, (other than a road), in a manner which:
 - i. concentrates the flow; or
 - ii. increases the flow rates of stormwater over the affected section of the adjacent land above the situation which existed prior to the diversion; or
 - iii. causes actionable nuisance to any person, property or premises.

Retaining walls and structures

PO48

All earth retaining structures provide a positive interface with the streetscape and minimise impacts on the amenity of adjoining residents.

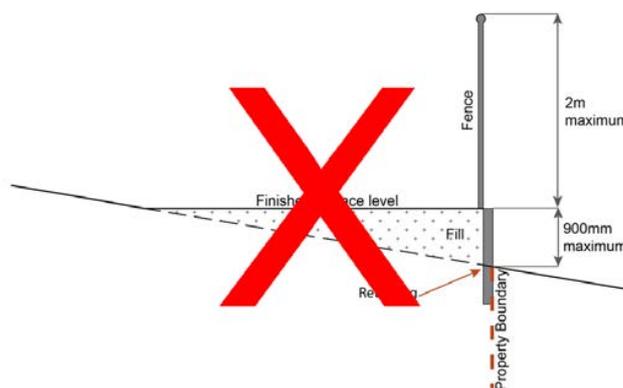

Note - Refer to Planning scheme policy - Residential design for guidance on how to achieve compliance with this performance outcome.

E48

Earth-retaining structures:-

- a. are not constructed of boulder rocks or timber;
- b. where height is no greater than 900mm, are provided in accordance with Figure - Retaining on a boundary;

Figure - Retaining on boundary

- c. where height is greater than 900mm but no greater than 1.5m, are to be setback at least the equivalent height of the retaining structure from any property boundary;
- d. where height is greater than 1.5m, are to be setback and stepped 1.5m vertical: 1.5m horizontal; terraced, landscaped and drained as shown below.

Figure - Gut

6 Zones

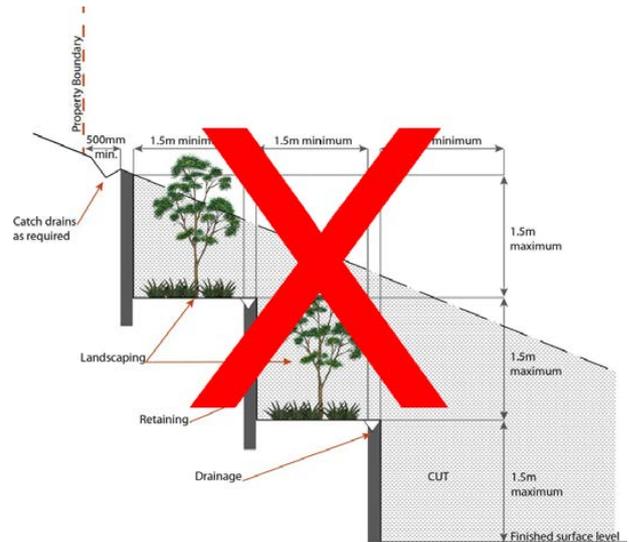

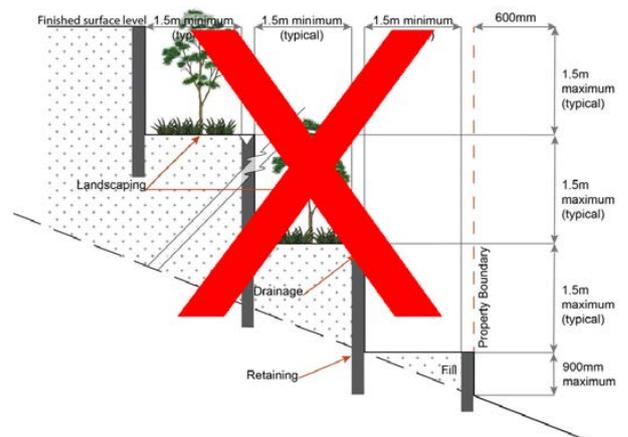

Figure--Fill

Filling or excavation does not:

- a. involve a change in level of more than 1.0m relative to natural ground level;

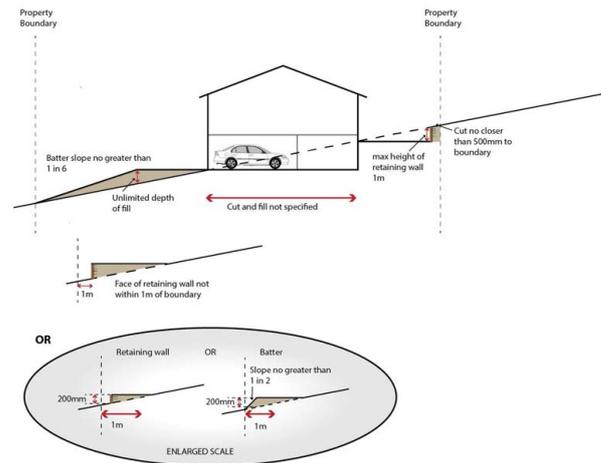

OR

- b. necessitate the construction of a freestanding retaining wall exceeding 1.0m in height relative to finished ground level;

- c. result in the top of any cut batter, or the exposed face of any freestanding retaining wall supporting that cut, being closer than 500mm to a property boundary;
- d. result in the toe of any fill batter, or exposed face of any freestanding retaining wall supporting that fill, being closer than 1.0m to a property boundary unless:
 - i. the depth of fill within the 1.0m strip does not exceed 200mm relative to natural ground level; or
 - ii. the batter slope within that 1.0m strip is no steeper than 1V to 2H.

THE NEW FIGURE BELOW IS PROPOSED AS PART OF THIS AMENDMENT

Figure - Filling or Excavation

PO

All earth retaining structures are to be certified as being designed and constructed in accordance with relevant Australian Standards and Building Code requirements.

E

Retaining walls are designed and certified by a RPEQ so that:

- a. the minimum design life (the period assumed in design for which a structure or structural element is required to perform its intended purpose without replacement or major structural repairs) for the earth retaining structure is that specified in Australian Standard AS 4678 Earth-retaining structures;
- b. earth retaining structures within the land and around areas of cut on or near the boundaries of the site must be designed to allow for live and dead loads associated with the land/premise's current occupancy and use;

6 Zones

	<p>c. where the adjoining land use rights or zoning allows for industrial uses a minimum live load of 25kPA must be allowed in the design of the retaining structure for these adjoining premises.</p> <p>Note - Retaining walls will only be approved following submission of a full detailed design certified by a RPEQ.</p>
--	--

Fire Services

Note - The provisions under this heading only apply if:

- a. the development is for, or incorporates:
 - i. reconfiguring a lot for a community title scheme creating 1 or more vacant lots; or
 - ii. material change of use for 2 or more sole occupancy units on the same lot, or within the same community titles scheme; or
 - iii. material change of use for a Tourist park⁽⁸⁴⁾ with accommodation in the form of caravans or tents; or
 - iv. material change of use for outdoor sales⁽⁵⁴⁾, outdoor processing or outdoor storage where involving combustible materials.

AND

- b. none of the following exceptions apply:
 - i. the distributor-retailer for the area has indicated, in its netserv plan, that the premises will not be served by that entity's reticulated water supply; or
 - ii. every part of the development site is within 60m walking distance of an existing fire hydrant on the distributor-retailer's reticulated water supply network, measured around all obstructions, either on or adjacent to the site.

Note - The provisions under this heading do not apply to buildings that are required by the Building Code of Australia to have a fire hydrant system complying with Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations or other fire fighting facilities which provide equivalent protection.

<p>PO49</p> <p>Development incorporates a fire fighting system that:</p> <ul style="list-style-type: none"> a. satisfies the reasonable needs of the fire fighting entity for the area; b. is appropriate for the size, shape and topography of the development and its surrounds; c. is compatible with the operational equipment available to the fire fighting entity for the area; d. considers the fire hazard inherent in the materials comprising the development and their proximity to one another; e. considers the fire hazard inherent in the surrounds to the development site; f. is maintained in effective operating order. <p>Note - The Queensland Fire and Emergency Services is the entity currently providing the fire fighting function for the urban areas of the Moreton Bay Region.</p>	<p>E49.1</p> <p>External fire hydrant facilities are provided on site to the standard prescribed under the relevant parts of <i>Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations</i>.</p> <p>Note - For this requirement for accepted development, the following are the relevant parts of AS 2419.1 (2005) that may be applicable:</p> <ul style="list-style-type: none"> a. in regard to the form of any fire hydrant - Part 8.5 and Part 3.2.2.1, with the exception that for Tourist parks⁽⁸⁴⁾ or development comprised solely of dwellings and their associated outbuildings, single outlet above-ground hydrants or suitably signposted in-ground hydrants would be an acceptable alternative; b. in regard to the general locational requirements for fire hydrants - Part 3.2.2.2 (a), (e), (f), (g) and (h) as well as Appendix B of AS 2419.1 (2005); c. in regard to the proximity of hydrants to buildings and other facilities - Part 3.2.2.2 (b), (c) and (d), with the exception that: <ul style="list-style-type: none"> i. for dwellings and their associated outbuildings, hydrant coverage need only extend to the roof and external walls of those buildings; ii. for caravans and tents, hydrant coverage need only extend to the roof of those tents and caravans; iii. for outdoor sales⁽⁵⁴⁾, processing or storage facilities, hydrant coverage is required across the entire area of
---	--

	<p>the outdoor sales⁽⁵⁴⁾, outdoor processing and outdoor storage facilities;</p> <p>d. in regard to fire hydrant accessibility and clearance requirements - Part 3.5 and, where applicable, Part 3.6.</p> <hr/> <p>E49.2</p> <p>A continuous path of travel having the following characteristics is provided between the vehicle access point to the site and each external fire hydrant and hydrant booster point on the land:</p> <p>a. an unobstructed width of no less than 3.5m;</p> <p>b. an unobstructed height of no less than 4.8m;</p> <p>c. constructed to be readily traversed by a 17 tonne HRV fire brigade pumping appliance;</p> <p>d. an area for a fire brigade pumping appliance to stand within 20m of each fire hydrant and 8m of each hydrant booster point.</p> <hr/> <p>E49.3</p> <p>On-site fire hydrant facilities are maintained in effective operating order in a manner prescribed in <i>Australian Standard AS1851 (2012) – Routine service of fire protection systems and equipment</i>.</p>
<p>PO50</p> <p>On-site fire hydrants that are external to buildings, as well as the available fire fighting appliance access routes to those hydrants, can be readily identified at all times from, or at, the vehicular entry point to the development site.</p>	<p>E50</p> <p>For development that contains on-site fire hydrants external to buildings:</p> <p>a. those external hydrants can be seen from the vehicular entry point to the site; or</p> <p>b. a sign identifying the following is provided at the vehicular entry point to the site:</p> <p>i. the overall layout of the development (to scale);</p> <p>ii. internal road names (where used);</p> <p>iii. all communal facilities (where provided);</p> <p>iv. the reception area and on-site manager's office (where provided);</p> <p>v. external hydrants and hydrant booster points;</p> <p>vi. physical constraints within the internal roadway system which would restrict access by fire fighting appliances to external hydrants and hydrant booster points.</p> <p>Note - The sign prescribed above, and the graphics used are to be:</p>

6 Zones

	<p>a. in a form;</p> <p>b. of a size;</p> <p>c. illuminated to a level;</p> <p>which allows the information on the sign to be readily understood, at all times, by a person in a fire fighting appliance up to 4.5m from the sign.</p>
<p>PO51</p> <p>Each on-site fire hydrant that is external to a building is signposted in a way that enables it to be readily identified at all times by the occupants of any firefighting appliance traversing the development site.</p>	<p>E51</p> <p>For development that contains on-site fire hydrants external to buildings, those hydrants are identified by way of marker posts and raised reflective pavement markers in the manner prescribed in the technical note <i>Fire hydrant indication system</i> produced by the Queensland Department of Transport and Main Roads.</p> <p>Note - Technical note Fire hydrant indication system is available on the website of the Queensland Department of Transport and Main Roads.</p>
Use specific criteria	
Caretaker's accommodation⁽¹⁰⁾	
<p>PO52</p> <p>Development for a Caretaker's accommodation⁽¹⁰⁾:</p> <p>a. does not compromise the productivity of the use;</p> <p>b. is domestic in scale;</p> <p>c. provides adequate car parking provisions exclusive to the primary use of the site;</p> <p>d. is safe for the residents;</p> <p>e. has regards to the landscape and private recreation needs of the resident.</p>	<p>E52</p> <p>Caretaker's accommodation⁽¹⁰⁾:</p> <p>1. has a maximum GFA of 80m²;</p> <p>2. no more than 1 caretaker's accommodation⁽¹⁰⁾ is established per site;</p> <p>3. does not gain access from a separate driveway to the main use on the site;</p> <p>4. provides a minimum 16m² of private open space directly accessible from a habitable room;</p> <p>5. provides car parking in accordance with Schedule 7 - Car parking.</p>
Major electricity infrastructure⁽⁴³⁾, Substation⁽⁸⁰⁾ and Utility installation⁽⁸⁶⁾	
<p>PO53</p> <p>The development does not have an adverse impact on the visual amenity of a locality and is:</p> <p>a. high quality design and construction;</p> <p>b. visually integrated with the surrounding area;</p> <p>c. not visually dominant or intrusive;</p>	<p>E53.1</p> <p>Development is designed to minimise surrounding land use conflicts by ensuring infrastructure, buildings, structures and other equipment:</p> <p>a. are enclosed within buildings or structures;</p> <p>b. are located behind the main building line;</p>

<ul style="list-style-type: none"> d. located behind the main building line; e. below the level of the predominant tree canopy or the level of the surrounding buildings and structures; f. camouflaged through the use of colours and materials which blend into the landscape; g. treated to eliminate glare and reflectivity; h. landscaped; i. otherwise consistent with the amenity and character of the zone and surrounding area. 	<ul style="list-style-type: none"> c. have a similar height, bulk and scale to the surrounding fabric; d. have horizontal and vertical articulation applied to all exterior walls.
<p>PO54</p> <p>Infrastructure does not have an impact on pedestrian health and safety.</p>	<p>E54</p> <p>Access control arrangements:</p> <ul style="list-style-type: none"> a. do not create dead-ends or dark alleyways adjacent to the infrastructure; b. minimise the number and width of crossovers and entry points; c. provide safe vehicular access to the site; d. do not utilise barbed wire or razor wire.
<p>PO55</p> <p>All activities associated with the development occur within an environment incorporating sufficient controls to ensure the facility:</p> <ul style="list-style-type: none"> a. generates no audible sound at the site boundaries where in a residential setting; or b. meet the objectives as set out in the Environmental Protection (Noise) Policy 2008. 	<p>E55</p> <p>All equipment which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure noise emissions meet the objectives as set out in the Environmental Protection (Noise) Policy 2008.</p>
<p>Market⁽⁴⁶⁾</p>	
<p>PO56</p> <p>Markets⁽⁴⁶⁾ are located and laid out in a manner that provides for:</p> <ul style="list-style-type: none"> a. convenient pedestrian access and movement between proposed stalls; b. view corridors and legibility between stalls to adjacent roads, c. directional and information signage and surrounding uses; d. pedestrian comfort and safety, including the provision of public toilet facilities; e. waste and rubbish disposal facilities appropriate to the type and scale of the proposed market⁽⁴⁶⁾; 	<p>No example provided.</p>

6 Zones

<p>f. emergency vehicle access to and within the market⁽⁴⁶⁾;</p> <p>g. safe, convenient and accessible car parking is provided to meet demand.</p>	
<p>Telecommunications facility⁽⁸¹⁾</p> <p>Editor's note - In accordance with the Federal legislation Telecommunications facilities⁽⁸¹⁾ must be constructed and operated in a manner that will not cause human exposure to electromagnetic radiation beyond the limits outlined in the Radiocommunications (Electromagnetic Radiation - Human Exposure) Standard 2003 and Radio Protection Standard for Maximum Exposure Levels to Radiofrequency Fields - 3Khz to 300Ghz.</p>	
<p>PO57</p> <p>Telecommunications facilities⁽⁸¹⁾ are co-located with existing telecommunications facilities⁽⁸¹⁾, Utility installation⁽⁸⁶⁾, Major electricity infrastructure⁽⁴³⁾ or Substation⁽⁸⁰⁾ if there is already a facility in the same coverage area.</p>	<p>E57.1</p> <p>New telecommunication facilities⁽⁸¹⁾ are co-located on existing towers with new equipment shelter and associated structures positioned adjacent to the existing shelters and structures.</p> <p>E57.2</p> <p>If not co-located with an existing facility, all co-location opportunities have been investigated and fully exhausted within a 2km radius of the site.</p>
<p>PO58</p> <p>A new Telecommunications facility⁽⁸¹⁾ is designed and constructed to ensure co-masting or co-siting with other carriers both on the tower or pole and at ground level is possible in the future.</p>	<p>E58</p> <p>A minimum area of 45m² is available at-ground-level to allow for additional equipment shelters and associated structures for the purpose of co-locating on the proposed facility.</p>
<p>PO59</p> <p>Telecommunications facilities⁽⁸¹⁾ do not conflict with lawful existing land uses both on and adjoining the site.</p>	<p>E59</p> <p>The development results in no net reduction in the minimum quantity and standard of landscaping, private or communal open space or car parking spaces required under the planning scheme or under an existing development approval.</p>
<p>PO60</p> <p>The Telecommunications facility⁽⁸¹⁾ does not have an adverse impact on the visual amenity of a locality and is:</p> <ol style="list-style-type: none"> high quality design and construction; visually integrated with the surrounding area; not visually dominant or intrusive; located behind the main building line; below the level of the predominant tree canopy or the level of the surrounding buildings and structures; camouflaged through the use of colours and materials which blend into the landscape; 	<p>E60.1</p> <p>Where in an urban area, the development does not protrude more than 5m above the level of the existing treeline, prominent ridgeline or building rooftops in the surrounding townscape.</p> <p>E60.2</p> <p>In all other areas towers do not exceed 35m in height.</p> <p>E60.3</p>

<p>g. treated to eliminate glare and reflectivity;</p> <p>h. landscaped;</p> <p>i. otherwise consistent with the amenity and character of the zone and surrounding area.</p>	<p>Towers, equipment shelters and associated structures are of a design, colour and material to:</p> <p>a. reduce recognition in the landscape;</p> <p>b. reduce glare and reflectivity.</p> <p>E60.4</p> <p>All structures and buildings are setback behind the main building line and a minimum of 10m from side and rear boundaries, except where in the Industry and Extractive industry zones, the minimum side and rear setback is 3m.</p> <p>Where there is no established building line the facility is located at the rear of the site.</p> <p>E60.5</p> <p>The facility is enclosed by security fencing or by other means to ensure public access is prohibited.</p> <p>E60.6</p> <p>A minimum 3m wide strip of dense planting is provided around the perimeter of the fenced area, between the facility and street frontage and adjoining uses.</p> <p>Note - Landscaping is provided in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person, to ensure compliance with Planning scheme policy - Integrated design.</p>
<p>PO61</p> <p>Lawful access is maintained to the site at all times that does not alter the amenity of the landscape or surrounding uses.</p>	<p>E61</p> <p>An Access and Landscape Plan demonstrates how 24 hour vehicular access will be obtained and maintained to the facility in a manner that is appropriate to the site's context.</p>
<p>PO62</p> <p>All activities associated with the development occur within an environment incorporating sufficient controls to ensure the facility generates no audible sound at the site boundaries where in a residential setting.</p>	<p>E62</p> <p>All equipment comprising the Telecommunications facility⁽⁸¹⁾ which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure no noise from this equipment can be heard, or felt at the site boundary.</p>
<p>Tourist park⁽⁸⁴⁾</p>	
<p>PO63</p> <p>Development associated with a tourist park⁽⁸⁴⁾:</p>	<p>No example provided.</p>

6 Zones

<ul style="list-style-type: none"> a. is of a size, scale, intensity and design that minimises the potential for adverse noise, visual, privacy and traffic impacts on adjoining or nearby residents; b. provides suitable open space, buildings and facilities that meet the recreational, social and amenity needs of people staying on-site; c. provides landscape buffer along adjoining property boundaries to fully screen activities occurring on the site. 	
Transport depot⁽⁸⁵⁾	
<p>PO64</p> <p>Development is located on a site of sufficient size to ensure:</p> <ul style="list-style-type: none"> a. the scale and intensity of the development does not result in adverse visual or nuisance impacts on the residents in adjoining or nearby dwellings; b. vehicular and pedestrian traffic generation consistent with that reasonably expected in the surrounding locality. 	<p>E64.1</p> <p>Development, including all vehicle parking, drive way areas and storage areas, is set back 30m from all property boundaries.</p> <hr/> <p>E64.2</p> <p>The maximum number of heavy vehicles, trailers and motor vehicles stored on-site is as follows:</p> <ul style="list-style-type: none"> a. 4 heavy vehicles b. 4 trailers c. 6 motor vehicles.
<p>PO65</p> <p>Development is suitably screened to ensure adverse visual impacts on the residents in adjoining or nearby dwellings are minimised.</p>	<p>E65</p> <p>Vehicle parking areas, vehicle standing areas and outdoor storage areas of plant and equipment are screened from adjoining sites by either planting, wall(s), fence(s) or a combination to at least 1.8m in height along the length of those areas.</p> <p>Planting for screening is to have a minimum depth of 3m.</p>
<p>Values and constraints criteria</p> <p>Note - The relevant values and constraints criteria do not apply where the development is consistent with a current Development permit for Reconfiguring a lot or Material change of use or Operational work, where that approval has considered and addressed (e.g. through a development footprint plan (or similar in the case of Landslide hazard) or conditions of approval) the identified value or constraint under this planning scheme.</p>	
<p>Acid sulfate soils - (refer Overlay map - Acid sulfate soils to determine if the following assessment criteria apply)</p> <p>Note - To demonstrate achievement of the performance outcome, an Acid sulfate soils (ASS) investigation report and soil management plan is prepared by a qualified engineer. Guidance for the preparation an ASS investigation report and soil management plan is provided in Planning scheme policy - Acid sulfate soils.</p>	

<p>PO66</p> <p>Development avoids disturbing acid sulfate soils. Where development disturbs acid sulfate soils, development:</p> <ol style="list-style-type: none"> is managed to avoid or minimise the release of surface or groundwater flows containing acid and metal contaminants into the environment; protects the environmental and ecological values and health of receiving waters; protects buildings and infrastructure from the effects of acid sulfate soils. 	<p>E66</p> <p>Development does not involve:</p> <ol style="list-style-type: none"> excavation or otherwise removing of more than 100m³ of soil or sediment where below than 5m Australian Height datum AHD; or filling of land of more than 500m³ of material with an average depth of 0.5m or greater where below the 5m Australian Height datum AHD.
<p>Bushfire hazard (refer Overlay map - Bushfire hazard to determine if the following assessment criteria apply)</p> <p>Note - To demonstrate achievement of the performance outcomes, a bushfire management plan is prepared by a suitably qualified person. Guidance for the preparation of a bushfire management plan is provided in Planning scheme policy – Bushfire prone areas.</p> <p>Note - Unacceptable risk is defined as a situation where people or property are exposed to a predictable hazard event that may result in serious injury, loss of life, failure of community infrastructure, or property damage.</p>	
<p>PO67</p> <p>Development:</p> <ol style="list-style-type: none"> minimises the number of buildings and people working and living on a site exposed to bushfire risk; ensures the protection of life during the passage of a fire front; is located and designed to increase the chance of survival of buildings and structures during a bushfire; minimises bushfire risk from build up of fuels around buildings and structures; ensure safe and effective access for emergency services during a bushfire. 	<p>E67.1</p> <p>Buildings and structures are:</p> <ol style="list-style-type: none"> not located on a ridgeline; not located on land with a slope greater than 15% (see Overlay map - Landslide hazard); dwellings are located on east to south facing slopes. <p>E67.2</p> <p>Buildings and structures have contained within the site:</p> <ol style="list-style-type: none"> a separation from classified vegetation of 20m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater; a separation from low threat vegetation of 10m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater; a separation of no less than 10m between a fire fighting water supply extraction point and any classified vegetation, buildings and other roofed structures; an area suitable for a standard fire fighting appliance to stand within 3m of a fire fighting water supply extraction point; and an access path suitable for use by a standard fire fighting appliance having a formed width of at least 4m, a cross-fall of no greater than 5%, and a longitudinal gradient of no greater than 25%:

6 Zones

	<ul style="list-style-type: none"> i. to, and around, each building and other roofed structure; and ii. to each fire fighting water supply extraction point. <p>Note - The meaning of the terms classified vegetation and low threat vegetation as well as the method of calculating the bushfire attack level are as described in Australian Standard AS 3959</p>
<p>PO68</p> <p>Development and associated driveways and access ways:</p> <ul style="list-style-type: none"> a. avoid potential for entrapment during a bushfire; b. ensure safe and effective access for emergency services during a bushfire; c. enable safe evacuation for occupants of a site during a bushfire. 	<p>E68</p> <p>A length of driveway:</p> <ul style="list-style-type: none"> a. to a road does not exceed 100m between the most distant part of a building used for any purpose other than storage and the nearest part of a public road; b. has a maximum gradient no greater than 12.5%; c. have a minimum width of 3.5m; d. accommodate turning areas for fire fighting appliances in accordance with Qld Fire and Emergency Services' Fire Hydrant and Vehicle Access Guideline.
<p>PO69</p> <p>Development provides an adequate water supply for fire-fighting purposes.</p>	<p>E69</p> <ul style="list-style-type: none"> a. a reticulated water supply is provided by a distributor retailer for the area or; b. where not connected to a reticulated water supply, on-site fire fighting water storage containing not less than 10 000 litres (tanks with fire brigade tank fittings, swimming pools) is located within 10m of buildings and structures. c. Where a swimming pool is the nominated on-site fire fighting water storage source, vehicle access is provided to within 3m of that water storage source. d. Where a tank is the nominated on-site fire fighting water storage source, it includes: <ul style="list-style-type: none"> i. a hardstand area allowing medium rigid vehicles (15 tonne fire appliance) access within 6m of the tank; ii. fire brigade tank fittings, comprising 50mm ball valve and male camlock coupling and, if underground, an access hole of 200mm (minimum) to accommodate suction lines.
<p>PO70</p> <p>Development:</p> <ul style="list-style-type: none"> a. does not present unacceptable risk to people or environment due to the impact of bushfire on dangerous goods or combustible liquids; b. does not present danger or difficulty to emergency services for emergency response or evacuation. 	<p>E70</p> <p>Development does not involve the manufacture or storage of hazardous chemicals.</p>

Editor's note - Unacceptable risk is defined as a situation where people or property are exposed to a predictable hazard event that may result in serious injury, loss of life, failure of community infrastructure, or property damage.

Environmental areas (refer Overlay map - Environmental areas to determine if the following assessment criteria apply)

Note – The following are excluded from the native vegetation clearing provisions of this planning scheme:

- a. Clearing of native vegetation located within an approved development footprint;
- b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency;
- c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure;
- d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental Management and Conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence;
- e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes;
- f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council;
- g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens;
- h. Grazing of native pasture by stock;
- i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development

Note - Definition for native vegetation is located in Schedule 1 Definitions.

Note - Native vegetation subject to this criteria primarily comprises of matters of national environmental significance (MNES), matters of state environmental significance (MSES). They also comprise some matters of local environmental significance (MLES). A MLES is defined in Schedule 1.2, Administrative definitions. A list of the elements that apply to the mapped MSES and MLES is provided in Appendix 1 of the Planning scheme policy - Environmental areas.

Editors' Note - The accuracy of overlay mapping can be challenged through the development application process (code assessable development) or by way of a planning scheme amendment. See Council's website for details.

Note - To demonstrate achievement of the performance outcome, an ecological assessment, vegetation management plan and fauna management plan, as required, are prepared by a suitably qualified person. Guidance for the preparation of above mentioned reports is provided in Planning scheme policy - Environmental areas.

Vegetation clearing, ecological value and connectivity

PO71

Development avoids locating in a High Value Area or a Value Offset Area. Where it is not practicable or reasonable for development to avoid establishing in these areas, development must ensure that:

- a. the quality and integrity of the biodiversity and ecological values inherent to a High Value Area

No example provided.

6 Zones

<p>and a Value Offset Area is maintained and not lost or degraded;</p> <p>b. on-site mitigation measures, mechanisms or processes are in place demonstrating the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area are maintained. For example, this can be achieved through replacement, restoration or rehabilitation planting as part of any proposed covenant, the development of a Vegetation Management Plan, a Fauna Management Plan, and any other on-site mitigation options identified in the Planning scheme policy - Environmental areas*.</p> <p>* Editor's note - This is not a requirement for an environmental offset under the Environmental Offsets Act 2014.</p>	
<p>PO72</p> <p>Development provides for safe, unimpeded, convenient and ongoing wildlife movement and establishes and maintains habitat connectivity by:</p> <p>a. retaining habitat trees;</p> <p>b. providing contiguous patches of habitat;</p> <p>c. provide replacement and rehabilitation planting to improve connectivity;</p> <p>d. avoiding the creation of fragmented and isolated patches of habitat;</p> <p>e. providing wildlife movement infrastructure.</p> <p>Editor's note - Wildlife movement infrastructure may include refuge poles, tree boulevarding, 'stepping stone' vegetation plantings, tunnels, appropriate wildlife fencing; culverts with ledges, underpasses, overpasses, land bridges and rope bridges. Further information is provided in Planning scheme policy – Environmental areas.</p>	<p>No example provided.</p>
<p>Vegetation clearing and habitat protection</p>	
<p>PO73</p> <p>Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected.</p>	<p>No example provided.</p>
<p>PO74</p> <p>Development does not result in the net loss or degradation of habitat value in a High Value Area or a Value Offset Area. Where development does result in the loss or degradation of habitat value, development will:</p> <p>a. rehabilitate, revegetate, restore and enhance an area to ensure it continues to function as a viable and healthy habitat area;</p>	<p>No example provided.</p>

<ul style="list-style-type: none"> b. provide replacement fauna nesting boxes in the event of habitat tree loss in accordance with Planning scheme policy - Environmental areas; c. undertake rehabilitation, revegetation and restoration in accordance with the South East Queensland Ecological Restoration Framework. 	
<p>PO75</p> <p>Development ensures safe, unimpeded, convenient and ongoing wildlife movement and habitat connectivity by:</p> <ul style="list-style-type: none"> a. providing contiguous patches of habitat; b. avoiding the creation of fragmented and isolated patches of habitat; c. providing wildlife movement infrastructure; d. providing replacement and rehabilitation planting to improve connectivity. 	No example provided.
Vegetation clearing and soil resource stability	
<p>PO76</p> <p>Development does not:</p> <ul style="list-style-type: none"> a. result in soil erosion or land degradation; b. leave cleared land exposed for an unreasonable period of time but is rehabilitated in a timely manner. 	No example provided.
Vegetation clearing and water quality	
<p>PO77</p> <p>Development maintains or improves the quality of groundwater and surface water within, and downstream, of a site by:</p> <ul style="list-style-type: none"> a. ensuring an effective vegetated buffers and setbacks from waterbodies is retained to achieve natural filtration and reduce sediment loads; b. avoiding or minimising changes to landforms to maintain hydrological water flows; c. adopting suitable measures to exclude livestock from entering a waterbody where a site is being used for animal husbandry⁽⁴⁾ and animal keeping⁽⁵⁾ activities. 	No example provided.
<p>PO78</p> <p>Development minimises adverse impacts of stormwater run-off on water quality by:</p> <ul style="list-style-type: none"> a. minimising flow velocity to reduce erosion; b. minimising hard surface areas; c. maximising the use of permeable surfaces; d. incorporating sediment retention devices; e. minimising channelled flow. 	No example provided.
Vegetation clearing and access, edge effects and urban heat island effects	

6 Zones

<p>PO79</p> <p>Development retains safe and convenient public access in a manner that does not result in the adverse edge effects or the loss or degradation of biodiversity values within the environment.</p>	<p>No example provided.</p>
<p>PO80</p> <p>Development minimises potential adverse 'edge effects' on ecological values by:</p> <ol style="list-style-type: none"> a. providing dense planting buffers of native vegetation between a development and environmental areas; b. retaining patches of native vegetation of greatest possible size where located between a development and environmental areas ; c. restoring, rehabilitating and increasing the size of existing patches of native vegetation; d. ensuring that buildings and access (public and vehicle) are setback as far as possible from environmental areas and corridors; e. landscaping with native plants of local origin. <p>Editor's note - Edge effects are factors of development that go to detrimentally affecting the composition and density of natural populations at the fringe of natural areas. Factors include weed invasion, pets, public and vehicle access, nutrient loads, noise and light pollution, increased fire frequency and changes in the groundwater and surface water flow.</p>	<p>No example provided.</p>
<p>PO81</p> <p>Development avoids adverse microclimate change and does not result in increased urban heat island effects. Adverse urban heat island effects are minimised by:</p> <ol style="list-style-type: none"> a. pervious surfaces; b. providing deeply planted vegetation buffers and green linkage opportunities; c. landscaping with local native plant species to achieve well-shaded urban places; d. increasing the service extent of the urban forest canopy. 	<p>No example provided.</p>
<p>Vegetation clearing and Matters of Local Environmental Significance (MLES) environmental offsets</p>	
<p>PO82</p> <p>Where development results in the unavoidable loss of native vegetation within a Value Offset Area MLES waterway buffer or a Value Offset Area MLES wetland buffer, an environmental offset is required in accordance with the environmental offset requirements identified in Planning scheme policy - Environmental areas.</p> <p>Editor's note - For MSES Koala Offsets, the environmental offset provisions in Schedule 11 of the Regulation, in combination with the requirements of the Environmental Offsets Act 2014, apply.</p>	<p>No example provided.</p>

Extractive resources transport routes (refer Overlay map - Extractive resources (transport route and buffer) to determine if the following assessment criteria apply)

<p>PO83</p> <p>Development:</p> <ul style="list-style-type: none"> a. does not increase in the number of people living in close proximity to a transport route and being subject to the adverse effects from the transportation route; b. does not result in the establishment of uses that are incompatible with the operation of Extractive resources transport routes; c. adopts design and location measures to satisfactorily mitigate the potential adverse impacts associated with transportation routes on sensitive land uses. Such measures include, but are not limited to: <ul style="list-style-type: none"> i. locating the furthest distance possible from the transportation route; ii. habitable rooms being located the furthest from the transportation route; iii. shielding and screening private outdoor recreation space from the transportation routes. 	<p>E83</p> <p>The following uses are not located within the 100m wide transport route buffer:</p> <ul style="list-style-type: none"> a. Caretaker's accommodation⁽¹⁰⁾, except where located in the Extractive industry zone; b. Community residence⁽¹⁶⁾; c. Dual occupancy⁽²¹⁾; d. Dwelling house⁽²²⁾; e. Dwelling unit⁽²³⁾; f. Hospital⁽³⁶⁾; g. Rooming accommodation⁽⁶⁹⁾; h. Multiple dwelling⁽⁴⁹⁾; i. Non-resident workforce accommodation⁽⁵²⁾; j. Relocatable home park⁽⁶²⁾; k. Residential care facility⁽⁶⁵⁾; l. Resort complex⁽⁶⁶⁾; m. Retirement facility⁽⁶⁷⁾; n. Rural workers' accommodation⁽⁷¹⁾; o. Short-term accommodation⁽⁷⁷⁾; p. Tourist park⁽⁸⁴⁾.
<p>PO84</p> <p>Development:</p> <ul style="list-style-type: none"> a. does not adversely impact upon the efficient and effective transportation of extractive material along a transportation route; b. ensures vehicle access and egress along transportation routes are designed and located to achieve a high degree of safety, having good visibility; c. utilises existing vehicle access points and where existing vehicle access points are sub-standard or poorly formed, they are upgraded to an appropriate standard. 	<p>E84.1</p> <p>Development does not create a new vehicle access point onto an Extractive resources transport route.</p> <hr/> <p>E84.2</p> <p>A vehicle access point is located, designed and constructed in accordance with Planning scheme policy - Integrated design.</p>
<p>Heritage and landscape character (refer Overlay map - Heritage and landscape character to determine if the following assessment criteria apply)</p> <p>Note - To assist in demonstrating achievement of heritage performance outcomes, a Cultural heritage impact assessment report is prepared by a suitably qualified person verifying the proposed development is in accordance with The Australia ICOMOS Burra Charter.</p> <p>Note - To assist in demonstrating achievement of this performance outcome, a Tree assessment report is prepared by a qualified arborist in accordance with Planning scheme policy – Heritage and landscape character. The Tree assessment report will also detail the measures adopted in accordance with AS 4970-2009 Protection of trees on development sites.</p> <p>Note - Places, including sites, objects and buildings having local cultural heritage significance, are identified on Overlay map - Heritage and landscape character and listed in Schedule 1 of Planning scheme policy - Heritage and landscape character. Places also having cultural heritage significance at a State level and being entered in the Queensland Heritage Register, are also identified in Schedule 1 of Planning scheme policy - Heritage and landscape character.</p>	

6 Zones

<p>PO85</p> <p>Development will:</p> <ol style="list-style-type: none"> not diminish or cause irreversible damage to the cultural heritage values present on the site, and associated with a heritage site, object or building; protect the fabric and setting of the heritage site, object or building; be consistent with the form, scale and style of the heritage site, object or building; utilise similar materials to those existing, or where this is not reasonable or practicable, neutral materials and finishes; incorporate complementary elements, detailing and ornamentation to those present on the heritage site, object or building; retain public access where this is currently provided. 	<p>E85</p> <p>Development is for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value.</p> <p>Note - A cultural heritage conservation management plan for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value is prepared in accordance with Planning scheme policy - Heritage and landscape character. The plan is sent to, and approved by Council prior to the commencement of any preservation, maintenance, repair and restoration works.</p>
<p>PO86</p> <p>Demolition and removal is only considered where:</p> <ol style="list-style-type: none"> a report prepared by a suitably qualified conservation architect or conservation engineer demonstrates that the building is structurally unsound and is not reasonably capable of economic repair; or demolition is confined to the removal of outbuildings, extensions and alterations that are not part of the original structure; or limited demolition is performed in the course of repairs, maintenance or restoration; or demolition is performed following a catastrophic event which substantially destroys the building or object. 	<p>No example provided.</p>
<p>PO87</p> <p>Where development is occurring on land adjoining a site of cultural heritage value, the development is to be sympathetic to and consistent with the cultural heritage values present on the site and not result in their values being eroded, degraded or unreasonably obscured from public view.</p>	<p>No example provided.</p>
<p>PO88</p> <p>Development does not adversely impact upon the health and vitality of significant trees. Where development occurs in proximity to a significant tree, construction measures and techniques as detailed in AS 4970-2009 Protection of trees on development sites are adopted to ensure a significant tree's health, wellbeing and vitality.</p> <p>Significant trees are only removed where they are in a poor state of health or where they pose a health and safety risk to persons or property. A Tree Assessment</p>	<p>E88</p> <p>Development does:</p> <ol style="list-style-type: none"> not result in the removal of a significant tree; not occur within 20m of a protected tree; involve pruning of a tree in accordance with Australian Standard AS 4373-2007 – Pruning of Amenity Trees.

<p>report prepared by a suitably qualified arborist confirming a tree's state of health is required to demonstrate achievement of this performance outcome.</p>	
<p>Landslide hazard (refer Overlay map - Landslide hazard to determine if the following assessment criteria apply)</p> <p>Note - To demonstrate achievement of the performance outcomes, a site-specific geotechnical assessment report is prepared by a qualified engineer. Guidance for the preparation of a geotechnical assessment report is provided in Planning scheme policy – Landslide hazard.</p>	
<p>PO89</p> <p>Development:</p> <ol style="list-style-type: none"> maintains the safety of people and property on a site and neighbouring sites from landslides; ensures the long-term stability of the site considering the full nature and end use of the development; ensures site stability during all phases of construction and development; minimises disturbance of natural drainage patterns of the site and does not result in the redirection or alteration of the existing flow of surface or groundwater minimises adverse visual impacts on the amenity of adjoining residents and provides a positive interface with the streetscape. 	<p>E89</p> <p>Development does not:</p> <ol style="list-style-type: none"> involve earthworks exceeding 50m³; involve cut and fill having a height greater than 600mm; involve any retaining wall having a height greater than 600mm; redirect or alter the existing flow of surface or groundwater.
<p>PO90</p> <p>Buildings are designed to respond to sloping topography in the siting, design and form of buildings and structures by:</p> <ol style="list-style-type: none"> minimising overuse of cut and fill to create single flat pads and benching; avoiding expanses of retaining walls, loss of trees and vegetation and interference with natural drainage systems; minimising any adverse visual impact on the landscape character ; Protect the amenity of adjoining properties. 	<p>E90</p> <p>Buildings, excluding domestic outbuildings:</p> <ol style="list-style-type: none"> are split-level, multiple-slab, pier or pole construction; are not single plane slab on ground.
<p>PO91</p> <p>Development protects the safety of people, property and the environment from the impacts of landslide on hazardous chemicals manufactured, handled or stored by incorporating design measures to ensure:</p> <ol style="list-style-type: none"> the long-term stability of the development site considering the full nature and end use of the development; site stability during all phases of construction and development; 	<p>E91</p> <p>Development does not involve the manufacture, handling or storage of hazardous chemicals.</p>

6 Zones

<p>c. the development is not adversely affected by landslide activity originating on sloping land above the site;</p> <p>d. emergency access and access from the site for the public and emergency vehicles is available and is not at risk from landslide.</p>	
<p>Infrastructure buffers (refer Overlay map - Infrastructure buffers to determine if the following assessment criteria apply)</p>	
<p>PO92</p> <p>Odour sensitive development is separated from Wastewater treatment plants so they are not adversely affected by odour emission or other air pollutant impacts.</p>	<p>E92</p> <p>The following uses are not located within a wastewater treatment site buffer:</p> <ul style="list-style-type: none"> a. Caretaker's accommodation⁽¹⁰⁾; b. Community residence⁽¹⁶⁾; c. Dual occupancy⁽²¹⁾; d. Dwelling house⁽²²⁾ e. Dwelling unit⁽²³⁾; f. Hospital⁽³⁶⁾; g. Rooming accommodation⁽⁶⁹⁾; h. Multiple dwelling⁽⁴⁹⁾; i. Non-resident workforce accommodation⁽⁵²⁾; j. Relocatable home park⁽⁶²⁾; k. Residential care facility⁽⁶⁵⁾; l. Resort complex⁽⁶⁶⁾; m. Retirement facility⁽⁶⁷⁾; n. Rural workers' accommodation⁽⁷¹⁾; o. Short-term accommodation⁽⁷⁷⁾; p. Tourist park⁽⁸⁴⁾.
<p>PO93</p> <p>Development within a Water supply buffer captures solid or liquid waste from all land use, development and activities is designed, constructed and managed to prevent the release of contaminants to surface water or groundwater bodies.</p>	<p>E93.1</p> <p>Run-off and sediment from roadways and impervious surfaces within a Water supply buffer are intercepted and treated on-site to remove oil, grease, chemicals, silt, trace metals and nutrients such as nitrogen and phosphorous.</p> <hr/> <p>E93.2</p> <p>Incineration or burial of waste within a Water supply buffer is not undertaken onsite.</p> <hr/> <p>E93.3</p> <p>Solid waste within a Water supply buffer is collected and stored in weather proof, sealed waste receptacles, located in roofed and bunded areas, for disposal by a licenced contractor.</p> <hr/> <p>E93.4</p> <p>Holding tanks within a Water supply buffer are used for all liquid waste and provide for the separation of oils/solvents and solids prior to pump-out and collection by a licenced contractor.</p>

	<p>E93.5</p> <p>Management, handling and storage of hazardous chemicals (including fuelling of vehicles) within a Water supply buffer, is undertaken in secured, climate controlled, weather proof, level and bunded enclosures.</p>
<p>PO94</p> <p>On-site sewerage systems within a Water supply buffer are designed and operated to ensure there is no worsening or adverse impacts to health risks, environmental risks and water quality.</p> <p>Editor's Note - For guidance refer to the Seq water Development Guidelines: Development Guidelines for Water Quality Management in Drinking Water Catchments 2012.</p>	<p>E94</p> <p>Secondary treated wastewater treatment systems within a Water supply buffer include:</p> <ol style="list-style-type: none"> emergency storage capable of holding 3-6 hours peak flow of treated effluent in the event of emergencies or overload with provision for de-sludging; back up pump installation and backup power; MEDLI modelling to determine irrigation rates and sizing of irrigation areas; vegetated land application areas are not located in overland flow paths or on areas that perform groundwater recharge or discharge functions; and wastewater collection and storage systems have a capacity to accommodate full load at peak times and includes temporary facilities.
<p>PO95</p> <p>Development within a Bulk water supply infrastructure buffer is located, designed and constructed to:</p> <ol style="list-style-type: none"> protect the integrity of the water supply pipeline; maintain adequate access for any required maintenance or upgrading work to the water supply pipeline; 	<p>E95</p> <p>Development:</p> <ol style="list-style-type: none"> does not involve the construction of any buildings or structures within a Bulk water supply infrastructure buffer; involving a major hazard facility or environmentally relevant activity (ERA) is setback 30m from a Bulk water supply infrastructure buffer.
<p>PO96</p> <p>Development is located and designed to maintain required access to Bulk water supply infrastructure.</p>	<p>E96</p> <p>Development does not restrict access to Bulk water supply infrastructure of any type or size, having regard to (among other things):</p> <ol style="list-style-type: none"> buildings or structures; gates and fences; storage of equipment or materials; landscaping or earthworks or stormwater or other infrastructure.
<p>PO97</p> <p>Odour sensitive development is separated from landfill sites so they are not adversely affected by odour emission or other air pollutant impacts.</p>	<p>E97</p> <p>The following uses are not located within a Landfill buffer:</p> <ol style="list-style-type: none"> Caretaker's accommodation⁽¹⁰⁾; Community residence⁽¹⁶⁾;

6 Zones

	<ul style="list-style-type: none"> c. Dual occupancy⁽²¹⁾; d. Dwelling house⁽²²⁾; e. Dwelling unit⁽²³⁾; f. Hospital⁽³⁶⁾; g. Rooming accommodation⁽⁶⁹⁾; h. Multiple dwelling⁽⁴⁹⁾; i. Non-resident workforce accommodation⁽⁵²⁾; j. Relocatable home park⁽⁶²⁾; k. Residential care facility⁽⁶⁵⁾; l. Resort complex⁽⁶⁶⁾; m. Retirement facility⁽⁶⁷⁾; n. Rural workers' accommodation⁽⁷¹⁾; o. Short-term accommodation⁽⁷⁷⁾; p. Tourist park⁽⁸⁴⁾.
<p>PO98</p> <p>Development within a High voltage electricity line buffer provides adequate buffers to high voltage electricity lines to protect amenity and health by ensuring development:</p> <ul style="list-style-type: none"> a. is located and designed to avoid any potential adverse impacts on personal health and wellbeing from electromagnetic fields in accordance with the principle of prudent avoidance; b. is located and designed in a manner that maintains a high level of security of supply; c. is located and design so not to impede upon the functioning and maintenance of high voltage electrical infrastructure. 	<p>E98</p> <p>Development does not involve the construction of any buildings or structures within a High voltage electricity line buffer.</p>
<p>PO99</p> <p>Development within a Pumping station buffer is located, designed and constructed to:</p> <ul style="list-style-type: none"> a. ensure that odour or other air pollutant impacts on the amenity of the development met the air quality objectives in the Environmental Protection (Air) Policy 2008; b. ensure that noise impacts on the amenity of the development met the indoor noise objectives set out in the Environmental Protection (Noise) Policy 2008. 	<p>E99</p> <p>Development does not involve the construction of any buildings or structures within a Pumping station buffer.</p>
<p>Overland flow path (refer Overlay map - Overland flow path to determine if the following assessment criteria apply)</p> <p>Note - The applicable river and creek flood planning levels associated with defined flood event (DFE) within the inundation area can be obtained by requesting a flood check property report from Council.</p>	
<p>PO100</p> <p>Development:</p>	<p>No example provided.</p>

<ul style="list-style-type: none"> a. minimises the risk to persons from overland flow; b. does not increase the potential for damage from overland flow either on the premises or other premises, public land, watercourses, roads or infrastructure. 	
<p>PO101</p> <p>Development:</p> <ul style="list-style-type: none"> a. maintains the conveyance of overland flow predominantly unimpeded through the premises for any event up to and including the 1% AEP for the fully developed upstream catchment; b. does not concentrate, intensify or divert overland flow onto an upstream, downstream or surrounding property. <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow.</p>	No example provided.
<p>PO102</p> <p>Development does not:</p> <ul style="list-style-type: none"> a. directly, indirectly or cumulatively cause any increase in overland flow velocity or level; b. increase the potential for flood damage from overland flow either on the premises or other premises, public lands, watercourses, roads or infrastructure. <p>Note - Open concrete drains greater than 1m in width are not an acceptable outcome, nor are any other design options that may increase scouring.</p>	No example provided.
<p>PO103</p> <p>Development ensures that public safety and the risk to the environment are not adversely affected by a detrimental impact of overland flow on a hazardous chemical located or stored on the premises.</p>	<p>E103</p> <p>Development ensures that a hazardous chemical is not located or stored in an Overland flow path area.</p> <p>Note - Refer to the Work Health and Safety Act 2011 and associated Regulation and Guidelines, the Environmental Protection Act 1994 and the relevant building assessment provisions under the Building Act 1975 for requirements related to the manufacture and storage of hazardous substances.</p>
<p>PO104</p> <p>Development which is not in a Rural zone ensures that overland flow is not conveyed from a road or public open space onto a private lot.</p>	<p>E104</p> <p>Development which is not in a Rural zone that an overland flow paths and drainage infrastructure is provided to convey overland flow from a road or public open space area away from a private lot.</p>

6 Zones

<p>PO105</p> <p>Development ensures that inter-allotment drainage infrastructure, overland flow paths and open drains through private property cater for overland flows for a fully developed upstream catchment and are able to be easily maintained.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow</p>	<p>E105.1</p> <p>Development ensures that roof and allotment drainage infrastructure is provided in accordance with the following relevant level as identified in QUDM:</p> <ol style="list-style-type: none"> Urban area – Level III; Rural area – N/A; Industrial area – Level V; Commercial area – Level V.
<p>PO106</p> <p>Development protects the conveyance of overland flow such that an easement for drainage purposes is provided over:</p> <ol style="list-style-type: none"> a stormwater pipe if the nominal pipe diameter exceeds 300mm; an overland flow path where it crosses more than one premises; inter-allotment drainage infrastructure. <p>Note - Refer to Planning scheme policy - Integrated design for details and examples.</p> <p>Note - Stormwater Drainage easement dimensions are provided in accordance with Section 3.8.5 of QUDM.</p>	<p>E105.2</p> <p>Development ensures that inter-allotment drainage infrastructure is designed to accommodate any event up to and including the 1% AEP for the fully developed upstream catchment.</p>
<p>Additional criteria for development for a Park⁽⁵⁷⁾</p>	
<p>PO107</p> <p>Development for a Park⁽⁵⁷⁾ ensures that the design and layout responds to the nature of the overland flow affecting the premises such that:</p> <ol style="list-style-type: none"> public benefit and enjoyment is maximised; impacts on the asset life and integrity of park structures is minimised; maintenance and replacement costs are minimised. 	<p>E107</p> <p>Development for a Park⁽⁵⁷⁾ ensures works are provided in accordance with the requirements set out in Appendix B of the Planning scheme policy - Integrated design.</p>
<p>Riparian and wetland setbacks</p>	
<p>PO108</p>	<p>E108</p>

<p>Development provides and maintains a suitable setback from waterways and wetlands that protects natural and environmental values. This is achieved by recognising and responding to the following matters:</p> <ul style="list-style-type: none"> a. impact on fauna habitats; b. impact on wildlife corridors and connectivity; c. impact on stream integrity; d. impact of opportunities for revegetation and rehabilitation planting; e. edge effects. 	<p>Development does not occur within:</p> <ul style="list-style-type: none"> a. 50m from top of bank for W1 waterway and drainage line b. 30m from top of bank for W2 waterway and drainage line c. 20m from top of bank for W3 waterway and drainage line d. 100m from the edge of a Ramsar wetland, 50m from all other wetlands. <p>Note - W1, W2 and W3 waterway and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.</p>
<p>Transport noise corridors (refer Overlay map - Transport noise corridors to determine if the following assessment criteria apply)</p> <p>Note - This is for information purposes only. No requirements for accepted development or criteria for assessable development apply. Development located within a Transport Noise Corridor must satisfy the requirements of the Queensland Development Code</p>	

6 Zones

6.2.3 Emerging community zone code

6.2.3.1 Application - Emerging community zone

This code applies to undertaking development in the Emerging community zone, if:

1. the development has been categorised as either accepted development subject to requirements or assessable development - code assessment, and this code is identified as applicable to that development in the assessment benchmarks for assessable development and requirements for accepted development column of a table of assessment (Part 5);
2. the development has been categorised as assessable development - impact assessment (Part 5).

When using this code, reference should be made to section 5.3.2 Determining the category of development and category of assessment and, where applicable, section 5.3.3 Determining and applying the requirements for accepted development and the assessment benchmarks for assessable development located in Part 5.

For accepted development subject to requirements or assessable development under this Code:

1. Part A of the code applies to accepted development subject to requirements in the 6.2.3.1 'Interim precinct';
2. Part B of the code applies to assessable development in the 6.2.3.1 'Interim precinct';
3. Part C of the code applies to accepted development subject to requirements on a developable lot in the 6.2.3.2.1 'Developable lots';
4. Part D of the code applies to assessable, interim development on a developable lot in the 6.2.3.2.1 'Developable lots';
5. Part E of the code applies to accepted development subject to requirements, on a developed lot in the 6.2.3.2.2 'Developed lots';
6. Part F of the code applies to assessable, on a developed lot in the 6.2.3.2.2 'Developed lots'.

6.2.3.2 Purpose - Emerging community zone

1. The purpose of the Emerging community zone code is to:
 - a. identify land that is suitable for urban purposes and conserve land that may be suitable for urban development in the future;
 - b. manage the timely conversion of non-urban land to urban purposes;
 - c. prevent or discourage development that is likely to compromise appropriate longer term land use.
2. The Emerging community zone has 2 precincts which have the following purpose;
 - a. The Interim precinct is to identify and conserve land that may be suitable for urban development in the future, allowing interim uses that will not compromise the best longer term use of the land pending further investigation.
 - b. The Transition precinct is to:

- i. identify and conserve land that may be suitable for urban development in the future, allowing interim uses that will not compromise the best longer term use of the land;
- ii. provide mechanisms to promote and implement an appropriate mix of dwelling types, consistent with a next generation neighbourhood across the transition precinct once this land is developed and serviced with all local government networks including water and sewer and is suitable for urban development.

Once serviced by all local government networks, including water and sewer the Transition precinct is to provide a mix of dwelling types to support densities that are moderately higher than traditional suburban areas. Housing forms include predominantly detached dwellings on a variety of lot sizes with a greater range of attached dwellings and low to medium rise apartment buildings. These areas will have convenient access to centres, community facilities and higher frequency public transport.

3. The Emerging community zone seeks to implement the policy direction set in Part 3, Strategic Framework.

6 Zones

6.2.3.1 Interim precinct

6.2.3.1.1 Purpose - Interim precinct

1. The purpose of the Emerging community zone - Interim precinct will be achieved through the following overall outcomes:
 - a. Development is to maintain a semi-rural character until such time as infrastructure is delivered and relevant site specific constraints are resolved.
 - b. Development will consist of interim uses on large lots.
 - c. Interim uses are appropriate in this precinct where they:
 - i. would be compatible with the existing semi-rural character;
 - ii. would not prejudice or delay the development of the site and adjoining areas for urban purposes;
 - iii. are low intensity in nature and characterised by low investment in buildings and infrastructure relative to the value of the site.
 - d. Residential activities consist of detached dwelling houses⁽²²⁾ or caretaker's accommodation⁽¹⁰⁾, predominantly on large lots.
 - e. The character and scale of dwelling houses⁽²²⁾ are compatible with the intended character for the precinct.
 - f. Secondary dwellings associated with a principal dwelling, remain subordinate and ancillary to the principal dwelling to retain the low density, low intensity, residential form of a dwelling house⁽²²⁾.
 - g. Garages, car ports and domestic outbuildings remain subordinate and ancillary to the principal dwelling and are located and designed to reduce amenity impacts on the streetscape and adjoining properties.
 - h. Dwelling houses⁽²²⁾ are designed to add visual interest and contribute to an attractive streetscape and public realm.
 - i. Dwelling houses⁽²²⁾ are provided with infrastructure and services at a level suitable for the area as a interim precinct.
 - j. Dwelling houses⁽²²⁾ are responsive to the lot shape, dimensions and topographic features.
 - k. Non-residential uses do not result in adverse or nuisance impacts on adjoining properties or the wider environment. Any adverse or nuisance impacts are contained and internalised to the site through location, design, operation and on-site management practices.
 - l. General works associated with the development achieves the following:
 - i. a high standard of electricity, telecommunications, roads, sewerage, water supply and street lighting services is provided to new developments to meet the current and future needs of users of the site;
 - ii. the development manages stormwater to:
 - A. ensure the discharge of stormwater does not adversely affect the quality, environmental values or ecosystem functions of downstream receiving waters;
 - B. prevent stormwater contamination and the release of pollutants;
 - C. maintain or improve the structure and condition of drainage lines and riparian areas;
 - D. avoid off-site adverse impacts from stormwater.
 - iii. the development does not result in unacceptable impacts on the capacity on the capacity and safety of the external road network;
 - iv. the development ensures the safety, efficiency and useability of access ways and parking areas;
 - v. site works including earthworks are managed to be safe and have minimal impacts on adjoining or adjacent premises, the streetscape or the environment.

- m. Activities associated with the use do not cause a nuisance by way of aerosols, fumes, light, noise, odour, particles or smoke.
- n. Noise generating uses are designed, sited and constructed to minimise the transmission of noise to appropriate levels and do not cause environmental harm or nuisance.
- o. Noise sensitive uses are designed, sited and constructed so as not to be subject to unacceptable levels of noise.
- p. Development in a Water supply buffer is undertaken in a manner which contributes to the maintenance and enhancement where possible of water quality to protect the drinking water and aquatic ecosystem environmental values in those catchments.
- q. Development avoids areas subject to constraint, limitation, or environmental value. Where development cannot avoid these identified areas, it responds by:
 - i. adopting a 'least risk, least impact' approach when designing, siting and locating development in any area subject to a constraint, limitation or environmental value to minimise the potential risk to people, property and the environment;
 - ii. ensuring no further instability, erosion or degradation of the land, water or soil resource;
 - iii. when located within a Water buffer area, complying with the Water Quality Vision and Objectives contained in the Seqwater Development Guidelines: Development Guidelines for Water Quality Management in Drinking Water Catchments 2012.
 - iv. maintaining, restoring and rehabilitating environmental values, including natural, ecological, biological, aquatic, hydrological and amenity values, and enhancing these values through the provision of planting and landscaping, and facilitating safe wildlife movement and connectivity through:
 - A. the provision of replacement, restoration, rehabilitation planting and landscaping;
 - B. the location, design and management of development to avoid or minimise adverse impacts on ecological systems and processes;
 - C. the requiring of environmental offsets in accordance with the Environmental Offsets Act 2014.
 - v. protecting native species and protecting and enhancing species habitat;
 - vi. protecting and preserving the natural, aesthetic, architectural historic and cultural values of significant trees, places, objects and buildings of heritage and cultural significance;
 - vii. establishing effective separation distances, buffers and mitigation measures associated with identified infrastructure to minimise adverse effects on sensitive land uses from odour, noise, dust and other nuisance generating activities;
 - viii. establishing, maintaining and protecting appropriate buffers to waterways, wetlands, native vegetation and significant fauna habitat;
 - ix. ensuring it promotes and does not undermine the ongoing viability, integrity, operation, maintenance and safety of identified infrastructure;
 - x. ensuring effective and efficient disaster management response and recovery capabilities;
 - xi. where located in an overland flow path:
 - A. development siting, built form, layout and access responds to the risk presented by the overland flow and minimises risk to personal safety;
 - B. development is resilient to the impacts of overland flow by ensuring the siting and design accounts for the potential risks to property associated with the overland flow;
 - C. development does not impact on the conveyance of the overland flow for any event up to and including the 1% AEP for the fully developed upstream catchment;
 - D. development directly, indirectly and cumulatively avoid an increase in the severity of overland flow and potential for damage on the premises or other premises, public lands, watercourses, roads or infrastructure.
- r. Development in the Interim precinct includes one or more of the following:

6 Zones

<ul style="list-style-type: none"> • Animal husbandry⁽⁴⁾ • Animal keeping⁽⁵⁾ - where not for a cattery or kennel • Caretaker's accommodation⁽¹⁰⁾ • Cropping⁽¹⁹⁾ - if not forestry for wood production 	<ul style="list-style-type: none"> • Dwelling House⁽²²⁾ • Emerging services • Environment facility⁽²⁶⁾ • Home based business⁽³⁵⁾ • Intensive horticulture⁽⁴⁰⁾ - if on a lot greater than 1ha • Roadside stall⁽⁶⁸⁾ 	<ul style="list-style-type: none"> • Rural Industry⁽⁷⁰⁾ - if on a lot greater than 1ha and having a GFA of 150m² or less • Sales office⁽⁷²⁾ • Veterinary services⁽⁸⁷⁾ • Wholesale nursery⁽⁸⁹⁾
---	--	--

s. Development in the Interim precinct does not include any of the following:

<ul style="list-style-type: none"> • Adult store⁽¹⁾ • Agricultural supplies store⁽²⁾ • Air services⁽³⁾ • Animal keeping⁽⁵⁾ - if for a cattery or kennel • Aquaculture⁽⁶⁾ • Bar⁽⁷⁾ • Brothel⁽⁸⁾ • Bulk landscape supplies⁽⁹⁾ • Car wash⁽¹¹⁾ • Cemetery⁽¹²⁾ • Community residence⁽¹⁶⁾ • Crematorium⁽¹⁸⁾ • Cropping⁽¹⁹⁾ - if forestry for wood production • Detention facility⁽²⁰⁾ • Dual occupancy⁽²¹⁾ • Dwelling unit⁽²³⁾ • Extractive industry⁽²⁷⁾ • Food and drink outlet⁽²⁸⁾ • Function facility⁽²⁹⁾ • Funeral parlour⁽³⁰⁾ 	<ul style="list-style-type: none"> • Health care services⁽³³⁾ • High impact industry⁽³⁴⁾ • Hospital⁽³⁶⁾ • Hotel⁽³⁷⁾ • Indoor sport and recreation⁽³⁸⁾ • Intensive animal industry⁽³⁹⁾ • Low impact industry⁽⁴²⁾ • Major sport, recreation and entertainment facility⁽⁴⁴⁾ • Marine industry⁽⁴⁵⁾ • Market⁽⁴⁶⁾ • Medium impact industry⁽⁴⁷⁾ • Motor sport facility⁽⁴⁸⁾ • Multiple dwelling⁽⁴⁹⁾ • Nature-based tourism⁽⁵⁰⁾ • Nightclub entertainment facility⁽⁵¹⁾ • Non-resident workforce accommodation⁽⁵²⁾ • Office⁽⁵³⁾ • Outdoor sales⁽⁵⁴⁾ • Outdoor sport and recreation⁽⁵⁵⁾ 	<ul style="list-style-type: none"> • Port services⁽⁶¹⁾ • Relocatable home park⁽⁶²⁾ • Renewable energy facility⁽⁶³⁾ • Research and technology industry⁽⁶⁴⁾ • Residential care facility⁽⁶⁵⁾ • Resort complex⁽⁶⁶⁾ • Retirement facility⁽⁶⁷⁾ • Rooming accommodation⁽⁶⁹⁾ • Rural workers' accommodation⁽⁷¹⁾ • Service industry⁽⁷³⁾ • Service station⁽⁷⁴⁾ • Shop⁽⁷⁵⁾ • Shopping centre⁽⁷⁶⁾ • Short-term accommodation⁽⁷⁷⁾ • Showroom⁽⁷⁸⁾ • Special industry⁽⁷⁹⁾ • Theatre⁽⁸²⁾ • Tourist attraction⁽⁸³⁾ • Tourist park⁽⁸⁴⁾

- t. Development not listed in the tables above may be considered on its merits and where it reflects and support the outcomes of the zone.

6.2.3.1.2 Accepted development subject to requirements

If development is to be categorised as accepted development subject to requirements it must comply with the requirements for accepted development set out in Part A, Table 6.2.3.1.1. Where the development does not meet a requirement for accepted development (RAD) within Part A, Table 6.2.3.1.1, the category of development changes to assessable development under the rules outlined in section 5.3.3.(1), and assessment is against the corresponding performance outcome (PO) identified in the table below. This only occurs whenever a RAD is not met, and is therefore limited to the subject matter of the RADs that are not complied with. To remove any doubt, for those RADs that are complied with, there is no need for assessment against the corresponding PO.

Part A — Requirements for accepted development - Interim precinct

Table 6.2.3.1.1 Requirements for accepted development - Interim precinct

Requirements for accepted development	
General requirements	
Building height	
RAD1	Unless otherwise specified in this code, the height of all buildings and structures does not exceed 5m.
Setbacks	

6 Zones

<p>RAD2</p>	<p>Buildings and structures associated with the following uses are setback from all lot boundaries as follows:</p> <ul style="list-style-type: none"> a. Animal husbandry⁽⁴⁾ (buildings only) - 10m; b. Cropping⁽¹⁹⁾ (buildings only) - 10m; c. Animal keeping⁽⁵⁾, excluding catteries and kennels - 20m; d. Cropping⁽¹⁹⁾ (buildings only) - 10m; e. Intensive horticulture⁽⁴⁰⁾ - 10m; f. Rural Industry⁽⁷⁰⁾ - 20m; g. Wholesale nursery⁽⁸⁹⁾ - 10m; h. Veterinary services⁽⁸⁷⁾ - 10m.
<p>RAD3</p>	<p>Unless specified elsewhere in the zone code, all other buildings and structures are setback:</p> <ul style="list-style-type: none"> a. Road frontage - 6m minimum; b. Side and Rear - 4.5m minimum. <p>Note - For a Dwelling house⁽²²⁾ where located in a bushfire hazard area (see Overlay map - Bushfire hazard) a greater setback may be required. See values and constraints requirements Bushfire hazard.</p> <p>Note - This provision does not apply where a development footprint exists for a lot.</p>
<p>Development footprint</p>	
<p>RAD4</p>	<p>Where a development footprint has been identified as part of a development approval for reconfiguring a lot, all development occurs within that development footprint.</p>
<p>Building on sloping land</p>	
<p>RAD5</p>	<p>Building and site design on slopes between 10% and 15%:</p> <ul style="list-style-type: none"> a. use split-level, multiple-slab, pier or pole construction; b. avoid single-plane slabs and benching; and c. ensure the height of any cut or fill, whether retained or not, does not exceed 900mm. <p>Note - this does not apply to outbuildings or building work.</p>
<p>Lighting</p>	
<p>RAD6</p>	<p>Artificial lighting is directed and shielded in such a manner as not to exceed the recommended maximum values of light technical parameters for the control of obtrusive light given in Table 2.1 of the Australian Standard AS 4282 (1997) Control of Obtrusive Effects of Outdoor Lighting.</p> <p>Note - "Curfewed hours" are taken to be those between 10pm and 7am the following day.</p>

Hazardous Chemicals	
RAD7	All development that involves the storage or handling of hazardous chemicals listed in Schedule 9, Development involving hazardous chemicals, Table 9.0.1 Quantity thresholds for hazardous chemicals stored as accepted development subject to requirements complies with Table 9.0.3 Hazardous chemicals.
RAD8	Development does not involve the storage or handling of hazardous chemicals listed in Schedule 9, Development involving hazardous chemicals, Table 9.0.2 Hazardous chemicals assessable thresholds.
Waste treatment	
RAD9	All concentrated animal use areas (e.g. sheds, pens, holding yards, stables) are provided with site drainage to ensure all run-off is directed to suitable detention basins, filtration or other treatment areas.
Car parking	
RAD10	On-site car parking is provided in accordance with Schedule 7 - Car parking.
Clearing of habitat trees where not located in the Environmental areas overlay map	
RAD11	<p>Development does not result in the damaging, destroyed or clearing of a habitat tree. This does not apply to:</p> <ol style="list-style-type: none"> Clearing of a habitat tree located within an approved development footprint; Clearing of a habitat tree within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; Clearing of a habitat tree reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; Clearing of a habitat tree reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural , Rural residential and Environmental management and conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence; Clearing of a habitat tree reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes; Clearing of a habitat tree in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council; Clearing of a habitat tree associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens; Native forest practice where accepted development under Part 1, 1.7.7 Accepted development. <p>Editor's note - A native tree measuring greater than 80cm in diameter when measured at 1.3m from the ground is recognised as a 'habitat tree'. For further information on habitat trees, refer to Planning scheme policy – Environmental areas and corridors. Information detailing how this measurement is undertaken is provided in Australian Standard AS 4970 2009 Protection of Trees on Development Sites - Appendix A.</p>
Works requirements	
Utilities	
RAD12	<p>Where available, the development is connected to:-</p> <ol style="list-style-type: none"> an existing reticulated electricity supply;-

6 Zones

	<ul style="list-style-type: none"> b. telecommunications and broadband; c. reticulated sewerage; d. reticulated water; e. constructed and dedicated road. <p>Development is provided in an appropriate level of service and infrastructure in accordance with Planning scheme policy - Integrated design (Appendix A).</p>
--	--

Access	
RAD13	<p>Any new or changes to existing site access crossovers and driveways are designed, and located and constructed in accordance with:</p> <ul style="list-style-type: none"> a. where for a Council-controlled road and associated with a Dwelling house: <ul style="list-style-type: none"> i. Planning scheme policy - Integrated design; b. where for a Council-controlled road; and not associated with a Dwelling house: <ul style="list-style-type: none"> i. AS/NZS2890.1 section 3; or Parking facilities Part 1: Off street car parking; ii. AS/NZS 2890.2 - Parking facilities Part 2: Off-street commercial vehicle facilities; iii. Planning scheme policy - Integrated design; iv. Schedule 8 - Service vehicle requirements; c. where for a State-Controlled road, the Safe Intersection Sight Distance requirements in Austroads and the appropriate IPWEAQ standard drawings, or a copy of a Transport Infrastructure Act 1994, section 62 approval.
RAD14	<p>Any new or changes to existing internal driveways and access ways are designed and constructed in accordance with AS/NZS 2890.1 Parking Facilities Part 1: Off street car parking and the relevant standards in Planning scheme policy - Integrated design.</p>
RAD	<p>Access driveways, manoeuvring areas and loading facilities are sealed and provide for service vehicles listed in Schedule 8 - Service vehicle requirements for the relevant use. The on-site manoeuvring is to be in accordance with Schedule 8 - Service vehicle requirements.</p>

Stormwater	
RAD15	<p>Any new or changes to existing stormwater run-off from the site is conveyed to a point of lawful discharge without causing actionable nuisance or annoyance to any person, property or premises in accordance with Planning scheme policy – Integrated design.</p> <p>Note - A watercourse as defined in the Water Act may be accepted as a lawful point of discharge providing the drainage discharge from the site does not increase the downstream flood levels during events up to and including the 1% AEP storm. An afflux of +20mm may be accepted on Council controlled land and road infrastructure. No worsening is ensured when stormwater is discharged into a catchment that includes State Transport Infrastructure.</p>

RAD	<p>Where development:</p> <ul style="list-style-type: none"> a. is for an urban purpose that involves a land area 2500m² or greater in size; and b. that results in 6 or more dwellings; or c. that results in an impervious area greater than 25% of the net developable area, <p>incorporates a 'deemed to comply solution' to manage stormwater quality.</p> <p>Note - The deemed to comply solution is to be designed, constructed, established and maintained in accordance with the requirements of Water by Design 'Deemed to Comply Solutions - Stormwater Quality Management for South East Queensland' and Planning scheme policy - Integrated design.</p>								
RAD	<p>Development ensures that surface flows entering the premises from adjacent properties are not blocked, diverted or concentrated.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland may be required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p>								
RAD	<p>Development ensures that works (e.g. fences and walls) do not block, divert or concentrate the flow of stormwater to adjoining properties.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland may be required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p>								
RAD	<p>Stormwater drainage infrastructure (excluding detention and bio-retention systems) through or within private land is protected by easements in favour of Council (at no cost to Council). Minimum easement widths are as follows:</p> <table border="1" data-bbox="264 1223 1465 1664"> <thead> <tr> <th>Pipe Diameter</th> <th>Minimum Easement Width (excluding access requirements)</th> </tr> </thead> <tbody> <tr> <td>Stormwater Pipe up to 825mm diameter</td> <td>3.0m</td> </tr> <tr> <td>Stormwater Pipe up to 825mm diameter with Sewer pipe up to 225mm diameter</td> <td>4.0m</td> </tr> <tr> <td>Stormwater pipe greater than 825mm diameter</td> <td>Easement boundary to be 1m clear of the outside wall of the pipe and clear of all pits.</td> </tr> </tbody> </table> <p>Note - Additional easement width may be required in certain circumstances in order to facilitate maintenance access to the stormwater system.</p> <p>Note - Refer to Planning scheme policy - Integrated design (Appendix C) for easement requirements over open channels.</p>	Pipe Diameter	Minimum Easement Width (excluding access requirements)	Stormwater Pipe up to 825mm diameter	3.0m	Stormwater Pipe up to 825mm diameter with Sewer pipe up to 225mm diameter	4.0m	Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the pipe and clear of all pits.
Pipe Diameter	Minimum Easement Width (excluding access requirements)								
Stormwater Pipe up to 825mm diameter	3.0m								
Stormwater Pipe up to 825mm diameter with Sewer pipe up to 225mm diameter	4.0m								
Stormwater pipe greater than 825mm diameter	Easement boundary to be 1m clear of the outside wall of the pipe and clear of all pits.								

Site works and construction management

RAD	The site and any existing structures are to be maintained in a tidy and safe condition.
------------	---

6 Zones

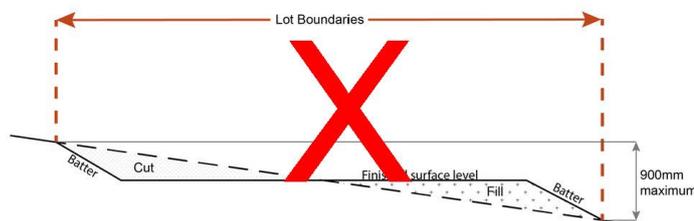

<p>RAD16</p>	<p>Site construction works incorporate temporary stormwater run-off, erosion and sediment controls and trash traps designed in accordance with the Urban Stormwater Quality Planning Guidelines, Planning scheme policy – Stormwater management and Planning scheme policy – Integrated design.</p> <p>Development does not cause erosion or allow sediment to leave the site.</p> <p>Note - The International Erosion Control Association (Australasia) Best Practice Erosion and Sediment Control provides guidance on strategies and techniques for managing erosion and sedimentation.</p>
<p>RAD</p>	<p>No dust emissions extend beyond the boundaries of the site during soil disturbances and construction works.</p>
<p>RAD</p>	<p>Existing street trees are protected and not damaged during works.</p> <p>Note - Where development occurs in the tree protection zone, measures and techniques as detailed in Australian Standard AS 4970 Protection of trees on developments sites are adopted and implemented.</p>
<p>RAD19</p>	<p>Any damage to Council land or infrastructure is repaired or replaced with the same materials, prior to plan sealing, or final building classification.</p>
<p>RAD17</p>	<p>Construction traffic including contractor car parking is controlled in accordance with a traffic management plan, prepared in accordance with the Manual of Uniform Traffic Control Devices (MUTCD) to ensure all traffic movements to and from the site are safe.</p>
<p>RAD20</p>	<p>Any material dropped, deposited or spilled on the road(s) as a result of construction processes associated with the site are to be cleaned at all times.</p>
<p>RAD18</p>	<p>All native vegetation to be retained on-site is temporarily fenced or protected prior to and during development works.</p> <p>Note - No parking of vehicles or storage of machinery or goods is to occur in these areas during development works</p>
<p>RAD</p>	<p>Disposal of materials is managed in one or more of the following ways:</p> <ol style="list-style-type: none"> all cleared vegetation, declared weeds, stumps, rubbish, car bodies, scrap metal and the like are removed and disposed of in a Council land fill facility; or all native vegetation with a diameter below 400mm is to be chipped and stored on-site. <p>Note - No burning of cleared vegetation is permitted.</p> <p>Note - The chipped vegetation must be stored in an approved location.</p>
<p>RAD</p>	<p>All development works are carried out within the following times:</p> <ol style="list-style-type: none"> Monday to Saturday (other than public holidays) between 6:30am and 6:30pm on the same day; no work is to be carried out on Sundays or public holidays.

Earthworks

RAD22

The total of all cut and fill on-site does not exceed 900mm in height.

Figure -- Cut and Fill

Note -- This is site earthworks not building work.

Filling or excavation does not:

- a. involve a change in level of more than 1.0m relative to natural ground level

OR

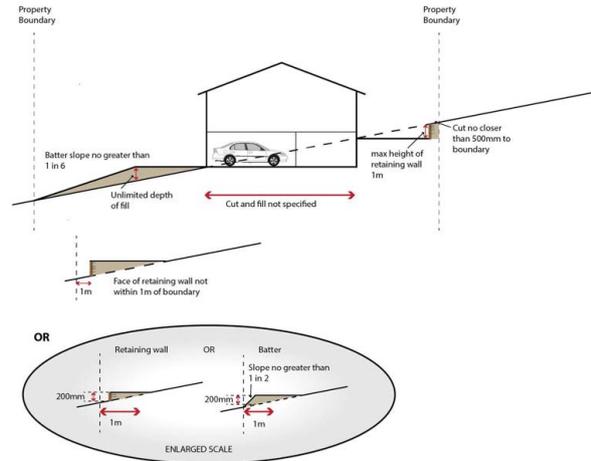

result in a batter greater than 1V to 6H;

- b. necessitate the construction of a freestanding retaining wall exceeding 1.0m in height relative to finished ground level;
- c. result in the top of any cut batter, or the exposed face of any freestanding retaining wall supporting that cut, being closer than 500mm to a property boundary;
- d. result in the toe of any fill batter, or exposed face of any freestanding retaining wall supporting that fill, being closer than 1.0m to a property boundary unless:
 - i. the depth of fill within the 1.0m strip does not exceed 200mm relative to natural ground level; or
 - ii. the batter slope within that 1.0m strip is no steeper than 1V to 2H.

THE NEW FIGURE BELOW IS PROPOSED AS PART OF THIS AMENDMENT

6 Zones

Figure - Filling or Excavation

<p>RAD</p>	<p>Cut and fill batters, (other than batters to dams and water impoundments), have a finished slope no steeper than the following:</p> <ol style="list-style-type: none"> any cut batter is no steeper than 1V in 4H; any fill batter, (other than a compacted fill batter), is no steeper than 1V in 4H; any compacted fill batter is no steeper than 1V in 4H.
<p>RAD</p>	<p>All cut and fill batters are provided with appropriate scour, erosion protection and run-off control measures including catch drains at the top of batters and lined batter drains as necessary.</p>
<p>RAD</p>	<p>Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance of steep slopes and batters.</p> <p>Note - Inspection and certification of steep slopes and batters may be required by a suitably qualified and experienced RPEQ.</p>
<p>RAD</p>	<p>All fill and excavation is contained on-site and is free draining.</p>
<p>RAD</p>	<p>Earthworks undertaken on the development site are shaped in a manner which does not:</p> <ol style="list-style-type: none"> prevent stormwater surface flow which, prior to commencement of the earthworks, passed onto the development site, from entering the land; or redirect stormwater surface flow away from existing flow paths; or divert stormwater surface flow onto adjacent land (other than a road) in a manner which: <ol style="list-style-type: none"> concentrates the flow; or increases the flow rates of stormwater over the affected section of the adjacent land above the situation which existed prior to the diversion; or causes actionable nuisance to any person, property or premises.
<p>RAD</p>	<p>All fill placed on-site is:</p>

	<p>a. limited to that necessary for the approved use;</p> <p>b. clean and uncontaminated (i.e. no building waste, concrete, green waste, actual acid sulfate soils, potential acid sulfate soils or contaminated material etc.) material is used as fill.</p>
RAD21	<p>The site is prepared and the fill placed on-site in accordance with Australian Standard AS3798.</p> <p>Note - The fill is to be inspected and tested in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures</p>
RAD	<p>No filling or excavation is undertaken in an easement issued in favour of Council or a public sector entity.</p> <p>Note - Public sector entity is defined in Schedule 2 of the Act.</p>
RAD23	<p>Filling or excavation that would result in any of the following is not carried out on site: does not result in:-</p> <p>a. reduction in cover over any Council or public sector entity infrastructure to less than 600mm;</p> <p>b. an increase in finished surface grade over, or within 1.5m on each side of, the Council or public sector entity infrastructure above that which existed prior to the filling or excavation works being undertaken.;</p> <p>c. prevent reasonable access to Council or public sector entity maintained infrastructure or any drainage feature on, or adjacent to the site for monitoring, maintenance or replacement purposes.</p> <p>Note - Public sector entity is defined in Schedule 2 of the Act.</p>

Fire services

Note - The provisions under this heading only apply if:

- a. the development is for, or incorporates:
- i. reconfiguring a lot for a community title scheme creating 1 or more vacant lots; or
 - ii. material change of use for 2 or more sole occupancy units on the same lot, or within the same community titles scheme; or
 - iii. material change of use for a Tourist park⁽⁸⁴⁾ with accommodation in the form of caravans or tents; or
 - iv. material change of use for outdoor sales⁽⁵⁴⁾, outdoor processing or outdoor storage where involving combustible materials.

AND

- b. none of the following exceptions apply:
- i. the distributor-retailer for the area has indicated, in its netserv plan, that the premises will not be served by that entity's reticulated water supply; or
 - ii. every part of the development site is within 60m walking distance of an existing fire hydrant on the distributor-retailer's reticulated water supply network, measured around all obstructions, either on or adjacent to the site.

Note - The provisions under this heading do not apply to buildings that are required by the Building Code of Australia to have a fire hydrant system complying with Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations or other fire fighting facilities which provide equivalent protection.

6 Zones

<p>RAD24</p>	<p>External fire hydrant facilities are provided on site to the standard prescribed under the relevant parts of <i>Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations</i>.</p> <p>Note - For this requirement for accepted development, the following are the relevant parts of AS 2419.1 (2005):</p> <ul style="list-style-type: none"> a. in regard to the form of any fire hydrant - Part 8.5 and Part 3.2.2.1, with the exception that for Tourist parks⁽⁸⁴⁾ or development comprised solely of dwellings and their associated outbuildings, single outlet above-ground hydrants or suitably signposted in-ground hydrants would be an acceptable alternative; b. in regard to the general locational requirements for fire hydrants - Part 3.2.2.2 (a), (e), (f), (g) and (h) as well as Appendix B of AS 2419.1 (2005); c. in regard to the proximity of hydrants to buildings and other facilities - Part 3.2.2.2 (b), (c) and (d), with the exception that: <ul style="list-style-type: none"> i. - for dwellings and their associated outbuildings, hydrant coverage need only extend to the roof and external walls of those buildings; ii. - for caravans and tents, hydrant coverage need only extend to the roof of those tents and caravans; iii. - for outdoor sales⁽⁵⁴⁾, processing or storage facilities, hydrant coverage is required across the entire area of the outdoor sales⁽⁵⁴⁾, outdoor processing and outdoor storage facilities; and d. in regard to fire hydrant accessibility and clearance requirements - Part 3.5 and where applicable, Part 3.6.
<p>RAD25</p>	<p>A continuous path of travel having the following characteristics is provided between the vehicle access point to the site and each external fire hydrant and hydrant booster point on the land:</p> <ul style="list-style-type: none"> a. an unobstructed width of no less than 3.5m; b. an unobstructed height of no less than 4.8m; c. constructed to be readily traversed by a 17 tonne HRV fire brigade pumping appliance; d. an area for a fire brigade pumping appliance to stand within 20m of each fire hydrant and 8m of each hydrant booster point.
<p>RAD26</p>	<p>On-site fire hydrant facilities are maintained in effective operating order in a manner prescribed in <i>Australian Standard AS1851 (2012) – Routine service of fire protection systems and equipment</i>.</p>
<p>RAD27</p>	<p>For development that contains on-site fire hydrants external to buildings:</p> <ul style="list-style-type: none"> a. those external hydrants can be seen from the vehicular entry point to the site; or b. a sign identifying the following is provided at the vehicular entry point to the site: <ul style="list-style-type: none"> i. the overall layout of the development (to scale); ii. internal road names (where used); iii. all communal facilities (where provided); iv. the reception area and on-site manager's office (where provided); v. external hydrants and hydrant booster points; vi. physical constraints within the internal roadway system which would restrict access by fire fighting appliances to external hydrants and hydrant booster points. <p>Note - The sign prescribed above, and the graphics used are to be:</p> <ul style="list-style-type: none"> a. in a form;

	<p>b. of a size;</p> <p>c. illuminated to a level;</p> <p>which allows the information on the sign to be readily understood, at all times, by a person in a fire fighting appliance up to 4.5m from the sign.</p>										
RAD28	<p>For development that contains on-site fire hydrants external to buildings, those hydrants are identified by way of marker posts and raised reflective pavements markers in the manner prescribed in the technical note <i>Fire hydrant indication system</i> produced by the Queensland Department of Transport and Main Roads.</p> <p>Note - Technical note Fire hydrant indication system is available on the website of the Queensland Department of Transport and Main Roads.</p>										
Use specific requirements											
Dwelling house⁽²²⁾ - Secondary dwelling											
RAD29	<p>The siting and design of dwellings ensures that the secondary dwelling is:</p> <p>a. not located in front of the primary dwelling;</p> <p>b. annexed to (adjoining, below or above) or located within 50.0m of the primary dwelling (excluding domestic outbuildings);</p> <p>c. accessed from the existing driveway giving access to the dwelling house⁽²²⁾.</p> <p>Note - The requirements to locate a Secondary dwelling within 50m of the primary dwelling is measured from the outermost projection of the primary dwelling (being the main house, excluding the domestic outbuildings) to the outermost projection of the Secondary dwelling. The entire Secondary dwelling does not need to be contained within the specified distance.</p>										
RAD30	No more than 1 secondary dwelling is located on an allotment.										
RAD31	The GFA of the secondary dwelling does not exceed 100m ² GFA.										
Dwelling house⁽²²⁾ - Domestic outbuildings											
RAD32	<p>Domestic outbuildings:</p> <p>a. have a total combined maximum GFA roofed area as outlined in the table below:</p> <table border="1" data-bbox="268 1675 1465 1944"> <thead> <tr> <th>Size of lot</th> <th>Max. GFA Roofed Area</th> </tr> </thead> <tbody> <tr> <td>Less than 600m²</td> <td>50m²</td> </tr> <tr> <td>600m² - 1000m²</td> <td>70m²</td> </tr> <tr> <td>> Greater than 1000m² – 2000m²</td> <td>80m²</td> </tr> <tr> <td>Greater than 2000m²</td> <td>150m²</td> </tr> </tbody> </table> <p>Note – Building Work is excluded from the GFA calculations:</p>	Size of lot	Max. GFA Roofed Area	Less than 600m ²	50m ²	600m ² - 1000m ²	70m ²	> Greater than 1000m ² – 2000m ²	80m ²	Greater than 2000m ²	150m ²
Size of lot	Max. GFA Roofed Area										
Less than 600m ²	50m ²										
600m ² - 1000m ²	70m ²										
> Greater than 1000m ² – 2000m ²	80m ²										
Greater than 2000m ²	150m ²										

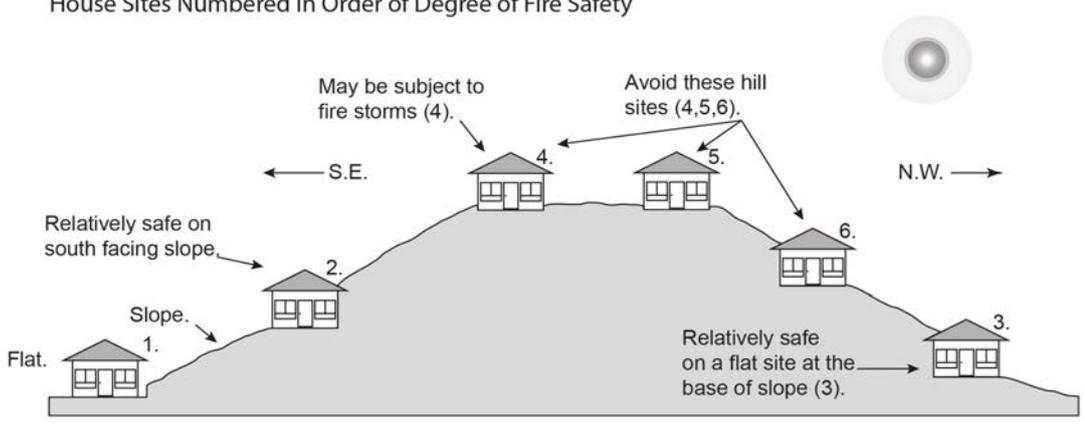

6 Zones

	<p>b. have a maximum building height of 4m and a mean height not exceeding 3.5m;</p> <p>c. are located behind the main building line and not within primary or secondary frontage or trafficable water body setbacks.</p> <p>Note - For c. above to determine the main building line a trafficable water body boundary is to be treated the same as a secondary frontage.</p>
Home based business⁽³⁵⁾	
RAD33	Home based business(s) ⁽³⁵⁾ are fully contained within a dwelling or on-site structure, except for a home based child care facility.
RAD34	The maximum total use area is 100m ² .
RAD35	<p>Up to 2 additional non-residents, either employees or customers, are permitted on the site at any one time, except where involving the use of heavy vehicles, where no employees are permitted.</p> <p>Note - This provision does not apply to Bed and Breakfast or farmstay business.</p>
RAD36	<p>Hours of operation to be restricted to 8:00am to 6:00pm Monday to Saturday and are not open to the public on Sunday's, Christmas Day, Good Friday or Anzac Day, except for:</p> <p>a. bed and breakfast or farmstay business which may operate on a 24 hour basis;</p> <p>b. office or administrative activities that do not generate non-residents visiting the site, such as book keeping and computer work.</p>
RAD37	<p>The maximum number of heavy vehicles, trailer and motor vehicles stored on-site is as follows:</p> <p>a. 1 heavy vehicle;</p> <p>b. 1 trailer;</p> <p>c. Up to 3 motor vehicles.</p> <p>Note - The car parking provision associated with the dwelling house⁽²²⁾ is in addition to this requirement.</p> <p>Note - The number of motor vehicles stated is in addition to motor vehicles associated with a dwelling house⁽²²⁾.</p>
RAD38	<p>Vehicle parking areas, vehicle standing areas and outdoor storage areas of plant and equipment are screened from adjoining sites by either planting, wall(s), fence(s) or a combination at least 1.8m in height along the length of those areas.</p> <p>Note - Planting for screening is to have a minimum depth of 3m.</p>
RAD39	Heavy vehicle storage buildings, parking areas and standing areas are setback a minimum of 30m from all property boundaries.
RAD40	<p>The use does not involve vehicle servicing or major repairs, including spray painting or panel beating.</p> <p>Note - Vehicle servicing excludes general maintenance of a vehicle such as, but not limited to, changing engine fluids, filters and parts such as batteries and plugs.</p>

RAD41	The use is not an environmentally relevant activity (ERA) as defined in the <i>Environmental Protection Regulation 2008</i> .
RAD42	Only goods grown, produced or manufactured on-site are sold from the site.
RAD43	Display of goods grown, produced or manufactured on-site are contained within a dwelling or on-site structure and the display of goods is not visible from boundary of the site.
RAD44	For bed and breakfast and farmstays: <ul style="list-style-type: none"> a. overnight accommodation is provided in the dwelling house⁽²²⁾ of the accommodation operator. b. maximum 4 bedrooms are provided for a maximum of 10 guests. c. meals are served to paying guests only. d. rooms do not contain food preparation facilities. <p>Note - RAD36 - RAD46 above do not apply to home based business⁽³⁵⁾</p>
Roadside stalls⁽⁶⁸⁾	
RAD45	No more than one roadside stall ⁽⁶⁸⁾ per property.
RAD46	Goods offered for sale are only goods grown, produced or manufactured on the site.
RAD47	The maximum area associated with a roadside stall ⁽⁶⁸⁾ , including any larger separate items displayed for sale, does not exceed 20m ² .
RAD48	Car parking for 2 vehicles is provided off the road carriage and located on the property.
RAD49	The roadside stall ⁽⁶⁸⁾ is located no closer than 100m from an intersection.
Sales office⁽⁷²⁾	
RAD50	A sales office ⁽⁷²⁾ is located on the site for no longer than 2 years.
Telecommunications facility⁽⁸¹⁾	
Editor's note - In accordance with the Federal legislation Telecommunications facilities ⁽⁸¹⁾ must be constructed and operated in a manner that will not cause human exposure to electromagnetic radiation beyond the limits outlined in the Radiocommunications (Electromagnetic Radiation - Human Exposure) Standard 2003 and Radio Protection Standard for Maximum Exposure Levels to Radiofrequency Fields - 3Khz to 300Ghz.	
RAD51	A minimum area of 45m ² is available at ground level to allow for additional equipment shelters and associated structures for the purpose of co-locating on the proposed facility.
RAD52	The development results in no net reduction in the minimum quantity and standard of landscaping, private or communal open space or car parking spaces required under the planning scheme or under an existing development approval.
RAD53	Equipment shelters and associated structures are located: <ul style="list-style-type: none"> a. directly beside the existing equipment shelter and associated structures; b. behind the main building line; c. further away from the frontage than the existing equipment shelter and associated structures; d. a minimum of 10m from side and rear boundaries, except where in the Industry and Extractive industry zones, the minimum side and rear setback is 3m.

6 Zones

RAD54	Equipment shelters and other associated structures are either the same type of colour or material to match the surrounding locality.
RAD55	The facility is enclosed by security fencing or by other means to ensure public access is prohibited.
RAD56	<p>A minimum 3m wide strip of dense planting is provided around the perimeter of the fenced area, between the development and street frontage and adjoining uses.</p> <p>Note - Landscaping is provided in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person to ensure compliance with Planning scheme policy - Integrated design.</p>
RAD57	All equipment comprising the telecommunications facility ⁽⁸¹⁾ which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure no noise from this equipment can be heard, or felt at the site boundary.
Values and constraints requirements	
<p>Note - The relevant values and constraints requirements do not apply where the development is consistent with a current Development permit for Reconfiguring a lot or Material change of use or Operational work, where that approval has considered and addressed (e.g. through a development footprint plan (or similar in the case of Landslide hazard) or conditions of approval) the identified value or constraint under this planning scheme.</p>	
Bushfire hazard (refer Overlay map - Bushfire hazard to determine if the following requirements apply)	
<p>Note - For the purposes of section 12 of the Building Regulation 2006, land identified as very high potential bushfire intensity, high potential bushfire intensity, medium potential bushfire intensity or potential impact buffer on the Bushfire hazard overlay map is the 'designated bushfire hazard area'. AS 3959-2009 Construction of buildings in bushfire hazard areas applies within these areas.</p>	
RAD58	<p>a. Building and structures are:</p> <ul style="list-style-type: none"> i. not located on a ridgeline ii. not located on land with a slope greater than 15% (see Overlay map – Landslide hazard) <p>b. Dwellings are located on east to south facing slopes.</p>

	<p style="text-align: center;">House Sites Numbered in Order of Degree of Fire Safety</p>  <p>(1 being the safest , 6 being the most hazardous.) From Bushfire Prone Areas: Siting and Design of Residential Buildings (1997), Queensland Department of Local Government and Planning, and Queensland Fire & Rescue Service.</p>
<p>RAD59</p>	<p>Buildings and structures have contained within the site:</p> <ol style="list-style-type: none"> a. a separation from classified vegetation of 20m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater; b. a separation from low threat vegetation of 10m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater; c. a separation of no less than 10m between a fire fighting water supply extraction point and any classified vegetation, buildings and other roofed structures; d. an area suitable for a standard fire fighting appliance to stand within 3m of a fire fighting water supply extraction point; and e. an access path suitable for use by a standard fire fighting appliance having a formed width of at least 4m, a cross-fall of no greater than 5%, and a longitudinal gradient of no greater than 25%: <ol style="list-style-type: none"> i. to, and around, each building and other roofed structure; and ii. to each fire fighting water supply extraction point. <p>Note - The meaning of the terms classified vegetation and low threat vegetation as well as the method of calculating the bushfire attack level are as described in Australian Standard AS 3959.</p>
<p>RAD60</p>	<p>The length of driveway:</p> <ol style="list-style-type: none"> a. to a public road does not exceed 100m between the most distant part of a building used for any purpose other than storage and the nearest part of a public road; b. has a maximum gradient no greater than 12.5%; c. have a minimum width of 3.5m; d. accommodate turning areas for fire fighting appliances in accordance with Qld Fire and Emergency Services' Fire Hydrant and Vehicle Access Guideline.
<p>RAD61</p>	<ol style="list-style-type: none"> a. A reticulated water supply is provided by a distributor retailer for the area or, where not connected to a reticulated water supply, on-site fire fighting water storage containing not less than 10 000 litres (tanks with fire brigade tank fittings, swimming pools) is provided and located within 10m of buildings and structures.

6 Zones

	<p>b. Where a swimming pool is the nominated on-site fire fighting water storage source, vehicle access to within 3m of that water storage source is provided.</p> <p>c. Where a tank is the nominated on-site fire fighting water storage source, it includes:</p> <ol style="list-style-type: none"> i. a hardstand area allowing medium rigid vehicle (15 tonne fire appliance) access within 6m of the tank; ii. fire brigade tank fittings, comprising 50mm ball valve and male camlock coupling and, if underground, an access hole of 20mm (minimum) to accommodate suction lines.
RAD62	Development does not involve the manufacture or storage of hazardous chemicals.
<p>Environmental areas (refer Overlay map - Environmental areas to determine if the following requirements apply)</p> <p>Note - The following are excluded from the native clearing provisions of this planning scheme:</p> <ol style="list-style-type: none"> a. Clearing of native vegetation located within an approved development footprint; b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental Management and Conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence; e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes; f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council; g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens; h. Grazing of native pasture by stock; i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development. <p>Note - Definition for native vegetation is located in Schedule 1 Definitions.</p> <p>Note - Native vegetation subject to this requirements primarily comprises of matters of national environmental significance (MNES), matters of state environmental significance (MSES). They also comprise some matters of local environmental significance (MLES). A MLES is defined in Schedule 1.2, Administrative definitions. A list of the elements that apply to the mapped MSES and MLES is provided in Appendix 1 of the Planning scheme policy - Environmental areas.</p> <p>Editors' Note - The accuracy of overlay mapping can be challenged through the development application process (code assessable development) or by way of a planning scheme amendment. See Council's website for details.</p> <p>Editors' Note - When clearing native vegetation within a MSES area, you may still require approval from the State government.</p>	
RAD63	Where no suitable land cleared of native vegetation exists, clearing of native vegetation in High Value Area or Value Offset Area is for the purpose of a new dwelling house ⁽²²⁾ and all associated facilities* or an extension to an existing dwelling house ⁽²²⁾ only, and comprises an area no greater than 1500m ² .

	<p>Note - *All associated facilities includes: on-site wastewater treatment, all areas of disturbance, on-site parking, access and manoeuvring areas.</p> <p>Editor's note - See in heading above for other uses excluded from native vegetation clearing requirements.</p> <p>Editor's note - Where vegetation clearance is accepted development subject to requirements, care should be undertaken to avoid adverse impacts on koalas, koala habitat values and habitat connectivity and to encourage existing koala usage of the site. Measures to minimise impacts include:</p> <ol style="list-style-type: none"> i. co-locating all associated activities, infrastructure and access strips; ii. be the least valued area of koala habitat on the site; iii. minimise the footprint of the development envelope area; iv. minimise edge effects to areas external to the development envelope; v. location and design consideration to ensure koala safety and movement in accordance with the Koala-sensitive Design Guideline and Planning scheme policy – Environmental areas; vi. sufficient area between the development and koala habitat trees to achieve their long-term viability. <p>Editor's note - Where vegetation clearing is accepted development subject to requirements, consideration should be given to avoid clearing habitat trees. Habitat trees may contain structural hollows where animals live, breed and shelter. The provision of nest boxes or salvaging of hollows will provide compensatory roosting and nesting opportunities for local wildlife including sugar gliders, possums and owls. For further information see Planning scheme policy – Environmental areas.</p>
RAD64	<p>No clearing of native vegetation is to occur within the Value Offset Area MLES - Waterway buffer or Value Offset Area MLES - Wetland buffer.</p> <p>This does not apply to the following:</p> <ol style="list-style-type: none"> a. Clearing of native vegetation located within an approved development footprint; b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental management and conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence; e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes; f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council; g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens; h. Grazing of native pasture by stock; i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development.
Extractive resources transport routes (refer Overlay map - Extractive resources (transport route and buffer) to determine if the following requirements apply)	
RAD65	<p>The following uses are not located within the 100m wide transport route buffer:</p> <ol style="list-style-type: none"> a. Caretaker's accommodation⁽¹⁰⁾, except where located in the Extractive industry zone; b. Community residence⁽¹⁶⁾; c. Dual occupancy⁽²¹⁾; d. Dwelling house⁽²²⁾; e. Dwelling unit⁽²³⁾; f. Hospital⁽³⁶⁾; g. Rooming accommodation⁽⁶⁹⁾; h. Multiple dwelling⁽⁴⁹⁾;

6 Zones

	<ul style="list-style-type: none"> i. Non-resident workforce accommodation⁽⁵²⁾; j. Relocatable home park⁽⁶²⁾; k. Residential care facility⁽⁶⁵⁾; l. Resort complex⁽⁶⁶⁾. m. Retirement facility⁽⁶⁷⁾; n. Rural workers' accommodation⁽⁷¹⁾; o. Short-term accommodation⁽⁷⁷⁾; p. Tourist park⁽⁸⁴⁾.
RAD66	Except for an existing vacant lot, development does not create a new vehicle access point onto an Extractive resources transport route.
RAD67	A vehicle access point is located, designed and constructed in accordance with Planning scheme policy - Integrated design.
<p>Heritage and landscape character (refer Overlay map - Heritage and landscape character to determine if the following requirements apply)</p> <p>Note - Places, including sites, objects and buildings having local cultural heritage significance, are identified on Overlay map - Heritage and landscape character and listed in Schedule 1 of Planning scheme policy - Heritage and landscape character. Places also having cultural heritage significance at a State level and being entered in the Queensland Heritage Register, are also identified in Schedule 1 of Planning scheme policy - Heritage and landscape character.</p>	
RAD68	<p>Development is for the preservation, maintenance, repair and restoration of the site, object or building.</p> <p>This does not apply to Listed item 99, in Schedule 1 - List of sites, objects and buildings of significant historical and cultural value of Planning scheme policy - Heritage and landscape character.</p> <p>Note - Preservation, maintenance, repair and restoration are defined in Schedule 1 - Definitions</p>
RAD69	<p>A cultural heritage conservation management plan is prepared in accordance with Planning scheme policy – Heritage and landscape character and submitted to Council prior to the commencement of any preservation, maintenance, repair and restoration works. Any preservation, maintenance, repair and restoration works are in accordance with the Council approved cultural heritage conservation management plan.</p> <p>This does not apply to Listed item 99 in Schedule 1 - List of sites, objects and buildings of significant historical and cultural value of Planning scheme policy - Heritage and landscape character.</p>
RAD70	Development does not result in the removal of or damage to any significant tree identified on Overlay map – Heritage and landscape character and listed in Appendix 2 of Planning scheme policy – Heritage and landscape character.
RAD71	<p>The following development does not occur within 20m of the base of any significant tree, identified on Overlay map – Heritage and landscape character and listed in Appendix 2 of Planning scheme policy – Heritage and landscape character:</p> <ul style="list-style-type: none"> a. construction of any building; b. laying of overhead or underground services; c. any sealing, paving, soil compaction; d. any alteration of more than 75mm to the ground surface level prior to work commencing.
RAD72	Pruning of a significant tree occurs in accordance with Australian Standard AS 4373-2007 - Pruning of Amenity Trees.
<p>Landslide hazard (refer Overlay map - Landslide hazard to determine if the following requirements apply)</p>	

RAD73	Development does not: <ul style="list-style-type: none"> a. involve earthworks exceeding 50m³; b. involve cut and fill having a height greater than 600mm; c. involve any retaining wall having a height greater than 600mm; d. redirect or alter the existing flow of surface or groundwater.
RAD74	Buildings, excluding domestic outbuildings: <ul style="list-style-type: none"> a. are split-level, multiple-slab, pier or pole construction; b. are not single plane slab on ground.
RAD75	Development does not involve the manufacture, handling or storage of hazardous chemicals.
Overland flow path (refer Overlay map - Overland flow path to determine if the following requirements apply)	
RAD76	Development for a material change of use or building work does not involve the construction of a building or structure in an Overland flow path area.
RAD77	Development for a material change of use or operational work does not impede the flow of flood waters through the premises or worsen flood flows to other premises. <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow</p>
RAD78	Development for a material change of use or building work ensures that fencing in an overland flow path area is at least 50% permeable.
RAD79	Development for a material change of use or building work that involves a hazardous chemical ensures the hazardous chemicals is not located within an overland flow path area.
RAD80	Development for a material change of use or building work for a Park ⁽⁵⁷⁾ ensures that work is provided in accordance with the requirements set out in Appendix B of the Planning scheme policy - Integrated design.
Riparian and wetland setbacks (refer Overlay map - Riparian and wetland setback to determine if the following requirements apply)	
Note - W1, W2 and W3 waterway and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.	
RAD81	No development is to occur within: <ul style="list-style-type: none"> a. 50m from top of bank for W1 waterway and drainage line b. 30m from top of bank for W2 waterway and drainage line c. 20m from top of bank for W3 waterway and drainage line d. 100m from the edge of a Ramsar wetland, 50m from all other wetlands. <p>Note - W1, W2 and W3 waterways and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.</p>

6 Zones

	<p>Note - In some cases, the top of bank may not be easily defined, as such a hydraulic measurement may be applied instead. Moreton Bay Regional Council will provide further direction on how to determine and locate the setback boundary in these locations.</p> <p>Note - The minimum setback distance applies to the each side of waterway.</p>
--	--

Part B — Criteria for assessable development - Interim precinct

Where development is categorised as assessable development - code assessment in the Table of Assessment, and located in a precinct, the assessment benchmarks are the criteria set out in Part B, Table 6.2.3.1.2 as well as the purpose statement and overall outcomes of this code.

Where development is categorised as assessable development - impact assessment, the assessment benchmarks become the whole of the planning scheme.

Table 6.2.3.1.2 Assessable development - Interim precinct

Performance outcomes	Examples that achieve aspects of the Performance Outcomes
General criteria	
Interim uses	
<p>PO1</p> <p>Interim uses:</p> <ul style="list-style-type: none"> a. do not fragment or alienate the land or result in the loss of land for future urban purposes; b. result in minimal investment; c. do not prejudice or delay the use of the land for urban purposes. 	No example provided.
<p>PO2</p> <p>Interim uses:</p> <ul style="list-style-type: none"> a. are adequately serviced with necessary infrastructure to meet on-site needs and requirements; b. are of a size and scale that maintains the low density, low intensity and open area landscape character anticipated in the interim precinct; c. are designed, located and operated in a manner that avoids nuisance impacts on adjoining properties; d. requires minimal filling or excavation. Where this occurs, visual impacts are reduced through screening; 	No example provided.

<p>e. are not visually dominant from the streetscape or adjoining properties;</p> <p>f. utilise materials, finishes and colours that are consistent with existing semi-rural environment.</p>	
Site density	
<p>PO3</p> <p>Development does not result in residential density exceeding more than one dwelling house⁽²²⁾ per lot.</p>	<p>No example provided</p>
Building height	
<p>PO4</p> <p>The height of buildings and structures:</p> <p>a. is consistent with the existing low rise, open area and low density character and amenity of the Interim precinct;</p> <p>b. does not unduly impact on access to daylight, sunlight, overshadowing or privacy experienced by adjoining premises.</p>	<p>E4.1</p> <p>Unless otherwise specified in this code, the height of all buildings and structures does not exceed 5m.</p>
Setbacks	
<p>PO5</p> <p>Buildings and structures are setback to:</p> <p>a. be consistent with the semi-rural character of the area;</p> <p>b. result in development not being visually dominant or overbearing with respect on adjoining properties;</p> <p>c. maintain the privacy of adjoining.</p>	<p>E5</p> <p>Unless specified elsewhere in the zone code, the minimum setback from a boundary is as follows:</p> <p>a. Front boundary – 6m;</p> <p>b. Side boundary – 4.5m;</p> <p>c. Rear boundary – 4.5m.</p> <p>Note - This provision does not apply where a development footprint exists for a lot.</p>
<p>PO6</p> <p>Non-residential uses are setback to ensures:</p> <p>a. chemical spray, fumes, odour, dust are contained on-site;</p>	<p>E6</p> <p>The following uses and associated buildings are setback from all property boundaries as follows:</p> <p>a. Animal husbandry⁽⁴⁾ (buildings only) - 10m;</p>

6 Zones

<p>b. unreasonable nuisance or annoyance resulting from, but not limited to; noise, storage of materials and rubbish does not adversely impact upon land users adjacent to, or within the general vicinity; and</p> <p>c. buildings and other structures are consistent with the open area, low density, low built form character and amenity associated with the interim precinct.</p>	<p>b. Cropping⁽¹⁹⁾ (buildings only) - 10m;</p> <p>c. Animal keeping⁽⁵⁾, excluding catteries and kennels - 20m;</p> <p>d. Cropping⁽¹⁹⁾ (buildings only) - 10m;</p> <p>e. Intensive horticulture⁽⁴⁰⁾ - 10m;</p> <p>f. Rural Industry⁽⁷⁰⁾ - 20m;</p> <p>g. Wholesale nursery⁽⁸⁹⁾ - 10m;</p> <p>h. Veterinary services⁽⁸⁷⁾ - 10m.</p>
<p>Development footprint</p>	
<p>PO7</p> <p>Where a development footprint has been identified as part of a development approval for reconfiguring a lot, all development occurs within that development footprint.</p>	<p>No example provided.</p>
<p>Building on sloping land</p>	
<p>PO8</p> <p>Building and site design on slopes between 10% and 15% must:</p> <p>a. use split-level, multiple-slab, pier or pole construction;</p> <p>b. avoid single-plane slabs and benching;</p> <p>c. ensure the height of any cut or fill, whether retained or not, does not exceed 900mm;</p> <p>d. minimise any visual impact on the landscape character; and</p> <p>e. protect the amenity of adjoining properties.</p>	<p>No example provided.</p>
<p>Amenity</p>	
<p>PO9</p> <p>The amenity of the area and adjacent sensitive land uses are protected from the impacts of dust, odour, light, chemicals and other environmental nuisances</p>	<p>No example provided.</p>
<p>Hazardous Chemicals</p> <p>Note - To assist in demonstrating compliance with the following performance outcomes, a Hazard Assessment Report may be required to be prepared and submitted by a suitably qualified person in accordance with 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.</p> <p>Note - Terms used in this section are defined in 'State Planning Policy Guideline - Guidance on development involving hazardous chemicals'.</p>	

<p>PO10</p> <p>Off sites risks from foreseeable hazard scenarios involving hazardous chemicals are commensurate with the sensitivity of the surrounding land use zones.</p>	<p>E10.1</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of land zoned for vulnerable or sensitive land uses as described below:</p> <p>Dangerous Dose</p> <ul style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ul style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. b. For any hazard scenario involving fire or explosion: <ul style="list-style-type: none"> i. 7kPa overpressure; ii. 4.7kW/m² heat radiation. <p>If criteria E1.1 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 0.5×10^{-6}/year.</p>
	<p>E10.2</p> <p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of a commercial or community activity land use zone as described below:</p> <p>Dangerous Dose</p> <ul style="list-style-type: none"> a. For any hazard scenario involving the release of gases or vapours: <ul style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. b. For any hazard scenario involving fire or explosion: <ul style="list-style-type: none"> i. 7kPa overpressure; ii. 4.7kW/m² heat radiation. <p>If criteria E1.2 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 5×10^{-6}/year.</p>
	<p>E10.3</p>

6 Zones

	<p>Off site impacts or risks from any foreseeable hazard scenario does not exceed the dangerous dose at the boundary of an industrial land use zone as described below:</p> <p>Dangerous Dose</p> <p>a. For any hazard scenario involving the release of gases or vapours:</p> <ul style="list-style-type: none"> i. AEGL2 (60minutes) or if not available ERPG2; ii. An oxygen content in air <19.5% or >23.5% at normal atmospheric pressure. <p>b. For any hazard scenario involving fire or explosion:</p> <ul style="list-style-type: none"> i. 14kPa overpressure; ii. 12.6kW/m² heat radiation. <p>If criteria E1.3 (a) or (b) cannot be achieved, then the risk of any foreseeable hazard scenario shall not exceed an individual fatality risk level of 50 x 10⁻⁶/year.</p>
<p>PO11</p> <p>Buildings and package stores containing fire-risk hazardous chemicals are designed to detect the early stages of a fire situation and notify a designated person.</p>	<p>E11</p> <p>Buildings and package stores containing fire-risk hazardous chemicals are provided with 24 hour monitored fire detection system for early detection of a fire event.</p>
<p>PO12</p> <p>Common storage areas containing packages of flammable and toxic hazardous chemicals are designed with spill containment system(s) that are adequate to contain releases, including fire fighting media.</p>	<p>E12</p> <p>Storage areas containing packages of flammable and toxic hazardous chemicals are designed with spill containment system(s) capable of containing a minimum of the total aggregate capacity of all packages plus the maximum operating capacity of any fire protection system for the storage area(s) over a minimum of 60 minutes.</p>
<p>PO13</p> <p>Storage and handling areas, including manufacturing areas, containing hazardous chemicals in quantities greater than 2,500L or kg within a Local Government "flood hazard area" are located and designed in a manner to minimise the likelihood of inundation of flood waters from creeks, rivers, lakes or estuaries.</p>	<p>E13.1</p> <p>The base of any tank with a WC >2,500L or kg is higher than any relevant flood height level identified in an area's flood hazard area. Alternatively:</p> <ul style="list-style-type: none"> a. bulk tanks are anchored so they cannot float if submerged or inundated by water; and b. tank openings not provided with a liquid tight seal, i.e. an atmospheric vent, are extended above the relevant flood height level. <hr/> <p>E13.2</p> <p>The lowest point of any storage area for packages</p>

	>2,500L or kg is higher than any relevant flood height level identified in an area's flood hazard area. Alternatively, package stores are provided with impervious bund walls or racking systems higher than the relevant flood height level.
Waste treatment	
PO14 Stormwater generated on-site is treated and disposed of in an acceptable manner to mitigate any impacts on soil, surface water or ground water quality. Development resulting in the degradation of soil, surface water or ground water quality is avoided.	E14 All concentrated animal use areas (e.g. Sheds, pens, holding yards, stables, kennels and other animal enclosures) are provided with site drainage to ensure all run-off is directed to suitable detention basins, filtration or other treatment areas.
Car parking	
PO15 Traffic generation, vehicle movement and on-site car parking associated with an activity: a. provides safe, convenient and accessible access for vehicles and pedestrians; b. provides safe and convenient on-site parking and manoeuvring to meet anticipated parking demand; c. is appropriate to the road classification and carrying capacity of the local network and able to meet the additional demands generated by the development; and d. does not result adverse impacts on the efficient and safe functioning of the road network. Note - Refer to Planning scheme policy - Integrated transport assessment for guidance on how to achieve compliance with this outcome.	E15 On-site car parking is provided in accordance with Schedule 7 - Car parking.
Noise	
PO16 Noise generating uses do not adversely affect existing or potential noise sensitive uses. Note - The use of walls, barriers or fences that are visible from or adjoin a road or public area are not appropriate noise attenuation measures unless adjoining a motorway, arterial road or rail line. Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.	No example provided.
PO17	E17.1

6 Zones

<p>Sensitive land uses are provided with an appropriate acoustic environment within designated external private outdoor living spaces and internal areas while:</p> <ul style="list-style-type: none"> a. contributing to safe and usable public spaces, through maintaining high levels of surveillance of parks, streets and roads that serve active transport purposes (e.g. existing or future pedestrian paths or cycle lanes etc); b. maintaining the amenity of the streetscape. <p>Note - A noise impact assessment may be required to demonstrate compliance with this PO. Noise impact assessments are to be prepared in accordance with Planning scheme policy - Noise.</p> <p>Note - Refer to Planning Scheme Policy – Integrated design for details and examples of noise attenuation structures.</p>	<p>Development is designed to meet the criteria outlined in the Planning Scheme Policy – Noise.</p> <p>E17.2</p> <p>Noise attenuation structures (e.g. walls, barriers or fences):</p> <ul style="list-style-type: none"> a. are not visible from an adjoining road or public area unless: <ul style="list-style-type: none"> i. adjoining a motorway or rail line; or ii. adjoining part of an arterial road that does not serve an existing or future active transport purpose (e.g. pedestrian paths or cycle lanes) or where attenuation through building location and materials is not possible. b. do not remove existing or prevent future active transport routes or connections to the street network; c. are located, constructed and landscaped in accordance with Planning scheme policy - Integrated design. <p>Note - Refer to Planning scheme policy – Integrated design for details and examples of noise attenuation structures.</p> <p>Note - Refer to Overlay map – Active transport for future active transport routes.</p>
<p>Clearing of habitat trees where not located within the Environmental areas overlay map</p>	
<p>PO18</p> <ul style="list-style-type: none"> a. Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected. b. Development does not result in the net loss of fauna habitat. Where development does result in the loss of a habitat tree, development will provide replacement fauna nesting boxes at the following rate of 1 nest box for every hollow removed. Where hollows have not yet formed in trees > 80cm in diameter at 1.3m height, 3 nest boxes are required for every habitat tree removed. c. Development does not result in soil erosion or land degradation or leave land exposed for an unreasonable period of time but is rehabilitated in a timely manner <p>Note: Further guidance on habitat trees is provided in Planning scheme policy - Environmental areas</p>	<p>No example provided.</p>

Works criteria

Utilities	
<p>PO</p> <p>All services including water supply, sewage disposal, electricity, street lighting, telecommunications and gas (if available) are provided in a manner that:</p> <ol style="list-style-type: none"> is effective in delivery of service and meets reasonable community expectations; has capacity to service the maximum lot yield envisaged for the zone and the service provider's design assumptions; ensures a logical, sequential, efficient and integrated roll out of the service network; is conveniently accessible in the event of maintenance or repair; minimises whole of life cycle costs for that infrastructure; minimises risk of potential adverse impacts on the natural and built environment; minimises risk of potential adverse impact on amenity and character values; recognises and promotes Councils Total Water Cycle Management policy and the efficient use of water resources. 	<p>E</p> <p>Development is provided with an appropriate level of service and infrastructure in accordance with Planning scheme policy - Integrated design (Appendix A).</p>
<p>PO19</p> <p>The development is connected to an existing reticulated electricity supply system approved by the relevant energy regulating authority.</p>	<p>E19</p> <p>Development is connected to underground electricity.</p>
<p>PO20</p> <p>The development has access to telecommunications and broadband services in accordance with current standards.</p>	<p>No example provided.</p>
<p>PO21</p> <p>Where available the development is to safely connect to reticulated gas.</p>	<p>No example provided.</p>
<p>PO22</p> <p>The development provides for the treatment and disposal of sewage and other waste water in a way that will not cause environmental harm or pose a risk to public health.</p>	<p>E22.1</p> <p>Where in a sewerage area, the development is connected to a reticulated sewerage network.</p>

6 Zones

	<p>E22.2</p> <p>Where not in a sewerage area, the development is serviced by an appropriate on-site sewerage facility.</p> <p>Note – A site and soil evaluation report is generally required to demonstrate compliance with this outcome. Reports are to be prepared in accordance with AS1547 On-site domestic wastewater management and the Queensland Plumbing and Wastewater Code.</p>
	<p>E22.3</p> <p>Trade waste is pre-treated on-site prior to discharging into the sewerage network.</p>
<p>PO23</p> <p>The development is provided with an adequate and sustainable supply of potable (drinking and general use e.g. gardening, washing, fire fighting) water.</p>	<p>E23.1</p> <p>Where in an existing connections area or a future connections area as detailed in the Unitywater Connections Policy, the development is connected to the reticulated water supply system in accordance with the South East Queensland Water Supply and Sewerage Design and Construction Code and the relevant Water Service Association of Australia (WSAA) codes and standards.</p>
	<p>E23.2</p> <p>Where not in an existing connections area or a future connections area as detailed in the Unitywater Connections Policy, the development is provided with an adequate water supply of 45,000 litres by way of on-site storage which provides equivalent water quality and reliability to support the use requirements of the development.</p>
<p>PO24</p> <p>The development is provided with constructed and dedicated road access.</p>	<p>No example provided.</p>

Access	
<p>PO25</p> <p>Where required, access easements contain a driveway and provision for services appropriate to the use. The easement covers all works associated with the access in accordance with Planning scheme policy - Integrated design.</p>	<p>No example provided.</p>
<p>PO26</p> <p>The layout of the development does not compromise:</p> <p>a. the development of the road network in the area;</p>	<p>E26.1</p> <p>The development provides for the extension of the road network in the area in accordance with Council's road network planning.</p>

<p>b. the function or safety of the road network;</p> <p>c. the capacity of the road network.</p> <p>Note - The road hierarchy is mapped on Overlay map - Road hierarchy.</p>	<p>E26.2</p> <p>The development does not compromise future road widening of frontage roads in accordance with the relevant standard and Council's road planning.</p> <hr/> <p>E26.3</p> <p>The lot development layout allows forward vehicular access to and from the site.</p>
<p>PO27</p> <p>Safe access is provided for all vehicles required to access the site.</p>	<p>E27.1</p> <p>Site access and driveways are designed and, located and constructed in accordance with:</p> <p>a. where for a Council-controlled road and associated with a Dwelling house:</p> <p>i. Planning scheme policy - Integrated design;</p> <p>b. Where for a Council-controlled road; and not associated with a Dwelling house:</p> <p>i. AS/NZS2890.1 section 3; or Parking facilities Part 1: Off street car parking;</p> <p>ii. AS 2890.2 - Parking facilities Part 2: Off-street commercial vehicle facilities;</p> <p>iii. Planning scheme policy - Integrated design;</p> <p>iv. Schedule 8 - Service vehicle requirements;</p> <p>c. Where for a State-Controlled road, the Safe Intersection Sight Distance requirements in AustR roads and the appropriate IPWEAQ standard drawings, or a copy of a Transport Infrastructure Act 1994, section 62 approval.</p> <hr/> <p>E27.2</p> <p>Internal driveways, car parks and access ways are designed and constructed with a sealed pavement and in accordance with:</p> <p>a. AS/NZS 2890.1 Parking Facilities Part 1:– Off street car parking;</p> <p>b. AS 2890.2 Parking Facilities Part 2: Off street commercial vehicle facilities; and-</p> <p>c. the relevant standards in Planning scheme policy - Integrated design; and</p> <p>d. Schedule 8 - Service vehicle requirements.</p>

6 Zones

	<p>Note - This includes queue lengths (refer to Schedule 8 - Service vehicle requirements), pavement widths and construction.</p>
<p>PO</p> <p>Sealed and flood free road access during the minor storm event is available to the site from the nearest arterial or sub-arterial road.</p> <p>Editor's Note - Where associated with a State-controlled road, further requirements may apply, and approvals may be required from the Department of Transport and Main Roads.</p>	<p>E27.3</p> <p>Access driveways, manoeuvring areas and loading facilities are sealed and provide for service vehicles listed in Schedule 8 - Service vehicle requirements for the relevant use. The on-site manoeuvring is to be in accordance with Schedule 8 - Service vehicle requirements.</p> <p>E</p> <p>Landscaping (including shade trees) is provided within car parks in accordance with Planning scheme policy - Integrated design.</p> <p>E</p> <p>Roads or streets giving access to the development from the nearest arterial or sub-arterial road are flood free during the minor storm event and are sealed.</p> <p>Note - The road network is mapped on Overlay Map - Road Hierarchy.</p>

<p>Street design and layout</p>	
<p>PO</p> <p>Streets are designed and constructed in accordance with Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures. The street design and construction accommodates the following functions:</p> <ul style="list-style-type: none"> a. access to premises by providing convenient vehicular movement for residents between their homes and the major road network; b. safe and convenient pedestrian and cycle movement; c. adequate on street parking; d. stormwater drainage paths and treatment facilities; e. efficient public transport routes; f. utility services location; g. emergency access and waste collection; h. setting and approach (streetscape, landscaping and street furniture) for adjoining residences; 	<p>E</p> <p>No example provided</p>

<p>i. expected traffic speeds and volumes; and</p> <p>j. wildlife movement.</p> <p>Note - Preliminary road design (including all services, street lighting, stormwater infrastructure, access locations, street trees and pedestrian network) may be required to demonstrate compliance with this PO.</p> <p>Note - Refer to Planning scheme policy - Environmental areas and corridors for examples of when and where wildlife movement infrastructure is required.</p>	
<p>PO28</p> <p>Upgrade works (whether trunk or non-trunk) are provided where necessary to:-</p> <p>a. ensure the type or volume of traffic generated by the development does not have a negative impact on the external road network;-</p> <p>b. ensure the orderly and efficient continuation of the active transport network;-</p> <p>c. ensure the site frontage is constructed to a suitable urban standard generally in accordance with Planning scheme policy - Integrated design.</p> <p>Note - An Integrated Transport Assessment (ITA) may be required to demonstrate compliance with this performance outcome refer to Planning scheme policy - Integrated transport assessment for guidance on when an ITA is required. An ITA should be prepared in accordance with Planning scheme policy - Integrated transport assessment.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy:</p> <p>Note - The primary and secondary active transport network is mapped on Overlay map - Active transport</p> <p>Note - To demonstrate compliance with c. of this performance outcome, site frontage works where in existing road reserve (non-trunk) are to be designed and constructed as follows:</p> <p>i. Where the street is partially established to an urban standard; match the alignment of existing kerb and channel and provide carriageway widening and underground drainage where required; or</p> <p>ii. Where the street is not established to an urban standard; prepare a design that demonstrates how the relevant features of the particular road as shown in the Planning scheme policy - Integrated Design can be achieved in the existing reserve.</p> <p>Note - Refer to Planning scheme policy - Integrated design for road network and active transport network design standards:</p> <p>The existing road network (whether trunk or non-trunk) is upgraded where necessary to cater for the impact from the development.</p>	<p>E</p> <p>No example provided:</p> <p>New intersections onto existing roads are designed to accommodate traffic volumes and traffic movements taken from a date 10 years from the date of completion of the last stage of the development. Detailed design is to be in accordance with Planning scheme policy - Integrated design.</p> <p>Note - All turns vehicular access to existing lots is to be retained at new road intersections wherever practicable.</p> <p>Note - Existing on-street parking is to be retained at new road intersections and along road frontages wherever practicable.</p> <p>E</p> <p>Existing intersections external to the site are upgraded as necessary to accommodate increased traffic from the development. Design is in accordance with Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p> <p>Note - All turns vehicular access to existing lots is to be retained at new road intersections wherever practicable.</p> <p>Note - Existing on-street parking is to be retained at upgraded road intersections and along road frontages wherever practicable.</p> <p>E</p> <p>The active transport network is extended in accordance with Planning scheme policy - Integrated design.</p>

6 Zones

<p>Note - An applicant will be required to submit an Integrated Transport Assessment (ITA), prepared in accordance with Planning scheme policy - Integrated transport assessment to demonstrate compliance with this PO, when any of the following occurs;</p> <ul style="list-style-type: none"> • development is within 200m of a transport sensitive location such as a school, shopping centre, bus or train station or a large generator of pedestrian or vehicular traffic; • forecast traffic to/from the development exceeds 5% of the two way flow on the adjoining road or intersection in the morning or afternoon transport peak within 10 years of the development completion; • Development access onto a sub arterial, or arterial road or within 100m of a signalised intersection; • Residential development greater than 50 lots or dwellings; • Offices greater than 4,000m² Gross Floor Area (GFA); • Retail activities including Hardware and trade supplies; • Showroom, Shop or Shopping centre greater than 1,000m² GFA; • Warehouses and Industry greater than 6000m² GFA; • On-site carpark greater than 100 spaces; • Development has a trip generation rate of 100 vehicles or more within the peak hour; • Development which dissects or significantly impacts on an environmental area or an environmental corridor. <p>The ITA is to review the development's impact upon the external road network for the period of 10 years from completion of the development. The ITA is to provide sufficient information for determining the impact and the type and extent of any ameliorative works required to cater for the additional traffic. The ITA must include a future structural road layout of adjoining properties that will form part of this catchment and road connecting to these properties. The ITA is to assess the ultimate developed catchment's impacts and necessary ameliorative works, and the works or contribution required by the applicant as identified in the study.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - The primary and secondary active transport network is mapped on Overlay map - Active transport.</p>	
<p>PO</p> <p>Intersections along all streets and roads are located and designed to provide safe and convenient movements for all users.</p>	<p>E</p> <p>Intersections are designed and constructed in accordance with Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures.</p> <p>E</p>

	<p>Intersection spacing (centreline – centreline) along a through road conforms with the following:</p> <ul style="list-style-type: none"> a. Where the through road provides an access or collector function: <ul style="list-style-type: none"> i. intersecting road located on same side = 100 metres; ii. intersecting road located on opposite side = 50 metres. b. Where the through road provides a sub-arterial function: <ul style="list-style-type: none"> i. intersecting road located on same side = 300 metres; ii. intersecting road located on opposite side = 150 metres. c. When the through road provides an arterial function: <ul style="list-style-type: none"> i. intersecting road located on the same side = 500 metres; ii. intersecting road located on opposite side = 250 metres. d. Walkable block perimeter does not exceed 1500 metres. <p>Note - Based on the absolute minimum intersection spacing identified above, all turns access may not be permitted (i.e. left in/left out only) at intersections with sub-arterial roads or arterial roads.</p> <p>Note - The road network is mapped on Overlay map - Road hierarchy.</p> <p>Note - An Integrated Transport Assessment (ITA) including preliminary intersection designs, prepared in accordance with Planning scheme policy - Integrated transport assessment may be required to demonstrate compliance with this PO. Intersection spacing will be determined based on the deceleration and queue storage distances required for the intersection after considering vehicle speed and present/forecast turning and through volumes.</p>		
<p>PO</p> <p>All Council controlled frontage roads are designed and constructed in accordance with Planning scheme policy - Integrated design and Planning scheme policy - Operational works inspection, maintenance and bonding procedures. All new works are extended to join any existing works within 20m.</p>	<p>E</p> <p>Design and construct all Council controlled frontage roads in accordance with Planning scheme policy - Integrated design, Planning scheme policy - Operational works inspection, maintenance and bonding procedures and the following:</p> <table border="1" data-bbox="810 2024 1465 2083"> <tr> <td>Situation</td> <td>Minimum construction</td> </tr> </table>	Situation	Minimum construction

<h2>Stormwater</h2>	
<p>PO</p> <p>Minor stormwater drainage systems (internal and external) have the capacity to convey stormwater flows from frequent storm events for the fully developed upstream catchment whilst ensuring pedestrian and vehicular traffic movements are safe and convenient.</p>	<p>E</p> <p>The capacity of all minor drainage systems are designed in accordance with Planning scheme policy - Integrated design.</p> <p>E</p> <p>Stormwater pipe network capacity is to be calculated in accordance with the Hydraulic Grade Line method as detailed in Australian Rainfall and Runoff or QUDM.</p> <p>E</p>

	Development ensures that roof and allotment drainage infrastructure is provided in accordance with the relevant level as identified in QUDM.
<p>PO</p> <p>Major stormwater drainage system(s) have the capacity to safely convey stormwater flows for the 1% AEP event for the fully developed upstream catchment.</p>	<p>E</p> <p>The internal drainage system safely and adequately conveys the stormwater flows for the 1% AEP event for the fully developed upstream catchment through the site.</p>
	<p>E</p> <p>The external (downstream) drainage system safely conveys the stormwater flows for the 1% AEP event for the fully developed upstream catchment without allowing the flows to encroach upon private lots.</p>
	<p>E</p> <p>Overland flow paths (for any storm event) from newly constructed roads and public open space areas do not pass through the development footprint.</p>
	<p>E</p> <p>The flow velocity in all unlined or soft faced open drains is kept within acceptable limits for the type of material or lining and condition of the channel.</p> <p>Note - Refer to QUDM for recommended average flow velocities.</p>
<p>PO</p> <p>Provide measures to properly manage surface flows for the 1% AEP event (for the fully developed catchment) draining to and through the land to ensure no actionable nuisance is created to any person or premises as a result of the development. The development must not result in ponding on adjacent land, redirection of surface flows to other premises or blockage of a surface flow relief path for flows exceeding the design flows for any underground system within the development.</p>	<p>E</p> <p>The stormwater drainage system is designed and constructed in accordance with Planning scheme policy - Integrated design.</p>
<p>PO29</p> <p>Stormwater run-off from the site is conveyed to a point of lawful discharge without causing actionable nuisance or annoyance to any person, property or premises.</p> <p>Note - Refer to Planning scheme policy - Integrated design for details.</p> <p>Note - A downstream drainage discharge report in accordance with Planning scheme policy - Stormwater management may be required to demonstrate achievement of this performance outcome.</p>	No example provided.

6 Zones

<p>Note - A watercourse as defined in the Water Act may be accepted as a lawful point of discharge providing the drainage discharge from the site does not increase the downstream flood levels during events up to and including the 1% AEP storm. An afflux of +20mm may be accepted on Council controlled land and road infrastructure. No worsening is ensured when stormwater is discharged into a catchment that includes State Transport Infrastructure.</p>	
<p>PO30</p> <p>Stormwater generated from the development does not compromise the capacity of existing stormwater infrastructure downstream of the site.</p> <p>Note - A downstream drainage discharge report in accordance with Planning scheme policy - Stormwater management may be required to demonstrate achievement of this performance outcome.</p>	<p>No example provided.</p>
<p>PO31</p> <p>Stormwater quality management systems are designed and constructed to minimise the environmental impact of stormwater discharge on surface and underground receiving water quality and meet the design objectives in Tables A and B in Appendix 2 of the SPP.</p> <p>Note - A stormwater management plan prepared by a suitably qualified professional will be required in accordance with Planning scheme policy - Stormwater management.</p> <p>Where development:</p> <ul style="list-style-type: none"> a. is for an urban purpose that involves a land area 2500m² or greater in size; and b. results in 6 or more dwellings; or c. results in an impervious area greater than 25% of the net developable area, <p>stormwater quality management systems are designed, constructed, established and maintained to minimise the environmental impact of stormwater on surface, groundwater and receiving water environments and meet the design objectives outlined in Schedule 10 - Stormwater management design objectives.</p> <p>Note - A site based stormwater management plan prepared by a suitably qualified professional will be required in accordance with Planning Scheme Policy - Stormwater Management. Stormwater quality infrastructure is to be design in accordance with Planning scheme policy - Integrated Design (Appendix C).</p>	<p>No example provided.</p>
<p>PO</p> <p>Easements for drainage purposes are provided over:</p>	<p>E</p> <p>No example provided.</p>

<p>a. stormwater pipes located in freehold land if the pipe diameter exceeds 300mm;</p> <p>b. overland flow paths where they cross more than one property boundary:</p> <p>Note -- Refer to Planning scheme policy -- Integrated design for details:</p> <p>Note -- Stormwater Drainage easement dimensions are provided in accordance with Section 3.8.5 of QUDM:</p> <p>Stormwater drainage pipes and structures through or within private land (including inter-allotment drainage) are protected by easements in favour of Council with sufficient area for practical access for maintenance purposes.</p> <p>Note - In order to achieve a lawful point of discharge, stormwater easements may also be required over temporary drainage channels/infrastructure where stormwater discharges to a balance lot prior to entering Council's stormwater drainage system.</p>	<p>Stormwater drainage infrastructure (excluding detention and bio-retention systems) through or within private land (including inter-allotment drainage) is protected by easements in favour of Council. 6 Zones

	<p>Note - Refer to the Water Quality Vision and Objectives contained in the Seqwater Development Guidelines: Development Guidelines for Water Quality Management in Drinking Water Catchments 2017 where contained within water resource area and water supply buffer area.</p>
<p>PO42</p> <p>Filling or excavation does not result in land instability.</p> <p>Note - Steep rock slopes and batters are inspected and certified for long-term stability by a suitably qualified and experienced geotechnical engineer with RPEQ qualifications. Stabilisation measures are provided, as necessary, to ensure long-term stability and low maintenance.</p>	<p>No example provided.</p>
<p>PO43</p> <p>Development Filling or excavation does not result in:</p> <ol style="list-style-type: none"> adverse impacts on the hydrological and hydraulic capacity of the waterway or floodway; increased flood inundation outside the site; any reduction in the flood storage capacity in the floodway; and any clearing of native vegetation. <p>Note - To demonstrate compliance with this outcome, Planning Scheme Policy - Stormwater Management provides guidance on the preparation of a site based stormwater management plan by a suitably qualified professional. Refer to Planning scheme policy - Integrated design for guidance on infrastructure design and modelling requirements.</p>	<p>No example provided.</p>
<p>PO</p> <p>Filling or excavation on the development site is undertaken in a manner which does not create or accentuate problems associated with stormwater flows and drainage systems on land adjoining the site.</p>	<p>E</p> <p>Filling and excavation undertaken on the development site are shaped in a manner which does not:</p> <ol style="list-style-type: none"> prevent stormwater surface flow which, prior to commencement of the earthworks, passed onto the development site, from entering the land; or redirect stormwater surface flow away from existing flow paths; or divert stormwater surface flow onto adjacent land, (other than a road), in a manner which: <ol style="list-style-type: none"> concentrates the flow; or increases the flow rates of stormwater over the affected section of the adjacent land above the situation which existed prior to the diversion; or causes actionable nuisance to any person, property or premises.

Retaining walls and structures

PO44

All earth retaining structures provide a positive interface with the streetscape and minimise impacts on the amenity of adjoining residents.

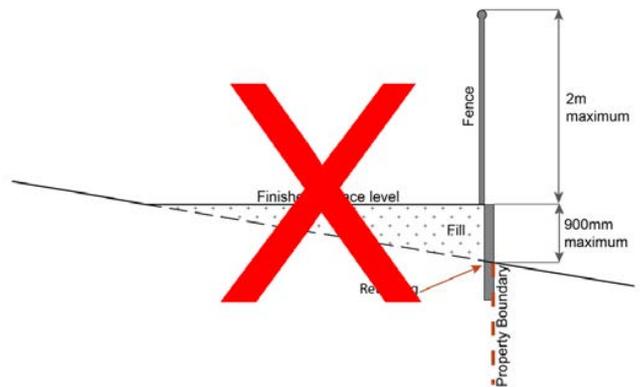

Note - Refer to Planning scheme policy - Residential design for guidance on how to achieve compliance with this performance outcome.

E44

Earth retaining structures:-

- a. are not constructed of boulder rocks or timber;
- b. where height is no greater than 900mm, are provided in accordance with Figure - Retaining on a boundary;

Figure - Retaining on boundary

- c. where height is greater than 900mm but no greater than 1.5m, are to be setback at least the equivalent height of the retaining structure from any property boundary;
- d. where height is greater than 1.5m, are to be setback and stepped 1.5m vertical: 1.5m horizontal, terraced, landscaped and drained as shown below.

Figure - Cut

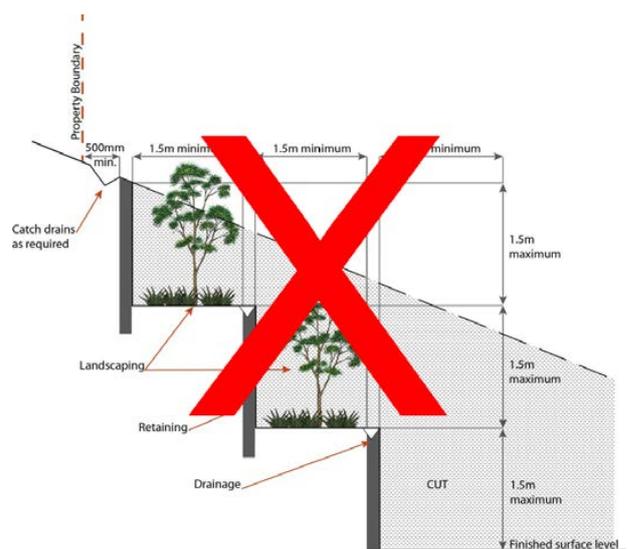

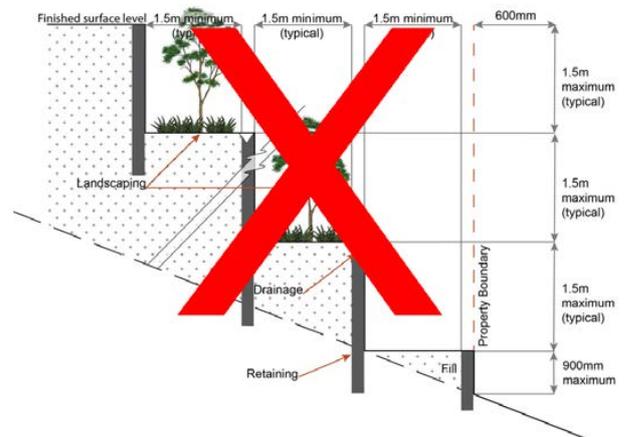

Figure - Fill

6 Zones

Filling or excavation does not:

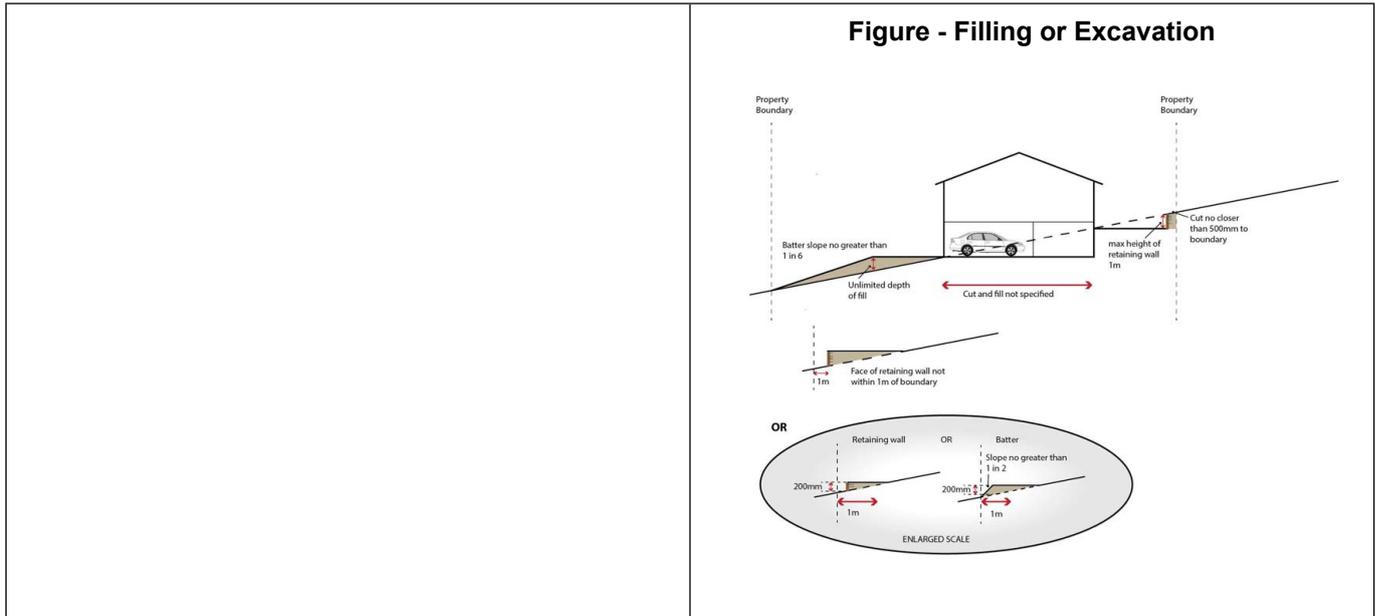

- a. involve a change in level of more than 1.0m relative to natural ground level;

OR

result in a batter greater than 1V to 6H;

- b. necessitate the construction of a freestanding retaining wall exceeding 1.0m in height relative to finished ground level;
- c. result in the top of any cut batter, or the exposed face of any freestanding retaining wall supporting that cut, being closer than 500mm to a property boundary;
- d. result in the toe of any fill batter, or exposed face of any freestanding retaining wall supporting that fill, being closer than 1.0m to a property boundary unless:
 - i. the depth of fill within the 1.0m strip does not exceed 200mm relative to natural ground level; or
 - ii. the batter slope within that 1.0m strip is no steeper than 1V to 2H.

THE NEW FIGURE BELOW IS PROPOSED AS PART OF THIS AMENDMENT

PO

All earth retaining structures are to be certified as being designed and constructed in accordance with relevant Australian Standards and Building Code requirements.

E

Retaining walls are designed and certified by a RPEQ so that:

- a. the minimum design life (the period assumed in design for which a structure or structural element is required to perform its intended purpose without replacement or major structural repairs) for the earth retaining structure is that specified in Australian Standard AS 4678 Earth-retaining structures;
- b. earth retaining structures within the land and around areas of cut on or near the boundaries of the site must be designed to allow for live and dead loads associated with the land/premise's current occupancy and use;
- c. where the adjoining land use rights or zoning allows for industrial uses a minimum live load of 25kPA must be allowed in the design of the retaining structure for these adjoining premises.

Note - Retaining walls will only be approved following submission of a full detailed design certified by a RPEQ.

Fire Services

Note - The provisions under this heading only apply if:

- a. the development is for, or incorporates:
 - i. reconfiguring a lot for a community title scheme creating 1 or more vacant lots; or
 - ii. material change of use for 2 or more sole occupancy units on the same lot, or within the same community titles scheme; or
 - iii. material change of use for a Tourist park⁽⁸⁴⁾ with accommodation in the form of caravans or tents; or
 - iv. material change of use for outdoor sales⁽⁵⁴⁾, outdoor processing or outdoor storage where involving combustible materials.

AND

6 Zones

- b. none of the following exceptions apply:
 - i. the distributor-retailer for the area has indicated, in its netserv plan, that the premises will not be served by that entity's reticulated water supply; or
 - ii. every part of the development site is within 60m walking distance of an existing fire hydrant on the distributor-retailer's reticulated water supply network, measured around all obstructions, either on or adjacent to the site.

Note - The provisions under this heading do not apply to buildings that are required by the Building Code of Australia to have a fire hydrant system complying with Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations or other fire fighting facilities which provide equivalent protection.

PO45

Development incorporates a fire fighting system that:

- a. satisfies the reasonable needs of the fire fighting entity for the area;
- b. is appropriate for the size, shape and topography of the development and its surrounds;
- c. is compatible with the operational equipment available to the fire fighting entity for the area;
- d. considers the fire hazard inherent in the materials comprising the development and their proximity to one another;
- e. considers the fire hazard inherent in the surrounds to the development site;
- f. is maintained in effective operating order.

Note - The Queensland Fire and Emergency Services is the entity currently providing the fire fighting function for the urban areas of the Moreton Bay Region.

E45.1

External fire hydrant facilities are provided on site to the standard prescribed under the relevant parts of *Australian Standard AS 2419.1 (2005) – Fire Hydrant Installations*.

Note - For this requirement for accepted development, the following are the relevant parts of AS 2419.1 (2005) that may be applicable:

- a. in regard to the form of any fire hydrant - Part 8.5 and Part 3.2.2.1, with the exception that for Tourist parks⁽⁸⁴⁾ or development comprised solely of dwellings and their associated outbuildings, single outlet above-ground hydrants or suitably signposted in-ground hydrants would be an acceptable alternative;
- b. in regard to the general locational requirements for fire hydrants - Part 3.2.2.2 (a), (e), (f), (g) and (h) as well as Appendix B of AS 2419.1 (2005);
- c. in regard to the proximity of hydrants to buildings and other facilities - Part 3.2.2.2 (b), (c) and (d), with the exception that:
 - i. for dwellings and their associated outbuildings, hydrant coverage need only extend to the roof and external walls of those buildings;
 - ii. for caravans and tents, hydrant coverage need only extend to the roof of those tents and caravans;
 - iii. for outdoor sales⁽⁵⁴⁾, processing or storage facilities, hydrant coverage is required across the entire area of the outdoor sales⁽⁵⁴⁾, outdoor processing and outdoor storage facilities;
- d. in regard to fire hydrant accessibility and clearance requirements - Part 3.5 and, where applicable, Part 3.6.

E45.2

A continuous path of travel having the following characteristics is provided between the vehicle access point to the site and each external fire hydrant and hydrant booster point on the land:

- a. an unobstructed width of no less than 3.5m;
- b. an unobstructed height of no less than 4.8m;
- c. constructed to be readily traversed by a 17 tonne HRV fire brigade pumping appliance;
- d. an area for a fire brigade pumping appliance to stand within 20m of each fire hydrant and 8m of each hydrant booster point.

E45.3

	<p>On-site fire hydrant facilities are maintained in effective operating order in a manner prescribed in <i>Australian Standard AS1851 (2012) – Routine service of fire protection systems and equipment</i>.</p>
<p>PO46</p> <p>On-site fire hydrants that are external to buildings, as well as the available fire fighting appliance access routes to those hydrants, can be readily identified at all times from, or at, the vehicular entry point to the development site.</p>	<p>E46</p> <p>For development that contains on-site fire hydrants external to buildings:</p> <ol style="list-style-type: none"> a. those external hydrants can be seen from the vehicular entry point to the site; or b. a sign identifying the following is provided at the vehicular entry point to the site: <ol style="list-style-type: none"> i. the overall layout of the development (to scale); ii. internal road names (where used); iii. all communal facilities (where provided); iv. the reception area and on-site manager’s office (where provided); v. external hydrants and hydrant booster points; vi. physical constraints within the internal roadway system which would restrict access by fire fighting appliances to external hydrants and hydrant booster points. <p>Note - The sign prescribed above, and the graphics used are to be:</p> <ol style="list-style-type: none"> a. in a form; b. of a size; c. illuminated to a level; <p>which allows the information on the sign to be readily understood, at all times, by a person in a fire fighting appliance up to 4.5m from the sign.</p>
<p>PO47</p> <p>Each on-site fire hydrant that is external to a building is signposted in a way that enables it to be readily identified at all times by the occupants of any firefighting appliance traversing the development site.</p>	<p>E47</p> <p>For development that contains on-site fire hydrants external to buildings, those hydrants are identified by way of marker posts and raised reflective pavement markers in the manner prescribed in the technical note <i>Fire hydrant indication system</i> produced by the Queensland Department of Transport and Main Roads.</p> <p>Note - Technical note Fire hydrant indication system is available on the website of the Queensland Department of Transport and Main Roads.</p>

6 Zones

Use specific criteria											
Dwelling house⁽²²⁾ - Secondary dwelling											
<p>PO48</p> <p>Secondary dwellings:</p> <p>a. are subordinate and ancillary to the primary dwelling in size and function;</p> <p>b. are not larger than 100m² GFA;</p> <p>c. have the appearance, bulk and scale of a single dwelling from the street;</p> <p>d. maintain sufficient area for the siting of all buildings, structures, landscaping and car parking spaces for the dwelling house⁽²²⁾ on-site.</p>	<p style="color: red;">No example provided:</p> <p>E48.1</p> <p>The siting and design of dwellings ensures that the secondary dwelling is:</p> <p>a. not located in front of the primary dwelling;</p> <p>b. annexed to (adjoining, below or above) or located within 50m of the primary dwelling (excluding domestic outbuildings);</p> <p>c. accessed from the existing driveway giving access to the dwelling house⁽²²⁾.</p> <p>Note - The requirements to locate a Secondary dwelling within 50m of the primary dwelling is measured from the outermost projection of the primary dwelling (being the main house, excluding the domestic outbuildings) to the outermost projection of the Secondary dwelling. The entire Secondary dwelling does not need to be contained within the specified distance.</p>										
	<p>E48.2</p> <p>No more than 1 secondary dwelling is located on an allotment.</p>										
	<p>E48.3</p> <p>The GFA of the secondary dwelling does not exceed 100m².</p>										
Dwelling house⁽²²⁾ - Domestic outbuildings											
<p>PO49</p> <p>Domestic outbuildings and car ports are:</p> <p>a. of a height that does not negatively impact the visual amenity of adjoining properties;</p> <p>b. located on-site to not dominate the streetscape.</p>	<p style="color: red;">No example provided:</p> <p>E49</p> <p>Domestic outbuildings:</p> <p>a. have a total combined maximum roofed area as outlined in the table below:</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: center;">Size of lot</th> <th style="text-align: center;">Max. Roofed Area</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">Less than 600m²</td> <td style="text-align: center;">50m²</td> </tr> <tr> <td style="text-align: center;">600m² - 1000m²</td> <td style="text-align: center;">70m²</td> </tr> <tr> <td style="text-align: center;">>1000m² - 2000m²</td> <td style="text-align: center;">80m²</td> </tr> <tr> <td style="text-align: center;">Greater than 2000m²</td> <td style="text-align: center;">150m²</td> </tr> </tbody> </table> <p>b. have a maximum building height of 4m and a mean height not exceeding 3.5m;</p>	Size of lot	Max. Roofed Area	Less than 600m ²	50m ²	600m ² - 1000m ²	70m ²	>1000m ² - 2000m ²	80m ²	Greater than 2000m ²	150m ²
	Size of lot	Max. Roofed Area									
Less than 600m ²	50m ²										
600m ² - 1000m ²	70m ²										
>1000m ² - 2000m ²	80m ²										
Greater than 2000m ²	150m ²										

	<p>c. are located behind the main building line and not within primary or secondary frontage or trafficable water body setbacks.</p> <p>Note - For c. above to determine the main building line a trafficable water body boundary is to be treated the same as a secondary frontage.</p>
Home based business⁽³⁵⁾	
<p>PO50</p> <p>The Home based business(s)⁽³⁵⁾:</p> <p>a. is subordinate in size and function to the primary use on the site being a permanent residence;</p> <p>b. are of a scale and intensity that does not result in adverse visual or nuisance impacts on the residents in adjoining or nearby dwellings;</p> <p>c. store no more heavy vehicles, trailer and motor vehicles on-site than follows:</p> <p>i. 1 heavy vehicle;</p> <p>i. 1 trailer;</p> <p>ii. Up to 3 motor vehicles.</p> <p>d. results in a vehicular and pedestrian traffic generation consistent with that reasonably expected in the surrounding low density, low built form and open area character and amenity anticipated in the Interim precinct;</p> <p>e. are suitably screened to ensure adverse visual impacts on the residents in adjoining or nearby dwellings are minimised;</p> <p>f. sufficiently separated from adjoining properties so development does not result in adverse visual, noise, or nuisance impacts on adjoining residents.</p>	<p>E50.1</p> <p>The maximum total use area is 100m².</p> <p>E50.1</p> <p>The home based business(s)⁽³⁵⁾, including any storage, are fully enclosed within a dwelling or on-site structure.</p> <p>E50.2</p> <p>Up to 2 additional non-resident, either employees or customers, are permitted on the site at any one time, except where involving the use of heavy vehicles, where no employees are permitted.</p> <p>Note - This provision does not apply to Bed and Breakfast or farmstay business.</p> <p>E50.3</p> <p>The maximum number of heavy vehicles, trailer and motor vehicles stored on-site is as follows:</p> <p>a. 1 heavy vehicle;</p> <p>b. 1 trailer;</p> <p>c. Up to 3 motor vehicles.</p> <p>Note - The car parking provision associated with the dwelling house⁽²²⁾ is in addition to this requirement.</p> <p>Note - The number of motor vehicles stated is in addition to motor vehicles associated with a dwelling house⁽²²⁾.</p> <p>E50.4</p> <p>Vehicle parking areas, vehicle standing areas and outdoor storage areas of plant and equipment are screened from adjoining sites by either planting, wall(s), fence(s) or a combination at least 1.8m in height along the length of those areas.</p> <p>Note - Planting for screening is to have a minimum depth of 3m.</p>

6 Zones

	<p>E50.5</p> <p>Heavy vehicle storage buildings, parking areas and standing areas are setback a minimum of 30m from all property boundaries.</p>
<p>PO51</p> <p>The hours of operation for home based business(s)⁽³⁵⁾ are managed so that the activity does not adversely impact on the low intensity character and amenity anticipated in the Interim precinct.</p>	<p>E51</p> <p>Hours of operation to be restricted to 8:00am to 6:00pm Monday to Saturday and are not open to the public on Sunday's, Christmas Day, Good Friday or Anzac Day, except for:</p> <ol style="list-style-type: none"> bed and breakfast or farm stay business which may operate on a 24 hour basis; office or administrative activities that do not generate non-residents visiting the site such as book keeping and computer work; starting and warming up of heavy vehicles, which can commence at 7.00am.
<p>PO52</p> <p>The Home based business(s)⁽³⁵⁾ does not result in:</p> <ol style="list-style-type: none"> an adverse visual, odour, particle drift or noise nuisance impact on the residents in adjoining or nearby dwellings; an adverse impact upon the low intensity and open area character and amenity anticipated in the locality; the establishment of vehicle servicing or major repairs, spray painting, panel beating or any environmentally relevant activity (ERA). 	<p>E52.1</p> <p>The use does not involve heavy vehicle servicing or major repairs, including spray painting or panel.</p> <p>E52.2</p> <p>Home based business(s)⁽³⁵⁾ do not comprise an environmentally relevant activity (ERA) as defined in the <i>Environmental Protection Regulation 2008</i>.</p> <p>E52.3</p> <p>Activities associated with the use do not cause a nuisance by way of aerosols, fumes, light, noise, odour, particles or smoke.</p> <p>Note - Nuisance is defined in the Environmental Protection Act 1994.</p>
<p>PO53</p> <p>On-site display and sales of goods is limited to the activities being undertaken from the site and does not result in:</p> <ol style="list-style-type: none"> the display and sale of goods being viewed from outside of the site; overall development on the site having a predominantly commercial appearance. 	<p>E53.1</p> <p>Only goods grown, produced or manufactured on-site are sold from the site.</p> <p>E53.2</p> <p>Display of goods grown, produced or manufactured on-site are contained within a dwelling or on-site structure and the display of goods is not visible from the boundary of the site.</p>
<p>PO54</p>	<p>E54</p>

<p>Bed and breakfast and farmstays are of a size and scale that:</p> <ol style="list-style-type: none"> are consistent with the low intensity, open area character and amenity of the rural residential area; ensures acceptable levels of privacy and amenity for the residents in adjoining or nearby dwellings. 	<p>For bed and breakfast and farmstays-</p> <ol style="list-style-type: none"> short-term accommodation⁽⁷⁷⁾ is provided in the dwelling house⁽²²⁾ of the accommodation operator; maximum 4 bedrooms are provided for a maximum of 10 guests; meals are served to paying guests only; rooms do not contain food preparation facilities.
Major electricity infrastructure⁽⁴³⁾, Substation⁽⁸⁰⁾ and Utility installation⁽⁸⁶⁾	
<p>PO55</p> <p>The development does not have an adverse impact on the visual amenity of a locality and is:</p> <ol style="list-style-type: none"> high quality design and construction; visually integrated with the surrounding area; not visually dominant or intrusive; located behind the main building line; below the level of the predominant tree canopy or the level of the surrounding buildings and structures; camouflaged through the use of colours and materials which blend into the landscape; treated to eliminate glare and reflectivity; landscaped; otherwise consistent with the amenity and character of the zone and surrounding area. 	<p>E55.1</p> <p>Development is designed to minimise surrounding land use conflicts by ensuring infrastructure, buildings, structures and other equipment:</p> <ol style="list-style-type: none"> are enclosed within buildings or structures; are located behind the main building line; have a similar height, bulk and scale to the surrounding fabric; have horizontal and vertical articulation applied to all exterior walls. <p>E55.2</p> <p>A minimum 3m wide strip of dense planting is provided around the outside of the fenced area, between the development and street frontage, side and rear boundaries.</p>
<p>PO56</p> <p>Infrastructure does not have an impact on pedestrian health and safety.</p>	<p>E56</p> <p>Access control arrangements:</p> <ol style="list-style-type: none"> do not create dead-ends or dark alleyways adjacent to the infrastructure; minimise the number and width of crossovers and entry points; provide safe vehicular access to the site; do not utilise barbed wire or razor wire.
<p>PO57</p> <p>All activities associated with the development occur within an environment incorporating sufficient controls to ensure the facility:</p> <ol style="list-style-type: none"> generates no audible sound at the site boundaries where in a residential setting; or meet the objectives as set out in the Environmental Protection (Noise) Policy 2008. 	<p>E57</p> <p>All equipment which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure noise emissions meet the objectives as set out in the Environmental Protection (Noise) Policy 2008.</p>
Roadside stall⁽⁶⁸⁾	
<p>PO58</p>	<p>E58.1</p>

6 Zones

<p>A roadside stall⁽⁶⁸⁾:</p> <ul style="list-style-type: none"> a. comprises only one roadside stall⁽⁶⁸⁾ per property; b. only offers goods grown, produced or manufactured on the site; c. is of a size and in a location that will not result in nuisance, or have a significant adverse impact on the amenity, for residents on adjoining and surrounding properties; d. is designed and located to ensure safe and accessible access, egress and on-site parking and not negatively impact the road network. 	<p>For a roadside stall⁽⁶⁸⁾:</p> <ul style="list-style-type: none"> a. no more than one roadside stall⁽⁶⁸⁾ per property; b. goods offered for sale are only goods grown, produced or manufactured on the site; c. the maximum area associated with a roadside stall⁽⁶⁸⁾, including any larger separate items displayed for sale, does not exceed 20m². <p>E58.2</p> <p>Roadside stall⁽⁶⁸⁾:</p> <ul style="list-style-type: none"> a. provide car parking for 2 vehicles off the road carriage and located on the property; b. is located no closer than 100m from an intersection. <p>Note - Refer to Overlay map - Road hierarchy for road classification.</p>
<p>Rural industry⁽⁷⁰⁾</p>	
<p>PO59</p> <p>Rural industry⁽⁷⁰⁾:</p> <ul style="list-style-type: none"> a. adopt construction materials and use of colour for buildings and structures are visually compatible with the rural residential character and amenity; b. is of a size, scale and design that is not visually dominant, overbearing and inconsistent with the low intensity built form and open area character and amenity of the rural residential environment. 	<p>No example provided.</p>
<p>Sales office⁽⁷²⁾</p>	
<p>PO60</p> <p>Sales office⁽⁷²⁾ remain temporary in duration and retain a physical connection to land or building being displayed or sold.</p>	<p>E60</p> <p>Development is carried out for no longer than 2 years.</p>
<p>Telecommunications facility⁽⁸¹⁾</p> <p>Editor's note - In accordance with the Federal legislation Telecommunications facilities⁽⁸¹⁾ must be constructed and operated in a manner that will not cause human exposure to electromagnetic radiation beyond the limits outlined in the Radiocommunications (Electromagnetic Radiation - Human Exposure) Standard 2003 and Radio Protection Standard for Maximum Exposure Levels to Radiofrequency Fields - 3Khz to 300Ghz.</p>	
<p>PO61</p>	<p>E61.1</p>

<p>Telecommunications facilities⁽⁸¹⁾ are co-located with existing telecommunications facilities⁽⁸¹⁾, Utility installation⁽⁸⁶⁾, Major electricity infrastructure⁽⁴³⁾ or Substation⁽⁸⁰⁾ if there is already a facility in the same coverage area.</p>	<p>New telecommunication facilities⁽⁸¹⁾ are co-located on existing towers with new equipment shelter and associated structures positioned adjacent to the existing shelters and structures.</p>
<p>PO62</p> <p>A new Telecommunications facility⁽⁸¹⁾ is designed and constructed to ensure co-masting or co-siting with other carriers both on the tower or pole and at ground level is possible in the future.</p>	<p>E61.2</p> <p>If not co-located with an existing facility, all co-location opportunities have been investigated and fully exhausted within a 2km radius of the site.</p>
<p>PO63</p> <p>Telecommunications facilities⁽⁸¹⁾ do not conflict with lawful existing land uses both on and adjoining the site.</p>	<p>E62</p> <p>A minimum area of 45m² is available at ground level to allow for additional equipment shelters and associated structures for the purpose of co-locating on the proposed facility.</p>
<p>PO64</p> <p>The Telecommunications facility⁽⁸¹⁾ does not have an adverse impact on the visual amenity of a locality and is:</p> <ol style="list-style-type: none"> high quality design and construction; visually integrated with the surrounding area; not visually dominant or intrusive; located behind the main building line; below the level of the predominant tree canopy or the level of the surrounding buildings and structures; camouflaged through the use of colours and materials which blend into the landscape; treated to eliminate glare and reflectivity; landscaped; otherwise consistent with the amenity and character of the zone and surrounding area. 	<p>E63</p> <p>The development results in no net reduction in the minimum quantity and standard of landscaping, private or communal open space or car parking spaces required under the planning scheme or under an existing development approval.</p> <p>E64.1</p> <p>Where in an urban area, the development does not protrude more than 5m above the level of the existing treeline, prominent ridgeline or building rooftops in the surrounding townscape.</p> <p>E64.2</p> <p>In all other areas towers do not exceed 35m in height.</p> <p>E64.3</p> <p>Towers, equipment shelters and associated structures are of a design, colour and material to:</p> <ol style="list-style-type: none"> reduce recognition in the landscape; reduce glare and reflectivity. <p>E64.4</p> <p>All structures and buildings are setback behind the main building line and a minimum of 10m from side and rear boundaries, except where in the Industry and Extractive industry zones, the minimum side and rear setback is 3m.</p> <p>Where there is no established building line the facility is located at the rear of the site.</p>

6 Zones

	<p>E64.5</p> <p>The facility is enclosed by security fencing or by other means to ensure public access is prohibited.</p>
	<p>E64.6</p> <p>A minimum 3m wide strip of dense planting is provided around the perimeter of the fenced area, between the facility and street frontage and adjoining uses.</p> <p>Note - Landscaping is provided in accordance with Planning scheme policy - Integrated design.</p> <p>Note - Council may require a detailed landscaping plan, prepared by a suitably qualified person, to ensure compliance with Planning scheme policy - Integrated design.</p>
<p>PO65</p> <p>Lawful access is maintained to the site at all times that does not alter the amenity of the landscape or surrounding uses.</p>	<p>E65</p> <p>An Access and Landscape Plan demonstrates how 24 hour vehicular access will be obtained and maintained to the facility in a manner that is appropriate to the site's context.</p>
<p>PO66</p> <p>All activities associated with the development occur within an environment incorporating sufficient controls to ensure the facility generates no audible sound at the site boundaries where in a residential setting.</p>	<p>E66</p> <p>All equipment comprising the Telecommunications facility⁽⁸¹⁾ which produces audible or non-audible sound is housed within a fully enclosed building incorporating sound control measures sufficient to ensure no noise from this equipment can be heard, or felt at the site boundary.</p>
<p>Wholesale nursery⁽⁸⁹⁾</p>	
<p>PO67</p> <p>Buildings and activities associated with a wholesale nursery⁽⁸⁹⁾:</p> <ol style="list-style-type: none"> a. ensures the propagation of plants, whether or not in the open, occur without loss of amenity to adjacent properties; b. do not result in any form of environmental degradation, including, but not limited to, soil degradation, pollution of natural water courses and introduction of exotic plant species into the natural on-site or adjoining flora; c. are landscaped, fenced and screened in a manner to reduce the visual appear of buildings, structures, storage and parking areas; d. have vehicle access from a road classified as a arterial or sub-arterial. 	<p>No example provided.</p>

Note - Refer to Overlay map - Road hierarchy for road classification.	
Veterinary services⁽⁸⁷⁾	
<p>PO68</p> <p>Buildings and activities associated with veterinary services⁽⁸⁷⁾:</p> <ol style="list-style-type: none"> are for veterinary care, surgery and treatment of animals only; are landscaped, fenced and screened in a manner to reduce the visual appear of buildings, structures, storage and parking areas; have vehicle access from a road classified as a arterial or sub-arterial. <p>Note - Refer to Overlay map - Road hierarchy for road classification.</p>	No example provided.
Winery⁽⁹⁰⁾	
<p>PO69</p> <p>Buildings and activities associated with winery⁽⁹⁰⁾:</p> <ol style="list-style-type: none"> are for a winery⁽⁹⁰⁾ and ancillary activities only. Uses not affiliated with winery⁽⁹⁰⁾ activities, or the sale of products produced or manufactured on-site, are avoided; are landscaped, fenced and screened in a manner to reduce the visual appear of buildings, structures, storage and parking areas; and have vehicle access from a road classified as a arterial or sub-arterial. <p>Note - Refer to Overlay map - Road hierarchy for road classification.</p>	No example provided.
Values and constraints criteria	
<p>Note - The relevant values and constraints criteria do not apply where the development is consistent with a current Development permit for Reconfiguring a lot or Material change of use or Operational work, where that approval has considered and addressed (e.g. through a development footprint plan (or similar in the case of Landslide hazard) or conditions of approval) the identified value or constraint under this planning scheme.</p>	
<p>Bushfire hazard (refer Overlay map - Bushfire hazard to determine if the following assessment criteria apply)</p> <p>Note - To demonstrate achievement of the performance outcomes, a bushfire management plan is prepared by a suitably qualified person. Guidance for the preparation of a bushfire management plan is provided in Planning scheme policy – Bushfire prone areas.</p>	

6 Zones

Note - Unacceptable risk is defined as a situation where people or property are exposed to a predictable hazard event that may result in serious injury, loss of life, failure of community infrastructure, or property damage.

<p>PO70</p> <p>Development:</p> <ul style="list-style-type: none"> a. minimises the number of buildings and people working and living on a site exposed to bushfire risk; b. ensures the protection of life during the passage of a fire front; c. is located and designed to increase the chance of survival of buildings and structures during a bushfire; d. minimises bushfire risk from build up of fuels around buildings and structures; e. ensure safe and effective access for emergency services during a bushfire. 	<p>E70.1</p> <p>Buildings and structures are:</p> <ul style="list-style-type: none"> a. not located on a ridgeline; b. not located on land with a slope greater than 15% (see Overlay map - Landslide hazard); c. dwellings are located on east to south facing slopes. <hr/> <p>E70.2</p> <p>Buildings and structures have contained within the site:</p> <ul style="list-style-type: none"> a. a separation from classified vegetation of 20m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater; b. a separation from low threat vegetation of 10m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater; c. a separation of no less than 10m between a fire fighting water supply extraction point and any classified vegetation, buildings and other roofed structures; d. an area suitable for a standard fire fighting appliance to stand within 3m of a fire fighting water supply extraction point; and e. an access path suitable for use by a standard fire fighting appliance having a formed width of at least 4m, a cross-fall of no greater than 5%, and a longitudinal gradient of no greater than 25%: <ul style="list-style-type: none"> i. to, and around, each building and other roofed structure; and ii. to each fire fighting water supply extraction point. <p>Note - The meaning of the terms classified vegetation and low threat vegetation as well as the method of calculating the bushfire attack level are as described in Australian Standard AS 3959</p>
<p>PO71</p> <p>Development and associated driveways and access ways:</p> <ul style="list-style-type: none"> a. avoid potential for entrapment during a bushfire; 	<p>E71</p> <p>A length of driveway:</p> <ul style="list-style-type: none"> a. to a road does not exceed 100m between the most distant part of a building used for any purpose other than storage and the nearest part of a public road;

<ul style="list-style-type: none"> b. ensure safe and effective access for emergency services during a bushfire; c. enable safe evacuation for occupants of a site during a bushfire. 	<ul style="list-style-type: none"> b. has a maximum gradient no greater than 12.5%; c. have a minimum width of 3.5m; d. accommodate turning areas for fire fighting appliances in accordance with Qld Fire and Emergency Services' Fire Hydrant and Vehicle Access Guideline.
<p>PO72</p> <p>Development provides an adequate water supply for fire-fighting purposes.</p>	<p>E72</p> <ul style="list-style-type: none"> a. a reticulated water supply is provided by a distributor retailer for the area or; b. where not connected to a reticulated water supply, on-site fire fighting water storage containing not less than 10 000 litres (tanks with fire brigade tank fittings, swimming pools) is located within 10m of buildings and structures. c. Where a swimming pool is the nominated on-site fire fighting water storage source, vehicle access is provided to within 3m of that water storage source. d. Where a tank is the nominated on-site fire fighting water storage source, it includes: <ul style="list-style-type: none"> i. a hardstand area allowing medium rigid vehicles (15 tonne fire appliance) access within 6m of the tank; ii. fire brigade tank fittings, comprising 50mm ball valve and male camlock coupling and, if underground, an access hole of 200mm (minimum) to accommodate suction lines.
<p>PO73</p> <p>Development:</p> <ul style="list-style-type: none"> a. does not present unacceptable risk to people or environment due to the impact of bushfire on dangerous goods or combustible liquids; b. does not present danger or difficulty to emergency services for emergency response or evacuation. <p>Editor's note - Unacceptable risk is defined as a situation where people or property are exposed to a predictable hazard event that may result in serious injury, loss of life, failure of community infrastructure, or property damage.</p>	<p>E73</p> <p>Development does not involve the manufacture or storage of hazardous chemicals.</p>
<p>Environmental areas (refer Overlay map - Environmental areas to determine if the following assessment criteria apply)</p> <p>Note – The following are excluded from the native vegetation clearing provisions of this planning scheme:</p> <ul style="list-style-type: none"> a. Clearing of native vegetation located within an approved development footprint; b. Clearing of native vegetation within 10m from a lawfully established building reasonably necessary for emergency access or immediately required in response to an accident or emergency; c. Clearing of native vegetation reasonably necessary to remove or reduce the risk vegetation poses to serious personal injury or damage to infrastructure; 	

6 Zones

- d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental Management and Conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence;
- e. Clearing of native vegetation reasonably necessary for the purpose of maintenance or works within a registered easement for public infrastructure or drainage purposes;
- f. Clearing of native vegetation in accordance with a bushfire management plan prepared by a suitably qualified person, submitted to and accepted by Council;
- g. Clearing of native vegetation associated with removal of recognised weed species, maintaining existing open pastures and cropping land, windbreaks, lawns or created gardens;
- h. Grazing of native pasture by stock;
- i. Native forest practice where accepted development under Part 1, 1.7.7 Accepted development

Note - Definition for native vegetation is located in Schedule 1 Definitions.

Note - Native vegetation subject to this criteria primarily comprises of matters of national environmental significance (MNES), matters of state environmental significance (MSES). They also comprise some matters of local environmental significance (MLES). A MLES is defined in Schedule 1.2, Administrative definitions. A list of the elements that apply to the mapped MSES and MLES is provided in Appendix 1 of the Planning scheme policy - Environmental areas.

Editors' Note - The accuracy of overlay mapping can be challenged through the development application process (code assessable development) or by way of a planning scheme amendment. See Council's website for details.

Note - To demonstrate achievement of the performance outcome, an ecological assessment, vegetation management plan and fauna management plan, as required, are prepared by a suitably qualified person. Guidance for the preparation of above mentioned reports is provided in Planning scheme policy - Environmental areas.

Vegetation clearing, ecological value and connectivity

PO74

Development avoids locating in a High Value Area or a Value Offset Area. Where it is not practicable or reasonable for development to avoid establishing in these areas, development must ensure that:

- a. the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area is maintained and not lost or degraded;
- b. on-site mitigation measures, mechanisms or processes are in place demonstrating the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area are maintained. For example, this can be achieved through replacement, restoration or rehabilitation planting as part of any proposed covenant, the development of a Vegetation Management Plan, a Fauna Management Plan, and any other on-site mitigation options identified in the Planning scheme policy - Environmental areas*.

* Editor's note - This is not a requirement for an environmental offset under the Environmental Offsets Act 2014.

No example provided.

<p>PO75</p> <p>Development provides for safe, unimpeded, convenient and ongoing wildlife movement and establishes and maintains habitat connectivity by:</p> <ol style="list-style-type: none"> a. retaining habitat trees; b. providing contiguous patches of habitat; c. provide replacement and rehabilitation planting to improve connectivity; d. avoiding the creation of fragmented and isolated patches of habitat; e. providing wildlife movement infrastructure. <p>Editor's note - Wildlife movement infrastructure may include refuge poles, tree boulevarding, 'stepping stone' vegetation plantings, tunnels, appropriate wildlife fencing; culverts with ledges, underpasses, overpasses, land bridges and rope bridges. Further information is provided in Planning scheme policy – Environmental areas.</p>	No example provided.
Vegetation clearing and habitat protection	
<p>PO76</p> <p>Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected.</p>	No example provided.
<p>PO77</p> <p>Development does not result in the net loss or degradation of habitat value in a High Value Area or a Value Offset Area. Where development does result in the loss or degradation of habitat value, development will:</p> <ol style="list-style-type: none"> a. rehabilitate, revegetate, restore and enhance an area to ensure it continues to function as a viable and healthy habitat area; b. provide replacement fauna nesting boxes in the event of habitat tree loss in accordance with Planning scheme policy - Environmental areas; c. undertake rehabilitation, revegetation and restoration in accordance with the South East Queensland Ecological Restoration Framework. 	No example provided.
<p>PO78</p> <p>Development ensures safe, unimpeded, convenient and ongoing wildlife movement and habitat connectivity by:</p> <ol style="list-style-type: none"> a. providing contiguous patches of habitat; b. avoiding the creation of fragmented and isolated patches of habitat; c. providing wildlife movement infrastructure; d. providing replacement and rehabilitation planting to improve connectivity. 	No example provided.

6 Zones

Vegetation clearing and soil resource stability	
<p>PO79</p> <p>Development does not:</p> <ol style="list-style-type: none"> result in soil erosion or land degradation; leave cleared land exposed for an unreasonable period of time but is rehabilitated in a timely manner. 	No example provided.
Vegetation clearing and water quality	
<p>PO80</p> <p>Development maintains or improves the quality of groundwater and surface water within, and downstream, of a site by:</p> <ol style="list-style-type: none"> ensuring an effective vegetated buffers and setbacks from waterbodies is retained to achieve natural filtration and reduce sediment loads; avoiding or minimising changes to landforms to maintain hydrological water flows; adopting suitable measures to exclude livestock from entering a waterbody where a site is being used for animal husbandry⁽⁴⁾ and animal keeping⁽⁵⁾ activities. 	No example provided.
<p>PO81</p> <p>Development minimises adverse impacts of stormwater run-off on water quality by:</p> <ol style="list-style-type: none"> minimising flow velocity to reduce erosion; minimising hard surface areas; maximising the use of permeable surfaces; incorporating sediment retention devices; minimising channelled flow. 	No example provided.
Vegetation clearing and access, edge effects and urban heat island effects	
<p>PO82</p> <p>Development retains safe and convenient public access in a manner that does not result in the adverse edge effects or the loss or degradation of biodiversity values within the environment.</p>	No example provided.
<p>PO83</p> <p>Development minimises potential adverse 'edge effects' on ecological values by:</p> <ol style="list-style-type: none"> providing dense planting buffers of native vegetation between a development and environmental areas; retaining patches of native vegetation of greatest possible size where located between a development and environmental areas ; restoring, rehabilitating and increasing the size of existing patches of native vegetation; 	No example provided.

<p>d. ensuring that buildings and access (public and vehicle) are setback as far as possible from environmental areas and corridors;</p> <p>e. landscaping with native plants of local origin.</p> <p>Editor's note - Edge effects are factors of development that go to detrimentally affecting the composition and density of natural populations at the fringe of natural areas. Factors include weed invasion, pets, public and vehicle access, nutrient loads, noise and light pollution, increased fire frequency and changes in the groundwater and surface water flow.</p>	
<p>PO84</p> <p>Development avoids adverse microclimate change and does not result in increased urban heat island effects. Adverse urban heat island effects are minimised by:</p> <p>a. pervious surfaces;</p> <p>b. providing deeply planted vegetation buffers and green linkage opportunities;</p> <p>c. landscaping with local native plant species to achieve well-shaded urban places;</p> <p>d. increasing the service extent of the urban forest canopy.</p>	No example provided.
Vegetation clearing and Matters of Local Environmental Significance (MLES) environmental offsets	
<p>PO85</p> <p>Where development results in the unavoidable loss of native vegetation within a Value Offset Area MLES waterway buffer or a Value Offset Area MLES wetland buffer, an environmental offset is required in accordance with the environmental offset requirements identified in Planning scheme policy - Environmental areas.</p> <p>Editor's note - For MSES Koala Offsets, the environmental offset provisions in Schedule 11 of the Regulation, in combination with the requirements of the Environmental Offsets Act 2014, apply.</p>	No example provided.
Extractive resources transport route (refer Overlay map - Extractive resources (transport route and buffer) to determine if the following assessment criteria apply)	
<p>PO86</p> <p>Development:</p> <p>a. does not increase in the number of people living in close proximity to a transport route and being subject to the adverse effects from the transportation route;</p> <p>b. does not result in the establishment of uses that are incompatible with the operation of Extractive resources transport routes;</p> <p>c. adopts design and location measures to satisfactorily mitigate the potential adverse impacts associated with transportation routes on sensitive</p>	<p>E86</p> <p>The following uses are not located within the 100m wide transport route buffer:</p> <p>a. Caretaker's accommodation⁽¹⁰⁾, except where located in the Extractive industry zone;</p> <p>b. Community residence⁽¹⁶⁾;</p> <p>c. Dual occupancy⁽²¹⁾;</p> <p>d. Dwelling house⁽²²⁾;</p> <p>e. Dwelling unit⁽²³⁾;</p> <p>f. Hospital⁽³⁶⁾;</p> <p>g. Rooming accommodation⁽⁶⁹⁾;</p> <p>h. Multiple dwelling⁽⁴⁹⁾;</p>

6 Zones

<p>land uses. Such measures include, but are not limited to:</p> <ul style="list-style-type: none"> i. locating the furthest distance possible from the transportation route; ii. habitable rooms being located the furthest from the transportation route; iii. shielding and screening private outdoor recreation space from the transportation routes. 	<ul style="list-style-type: none"> i. Non-resident workforce accommodation⁽⁵²⁾; j. Relocatable home park⁽⁶²⁾; k. Residential care facility⁽⁶⁵⁾; l. Resort complex⁽⁶⁶⁾; m. Retirement facility⁽⁶⁷⁾; n. Rural workers' accommodation⁽⁷¹⁾; o. Short-term accommodation⁽⁷⁷⁾; p. Tourist park⁽⁸⁴⁾.
<p>PO87</p> <p>Development:</p> <ul style="list-style-type: none"> a. does not adversely impact upon the efficient and effective transportation of extractive material along a transportation route; b. ensures vehicle access and egress along transportation routes are designed and located to achieve a high degree of safety, having good visibility; c. utilises existing vehicle access points and where existing vehicle access points are sub-standard or poorly formed, they are upgraded to an appropriate standard. 	<p>E87.1</p> <p>Development does not create a new vehicle access point onto an Extractive resources transport route.</p> <hr/> <p>E87.2</p> <p>A vehicle access point is located, designed and constructed in accordance with Planning scheme policy - Integrated design.</p>
<p>Heritage and landscape character (refer Overlay map - Heritage and landscape character to determine if the following assessment criteria apply)</p> <p>Note - To assist in demonstrating achievement of heritage performance outcomes, a Cultural heritage impact assessment report is prepared by a suitably qualified person verifying the proposed development is in accordance with The Australia ICOMOS Burra Charter.</p> <p>Note - To assist in demonstrating achievement of this performance outcome, a Tree assessment report is prepared by a qualified arborist in accordance with Planning scheme policy – Heritage and landscape character. The Tree assessment report will also detail the measures adopted in accordance with AS 4970-2009 Protection of trees on development sites.</p> <p>Note - Places, including sites, objects and buildings having local cultural heritage significance, are identified on Overlay map - Heritage and landscape character and listed in Schedule 1 of Planning scheme policy - Heritage and landscape character. Places also having cultural heritage significance at a State level and being entered in the Queensland Heritage Register, are also identified in Schedule 1 of Planning scheme policy - Heritage and landscape character.</p>	
<p>PO88</p> <p>Development will:</p> <ul style="list-style-type: none"> a. not diminish or cause irreversible damage to the cultural heritage values present on the site, and associated with a heritage site, object or building; b. protect the fabric and setting of the heritage site, object or building; c. be consistent with the form, scale and style of the heritage site, object or building; d. utilise similar materials to those existing, or where this is not reasonable or practicable, neutral materials and finishes; 	<p>E88</p> <p>Development is for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value.</p> <p>Note - A cultural heritage conservation management plan for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value is prepared in accordance with Planning scheme policy - Heritage and landscape character. The plan is sent to, and approved by Council prior to the commencement of any preservation, maintenance, repair and restoration works.</p>

<p>e. incorporate complementary elements, detailing and ornamentation to those present on the heritage site, object or building;</p> <p>f. retain public access where this is currently provided.</p>	
<p>PO89</p> <p>Demolition and removal is only considered where:</p> <p>a. a report prepared by a suitably qualified conservation architect or conservation engineer demonstrates that the building is structurally unsound and is not reasonably capable of economic repair; or</p> <p>b. demolition is confined to the removal of outbuildings, extensions and alterations that are not part of the original structure; or</p> <p>c. limited demolition is performed in the course of repairs, maintenance or restoration; or</p> <p>d. demolition is performed following a catastrophic event which substantially destroys the building or object.</p>	<p>No example provided.</p>
<p>PO90</p> <p>Where development is occurring on land adjoining a site of cultural heritage value, the development is to be sympathetic to and consistent with the cultural heritage values present on the site and not result in their values being eroded, degraded or unreasonably obscured from public view.</p>	<p>No example provided.</p>
<p>PO91</p> <p>Development does not adversely impact upon the health and vitality of significant trees. Where development occurs in proximity to a significant tree, construction measures and techniques as detailed in AS 4970-2009 Protection of trees on development sites are adopted to ensure a significant tree's health, wellbeing and vitality.</p> <p>Significant trees are only removed where they are in a poor state of health or where they pose a health and safety risk to persons or property. A Tree Assessment report prepared by a suitably qualified arborist confirming a tree's state of health is required to demonstrate achievement of this performance outcome.</p>	<p>E91</p> <p>Development does:</p> <p>a. not result in the removal of a significant tree;</p> <p>b. not occur within 20m of a protected tree;</p> <p>c. involve pruning of a tree in accordance with Australian Standard AS 4373-2007 – Pruning of Amenity Trees.</p>
<p>Infrastructure buffers (refer Overlay map - Infrastructure buffers to determine if the following assessment criteria apply)</p>	
<p>PO92</p> <p>Development within a Pumping station buffer is located, designed and constructed to:</p>	<p>E92</p> <p>Development does not involve the construction of any buildings or structures within a Pumping station buffer.</p>

6 Zones

<ul style="list-style-type: none"> a. ensure that odour or other air pollutant impacts on the amenity of the development met the air quality objectives in the Environmental Protection (Air) Policy 2008; b. ensure that noise impacts on the amenity of the development met the indoor noise objectives set out in the Environmental Protection (Noise) Policy 2008. 	
<p>Landslide hazard (refer Overlay map - Landslide hazard to determine if the following assessment criteria apply)</p> <p>Note - To demonstrate achievement of the performance outcomes, a site-specific geotechnical assessment report is prepared by a qualified engineer. Guidance for the preparation of a geotechnical assessment report is provided in Planning scheme policy – Landslide hazard.</p>	
<p>PO93</p> <p>Development:</p> <ul style="list-style-type: none"> a. maintains the safety of people and property on a site and neighbouring sites from landslides; b. ensures the long-term stability of the site considering the full nature and end use of the development; c. ensures site stability during all phases of construction and development; d. minimises disturbance of natural drainage patterns of the site and does not result in the redirection or alteration of the existing flow of surface or groundwater e. minimises adverse visual impacts on the amenity of adjoining residents and provides a positive interface with the streetscape. 	<p>E93</p> <p>Development does not:</p> <ul style="list-style-type: none"> a. involve earthworks exceeding 50m³; b. involve cut and fill having a height greater than 600mm; c. involve any retaining wall having a height greater than 600mm; d. redirect or alter the existing flow of surface or groundwater.
<p>PO94</p> <p>Buildings are designed to respond to sloping topography in the siting, design and form of buildings and structures by:</p> <ul style="list-style-type: none"> a. minimising overuse of cut and fill to create single flat pads and benching; b. avoiding expanses of retaining walls, loss of trees and vegetation and interference with natural drainage systems; c. minimising any adverse visual impact on the landscape character ; d. Protect the amenity of adjoining properties. 	<p>E94</p> <p>Buildings, excluding domestic outbuildings:</p> <ul style="list-style-type: none"> a. are split-level, multiple-slab, pier or pole construction; b. are not single plane slab on ground.
<p>PO95</p> <p>Development protects the safety of people, property and the environment from the impacts of landslide on hazardous chemicals manufactured, handled or stored by incorporating design measures to ensure:</p>	<p>E95</p> <p>Development does not involve the manufacture, handling or storage of hazardous chemicals.</p>

<ul style="list-style-type: none"> a. the long-term stability of the development site considering the full nature and end use of the development; b. site stability during all phases of construction and development; c. the development is not adversely affected by landslide activity originating on sloping land above the site; d. emergency access and access from the site for the public and emergency vehicles is available and is not at risk from landslide. 	
<p>Overland flow path (refer Overlay map - Overland flow path to determine if the following assessment criteria apply)</p> <p>Note - The applicable river and creek flood planning levels associated with defined flood event (DFE) within the inundation area can be obtained by requesting a flood check property report from Council.</p>	
<p>PO96</p> <p>Development:</p> <ul style="list-style-type: none"> a. minimises the risk to persons from overland flow; b. does not increase the potential for damage from overland flow either on the premises or other premises, public land, watercourses, roads or infrastructure. 	<p>No example provided.</p>
<p>PO97</p> <p>Development:</p> <ul style="list-style-type: none"> a. maintains the conveyance of overland flow predominantly unimpeded through the premises for any event up to and including the 1% AEP for the fully developed upstream catchment; b. does not concentrate, intensify or divert overland flow onto an upstream, downstream or surrounding property. <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow.</p>	<p>No example provided.</p>
<p>PO98</p> <p>Development does not:</p> <ul style="list-style-type: none"> a. directly, indirectly or cumulatively cause any increase in overland flow velocity or level; b. increase the potential for flood damage from overland flow either on the premises or other premises, public lands, watercourses, roads or infrastructure. 	<p>No example provided.</p>

6 Zones

<p>Note - Open concrete drains greater than 1m in width are not an acceptable outcome, nor are any other design options that may increase scouring.</p>	
<p>PO99</p> <p>Development ensures that public safety and the risk to the environment are not adversely affected by a detrimental impact of overland flow on a hazardous chemical located or stored on the premises.</p>	<p>E99</p> <p>Development ensures that a hazardous chemical is not located or stored in an Overland flow path area.</p> <p>Note - Refer to the Work Health and Safety Act 2011 and associated Regulation and Guidelines, the Environmental Protection Act 1994 and the relevant building assessment provisions under the Building Act 1975 for requirements related to the manufacture and storage of hazardous substances.</p>
<p>PO100</p> <p>Development which is not in a Rural zone ensures that overland flow is not conveyed from a road or public open space onto a private lot.</p>	<p>E100</p> <p>Development which is not in a Rural zone that an overland flow paths and drainage infrastructure is provided to convey overland flow from a road or public open space area away from a private lot.</p>
<p>PO101</p> <p>Development ensures that inter-allotment drainage infrastructure, overland flow paths and open drains through private property cater for overland flows for a fully developed upstream catchment and are able to be easily maintained.</p> <p>Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises.</p> <p>Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow</p>	<p>E101.1</p> <p>Development ensures that roof and allotment drainage infrastructure is provided in accordance with the following relevant level as identified in QUDM:</p> <ol style="list-style-type: none"> Urban area – Level III; Rural area – N/A; Industrial area – Level V; Commercial area – Level V. <p>E101.2</p> <p>Development ensures that inter-allotment drainage infrastructure is designed to accommodate any event up to and including the 1% AEP for the fully developed upstream catchment.</p>
<p>PO102</p> <p>Development protects the conveyance of overland flow such that an easement for drainage purposes is provided over:</p> <ol style="list-style-type: none"> a stormwater pipe if the nominal pipe diameter exceeds 300mm; an overland flow path where it crosses more than one premises; inter-allotment drainage infrastructure. <p>Note - Refer to Planning scheme policy - Integrated design for details and examples.</p>	<p>No example provided.</p>

<p>Note - Stormwater Drainage easement dimensions are provided in accordance with Section 3.8.5 of QUDM.</p>	
<p>Additional criteria for development for a Park⁽⁵⁷⁾</p>	
<p>PO103</p> <p>Development for a Park⁽⁵⁷⁾ ensures that the design and layout responds to the nature of the overland flow affecting the premises such that:</p> <ol style="list-style-type: none"> a. public benefit and enjoyment is maximised; b. impacts on the asset life and integrity of park structures is minimised; c. maintenance and replacement costs are minimised. 	<p>E103</p> <p>Development for a Park⁽⁵⁷⁾ ensures works are provided in accordance with the requirements set out in Appendix B of the Planning scheme policy - Integrated design.</p>
<p>Riparian and wetland setbacks</p>	
<p>PO104</p> <p>Development provides and maintains a suitable setback from waterways and wetlands that protects natural and environmental values. This is achieved by recognising and responding to the following matters:</p> <ol style="list-style-type: none"> a. impact on fauna habitats; b. impact on wildlife corridors and connectivity; c. impact on stream integrity; d. impact of opportunities for revegetation and rehabilitation planting; e. edge effects. 	<p>E104</p> <p>Development does not occur within:</p> <ol style="list-style-type: none"> a. 50m from top of bank for W1 waterway and drainage line b. 30m from top of bank for W2 waterway and drainage line c. 20m from top of bank for W3 waterway and drainage line d. 100m from the edge of a Ramsar wetland, 50m from all other wetlands. <p>Note - W1, W2 and W3 waterway and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.</p>

6 Zones

6.2.3.2 Transition precinct

6.2.3.2.1 Developable lots

6.2.3.2.1 Purpose - Transition precinct, developable lot

Editor's note -The outcomes in this section are generally the same as Interim precinct but for developable lots

1. For uses on developable lots the purpose of the Emerging Community Zone - transition precinct will be achieved through the following overall outcomes:
 - a. For interim uses development only occurs on a developable lot that is not serviced by all local government networks including water and sewer.
 - b. Development is to maintain a semi-rural character until such time as availability and provision of infrastructure is delivered and relevant site specific constraints are resolved.
 - c. Interim uses are appropriate in this precinct where they:
 - i. would be compatible with the existing semi-rural character and urban uses;
 - ii. would not prejudice or delay the development of the site and adjoining areas;
 - iii. are low intensity in nature and characterised by low investment in buildings and infrastructure relative to the value of the site.
 - d. Residential activities consist of detached dwelling houses⁽²²⁾ or caretaker's accommodation⁽¹⁰⁾, predominantly on large lots.
 - e. The character and scale of dwelling houses⁽²²⁾ are compatible with the intended character for the precinct.
 - f. Secondary dwellings associated with a principal dwelling, remaining subordinate and ancillary to the principal dwelling to retain the low density, low intensity, residential form of a dwelling house⁽²²⁾.
 - g. Garages, car ports and domestic outbuildings remain subordinate and ancillary to the principal dwelling and are located and designed to reduce amenity impacts on the streetscape and adjoining properties.
 - h. Dwelling houses⁽²²⁾ are designed to add visual interest and contribute to an attractive streetscape and public realm.
 - i. Dwelling houses⁽²²⁾ are provided with infrastructure and services at a level suitable for the area as a transition precinct.
 - j. Dwelling houses⁽²²⁾ are responsive to the lot shape, dimensions and topographic features.
 - k. Non-residential uses do not result in adverse or nuisance impacts on adjoining properties or the wider environment. Any adverse or nuisance impacts are contained and internalised to the site through location, design, operation and on-site management practices.
 - l. General works associated with the development achieves the following:
 - i. a high standard of electricity, telecommunications, roads, sewerage, water supply and street lighting services is provided to new developments to meet the current and future needs of users of the site;
 - ii. the development manages stormwater to:
 - A. ensure the discharge of stormwater does not adversely affect the quality, environmental values or ecosystem functions of downstream receiving waters;
 - B. prevent stormwater contamination and the release of pollutants;
 - C. maintain or improve the structure and condition of drainage lines and riparian areas;
 - D. avoid off-site adverse impacts from stormwater.

- iii. the development does not result in unacceptable impacts on the capacity on the capacity and safety of the external road network;
 - iv. the development ensures the safety, efficiency and useability of access ways and parking areas;
 - v. site works including earthworks are managed to be safe and have minimal impacts on adjoining or adjacent premises, the streetscape or the environment.
- m. Activities associated with the use do not cause a nuisance by way of aerosols, fumes, light, noise, odour, particles or smoke
- n. Development avoids areas subject to constraint, limitation, or environmental value. Where development cannot avoid these identified areas, it responds by:
- i. adopting a 'least risk, least impact' approach when designing, siting and locating development in any area subject to a constraint, limitation or environmental value to minimise the potential risk to people, property and the environment;
 - ii. ensuring no further instability, erosion or degradation of the land, water or soil resource;
 - iii. when located within a Water buffer area, complying with the Water Quality Vision and Objectives contained in the Seqwater Development Guidelines: Development Guidelines for Water Quality Management in Drinking Water Catchments 2012.
 - iv. maintaining, restoring and rehabilitating environmental values, including natural, ecological, biological, aquatic, hydrological and amenity values, and enhancing these values through the provision of planting and landscaping, and facilitating safe wildlife movement and connectivity through:
 - A. the provision of replacement, restoration, rehabilitation planting and landscaping;
 - B. the location, design and management of development to avoid or minimise adverse impacts on ecological systems and processes;
 - C. the requiring of environmental offsets in accordance with the Environmental Offsets Act 2014.
 - v. protecting native species and protecting and enhancing species habitat;
 - vi. protecting and preserving the natural, aesthetic, architectural historic and cultural values of significant trees, places, objects and buildings of heritage and cultural significance;
 - vii. establishing effective separation distances, buffers and mitigation measures associated with identified infrastructure to minimise adverse effects on sensitive land uses from odour, noise, dust and other nuisance generating activities;
 - viii. establishing, maintaining and protecting appropriate buffers to waterways, wetlands, native vegetation and significant fauna habitat;
 - ix. ensuring it promotes and does not undermine the ongoing viability, integrity, operation, maintenance and safety of identified infrastructure;
 - x. ensuring effective and efficient disaster management response and recovery capabilities;
 - xi. where located in an overland flow path:
 - A. development siting, built form, layout and access responds to the risk presented by the overland flow and minimises risk to personal safety;
 - B. development is resilient to the impacts of overland flow by ensuring the siting and design accounts for the potential risks to property associated with the overland flow;
 - C. development does not impact on the conveyance of the overland flow for any event up to and including the 1% AEP for the fully developed upstream catchment;
 - D. development directly, indirectly and cumulatively avoid an increase in the severity of overland flow and potential for damage on the premises or other premises, public lands, watercourses, roads or infrastructure.
- o. Development in the Transition precinct, on a developable lot includes one or more of the following:

<ul style="list-style-type: none"> • Animal husbandry⁽⁴⁾ • Animal keeping⁽⁵⁾ - if not for a cattery or kennel 	<ul style="list-style-type: none"> • Dwelling House⁽²²⁾ • Emergency services • Environment facility⁽²⁶⁾ 	<ul style="list-style-type: none"> • Rural Industry⁽⁷⁰⁾ - if on a lot greater than 1ha and having a GFA of 150m² or less
---	--	---

6 Zones

<ul style="list-style-type: none"> • Caretaker's accommodation⁽¹⁰⁾ • Cropping⁽¹⁹⁾ - if not forestry for wood production 	<ul style="list-style-type: none"> • Home based business⁽³⁵⁾ • Intensive horticulture⁽⁴⁰⁾ - if on a lot greater than 1ha • Roadside stall⁽⁶⁸⁾ 	<ul style="list-style-type: none"> • Sales office⁽⁷²⁾ • Veterinary services⁽⁸⁷⁾ • Wholesale nursery⁽⁸⁹⁾
---	---	---

p. Development in the Transition precinct, on a developable lot does not include any of the following:

<ul style="list-style-type: none"> • Adult store⁽¹⁾ • Agricultural supplies store⁽²⁾ • Air services⁽³⁾ • Animal keeping⁽⁵⁾ - if for a cattery or kennel • Aquaculture⁽⁶⁾ • Bar⁽⁷⁾ • Brothel⁽⁸⁾ • Bulk landscape supplies⁽⁹⁾ • Car wash⁽¹¹⁾ • Cemetery⁽¹²⁾ • Community residence⁽¹⁶⁾ • Crematorium⁽¹⁸⁾ • Cropping⁽¹⁹⁾ - if forestry for wood production • Detention facility⁽²⁰⁾ • Dual occupancy⁽²¹⁾ • Dwelling unit⁽²³⁾ • Extractive industry⁽²⁷⁾ • Food and drink outlet⁽²⁸⁾ • Function facility⁽²⁹⁾ • Funeral parlour⁽³⁰⁾ 	<ul style="list-style-type: none"> • High impact industry⁽³⁴⁾ • Hospital⁽³⁶⁾ • Hotel⁽³⁷⁾ • Indoor sport and recreation⁽³⁸⁾ • Intensive animal industry⁽³⁹⁾ • Low impact industry⁽⁴²⁾ • Major sport, recreation and entertainment facility⁽⁴⁴⁾ • Marine industry⁽⁴⁵⁾ • Market⁽⁴⁶⁾ • Medium impact industry⁽⁴⁷⁾ • Motor sport facility⁽⁴⁸⁾ • Multiple dwelling⁽⁴⁹⁾ • Nature-based tourism⁽⁵⁰⁾ • Nightclub entertainment facility⁽⁵¹⁾ • Non-resident workforce accommodation⁽⁵²⁾ • Office⁽⁵³⁾ • Outdoor sales⁽⁵⁴⁾ • Outdoor sport and recreation⁽⁵⁵⁾ 	<ul style="list-style-type: none"> • Port services⁽⁶¹⁾ • Relocatable home park⁽⁶²⁾ • Renewable energy facility⁽⁶³⁾ • Research and technology industry⁽⁶⁴⁾ • Residential care facility⁽⁶⁵⁾ • Resort complex⁽⁶⁶⁾ • Retirement facility⁽⁶⁷⁾ • Rooming accommodation⁽⁶⁹⁾ • Rural workers' accommodation⁽⁷¹⁾ • Service industry⁽⁷³⁾ • Service station⁽⁷⁴⁾ • Shop⁽⁷⁵⁾ • Shopping centre⁽⁷⁶⁾ • Short-term accommodation⁽⁷⁷⁾ • Showroom⁽⁷⁸⁾ • Special industry⁽⁷⁹⁾ • Theatre⁽⁸²⁾ • Tourist attraction⁽⁸³⁾
--	---	---

<ul style="list-style-type: none"> • Garden centre⁽³¹⁾ • Hardware and trade supplies⁽³²⁾ • Health care services⁽³³⁾ 	<ul style="list-style-type: none"> • Parking station⁽⁵⁸⁾ • Permanent plantation⁽⁵⁹⁾ 	<ul style="list-style-type: none"> • Tourist park⁽⁸⁴⁾ • Transport depot⁽⁸⁵⁾ • Warehouse⁽⁸⁸⁾
---	---	---

- q. Development not listed in the tables above may be considered on its merits and where it reflects and support the outcomes of the zone.

6.2.3.2.2 Accepted development subject to requirements

If development is to be categorised as accepted development subject to requirements it must comply with the requirements for accepted development set out in Part C, Table 6.2.3.2.1.1. Where the development does not meet a requirement for accepted development (RAD) within Part C Table 6.2.3.2.1.1, the category of development changes to assessable development under the rules outlined in section 5.3.3.(1), and assessment is against the corresponding performance outcome (PO) identified in the table below. This only occurs whenever a RAD is not met, and is therefore limited to the subject matter of the RADs that are not complied with. To remove any doubt, for those RADs that are complied with, there is no need for assessment against the corresponding PO.

Requirements for accepted development (RAD)	Corresponding performance outcomes (PO)
RAD1	PO1
RAD2	PO5
RAD3	PO7
RAD4	PO6
RAD5	PO8
RAD6	PO9
RAD7	PO10-PO11
RAD8	PO12-PO15
RAD9	PO12-PO15
RAD10	PO16

Part C - Requirements for accepted development - Transition precinct, developable lot

Table 6.2.3.2.1.1 Requirements for accepted development - Transition precinct, developable lot

Requirements for accepted development - For developable lots only	
General requirements	
Servicing	
RAD1	The site is a developable lot that is not serviced with all local government networks including water and sewer.
Building height	
RAD2	Unless otherwise specified in this code, the height of all buildings and structures does not exceed 5m.
Setbacks	
RAD3	<p>Buildings and structures associated with the following uses are setback from all lot boundaries as follows:</p> <ul style="list-style-type: none"> a. Animal husbandry⁽⁴⁾ (buildings only) - 10m; b. Cropping⁽¹⁹⁾ (buildings only) - 10m; c. Animal keeping⁽⁵⁾, excluding catteries and kennels - 20m; d. Cropping⁽¹⁹⁾ (buildings only) - 10m; e. Intensive horticulture⁽⁴⁰⁾ - 10m; f. Rural Industry⁽⁷⁰⁾ - 20m; g. Wholesale nursery⁽⁸⁹⁾ - 10m; h. Veterinary services⁽⁸⁷⁾ - 10m.
RAD4	<p>Unless specified elsewhere in the zone code, all other buildings and structures are setback:</p> <ul style="list-style-type: none"> a. Road frontage - 6m minimum; b. Side and Rear - 4.5m minimum. <p>Note - For a Dwelling house⁽²²⁾ where located in a bushfire hazard area (see Overlay map - Bushfire hazard) a greater setback may be required. See values and constraints requirements Bushfire hazard.</p> <p>Note - This provision does not apply where a development footprint exists for a lot.</p>

Development footprint	
RAD5	Where a development footprint has been identified as part of a development approval for reconfiguring a lot, all development occurs within that development footprint .
Building on sloping land	
RAD6	<p>Building and site design on slopes between 10% and 15%:</p> <ol style="list-style-type: none"> use split-level, multiple-slab, pier or pole construction; avoid single-plane slabs and benching; ensure the height of any cut or fill, whether retained or not, does not exceed 900mm. <p>Note - This does not apply to outbuildings or building work.</p>
Lighting
