CROSS SECTION

Above tolerances are to be read in conjunction with straight edge requirement in specification

NOTES:
1. Footpath – Finished surface to match existing features such as pit covers and driveways to within 5mm. All surfaces are to be free draining.
2. Kerb and Channel – Ensure channels do not pond water and kerb line has no kinks in line and level.
3. Batters – Average slope to be not steeper than shown in design nor more than 10% flatter, provided the flatter slope does not encroach on abutting properties.
