# Banner installation guide
(Excludes Wamuran banner pole sites)

Installing a banner in the top position

1. The pulley system to secure the banner to the top position on the banner pole is located within the hatch.

2. To secure the banner to the top banner position, remove the rope from the rope holder for the top eyelet and slowly release the rope.

   Top eyelet
   Bottom eyelet

3. On one side secure top banner eyelet to the snap hook.

4. Repeat the process for securing the bottom eyelet of the banner.

5. Repeat steps 2, 3 and 4 for securing the other side of the banner.

6. Raise the banner by pulling the ropes, ensuring they are tight to prevent the banner sagging.

7. Push the ropes securely into the rope holder.

8. Ensure any excess rope is put inside the poles and the hatch cover closed.

Installing a banner in the lower position

1. Tie the rope securely to the top and bottom eyelets.
