

Bushcare Volunteers

Bushcare volunteers play an important role in the conservation of our Urban bushland through implementing bush restoration projects.

Bushcare volunteers may be required to undertake the following tasks;

- Weed control of bushland areas using handheld equipment (e.g. rakes, shovels, hoes)
- Prepare planting sites, lay mulch; plant seedlings and install tree guards
- Monitor fauna and flora, including rare and threatened species
- Contribute information to Voluntary Conservation Program newsletters
- Provide voluntary support during community planting events and workshops

Volunteers will need to have good communication, along with a polite, approachable and general positive attitude. In addition, volunteers should have the ability and willingness to work as a team with Council employees and volunteers, whilst fostering an inclusive and supportive environment.

Volunteers will require a moderate level of fitness and be capable of undertaking Bushcare activities (e.g. walking through bushland reserves, hand-pulling weeds and planting trees).

Council officers will provide you with all the information, equipment, training, and support to become a Bushcare volunteer.
