1 Regional Catchment - Regional Recreation Analysis

1.1 Profile Summary

The Moreton Bay Region regional catchment includes the entire Moreton Bay Regional Council area. The catchment is bounded by the Sunshine Coast Council area in the north, the Coral Sea and Moreton Bay in the east, Brisbane City in the south, and the Somerset Region in the west.

The Moreton Bay Region contains growing residential areas, with substantial rural, rural-residential, commercial and industrial areas. The region has a total land area of over 2,000 square kilometres, and includes mountain ranges, coastal wetlands, national parks, state forests, rural townships, coastal communities and urban centres.

Communities within the region vary considerably, from residential suburbs in the south and east to rural communities in the north and west, key activity centres at Redcliffe, Caboolture, Strathpine and North Lakes to coastal communities on the shores of Moreton Bay. The region has some of the fastest growing suburbs in Australia and new residential areas are emerging in previously rural residential communities. In some circumstances the growth has occurred so rapidly that infrastructure has failed to keep pace.

MAP 1 - MORETON BAY REGIONAL COUNCIL AREA

1.2 Regional population growth assumptions

Growth is expected to occur predominantly along the region's urban corridor, near activity centres and along existing and future rail lines. These existing and proposed places are clustered together to form neighbourhoods and districts. Some established places will remain largely unchanged in the foreseeable future, while other neighbourhoods such as those along the Moreton Bay Rail Link (MBRL) will be targeted for growth and change.

The population assumptions for the Moreton Bay Region area reflect the planning directions outlined in Council's Strategic Framework. Table 1 identifies that the Moreton Bay Region is projected to grow from 439,224 in 2016 to 614,908 in 2036, an additional 175,684 residents.

TABLE 1 - REGIONAL CATCHMENT POPULATION ASSUMPTIONS

Moreton Bay Region District Catchments	Year					
	2016	2021	2026	2031	2036	Ultimate Demand
Caboolture	78,260	91,299	103,801	119,360	130,634	240,119
Coastal Communities and Bribie Island	35,532	38,652	42,440	43,987	44,821	46,739
North Lakes - Redcliffe - Moreton Bay Rail Corridor	195,632	221,009	242,401	265,124	284,212	349,508

Rural	34,128	35,532	37,880	39,818	42,314	47,106
Strathpine	95,672	98,906	103,214	106,480	112,926	131,492
Total Region	439,224	485,398	529,736	574,770	614,908	814,966
Population growth from 2016		46,174	90,513	135,546	175,684	375,742

1.3 Current supply of Regional Recreation Parks

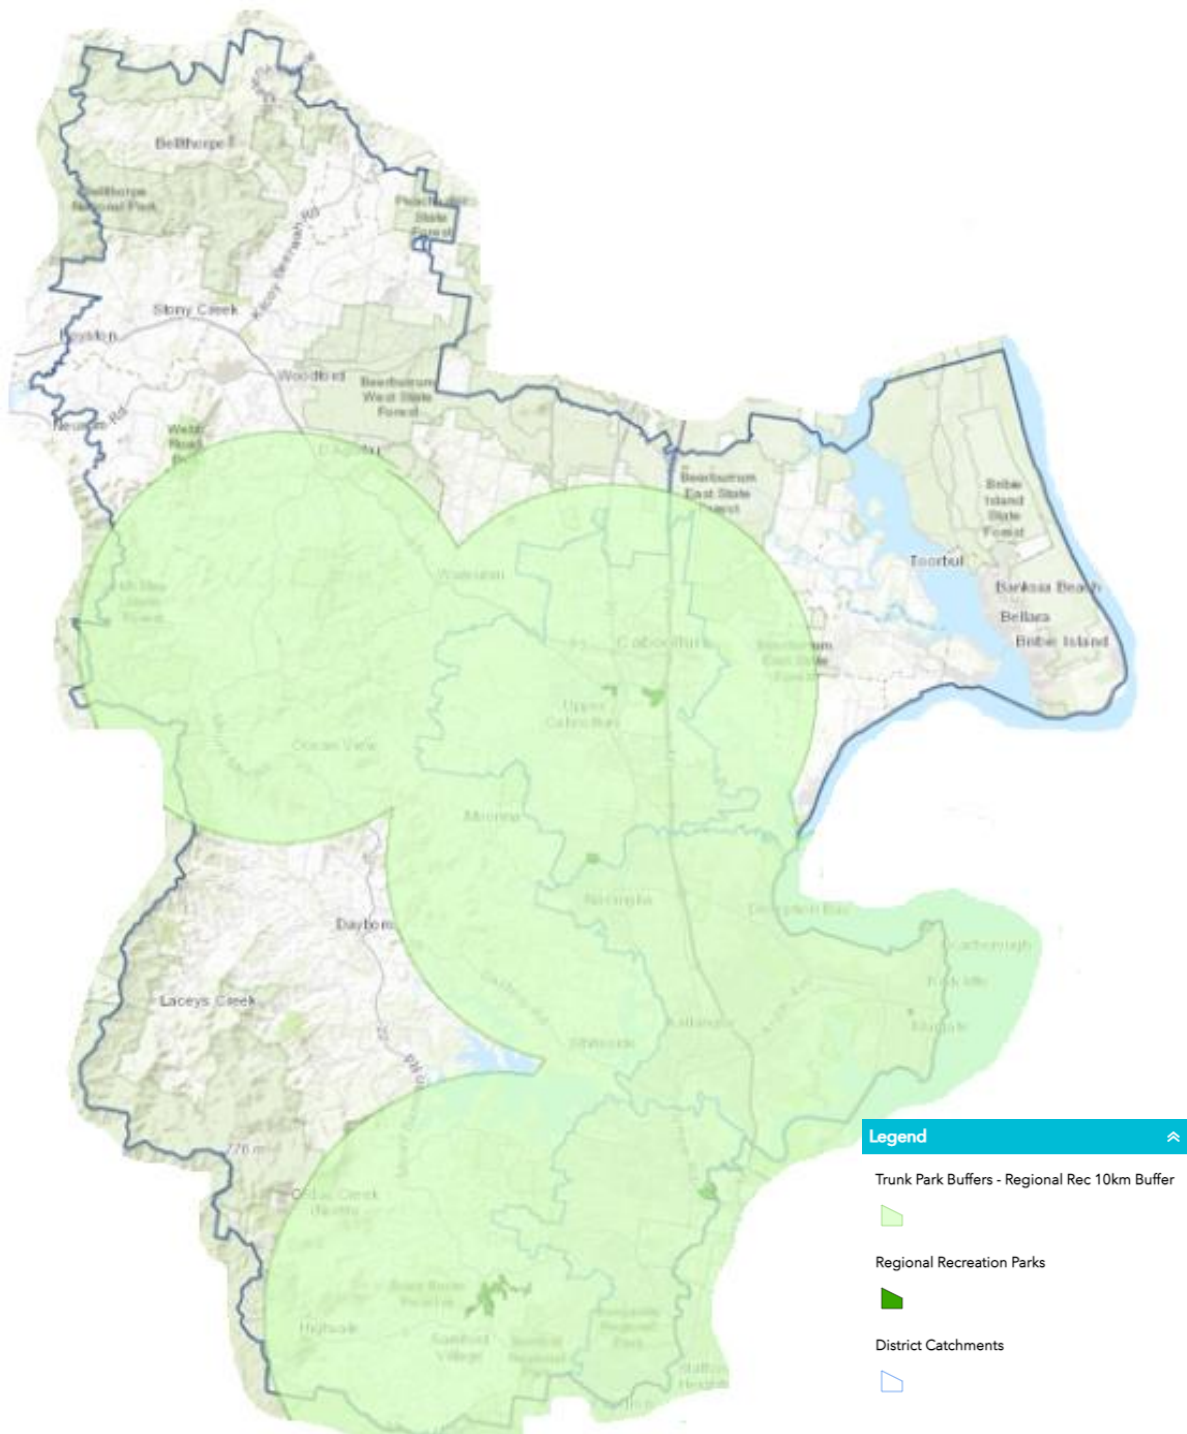

The existing supply of Regional Recreation parks across the entire region are shown in the following Table 2.

TABLE 2 - CURRENT SUPPLY OF REGIONAL RECREATION PARKS

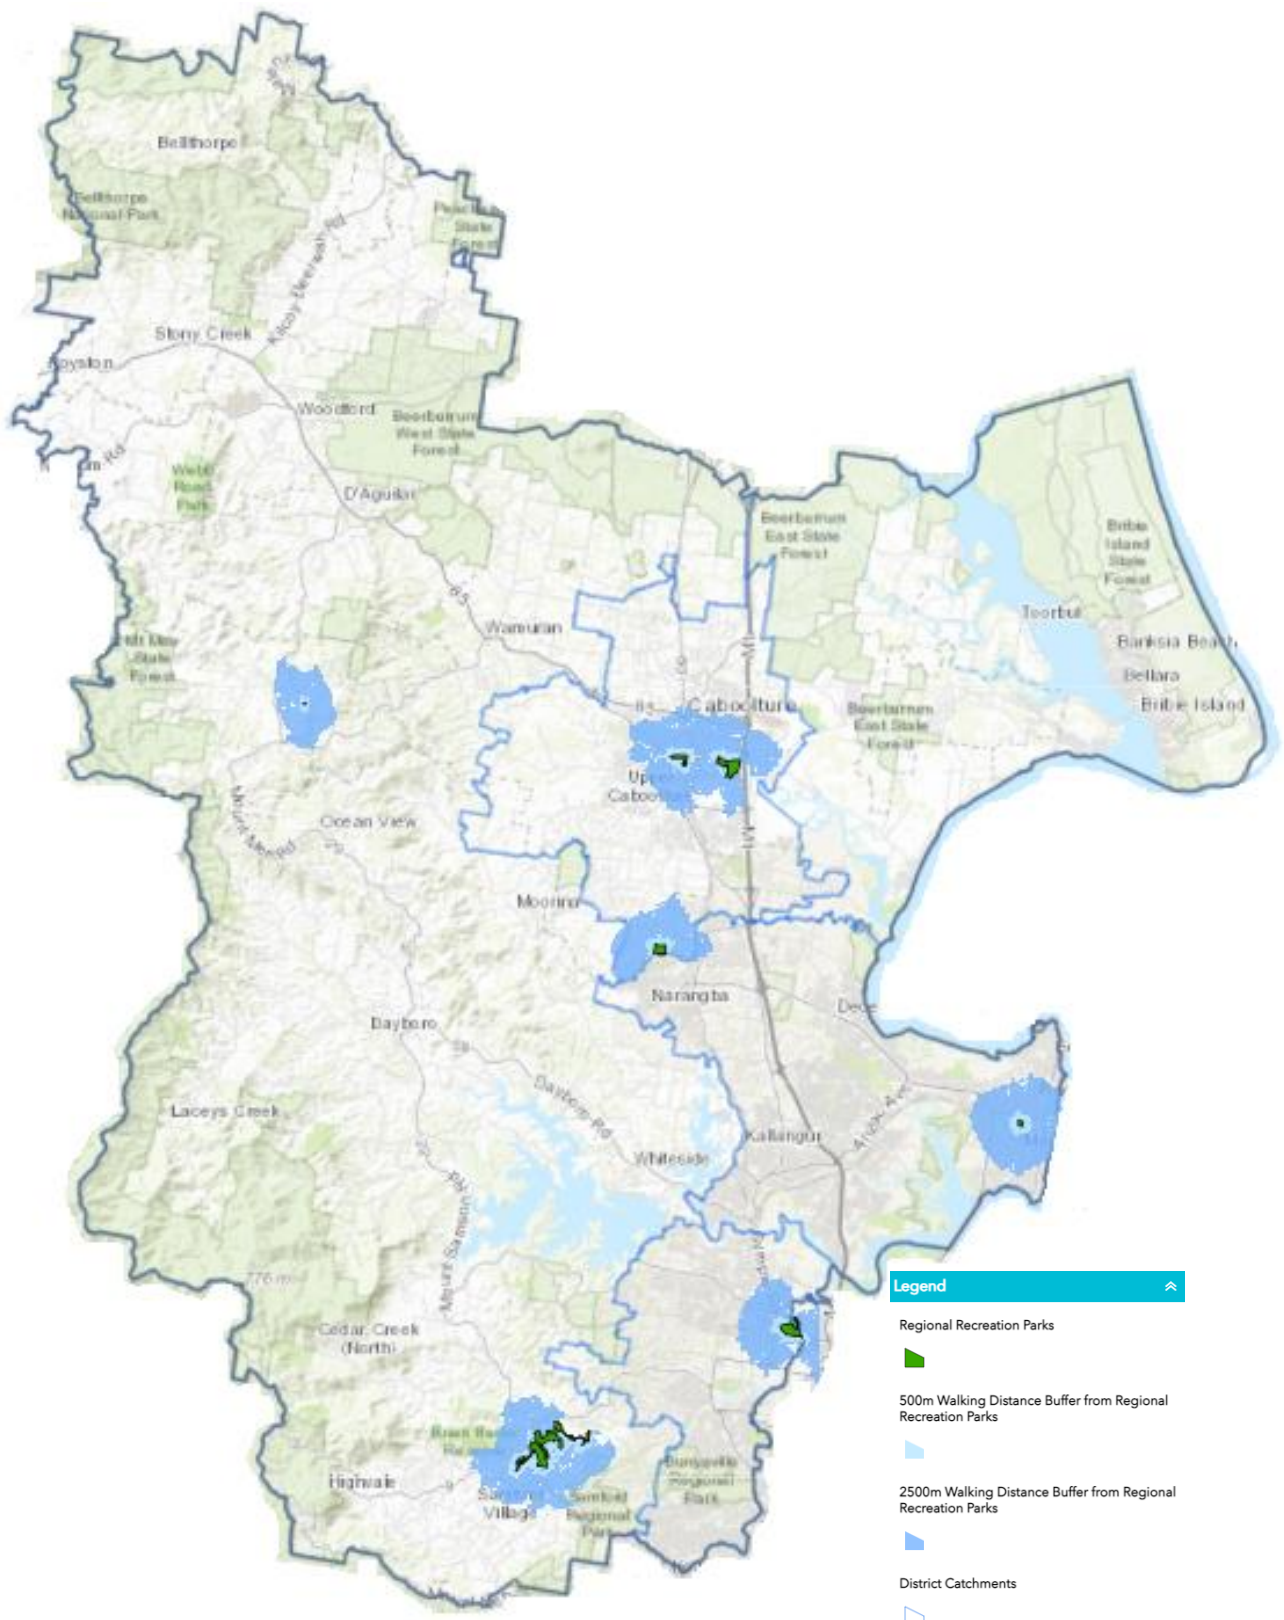

Park name	Park address	Land area (ha)
Gary Parsons Park	25 South Esplanade Bongaree	0.3
Woorim Foreshore	121 North Street Woorim	30.4
Apex Park (Woody Point)	229 Hornibrook Esplanade Woody Point	0.5
Queens Beach Park	Lot 84 Queen Street Scarborough	4.0

Pine Rivers Park	125 Gympie Road Strathpine	35.8
Total land area (ha)		288.8

1.4 Accessibility Analysis for Regional Recreation Parks

Regional recreation parks are typically accessed via motor transport and draw from a much larger catchment. The Map 2 demonstrates the accessibility to the Regional recreation parks across MBRC for a 10km radius. Map 3 shows a walkability analysis of regional recreation parks at 500m and 2500m.

MAP 2 - ACCESSIBILITY TO REGIONAL RECREATION PARKS

MAP 3 - WALKABILITY TO REGIONAL RECREATION PARKS

1.5 Regional Catchment Analysis

The desired standards of service outline a target of 0.5 hectare of land for regional recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 3, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 1 above.

TABLE 3 - LAND PROVISION ANALYSIS REGIONAL RECREATION PARKS

MBRC - Region	Year				
Year	2016	2021	2031	2036	Ultimate
MBRC Population Assumptions	439,224	485,398	529,736	574,770	657,377
Supply to meet DSS	219.61	242.70	264.87	287.39	328.69
Supply	288	288	288	288	288
Balance	68.39	45.30	23.13	0.61	-40.69

*Year based on census periods

The provision rate established in the desired standard of service (DSS) for regional sports parks is 0.4 hectares per 1000 population. Table 4 shows the population assumptions and the calculation of supply and demand for Regional Sports parks. Calculations demonstrate a shortfall of 46.3hectares at 2036.

TABLE 4- LAND PROVISION ANALYSIS REGIONAL SPORTS PARKS

MBRC - Region	Year				
Year	2016	2021	2031	2036	Ultimate
MBRC Population Assumptions	439,224	485,398	529,736	574,770	657,377
Supply to meet DSS	175.7	194.2	211.9	229.9	245.96
Supply	183.6	183.6	183.6	183.6	183.6
Balance	7.9	-10.6	-28.3	-46.3	-62.36

1.6 Regional Recommendations for Public Park Solutions

Demand for Regional parks becomes an issue beyond the 2036 timeframe, given the large land requirement of 10ha consideration is given to the future supply needs.

Recommendations include the inclusion of existing the following existing LGIP SOW items noting the following timeframe adjustments as indicated in Table 5.

TABLE 5 - REGIONAL RECREATION PARK SOLUTIONS

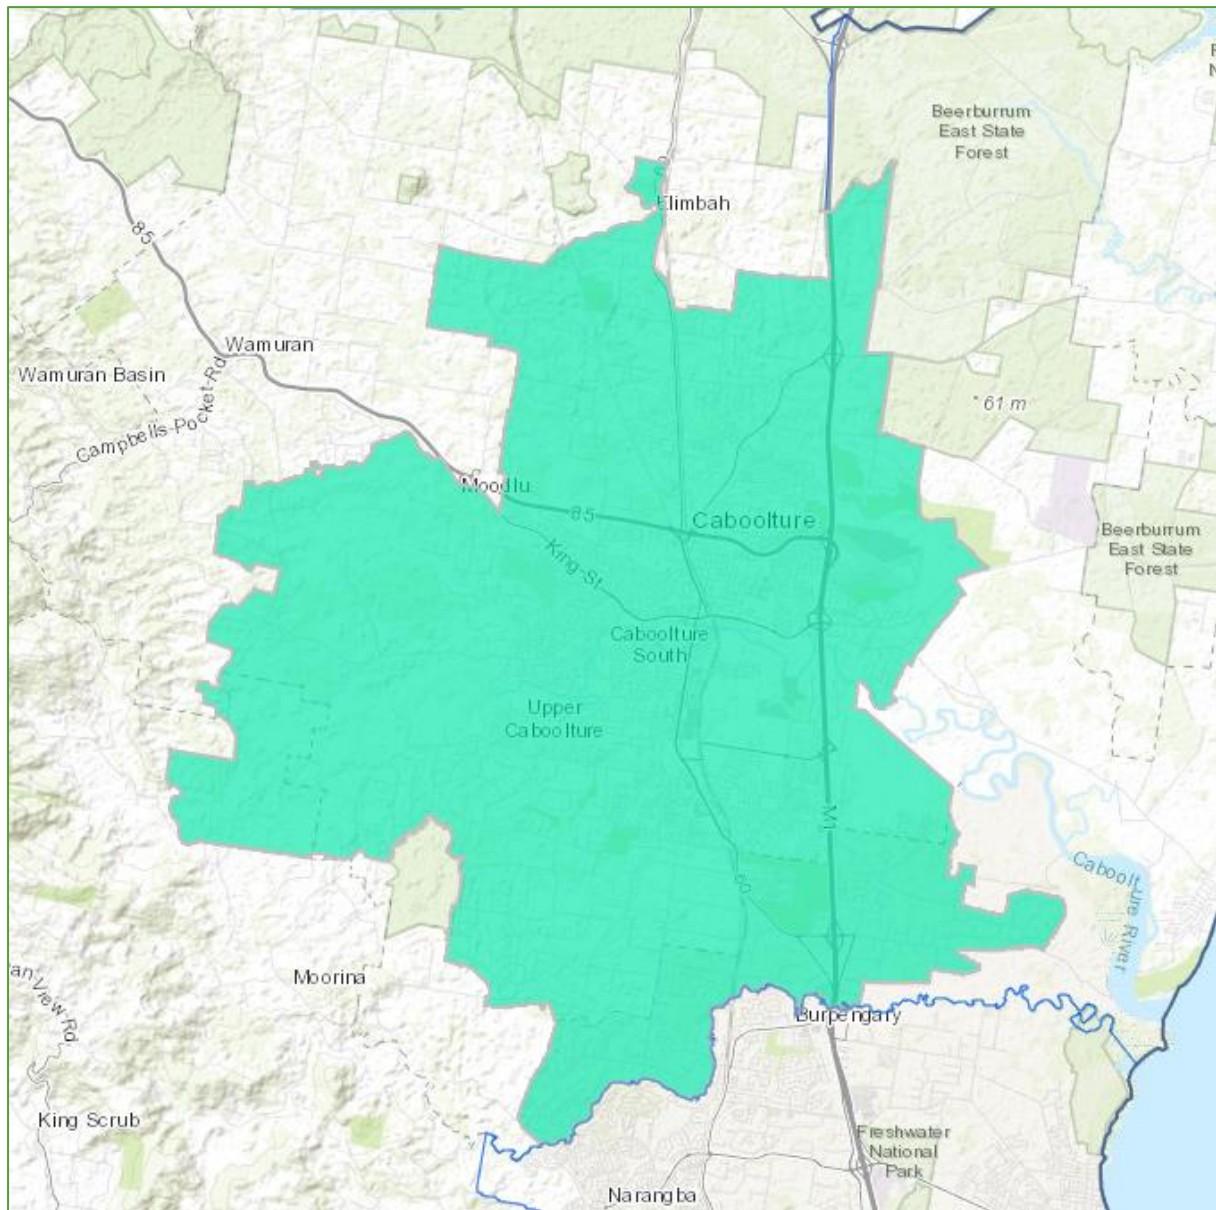

Reference	Park Name and or Location	Inclusion	LGIP1 timeframe	LGIP2 Timeframe	Additional Land Area
OS-48	CREEC, Rowley Road Burpengary	Embellishment	2019	2021-2026	
OS-37	Pine Rivers Park, Gympie Road Strathpine	Embellishment	2031	2031-2036	
OS-57	Strathpine Regional Civic, Strathpine	Embellishment	2019	2021-2026	
OS-59	Caboolture Regional Recreation, Lower King Street	Embellishment	2031	2031-2036	
OS-55	Redcliffe Civic Regional, Redcliffe	Land and Embellishment	2031	2026-2031	1.0ha
OS-38	Kurwongbah future Regional Sports Park	Land and Embellishment	2031	2031-2036	35.4ha

Solutions are based on upgrades to existing Regional Recreation parks and the addition of two civic parks (land required) and one Regional Sports park of 35.4ha.

The result is an additional 37.4ha towards the end of the LGIP timeframe of 15 years to meet most of the anticipated demand to 2036.

The embellishment and upgrades will bring the Council's Regional network up to the desired standard of service.

CABOOLTURE DISTRICT

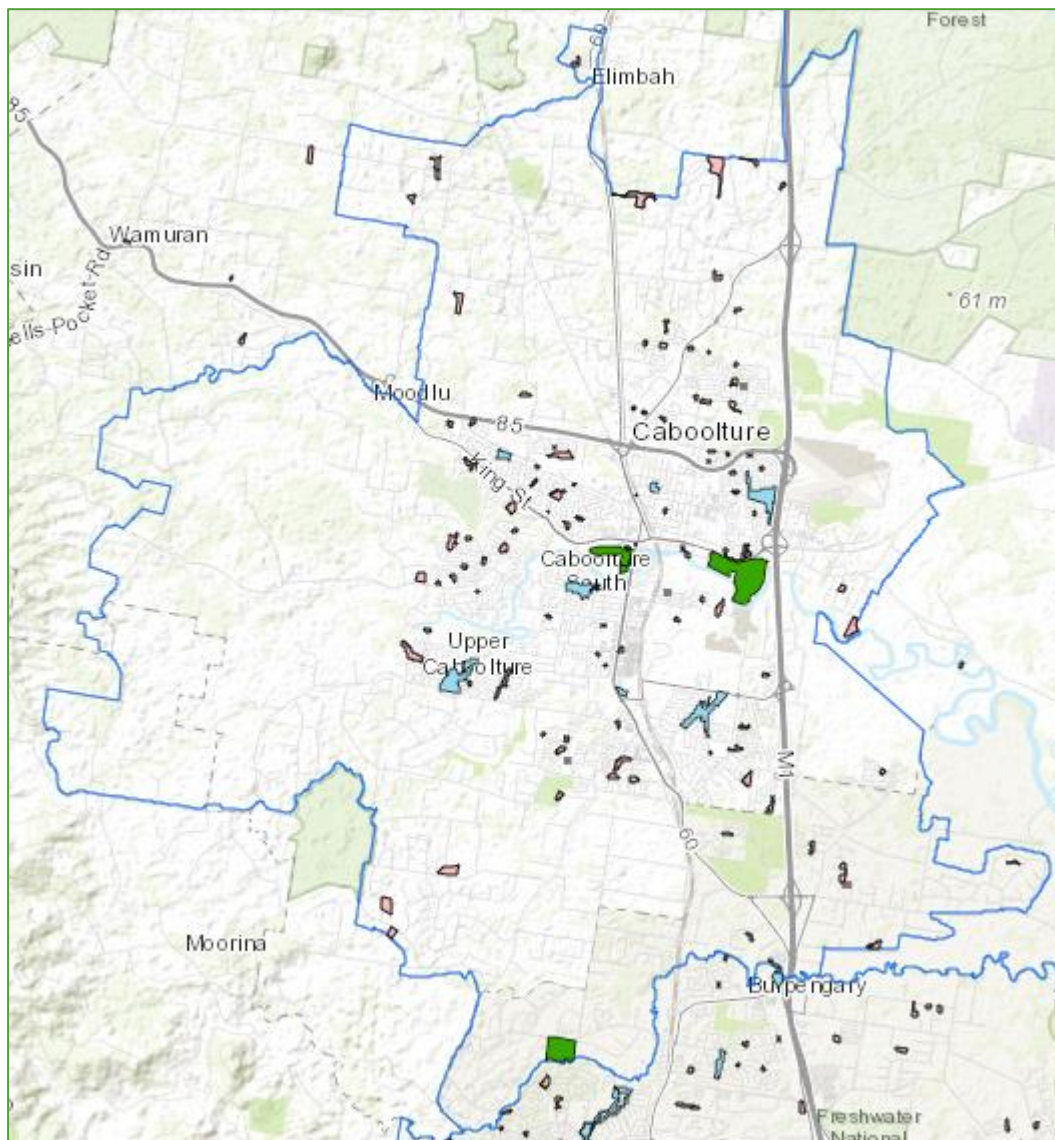

2 District Catchment - Caboolture

2.1 Caboolture District Profile Summary

The Caboolture district covers a large area, from Narangba in the south to Elimbah in the north and east to Deception Bay, all focused around the principal activity centre of Caboolture-Morayfield. The district includes a range of urban, suburban, rural and rural residential communities (see Map 4). The Caboolture district includes key industry and employment opportunities along the Bruce Highway at Narangba, Caboolture and Elimbah.

In the next 20 years considerable change will occur throughout this district as more people decide to live, work and play within proximity to the Caboolture-Morayfield Activity Centre. New residents will be accommodated in a mix of higher density living close to Morayfield, Caboolture, Burpengary and Deception Bay and in developing Next Generation residential neighbourhoods on the fringe of the urban areas.

MAP 4 - CABOOLTURE DISTRICT CATCHMENT

2.2 Caboolture District Population growth assumptions

The population assumptions for the Caboolture district reflect the planning directions outlined in Council's Strategic Framework. Table 6 identifies that from 2016 base date the Caboolture district is projected to have an additional 52,374 residents by 2036. This represents the second highest growth district in the region and 29% of the region's growth. Table 6 shows the population growth assumptions for Caboolture district over five-year periods in comparison to the total MBRC regional growth from 2016 to 2036 is 175,684 people.

TABLE 6 - CABOOLTURE DISTRICT CATCHMENT POPULATION ASSUMPTIONS

Caboolture District	2016	2021	2026	2031	2036	Ultimate
Population	78,260	91,299	103,801	119,360	130,634	240,119
Population increase in five-year period		13,039	12,502	15,559	11,274	109,485
Moreton Bay Region Total Population	439,224	485,398	529,736	574,770	614,908	814,966
Moreton Bay Region population increase over five-year period		46,174	44,338	45,034	40,138	200,058
Percentage of Moreton Bay Regional Population	18%	19%	20%	21%	21%	29%

*Based on resident population assumptions

2.3 Caboolture District Current Supply of District Recreation and Sports Parks

The existing supply of District Recreation parks within this the Caboolture catchment are shown in Table 7.

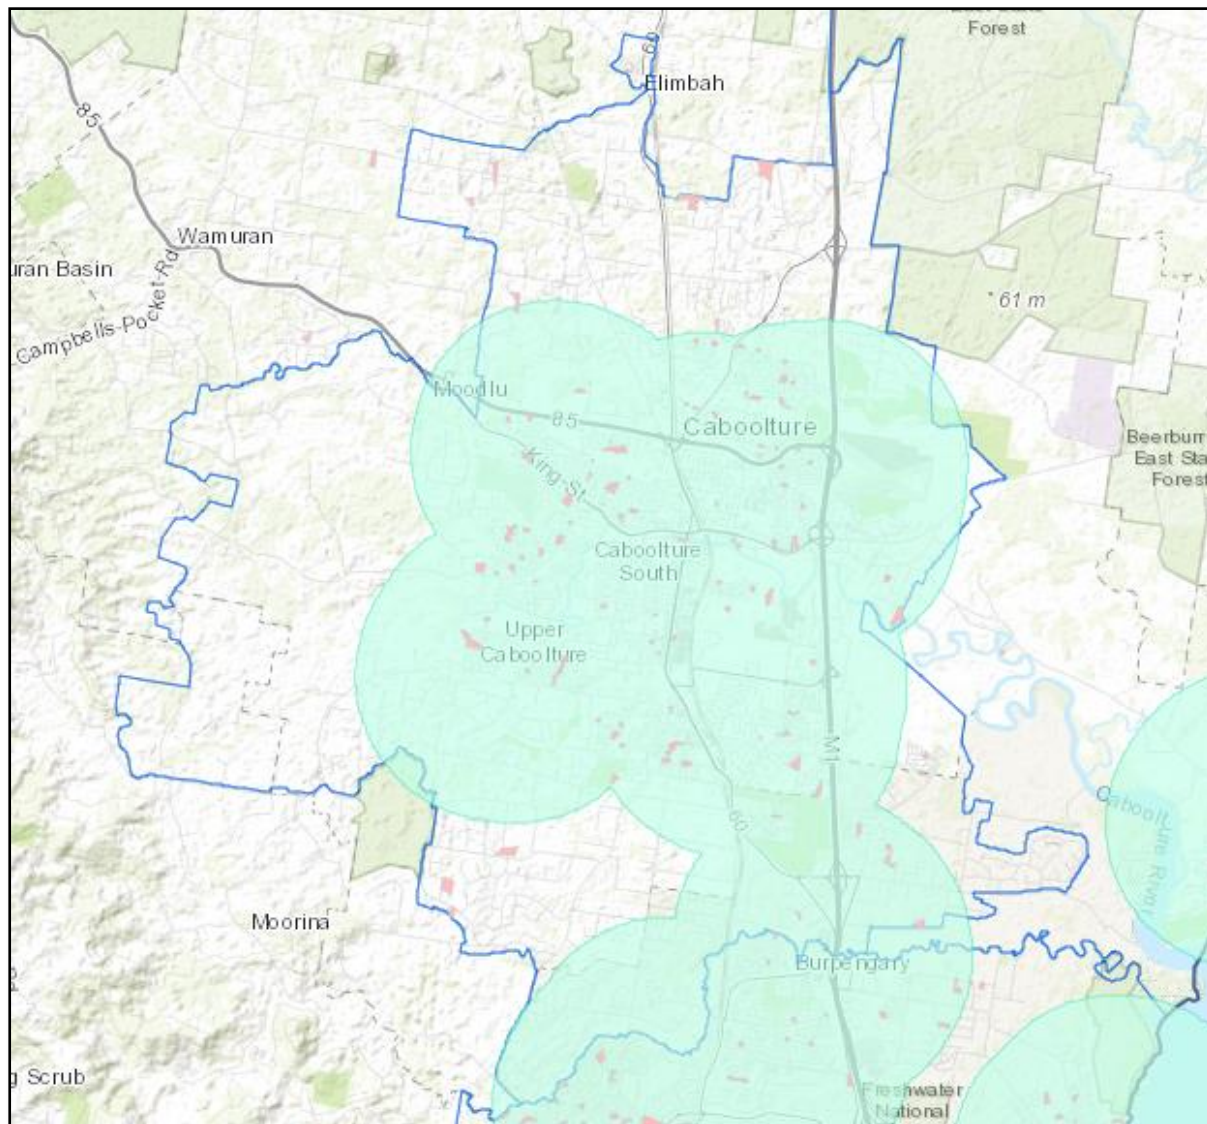

TABLE 7 - SUPPLY OF CABOOLTURE DISTRICT RECREATION PARKS

Park Name	Address	Local Catchment	Area in hectares (ha)
Bluebell Street Park	Honeysuckle Street	Central Caboolture	2.75
Brodies Park (North)	Glenwood Drive	Caboolture South Morayfield	10.76
Parkridge Estate Park	Caboolture River Road	Caboolture South Morayfield	14.49
Platypus Creek Environmental Reserve	Julie Drive	Caboolture South Morayfield	8.41
Sheep Station Creek Park	Morayfield Road	Caboolture South Morayfield	1.34
Summerfields Drive Park	Joyner Circuit	Central Caboolture	14.38
Wallace Street Park	Wallace Street North	Central Caboolture	2.00
Total Area			54.14

Note there are no district recreation parks in the Northern Caboolture catchment and this area falls outside of the 2.5km area for accessibility.

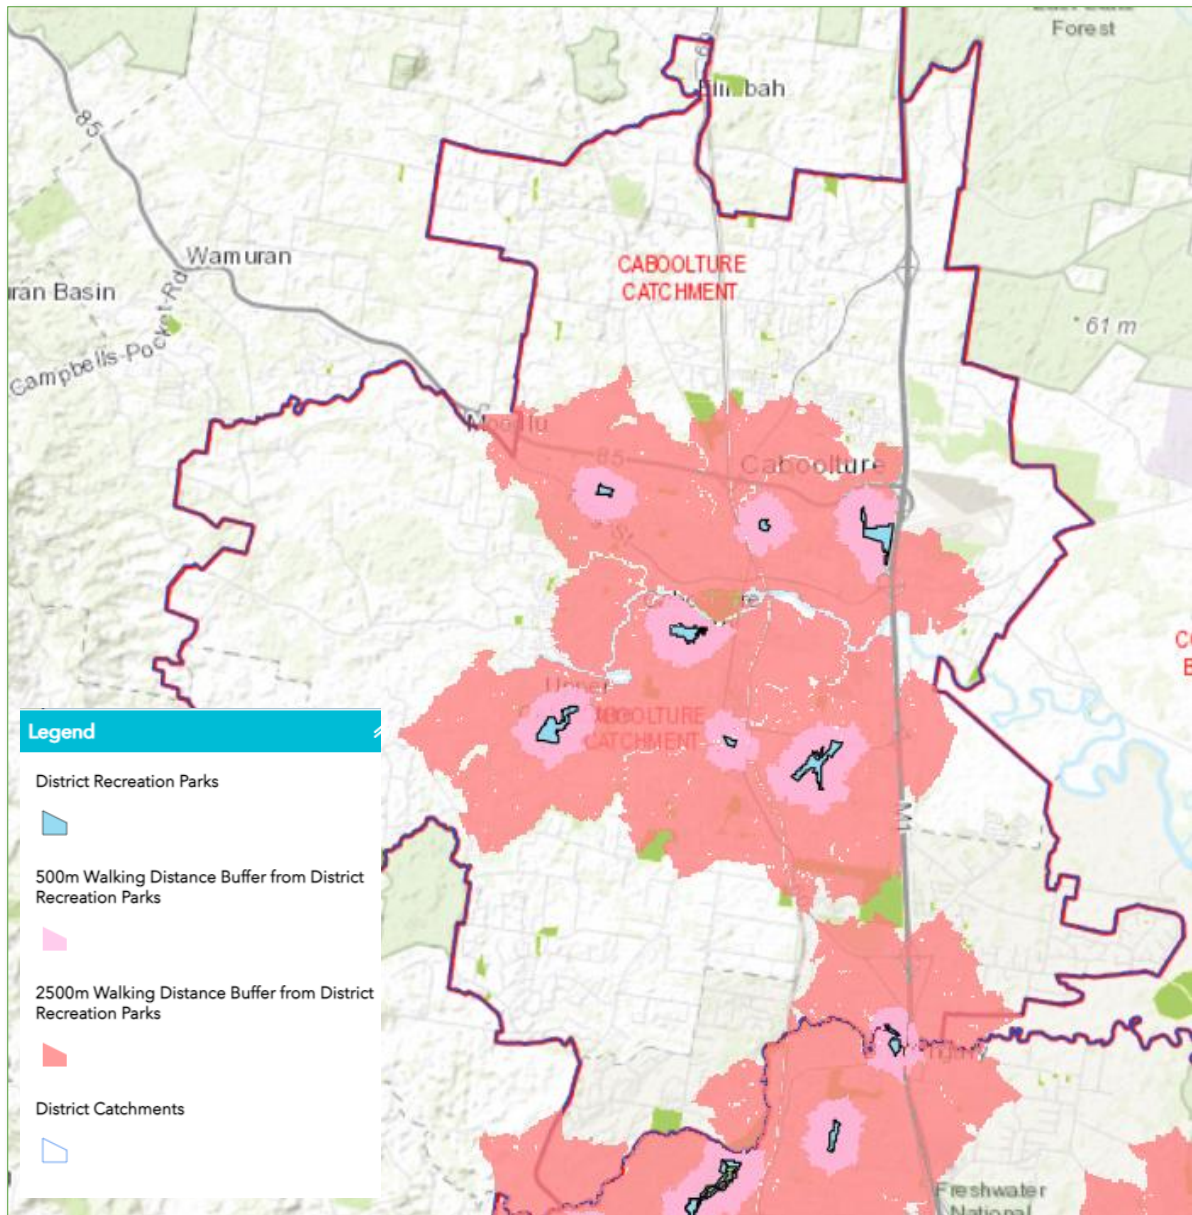

2.4 Caboolture District accessibility analysis

Map 5 identifies the areas within the 2.5km radius of the District Recreation parks. The 2.5km accessibility standard is stated in the Desired Standards of Service (DSS) for District Recreation parks and has been benchmarked to other Councils and areas in South East Queensland and beyond.

MAP 5 - CABOOLTURE DISTRICT CATCHMENT - ACCESSIBILITY ANALYSIS DISTRICT RECREATION PARKS

Map 5 demonstrates areas which are significantly disadvantaged in terms of the 2.5km radius to parks. Noting particularly areas of Caboolture North, Caboolture West and Caboolture South/Morayfield.

MAP 6 - CABOOLTURE DISTRICT RECREATION PARK ACCESSIBILITY

2.5 Caboolture district catchment analysis

The desired standards of service outline a target of 0.6 hectare of land for district recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target for the population assumptions (Table 6), is shown in Table 8. Table 8 demonstrates a deficit in 2021 of 0.6ha increasing to a deficit of 24.24ha by 2036.

TABLE 8 - CABOOLTURE DISTRICT LAND PROVISION ANALYSIS

Caboolture District Catchment	2016	2021	2026	2031	2036	Ultimate
Population	78,260	91,299	103,801	119,360	130,634	240,119
Supply needed to meet DSS (ha)	46.96	54.78	62.28	71.62	78.38	144.07
Current supply (ha)	54.14	54.14	54.14	54.14	54.14	54.14
Excess or shortfall analysis (ha)	7.18	-0.64	-8.14	-17.48	-24.24	-89.93

Caboolture district catchment has an existing deficit around 0.64 hectares in 2021 and projected deficit to 24.24 hectares in 2036.

2.6 Caboolture District recommendations for public parks solutions

The Urban Recreation Plan identified the issue of poor accessibility and area deficiency in the district recreation parks for the Caboolture catchment. Moving on from the urban recreation plan some of the solutions like the extension of Brodies Park North and development of Park Ridge Estate have occurred through LGIP1. Others have been revised as not feasible or ineffective because of other constraints (e.g. Platypus Creek Reserve)

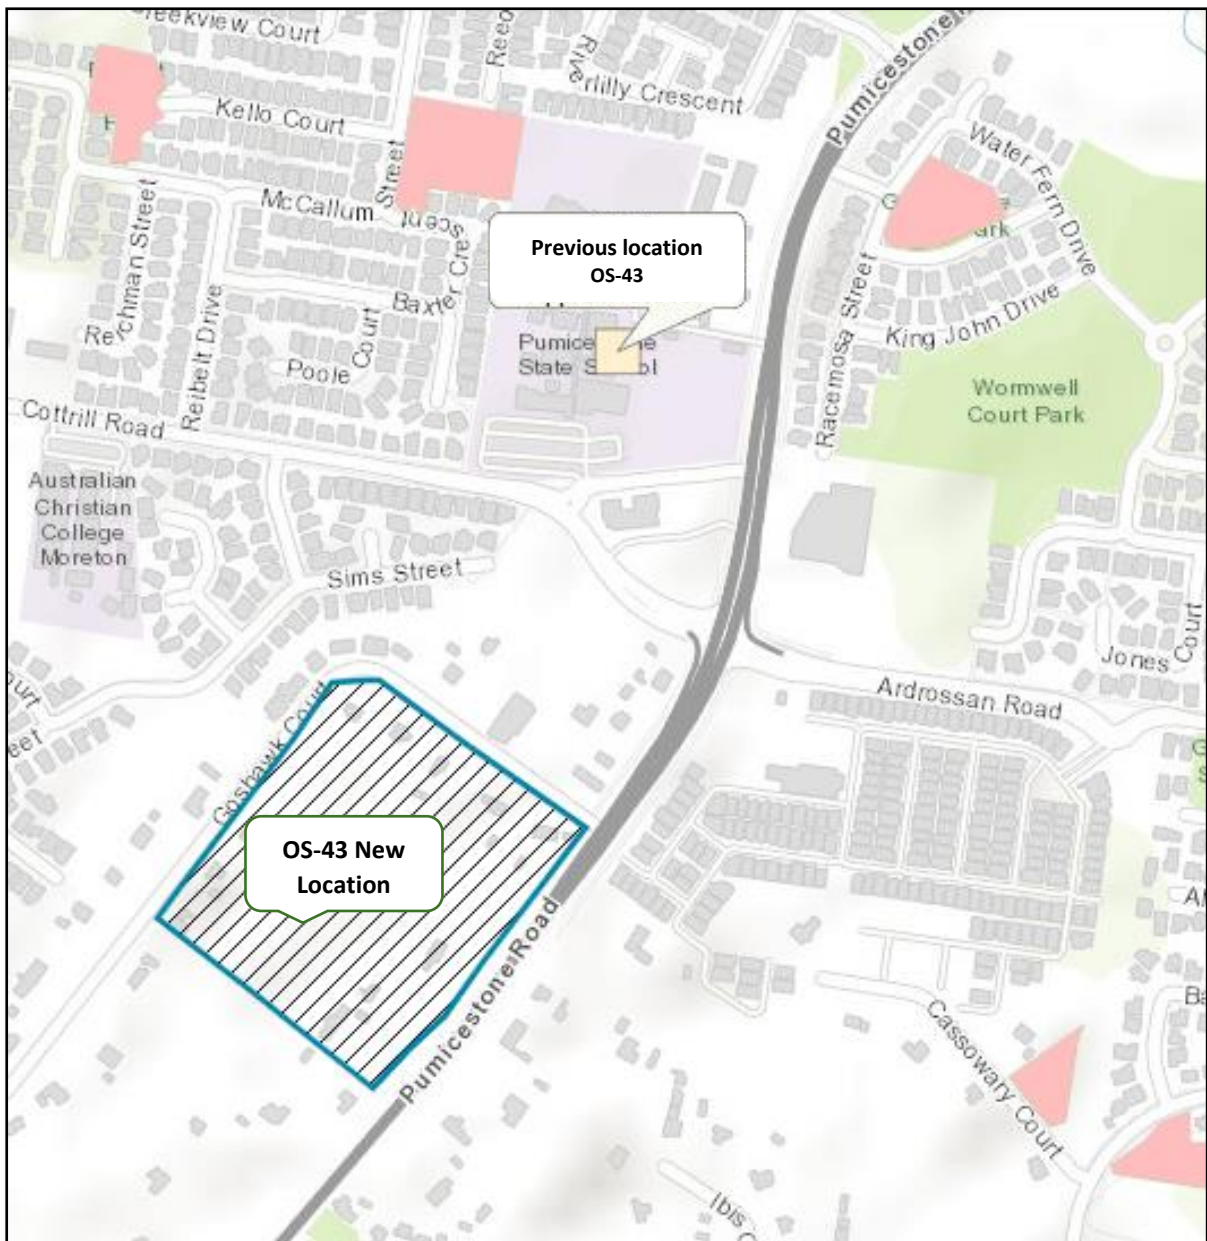

Three recommendations are made for district recreation parks in the Caboolture catchment, these are shown in Table 8. The approximate locations are shown in the Map 7, Map 8, and Map 9.

TABLE 9 - CABOOLTURE DISTRICT RECREATION SOLUTIONS TABLE

Reference	Park	Location	Type	Area in hectares
OS-43	Caboolture District Recreation	Pumicestone Road and Goshawk Court	Land (minimum 4 hectares) and Embellishment	4.00
OS-22	Caboolture South District Recreation	Waterside Esplanade	Land and embellishment (22.96 hectares)	22.96
OS-2226	Upper Caboolture - District Recreation	Riverbank Way	Upgrade to district recreation park	5.3
Total area (ha)				32.26

2.6.1 Pumicestone Road and Goshawk Court

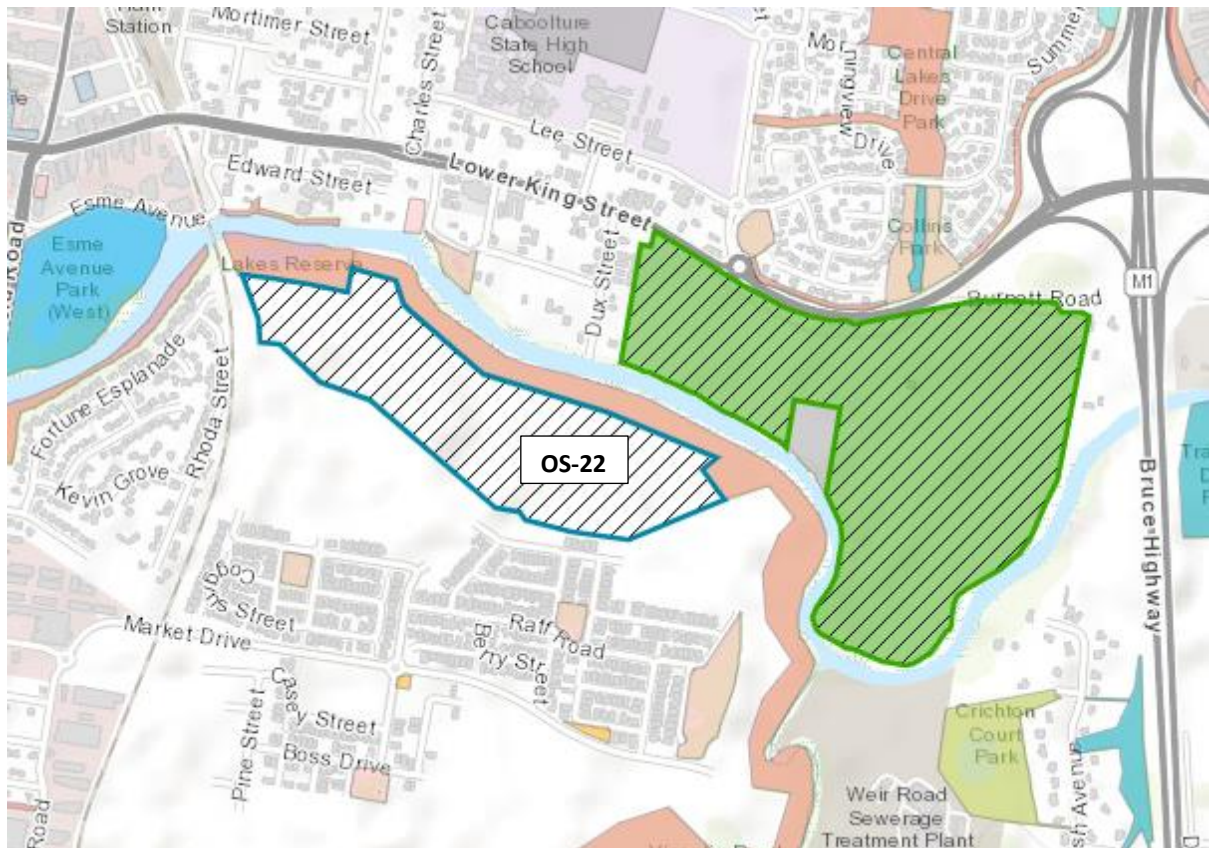

The northern portion of the Caboolture catchment is currently undergoing substantial development, set to increase in the short to medium-term. This part of the catchment has poor access to district level recreation spaces and therefore a new district recreation park is recommended adjacent Pumicestone Road (see Map 7), a district recreation park was identified in the 2017 LGIP - OS-43. This community is isolated from other district or regional level recreation opportunities and has a poor network of local level facilities. The original location (LGIP1) has moved to the south as the previous site was developed as a school. A new 4.0hectare district park (land and embellishment) is recommended, the land identified needs to be acquired and developed in the short-medium term to support the development of this community.

MAP 7 - CABOOLTURE NEW LOCATION FOR DISTRICT RECREATION PARK (OS-43)

2.6.2 Waterside Esplanade

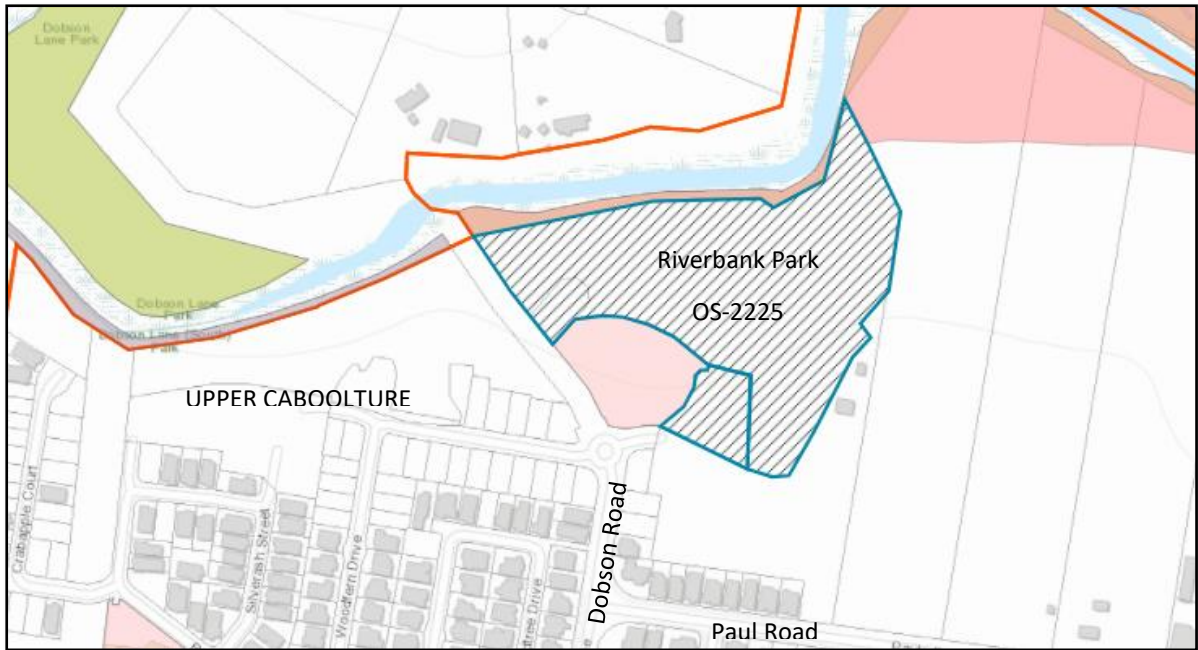

The Waterside esplanade future district park was identified in both the LGIP2017 and its predecessor the priority infrastructure plan (PIP). It is to be delivered within the context of the preliminary approval over the development area, this park will provide part of the linear park network along the riverbank and allow for embellishment to serve as a district recreation park.

MAP 8 - CABOOLTURE SOUTH LOCATION OF OS-22 DISTRICT RECREATION PARK

The continued population growth beyond 2036 will necessitate further development of district parks in future growth areas, like upper Caboolture. Map 9 shows the recommendation for an additional park at Dobson Lane. An existing local recreation park has been delivered to the west of the site and there is an area of land to be delivered as linear park along the river. This area has a deficit of embellished district recreation parks and the OS-46 upgrade to Parkridge Estate Park on Caboolture River Road previously has been investigated and is not as well suited or as cost effective as Dobson Lane Park for upgrade. Priority to shift to Dobson Lane park.

The recommendation is for addition of two lots to create a contiguous allotment and embellishment of existing parks to bring them to standard for District Recreation in the DSS.

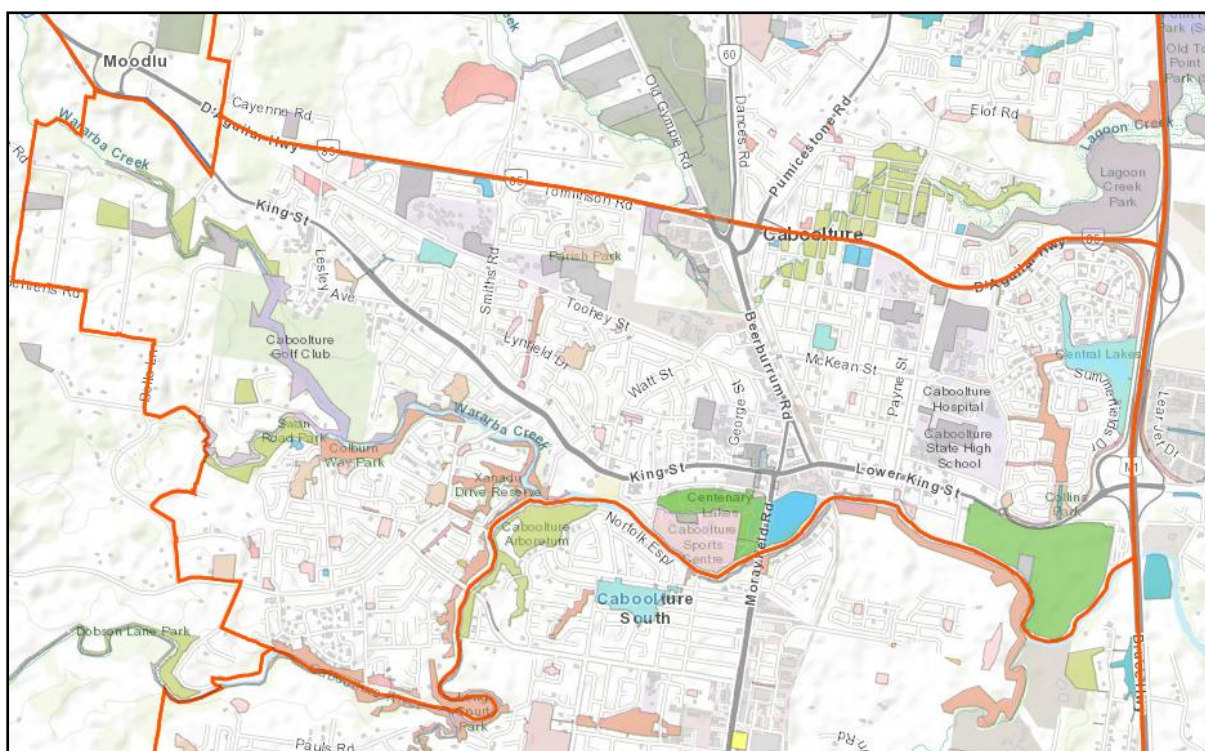

MAP 9 - CABOOLTURE SOUTH RIVERBANK PARK DOBSON LANE - UPGRADE TO DISTRICT PARK

3 Local Catchment - Caboolture Central

3.1 Caboolture Central profile summary

The Caboolture Central local area is situated between the suburbs of Caboolture North, Caboolture East, Caboolture South/Morayfield and Caboolture West. It is bordered by the Bruce Highway and connected to the train line by Caboolture Station see Map 10. The Caboolture Central local area consists of a mix of residential, commercial and industrial land uses. It is one of the main centres for employment in the Moreton Bay Region. Caboolture Central is expected to experience significant change in the future as it is within the Caboolture-Morayfield Principal Activity Centre.

Some of the major features in Caboolture Central include the Caboolture CBD, Caboolture Hub, Caboolture Park Shopping Centre, Caboolture Hospital, Caboolture Private Hospital, Brisbane North Institute of TAFE (Caboolture Campus), Queensland University of Technology (Caboolture Campus), Caboolture Sports Centre, Centenary Lakes Park, Centenary Lakes Function Centre, Old Fire Station Gallery, William G Buckle Heritage Reserve, Caboolture Golf Club and Caboolture Swimming Pool.

MAP 10 CABOOLTURE CENTRAL - LOCAL CATCHMENT BOUNDARY

The population assumptions for the local Caboolture Central catchment are shown in Table 10.

CABOOLTURE CENTRAL	2016	2021	2026	2031	2036	Ultimate population
Population	22,346	22,583	23,345	25,229	28,432	34,487
Growth over previous 5 years	1,291	237	762	1,885	3,202	3,945
Growth over 5-year interval	6.1%	1.1%	3.4%	8.1%	12.7%	12.9%

A detailed map of the Caboolture Station area. The map shows a proposed rail alignment (black line with orange dashed center) running from the top left towards the bottom right. A green dashed line runs parallel to the rail alignment. The map is color-coded: red for urban areas, yellow for rural areas, blue for water bodies, and green for parks. The word 'RURAL' is written in red in the top left. Three station locations are marked with train icons: 'Proposed Station' at the top, 'Caboolture Station' in the center, and 'Proposed Station' at the bottom. The map also shows various roads and land parcels.

3.3 Caboolture Central current supply of Local Recreation parks

Page | 21

Lions Park (Caboolture)	Morayfield Road	CABOOLTURE	1,188m ²
Total supply of local recreation parks in Caboolture Central			307,894m ²

The following district parks (Table 12) are also located within the Central Caboolture catchment. They add amenity to the local catchment while supporting the broader district in terms of district parks both recreational and sports.

TABLE 12 - DISTRICT PARKS IN CENTRAL CABOOLTURE CATCHMENT

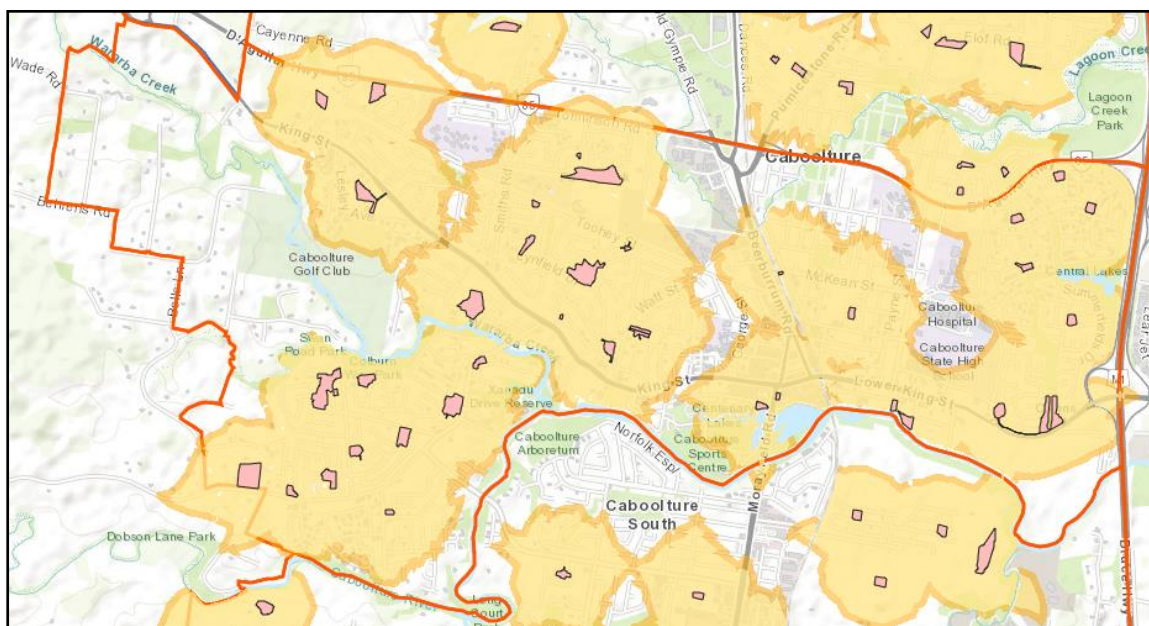

Park name	Type	Location	Suburb	Area m ²
Bluebell Street Park	District Recreation	Honeysuckle Street	Caboolture	27,499 m ²
Wallace Street Park	District Recreation	Wallace Street North	Caboolture	20,031 m ²
Summerfields Drive Park	District Recreation	Joyner Circuit	Caboolture	143,847 m ²
Caboolture Sports Complex	District Sports	Riverview Street	Caboolture	159,547 m ²

The following regional parks (Table 13) are located within the Central Caboolture catchment, further supporting this catchment in terms of amenity and access to parks.

TABLE 13 - REGIONAL RECREATION PARKS CENTRAL CABOOLTURE

Park name	Location	Suburb	Area m ²
Centenary Lakes	Elliott Street	Caboolture	117,574 m ²
94 Lower King Street, Caboolture	Lower King Street	Caboolture	432,717 m ²
Apex Park (Caboolture)	Morayfield Road	Caboolture	14,042 m ²

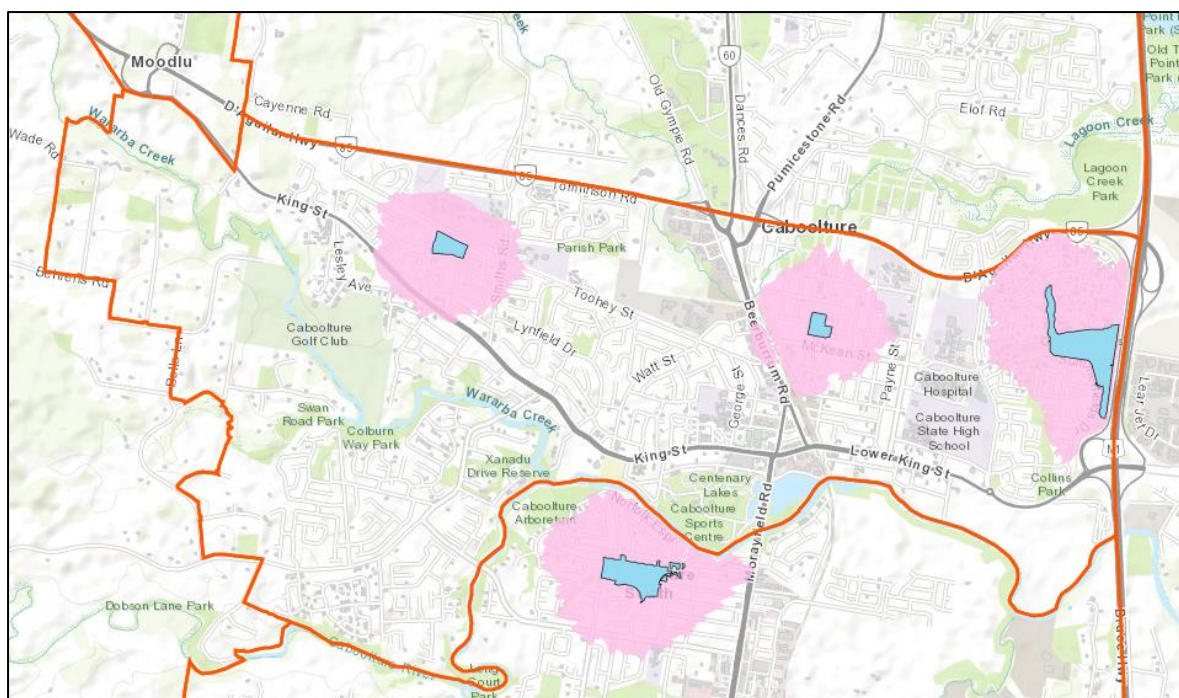

3.4 Caboolture Central accessibility analysis

MAP 12 - ACCESSIBILITY TO LOCAL PARKS CABOOLTURE CENTRAL

The accessibility layer shows walkability to local recreation parks at a range of 500m and 600m respectively. Benchmarking of south east Queensland and other Australian cities along with best practice research identified that walking is one of the most popular forms of exercise for the Australian community(ref). It further revealed that people are willing to walk (a true walkability) of between 500m and 800m to a local park (ref). a walkability analysis looking at 500m and 600m was used across the region for each local catchment to consider local accessibility to local level parks. This analysis demonstrated that where streets were relatively permeable 500m walkability is a very similar coverage to 400m radius which is the standard established in the State government guidelines. The walkability analysis highlighted the barriers which interfere with permeability and accessibility gaps within the network. The Map 12 above highlights several areas of gap in provision based on accessibility and the pattern of park coverage. Map 13 highlights the accessibility of district parks at 500m and 2500m. In some instances, District recreation parks will support the local area needs and fill in the accessibility gap.

On the eastern side of the railway the gaps in the network tend to be large institutional sites like the Hospital, Schools, and TAFE. Removing schools and areas covered by district park accessibility leaves a much smaller proportion of homes with accessibility beyond 600m walkability.

MAP 13 - ACCESSIBILITY WITH DISTRICT LAYER

3.5 Caboolture Central catchment analysis

The desired standards of service outline a target of 1 hectare of land for local recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 14, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 10 above.

TABLE 14 - LAND PROVISION ANALYSIS

CABOOLTURE CENTRAL	2016	2021	2026	2031	2036	Ultimate Population
Population Projection	22,346	22,583	23,345	25,229	28,432	34,487
Demand for local recreation (ha)	22.35ha	22.58ha	23.34ha	25.23ha	28.43ha	34.49ha
Current Supply (ha)	30.8ha	30.8ha	30.8ha	30.8ha	30.8ha	30.8ha
Surplus or deficit (ha)	8.4	8.2	7.4	5.6	2.4	-3.7

3.6 Caboolture District recommendations for public park solutions

Table 15 lists the recommended items for additional parks and upgrades within the Caboolture Central Local Catchment. They include eight items:

- Two district recreation parks,
- One district sports park
- Three local recreation parks and
- One regional park

TABLE 15 - PARK RECOMMENDATIONS FOR CABOOLTURE CENTRAL LOCAL CATCHMENT

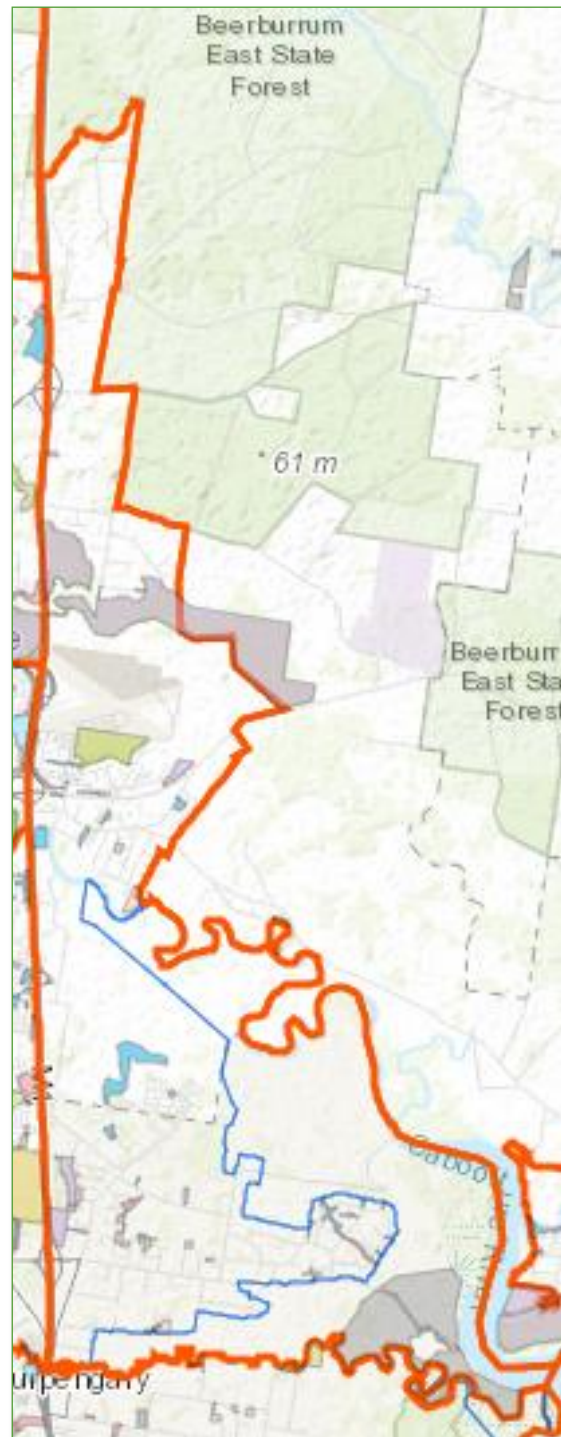

Reference no.	Park	Park Classification	Solution
OS-04	Caboolture Sports Centre	District Sports	Upgrade
OS-43	Caboolture District Recreation - Goshawk District Recreation Park	District Recreation	New land & embellishment
OS-59	94 Lower King St, Caboolture	Regional Recreation	Upgrade
OS-149	Bernice Street Park	Local Recreation	Upgrade
OS-2212	Lesley Avenue Park Extension	Local Recreation	New land & embellishment
OS-2213	Verona Court Park	Local Recreation	New land & embellishment
OS-2214	Wilson Street Park	Local Recreation	New land & embellishment
OS-2227	Caboolture District Recreation - Goshawk District Recreation Park	District Recreation	New land & embellishment

4 Local Catchment - Caboolture East - Local Recreation Analysis

4.1 Caboolture East Profile Summary

The Caboolture East local area contains the area of Caboolture, east of the Bruce Highway. The area is situated between the suburbs of Elimbah in the north, the coastal lowlands to the east, Morayfield and Beachmere to the south and Caboolture CBD and Caboolture North to the west see Map 14. More specifically the Caboolture East local area is bordered by Six Mile Creek in the north, Beerburrum East State Forest in the east, Burpengary Creek and Fountain Road in the south and the Bruce Highway in the west. The Caboolture East local area contains rural and rural residential areas as well as dispersed industrial areas.

The local area is generally rural in nature with industry and employment opportunities spread along the eastern side of the Bruce Highway. Major features of the area include Beerburrum East State Forest, the Caboolture River, Caboolture Airfield, Caboolture Indoor Sports Centre, Caboolture Warplane Museum and Tea Tree Swamp Lagoon.

MAP 14 - CABOOLTURE EAST LOCAL CATCHMENT

4.2 Caboolture East Population growth assumptions

The population assumptions for this local catchment are shown in Table 16.

TABLE 16 - CABOOLTURE EAST LOCAL CATCHMENT POPULATION ASSUMPTIONS

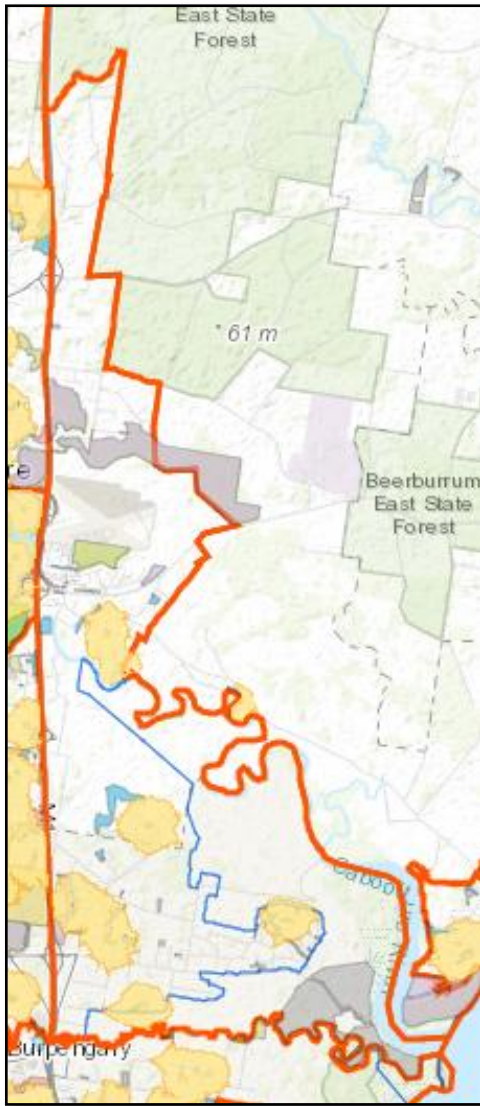

CABOOLTURE EAST	2016	2021	2026	2031	2036	Ultimate
Population	5,247	8,005	9,673	9,767	9,835	10,284
Five-year catchment growth		2759	1668	94	68	5,037 Growth from 2016

4.3 Caboolture East Current supply of Local Recreation Parks

The existing supply of local recreation parks within this local catchment are shown in Table 17.

TABLE 17 - CURRENT SUPPLY OF LOCAL RECREATION PARKS

Park name	Park address	Land area (ha)
Van Der Meer Drive Park	1 Van Der Meer Drive Burpengary East	1.85ha
Lewins Place Park	2 Lewins Place Burpengary East	2.33ha
Montrose Court Park	17 Montrose Court Burpengary East	0.34ha
Cammack Street Park	23 Cammack Street Burpengary East	0.72ha
Lawrence Street Park	51 Lawrence Street Caboolture	4.10ha
Henry Bishop Park	18 Ann-Maree Drive Caboolture	1.06ha
Nectar Way Park	31 Nectar Way Burpengary East	8.71ha
Total land area		19.12ha

MAP 15 - ACCESSIBILITY ANALYSIS CABOOLTURE EAST

4.4 Caboolture East Accessibility analysis

The industrial and rural nature of this catchments means that there are few local recreation parks in the catchment. The continued land use pattern within the structure plan means the area is not proposed to have residential development. With this zoning no future parks are required to meet demand.

4.5 Catchment analysis

The desired standards of service outline a target of 1 hectare of land for local recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 18 as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 16 above.

TABLE 18 - LAND PROVISION ANALYSIS

CABOOLTURE EAST	2016	2021	2026	2031	2036	Ultimate
Population	5,247	8,005	9,673	9,767	9,835	10,284
Demand (ha)	5.2	8.0	9.7	9.8	9.8	10.3
Supply (ha)	19.12	19.12	19.12	19.12	19.12	19.12
Balance (ha)	13.873	11.115	9.447	9.353	9.285	8.836

4.6 Recommendations for public parks solutions Caboolture East

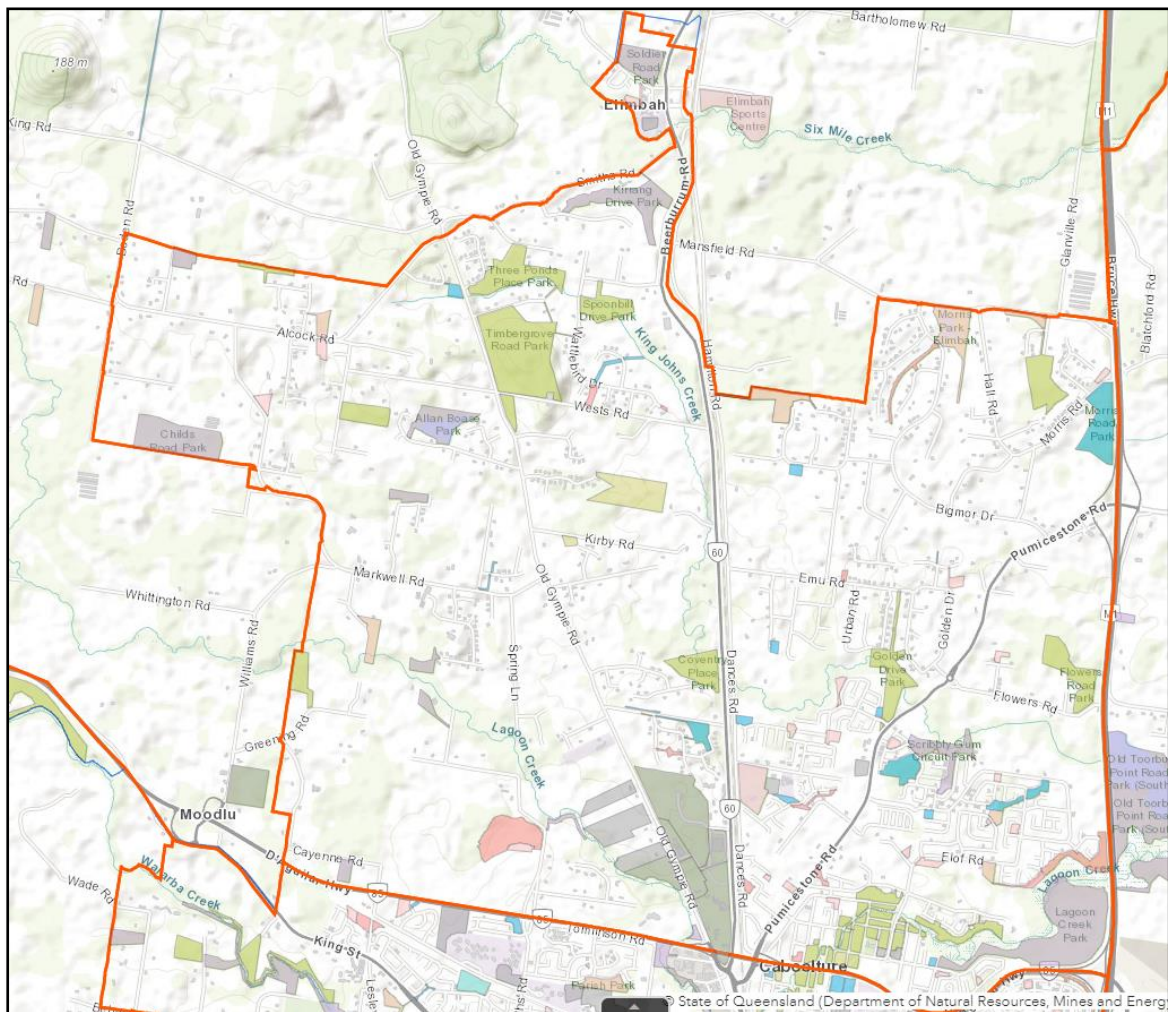

No additional public parks (LGIP items) required for Caboolture East based on current projections and analysis.

5 Local Catchment - Caboolture North - Local Recreation Analysis

5.1 Caboolture North Profile Summary

The Caboolture North local area contains parts of the localities of Caboolture West, Caboolture East and Elimbah shown in Map 16. The northern section of the local area contains rural and rural residential land uses whilst the south contains more suburban housing. The Caboolture North local area is bound by Six Mile Creek in the north, the Bruce Highway in the east, the D'Aguiar Highway in the south and the localities of Moodlu and Wamuran in the west.

Some of the major features of the area include the Caboolture Showground, Dances Road Sportsground, Alexander Barr Sporting Complex, Queensland State Equestrian Centre, Caboolture Historical Village and several schools.

MAP 16 - CABOOLTURE NORTH CATCHMENT BOUNDARY

5.2 Caboolture North population growth assumptions

The population assumptions for the Caboolture North local catchment are shown in Map 19.

TABLE 19 - LOCAL POPULATION ASSUMPTIONS - CABOOLTURE NORTH

CABOOLTURE CENTRAL	2016	2021	2026	2031	2036	Ultimate
Population	13,202	16,114	19,050	22,778	24,330	27,556
Population growth 5-year interval		2,912	2,937	3,728	1,552	14,355 2016 to Ultimate
Percentage Growth 5-year interval		22%	18%	20%	7%	109%

5.3 Caboolture North current supply of Local Recreation parks

The existing supply of local recreation parks within Caboolture North local catchment are shown in Table 20.

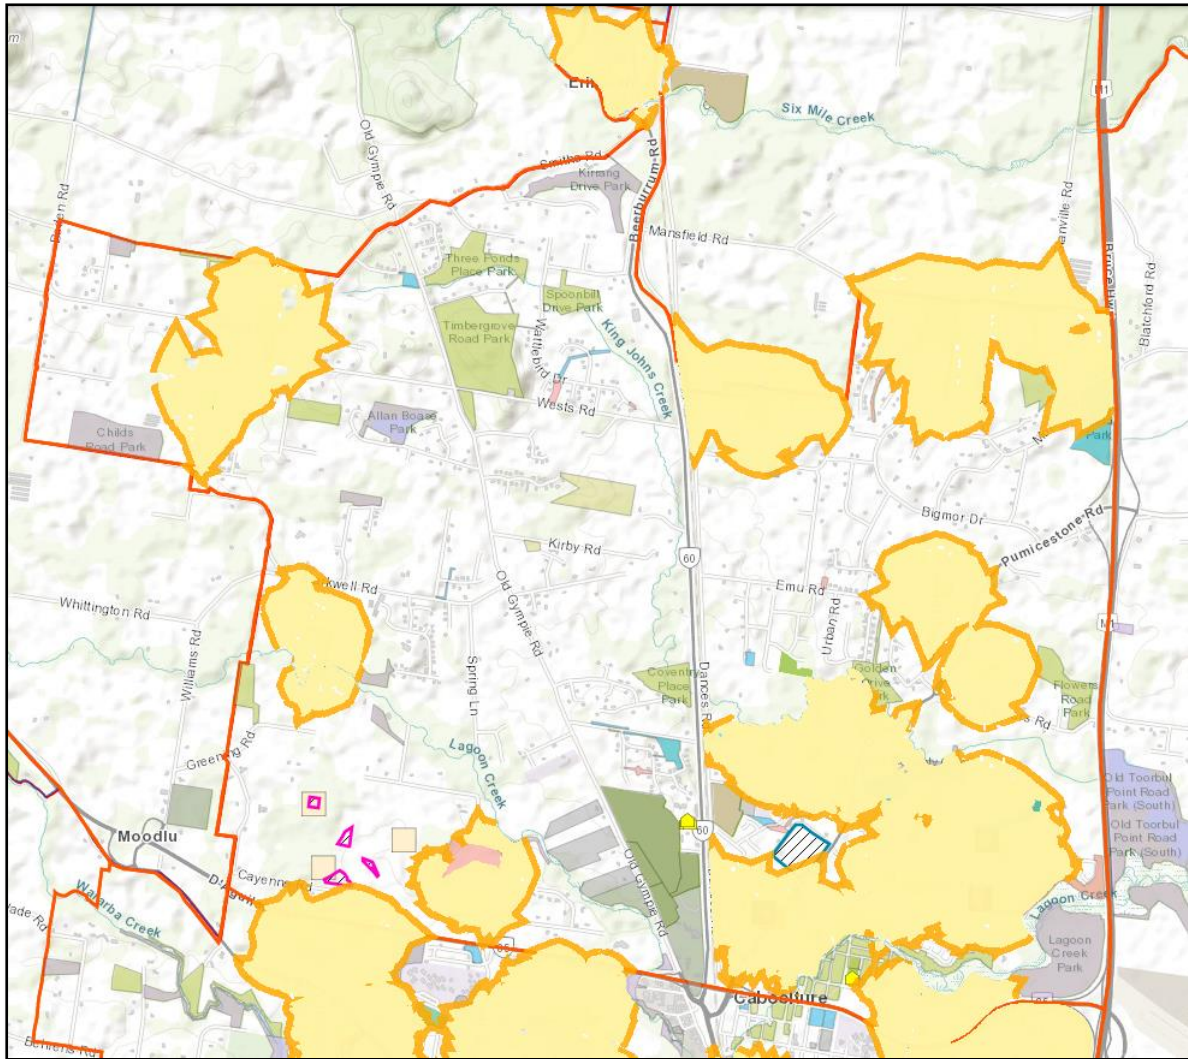

TABLE 20 - CURRENT SUPPLY OF LOCAL RECREATION PARKS WITHIN CABOOLTURE NORTH

Park	Type of Park	Address	Suburb	Area (m ²)

5.4 Caboolture North accessibility analysis

Map 18 shows the walkability to local recreation parks in the Caboolture North Catchment. It is noted that there are large areas within this catchment that are zoned rural residential (see Map 18). There are also several parks within the catchment that are not classified as trunk parks, like Timbergrove Road which is a natural bushland park.

MAP 17 CABOOLTURE NORTH ACCESSIBILITY ANALYSIS

MAP 18 - ZONES IN CABOOLTURE NORTH LOCAL CATCHMENT

5.5 Caboolture North catchment analysis

The desired standards of service outline a target of 1 hectare of land for local recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 21, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 19 above.

TABLE 21 - LAND PROVISION ANALYSIS CABOOLTURE NORTH

Caboolture North	2016	2021	2026	2031	2036	Ultimate
Population	13,202	16,114	19,050	22,778	24,330	27,556
Area of local recreation parks (ha)	11.33ha	11.33ha	11.33ha	11.33ha	11.33ha	11.33ha

OS-128	Upper Caboolture Local Recreation	Local Park	New Land & Embellishments
OS-134	Caboolture Local Recreation	Local Park	New Land & Embellishments
OS-135	Caboolture Local Recreation	Local Park	New Land & Embellishments

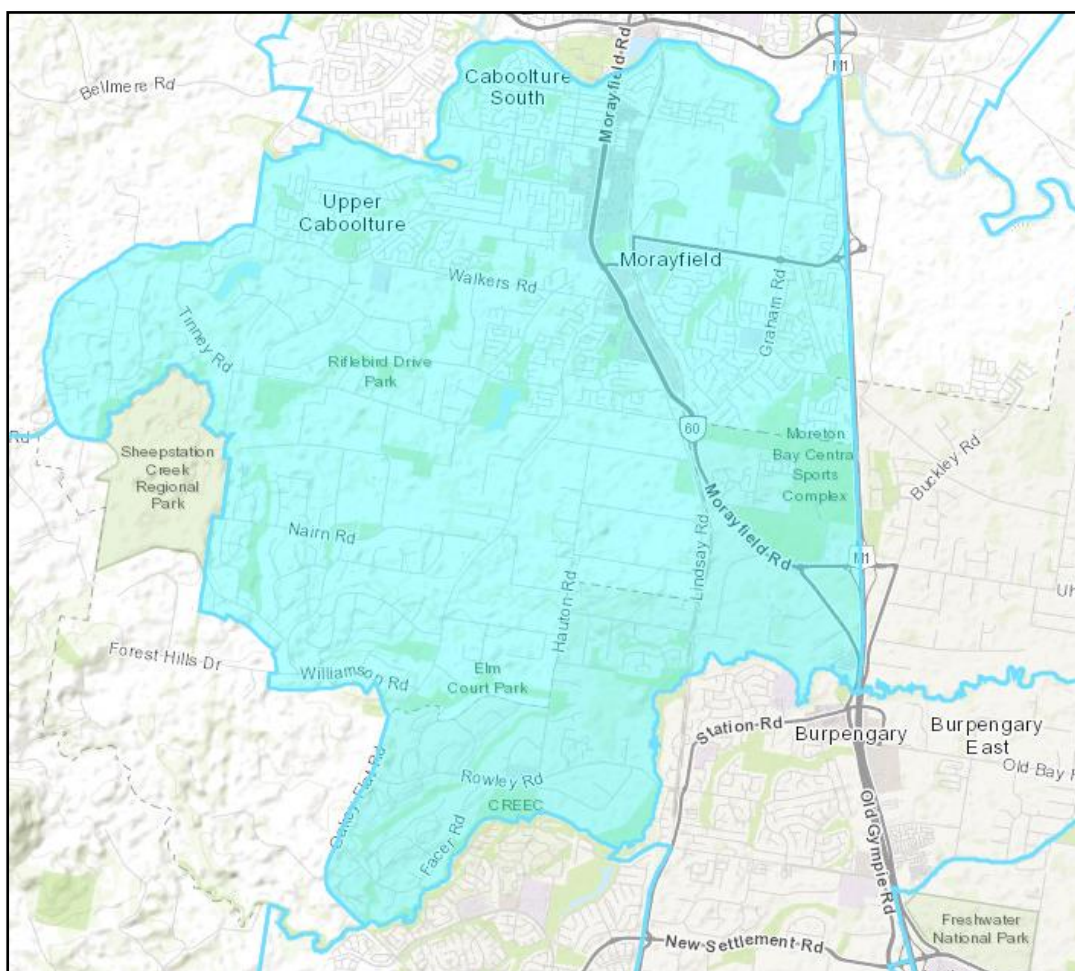

MAP 19 - RECOMMENDATIONS FOR PARKS IN CABOOLTURE NORTH

6 Local Catchment - Caboolture South / Morayfield - Local Recreation Analysis

6.1 Caboolture South - Morayfield Profile Summary

The Caboolture South - Morayfield local area includes the suburbs of Caboolture South and Morayfield and parts of Burpengary and Upper Caboolture, see Map 20 - Local Catchment Caboolture South - Morayfield. The local area is predominantly mixed use including residential, commercial and industrial land uses as well as rural areas. The Caboolture South - Morayfield local area is bordered by Caboolture River in the north, the Bruce Highway in the east, Burpengary Creek in the south and Caboolture River Road in the west.

The local area includes a range of land uses focused around the region's Principal Activity Centre. Some of the major features in the local area include the Market Plaza Shopping Centre, Morayfield Shopping Centre, Caboolture Botanic Gardens, Platypus Creek Environmental Park, Grant Road Sports Complex, Caboolture Cougars Hockey Club, Caboolture Rugby Union Club as well as several shopping centres and schools.

MAP 20 - LOCAL CATCHMENT CABOOLTURE SOUTH - MORAYFIELD

6.2 Caboolture South - Morayfield Population growth assumptions

The population assumptions for this local catchment are shown in Table 23 - Caboolture South - Morayfield Local Catchment Population Assumptions.

TABLE 23 - CABOOLTURE SOUTH - MORAYFIELD LOCAL CATCHMENT POPULATION ASSUMPTIONS

CABOOLTURE SOUTH / MORAYFIELD	2016	2021	2026	2031	2036	Ultimate
Population	36,568	43,763	50,697	55,440	59,236	97,448
Population growth over 5-year period	3,503	7,196	6,934	4,743	3,796	60,881
% growth over 5-year period		2016-2021 20%	2021-2026 16%	2026-2031 9%	2031-2036 7%	Total growth from 2016 to ultimate 166.5%

6.3 Caboolture South - Morayfield current supply of Local Recreation parks

The existing supply of local recreation parks within this local catchment are shown in Table 24 - Caboolture South Morayfield - Current Local Recreation.

TABLE 24 - CABOOLTURE SOUTH MORAYFIELD - CURRENT LOCAL RECREATION PARKS

Park Name	Type of Park	Address	Suburb	Area m2

TABLE 25 - CABOOLTURE SOUTH - MORAYFIELD TOTAL PARK AREAS

Park type	Area
Local Recreation	46.40ha
Local Civic	1.08ha
Local Sports	8.81ha

6.4 Caboolture South - Morayfield accessibility analysis

Map 21 highlights the accessibility of Caboolture South/Morayfield catchment. Noting that the area to the south and west are not within the PIA. These areas are typically rural residential areas. There is a notable gap which is labelled 1 in Map 21.

MAP 21 - CABOOLTURE SOUTH - MORAYFIELD ACCESSIBILITY TO LOCAL RECREATION PARKS

6.5 Caboolture South - Morayfield catchment analysis

The desired standards of service outline a target of 1 hectare of land for local recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 26, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 23 above.

TABLE 26 - CABOOLTURE SOUTH - MORAYFIELD LAND PROVISION ANALYSIS

CABOOLTURE SOUTH - MORAYFIELD	2016	2021	2026	2031	2036	Ultimate Population
Population	36,568	43,763	50,697	55,440	59,236	97,448
Area of local rec	46.4	46.4	46.4	46.4	46.4	46.4
required local rec area	36.57	43.76	50.70	55.44	59.24	97.45
over or under supply	9.83	2.64	-4.3	-9.04	-12.84	-51.05

The catchment analysis indicates that by the year 2036 Caboolture South and Morayfield will require a further 12.84 ha of local recreation parks. Much of this is to be delivered in through future development applications as areas are developed but several LGIP items need to be included to provide an adequate supply moving forward.

6.6 Caboolture District Recommendations for public parks

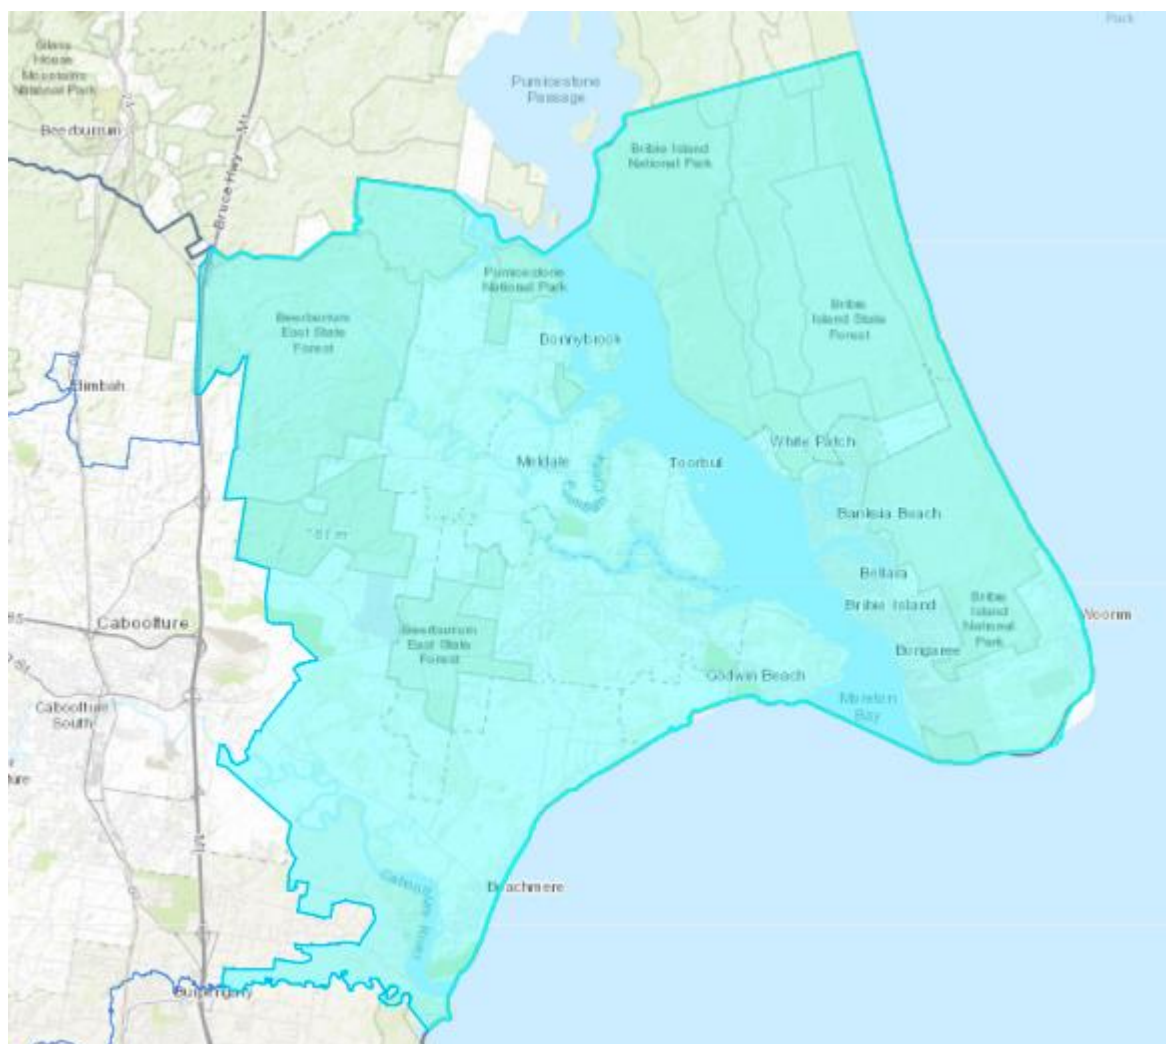

The following table (Table 27) public park solutions are recommended for LGIP2 for all levels of parks in the Caboolture South Morayfield local catchment.

TABLE 27 - CABOOLTURE DISTRICT PUBLIC PARK SOLUTIONS

Reference	Park Name	Park Type	Solution	Suburb
OS-05	Brodis Park (North)	District Park	Upgrade Embellishments	Morayfield

COASTAL COMMUNITIES BRIBIE ISLAND

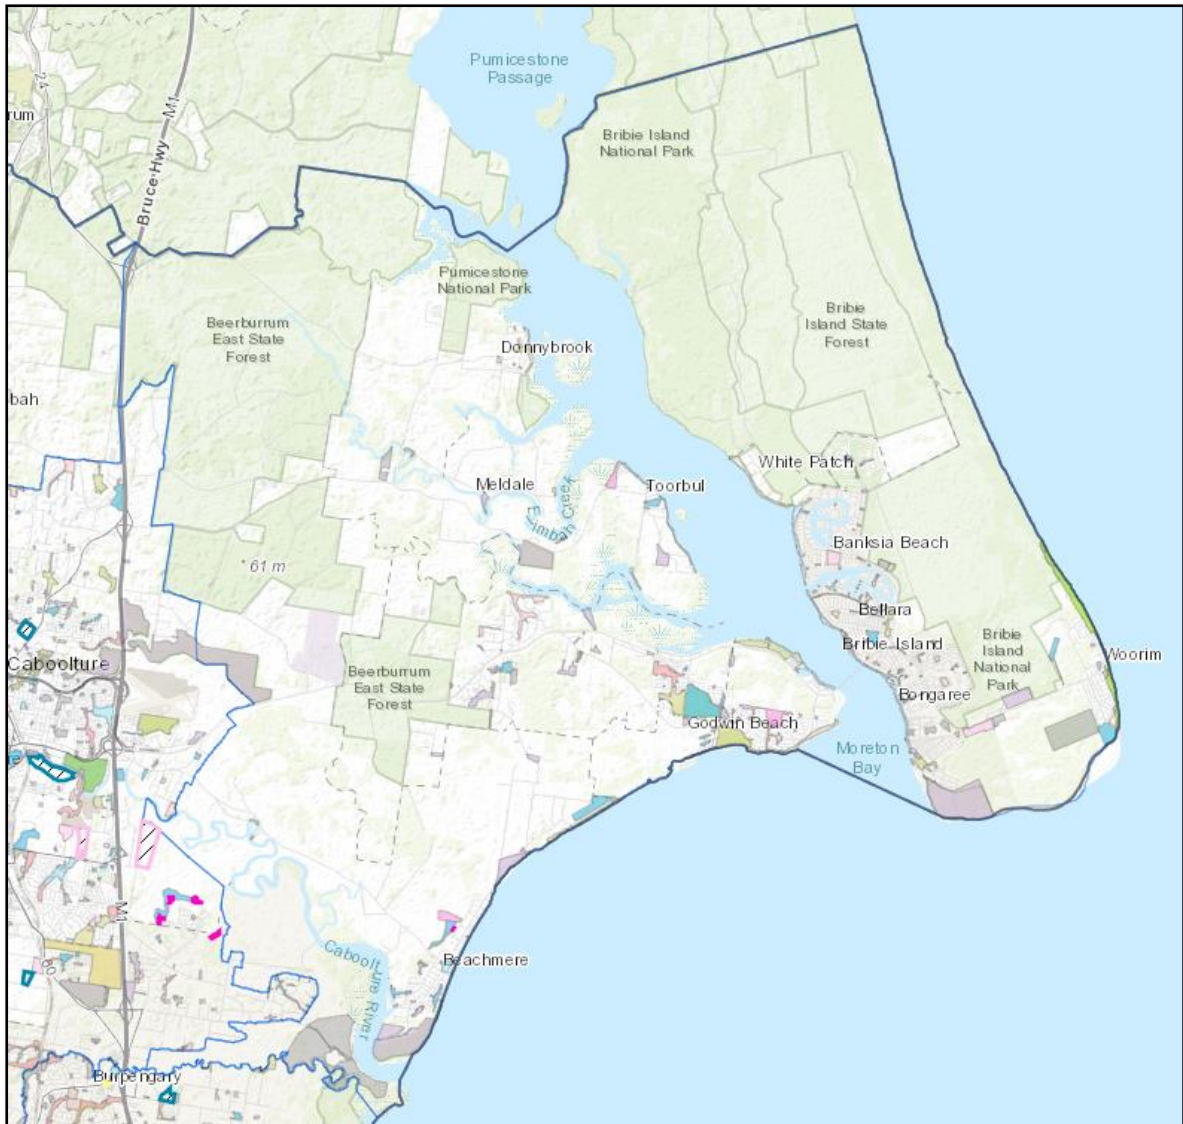

7 District Catchment - Coastal Communities and Bribie Island District Recreation Analysis

7.1 Coastal Communities and Bribie Island Profile Summary

The Coastal Communities and Bribie Island district forms the north-eastern boundary of the Moreton Bay Region. The district includes a range of coastal, rural, rural residential and suburban communities, natural features including the wetlands and aquatic habitats of the Pumicestone Passage and the coastal foreshores of Bribie Island, Godwin Beach, Sandstone Point, Ningi, Toorbul, Meldale, Donnybrook and Beachmere (see Map 22).

In the next 20 years little change is expected due to planning challenges associated with coastal hazard and the proximity to the Moreton Bay Marine Park and the iconic Pumicestone Passage.

MAP 22 - COASTAL COMMUNITIES AND BRIBIE ISLAND DISTRICT CATCHMENT BOUNDARY

7.2 Coastal Communities and Bribie Island population growth assumptions

The population assumptions for this district catchment are shown in Table 24 with a total growth of 9,289 residents from 2016 to 2036 which is a total growth of 26% over 15 years. Growth to ultimate is then assumed to be 1,918 or the remaining, final 4% of the district's capacity.

TABLE 28 - COASTAL COMMUNITIES AND BRIBIE ISLAND DISTRICT CATCHMENT POPULATION ASSUMPTIONS

Coastal Communities and Bribie Island	2016	2021	2026	2031	2036	Ultimate
Population	35,532	38,652	42,440	43,987	44,821	46,739
Population increase in five-year period		3,120	3,788	1,547	834	1,918
Moreton Bay Region Population	439,224	485,398	529,736	574,770	614,908	814,966
Percentage of Moreton Bay Region Population	8%	8%	8%	8%	7%	6%

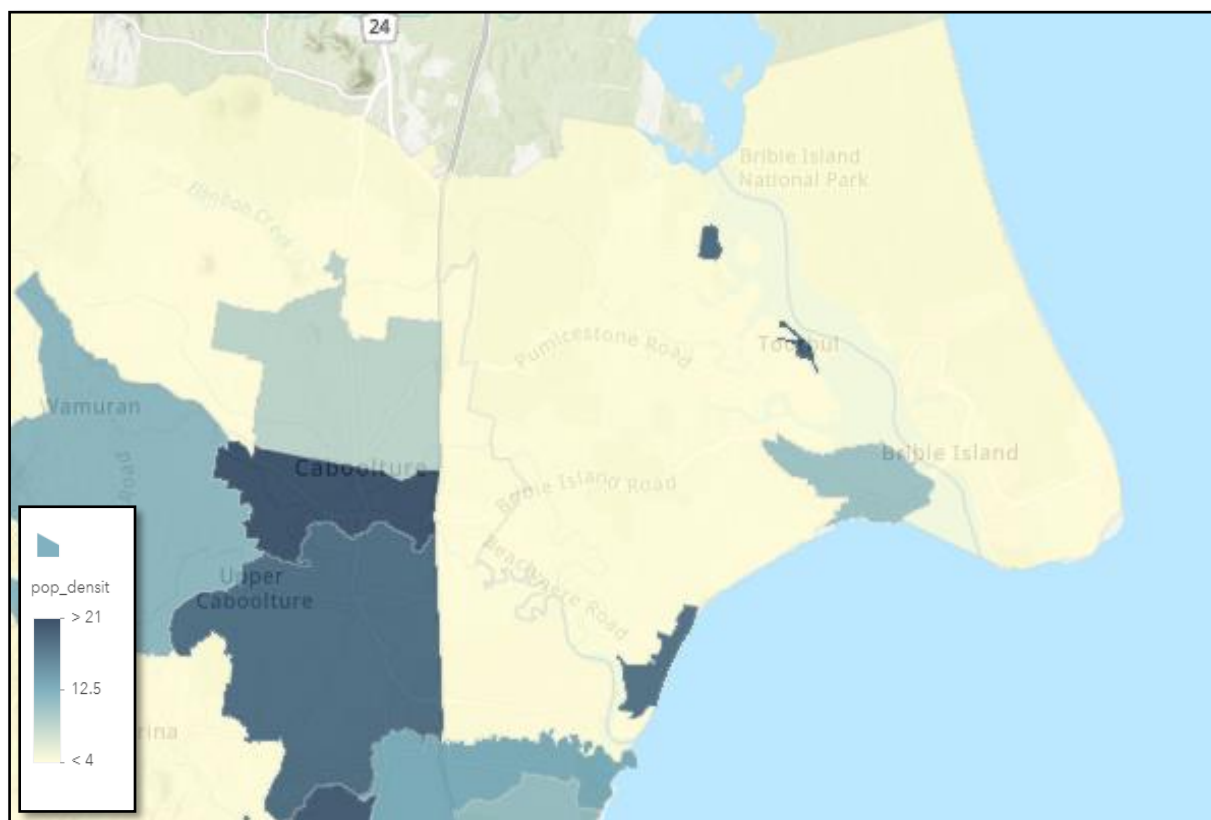

Source: The planning assumption for the region are based on the LGIP2 Assumptions (version 2.0 October 2019)

Table 29 shows the population broken down further into local areas. Featuring the higher population areas of Bribie Island and Sandstone point.

TABLE 29 - POPULATION BREAKDOWN - LOCAL AREAS WITHIN THE COASTAL COMMUNITIES AND BRIBIE ISLAND DISTRICT

Bribie and Coastal Lowlands Local Catchments	Population					
	2016	2021	2026	2031	2036	Ultimate
BEACHMERE	3,931	4,274	5,232	5,517	5,693	5,849
BRIBIE ISLAND	19,307	20,896	22,460	23,031	23,205	24,447
COASTAL LOWLANDS	3,797	3,918	3,989	4,247	4,332	4,496
DONNYBROOK	694	759	891	1,024	1,109	1,213
SANDSTONE / NINGI	6,864	7,833	8,503	8,791	9,092	9,324
TOORBUL	846	861	878	892	906	923

NB. local catchments mainly fall within the overall District catchment however there may be slight discrepancy of local catchment boundaries to District impacting total population.

MAP 23 - COASTAL COMMUNITIES AND BRIBIE ISLAND POPULATION DENSITY AT ULTIMATE

7.3 Coastal Communities and Bribie Island current supply of district level parks - foreshore, recreation and sports

The existing supply of District Recreation parks within this catchment are shown in Table 30. Refer to map of existing parks for locations. There is a total of 64.7ha of district level parks in the Coastal Communities and Bribie Island catchment, the breakdown of these parks is shown in Table 31.

TABLE 30 - COASTAL COMMUNITIES AND BRIBIE ISLAND TOTAL AREA OF PARKS BY TYPE

District Level Parks	Area in hectares
District Foreshore	35.65 ha
District Recreation	6.55 ha
Total Foreshore and Recreation	42.20
District Sports	22.51 ha
Total	64.72ha

Bribie Island Sports Complex	First Avenue	BONGAREE	134,478
Total Area			647,201 m2 64.7ha

7.4 Coastal Communities and Bribie Island accessibility analysis

When considering accessibility with the Coastal communities and Bribie Island the foreshore parks play a significant role in meeting the recreation needs of the community. Most areas are within easy access of foreshore parks although many of these are under embellished in terms of the Desired Standard of Service.

There are limited areas for future development within this catchment. No further land is required for district recreation parks based on current projections.

MAP 24 - ACCESS TO DISTRICT RECREATION PARKS - COASTAL COMMUNITIES AND BRIBIE ISLAND

The desired standards of service outline a target of 0.6 hectare of land for district recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 32, for the Coastal Communities Bribie Island it shows sufficient land area for parks to population ratio, based on the planning assumptions shown in Table 28.

Coastal Communities and Bribie Island	2016	2021	2026	2031	2036	Ultimate
Population	35,532	38,652	42,440	43,987	44,821	46,739
Supply needed to meet DSS (ha)	21.32	23.19	25.46	26.39	26.89	28.04
Current supply (ha)	42.2	42.2	42.2	42.2	42.2	42.2
Balance analysis (ha)	20.88	19.01	16.74	15.81	15.31	14.16

7.6 Coastal Communities and Bribie Island- Recommendations for public parks solutions -

No additional land is required for district recreation in this catchment. Several upgrades are recommended for district recreation parks in the Coastal Communities and Bribie Island Catchment these are listed in Table 33 below.

TABLE 33 - COASTAL COMMUNITIES AND BRIBIE ISLAND DISTRICT RECREATION SOLUTIONS

Reference	SUBURB	NAME	PARK TYPE	SOLUTION
OS-12	Toorbul	Toorbul Community and Sports Centre	District Sport	Upgrade Embellishments
OS-14	Bribie Island	Bellara District Foreshore	District Park	Upgrade Embellishments
OS-15	Bribie Island	Solander Esplanade Park	District Park	Upgrade Embellishments

7.7 District Catchment - Coastal Communities and Bribie Island Sports Parks

Separate calculations for the sports park requirements in Coastal Communities are shown in the following tables. These are worked on a district level. It is noted that the remoteness of these communities has historically led to the development of local sports parks in some of the villages of the Coastal Communities. These local sports parks play a vital role in the support of the provision of sports parks for the community. Local sports parks while not meeting the DSS are included in the calculation of provision of sports parks.

TABLE 34 - TOTAL AREA OF SPORTS PARKS IN COASTAL COMMUNITIES DISTRICT CATCHMENT

Park	Hierarchy	Area (ha)	Suburb
Beachmere Sports Complex	Local	8.72ha	Beachmere
Sandstone Point Sports Ground	Local	13.26ha	Sandstone
Bribie Island Sports Complex	District	13.45ha	Bribie
Toorbul Community and Sports Centre	Local	6.76ha	Toorbul
Total Area		42.19ha	

TABLE 35 - SPORTS PARK DEMAND COASTAL LOWLANDS- BRIBIE ISLAND

Hierarchy	DSS provision rate per 1000	Area required	Number of sports parks required	Area provided
Regional Sport	0.4	18ha	0.45	
District Sport	0.8	36	1.7	42.19
Total required		54ha		

Regional sports are provided to service the Regional catchment. Existing Local sports support the sporting needs of the catchment and in combination with the district sports club at Bribie provide 42.19 ha of sports parks.

The balance of the area being 12 ha or 18 of regional demand to be catered for in the greater region.

The following sports parks are in the Coastal Lowlands and Bribie Island

MAP 26 - BEACHMERE SPORTS COMPLEX

MAP 27 - SANDSTONE POINT SPORTS COMPLEX

MAP 28 - BRIBIE ISLAND SPORTS COMPLEX

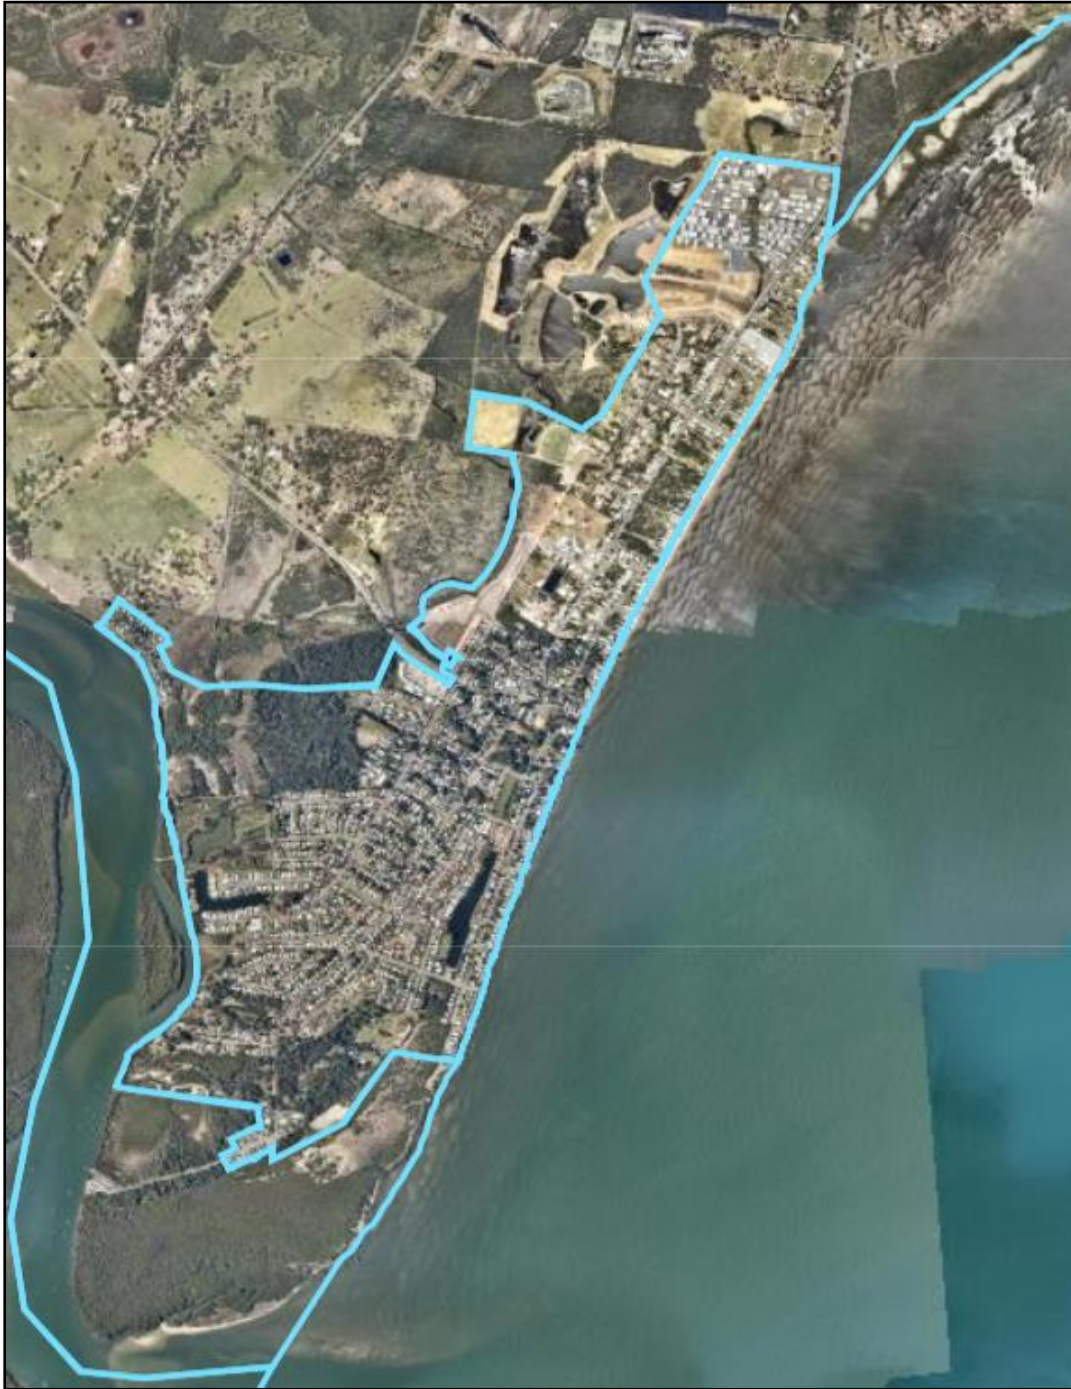

MAP 29 - TOORBUL SPORTS COMPLEX

8 Local Catchment - Beachmere - Local Recreation Analysis

8.1 Beachmere Profile Summary

Beachmere, located in the north of the Moreton Bay Region, within a 16km drive of Caboolture. It is bordered by sand extraction industry in the north, Deception Bay to the south and the Caboolture River in the south and west. The Beachmere local area primarily consists of coastal and rural residential housing. It provides a coastal lifestyle with the Beachmere foreshore playing a significant role in its character and development.

MAP 30 - BEACHMERE CATCHMENT BOUNDARY

The major features of the area include the Rogers Street Sportsground, Beachmere Village Shopping Centre, Beachmere Activity Centre and two primary schools.

8.2 Beachmere population growth assumptions

The population assumptions for this Beachmere catchment are shown in Table 36, indicating a slight growth over the 20-year period from 2016 to 2036. The total population growth from 2016 to 2036 is 1,762 an increase of 44.8%, while this is a significant percentage, in comparison with other growth areas it is a relatively small population increase.

TABLE 36 LOCAL CATCHMENT POPULATION ASSUMPTIONS BEACHMERE

BEACHMERE	2016	2021	2026	2031	2036	Ultimate
	3,931	4,274	5,232	5,517	5,693	5,849
Demand	3.93	4.27	5.23	5.52	5.69	5.85
Existing area	4.63	4.63	4.63	4.63	4.63	4.63
Balance	0.69	0.35	-0.61	-0.89	-1.07	-1.22

8.3 Beachmere current supply of Local Recreation parks

The existing supply of local recreation parks within the Beachmere local catchment are shown in Table 37.

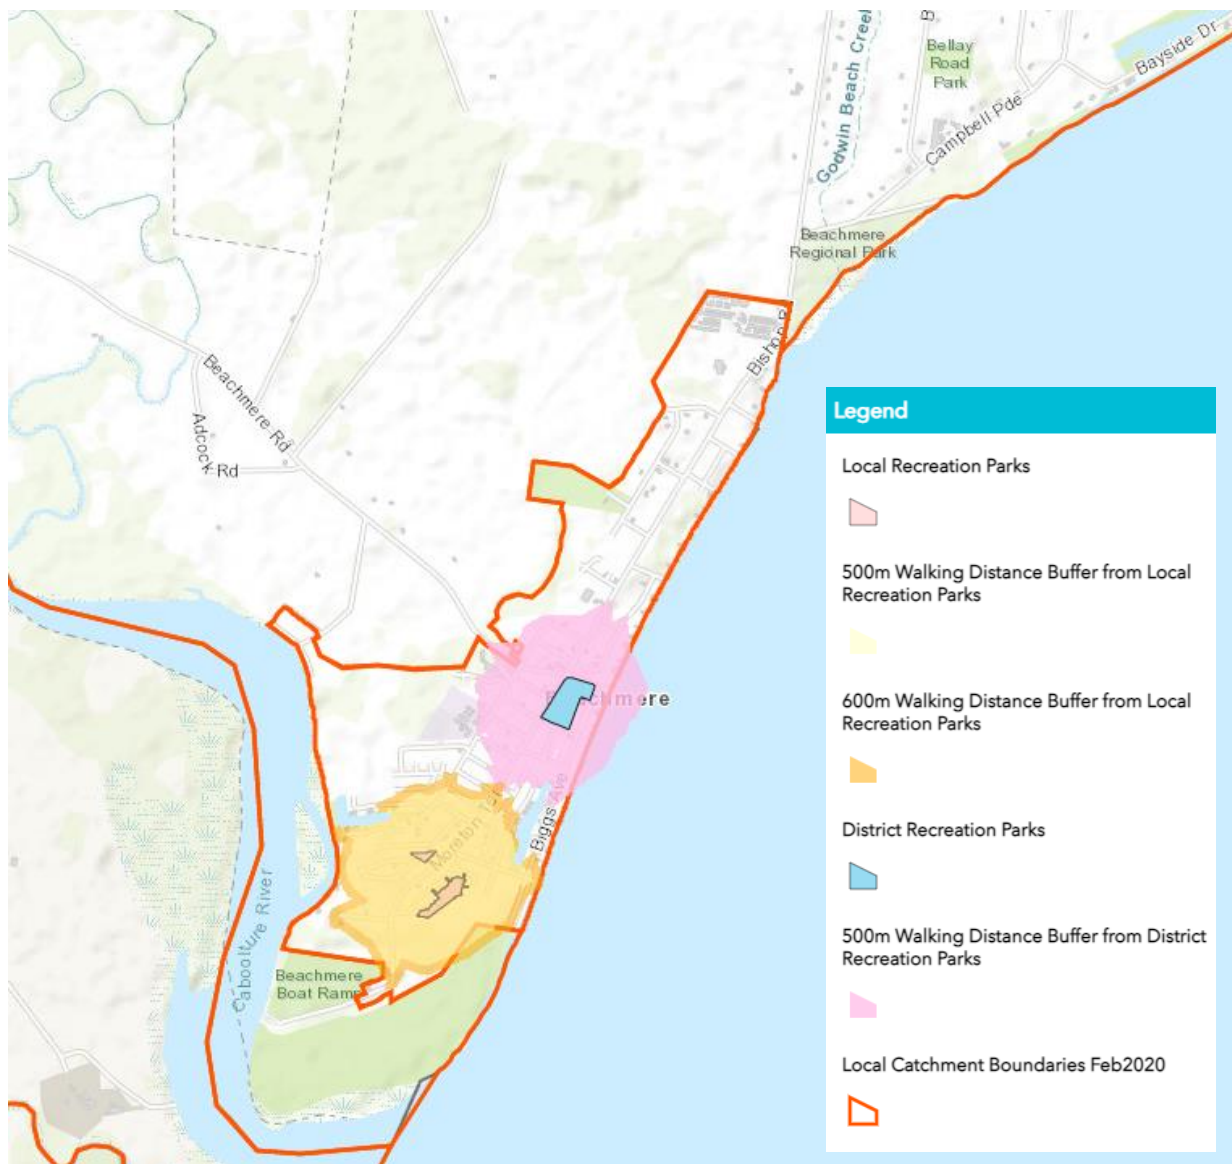

TABLE 37 - CURRENT SUPPLY OF LOCAL RECREATION PARKS BEACHMERE

Park name	Park address	Land area (Ha)
A&M Lehman Park (Local Foreshore)	1 Biggs Avenue Beachmere	0.13
Dwyer Street Park (North)	1 Dwyer Street Beachmere	0.40
Dwyer Street Park (West)	44 Dwyer Street Beachmere	0.56
Gretel Drive Park	22 Gretel Drive Beachmere	1.69
Henry Ware Park	Riversleigh Road Beachmere	0.43
Total land area		3.21

Note there have been sales of park area (i.e. 151 Bishop Road Beachmere) and reclassifications in the Beachmere area (Dwyer Street Park West) which alter the calculations of Local recreation parks from the previous LGIP. The current area calculation of local recreation and foreshore parks in the Beachmere catchment to 3.21 ha.

8.4 Beachmere accessibility analysis

Map 31 - Beachmere catchment analysis shows accessibility to local recreation parks for the Beachmere seaside community, it demonstrates several gaps in the network. Map 31 is based on the 500m true walkability as calculated with GIS permeability raster formulas. The Beachmere community, while in proximity to the water, has limited foreshore access for public enjoyment because of the historic subdivision patterns although there are some large park areas to the south of the village.

MAP 31 - BEACHMERE CATCHMENT ANALYSIS

8.5 Catchment analysis

The desired standards of service outline a target of 1 hectare of land for local recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 38, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 38.

TABLE 38 - PARKS PROVISION ANALYSIS

BEACHMERE	2016	2021	2026	2031	2036	Ultimate
Population	3931	4274	5232	5517	5693	5849
Demand	3.93	4.27	5.23	5.52	5.69	5.85
Existing area	3.21	3.21	3.21	3.21	3.21	3.21
Balance	-0.72	-1.06	-2.02	-2.31	-2.48	-2.64

Note there is an existing shortfall in local recreation park area (from 2016), this shortfall is approximately 2.48 ha at 2036.

8.6 Recommendations for public parks solutions - Beachmere

Recommended that in order to increase accessibility to local parks and meet the demand for the future that an additional local recreation park be provided in Rogers Street in proximity of the existing local sports park to support and enhance the embellishments and provision of local recreation facilities to the seaside community.

The following items are recommended for the future recreation and sports needs of the Beachmere Local Catchment.

TABLE 39- BEACHMERE RECOMMENDED SOLUTIONS TABLE

Reference	Name	Park Type	Solution
OS-33	Beachmere Sportsgrounds	Local Sport	Upgrade - scheduled
OS-2204	Rogers Street Park	Local Recreation Park	Land and embellishment

9 Local Catchment - Bribie Island - Local Recreation Analysis

9.1 Bribie Island Profile Summary

The Bribie Island catchment has been adjusted since the LGIP2017 to include the areas of Woorim and Bongaree. Bribie Island is in the north of the Moreton Bay Region. The local area contains suburban residential areas, cafes, shopping centres and a state school. Bribie Island National Park is a major feature of this local area. It provides environmental values, scenic amenity and recreation opportunities to the region. Parts of the local area are affected by flooding and erosion. The area will be subject to the future impacts of climate change.

MAP 32 BRIBIE ISLAND - LOCAL CATCHMENT BOUNDARY

Features in the local area include Pumicestone Passage Marine Park, Pumicestone Channel, Buckleys Hole Conservation Park, Bribie Island Golf Club, Pacific Harbour Golf & Country Club, University of

Queensland Ionospheric Research Station, Bribie Island Aquatic Leisure Centre, Bribie Island Arts Centre, Matthew Flinders Bicentennial Gallery, Banksia Beach Shopping Village, Bribie Central Shopping Centre, Bribie Island Shopping Centre, Pacific Harbour Marina, Banksia Lodge Neighbourhood Centre, Shore Bird Sanctuary and Bribie Island Recreation Grounds.

9.2 Bribie Island population growth assumptions

The population assumptions for the Bribie Island local catchment are shown in Table 40.

TABLE 40 - LOCAL CATCHMENT POPULATION ASSUMPTIONS - BRIBIE WOORIM AND BONGAREE

Bribie Island	2016	2021	2026	2031	2036	ULTIMATE
Population	19,307	20,896	22,460	23,031	23,205	24,447

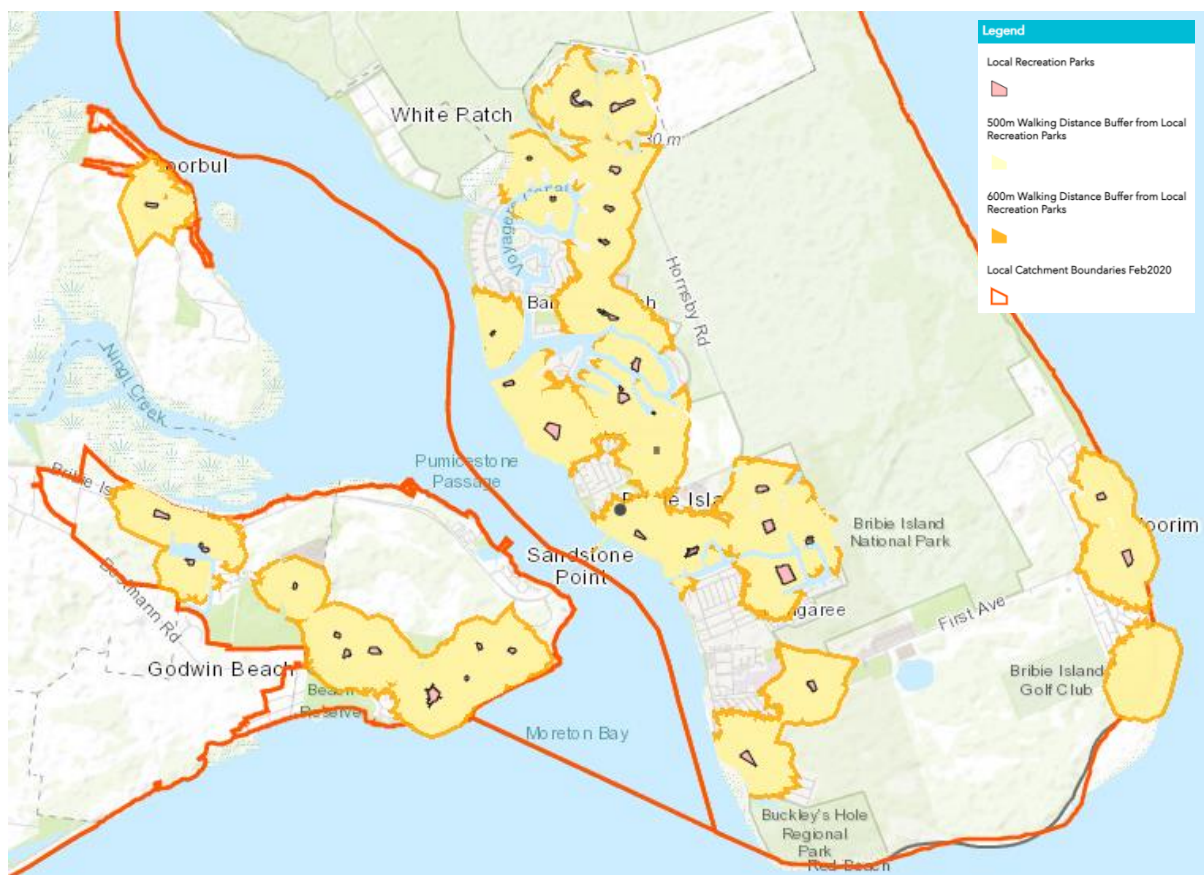

MAP 33 BRIBIE ISLAND - PARKS NETWORK

Map **33** Bribie Island - parks network shows the park network including all types of parks across Bribie Island, including Council parks both trunk and non-trunk.

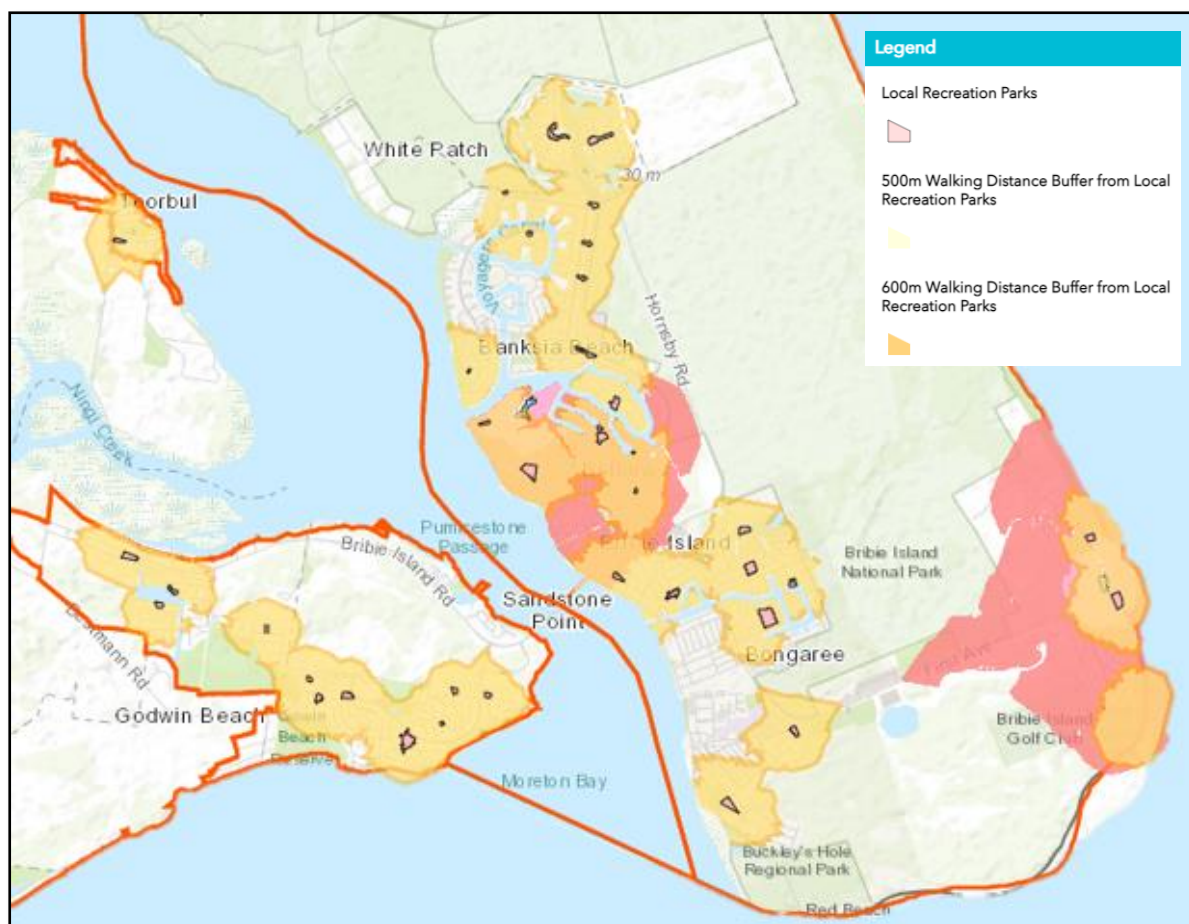

9.4 Bribie Island accessibility analysis

Most of Bribie Island has good access to local recreation parks. The areas of deficiency are shown in Map 34 as gaps, it should be noted that this map does not show accessibility for district foreshore parks.

It is noted that some areas of deficiency are compensated by being within walking distance of District recreation, District foreshore parks or National park.

MAP 34 - LOCAL RECREATION WALKABILITY ANALYSIS

MAP 35 - BRIBIE ISLAND LOCAL AND DISTRICT RECREATION PARKS WALKABILITY

9.5 Bribie Island catchment analysis

The desired standards of service outline a target of 1 hectare of land for local recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 42, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 40 above.

TABLE 42 - BRIBIE ISLAND LAND PROVISION ANALYSIS - LOCAL RECREATION

BRIBIE ISLAND	2016	2021	2026	2031	2036	Ultimate

Balance	154	152	151	150	150	149

9.6 Recommendations for public parks solutions - Bribie Island

No additional land requirements for parks noted for Bribie Island. There are seven projects identified for parks requiring upgrading to bring them up to the desired standards of service and to meeting community needs and expectation.

In line with Council's policy as set within the planning Scheme district civic space should also be included in the inventory of parks on Bribie. There is an existing LGIP item for a District Civic park at Brennan Park, Bongaree - OS-60.

The list of items in Table 43 are the recommended projects for the LGIP within the Bribie local catchment including Regional and District level projects.

10 Local Catchment - Coastal Lowlands - Local Recreation Analysis

10.1 Coastal Lowlands profile summary

The Coastal Lowlands local area includes the suburbs of Meldale and Godwin Beach as well as parts of Donnybrook, Elimbah, Ningi, Toorbul, Caboolture East and Beachmere. It is a large rural area with small scale industrial uses and rural residential properties throughout. The local area is bordered by the Sunshine Coast Region in the north, Pumicestone Passage and Bribie Island in the east, Burpengary and Deception Bay in the south and Caboolture in the west.

Some of the major features in the local area include the Pumicestone Passage Marine Park, Bullock Creek Conservation Park, parts of Beerburum East State Forest, Beachmere Conservation Park, Abbey Museum of Art & Archaeology and Tea Tree Swamp Lagoon.

MAP 36 - COASTAL LOWLANDS LOCAL CATCHMENT

10.2 Coastal Lowlands population growth assumptions

The population assumptions for this Coastal Lowlands local catchment are shown in Table 44 - Coastal Lowlands Population Assumptions.

TABLE 44 - COASTAL LOWLANDS POPULATION ASSUMPTIONS

10.6 Recommendations for public parks solutions - Coastal Lowlands

No additional parks required

11 Local Catchment - Donnybrook - Local Recreation Analysis

11.1 Donnybrook Profile Summary

The Donnybrook local area is situated 20km from Caboolture. It is bordered by the Sunshine Coast Region to the north, Meldale to the south, Elimbah to the west and Bribie Island to the east. It has a low-density coastal character with proximity to Pumicestone Passage (see Map 39). Low density residential housing is the primary land use in the area. It relies on neighbouring towns for access to employment, shopping and services.

MAP 39 - DONNYBROOK LOCAL CATCHMENT

11.2 Donnybrook population growth assumptions

The population assumptions for Donnybrook local catchment are shown in Table 47, it is noted that there is limited growth within this small village with a total growth of 414 residents from 2016 to 2036 and an additional 104 residents to reach capacity at current zoning.

TABLE 47 - DONNYBROOK LOCAL CATCHMENT POPULATION ASSUMPTIONS

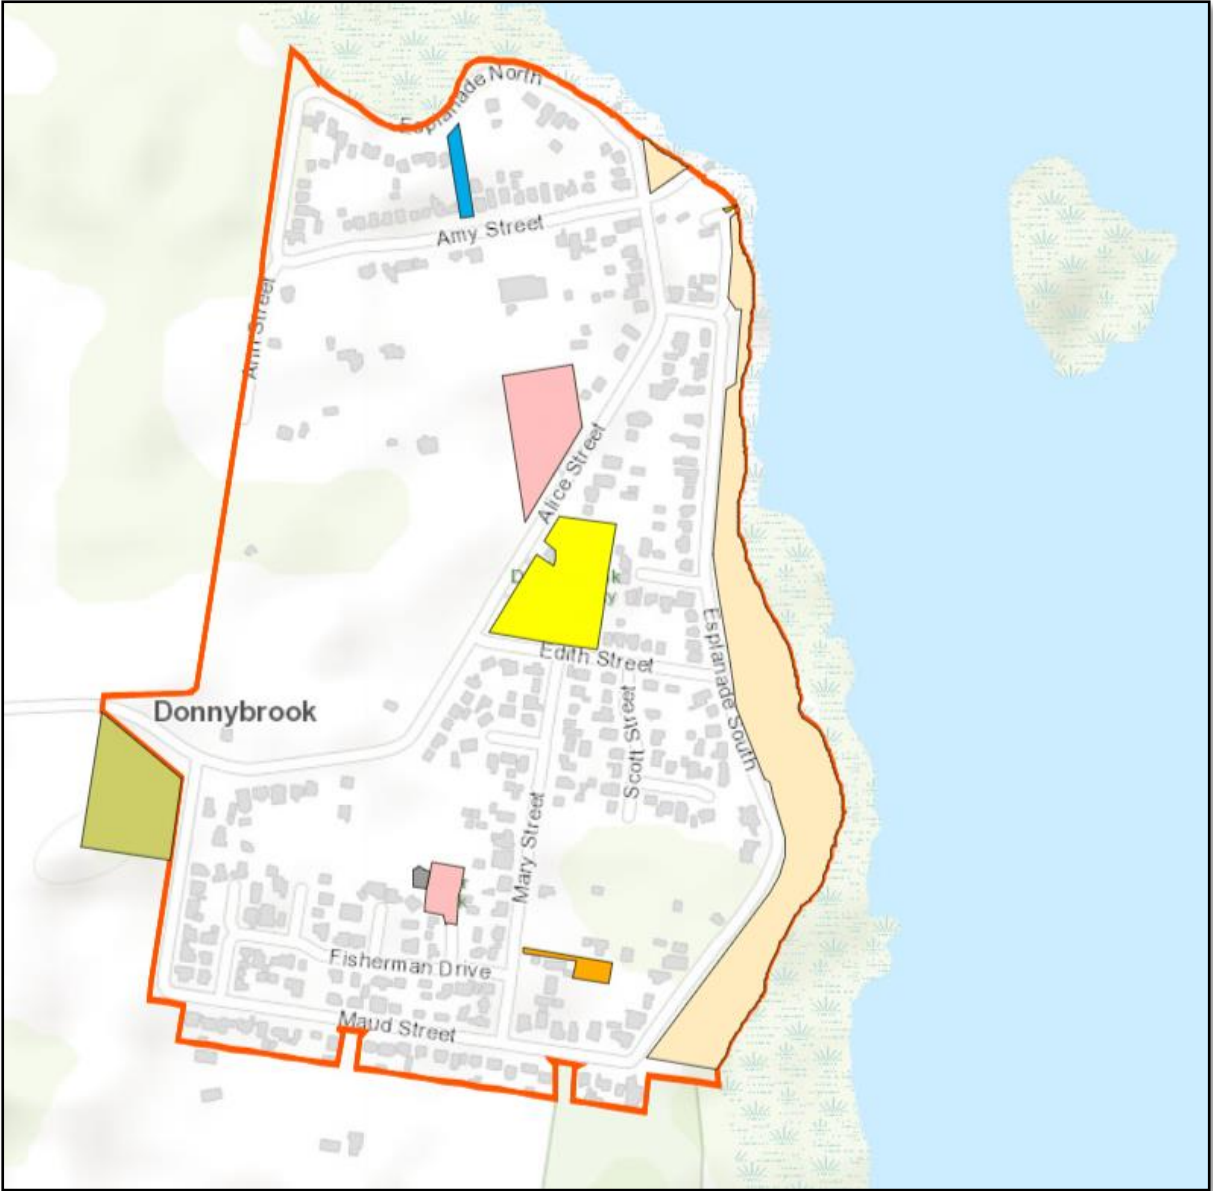

Donnybrook	2016	2021	2026	2031	2036	Ultimate
Population	694	759	891	1,024	1,109	1,213
Population growth over 5-year interval		65	132	133	85	104
Population growth as percentage		9.3	17.5	14.9	8.3	19

11.3 Current supply of Local Recreation Parks

The existing supply of local recreation parks within this local catchment are shown in Table 48. There are five parks including civic, foreshore and recreational parks

TABLE 48 - CURRENT SUPPLY OF LOCAL RECREATION PARKS - DONNYBROOK

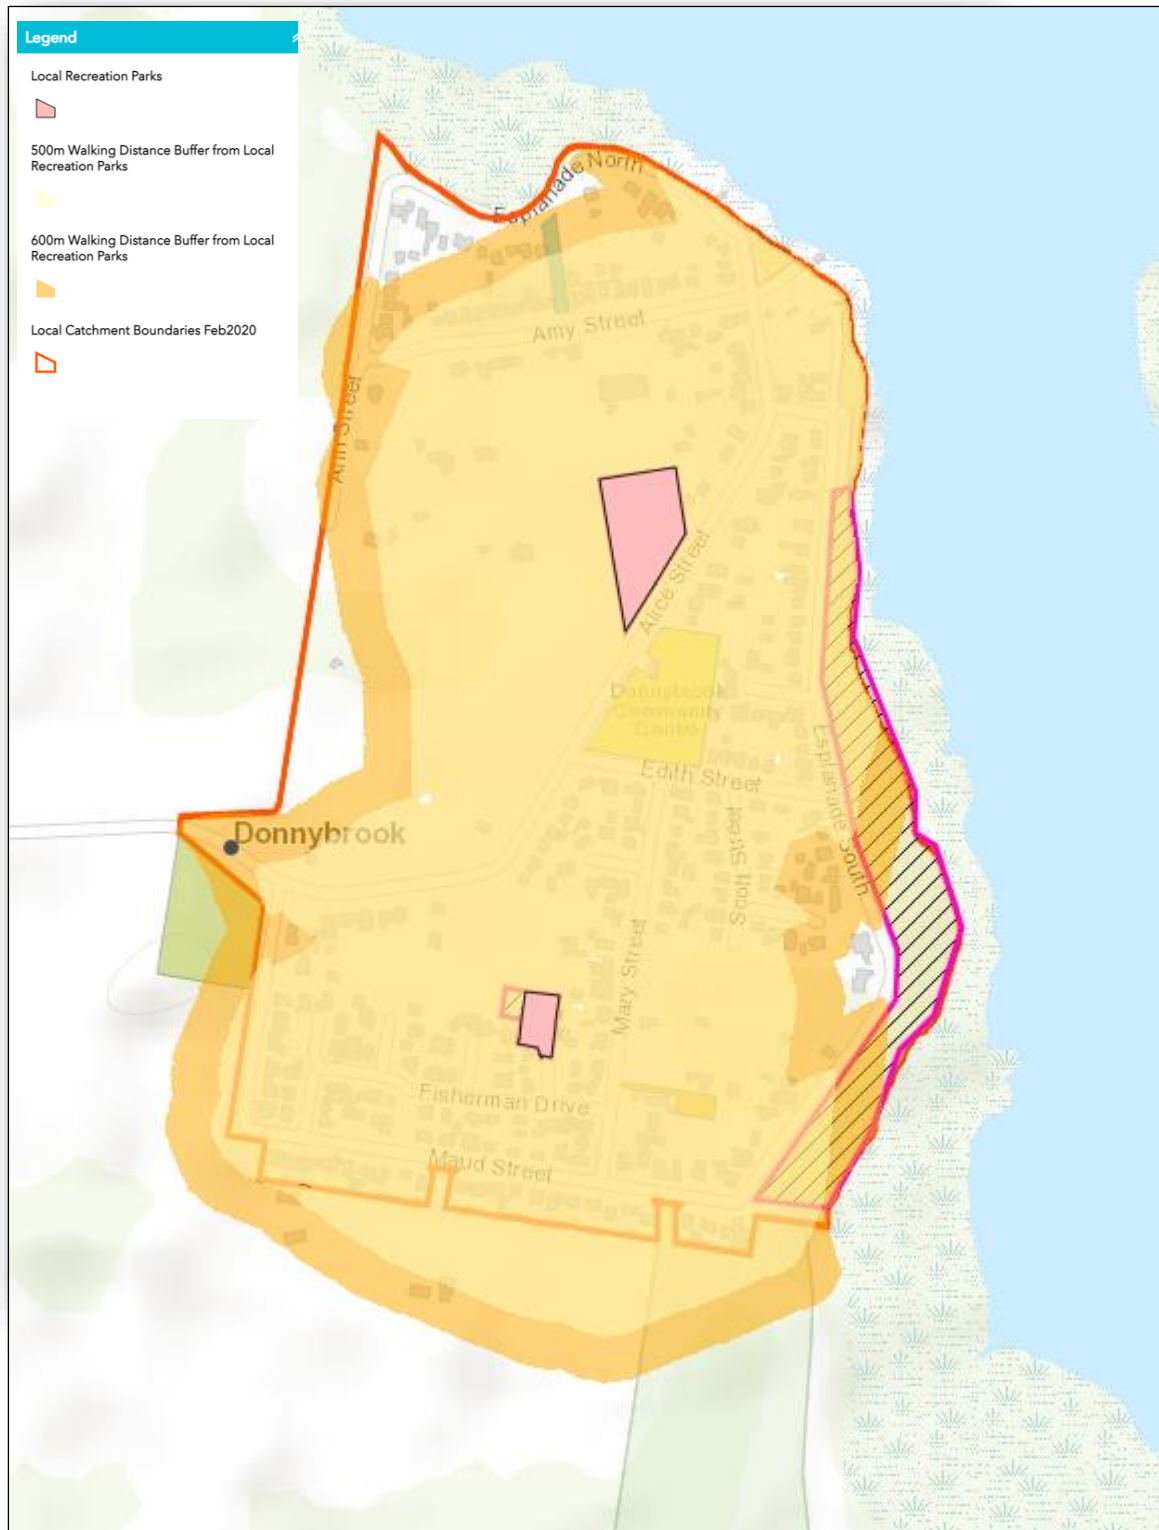

Park Name	Classification	Address	Suburb	Area ha
Donnybrook Community Centre	Local Civic Park	Edith Street	Donnybrook	1.3ha
Pioneer Park Nth	Local Foreshore	Alice Street	Donnybrook	0.1ha
Donnybrook Foreshore	Local Foreshore	Esplanade South	Donnybrook	4.4ha

Starr Park	Local Recreation	Mary Street	Donnybrook	0.2ha
Total				6.9ha

MAP 40 - DONNYBROOK EXISTING PARKS

11.4 Donnybrook accessibility analysis

Accessibility to local recreation and other local parks is relatively good in Donnybrook. Map 41 indicates that most properties within the village are within a 600m walk of a local recreation park.

MAP 41 - DONNYBROOK ACCESSIBILITY MAP

11.5 Catchment analysis - Donnybrook

The desired standards of service outline a target of 1 hectare of land for local recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 49, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 47 above.

TABLE 49 - LAND PROVISION ANALYSIS

Donnybrook	2016	2021	2026	2031	2036	Ultimate
Population	694	759	891	1,024	1,109	1,213

11.6 Donnybrook Recommendations for public parks solutions

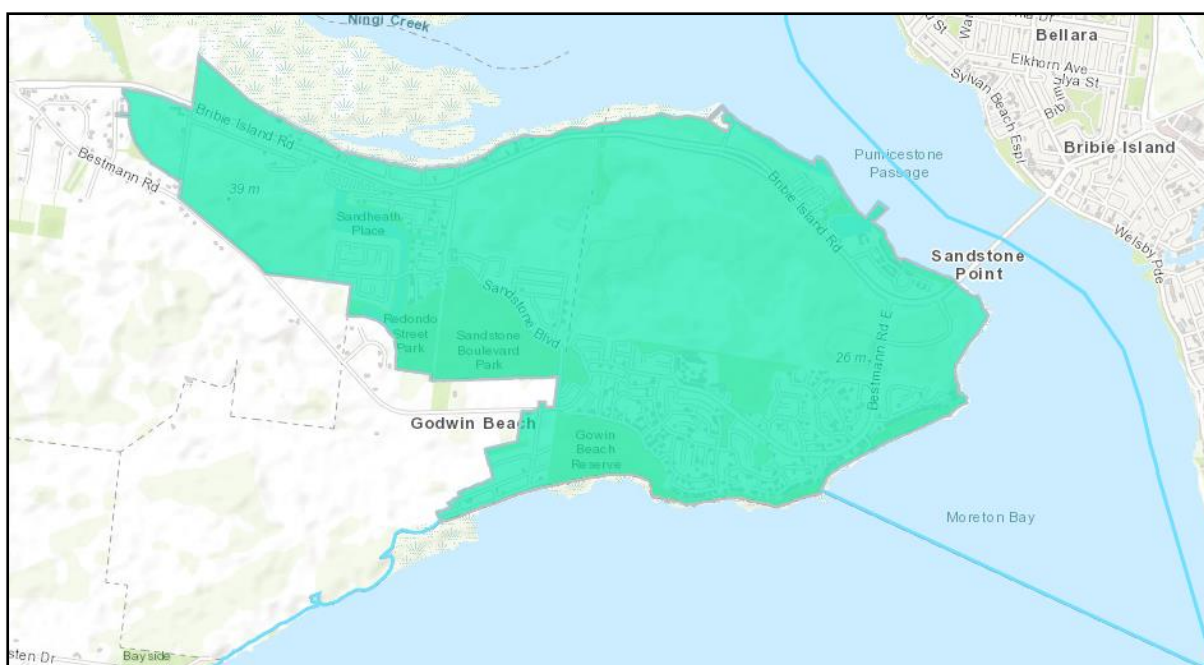

Some upgrading of parks within the village are required including the upgrade of Alice Street Park.

12 Local Catchment - Sandstone-Ningi - Local Recreation Analysis

12.1 Sandstone-Ningi Profile Summary

The Sandstone-Ningi local area is predominantly a developing residential area with the natural features of Pumicestone Passage and the coastal foreshores of Sandstone Point and Ningi. The local area is bordered by the Pumicestone Channel in the north and east, Deception Bay in the south and Bestmann Road to the west. The area is primarily characterised by its natural features and coastal neighbourhoods.

Some of the major features in the area include the Spinnaker Sound Marina, Sandstone Point Sport and Recreation Complex, Ningi Recycling and Landfill Centre, Silver Shores Caravan Park and parts of Moreton Bay Marine Park and Pumicestone Passage Marine Park.

MAP 42 - SANDSTONE-NINGI LOCAL CATCHMENT

12.2 Sandstone-Ningi population growth assumptions

The population assumptions for Sandstone-Ningi local catchment are shown in Table 50.

TABLE 50 - SANDSTONE-NINGI LOCAL CATCHMENT POPULATION ASSUMPTIONS

SANDSTONE - NINGI	2016	2021	2026	2031	2036	Ultimate
Population	6,864	7,833	8,503	8,791	9,092	9,324

Total area of local recreational parks				34.6ha

12.6 Sandstone Point- Ningi recommendations for public parks solutions

Table 53 lists the local park recommendations for the local catchment of Sandstone-Ningi.

TABLE 53 - SANDGATE - NINGI PUBLIC PARK SOLUTIONS

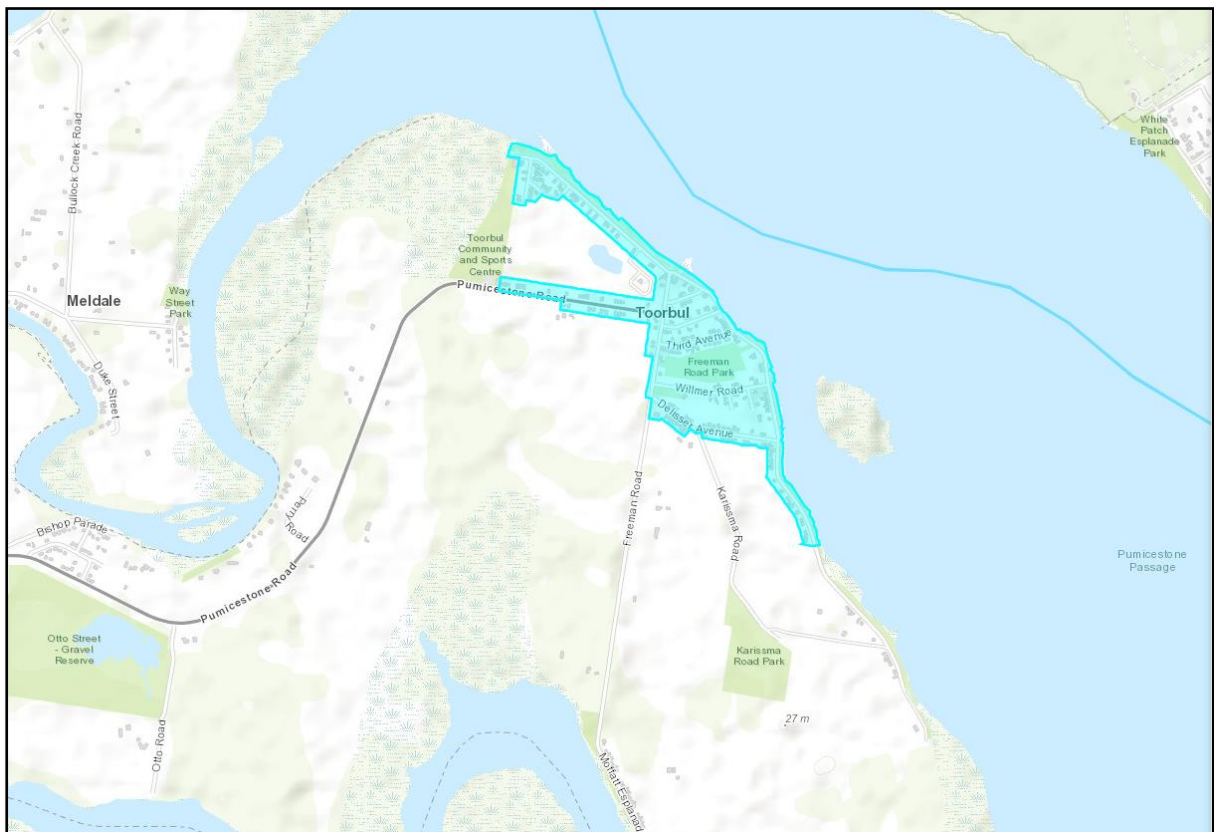

Item ID	Park	Classification	Solution
OS-70	Goodwin Beach Esplanade	Local foreshore	Upgrade
OS-112	Bestmann Road East Park	Local recreation	Upgrade

Note there are no new parks nominated for this catchment however project OS-112 is to be relocated to Sandstone point sportsground as there are difficulties implementing at its previous location.

13 Local Catchment - Toorbul - Local Recreation Analysis

13.1 Toorbul local catchment profile summary

The Toorbul local area is located south of the Pumicestone Passage and north of Meldale. It is also within a 20km drive from Caboolture (see Map 44). Toorbul is primarily characterised by its coastal environment and low-density housing. It provides access to coastal walkways and parks along the esplanade as well as the recreational opportunities of Pumicestone Passage. It relies on neighbouring towns for access to employment, shopping and services. The area is likely to be impacted by the effects of climate change including sea level rise and extreme weather events.

MAP 44 - TOORBUL LOCAL CATCHMENT AREA (HIGHLIGHTED)

13.2 Toorbul population growth assumptions

The population assumptions for the Toorbul local catchment are shown in Table 54.

TABLE 54 - TOORBUL LOCAL CATCHMENT POPULATION ASSUMPTIONS

Toorbul	2016	2021	2026	2031	2036	Ultimate
Population	846	861	878	892	906	923
Population growth over 5-year interval	10	14	17	14	15	77
Population growth as percentage	1.2%	1.7%	2.0%	1.6%	1.6%	9.1%

13.3 Toorbul current supply of Local Recreation Parks

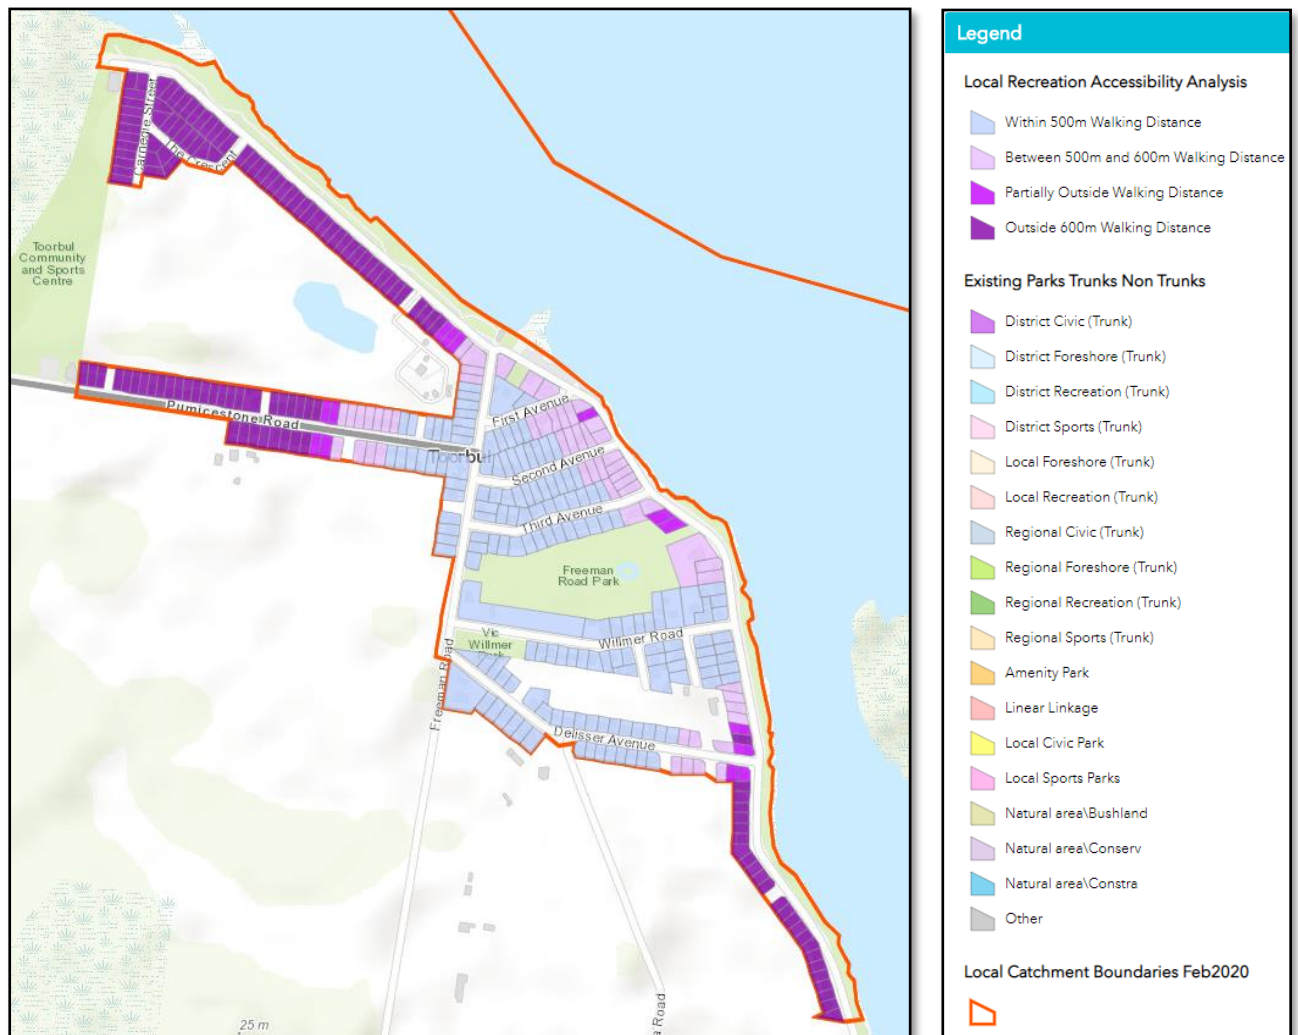

The existing supply of local recreation parks within the Toorbul local catchment are shown in Table 55. There are two parks being Toorbul Esplanade foreshore park and Vic Williams Park.

TABLE 55 - CURRENT SUPPLY OF LOCAL RECREATION PARKS IN TOORBUL CATCHMENT

Park name	Type	address	Suburb	Area m2
Toorbul Esplanade	Local recreation Foreshore park	Toorbul Esplanade	Toorbul	28066m2
Vic Willmer Park	Local recreation	Freeman Road	Toorbul	4192m2

13.4 Toorbul accessibility analysis

Accessibility to local recreation parks at Toorbul is somewhat limited as shown in the following map, however it is noted that area with limited access to local recreation parks have ready access to the Toorbul esplanade foreshore parks.

MAP 45 - ACCESSIBILITY IN TOORBUL LOCAL CATCHMENT

13.5 Toorbul local catchment analysis

The desired standards of service outline a target of 1 hectare of land for local recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 56 - Toorbul Land provision analysis, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 54 - Toorbul Local Catchment Population Assumptions.

TABLE 56 - TOORBUL LAND PROVISION ANALYSIS

Toorbul	2016	2021	2026	2031	2036	Ultimate
Population	846	861	878	892	906	923

OS-12	Toorbul Community and Sports Centre	District Sporting Facility
OS-109	Toorbul Esplanade (Foreshore) (North)	Local Park - Foreshore
OS-110	Toorbul Esplanade (Foreshore) (South)	Local Park - Foreshore

NORTH LAKES - REDCLIFFE - MORETON BAY RAIL CORRIDOR

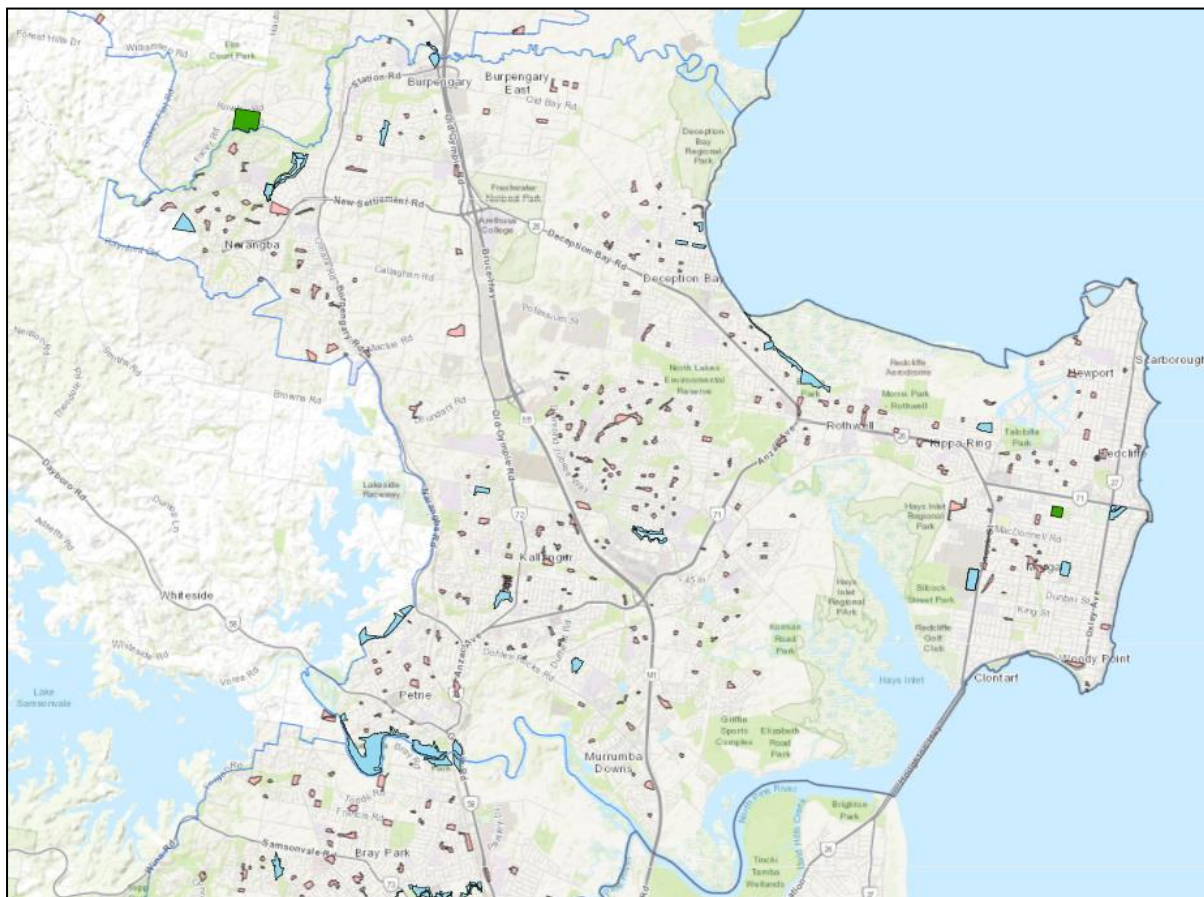

14 District Catchment: North Lakes, Redcliffe, Moreton Bay Rail Corridor

14.1 North Lakes, Redcliffe, Moreton Bay Rail Corridor Profile Summary

The North Lakes, Redcliffe and Moreton Bay Rail Corridor district includes the suburbs of Redcliffe, Rothwell, Mango Hill, North Lakes, Griffin, Deception Bay, Murrumba Downs, Kallangur and Dakabin. The district is large, predominantly urban, and consists of a broad mix of distinct communities. Over the past 15 to 20 years this catchment has seen the greatest quantum of growth in the region.

The communities within the district vary considerably, from the residential suburbs of Murrumba Downs and Kallangur in the west to Redcliffe, an established coastal centre with great quality recreation and sporting facilities in the east. The large wedge of suburbs between Kallangur and Redcliffe are dominated by broad scale residential land subdivision and the commercial centre of North Lakes - Mango Hill. These suburbs have experienced some of the fastest growing suburbs in Australia, putting strain on infrastructure provision.

To the north new residential areas are emerging from the rural and rural residential patchwork of communities that previously separated the former local government areas.

MAP 46 - NORTH LAKES - REDCLIFFE - MORETON BAY RAIL CORRIDOR DISTRICT CATCHMENT

The development of the Moreton Bay Rail Corridor (MBR Corridor) has seen the further development of this catchment. It is anticipated that the infill and higher density development of this corridor will continue beyond the development of the broad scale residential land subdivisions that will dominate development in this catchment over the next 10 years. This will present challenges in the provision of parks at a per capita ratio if planning for the ultimate level of develop is not considered early and sufficient area set aside to meet future demand. This is particularly relevant for district and regional recreation, sports as well as civic spaces and local recreation in areas of increased density.

14.2 North Lakes, Redcliffe, Moreton Bay Rail Corridor population growth assumptions

The population assumptions for a district reflect the planning directions outlined in Council's Strategic Framework. Table 58 identifies that the population growth of the North Lakes-Redcliffe-Moreton Bay Rail Corridor from 2016 is projected to have an additional 88,580 residents by 2036. This represents 50% the total growth for the Moreton Bay Region.

TABLE 58 - NORTH LAKES, REDCLIFFE, MORETON BAY RAIL CORRIDOR DISTRICT POPULATION ASSUMPTIONS

North Lakes, Redcliffe, Rail Corridor	2016	2021	2026	2031	2036	Ultimate
Population	195,632	221,009	242,401	265,124	284,212	349,508
Population increase in five-year period		25,377	21,392	22,723	19,088	65,296

	Wallin Family Park			

14.4 North Lakes, Redcliffe, Moreton Bay Rail Corridor accessibility analysis

Accessibility varies across this district catchment. The following series of maps highlights the areas where accessibility is limited or deficient. It is noted that emerging areas like Dakabin will require further district level parks to meet accessibility requirements and there are some areas within Griffin which also show a low level of accessibility. The district accessibility standard 2.5km and 3.5km for Rural Residential and Employment and Enterprise areas. The level of accessibility desired for local level parks is 400m radius, this matches the new standards in both the IPWEAQ's Street Design Manual: Walkable Neighbourhoods and the QLD State government's Model Code for Neighbourhood Design.

MAP 47 - NORTH LAKES, REDCLIFFE, MORETON BAY RAIL CORRIDOR ACCESSIBILITY - DISTRICT RECREATION PARKS

The Redcliffe peninsula is supplied with a series of linear foreshore parks which provide access to the water and support the local amenity of the area. These parks are highly valued both as local assets and as tourism attractions. The embellishment of these parks relates to the hierarchy and classification afforded them. Increased population density will put further pressure on the supply of parks within this catchment and ensure existing parks are adequate embellished and supported is a significant means of meeting the future demand of the growing community. There are limited opportunities to secure additional land within the area.

14.5 North Lakes, Redcliffe, Moreton Bay Rail Corridor catchment analysis

The desired standards of service outline a target of 0.6 hectare of land for district recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 60, this catchment has sufficient district level parks to meet the need to 2036, however it is noted that for the zoned and projected growth to an ultimate scenario that the area would have a significant deficit of 35.82 hectares. Understanding the ultimate deficit and the means of addressing the shortfall is relevant to the landuse planning and infrastructure provision of the future.

TABLE 60 - NORTH LAKES, REDCLIFFE, MORETON BAY RAIL CORRIDOR LAND PROVISION ANALYSIS DISTRICT RECREATION PARKS

North Lakes, Redcliffe, Rail Corridor	2016	2021	2026	2031	2036	Ultimate

Local Catchments within North lakes - Redcliffe - MBR Corridor District

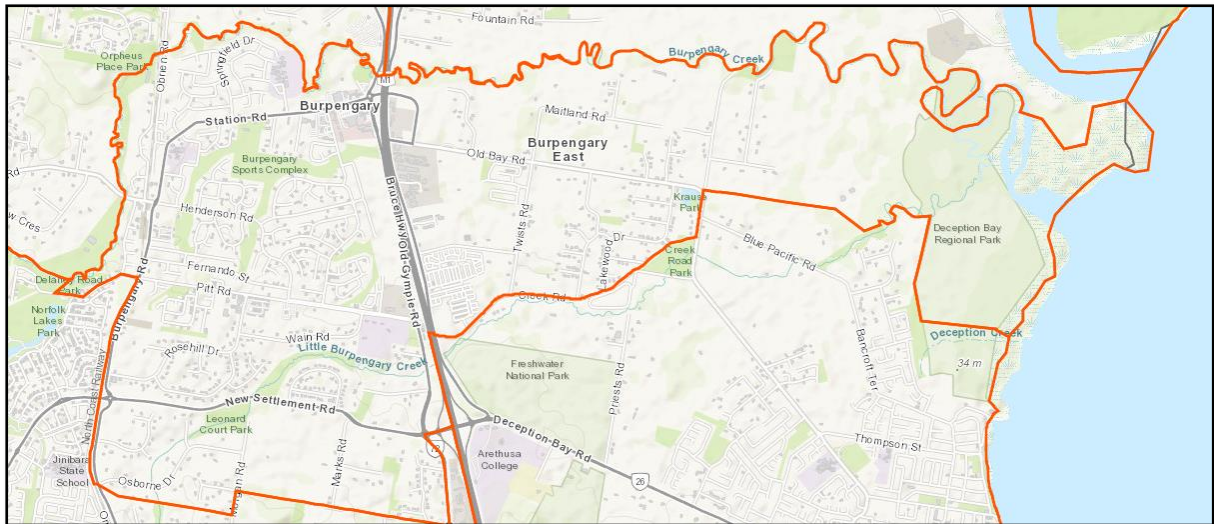

MAP 48 - LOCAL CATCHMENTS WITHIN DISTRICT

15 Local Catchment - Burpengary - Local Recreation Analysis

15.1 Burpengary Profile Summary

The Burpengary local area is a growing residential area, with a mix of commercial and industrial precincts. Rural and rural residential suburbs exist on the edges and in the east of the local area, providing for rural lifestyles and agricultural practices. The Burpengary East area is beginning to experience further residential development. Burpengary is bordered by Burpengary Creek in the north, Deception Bay in the east, Rothwell-Narangba in the south and the train line in the west. The Bruce Highway intersects the middle of the suburb see Map 49.

Some of the major features in the local area include Burpengary Plaza Shopping Centre, Burpengary Central Shopping Centre, Burpengary Sports Ground, Caboolture Regional Environmental Education Centre, Burpengary Equestrian Centre, Burpengary Hall and O'Brien Environmental Reserve.

MAP 49 BURPENGARY CATCHMENT BOUNDARY

15.2 Burpengary population growth assumptions

The population assumptions for Burpengary local catchment are shown in Table 63, they reflect the planning assumptions based on the strategic planning framework for the area.

TABLE 63 - BURPENGARY LOCAL CATCHMENT POPULATION ASSUMPTIONS

Burpengary	2016	2021	2026	2031	2036	Ultimate
Population	11,944	13,493	15,528	16,622	18,274	24,712
Population growth from previous five years	728	1,548	2,035	1,094	1,652	12,768
Percentage growth five-year period	6.5%	13.0%	15.1%	7.0%	9.9%	58.0%

15.3 Burpengary current supply of Local Recreation parks

The existing supply of local recreation parks within the Burpengary local catchment are shown in Table 64.

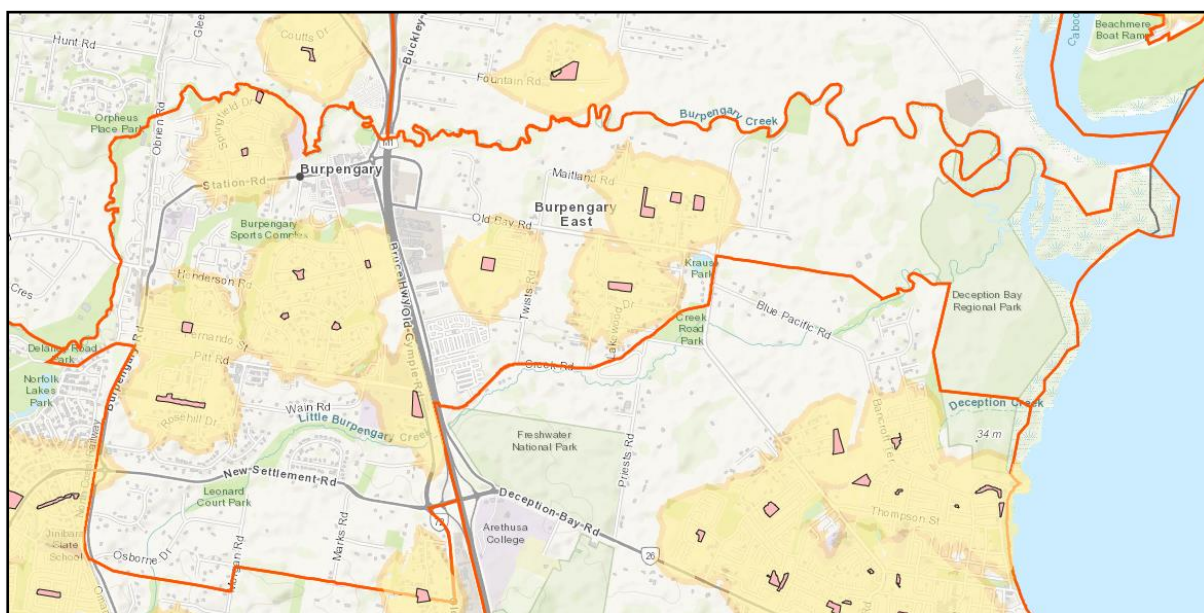

TABLE 64 - BURPENGARY CURRENT SUPPLY OF LOCAL RECREATION PARKS

Name	Address	Suburb	Area in m ²
Lions Park (Burpengary)	11 Eleanor Street	Burpengary	2,637 m ²
CR Ernie Svenson Park	80 Springfield Drive	Burpengary	4,104 m ²
Park 42 Feltham Road	42 Feltham Circuit	Burpengary	9,951 m ²

Pitt Road Park	220 Pitt Road	Burpengary	13,666 m ²
Muriel Court Park	122 Maitland Road	Burpengary East	13,434 m ²
Caccini Court Park	Caccini Court	Burpengary	3,189 m ²
TOTAL LOCAL RECREATION			105,219m ² 10.52ha

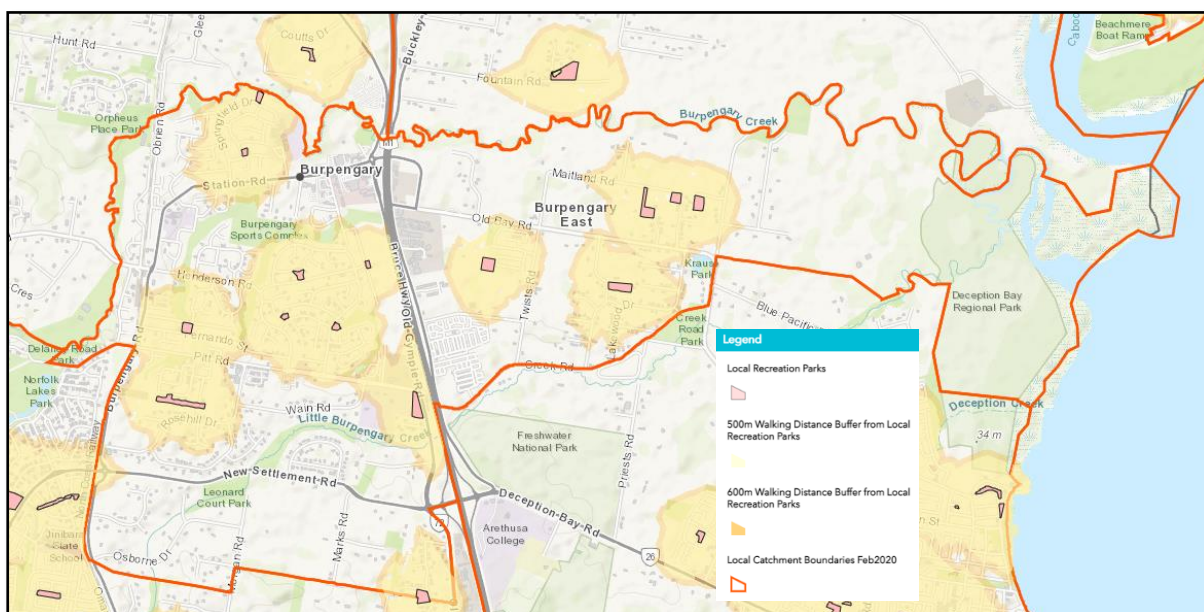

Burpengary has 14 local recreation parks with a total area of local recreation parks of 10.52 hectares. The majority of these are in the Burpengary suburban area with three parks located in the Burpengary East. The parks in Burpengary east have several issues in relation to their general accessibility and meeting the established desired standards of service (DSS), this area is predominantly rural residential in character, although it is zone Emerging community - Transition precinct and is already experiencing some development pressure for urban development. This early development will require the provision of local recreation parks, the detail of which has not been finalised at this premature stage.

15.4 Burpengary Accessibility analysis

Walkability mapping (Map 50)

indicates gaps in the provision of park area within the Burpengary catchment. The following map illustrates these gaps, highlighting the areas that have more than 500m walking distance to recreation and sports parks.

MAP 50 ACCESSIBILITY MAP BURPENGARY - LOCAL RECREATION PARKS

15.5 Burpengary catchment analysis

The desired standards of service outline a target of 1 hectare of land for local recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 65, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 63 above.

TABLE 65 - LAND PROVISION ANALYSIS BURPENGARY LOCAL CATCHMENT

BURPENGARY	2016	2021	2026	2031	2036	Ultimate Demand
Population	11,944	13,493	15,528	16,622	18,274	24,712
Local Recreation Demand ha	11.9	13.5	15.5	16.6	18.3	24.7
Existing Supply	10.52	10.52	10.52	10.52	10.52	10.52
Balance	-1.4	-3.0	-5.0	-6.1	-7.8	-14.2

Table 64 demonstrates that there is a shortfall in the provision of Local recreation parks across the catchment. This is a variation from the LGIP1 calculations which showed current supply was satisfactory. The difference is the re-classification of parks which on review were entirely flood prone and not suitable for the development of the park for use and embellishment. While these parks are retained within Council's network, they do not meet the definition of the Local recreation park and do not provide the level of amenity expected of a trunk park within the LGIP network.

It is noted that some of the growth of the catchment will be in the East where new local parks will be developed in conjunction with development as it occurs. This area is outside the current Priority Infrastructure Area (PIA) and therefore future parks are not noted within the LGIP.

15.6 Burpengary recommendations for public parks solutions

Between the linear park networks improving the amenity and walking trail access as well as making up for the shortfall in the catchment.

15.7 Burpengary Schedule of Works for Public Parks

The following items Table 66 are listed for inclusion in the LGIP Schedule of works to meet the needs of the Burpengary local area catchment.

TABLE 66 - BURPENGARY SOLUTIONS TABLE

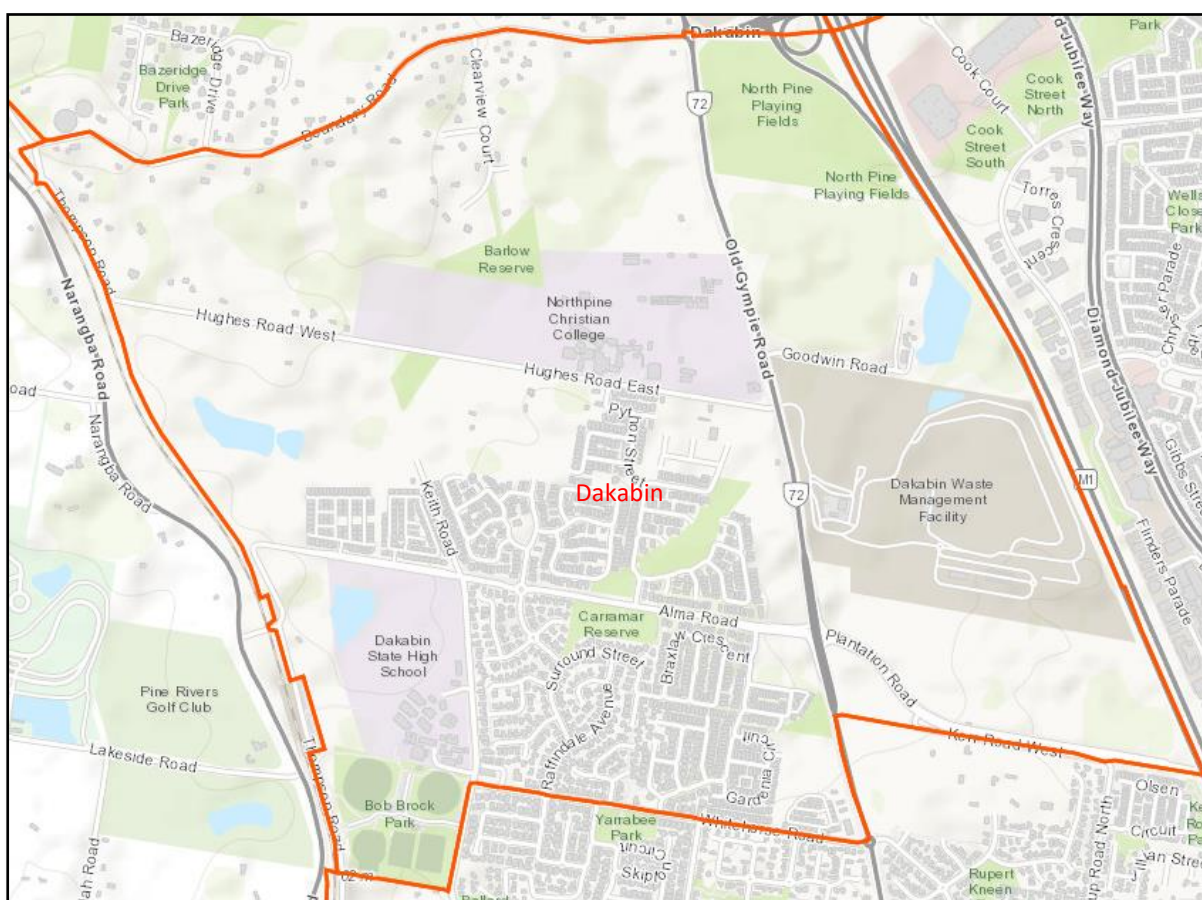

Reference	Catchment	Park	Type	Timeframe
OS - 61	North Lakes, Redcliffe, Moreton Bay Rail Corridor	Burpengary District Civic	District Civic	Investigation

16 Local Catchment - Dakabin - Local Recreation Analysis

16.1 Dakabin Profile Summary

The Dakabin local area is situated between the suburbs of Kallangur and Narangba, along the northern growth corridor. The area contains residential, urban and rural land uses (Map 51). It contains several large undeveloped parcels currently used as farmland and public parks. These lots are zoned general residential in the Next Generation Precinct, Urban Neighbourhood Precinct, with some additional areas zoned Mixed Industry and Business Precinct. There have been several recent residential developments of larger parcels in the area, including multiple dwelling and smaller lot subdivisions. Dakabin is situated in proximity to Lake Kurwongbah, the major commercial centre at North Lakes and has access to the Bruce highway and the railway line.

Some of the major features in the area include Dakabin Railway Station, Dakabin State High School, North Pine Christian College, the Dakabin waste disposal station and a caravan park.

MAP 51 - DAKABIN LOCAL CATCHMENT

16.2 Dakabin population growth assumptions

The population assumptions for the Dakabin local area catchment are shown in Table 67.

TABLE 67 - DAKABIN LOCAL CATCHMENT POPULATION ASSUMPTIONS

Dakabin	2016	2021	2026	2031	2036	Ultimate
Population	3,518	4,913	4,993	6,571	6,701	6,786
Increase over 5 years	2,150	1,396	79	1,579	130	3,268
% growth over 5 years	157%	40%	2%	32%	2%	49% growth from 2016

16.3 Current supply of Local Recreation Parks

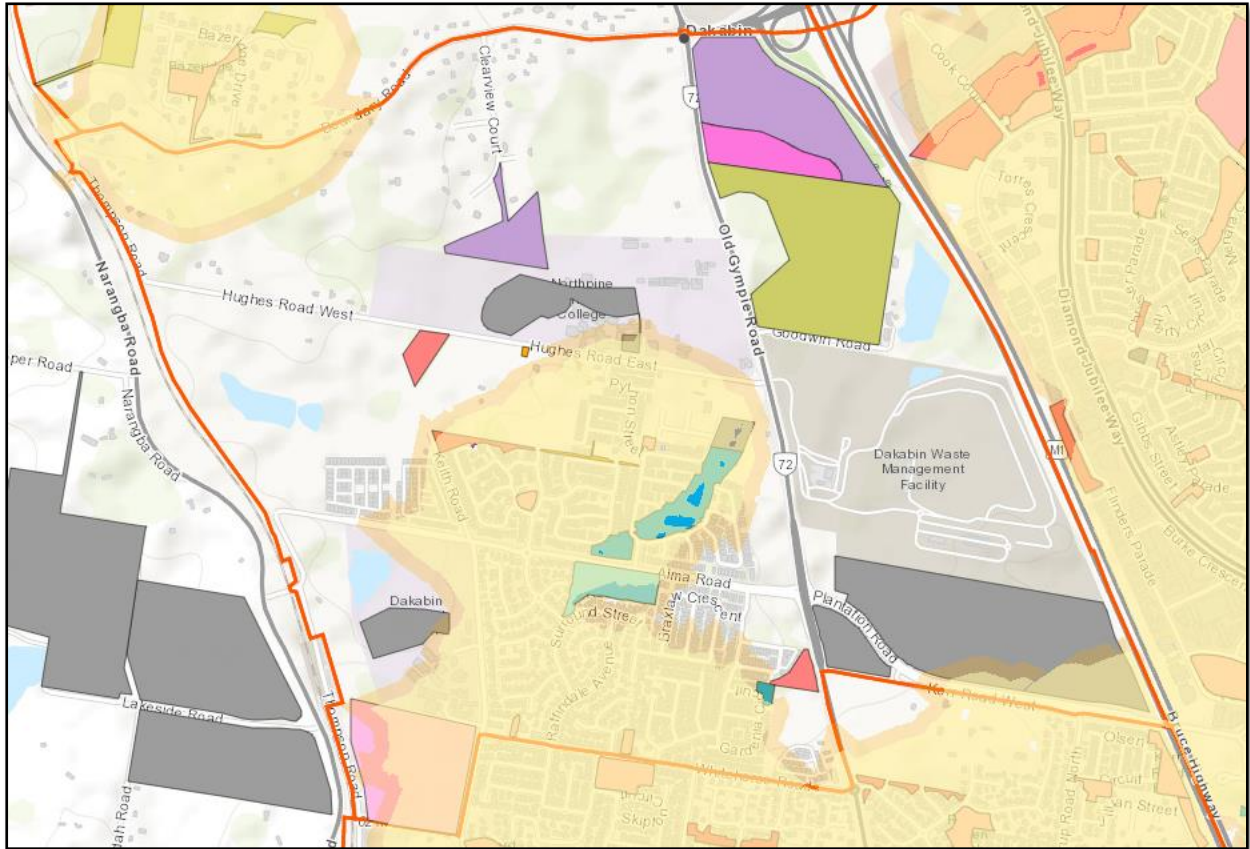

The existing supply of local recreation parks within this local catchment are shown in Table 68. There are only three local recreation parks with a total of 0.5ha.

TABLE 68 - CURRENT SUPPLY OF LOCAL RECREATION PARKS - DAKABIN LOCAL CATCHMENT

Park name	Park address	Land area (a)
Garrong Reserve	88 Whitehorse Road Dakabin	0.13
Essencia Park	13 Essencia Avenue Dakabin	0.28
Monitor Avenue Reserve	1 Monitor Avenue Dakabin	0.14
Total land area		0.55

16.4 Accessibility analysis

Map 52 highlights the accessibility to local recreation parks within the Dakabin local area catchment. It is noted that there are

MAP 52 WALKABILITY MAP - DAKABIN

16.5 Dakabin catchment analysis

The desired standards of service outline a target of 1 hectare of land for local recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 67, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 67 above.

TABLE 69- LAND PROVISION ANALYSIS DAKABIN

Local Catchment	2016	2021	2026	2031	2036	Ultimate Demand
Population	3,518	4,913	4,993	6,571	6,701	6,786
Demand for local recreation	2.95	4.36	4.44	6.02	6.15	6.24
Current provision of local recreation	0.55	0.55	0.55	0.55	0.55	0.55
Balance of local recreation park require	-2.95	-4.36	-4.44	-6.02	-6.15	-6.24

16.6 Dakabin recommendations for public parks solutions

The deficit of location recreation parks is clear in the analysis. Approximately 6.15 additional hectares is required by 3036 and 6.24 hectares by the ultimate development of the Dakabin Local catchment. Table 70 identifies the existing LGIP items which address some of this shortfall, while table 5 includes new additional LGIP parks which should be added to the revised LGIP2 to meet the further needs of this catchment.

17 Local Catchment - Deception Bay / Rothwell - Local Recreation Analysis

17.1 Deception Bay - Rothwell profile summary

The Deception Bay / Rothwell local area is situated between the suburbs of Burpengary in the north, Redcliffe in the east, North Lakes in the south and Narangba in the west. The area is also bounded by Deception Bay in the east and the Bruce Highway in the west. The local area consists of a mix of land uses, including residential areas, commercial and industrial land uses and outlying rural and rural residential areas.

Some of the major features in the local area include Freshwater National Park, Deception Bay Shopping Centre, Shaftesbury Citizenship Centre & Campus, Deception Bay Aquatic & Fitness Centre, Doug Ross Oval, Tee to Green Golf Driving Range, Deception Bay Community Hall, Zone One Shopping Centre, Redcliffe Aerodrome, Nathan Road Sports complex and Wetlands Reserve and George Morris Fields.

MAP 53 - LOCAL CATCHMENT AREA DECEPTION BAY ROTHWELL

17.2 Deception Bay - Rothwell population growth assumptions

The population assumptions for the Deception Bay/ Rothwell local catchment are shown in the table below - Table 72. The table demonstrates a total capacity for this catchment of 7922 more residents within existing zoned development capacity. The population projection from 2016 to 2036 shows an increase of 12% overall - an additional 3,396 residents.

TABLE 72 - DECEPTION BAY ROTHWELL LOCAL CATCHMENT POPULATION ASSUMPTIONS

DECEPTION BAY / ROTHWELL	2016	2021	2026	2031	2036	Ultimate population

17.4 Deception Bay - Rothwell accessibility analysis

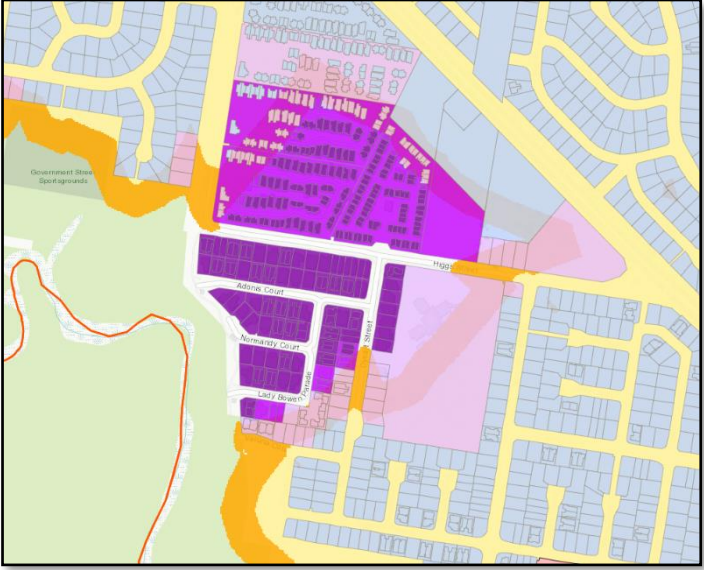

Map 55 illustrate the accessibility to local recreation parks across the Deception Bay Rothwell catchment. There are several gaps in accessibility based on a 500m-600m true walkability mapping analysis. The following map illustrates the walkability mapping.

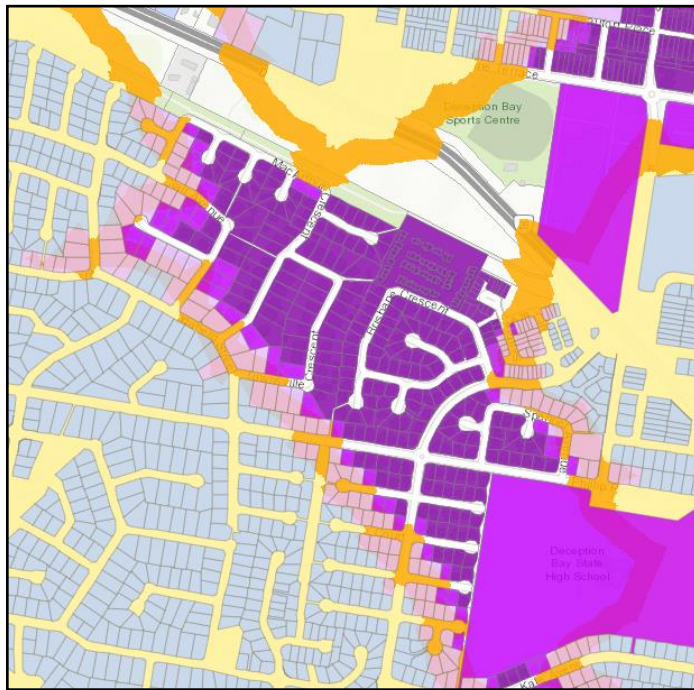

MAP 55 - WALKABILITY ANALYSIS LOCAL RECREATION DECEPTION BAY -ROTHWELL

This map indicates several areas with low level of accessibility, they are further explored in Table 75 accessibility shortfalls below.

TABLE 75 LOCAL RECREATION SOLUTION DECEPTION BAY - ROTHWELL

<p>Higgs Street - Adonis Street - Deception Bay</p> 	<p>This area comprises multiple dwelling units on the north side of Higgs Street and single dwellings and duplexes to the south.</p> <p>The area borders onto the natural area of Saltwater Creek and has access to the Government Street Sports Ground (owned by MBRC as Reserve). Opportunity to embellish this sports parks to include local recreation amenity would improve local recreation opportunities in this area.</p>
 <p>Admiral Drive - Major Street, Deception Bay</p>	<p>This area is located to the west of Government Street Sports Ground and within accessibility walking distance to that facility</p> <p>Similarly, it would be supported by the development of this sports ground to include local recreation amenity.</p> <p>There are also walking paths along the North Lakes Environmental Reserve natural area for recreation purposes.</p>

MacArthur Crescent Brisbane Crescent Deception Bay

This area lacks local recreation parks and it is noted that Deception Bay Road divides it from the Deception Bay Sports Centre.

The sports centre does offer a range of recreational opportunities and is within 700m of most houses in this area some of these properties taking into account the crossing at Bailey Road.

There is little opportunity to develop a local park within this area without acquisition of developed land and removal of houses.

Emphasis should be placed on the development and maintenance of Deception Bay Sports centre to cater for this area, including playground and picnic facilities.

The Esplanade

The area indicated along the Esplanade as being beyond the 600m walking distance to a local recreation park is all within the walking distance to the Esplanade Foreshore park and within walking distance to the district recreation park at the Deception Bay library.

No further items are required at this location.

17.5 Deception Bay - Rothwell catchment analysis

The desired standards of service outline a target of 1 hectare of land for local recreation parks for every 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 76, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 72 above.

TABLE 76 - DECEPTION BAY - ROTHWELL LAND PROVISION ANALYSIS

DECEPTION BAY - ROTHWELL	2016	2021	2026	2031	2036	Ultimate population
Population	26,473	27,202	27,612	28,829	29,869	34,395
Demand for local recreation (ha)	26.473	27.202	27.612	28.829	29.869	34.395
Current provision of local recreation (ha)	32.9	32.9	32.9	32.9	32.9	32.9
Balance of park to DSS	6.4	5.7	5.3	4.1	3.0	-1.5

17.6 Deception Bay - Rothwell Recommendations for public parks solutions

While the catchment analysis has not shown a need for future local recreation parks there are a number of parks within the catchment that do require further upgrading and embellishment to bring them up to the desired standard of service. The current LGIP items are listed in Table 77.

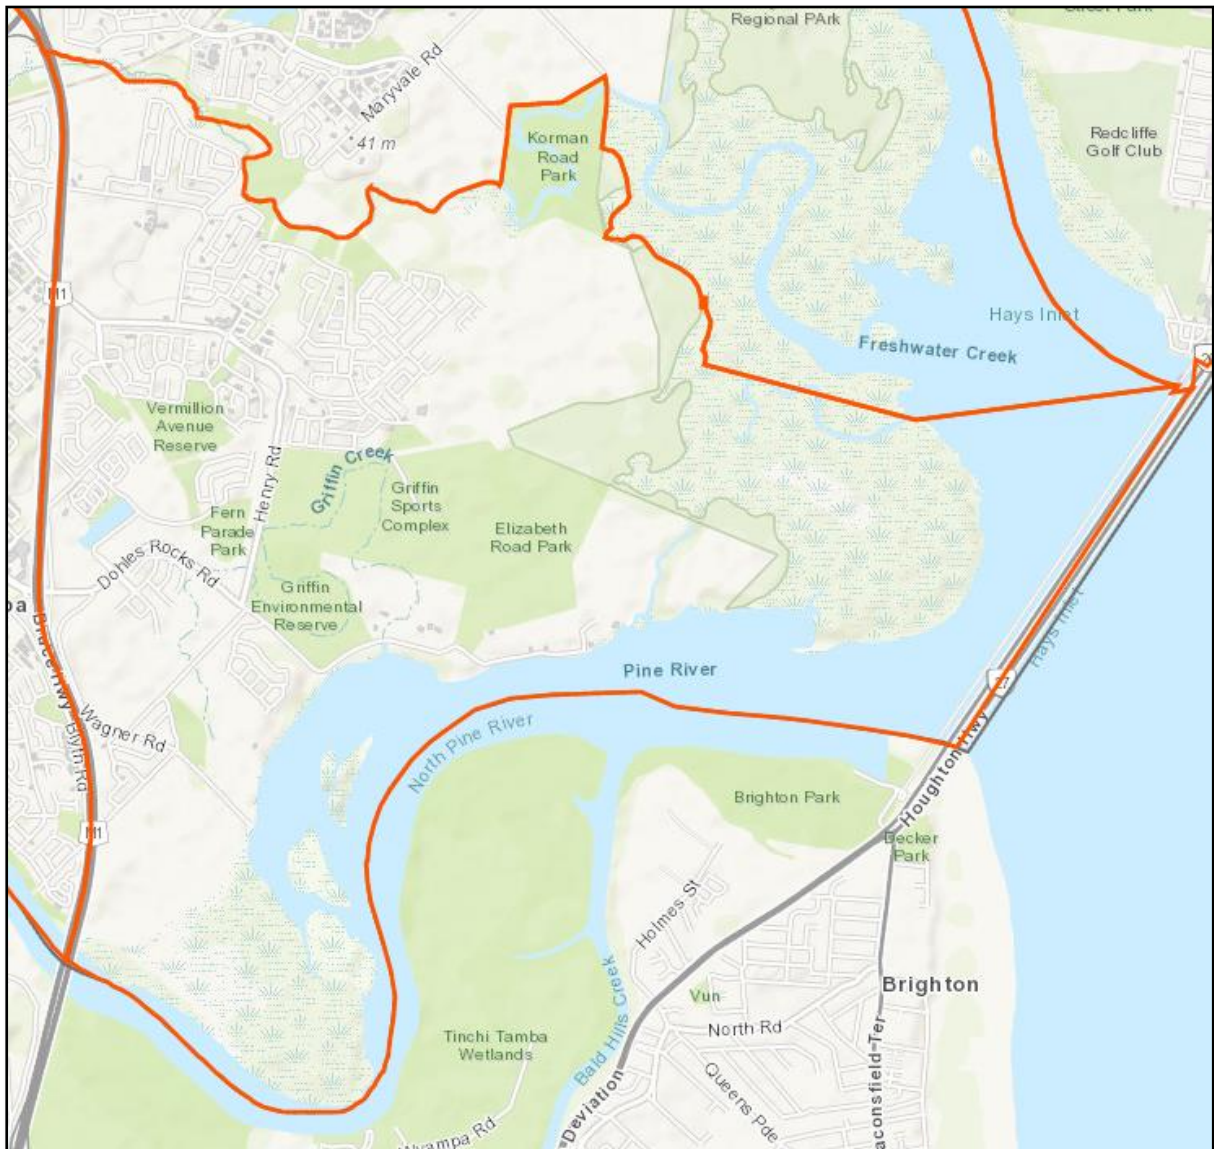

TABLE 77- CURRENT LGIP ITEMS DECEPTION BAY - ROTHWELL

Reference	Location	Detail	Comments and Status
OS-16	Deception Bay community centre	District Park	
OS-71	Boama Park	Local foreshore	
OS-113	Deception Bay	Local recreation park	Land and embellishment to create connection and improve accessibility
OS-114	Deception Bay	Local recreation park	
OS-115	Bonton Avenue park	Local recreation park embellishment	
OS-116	Parsons Boulevard Park	Local recreation park embellishment	Parsons Blvd Park
OS-145	Antigua Crescent park	Local recreation park	
OS-146	Deception Bay	Local recreation park	Increase size of park

18 Local Catchment - Griffin - Local Recreation Analysis

18.1 Griffin local catchment profile summary

The Griffin local area is bordered by Mango Hill in the north, Freshwater Creek and North Pine River in the east and south and Kallangur in the west. The Griffin local area is a developing urban area with rural and agricultural land uses in the east. Recreation, boating and fishing facilities along the northern shore of the Pine River are within close reach. The eastern part of Griffin is a wetland which extends towards the mouth of the North Pine River see Map 56.

MAP 56 - GRIFFIN LOCAL CATCHMENT BOUNDARY

18.2 Griffin population growth assumptions

The population assumptions for Griffin local catchment are shown in Table 78.

TABLE 78 - GRIFFIN LOCAL CATCHMENT POPULATION ASSUMPTIONS

GRIFFIN	2016	2021	2026	2031	2036	Ultimate
Population	7,109	12,759	14,843	15,796	15,984	16,053
Five-year growth	4,338	5,650	2,084	953	189	8,943
Percentage Five-year growth	156.5%	79.5%	16.3%	6.4%	1.2%	55.8%

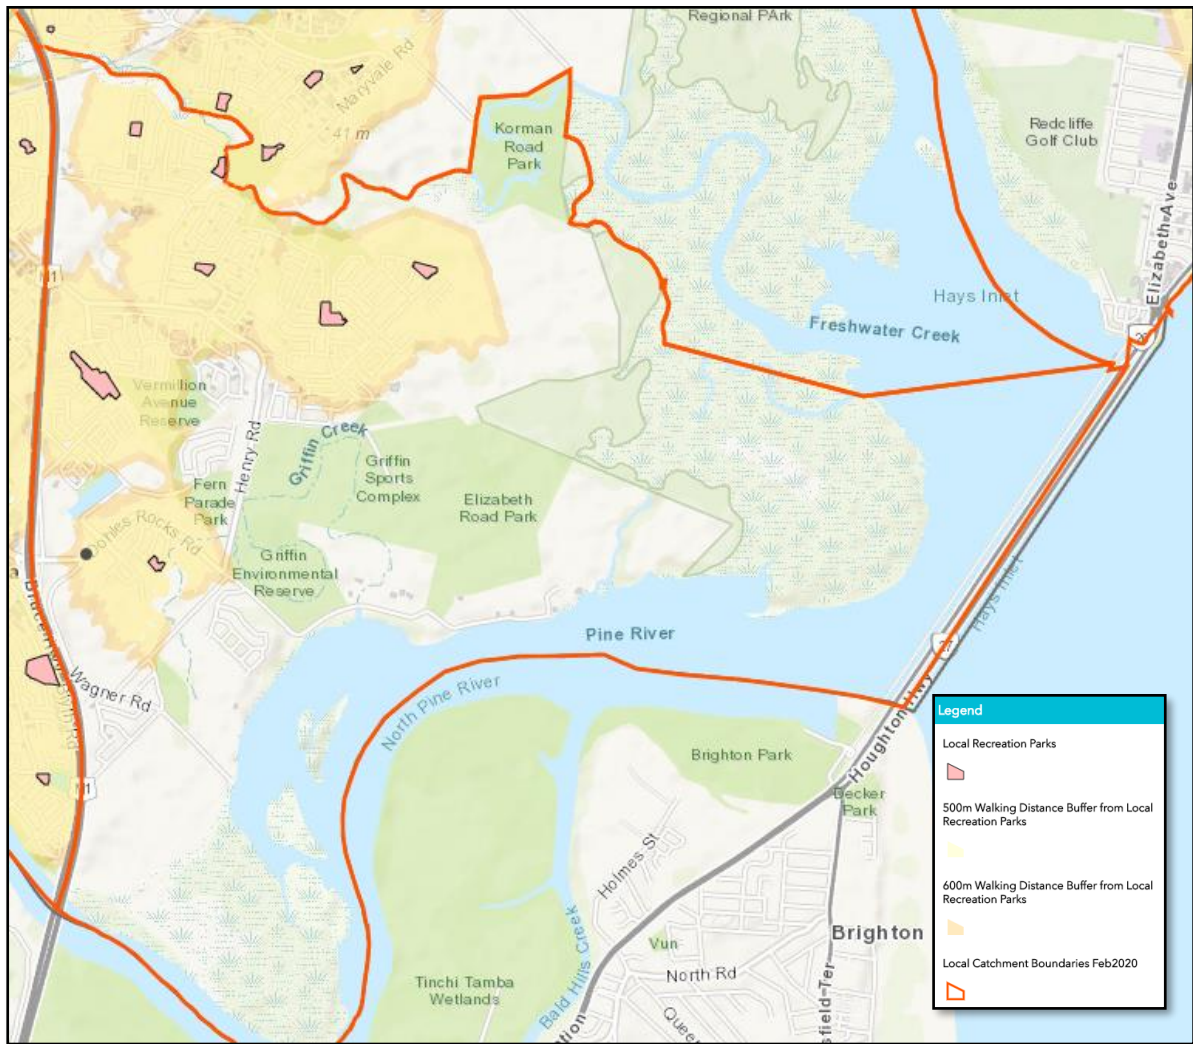

18.3 Griffin current supply of Local Recreation parks

The existing supply of local recreation parks within Griffin local catchment are shown in Table 79.

TABLE 79 - GRIFFIN CURRENT SUPPLY OF LOCAL RECREATION

Park Name	Classification	Address	Park Area m ²
Aspire Parade	Local Recreation	Victoria Drive	5,199
Dohles Rocks Foreshore	Local Foreshore	Dohles Rocks Road	5,563
Sandalwood Crescent Park	Local Recreation	Sandalwood Crescent	6,849

New Local Recreation Park	Local Recreation	Victory Drive	3,999
Total Area			62,327m ²

18.4 Griffin accessibility analysis

MAP 57 - GRIFFIN - WALKABILITY FOR LOCAL RECREATION PARKS

18.5 Griffin catchment analysis

The desired standards of service outline a target of 1 hectare of land for local recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 80, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 78 above.

TABLE 80 - GRIFFIN LOCAL CATCHMENT LAND PROVISION ANALYSIS

GRIFFIN	2016	2021	2026	2031	2036	Ultimate
Population	7,109	12,759	14,843	15,796	15,984	16,053
Local Recreation DSS Demand (ha)	7.1	12.8	14.8	15.8	16.0	16.1
Existing Supply (ha)	6.2	6.2	6.2	6.2	6.2	6.2
Balance/ Shortfall (ha)	-1	-7	-9	-10	-10	-10

The Griffin local catchment presents a challenge in meeting the DSS through to the Ultimate population projection and a deficit of 10 hectares is anticipated from 2031.

The current LGIP includes nine parks in the SOW, Table 81 indicates current status and projected future supply. Those not currently included in the list of parks will provide a future 1.5ha of local recreation park leaving a deficit of 8.5ha.

TABLE 81 - GRIFFIN RECENT DELIVERY OF PARKS

Identification	Address	Status	Additional Area
OS-89	Victory Road	Delivered	4000m2 (existing)
OS-85	Stewart Road	Included in DA approved 2019 - awaiting development	5000m2 (future)
OS-91	Aspire Parade	Delivered - much of this area is stormwater detention and doesn't function as local recreation, the balance is heavily treed	5219m2 (existing - does not meet DSS)
OS-87	Sandalwood Crescent	Delivered	6849m2 (existing)
OS-92		Awaiting DA	5000m2
OS-88	Wagner Road	No park provided - move location to south to Lot 1002 Wagner Road, Griffin	5000m2
OS-90	Beverly Court	Delivered	4005m2 (existing)
Total area of future local recreation parks planned			15,000m2 1.5ha
Sports at district level not local recreation			
OS-67		District Sport - Griffin Sports	66.5ha

18.6 Griffin solutions for park provision

Several additions to the trunk park network are recommended to make up the shortfall in the Griffin catchment. The combination of conversions of linear parks to local recreation parks where applicable. Inclusion of a higher-level District recreation park which is also missing for the local catchment and additional items added to the LGIP SOW.

The solutions for local recreational park deficit are offered in Table 81.

TABLE 82 GRIFFIN RECOMMENDED SOLUTIONS TABLE

Conversion of linear parks	Area m2
Nutmeg Drive Park	3,566m2
Elderflower Circuit Reserve	4,595m2
91 Sandalwood Crescent	5,516m2
Additional District Recreation Park	
Korman Road (512 Brays Road)	14.368ha

19 Local Catchment - Kallangur - Local Recreation Analysis

19.1 Kallangur Profile Summary

The Kallangur local area is located north of Petrie and west of the Northlakes and Mango Hill area. It is an urban area comprising of low-density residential housing and a district centre. Land for further expansion within the local area boundaries is extremely limited. The area is connected to the rest of the region by Kallangur Station and the Bruce Highway. Some of the major features of the local area include the Watson Park Convention Centre, Kallangur Fair Shopping Centre, Lillybrook Shopping Centre, John Oxley Reserve, Murrumba Downs Shopping Centre, Murrumba Downs Community Pool, Harold Moroney Reserve, Murrumba Downs Sewerage Treatment Plant and the North Pine River, see Map 58.

MAP 58 - KALLANGUR LOCAL CATCHMENT

19.2 Kallangur population growth assumptions

The population assumptions for the Kallangur local catchment are shown in Table 84.

TABLE 84 - KALLANGUR LOCAL CATCHMENT POPULATION ASSUMPTIONS

Kallangur	2016	2021	2026	2031	2036	Ultimate
Population	32,082	32,694	34,849	37,343	40,763	54,363
Five-year population growth assumptions	2,317	612	2,154	2,495	3,419	22,280*
Five-year population growth as percentage	7.8%	1.9%	6.6%	7.2%	9.2%	68.1% ⁸

*growth 2016 to ultimate

Table 84 indicates a steady growth with a growing population as the areas around the rail line experience infill development at a higher density and the larger lots will development potential area taken up. The development of the University at Petrie could stimulate further development in Kallangur.

19.3 Kallangur current supply of Local Recreation parks

The existing supply of local recreation parks within the Kallangur local catchment are shown in the table 84.

TABLE 85 - CURRENT SUPPLY OF LOCAL RECREATION PARKS KALLANGUR

19.4 Kallangur accessibility analysis

Map 59 highlights the accessibility of residential blocks to local recreation parks, subsequently showing those areas which are located beyond the comfortable walking distance of 500 - 600m to a local recreation park.

MAP 59 - WALKABILITY KALLANGUR - LOCAL RECREATION PARKS

It is noted that within the Kallangur catchment an extensive network of linkage parks provided along the Freshwater Creek. These parks are generally are not classified as trunk parks, however, there are park areas along the network which are embellished with local park facilities and function for their local communities as local recreation parks. These areas have been reclassified as local recreation for a more accurate reflection of

the supporting trunk infrastructure for the community within this catchment. Examples of these parks include portions of Kingfisher Park on Allison Drive which includes a playground, picnic area and kickabout space. A further example is a portion of the John W Mott Reserve which also have play and exercise equipment and a small kickabout area.

FIGURE 60 - KINGFISHER PARK ON FRESHWATER CREEK, KALLANGUR

FIGURE 61 - JOHN W MOTT PARK ON FRESHWATER CREEK, KALLANGUR

19.5 Kallangur catchment analysis

The desired standards of service outline a target of 1 hectare of land for local recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 87, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 84 above.

TABLE 87 - KALLANGUR LAND PROVISION ANALYSIS

Kallangur	2016	2021	2026	2031	2036	Ultimate

20 Local Catchment - Narangba - Local Recreation Analysis

20.1 Narangba profile summary

The Narangba local area is bordered by Burpengary Creek in the north, the Bruce Highway in the east, Boundary Road in the south and Oakey Flat Road in the west. It is located within a 21km drive of Caboolture. The area is developing quickly. It is primarily characterised by suburban housing and housing estates, commercial areas and industrial areas. The rural residential neighbourhood of Narangba East is expected to develop further.

Some of the major features of the area include Narangba Valley Shopping Centre, Narangba Sporting Complex, Narangba Sports and Recreation Ground, several parks and numerous schools. The area's proximity to the railway line and the Bruce Highway make it an attractive place for investment.

MAP 62 - LOCAL CATCHMENT NARANGBA

20.2 Narangba population growth assumptions

The population assumptions for the Narangba local catchment are shown in Table 89. The population of Narangba is expected increase from 18,867 in 2016 to 30,200 in 2036. The ultimate population indicates further development potential for 9,881 more residents to a total of 40,081 at ultimate development. These population figures indicate that at the 2021 assumed population of 21963 the population was just over half of the capacity of the catchment. Some areas of the catchment fall outside the Priority Infrastructure Area, and some areas are zoned transition precinct and will be developed over time.

TABLE 89 - POPULATION ASSUMPTIONS NARANGBA LOCAL CATCHMENT

Narangba Local Catchment	2016	2021	2026	2031	2036	Ultimate
Population	18,867	21,963	25,023	28,165	30,200	40,081

Classification	Area
Local Recreation	43.9 ha
Local Civic	0.25ha
Local Sports	8.09ha

20.4 Narangba Accessibility analysis

Accessibility to local recreation parks is relatively good for the existing local recreation parks and the neighbourhoods they serve. Most of the local recreation parks work in combination with linear parks that support the stormwater creek systems which provide additional amenity for the neighbourhoods. The areas with lower levels of access to the local recreation parks have access to the district sports parks located within the catchment.

MAP 63 - WALKABILITY NARANGBA LOCAL CATCHMENT 500M-600M

20.5 Narangba catchment analysis

The desired standards of service outline a target of 1 hectare of land for local recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 3, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 1 above.

TABLE 91 - NARANGBA LAND PROVISION ANALYSIS

NARANGBA	2016	2021	2026	2031	2036	Ultimate
Population	18,867	21,963	25,023	28,165	30,200	40,081
Supply needed to meet DSS (Ha)	18.87	21.96	25.02	28.17	30.20	40.08
Current supply (Ha)	43.90	43.90	43.90	43.90	43.90	43.90
Excess or shortfall analysis (Ha)	25.03	21.94	18.88	15.73	13.70	3.82

20.6 Narangba recommendations for public parks solutions

There is one LGIP item included in the recommendations for Narangba local catchment, it is recommended that this item is continued into LGIP2

TABLE 92 - RECOMMENDATIONS FOR PUBLIC PARKS NARANGBA LOCAL CATCHMENT

Reference	Address	Classification	Comments
OS-52	Harris Ave, Narangba	District Sport	Still required

No additional LGIP items required for trunk parks at this time - more will be required as transition and interim zones are developed and come into the PIA.

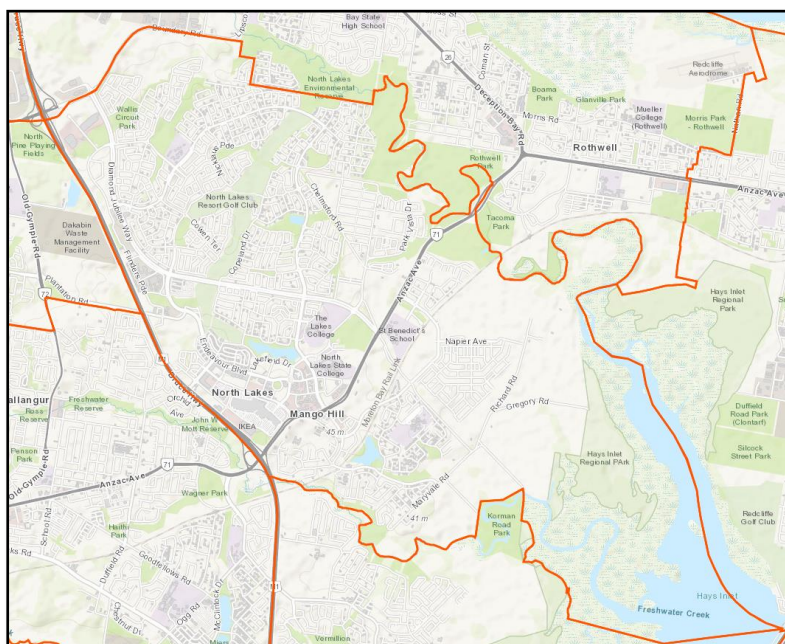

21 Local Catchment - North Lakes / Mango Hill - Local Recreation Analysis

21.1 North Lakes- Mango Hill profile summary

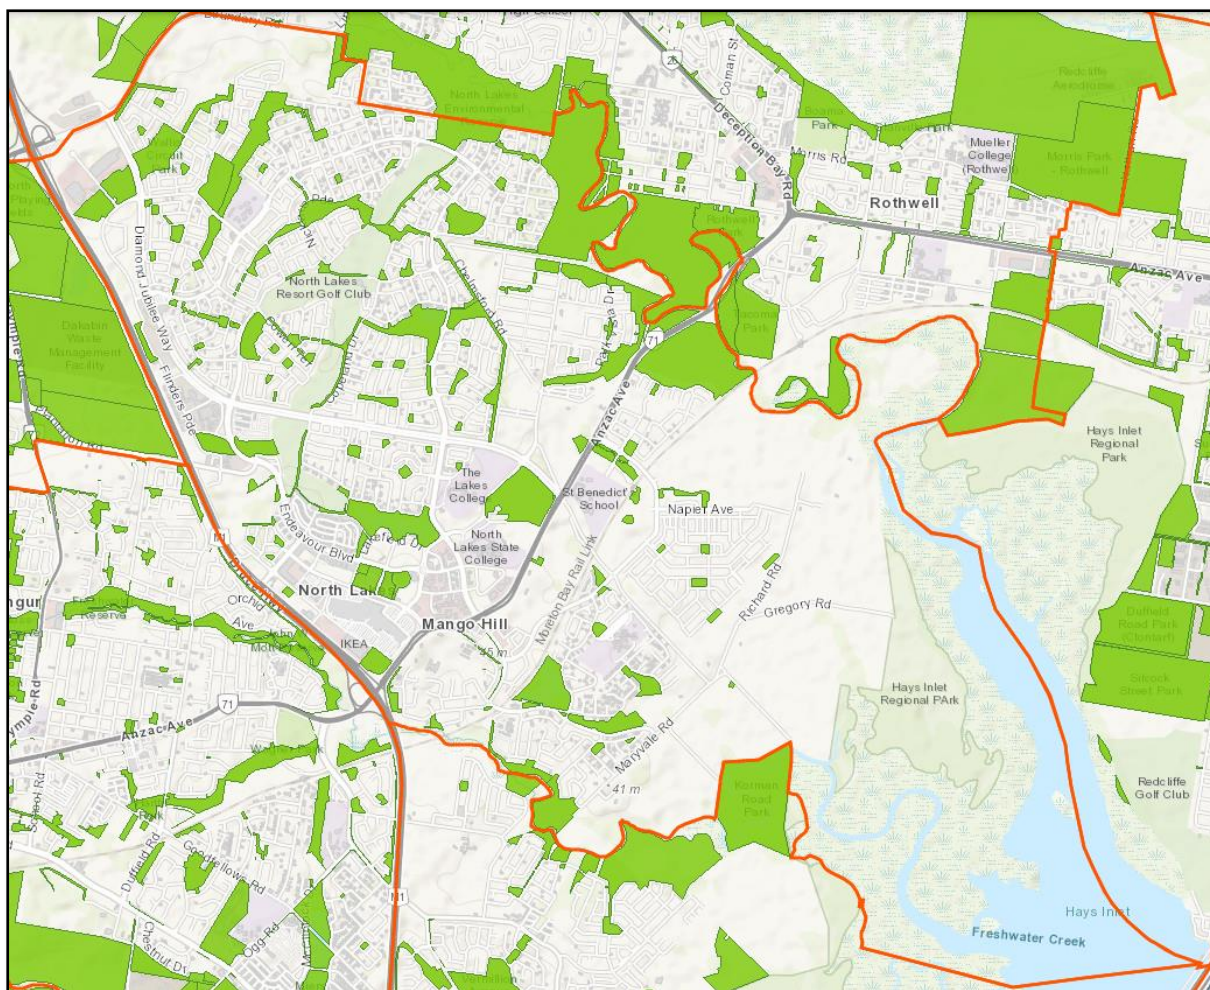

The North Lakes and Mango Hill local area is an urban area consisting of residential and commercial uses. North Lakes has experienced rapid growth since 2001 during the establishment of a master planned community. North Lakes is bordered by Deception Bay to the north, North Lakes Environmental Reserve to the east, the Bruce Highway and Kallangur to the west, with Mango Hills, Griffin and Murrumba downs to the south, see Map 64.

Mango Hill is a developing urban area currently experiencing significant growth. It has some remaining large rural lots to the east including undeveloped parcels of farmland. The local area is bordered by North Lakes and Rothwell to the north, Saltwater Creek running along the eastern between Mango Hill and Clontarf. The southern boundary is defined by Freshwater Creek with Griffin on the southern side. The Bruce Highway creates the western boundary.

Some of the major features in the North Lakes and Mango Hill local area include Westfield North Lakes Shopping Centre, Hilltop Shopping Centre, North Lakes Day Hospital, North Lakes Environmental Park, North Lakes Golf Club, Pathways Leisure Centre, Woodside Sports field and Park, Melaleuca Lakes and Parklands, Lake Eden, Mackenzie Park and several schools. North Lakes Golf Club is closing in late 2019. Up to 85% of this land is expected to become an environmental area with publicly available open space, this is currently not classified as trunk infrastructure.

MAP 64 - NORTH LAKES MANGO HILL CATCHMENT BOUNDARY

MAP 65 - PARKS AND COMPLEXES IDENTIFIED IN NORTH LAKES AND MANGO HILL CATCHMENT

21.2 North Lakes- Mango Hill population growth assumptions

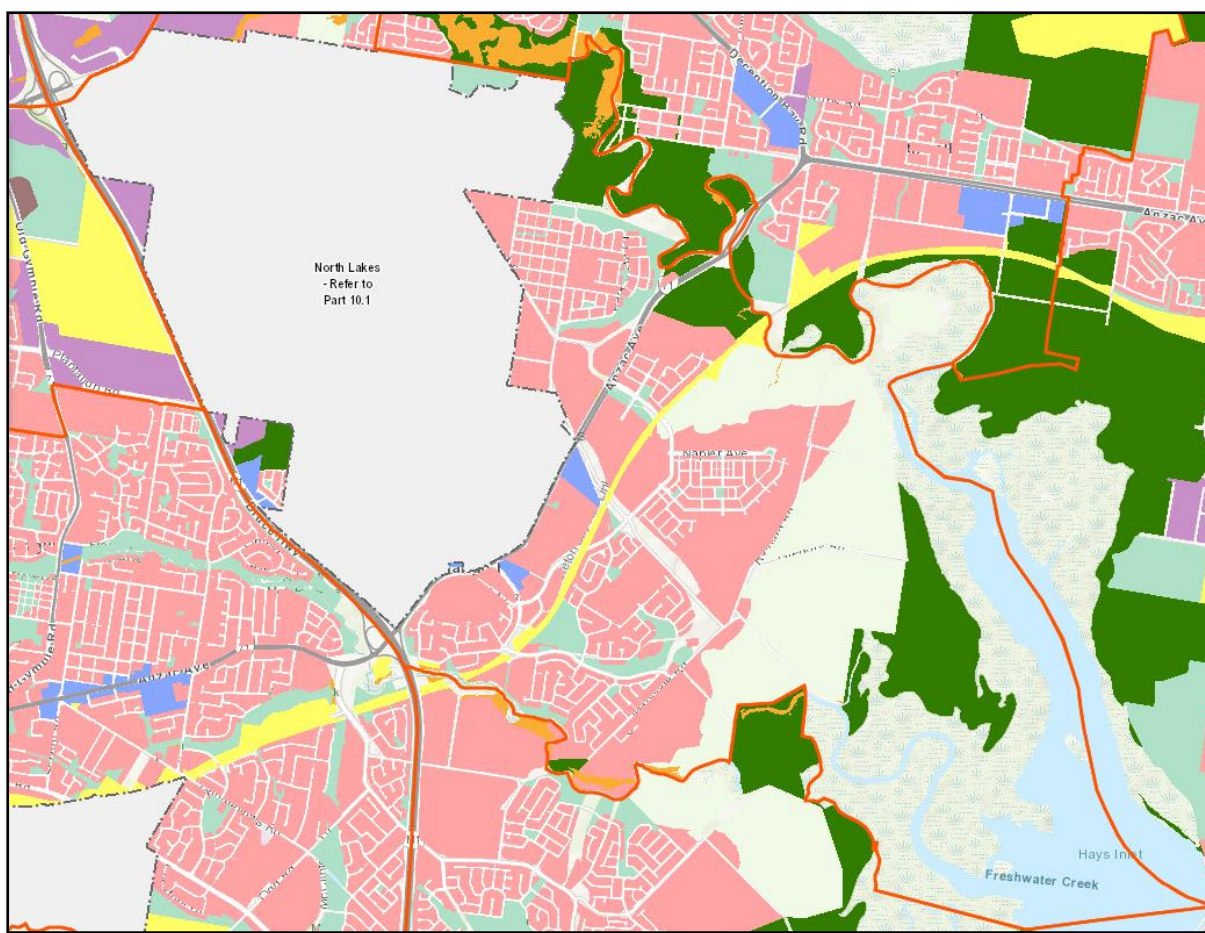

Mango Hill North Lakes experienced significant growth from 2011 to 2016 of 44.3%, while growth has continued at a significant rate to 2021 at 26.6% to the current population assumption of 39,966 for 2021. The population assumptions indicate continued growth to 2036 with a population of 51,948 residents and to an ultimate population of 55,320.

TABLE 93 - NORTH LAKES- MANGO HILL LOCAL CATCHMENT POPULATION ASSUMPTIONS

NORTH LAKES / MANGO HILL	2016	2021	2026	2031	2036	Ultimate
Population	31,559	39,966	44,735	50,951	51,948	55,320
5-year population growth	9,689	8,408	4,769	6,215	997	23,762*
Percentage population growth over 5-year period	44.3%	26.6%	11.9%	13.9%	2.0%	75.3%*

*Growth from 2016 to ultimate

Population assumptions take in the entire catchment from North lakes and Mango Hill, noting that most of North Lakes is covered by the existing infrastructure agreement which has delivered most of its trunk-like infrastructure.

MAP 66 - ZONING MAP SHOWING NORTH LAKES INFRASTRUCTURE AGREEMENT AREA

21.3 North Lakes- Mango Hill Current supply of Local Recreation Parks

The existing supply of local recreation parks within the North Lakes - Mango Hill local catchment is shown in the following Table 94 - Current supply of local recreation parks North Lakes - Mango Hill.

TABLE 94 - CURRENT SUPPLY OF LOCAL RECREATION PARKS NORTH LAKES - MANGO HILL

Park Name	Classification	Address	Suburb	Area m ²
Lakefield Drive Park	Local Civic Park	Lakefield Drive	NORTH LAKES	6,149

Table 95 shows the total for each type of local trunk park for North Lakes Mango Hill catchment.

TABLE 95 - TOTAL AREA OF LOCAL PARKS IN THE NORTH LAKES - MANGO HILL CATCHMENT

	Area m2	Area Ha
Total All local Parks	464,594	46.46
Total all local recreation parks	354,719	35.47
Total all local civic parks	6,648	0.66
Total all local sports parks	103,228	10.32

21.4 North Lakes- Mango Hill accessibility analysis

Map 70 illustrates the walkable catchment at 500m and 600m for each local park within the catchment. Most areas are well serviced in terms of local recreation parks. These parks in the North Lakes neighbourhood were provided under the North Lakes Infrastructure Agreement which accompanied the DCP for the area. This area was master planned at its inception and parks were delivered generally in accordance with the masterplan. The standards and level of parks were slightly different within this area to the rest of the region.

MAP 67 - WALKABILITY NORTH LAKES - MANGO HILL

21.5 North Lakes - Mango Hill catchment analysis

The desired standards of service outline a target of 1 hectare of land for local recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 96, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 93 above.

TABLE 96 -NORTH LAKES- MANGO HILL LAND PROVISION ANALYSIS

NORTH LAKES / MANGO HILL	2016	2021	2026	2031	2036	Ultimate
Population	31,559	39,966	44,735	50,951	51,948	55,320
Supply needed to meet DSS (ha)	31.6	40.0	44.7	51.0	51.9	55.3
Current supply (ha)	46.46	46.46	46.46	46.46	46.46	46.46
Excess or shortfall analysis (ha)	14.9	6.5	1.7	-4.5	-5.5	-8.9

21.6 North Lakes Mango Hill recommendations for public parks solutions

Table 97 includes the recommendations for future public parks in the North Lakes - Mango Hill catchment noting that the infrastructure agreement over North Lakes is still in place at the time of analysis.

TABLE 97 - RECOMMENDATIONS FOR FUTURE LOCAL RECREATION PARKS MANGO HILL

Reference	Location	Type	Solution
OS-98	Mango Hill Local Recreation	Local Park	New Land & Embellishments
OS-99	Mango Hill Local Recreation	Local Park	New Land & Embellishments
OS-2219	1 Lighthorse Court & 5 Kinsella Road	Local Park	New Land & Embellishments
OS-2220	1835 Anzac Ave Mango Hill	Local Park	New Land & Embellishments

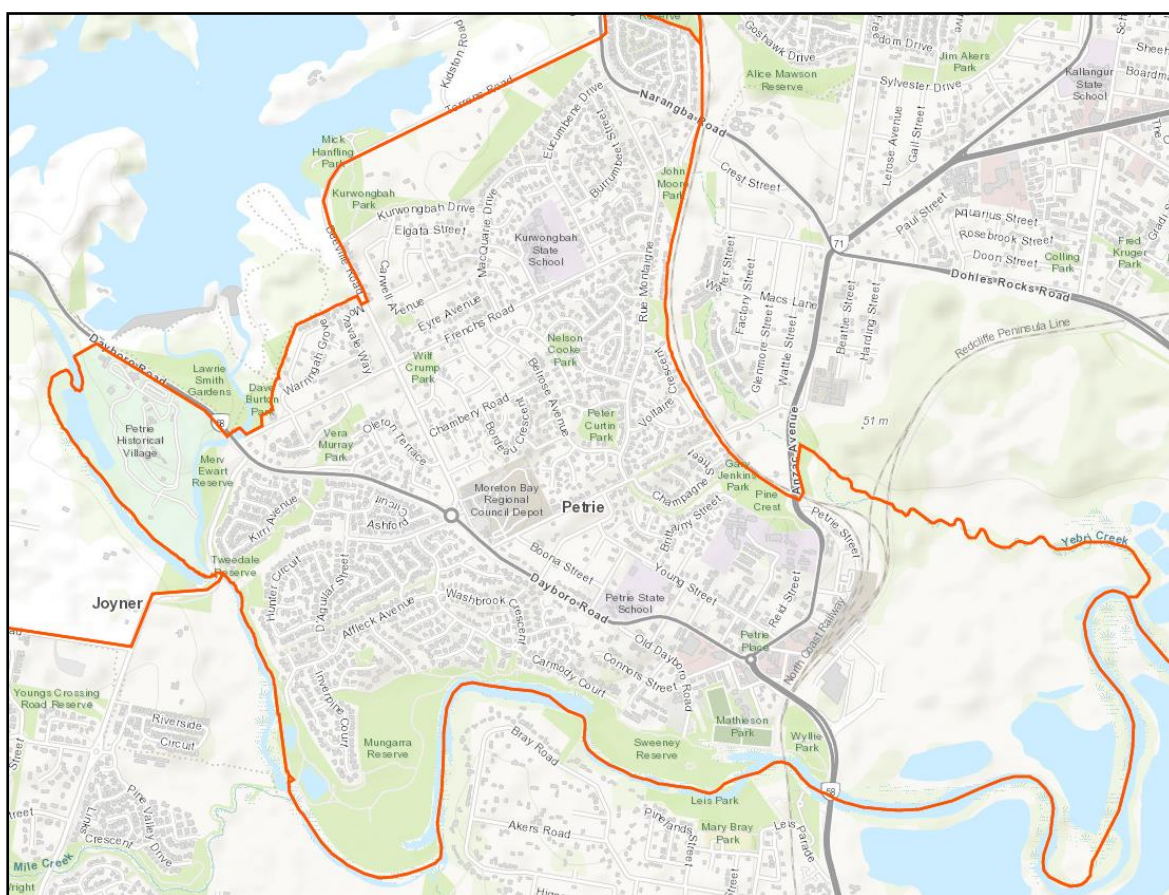

It is noted that to meet the 200m walking distance desired for local recreation parks in the urban residential precinct (Moreton Bay Regional Council Planning Scheme Policy - Attachment B) therefore OS-99 should be providing two local recreation parks 400m apart. An additional item should be added to the SOW to facilitate this need.

22 Local Catchment - Petrie Village - Local Recreation Analysis

22.1 Petrie Village profile summary

The Petrie local area is situated between the suburbs of Kallangur in the east, Lawnton in the south and Dayboro in the west and north. The suburb contains urban land uses and suburban detached dwellings. There is limited land for greenfield development. The Mill, a USC campus will be located within this local area. The existing railway line adjoins the suburb in the east, and the first station of the Moreton Bay Rail Link is located within this area.

The major features of Petrie include Pine Rivers Heritage Museum, Petrie Village Shopping Centre, Mungarra Reserve, Sweeny Reserve, Bray Hall Community Centre, Gordon Lookout and several schools.

MAP 68 - LOCAL CATCHMENT BOUNDARY - PETRIE

22.2 Population growth assumptions

The population assumptions for this local catchment are shown in Table 98. The population in the 2021 assumption is 9,733 residents, an anticipated growth to 11,791 in 2036 is a total increase of 2409. Most of this development is through infill development of existing suburban residential style development. With the development of the new university at the Mill site demand for higher density forms of housing should see the redevelopment of several potential sites in the catchment.

TABLE 98 - LOCAL CATCHMENT POPULATION ASSUMPTIONS

Petrie Village	2016	2021	2026	2031	2036	Ultimate
Population	9,382	9,733	9,926	10,738	11,791	15,362
5-year population growth	262	350	193	812	1,054	5,979
Percentage	2.9%	3.7%	2%	8.2%	9.8%	46.7%

22.3 Petrie Village current supply of Local Recreation parks

The existing supply of local recreation parks within Petrie Village local catchment are shown in Table 99. There are 16 local recreation parks with a total area of 16.1ha. Two local civic parks are included in the list, Petrie Place and Marion McKay Park

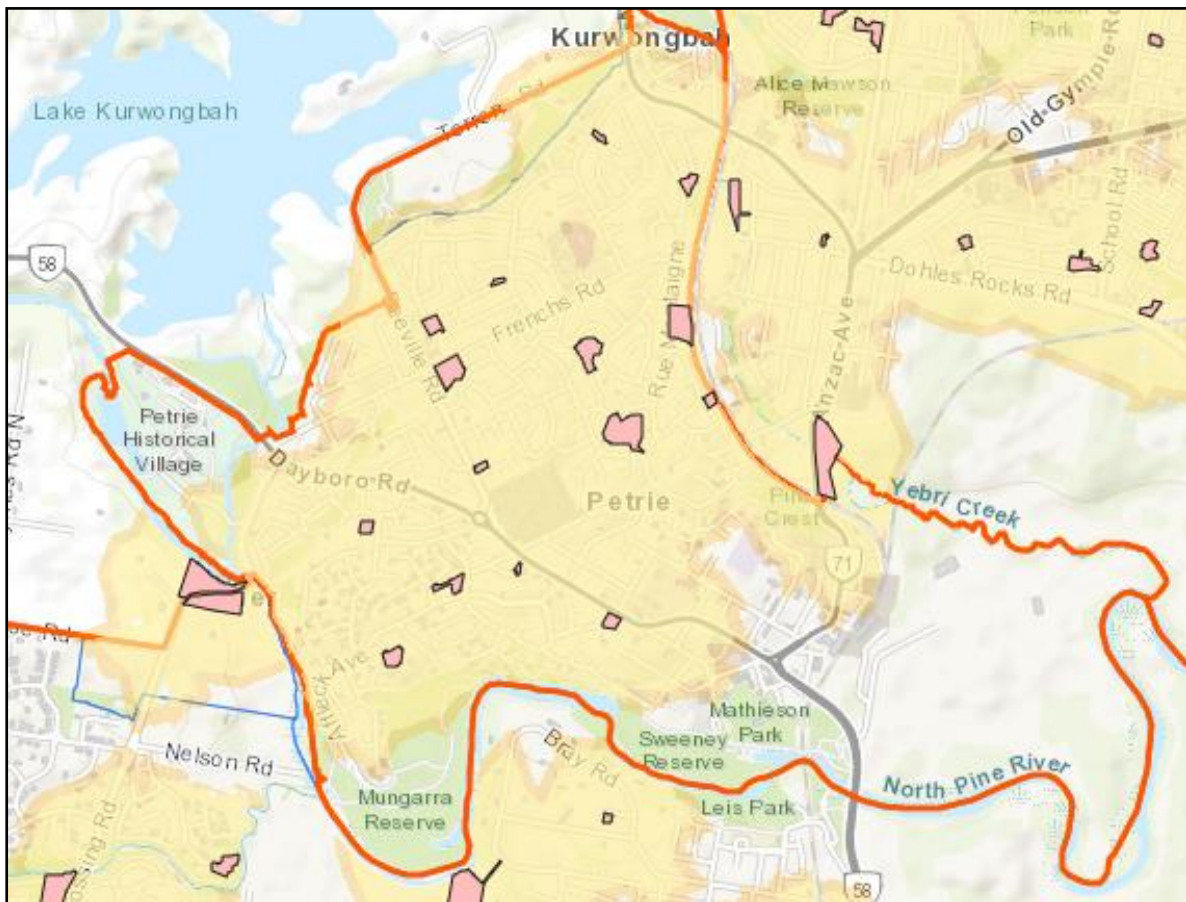

TABLE 99 - PETRIE VILLAGE - CURRENT SUPPLY OF LOCAL RECREATION PARKS

Park Name	Classification	Address	Suburb	Area m2
Petrie Place	Local Civic Park	Anzac Avenue	PETRIE	4760.78
Marion McKay Park	Local Civic Park	Old Dayboro Road	PETRIE	118.69
Waratah Park	Local Recreation	Rue Montaigne	PETRIE	12002.60

Mathieson Park	Local Sports Park	Mundin Street	PETRIE	57339.97
Ruth Whitfield Park	Local recreation	Anzac Avenue	PETRIE and Kallangur	21809.07
Total				161385.00

22.4 Petrie Village accessibility analysis

The walkability mapping indicated that most areas within the Petrie catchment have access to a local recreation park within the 500m or 600m walkability distance (Map 69). There are some areas towards the civic centre that have a lower level of accessibility - these areas are within the walkability catchment of Petrie Place civic park.

The developing regional park at the Mill site will provide a great amenity for residents of the Petrie Village even though as a PDA it is outside consideration for the LGIP process.

MAP 69 - ACCESSIBILITY FOR PETRIE LOCAL RECREATION PARKS

22.5 Petrie Village catchment analysis

The desired standards of service outline a target of 1 hectare of land for local recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 100, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 98 above. The table indicates that there is sufficient area to population ratio to meet the current DSS.

TABLE 100 - LAND PROVISION ANALYSIS PETRIE VILLAGE

PETRIE VILLAGE	2016	2021	2026	2031	2036	Ultimate
Population	9,382	9,733	9,926	10,738	11,791	15,362
DSS required land (ha)	9.38	9.73	9.93	10.74	11.79	15.36
Current provision (ha)	16	16	16	16	16	16
Balance surplus (ha)	7	6	6	5	4	1

22.6 Petrie Village recommendations for public park solutions

Two recommendations are made for the Petrie local catchment, both have existing LGIP items associated with their upgrades.

One is a regional recreation park at Petrie historic village, the timeframe for this item is pushout to a later date with the development of a regional type facility at The Mill site. While this park is not within the PIA and is separately considered in terms of the PDA, the park will serve the regional area with a new park facility at a regional level.

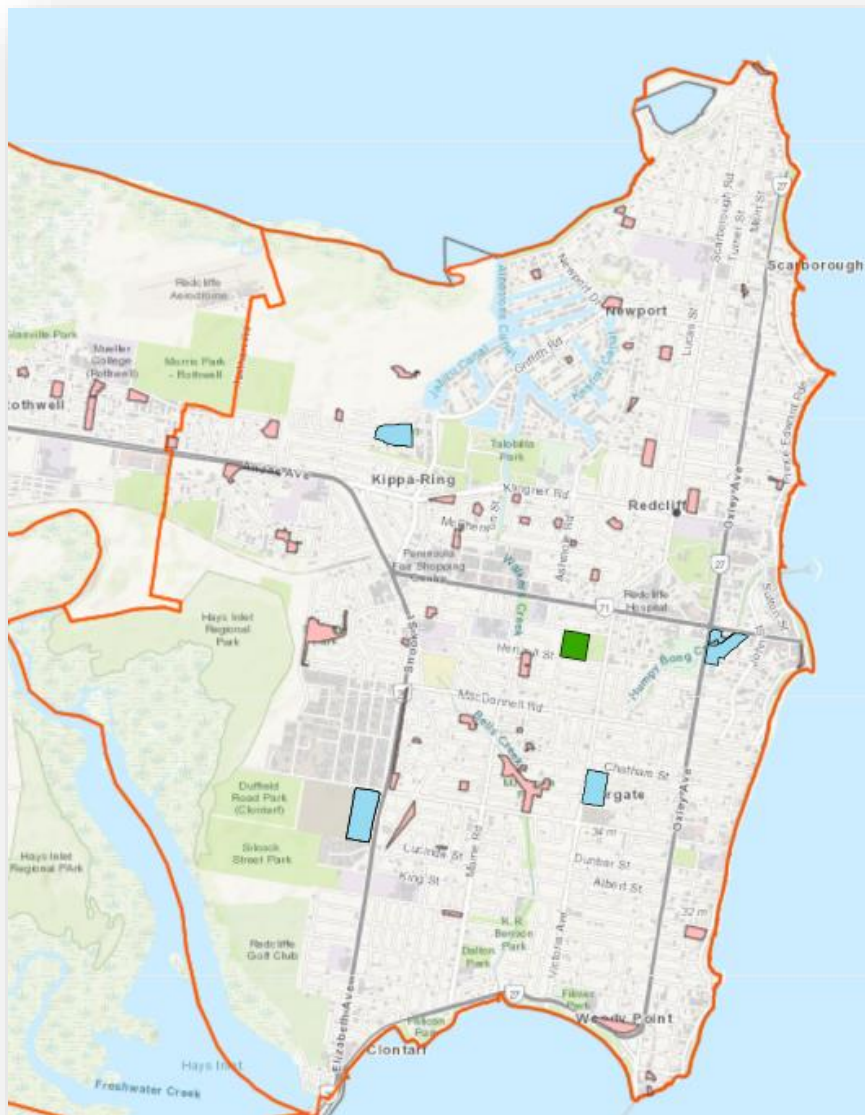

TABLE 101 - RECOMMENDED PARK SOLUTION PETRIE VILLAGE

Item ID	Park and Location	Classification	Comments
OS13	Sweeney Reserve	District Recreation Park	Still required

23 Local Catchment - Redcliffe Peninsula - Local Recreation Analysis

23.1 Redcliffe Peninsula profile summary

The Redcliffe local area includes the suburbs of Scarborough, Newport, Kippa-Ring, Clontarf, Margate, Woody-Point and Redcliffe. The area is bounded by Deception Bay in the north, Moreton Bay in the east and south and North Lakes / Mango Hill in the west. The Redcliffe local area is predominately an established urban residential area, containing substantial commercial uses along Anzac Avenue, Sutton Street and Oxley Avenue and industrial sites within Clontarf. The local area is characterised by the natural features of Moreton Bay and contains the recent residential area of Newport, which is being built with a new lake.

MAP 70 - LOCAL CATCHMENT REDCLIFFE PENINSULA

Some of the major features in the Redcliffe local area include the Scarborough Boat Harbour, Moreton Island Ferry, Newport Marina, Peninsula Fair Shopping Centre, Kippa-Ring Village Shopping Centre, Redcliffe Cemetery,

Peninsula Private Hospital, Chelsea Street Environmental Reserve, Redcliffe CBD, Brisbane North institute of TAFE, Blue Water Square Shopping Centre, Redcliffe Hospital, Redcliffe Paceway, Redcliffe Museum, Redcliffe Cultural Centre, Redcliffe City Art Gallery, Redcliffe Botanic gardens, Redcliffe Showground, Redcliffe Jetty, Redcliffe War Memorial Pool, Redcliffe Golf Club, Hayes Inlet Conservation Park, Clontarf Bayside Plaza, Clontarf Wastewater Treatment Plant, Kroll Gardens, Ray Frawley Fields, Margate CBD, Gayundah Coastal Arboretum and Woody Point Jetty. See Map 70 for the definition of the boundary of Redcliffe Peninsula local catchment.

23.2 Redcliffe Peninsula Population growth assumptions

The population assumptions for the Redcliffe Peninsula local catchment are shown in Table 102, the assumption show a strong growth across this area with an overall lift of 87.2 percent from 2016 to ultimate, an increase from 54,732 to 102,469. Within the LGIP timeframe the population is expected to grow from the base year 2016 by 43.8 percent or 23980 residents.

TABLE 102 - REDCLIFFE PENINSULA LOCAL CATCHMENT POPULATION ASSUMPTIONS

REDCLIFFE PENINSULA	2016	2021	2026	2031	2036	Ultimate
Population	54,732	58,320	64,925	70,142	78,712	102,469
5-year growth	1,564	3,588	6,605	5,217	8,570	47,737*
Percentage	2.9%	6.6%	11.3%	8.0%	12.2%	87.2%*

*growth from 2016 to ultimate

23.3 Redcliffe Peninsula current supply of Local Recreation Parks

There are 50 local recreation parks across the Redcliffe peninsula, they range in size from 1115m² to 4 hectares, not all meet the desired standards of service (minimum 5000m²) as they were developed under previous trunk infrastructure standards. There are two local civic parks at Redcliffe Point and Sutton Street. Table 2 also includes nine local sports parks.

TABLE 103 - CURRENT SUPPLY OF LOCAL PARKS - REDCLIFFE PENINSULA

23.4 Redcliffe Peninsula accessibility analysis

Map 71 indicates the 500m and 600m walkability of local recreation parks in the Redcliffe peninsula catchment. There are several areas with gaps where accessibility is within the standard. It should also be noted that the local foreshore parks are not picked up within this mapping and they provide considerable amenity and recreation opportunities for those who live within walking distance as well as a district and regional function.

MAP 71 - WALKABILITY ANALYSIS REDCLIFFE CATCHMENT

23.5 Redcliffe catchment analysis

The desired standards of service outline a target of 1 hectare of land for local recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 3, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 102 above.

24 Rural -District Catchment - District Recreation Analysis

MAP 72 - RURAL DISTRICT CATCHMENT

24.1 Rural District Profile Summary

The Rural district catchment is the largest physical area with a predominantly agriculture and open space character Map 72 - Rural District Catchment. The population of this catchment is focused in village areas such as Samford, Woodford, D'Aguilar, and Dayboro.

The combined population of the rural district is 34,128 in 2016 which is assumed to increase by 8186 to 2036. The desired standards of service change for the rural and rural residential place types. The focus of public parks will be in the village areas are demonstrated in the local catchment analysis to follow.

24.2 Population growth assumptions

The population assumptions for this district catchment are shown in the following Table 109. The population of the rural area is expected to grow from 34,128 in 2016 to 42,314 in 2036. This represents a 24% growth or an additional 8,186 residents.

TABLE 109 - RURAL DISTRICT AREA POPULATION ASSUMPTIONS

Rural	2016	2021	2026	2031	2036	Ultimate
Population	34,128	35,532	37,880	39,818	42,314	47,106
Growth over 5 years	2,476	1,404	2,349	1,938	2,495	4,793
% growth over 5 years	8%	4%	7%	5%	6%	11%

24.3 Current supply of Rural District Recreation Parks

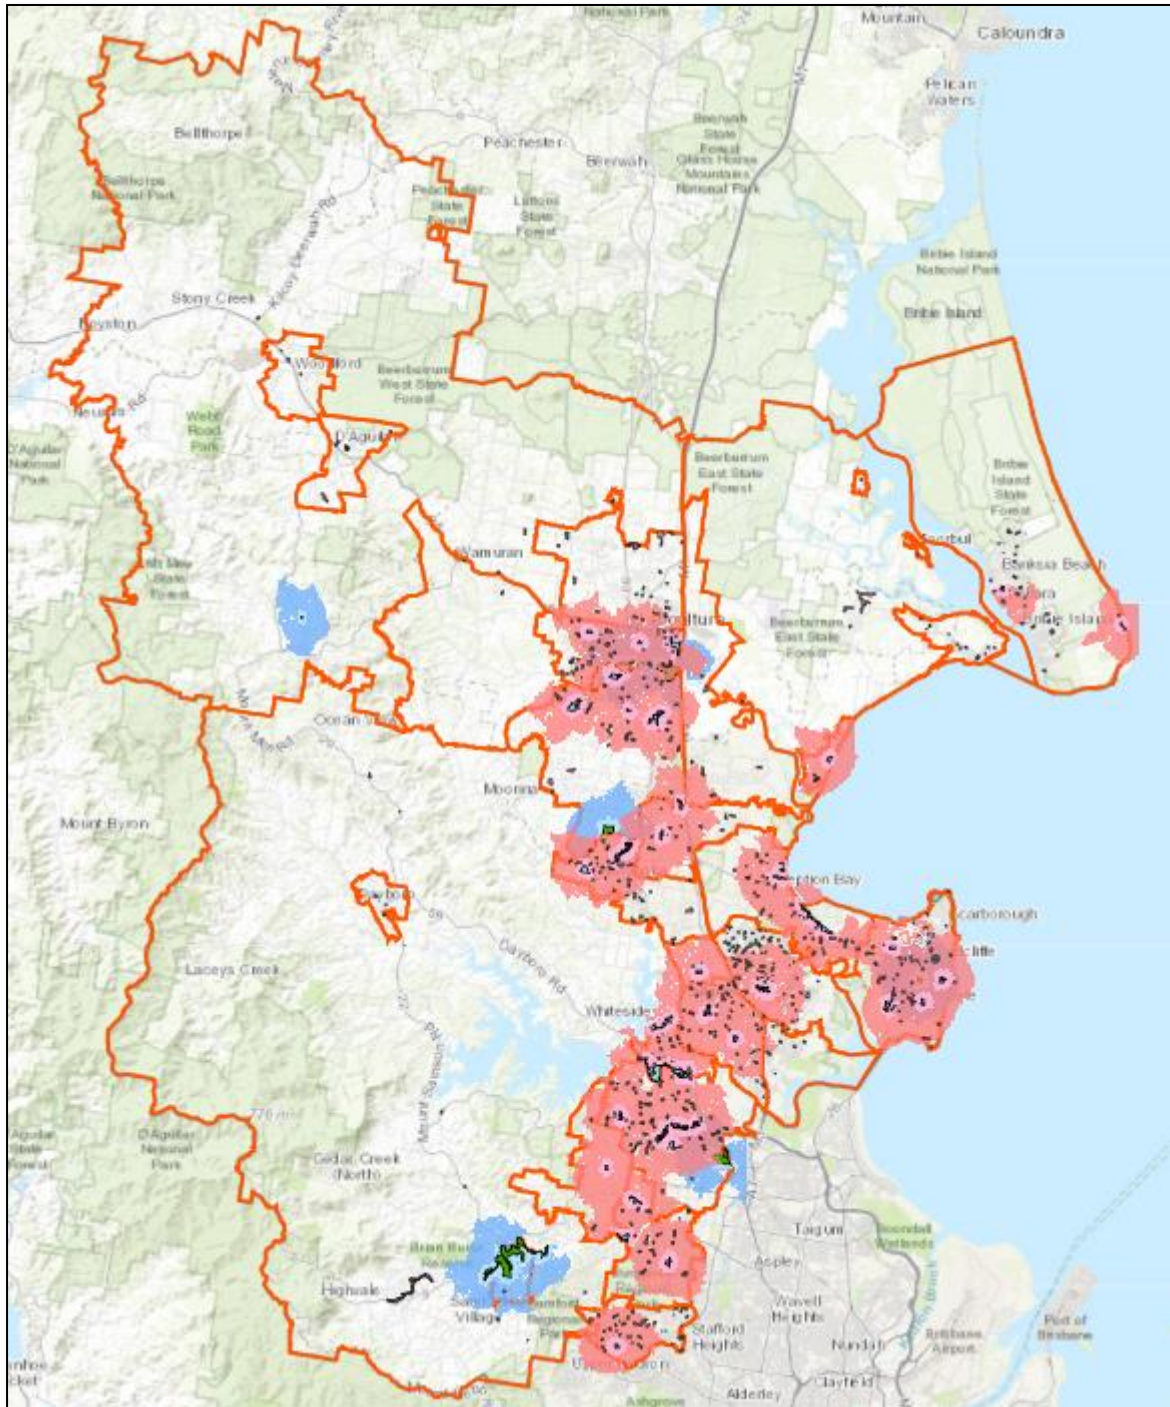

The existing supply of District Recreation parks and sports parks within this catchment are shown in Table 110. There are ten parks included within these definitions with a total area of 92.26 hectares. 50.8 hectares of district sport and 12.14 hectares of district recreation, there is a further 28.97 hectares of local sports which support the accessibility and provision of sports facilities in this dispersed community.

TABLE 110 - EXISTING SUPPLY OF PUBLIC PARKS IN RURAL CATCHMENT

Long Description	Park Type	Asset Location	Suburb	Area m ²
Kurwongbah Park	District Recreation	Torrens Road	PETRIE	124154

Mount Mee Sportsgrounds	Local Sports	Thomas Road	MOUNT MEE	79454

24.4 Rural District accessibility analysis

This region is noted for its dispersed pattern of development. District recreation and sports are focused on the village areas which are attractors for residents. Accessibility to district level parks is limited within the Rural catchment Map 73 Rural District Catchment - Accessibility analysis.

MAP 73 RURAL DISTRICT CATCHMENT - ACCESSIBILITY ANALYSIS

24.5 Rural District Catchment analysis

The desired standards of service outline a target of 0.6 hectare of land for district recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 111, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 109 above.

TABLE 111 - RURAL DISTRICT CATCHMENT LAND PROVISION ANALYSIS

Rural (District)	2016	2021	2026	2031	2036	Population Ultimate
Population	34,128	35,532	37,880	39,818	42,314	47,106
Supply needed to meet DSS (Ha) 0.6/1000	20.48	21.32	22.73	23.89	25.39	28.26
Current supply (Ha)	12.43	12.43	12.43	12.43	12.43	12.43

25 Local Catchment - Rural North - Local Recreation Analysis

25.1 Rural North profile Summary

The Rural North local area contains several localities including Campbells Pocket, Mount Mee, Mount Delaney, Delaney's Creek, Neurum, Stony Creek, Bellthorpe, Booroobin, Cedarton, Stanmore, Commissioners Flat, Elimbah, Bracalba, Wamuran and Elimbah. The local area includes large expanses of rural, agricultural and natural land. The area spans from Campbells Pocket to Mt Mee in the southwest and Elimbah to Bellthorpe in the northwest.

The major features in the Rural North local area include Woodfordia, the Woodford Prison, Beerburum West State Forest, Delaney's Creek State Forest, Mount Mee State Forest, Glass House Mountains National Park, Bellthorpe State Forest and Peachester State Forest.

MAP 74 - RURAL NORTH LOCAL CATCHMENT

25.2 Rural North local catchment population growth assumptions

The population assumptions for this local catchment are shown in Table 113.

TABLE 113 - LOCAL CATCHMENT POPULATION ASSUMPTIONS - RURAL NORTH

Rural North	2016	2021	2026	2031	2036	Ultimate
Population	4,527	4,519	4,506	4,548	4,534	4,590
5-year growth	111	-8	-13	42	-14	64*
5-year growth as percentage	2.5	-0.2	-0.3	0.9	-0.3	1.4%*

*Note growth from 2016 to Ultimate growth assumption

25.3 Rural North local catchment current supply of Local Recreation parks

The existing supply of local recreation parks within this local catchment are shown in Table 114.

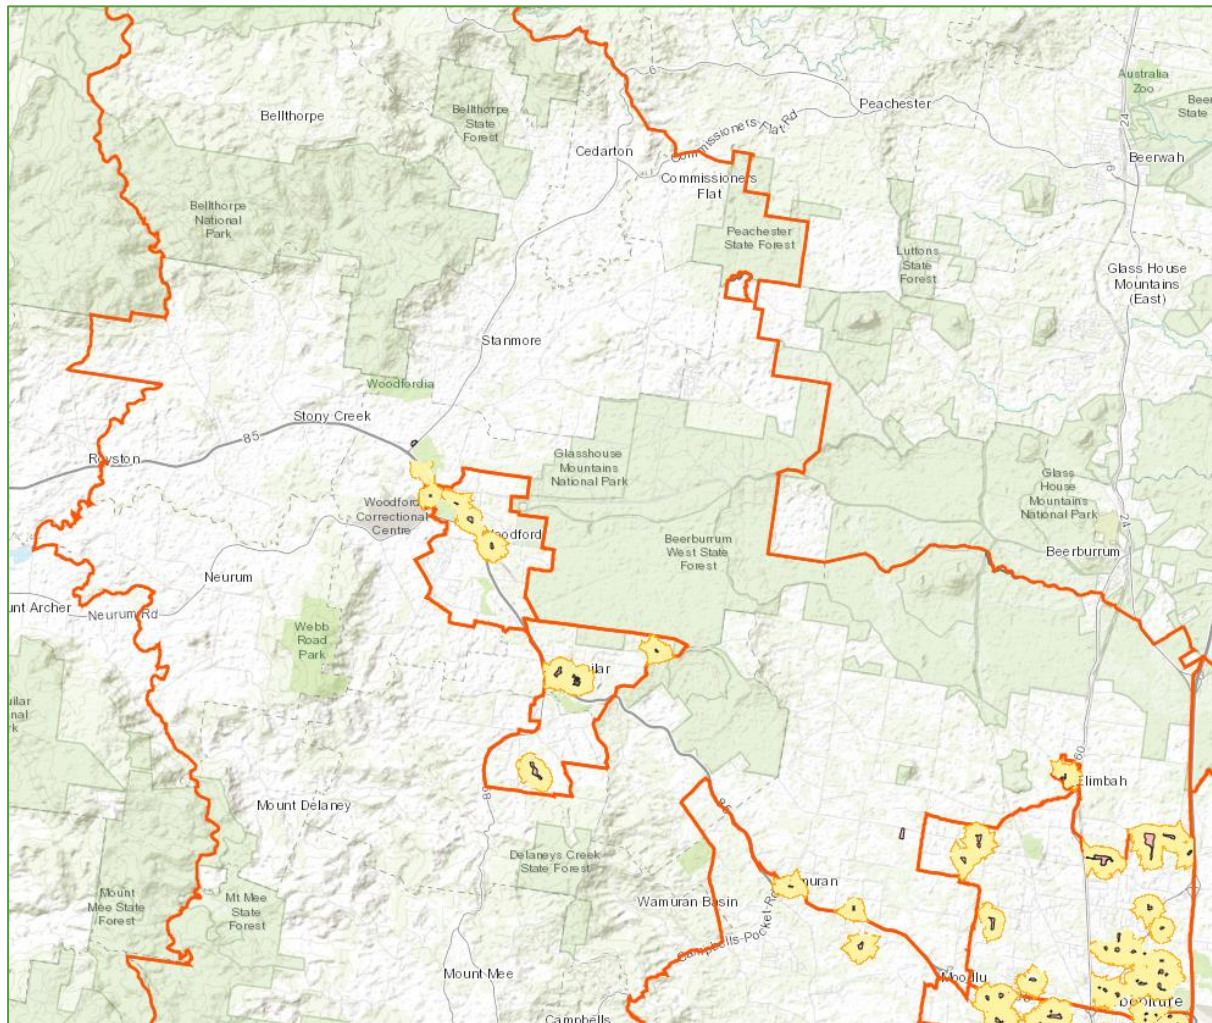

TABLE 114 - CURRENT SUPPLY OF LOCAL RECREATION PARKS RURAL NORTH

Park	Classification	Address	Suburb/Village	Area
Brucknell Road Park	Local Recreation	Brucknell Road	Wamuran	21,475.17
Bye Road Park	Local Recreation	Bye Road	Wamuran	2,933.46
Cruice Park	Local Recreation	Kilcoy-Beerwah Road	Woodford	14,155.89
Mount Mee Sports Assoc.	Local Sports Park	Robinson Road	Mount Mee	5,766.87
Mount Mee Sportsgrounds	Local Sports Park	Thomas Road	Mount Mee	79,454.15
Total park area				123,785.53

Total local park area	12.3ha
Total local recreation park area	3.8 ha

25.4 Rural North accessibility analysis

Accessibility analysis focuses on villages located within the rural catchment.

25.5 Rural North catchment analysis

The desired standards of service outline a target of 0.5 hectare of land for local recreation parks for each group of 1,000 persons of population in Rural residential areas. The analysis of the land required to meet this target is shown in Table 109, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 107 above.

TABLE 115 - LAND PROVISION ANALYSIS

Rural North	2016	2021	2026	2031	2036	Ultimate
Population	4,527	4,519	4,506	4,548	4,534	4,590
DSS land require at 0.5ha per 1000 people (ha)	2.3	2.3	2.3	2.3	2.3	2.3
Current local recreation supply (ha)	3.9	3.9	3.9	3.9	3.9	3.9
Balance (ha)	1.6	1.6	1.6	1.6	1.6	1.6

The population within the rural area North has some minor fluctuations over the coming 15 years but assumptions predict a relatively stable figure just over 4500. There is currently a slight surplus in the land supply for local recreation parks in the Rural North Catchment.

25.6 Solutions for public parks solutions Rural North local catchment

Two park upgrades are recommended for the Rural North catchment these are both situated in Wamuran on Campbell's pocket Road. The district recreation park adjoins the

TABLE 116 - SOLUTIONS FOR RURAL NORTH CATCHMENT

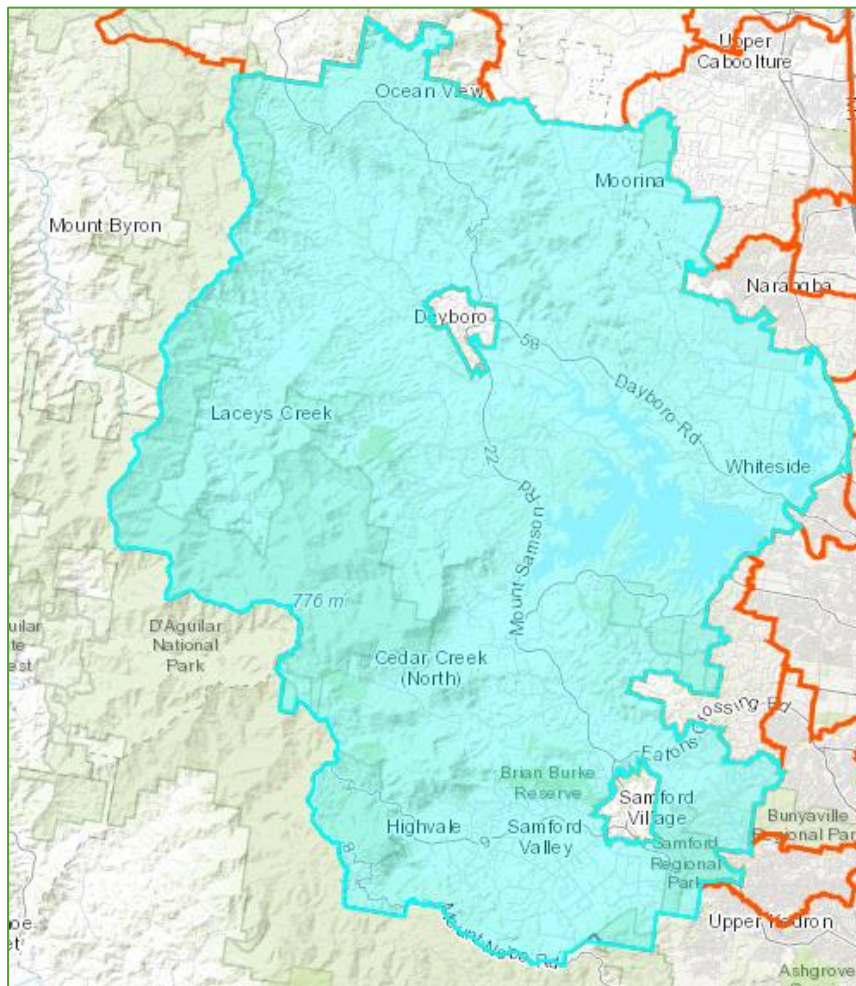

Reference	Name	Type	Solution	Suburb
OS-03	Wamuran District Sport	District Sporting Facility	New Land & Embellishments	Wamuran
OS-2228	Campbell's Pocket Park	District Park	Embellishments Only	Wamuran

26 Local Catchment - Rural South - Local Recreation Analysis

26.1 Rural South local catchment profile summary

The Rural South local area includes the localities of Camp Mountain, Cedar Creek, Draper, Highvale, Jollys Lookout, Mount Nebo, Samford Valley, Wights Mountain, Yugar, Closeburn, Armstrong Creek, Kobble Creek, Mount Samson, Samsonvale, King Scrub, Kurwongbah, Laceys Creek, Mount Pleasant, Ocean View, Rush Creek, Whiteside and most of the suburb of Mount Glorious. The local area can be summarised as a predominantly rural area. The local area is bordered by the locality of Mt Mee in the north, Narangba, Petrie and Ferny Hills in the east, D'Aguilar National Park in the south and south-east and the Somerset Region in the north-west.

Some of the major features include Lake Samsonvale, D'Aguilar National Park, the Pine Rivers Golf Club, Pine Rivers Heritage Museum, Lakeside Motor Sport Complex, Old Petrie Town, Ocean View Estates Winery, Camp Mountain Recreation Area, Samford Valley Golf and Country Club, Samford Showground and Clear Mountain Conservation Reserve.

MAP 75 RURAL SOUTH LOCAL CATCHMENT

26.2 Rural South local catchment population growth assumptions

The population assumptions for this Rural South local catchment are shown in the Table 117. There is a small overall growth of 2,529 residents in the Rural North catchment. It is noted that the ultimate population for the rural catchment is 23,458 which is only a slight increase of 876 residents.

TABLE 117 - RURAL SOUTH LOCAL CATCHMENT POPULATION ASSUMPTIONS

Rural South	2016	23021	2026	2031	2036	Ultimate
Population	20,053	20,738	21,215	21,934	22,582	23,458
5-year growth	1151.4	685.2	477.5	718.9	648.2	3404.9
Percentage	6.1	3.4	2.3	3.4	3.0	14.8

26.3 Current supply of Local Recreation Parks

The existing supply of local recreation parks within this Rural South local catchment are shown in the Table 118

TABLE 118- RURAL SOUTH CURRENT SUPPLY OF LOCAL RECREATION PARKS

Park	Classification	Address	Village	Area m ²
Andrew Road Park	Local Recreation	Andrew Road	Closeburn	1089.7

Total area				625,084.7

26.4 Accessibility analysis

Accessibility analysis focuses on villages located within the rural catchment.

26.5 Catchment analysis

The desired standards of service outline a target of 0.5 hectare of land for local recreation parks for each group of 1,000 persons of population in rural residential areas. The analysis of the land required to meet this target is shown in Table 119, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 117 above.

TABLE 119 - PUBLIC PARKS SUPPLY AND DEMAND ANALYSIS RURAL SOUTH

RURAL SOUTH	2016	2021	2026	2031	2036	Ultimate
Population	20,053	20,738	21,215	21,934	22,582	23,458
Supply needed to meet DSS (Ha)	10.0	10.4	10.6	11.0	11.3	11.7
Current supply	45.8	45.8	45.8	45.8	45.8	45.8
Excess or shortfall	35.8	35.4	35.2	34.8	34.5	34.0

26.6 Recommendations for public park solutions

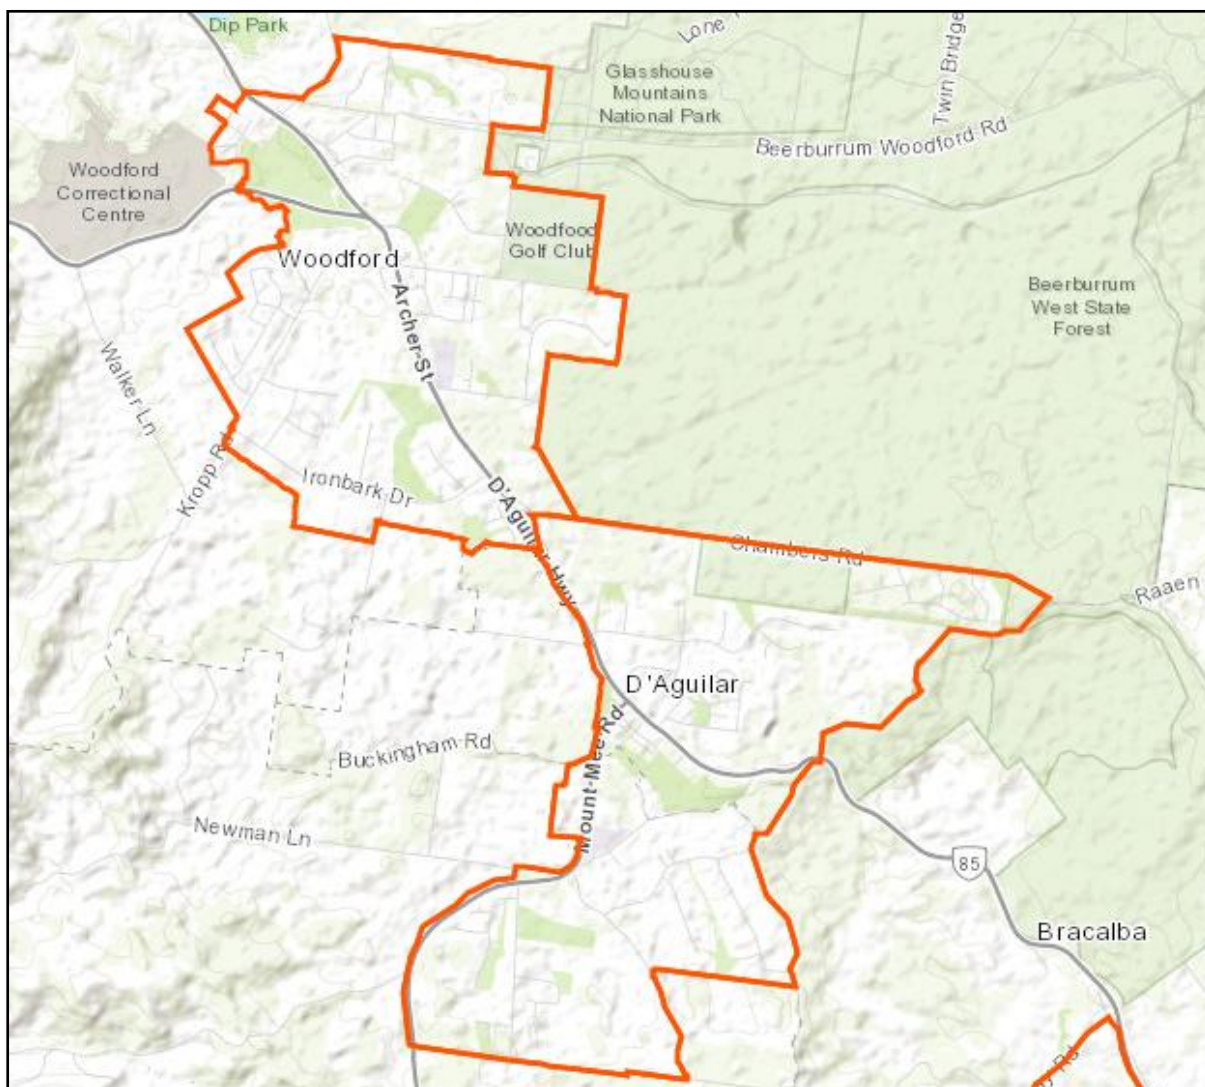

There are no recommendations for Rural south.

27 Local Catchment - Woodford - Local Recreation Analysis

27.1 Woodford Profile Summary

The Woodford and D'Aguilar local areas are amongst the oldest established urban settlements in the Moreton Bay region. The local areas feature a mixed-use low scale main street, with low density detached housing within the township. Surrounding areas contain detached housing on large rural residential lots, with numerous vacant lots existing within these areas, providing opportunities for growth. Significant strands of native vegetation that cater for a range of environmental values and ecosystem services add to the character and amenity of the townships.

Woodford and D'Aguilar are bounded by Stanmore in the north, the Sunshine Coast Regional Council in the east, Bracalba and Delaney's Creek in the south and Neurum and Stony Creek in the west. Some of the major features in the Woodford and D'Aguilar local areas include the Woodford Hall, Woodford Swimming Pool, Woodford State School and parts of Beerburrum West State Forest.

MAP 76 - WOODFORD LOCAL CATCHMENT BOUNDARY

27.2 Woodford population growth assumptions

The population assumptions for this Woodford-D'Aguilar local catchment are shown in Table 120. Overall there is an anticipated growth in population of 1800 people from 2016 to 2036.

TABLE 120- LOCAL CATCHMENT POPULATION ASSUMPTIONS

Woodford Local Catchment	2016	2021	2026	2031	2036	Ultimate
Population	2,244	2,401	3,019	3,357	4,044	5,487
Population growth over 5-year interval	306	157	618	338	687	3,243
Population growth as percentage	16%	7%	26%	11%	20%	144%

27.3 Woodford current supply of Local Recreation parks

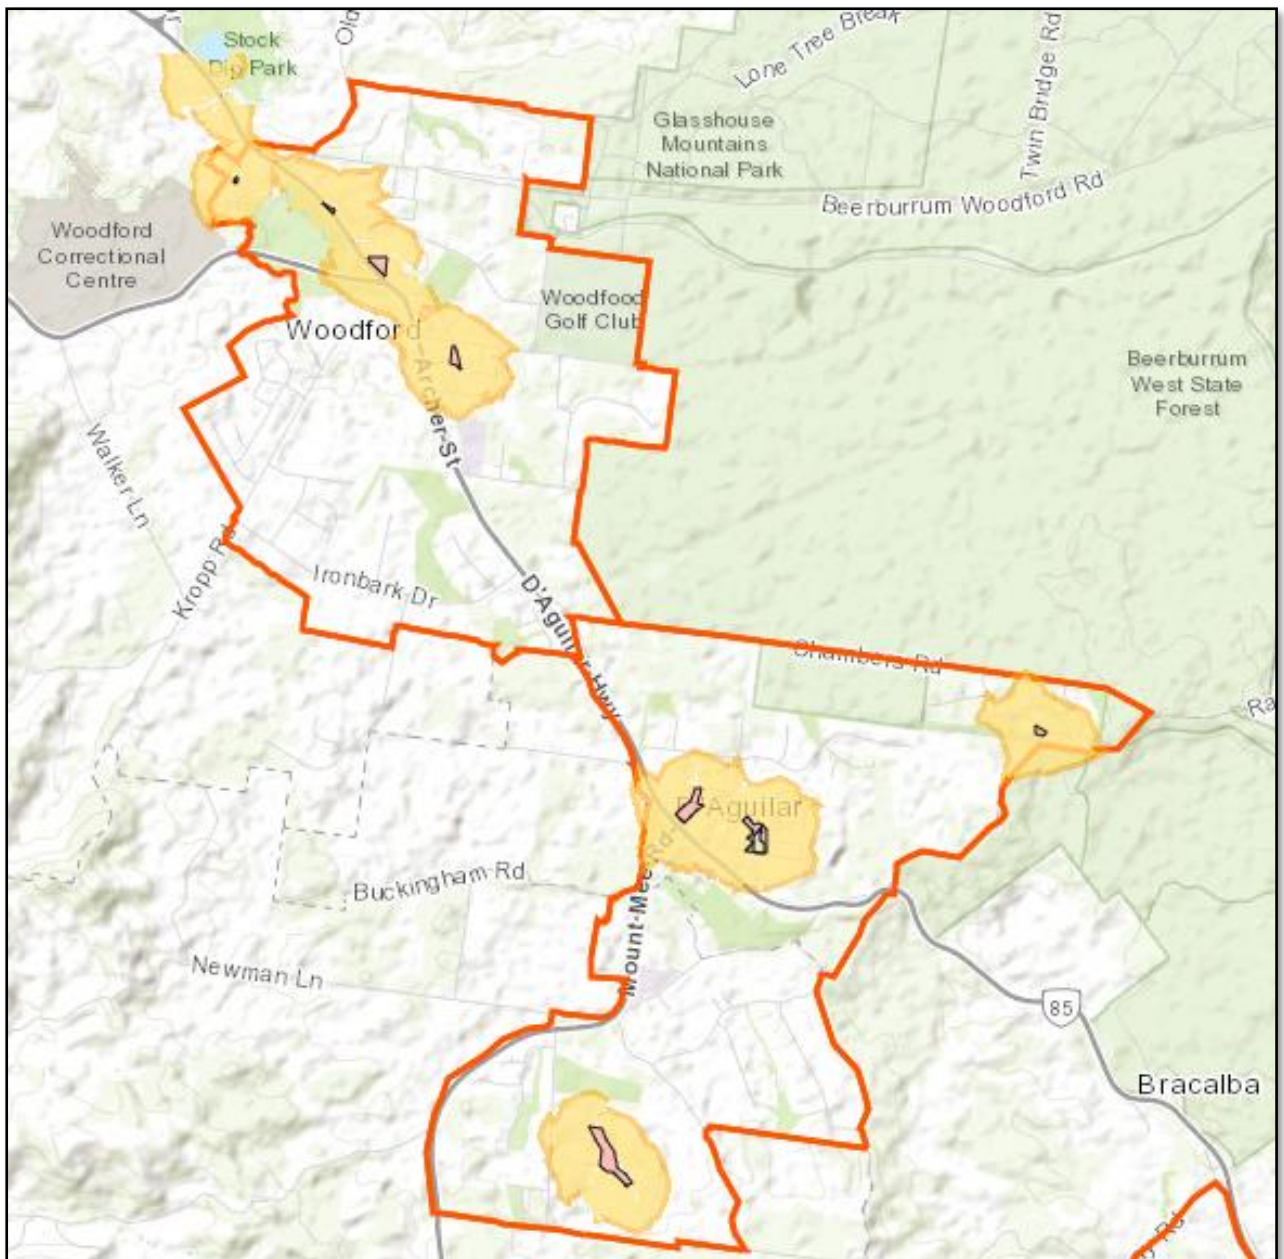

The existing supply of local recreation parks within the Woodford-D'Aguilar local catchment are shown in Table 121.

Excess or shortfall analysis (ha)	5.95	5.65	5.49	4.87	4.53	2.40

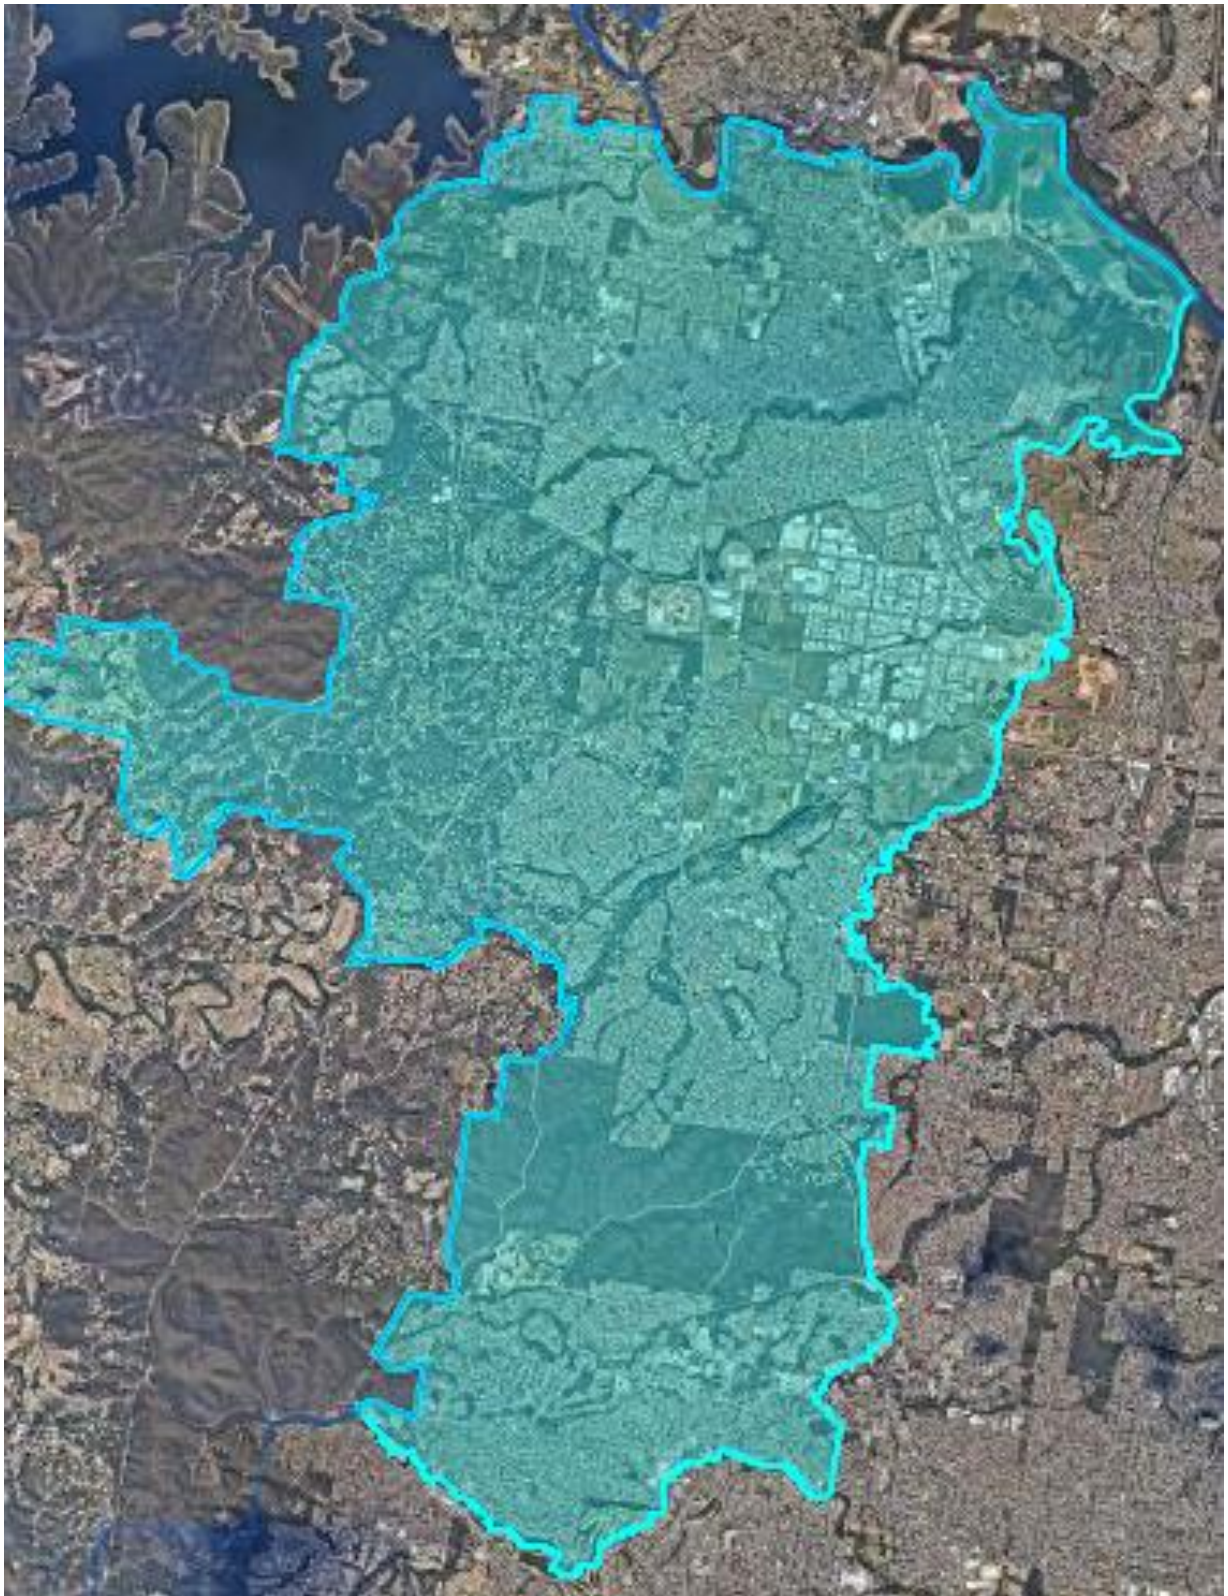

27.6 Recommendations for public park solutions

One additional trunk local recreation park is required within the catchment to meet the needs of the future development of Woodford. This item was included in the original LGIP OS-142 and should be delivered with development.

TABLE 123 WOODFORD SOLUTIONS TABLE

Reference	Classification	Address	Comments
OS-142	Local Recreation	Windsor Street Woodford	Existing in LGIP 2017 - Still required with development

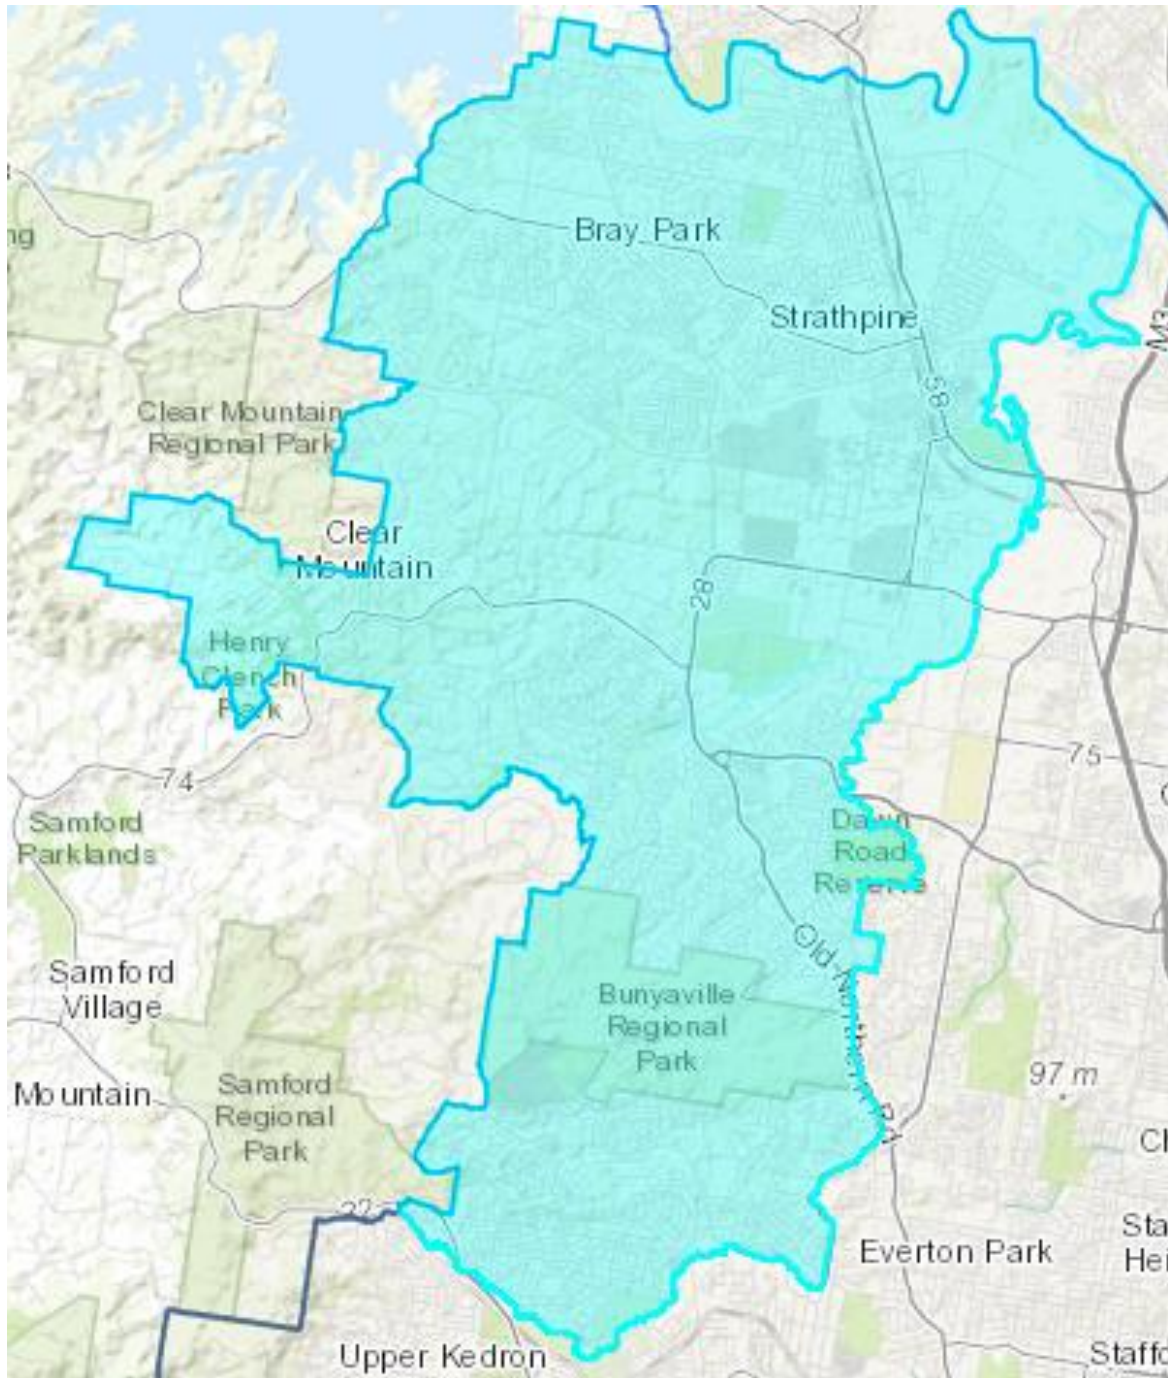

STRATHPINE DISTRICT CATCHMENT

28 District Catchment - Strathpine - District Recreation Analysis

28.1 Profile Summary

The Strathpine district includes the regional activity centre of Strathpine and district level activity centres at Arana Hills, Albany Creek and Warner. It also includes employment areas in the Hills District, Brendale and Lawnton. A diversity of open space is included within the catchment from natural experiences in conservation area and linkages along riparian corridors to large scale regional sporting facilities at South Pine Sports Reserve.

MAP 80 - STRATHPINE DISTRICT CATCHMENT BOUNDARY

The future direction for the Strathpine district is predominantly one of consolidation. Large areas of the catchment are already developed and over time new growth will come from redevelopment of sites in proximity to activity centres and rail stations. In the next 10 years, most of the residential growth will come in areas like Warner, Joyner and Bray Park where Next Generation Neighbourhoods will continue to be developed. Over time, higher densities in and around the activity centres of Strathpine Arana Hills, Albany Creek and the Lawnton Rail Station will provide a diversity of housing. See Map 80.

The activity centres at Arana Hills and Albany Creek will continue to grow, with a focus on Strathpine as one of the region's premier centres for employment.

28.2 Population growth assumptions

The population assumptions for the Strathpine district reflect the planning directions outlined in Council's Strategic Framework. Table 124 identifies that the catchment is projected to experience continued growth beyond 2036 with an ultimate population of 131,492. This represents approximately 10% of the total growth for the Moreton Bay Region from 2016 to 2036.

TABLE 124 - POPULATION ASSUMPTIONS STRATHPINE DISTRICT CATCHMENT

Strathpine District	2016	2021	2026	2031	2036	Ultimate
Population	95672	98906	103214	106480	112926	131492

29 Local Catchment - Albany Creek - Local Recreation Analysis

MAP 82 - LOCAL CATCHMENT BOUNDARY ALBANY CREEK

29.1 Albany Creek local catchment profile summary

The Albany Creek local area contains the suburbs of Albany Creek and parts of Warner, Eatons Hills and Bunya (see Map 82). The local area can be summarised as an established urban area of a mostly suburban character, with some commercial and industrial uses. Albany Creek is bordered by Strathpine in the north, the Brisbane City suburb of Bridgeman Downs in the east, Bunyaville Forest Reserve in the south and Bunya Crossing Road, Drapers Road and Church Road in the west.

Some of the major features in the local area include the Albany Creek Leisure Centre, Albany Creek Pony Club, Albany Creek Community Centre, several shopping centres and numerous schools.

29.2 Population growth assumptions

The population assumptions for the Albany Creek local area reflect the planning directions outlined in Council's Strategic Framework Map 83. The population assumptions for this local catchment are shown in Table 128.

TABLE 128 - ALBANY CREEK LOCAL CATCHMENT POPULATION ASSUMPTIONS

ALBANY CREEK	2016	2021	2026	2031	2036	Ultimate
Population	23,047	23,101	23,492	23,960	24,391	26,323
Growth from previous five years		54	391	468	431	1,932
Percentage growth		0.2%	1.7%	2.0%	1.8%	7.9% growth since 2016

MAP 83 - STRATEGIC FRAMEWORK ALBANY CREEK

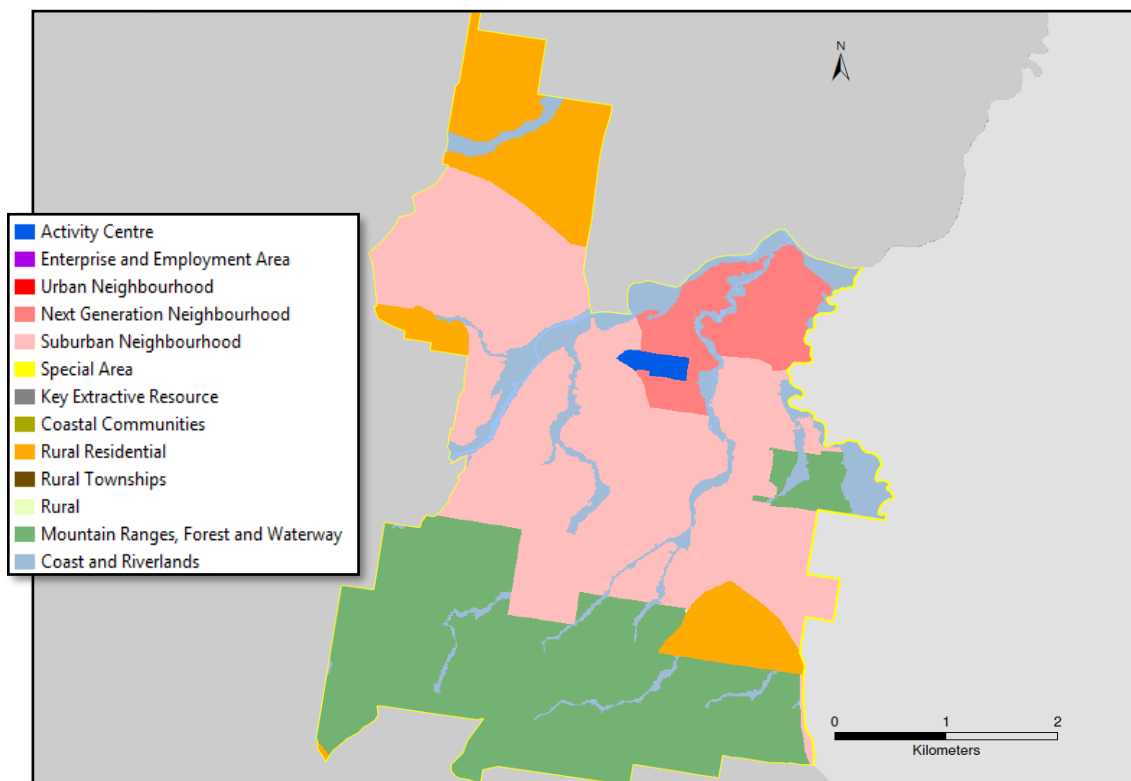

Table 128 shows a population increase of 1,344 people from 2016 to the 2036 population of 26,323. The increase to the ultimate built out population of 26,323 being an increase of 3,276 people from the 2016 population. The population of this area is relatively stable with a slow growth rate, that is a total 5.8% growth from 2016 to 2036.

29.3 Albany Creek current supply of trunk recreation parks

The existing supply of local recreation parks within this local catchment are shown in Table 129.

Total sports parks	150,342m ²	15.0ha
Total trunk park area	497,459m ²	49.0ha

29.4 Albany Creek - accessibility analysis

The local catchment is bounded by the Bunyaville Conservation Park to the south, with access to walking tracks within the nature reserve. The southern residential portion of the catchment consists of an established suburban neighbourhood, that is unlikely to experience much change in the built form given the existing character of the area with house lot sizes averaging 700m². Parts of the catchment are not within 400m distance to a trunk 'local recreation park' however are within walking distance to a linear linkage park that has dual functions of stormwater conveyance, riparian benefits and open space, with recreation pathways throughout and play facility embellishments. The linear linkage in this neighbourhood is functioning as the recreation space for these residents.

29.5 Albany Creek catchment analysis

The desired standards of service outline a target of 1 hectare of land for local recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 131, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 128 above.

TABLE 131 - LAND PROVISION ANALYSIS

Albany Creek	2016	2021	2026	2031	2036	Ultimate
Population	23047	23101	23492	23960	24391	26323
Local Recreation DSS Demand	23.05	23.10	23.49	23.96	24.39	26.32
Existing Supply	24.5	24.5	24.5	24.5	24.5	24.5
Balance/ Shortfall	1.45	1.40	1.01	0.54	0.11	-1.82

Albany Creek as a local catchment has sufficient local recreation park land to meet the existing desired standards of service the current population and growth to the year 2036. This established neighbourhood is serviced by an extensive network of linear linkage parks that provide a dual function of stormwater conveyance, riparian benefits and an open space network. It is noted that some of the park areas have been reclassified in the network review of this catchment. These changes alter the calculations from the previous urban recreation strategy and the existing LGIP. The variance is based on the use of some areas of the linear park network for local recreation purposes. Several linear park portions have been reclassified to better reflect this dual role of linear park and local recreation. This is particularly relevant as the provision of park only calculates the trunk local park, being local recreation parks (and local foreshore parks).

29.6 Recommendations for trunk parks in the Albany Creek local catchment

Table 132 represents the recommendations or solutions for existing and future trunk parks in the catchment. For the Albany Creek local catchment there are recommendations for one district civic park at Albany Creek district centre, one reclassification of the skate park to a district level park and upgrades to 2 local recreation parks - Saraband Drive North and John Leitch Memorial Parks.

TABLE 132 - SOLUTIONS ALBANY CREEK LOCAL CATCHMENT

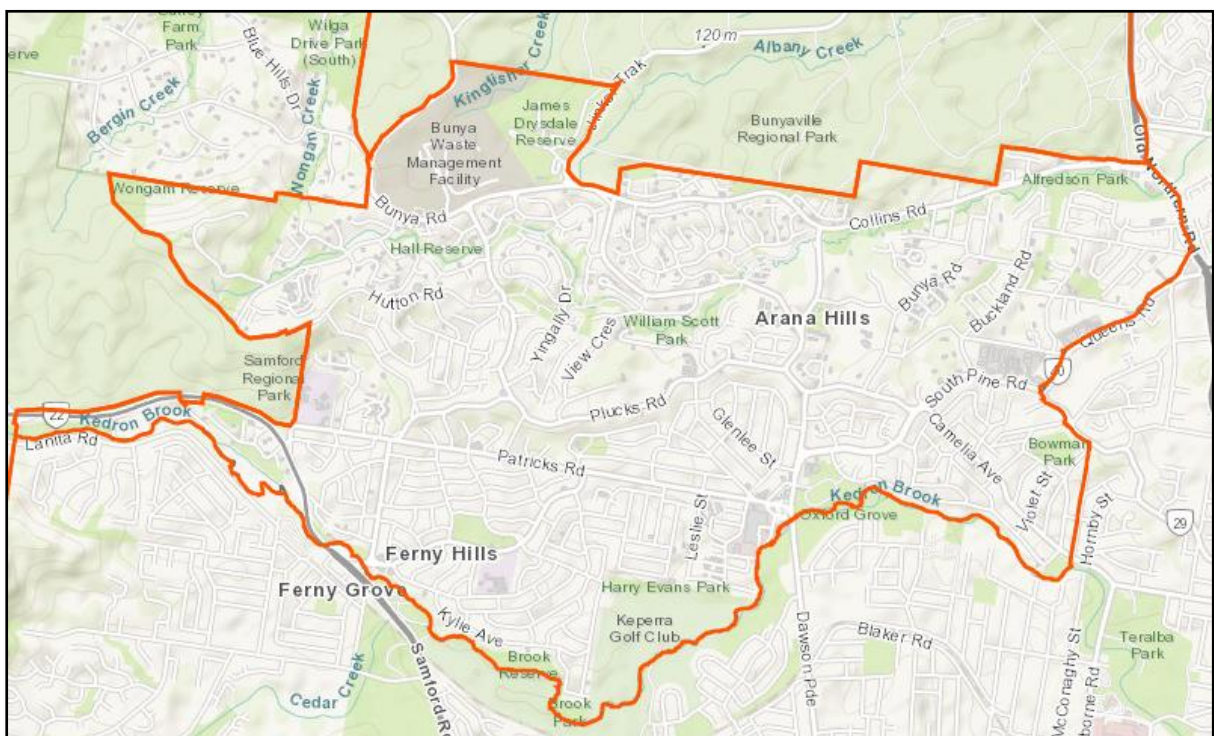

Reference	Location/Park	Hierarchy	Status	Date	Comment

30 Local Catchment - Hills District - Local Recreation Analysis

30.1 The Hills District Profile Summary

The Hills District includes the suburbs of Everton Hills, Arana Hills and Ferny Hills. The local area contains a high concentration of established low-density urban areas, with a limited number of greenfield sites. The Hills District is bordered by Albany Creek in the north, the Rural South local area in the west and the Brisbane City Council suburbs of Keperra in the south and Everton Park in the east.

Leafy suburban neighbourhoods characterise much of the local area, with limited small-scale industrial services taking place in the eastern corner. Some of the major features in the local area include the Arana Hills Plaza, Arlington Court Shopping Centre, Everton Junction Shopping Centre, Everton Shopping Village, Keperra Country Golf Club, Fred Ward Reserve, Hutton Reserve and James Drysdale Recreation Park.

MAP 84 - HILLS DISTRICT CATCHMENT

30.2 Hills District population growth assumptions

The population assumptions for the Hills District catchment are shown in Table 133.

TABLE 133 - HILL DISTRICT POPULATIONS ASSUMPTIONS LOCAL CATCHMENT

HILLS DISTRICT	Population 2016	Population 2021	Population 2026	Population 2031	Population 2036	Population Ultimate

Cabbage Tree Creek Reserve	Garfield Trc	EVERTON HILLS	8859.2
Total			388,970.0m ²

Total Local recreation park area in the Hills catchment is 38.9 hectares.

30.4 The Hills district accessibility analysis

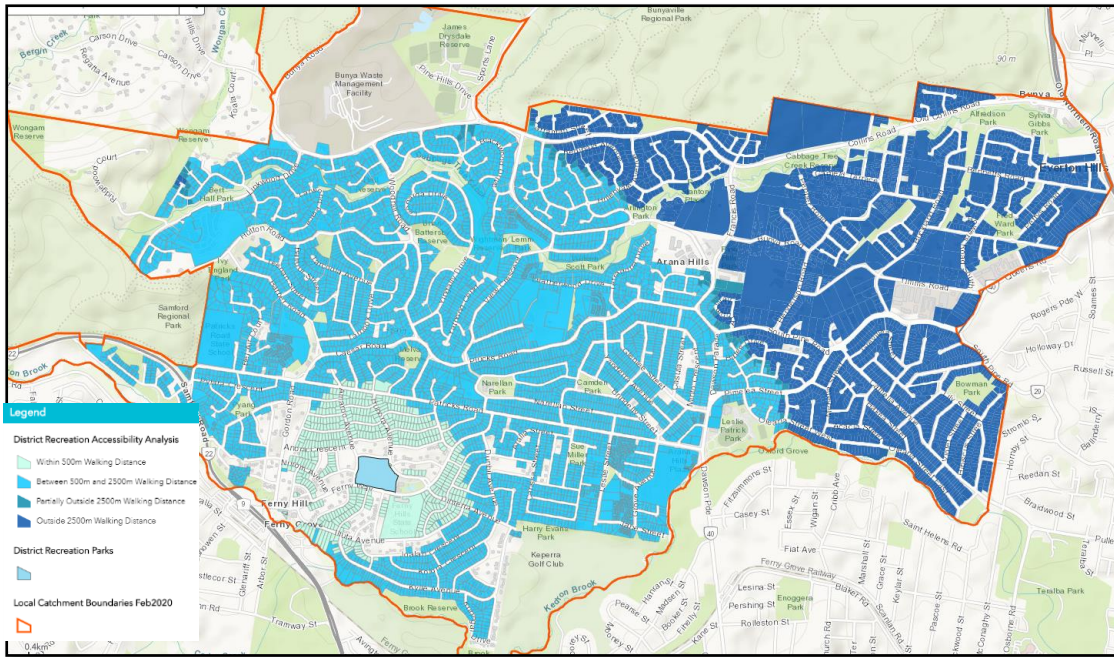

Map 85 highlights the accessibility to local recreation parks across the Hills area catchment. While there are some areas beyond the 600m walking distance each of these are serviced by other types of parks, either district parks like George Willmore Park and Leslie Patrick Park or linear parks like Cabbage Tree Creek Reserve.

MAP 85 - THE HILLS DISTRICT LOCAL RECREATION PARK ACCESSIBILITY

The gap in accessibility shown in the local recreation park mapping is improved when considering the proximity of alternative park types which have been embellished in a similar way to local recreation parks.

Accessibility to district recreation parks in the Hills area highlights a deficit in the eastern portion of the catchment. The development of a district level recreation park in this area would be desirable.

MAP 86 - DISTRICT RECREATION ACCESSIBILITY MAPPING

30.5 The Hills District Catchment analysis

The desired standards of service outline a target of 1 hectare of land for local recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 135, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in Table 133 - Hill District Populations Assumptions Local Catchment.

TABLE 135 - LAND PROVISION ANALYSIS THE HILLS DISTRICT

HILLS DISTRICT	2016	2021	2026	2031	2036	Ultimate
Population	22,356	22,845	23,898	24,317	24,898	26,825
Supply needed to meet DSS (Ha)	22.36	22.85	23.90	24.32	24.90	26.82
Current supply (Ha)	38.9	38.9	38.9	38.9	38.9	38.9
Excess or shortfall analysis (Ha)	16.54	16.05	15.00	14.58	14.00	12.08

30.6 The Hills District recommendations for public park solutions

While no additional land is required to meet the provision rate of local recreation parks, accessibility gaps have been identified in the network. These are addressed with the following recommendations which maintain the existing LGIP items not yet delivered. One item is shifted from the eastern side of Francis Road to the west (OS-2224), there is scope to increase size of the park at this location to meet the deficit in the district park network. District Recreation Park - land and embellishment.

The existing LGIP item OS-19 is still required to upgrade James Drysdale Reserve to meet the desired standard of service for district sports park.

TABLE 136 - PUBLIC PARKS SOLUTIONS

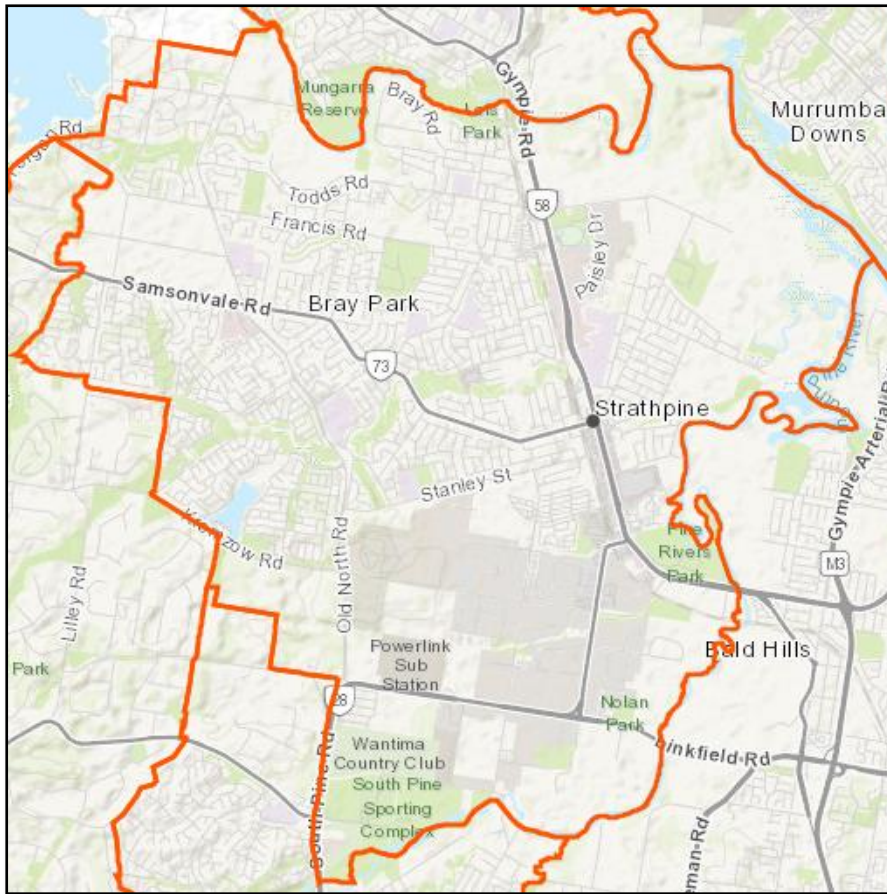

ID	Park	Hierarchy	Type	Suburb
OS-19	James Drysdale Reserve Sporting Complex	District Sporting Facility	Upgrade Embellishments	Ferny Hills
OS-2224	Francis Road District Recreation park	District recreation park	Land and Embellishment	Arana Hills

31 Local Catchment - Strathpine North - Local Recreation Analysis

31.1 Strathpine North local catchment profile summary

The Strathpine North local area includes the suburbs of Lawton, Bray Park, Strathpine, Warner Lakes and Brendale. The local area is mostly urban and consists of a mix of established uses and dwelling types. This includes older housing stock located in proximity of the North Coast railway line and the Strathpine commercial centre. It also contains the industrial precinct of Brendale. The local area is bordered by North Pine River in the north, the South Pine River in the south and east and South Pine Road, Warner Road and Old North Road in the west.

The area contains established low-density residential suburbs with limited number of greenfield sites located in Warner and Lawnton. Some of the major features in the local area include the Strathpine major commercial centre, Brendale industrial estate, city train stations of Strathpine, Bray Park and Lawnton, Pine Rivers Park, South Pine Sports Complex, South & North Pine River and the Four Mile Creek (see Map 87 - Strathpine North Local Catchment).

MAP 87 - STRATHPINE NORTH LOCAL CATCHMENT

31.2 Strathpine North population growth assumptions

The population assumptions for the Strathpine North local catchment are shown in Table 137 - Strathpine North Local Catchment Population Assumptions.

TABLE 137 - STRATHPINE NORTH LOCAL CATCHMENT POPULATION ASSUMPTIONS

TABLE 139- SUMMARY OF TOTAL PARK AREAS FOR STRATHPINE NORTH CATCHMENT

Summary of totals by hierarchy	Area m ²
Total all local parks	799,095 m ²
Total all Local recreation parks	655,111 m ²
Local civic parks	3,323 m ²

31.4 Strathpine North accessibility analysis

The following map illustrates the accessibility analysis with mapping of true walkability at 500 and 600m. There is a noted gap in the Samsonvale Road area which should be filled with the development of the new Local recreation park on Samsonvale Road which was an LGIP item in 2017 delivered as a park in 2020. John Bray Park - a district recreation park also supports the local recreation needs of this community.

A new park at Akers Road will also further support the access to local recreation parks in the catchment.

MAP 88 - ACCESSIBILITY ANALYSIS STRATHPINE NORTH

31.5 Strathpine North catchment analysis

The desired standards of service outline a target of 1 hectare of land for local recreation parks for each group of 1,000 persons of population. The analysis of the land required to meet this target is shown in Table 140, as well as the calculation of whether the target is exceeded or is in deficit, both now and into the future based on the planning assumptions shown in the Table 137.

TABLE 140 - STRATHPINE NORTH LAND PROVISION ANALYSIS

STRATHPINE NORTH	2016	2021	2026	2031	2036	Ultimate
Population	43,618	46,259	49,122	51,493	56,822	71,319
