

Measures of Financial Sustainability

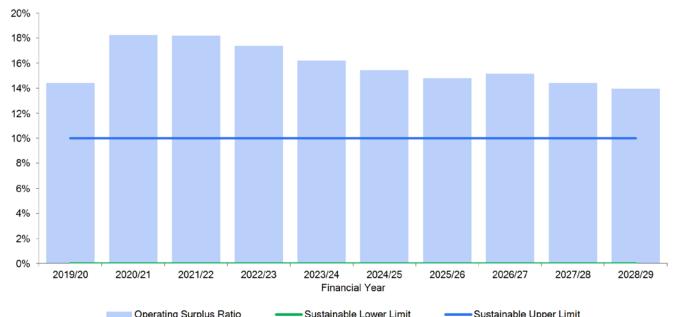

In accordance with section 169 of the Local Government Regulation 2012, the Council is required to disclose in the budget certain measures of financial sustainability.

The Queensland Government defines a sustainable local government as being 'able to maintain its financial capital and infrastructure capital over the long term' (Local Government Act 2009 (Act), section 104(2).

To ensure the Council continues along the path of financial sustainability into the future, key long term strategic plans are developed and integrated, demonstrating a strategy is in place to manage the financial implications of its long term planning.

The three financial sustainability measures cover the period of the annual budget plus the next nine financial years (10 years in total).

The targets indicated in each graph are sourced from the 'Financial management (sustainability) guideline 2013' which is available from the website of The Department of Local Government, Racing and Multicultural Affairs.

Operating Surplus Ratio

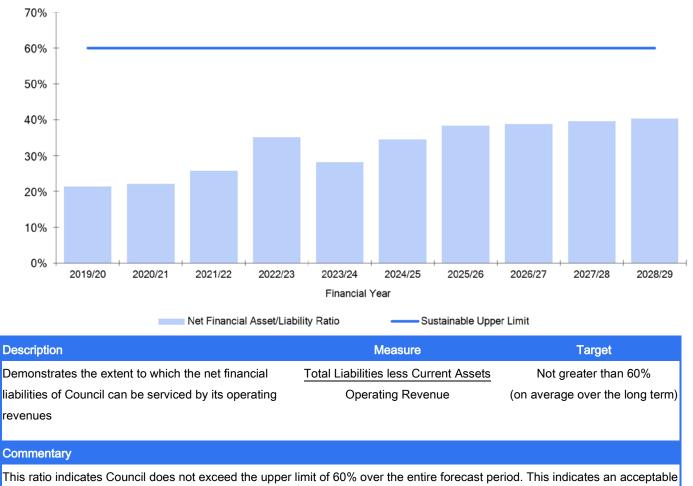

operating outplue natio		
Description	Measure	Target
Demonstrates the extent to which revenues raised	Net Operating Surplus/(Deficit)	Between 0% and 10%
cover operational expenses only or are available for	Operating Revenue	(on average over the long
capital funding purposes or other purposes		term)

Commentary

Council is forecasting a positive operating surplus ratio in each of the ten years. A positive ratio indicates that recurring operating revenue exceeds recurring operating expenses and places less reliance on borrowing money to fund capital expenditure and thus reducing Council debt. The positive operating surplus ratio of Council across the ten years is a strong indicator of long term sustainability.

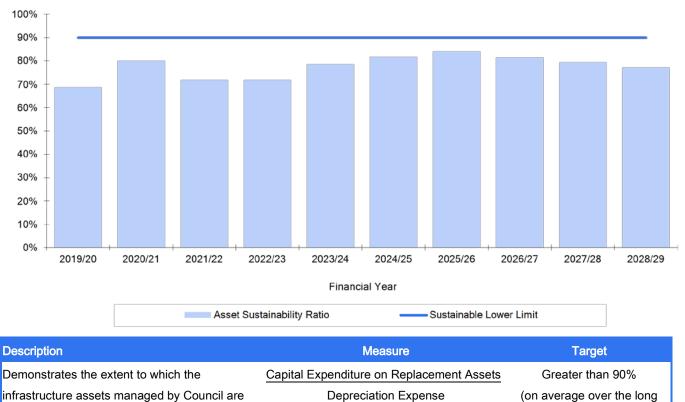

Net Financial Liabilities Ratio

level of operating revenues are being used to meet the net financial liabilities of Council.

Asset Sustainability Ratio

term)

useful lives

being replaced as they reach the end of their

Commentary

This ratio measures how much capital expenditure goes toward replacing existing assets each year when divided by depreciation expense. As the ten year forecast indicates Council's ratio is below the target of 90% or better but is forecast to improve across the ten year period.
