6.2.4 Environmental management and conservation zone code

6.2.4.1 Application - Environmental management and conservation zone

This code applies to assessing development in the Environmental management and conservation zone, if:

- 1. self-assessable or assessable development where this code is an applicable code identified in the assessment criteria column of a table of assessment (Part 5);
- 2. impact assessable development (Part 5).

When using this code, reference should be made to Determining the level of assessment and, where applicable, Determining the assessment criteria located in Part 5.

6.2.4.2 Purpose - Environmental management and conservation zone

1. The purpose of the Environmental management and conservation zone code is to provide for the protection, restoration and management of areas identified as supporting significant biological diversity and ecological integrity. The Environmental management and conservation zone covers the core natural environmental areas of the Region which are, for the significant majority of the land, in public ownership. These areas consist of high ecological significance and high-value vegetation. They include key wildlife breeding and refuge areas with the strongest conservation mandate. This zone makes up a strong network of diverse natural landscapes which contribute to local habitat connectivity, koala and other priority species sustainability, biodiversity resilience, lifestyle and recreation opportunities.

The Environmental management and conservation zone code seeks to implement the policy direction as set out in Part 3, Strategic Framework.

- 2. The purpose of the code will be achieved through the following overall outcomes:
 - a. Areas having important biological, natural, and ecological values are protected from potentially degrading and destructive effects associated with development.
 - b. Development is restricted to activities that directly support or appreciate the biological, natural and environmental values of the area such as parks⁽⁵⁷⁾, walking trails, and associated support facilities.
 - c. Development occurs in accordance with a Council Master Plan approved under Council policy on Council owned land; or in accordance with the relevant controlling legislation (e.g. Forestry Act, Nature Conservation Act) under which the land is administered by the State. Where on private land, development is restricted to activities that directly support or appreciate the biological, natural and environmental values.
 - d. Development not having a close association with the natural environment are avoided.
 - e. Development in a Water supply buffer is undertaken in a manner which contributes to the maintenance and enhancement where possible of water quality to protect the drinking water and aquatic ecosystem environmental values in those catchments.
 - f. Development avoids areas subject to constraint, limitation, or environmental value. Where development cannot avoid these identified areas, it responds by:
 - i. adopting a 'least risk, least impact' approach when designing, siting and locating development in any area subject to a constraint, limitation or environmental value to minimise the potential risk to people, property and the environment;
 - ii. ensuring no further instability, erosion or degradation of the land, water or soil resource;
 - iii. when located within a Water buffer area, complying with the Water Quality Vision and Objectives contained in the Seqwater Development Guidelines: Development Guidelines for Water Quality Management in Drinking Water Catchments 2012.
 - iv. maintaining, restoring and rehabilitating environmental values, including natural, ecological, biological, aquatic, hydrological and amenity values, and enhancing these values through the provision of planting and landscaping, and facilitating safe wildlife movement and connectivity through:

- A. the provision of replacement, restoration, rehabilitation planting and landscaping;
- B. the location, design and management of development to avoid or minimise adverse impacts on ecological systems and processes;
- C. the requiring of environmental offsets in accordance with the Environmental Offsets Act 2014.
- v. protecting native species and protecting and enhancing species habitat;
- vi. protecting and preserving the natural, aesthetic, architectural historic and cultural values of significant trees, places, objects and buildings of heritage and cultural significance;
- vii. establishing effective separation distances, buffers and mitigation measures associated with identified infrastructure to minimise adverse effects on sensitive land uses from odour, noise, dust and other nuisance generating activities;
- viii. establishing, maintaining and protecting appropriate buffers to waterways, wetlands, native vegetation and significant fauna habitat;
- ix. ensuring it promotes and does not undermine the ongoing viability, integrity, operation, maintenance and safety of identified infrastructure;
- x. ensuring effective and efficient disaster management response and recovery capabilities;
- xi. where located in an overland flow path:
 - A. development siting, built form, layout and access responds to the risk presented by the overland flow and minimises risk to personal safety;
 - B. development is resilient to the impacts of overland flow by ensuring the siting and design accounts for the potential risks to property associated with the overland flow;
 - C. development does not impact on the conveyance of the overland flow for any event up to and including the 1% AEP for the fully developed upstream catchment;
 - D. development directly, indirectly and cumulatively avoid an increase in the severity of overland flow and potential for damage on the premises or other premises, public lands, watercourses, roads or infrastructure.
- g. Development in the Environmental management and conservation zone includes one or more of the following where located on Council owned land and identified on a Council Master Plan approved under Council policy; where on State owned land and in accordance with a relevant, applicable Act; or where on privately owned land.

 Development in the Environmental management and conservation zone does not include any of the following:

•	Adult store ⁽¹⁾	•	Hardware and trade supplies ⁽³²⁾	•	Port services ⁽⁶¹⁾
•	Agricultural supplies store ⁽²⁾	•	Health care services ⁽³³⁾	•	Relocatable home park ⁽⁶²⁾
	Air services ⁽³⁾		High impact industry ⁽³⁴⁾	•	Renewable energy facility ⁽⁶³⁾
•	Animal keeping ⁽⁵⁾	•			
•	Aquaculture ⁽⁶⁾	•	Home based business ⁽³⁵⁾	•	Research and technology industry ⁽⁶⁴⁾
•	Bar ⁽⁷⁾	•	Hospital ⁽³⁶⁾	•	Residential care facility ⁽⁶⁵⁾
•	Brothel ⁽⁸⁾	•	Hotel ⁽³⁷⁾	•	Resort complex ⁽⁶⁶⁾
٠	Bulk landscape supplies ⁽⁹⁾	•	Indoor sport and recreation ⁽³⁸⁾	•	Retirement facility ⁽⁶⁷⁾
•	Caretaker's accommodation ⁽¹⁰⁾	•	Intensive animal industry ⁽³⁹⁾	•	Roadside stall ⁽⁶⁸⁾

6 Zones

•	Car wash ⁽¹¹⁾	•	Intensive horticulture ⁽⁴⁰⁾	•	Rooming
•	Cemetery ⁽¹²⁾	•	Landing ⁽⁴¹⁾		accommodation ⁽⁶⁹⁾
•	Child care centre ⁽¹³⁾	•	Low impact industry ⁽⁴²⁾	•	Rural industry ⁽⁷⁰⁾
	Club ⁽¹⁴⁾		Major electricity	•	Rural workers' accommodation ⁽⁷¹⁾
•	Community care centre ⁽¹⁵⁾		infrastructure ⁽⁴³⁾	_	Sales office ⁽⁷²⁾
		•	Major sport, recreation and		
•	Community residence ⁽¹⁶⁾		entertainment facility ⁽⁴⁴⁾		Service industry ⁽⁷³⁾
•	Community use ⁽¹⁷⁾	•	Marine industry ⁽⁴⁵⁾		Service station ⁽⁷⁴⁾
•	Crematorium ⁽¹⁸⁾	•	Market ⁽⁴⁶⁾	•	Shop ⁽⁷⁵⁾
•	Cropping ⁽¹⁹⁾	•	Medium impact industry ⁽⁴⁷⁾	•	Shopping centre ⁽⁷⁶⁾
•	Detention facility ⁽²⁰⁾	•	Motor sport facility ⁽⁴⁸⁾	•	Short-term (77)
•	Dual occupancy ⁽²¹⁾	•	Multiple dwelling ⁽⁴⁹⁾		accommodation ⁽⁷⁷⁾
•	Dwelling house ⁽²²⁾		Nightclub entertainment		Showroom ⁽⁷⁸⁾
•	Dwelling unit ⁽²³⁾		facility ⁽⁵¹⁾		Special industry ⁽⁷⁹⁾
	Educational	•	Non-resident workforce accommodation ⁽⁵²⁾		Substation ⁽⁸⁰⁾
	establishment ⁽²⁴⁾			•	Theatre ⁽⁸²⁾
•	Emergency services ⁽²⁵⁾	•	Office ⁽⁵³⁾	•	Tourist attraction ⁽⁸³⁾
•	Extractive industry ⁽²⁷⁾	•	Outdoor sales ⁽⁵⁴⁾	•	Tourist park ⁽⁸⁴⁾
•	Food and drink outlet ⁽²⁸⁾	•	Outdoor sport and recreation ⁽⁵⁵⁾	•	Transport depot ⁽⁸⁵⁾
•	Function facility ⁽²⁹⁾		Parking station ⁽⁵⁸⁾	•	Veterinary services ⁽⁸⁷⁾
	Funeral parlour ⁽³⁰⁾		Place of worship ⁽⁶⁰⁾	•	Warehouse ⁽⁸⁸⁾
	Garden centre ⁽³¹⁾			•	Wholesale nursery ⁽⁸⁹⁾
					Winery ⁽⁹⁰⁾
	C i				winery.
		·			

i. Development not listed in the tables above above may be considered on its merits and where it reflects and supports the outcomes of the zone.

6.2.4.3 Criteria for assessment

There is no self-assessable development in the Environmental management and conservation zone. Development is either exempt development or impact assessable development. Where development is impact assessable, the assessment criteria becomes the whole of the planning scheme.

Part A—Criteria for assessable development - Environmental management and conservation zone

Table 6.2.4.1 Assessable development - Environmental management and conservation zone

Performance outcomes	Acceptable outcomes	
General criteria		

Eff	ects of development	
PO	•	No acceptable outcome provided.
The the	e natural, ecological and biological values present in environment are protected. Development avoids verse impacts on natural, ecological and biological ues particularly in terms of the following:	
a.	physical change;	
b.	vegetation damage or removal;	
C.	wildlife connectivity and accessibility;	
d.	land fragmentation;	
e.	land and vegetation degradation;	
f.	visual detraction;	
g.	soil stability and erosion;	
h.	water quality;	
i.	habitat protection.	S
Fo	rm and nature of development	
РО	2	No acceptable outcome provided.
The	e form and nature of development :	
a.	is of a minor size and scale, low intensity and compatible with the physical characteristics and values;	
b.	responds appropriately to the characteristics and constraints of the site such as slope and stability, visual prominence, landscape character, water courses, flooding, bush fire risk, soil type, existing vegetation and surrounding land uses.	
РО	3	No acceptable outcome provided.
the and	e visual impacts of development are minimised through use of lightweight construction and the use of colours d materials compatible with the natural setting and rounds.	
PO	4	No acceptable outcome provided.
rec util loc	velopment is limited to tourism and nature-based reation, educational activities and facilities, small scale ity installation ⁽⁸⁶⁾ . Development is in appropriate ations that are allied to, and compatible with, the nificant conservation values of the area.	

Values and constraints criteria

Note - The relevant values and constraints criteria do not apply where the development, the subject of the application, is associated and consistent with, and subsequent to a current Development permit for Reconfiguring a lot or Material change of use, where that approval, under this or a superseded planning scheme, has considered and addressed (e.g. through a development footprint plan or similar, or conditions of approval) the identified value or constraint under this planning scheme.

Acid sulfate soils - (refer Overlay map - Acid sulfate soils to determine if the following assessment criteria apply)

Note - To demonstrate achievement of the performance outcome, an Acid sulfate soils (ASS) investigation report and soil management plan is prepared by a qualified engineer. Guidance for the preparation an ASS investigation report and soil management plan is provided in Planning scheme policy - Acid sulfate soils.

PO5		A05
	elopment avoids disturbing acid sulfate soils. Where elopment disturbs acid sulfate soils, development:	Development does not involve: a. excavation or otherwise removing of more than
a.	is managed to avoid or minimise the release of surface or groundwater flows containing acid and metal contaminants into the environment;	100m ³ of soil or sediment where below than 5m Australian Height datum AHD; or b. filling of land of more than 500m ³ of material with
b.	protects the environmental and ecological values and health of receiving waters;	an average depth of 0.5m or greater where below the 5m Australian Height datum AHD.
C.	protects buildings and infrastructure from the effects of acid sulfate soils.	5

Bushfire hazard areas (refer Overlay map - Bushfire hazard to determine if the following assessment criteria apply)

Note - To demonstrate achievement of the performance outcomes, a bushfire management plan is prepared by a suitably qualified person. Guidance for the preparation of a bushfire management plan is provided in Planning scheme policy – Bushfire hazard areas.

Note - Unacceptable risk is defined as a situation where people or property are exposed to a predictable hazard event that may result in serious injury, loss of life, failure of community infrastructure, or property damage.

P06		AO6.1		
Development:		Buildings and structures are:		
 working and living on a site exposed to bushfire risk; ensures the protection of life during the passage of a fire front; is located and designed to increase the chance of survival of buildings and structures during a bushfire; minimises bushfire risk from build up of fuels around 	 a. not located on a ridgeline; b. not located on land with a slope greater than 15% (see Overlay map - Landslide hazard (for land having a slope greater than 15%)); c. dwellings are located on east to south facing slopes. 			
	AO6.2			
	Buildings and structures have contained within the site:			
 buildings and structures; e. ensure safe and effective access for emer services during a bushfire. 	gency	 a. a separation from classified vegetation of 20m or the distance required to achieve a bushfire attack level (BAL) at the building, roofed structure or fire fighting water supply of no more than 29, whichever is the greater; b. a separation from low threat vegetation of 10m or the distance required to achieve a bushfire attack 		

PO7 Development and associated driveways and ways: a. avoid potential for entrapment during a b. ensure safe and effective access for en services during a bushfire; c. enable safe evacuation for occupants of during a bushfire.	 bushfire; mergency b. has a maximum gradient no greater than 12.5%;
PO8 Development provides an adequate water se	AO8 upply for a. a reticulated water supply is provided by a
fire-fighting purposes.	 distributer retailer for the area or; where not connected to a reticulated water supply, on-site fire fighting water storage containing not less than 10 000 litres (tanks with fire brigade tank fittings, swimming pools) is located within 10m of buildings and structures. Where a swimming pool is the nominated on-site fire fighting water storage source, vehicle access is provided to within 3m of that water storage source. Where a tank is the nominated on-site fire fighting water storage source, it includes:

	 i. a hardstand area allowing medium rigid vehicles (15 tonne fire appliance) access within 6m of the tank; ii. fire brigade tank fittings, comprising 50mm ball valve and male camlock coupling and, if underground, an access hole of 200mm (minimum) to accommodate suction lines. 	
PO9	A09	
Development:	Development does not involve the manufacture or storage	
 a. does not present unacceptable risk to people or environment due to the impact of bushfire on dangerous goods or combustible liquids; b. does not present danger or difficulty to emergency services for emergency response or evacuation. 	of hazardous chemicals.	
Editor's note - Unacceptable risk is defined as a situation where people or property are exposed to a predictable hazard event that may result in serious injury, loss of life, failure of community infrastructure, or property damage.		
Environmental areas (refer Overlay map - Environme	ntal areas to determine if the following assessment	
criteria apply)		
Note – The following are exempt from the native vegetation clearing p	provisions of this planning scheme:	
a. Clearing of native vegetation located within an approved develo	opment rootprint;	
 Clearing of native vegetation within 10m from a lawfully establish required in response to an accident or emergency; 	ed building reasonably necessary for emergency access or immediately	
c. Clearing of native vegetation reasonably necessary to remove o to infrastructure;	r reduce the risk vegetation poses to serious personal injury or damage	
d. Clearing of native vegetation reasonably necessary to construct and maintain a property boundary fence and not exceed 4m in width either side of the fence where in the Rural, Rural residential and Environmental Management and Conservation zones. In any other zone, clearing is not to exceed 2m in width either side of the fence;		
e. Clearing of native vegetation reasonably necessary for the pur infrastructure or drainage purposes;	pose of maintenance or works within a registered easement for public	
f. Clearing of native vegetation in accordance with a bushfire mar and accepted by Council;	nagement plan prepared by a suitably qualified person, submitted to	
g. Clearing of native vegetation associated with removal of recogniland, windbreaks, lawns or created gardens;	nised weed species, maintaining existing open pastures and cropping	
h. Grazing of native pasture by stock;		
i. Native forest practice where exempt under Part 1, 1.7.7 Exemp	ot development	
Note - Definition for native vegetation is located in Schedule 1 Definiti	ons.	
Note - Native vegetation subject to this criteria primarily comprises of matters of national environmental significance (MNES), matters of state environmental significance (MSES). They also comprise some matters of local environmental significance (MLES). A MLES is defined in Schedule 1.2, Administrative definitions. A list of the elements that apply to the mapped MSES and MLES is provided in Appendix 1 of the Planning scheme policy - Environmental areas.		

Editors' Note - The accuracy of overlay mapping can be challenged through the development application process (code assessable development) or by way of a planning scheme amendment. See Council's website for details.

6 Zones

Note - To demonstrate achievement of the performance outcome, an ecological assessment, vegetation management plan and fauna management plan, as required, are prepared by a suitably qualified person. Guidance for the preparation of above mentioned reports is provided in Planning scheme policy - Environmental areas.

 PO10 Development avoids locating in a High Value Area or a Value Offset Area. Where it is not practicable or reasonable for development to avoid establishing in these areas, development must ensure that: a. the quality and integrity of the biodiversity and ecological values inherent to a High Value Area and a Value Offset Area is maintained and not lost or degraded; b. on-site mitigation measures, mechanisms or processes are in place demonstrating the quality and integrity of the biodiversity and ecological values. 	No acceptable outcome provided.
values inherent to a High Value Area and a Value Offset Area area maintained. For example, this can be achieved through replacement, restoration or rehabilitation planting as part of any proposed covenant, the development of a Vegetation Management Plan, a Fauna Management Plan, and any other on-site mitigation options identified in the Planning scheme policy - Environmental areas*. * Editor's note - This is not a requirement for an environmental offset under the Environmental Offsets Act 2014.	no sche
 PO11 Development provides for safe, unimpeded, convenient and ongoing wildlife movement and establishes and maintains habitat connectivity by: a. retaining habitat trees; b. providing contiguous patches of habitat; c. provide replacement and rehabilitation planting to improve connectivity; d. avoiding the creation of fragmented and isolated patches of habitat; e. providing wildlife movement infrastructure. Editor's note - Wildlife movement infrastructure may include refuge poles, tree boulevarding, 'stepping stone' vegetation plantings, tunnels, appropriate wildlife fencing; culverts with ledges, underpasses, overpasses, land bridges and rope bridges. Further information is provided in Planning scheme policy – Environmental areas. 	No acceptable outcome provided.
Vegetation clearing and habitat protection	

Development ensures that the biodiversity quality and integrity of habitats is not adversely impacted upon but maintained and protected.					
PO13	No acceptable outcome provided.				
Development does not result in the net loss or degradation of habitat value in a High Value Area or a Value Offset Area. Where development does result in the loss or degradation of habitat value, development will:					
 a. rehabilitate, revegetate, restore and enhance an area to ensure it continues to function as a viable and healthy habitat area; b. provide replacement fauna nesting boxes in the event of habitat tree loss in accordance with Planning scheme policy - Environmental areas; c. undertake rehabilitation, revegetation and restoration in accordance with the South East Queensland Ecological Restoration Framework. 	Cene				
PO14	No acceptable outcome provided.				
Development ensures safe, unimpeded, convenient and ongoing wildlife movement and habitat connectivity by:	S				
 a. providing contiguous patches of habitat; b. avoiding the creation of fragmented and isolated patches of habitat; c. providing wildlife movement infrastructure; d. providing replacement and rehabilitation planting to improve connectivity. 					
Vegetation clearing and soil resource stability					
PO15 Development does not:	No acceptable outcome provided.				
 a. result in soil erosion or land degradation; b. leave cleared land exposed for an unreasonable periods of time but is rehabilitated in a timely manner. 					
Vegetation clearing and water quality					
PO16 Development maintains or improves the quality of groundwater and surface water within, and downstream, of a site by:	No acceptable outcome provided.				
 a. ensuring an effective vegetated buffers and setbacks from waterbodies is retained to achieve natural filtration and reduce sediment loads; b. avoiding or minimising changes to landforms to maintain hydrological water flows; c. adopting suitable measures to exclude livestock from entering a waterbody where a site is being 					

used for animal husbandry ⁽⁴⁾ and animal keeping ⁽⁵⁾ activities.	
PO17	No acceptable outcome provided.
 Development minimises adverse impacts of stormwater run-off on water quality by: a. minimising flow velocity to reduce erosion; b. minimising hard surface areas; c. maximising the use of permeable surfaces; d. incorporating sediment retention devices; e. minimising channelled flow. 	
Vegetation clearing and access, edge effects and urb	oan heat island effects
PO18 Development retains safe and convenient public access in a manner that does not result in the adverse edge effects or the loss or degradation of biodiversity values within the environment.	No acceptable outcomes provided.
 PO19 Development minimises potential adverse 'edge effects' on ecological values by: a. providing dense planting buffers of native vegetation between a development and environmental areas; b. retaining patches of native vegetation of greatest possible size where located between a development and environmental areas; c. restoring, rehabilitating and increasing the size of existing patches of native vegetation; d. ensuring that buildings and access (public and vehicle) are setback as far as possible from environmental areas and corridors; e. landscaping with native plants of local origin. Editor's note - Edge effects are factors of development that go to detrimentally affecting the composition and density of natural populations at the fringe of natural areas. Factors include weed invasion, pets, public and vehicle access, nutrient loads, noise and light pollution, increased fire frequency and changes in the groundwater and surface water flow. 	No acceptable outcome provided.
 PO20 Development avoids adverse microclimate change and does not result in increased urban heat island effects. Adverse urban heat island effects are minimised by: a. pervious surfaces; b. providing deeply planted vegetation buffers and green linkage opportunities; 	No acceptable outcome provided.

	All habitable rooms within the separation area are:
PO24	A024
 PO23 Development: a. does not introduce or increase uses that are sensitive to the impacts of an Extractive industry⁽²⁷⁾; b. is compatible with the operation of an Extractive industry⁽²⁷⁾; c. does not comprise or undermine the function and integrity of the separation area in providing a buffer between key extractive and processing activities and sensitive, incompatible uses outside the separation area. 	AO23 Development within the separation area does not include the following activities: a. Caretaker's accommodation ⁽¹⁰⁾ ; b. Community residence ⁽¹⁶⁾ ; c. Dual occupancy ⁽²¹⁾ ; d. Dwelling unit ⁽²³⁾ ; e. Hospital ⁽³⁶⁾ ; f. Rooming accommodation ⁽⁶⁹⁾ ; g. Multiple dwelling ⁽⁴⁹⁾ ; h. Non-resident workforce accommodation ⁽⁵²⁾ ; i. Relocatable home park ⁽⁶²⁾ ; j. Residential care facility ⁽⁶⁵⁾ ; k. Resort complex ⁽⁶⁶⁾ ; l. Retirement facility ⁽⁶⁷⁾ ; m. Rural workers' accommodation ⁽⁷¹⁾ ; o. Tourist park ⁽⁸⁴⁾ .
PO22 Development does not increase the number of people living in the Extractive Resources separation area.	AO22 One dwelling house ⁽²²⁾ permitted per lot within separation area.
Extractive resources separation area (refer Overlay mains if the following assessment criteria apply) Note - To demonstrate achievement of the performance outcomes, and person. Guidance to preparing noise impact assessment report is pro-	noise impact assessment report is prepared by a suitably qualified vided in Planning scheme policy – Noise.
PO21 Where development results in the unavoidable loss of native vegetation within a Value Offset Area MLES waterway buffer or a Value Offset Area MLES wetland buffer, an environmental offset is required in accordance with the environmental offset requirements identified in Planning scheme policy - Environmental areas. Editor's note - For MSES Koala Offsets, State Planning Regulatory Provision environmental offset provisions apply.	No acceptable outcome provided.
Vegetation clearing and Matters of Local Environmen	
 c. landscaping with local native plant species to achieve well-shaded urban places; d. increasing the service extent of the urban forest canopy. 	

Habitable rooms achieve the noise levels listed in Schedule 1 Acoustic Quality Objectives, Environmental Protection (Noise) Policy 2008 and provides a safe, healthy and disturbance free living environment.	 a. acoustically insulated to achieve the noise levels listed in Schedule 1 Acoustic Quality Objectives, Environmental Protection (Noise) Policy 2008; b. provided with mechanical ventilation. 		
PO25 Development provides open space areas for passive	AO25 Private open space areas are separated from the		
recreation in a manner where impacts from key extractive/processing activities, particularly noise, is minimised.	resource processing area by buildings or a 1.8m high solid structure.		
Heritage and landscape character (refer Overlay map - Heritage and landscape character to determine if			

the following assessment criteria apply)

Note - To assist in demonstrating achievement of heritage performance outcomes, a Cultural heritage impact assessment report is prepared by a suitably qualified person verifying the proposed development is in accordance with The Australia ICOMOS Burra Charter.

Note - To assist in demonstrating achievement of this performance outcome, a Tree assessment report is prepared by a qualified arborist in accordance with Planning scheme policy – Heritage and landscape character. The Tree assessment report will also detail the measures adopted in accordance with AS 4970-2009 Protection of trees on development sites.

Note - Places, including sites, objects and buildings having local cultural heritage significance, are identified on Overlay map - Heritage and landscape character and listed in Schedule 1 of Planning scheme policy - Heritage and landscape character. Places also having cultural heritage significance at a State level and being entered in the Queensland Heritage Register, are also identified in Schedule 1 of Planning scheme policy - Heritage and landscape character.

PO26	A026
 Development will: a. not diminish or cause irreversible damage to the cultural heritage values present on the site, and associated with a heritage site, object or building; b. protect the fabric and setting of the heritage site, object or building; c. be consistent with the form, scale and style of the heritage site, object or building; d. utilise similar materials to those existing, or where this is not reasonable or practicable, neutral materials and finishes; e. incorporate complementary elements, detailing and ornamentation to those present on the heritage site, object or building; f. retain public access where this is currently provided. 	Development is for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value. Note - A cultural heritage conservation management plan for the preservation, maintenance, repair and restoration of a site, object or building of cultural heritage value is prepared in accordance with Planning scheme policy - Heritage and landscape character. The plan is sent to, and approved by Council prior to the commencement of any preservation, maintenance, repair and restoration works.
PO27	No acceptable outcome provided.
Demolition and removal is only considered where:	
a. a report prepared by a suitably qualified conservation architect or conservation engineer demonstrates that the building is structurally unsound and is not reasonably capable of economic repair; or	

 b. demolition is confined to the removal of outbuildings, extensions and alterations that are not part of the original structure; or c. limited demolition is performed in the course of repairs, maintenance or restoration; or d. demolition is performed following a catastrophic event which substantially destroys the building or 	
object. PO28	No acceptable outcome provided.
Where development is occurring on land adjoining a site of cultural heritage value, the development is to be sympathetic to and consistent with the cultural heritage values present on the site and not result in their values being eroded, degraded or unreasonably obscured from public view.	Sev
PO29	AO29
Development does not adversely impact upon the health and vitality of significant trees. Where development occurs in proximity to a significant tree, construction measures and techniques as detailed in AS 4970-2009 Protection of trees on development sites are adopted to ensure a significant tree's health, wellbeing and vitality. Significant trees are only removed where they are in a poor state of health or where they pose a health and safety risk to persons or property. A Tree Assessment report prepared by a suitably qualified arborist confirming a tree's state of health is required to demonstrate achievement of this performance outcome.	 Development does: a. not result in the removal of a significant tree; b. not occur within 20m of a protected tree; c. involve pruning of a tree in accordance with Australian Standard AS 4373-2007 – Pruning of Amenity Trees.
Landslide (refer Overlay map - Landslide hazard to de	etermine if the following assessment criteria apply)

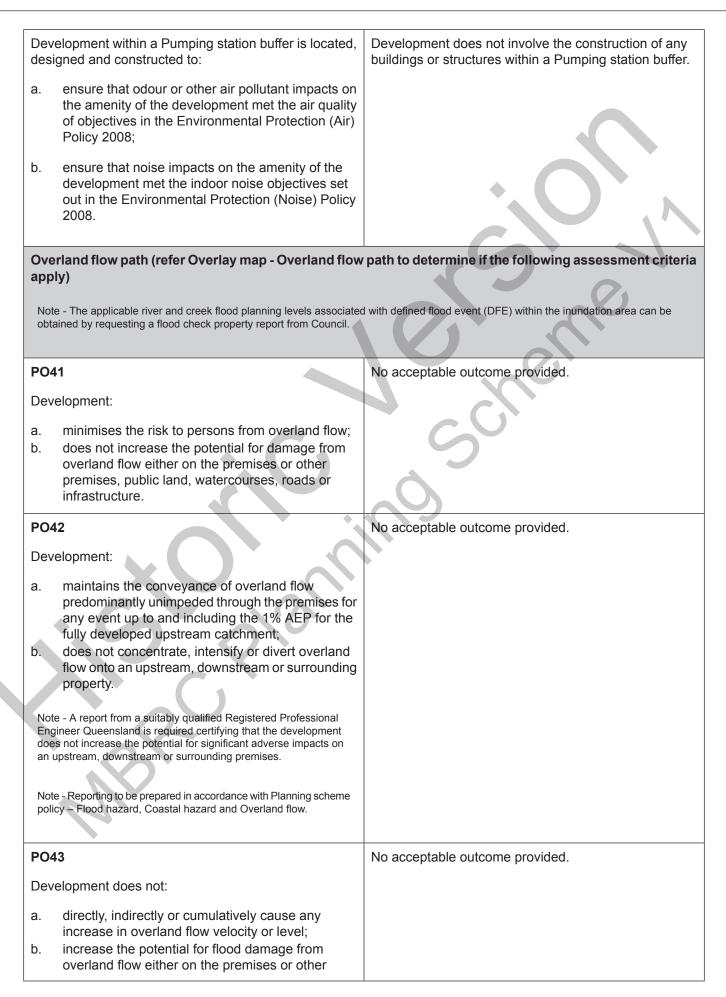

Note - To demonstrate achievement of the performance outcomes, a site-specific geotechnical assessment report is prepared by a qualified engineer. Guidance for the preparation of a geotechnical assessment report is provided in Planning scheme policy – Landslide hazard.

PO30		AO30		
Development:		Development does not:		
a. b.	maintains the safety of people and property on a site and neighbouring sites from landslides; ensures the long-term stability of the site	a. b.	involve earthworks exceeding 50m ³ ; involve cut and fill having a height greater than 600mm;	
	considering the full nature and end use of the development;	C.	involve any retaining wall having a height greater than 600mm;	
C.	ensures site stability during all phases of construction and development;	d.	redirect or alter the existing flow of surface or groundwater.	
d.	minimises disturbance of natural drainage patterns of the site and does not result in the redirection or alteration of the existing flow if surface or groundwater		Ŭ	
e.	minimises adverse visual impacts on the amenity of adjoining residents and provides a positive interface with the streetscape.			

PO31	AO31	
 Buildings are designed to respond to sloping topography in the siting, design and form of buildings and structures by: a. minimising overuse of cut and fill to create single flat pads and benching; b. avoiding expanses of retaining walls, loss of trees and vegetation and interference with natural drainage systems; c. minimising any adverse visual impact on the landscape character; d. Protect the amenity of adjoining properties. PO32 Development protects the safety of people, property and the environment from the impacts of landslide on hazardous chemicals manufactured, handled or stored by incorporating design measures to ensure: a. the long-term stability of the development site considering the full nature and end use of the development; b. site stability during all phases of construction and development; c. the development is not adversely affected by landslide activity originating on sloping land above the site; d. emergency access and access from the site for the public and emergency vehicles is available and is not at risk from landslide. 	 Buildings, excluding domestic outbuildings: a. are split-level, multiple-slab, pier or pole construction; b. are not single plane slab on ground. A032 Development does not involve the manufacture, handling or storage of hazardous chemicals.	
Infrastructure buffers (refer Overlay map - Infrastruct criteria apply)	ture buffers to determine if the following assessment	
P033	AO33	
Odour sensitive development is separated from Wastewater treatment plants so they are not adversely affected by odour emission or other air pollutant impacts.	The following uses are not located within a wastewater treatment plant buffer: a. Caretaker's accommodation ⁽¹⁰⁾ ; b. Community residence ⁽¹⁶⁾ ; c. Dual occupancy ⁽²¹⁾ ; d. Dwelling house ⁽²²⁾ e. Dwelling unit ⁽²³⁾ ; f. Hospital ⁽³⁶⁾ ; g. Rooming accommodation ⁽⁶⁹⁾ ; h. Multiple dwelling ⁽⁴⁹⁾ ; i. Non-resident workforce accommodation ⁽⁵²⁾ ; j. Relocatable home park ⁽⁶²⁾ ; k. Residential care facility ⁽⁶⁵⁾ ; l. Resort complex ⁽⁶⁶⁾ ; m. Retirement facility ⁽⁶⁷⁾ ; n. Rural workers' accommodation ⁽⁷¹⁾ ; o. Short-term accommodation ⁽⁷⁷⁾ ; p. Tourist park ⁽⁸⁴⁾ .	

PO34	A034.1		
Development within a Water supply buffer captures solid or liquid waste from all land use, development and activities is designed, constructed and managed to prevent the release of contaminants to surface water or groundwater bodies.	Run-off and sediment from roadways and impervious surfaces within a Water supply buffer are intercepted and treated on-site to remove oil, grease, chemicals, silt, trace metals and nutrients such as nitrogen and phosphorous.		
	A034.2		
	Incineration or burial of waste within a Water supply buffer is not undertaken onsite.		
	A034.3		
	Solid waste within a Water supply buffer is collected and stored in weather proof, sealed waste receptacles, located in roofed and bunded areas, for disposal by a licenced contractor.		
	A034.4		
	Holding tanks within a Water supply buffer are used for all liquid waste and provide for the separation of oils/solvents and solids prior to pump-out and collection by a licenced contractor.		
	A034.5		
	Management, handling and storage of hazardous chemicals (including fuelling of vehicles) within a Water supply buffer, is undertaken in secured, climate controlled, weather proof, level and bunded enclosures.		
PO35	A035		
On-site sewerage systems within a Water supply buffer are designed and operated to ensure there is no worsening or adverse impacts to health risks, environmental risks and water quality. Editor's Note - For guidance refer to the Seq water Development Guidelines: Development Guidelines for Water Quality Management in Drinking Water Catchments 2012.	Secondary treated wastewater treatment systems within a Water supply buffer include:		
	 emergency storage capable of holding 3-6 hours peak flow of treated effluent in the event of emergencies or overload with provision for de-sludging; 		
	b. back up pump installation and backup power;		
	c. MEDLI modelling to determine irrigation rates and sizing of irrigation areas;		
	d. vegetated land application areas are not located in overland flow paths or on areas that perform groundwater recharge or discharge functions; and		
	e. wastewater collection and storage systems have a capacity to accommodate full load at peak times and includes temporary facilities.		
PO36	AO36		

 Development within a Bulk water supply infrastructure buffer is located, designed and constructed to: a. protect the integrity of the water supply pipeline; b. maintain adequate access for any required maintenance or upgrading work to the water supply pipeline; PO37 	 Development: a. does not involve the construction of any buildings or structures within a Bulk water supply infrastructure buffer; b. involving a major hazard facility or environmentally relevant activity (ERA) is setback 30m from a Bulk water supply infrastructure buffer. 	
Development is located and designed to maintain required access to Bulk water supply infrastructure.	 Development does not restrict access to Bulk water supply infrastructure of any type or size, having regard to (among other things): a. buildings or structures; b. gates and fences; c. storage of equipment or materials; d. landscaping or earthworks or stormwater or other infrastructure. 	
PO38 Odour sensitive development is separated from landfill sites so they are not adversely affected by odour emission or other air pollutant impacts.	AO38 The following uses are not located within a Landfill buffer: a. Caretaker's accommodation ⁽¹⁰⁾ ; b. Community residence ⁽¹⁶⁾ ; c. Dual occupancy ⁽²¹⁾ ; d. Dwelling house ⁽²²⁾ ; e. Dwelling unit ⁽²³⁾ ; f. Hospital ⁽³⁶⁾ ; g. Rooming accommodation ⁽⁶⁹⁾ ; h. Multiple dwelling ⁽⁴⁹⁾ ; i. Non-resident workforce accommodation ⁽⁵²⁾ ; j. Relocatable home park ⁽⁶²⁾ ; k. Residential care facility ⁽⁶⁵⁾ ; l. Resort complex ⁽⁶⁶⁾ ; m. Retirement facility ⁽⁶⁷⁾ ; n. Rural workers' accommodation ⁽⁷¹⁾ ; o. Short-term accommodation ⁽⁷⁷⁾ ; p. Tourist park ⁽⁸⁴⁾ .	
PO39	AO39	
 Development within a High voltage electricity line buffer provides adequate buffers to high voltage electricity lines to protect amenity and health by ensuring development: a. is located and designed to avoid any potential adverse impacts on personal health and wellbeing from electromagnetic fields in accordance with the principle of prudent avoidance; b. is located and designed in a manner that maintains a high level of security of supply; c. is located and design so not to impede upon the functioning and maintenance of high voltage electrical infrastructure. 	Development does not involve the construction of any buildings or structures within a High voltage electricity line buffer.	
PO40	AO40	

premises, public lands, watercourses, roads or infrastructure.	
Note - Open concrete drains greater than 1m in width are not an acceptable outcome, nor are any other design options that may increase scouring.	
PO44 Development ensures that public safety and the risk to the environment are not adversely affected by a detrimental impact of overland flow on a hazardous chemical located or stored on the premises.	AO44 Development ensures that a hazardous chemical is r located or stored in an Overland flow path area. Note - Refer to the Work Health and Safety Act 2011 and associat Regulation and Guidelines, the Environmental Protection Act 197 and the relevant building assessment provisions under the Buildi Act 1975 for requirements related to the manufacture and storag of hazardous substances.
PO45 Development which is not in a Rural zone ensures that overland flow is not conveyed from a road or public open space onto a private lot.	AO45 Development which is not in a Rural zone that an overland flow paths and drainage infrastructure is provided to convey overland flow from a road or publ open space area away from a private lot.
 PO46 Development ensures that inter-allotment drainage infrastructure, overland flow paths and open drains through private property cater for overland flows for a fully developed upstream catchment and are able to be easily maintained. Note - A report from a suitably qualified Registered Professional Engineer Queensland is required certifying that the development does not increase the potential for significant adverse impacts on an upstream, downstream or surrounding premises. Note - Reporting to be prepared in accordance with Planning scheme policy – Flood hazard, Coastal hazard and Overland flow 	 AO46.1 Development ensures that roof and allotment drainage infrastructure is provided in accordance with the follow relevant level as identified in QUDM: a. Urban area – Level III; b. Rural area – N/A; c. Industrial area – Level V; d. Commercial area – Level V. AO46.2 Development ensures that inter-allotment drainage infrastructure is designed to accommodate any event to and including the 1% AEP for the fully developed upstream catchment.
 PO47 Development protects the conveyance of overland flow such that an easement for drainage purposes is provided over: a. a stormwater pipe if the nominal pipe diameter exceeds 300mm; b. an overland flow path where it crosses more than one premises; c. inter-allotment drainage infrastructure. 	No acceptable outcome provided.

		Т	
	te - Refer to Planning scheme policy - Integrated design for details d examples.		
	te - Stormwater Drainage easement dimensions are provided in cordance with Section 3.8.5 of QUDM.		
Add	ditional criteria for development for a Park ⁽⁵⁷⁾		
PO4	48	PO48	
layc	velopment for a Park ⁽⁵⁷⁾ ensures that the design and out responds to the nature of the overland flow octing the premises such that:	Development for a Park ⁽⁵⁷⁾ ensures works are provided in accordance with the requirements set out in Appendix B of the Planning scheme policy - Integrated design.	
a.	public benefit and enjoyment is maximised;		
b.	impacts on the asset life and integrity of park structures is minimised;		
C.	maintenance and replacement costs are minimised.		
Rip	arian and wetland setbacks		
PO4	49	AO49	
fron env	velopment provides and maintains a suitable setback n waterways and wetlands that protects natural and ironmental values. This is achieved by recognising responding to the following matters:	Development does not occur within: a. 50m from top of bank for W1 waterway and drainage line	
a.	impact on fauna habitats;	b. 30m from top of bank for W2 waterway and drainage line	
b. c.	impact on wildlife corridors and connectivity; impact on stream integrity;	c. 20m from top of bank for W3 waterway and drainage line	
d.	impact of opportunities for revegetation and rehabilitation planting;	d. 100m from the edge of a Ramsar wetland, 50m from all other wetlands.	
e.	edge effects.	Note - W1, W2 and W3 waterway and drainage lines, and wetlands are mapped on Schedule 2, Section 2.5 Overlay Maps – Riparian and wetland setbacks.	
Scenic amenity - Regionally significant (Hills) and Locally important (Coast) (refer Overlay map - Scenic amenity to determine if the following assessment criteria apply)			
PO	50	AO50	
Dev	velopment:	Where located in the Regionally significant (Hills) scenic amenity overlay, buildings and structures are not:	
a. b.	avoids being viewed as a visually conspicuous built form on a hill top or ridgeline; retain the natural character or bushland settings as the dominant landscape characteristic:	 a. located on a hill top or ridge line; b. all parts of the building and structure are located below the hill top or ridge line. 	

the dominant landscape characteristic;c. is viewed as being visually consistent with the natural landscape setting and does not diminish

below the hill top or ridge line.

	the scenic and visual qualities present in the environment.			
PO51		AO51		
a. b.	does not adversely detract or degrade the quality of views, vista or key landmarks; retains the natural character or bushland settings as the dominant landscape characteristic.	 Where located in the Regionally significant (Hills) scenic amenity overlay, driveways and accessways: a. go across land contours, and do not cut straight up slopes; b. follow natural contours, not resulting in batters or retaining walls being greater than 900mm in height. 		
 PO52 Buildings and structures incorporate colours and finishes that: a. are consistent with a natural, open space character and bushland environment; 		AO52.1 Where located in the Regionally significant (hills) scenic amenity overlay, roofs and wall surfaces of buildings and structures adopt the following colours: Colours from Australian Standard AS2700s – 1996		
b.	do not produce glare or appear visual incompatible with the surrounding natural character and bushland	G12 – Holly	G54 – Mist Green	N 44 – Bridge Grey
C.	environment; are not visually dominant or detract from the natural	G13 – Emerald	G55 – Lichen	N45 – Koala Grey
	qualities of the landscape.	G14 – Moss Green	G56 – Sage Green	N52 – Mid Grey
	G15 – Rainforest Green	G62 – Rivergum	N54 – Basalt	
		G16 – Traffic Green	G64 – Slate	N55 – Lead Grey
	G17 – Mint Green	G65 – Ti Tree	X54 – Brown	
	G21 – Jade	N25 – Birch Grey	X61 – Wombat	
		G22 – Serpentine	N32 – Green Grey	X62 – Dark Earth
		G23 – Shamrock	N33 – Lightbox Grey	X63 – Iron Bark
	+ 6	G24 – Fern Green	N35 – Light Grey	Y51 – Bronze Olive
		G25 – Olive	N41 – Oyster	Y61 – Black Olive
		G34 – Avocado	N42 – Storm Grey	Y63 – Khaki
		G52 – Eucalyptus	N43 – Pipeline Grey	Y66 – Mudstone
		G53 – Banksia		
		AO52.2		
		Where located in the Regionally significant (hills) scenic amenity overlay, roofs and wall surfaces of buildings and structures are painted or finished such that reflectivity is less than 35%.		
PO	53	AO53		
Lan	dscaping	Where located in the Locally Important (Coast) scenic amenity overlay:		

6 Zones

- a. complements the coastal landscape character and a. landscaping comprises indigenous coastal species; amenity; fences and walls are no higher than 1m; and b. has known resilience and robustness in the coastal b. existing pine trees, palm trees, mature fig and C. environment: cotton trees are retained. d. where over 12m in height, the building design Fences and walls: includes the following architectural character elements: do not appear visually dominant or conspicuous a. within its setting; i. curving balcony edges and walls, strong reduce visual appearance through the use of built b. vertical blades and wall planes; form articulation, setbacks, and plant screening; ii. balcony roofs, wall articulation expressed with use materials and colours that are complementary C. different colours, curves in plan and section, to the coastal environment. and window awnings; iii. roof top outlooks, tensile structures as shading Building design responds to the bayside location and devices; complements the particular bayside character and lightweight structures use white frame iv. amenity by adopting and incorporating a range of elements in steel and timber, bold colour architectural character elements. contrast.
- a. retained;
- b. protected from development diminishing their significance.
