

The Mill Open Space - Event Management Requirements

Vehicular Access

If vehicular access to the oval is required to transport large items such as a temporary stage, then the requirements are:

- The access route to be via the yellow gate at the car park cul de sac and the reinforced turf section (red hatched)
- Vehicle maximum of 4.5 Tonne GVM to cross the path and traverse the oval.
- Utility Services pit lids maximum wheel load of 2.7 Tonne
- Heavy vehicle access will require special approval and provision of load spreading mats
- Avoid screwing, turning etc of vehicles on the oval to prevent damage to the turf surface or sprinkler heads
- No vehicles to cross the cricket pitch
- The Oval and surrounding turf areas are fully irrigated with a network of pipes and electrical control cables
- No hammering in of posts, spikes, pegs etc is permitted without prior accurate services location and approval
- No petrol/diesel generators on the oval unless an integrated containment system (trailer mounted) is included
- No refuelling of generators etc within the park

Food Preparation/Sales

- Food preparation and sales to be located on the food truck designated areas on the reinforced turf adjacent the power and water pillars
- Vehicular access to be either via the pathway on the west side of the oval or the maintenance access driveway off Moreton Parade
- Removal bollards (white) are in place on the path
- Vehicles limited to maximum of 4.5 Tonne GVM
- Utility Services pit lids maximum wheel load of 2.7 Tonne
- No hammering in of posts, spikes, pegs etc is permitted in the food truck area to avoid damage to the soil reinforcing cells and underground services - gazebos/marqueses must be weighted down only.
