Shading of Streetlights

**Policy No:** 10-2150-012

### Head of Power

Local Government Act 2009

### Objective

To address the concerns of residents when a streetlight glare problem is reported and determine the need for a streetlight shade, taking into consideration the general standard of lighting in the area, traffic safety and needs of pedestrians.

### Definitions/Application

#### Definitions

**Shade** - Screen excluding or moderating light.

**Freehold land** - Land held by owner in absolute possession.

**Streetlighting Authority's Fee** - Standard charge for streetlighting glare treatments, reviewed as required by the Streetlighting Authority and endorsed by the Queensland Competition Authority.

#### Application

This policy applies to streetlights which existed prior to the requestor's occupation of the residence and new streetlight installations arranged by Developers or Council. It applies to all roads and pathways controlled by Moreton Bay Regional Council, but not to streetlights on declared main roads or private roads on freehold land.

### Policy Statement

Installation of new streetlights is arranged by Developers and Council to provide illumination of paths; illumination of the carriageway and to provide security for properties.

Streetlights installed as a condition of development will be in accordance with Australian Standard 1158 “Lighting for Roads & Public Spaces” and Council's Streetlighting Guidelines. When new streetlights are approved and installed as part of a new subdivision or development, consideration must be given to the potential impact of glare on any adjacent existing residences.

Where light from a streetlight is causing excessive nuisance to a resident, then the resident can request installation of a shade.

Council's Corporate Services Division undertakes the investigation and administration functions associated with streetlight shading requests, in accordance with the fee shown each year in Council's Fees & Charges Schedule. Installation of approved shading to any street light which is the subject of this policy, will be undertaken by Energex or their authorised agent on payment of the Streetlighting Authority's fee.

An assessment of the streetlight and surrounding area is required. Before agreeing to the shading of streetlights, consideration will be given to the general standard of lighting in the area, traffic safety and needs of pedestrians.

The outcome of the investigation will ascertain whether a shade is required, the type of shade and who is responsible for payment of the relevant fees.
- Shading of streetlights which existed prior to the requestor’s occupation of the residence will be at the resident’s cost.
- Where circumstances relating to private property have caused the nuisance eg removal of trees from private property, building alterations etc; shading will be at the resident’s cost.
- Where new lamps or bulbs are fitted to existing lights by the Streetlighting Authority during routine maintenance; shading will be at the resident’s cost.
- If works carried out or requested by Council have caused the nuisance; shading will be at Council’s cost.
- When new streetlights, installed as part of a new subdivision or development, cause excessive nuisance to existing adjacent residences; shading will be at the Developer’s cost.

**Review Triggers**

This Policy is reviewed internally for applicability, continuing effect and consistency with related documents and other legislative provisions when any of the following occurs:

1. The related documents are amended.
2. The related documents are replaced by new documents.
3. Amendments which affect the allowable scope and effect of a Policy of this nature are made to the head of power.
4. Other circumstances as determined from time to time by a resolution of Council.

Notwithstanding the above, this Policy is to be reviewed at least once every two years for relevance and to ensure that its effectiveness is maintained.

**Responsibility**

This Policy is to be:

1. implemented by the Asset Management Manager; and
2. reviewed and amended in accordance with the “Review Triggers” by the Asset Management Manager.

**Version Control**
