NOTES

1. Batter drains are to be positioned adjacent to culverts and where surface flows on Shoulders encroach on the driving lane and in accordance with the International Erosion Control Association – Best Practice for Erosion and Sediment Control Chapter 4.3.

2. Shoulder dyke may be cut or superimposed to remove roadway crossfall slopes away from shoulder or where fill batter is less than 1.0m in height.

3. Catch drains are to be treated as for swale drains unless STD DWG MBRC-1105.

4. For dimensions A, B & C refer to Table 2 or STD DWG MBRC-1105.

5. The dimension to be reduced to 1000 when there is no flow from this direction.

6. Final position of batter drains and extent of shoulder dykes to be determined by Council’s Engineer.
